13. Type of Report and Period Covered Forecast of Air Route Traffic Control Center Activity FY 1978-1989	14. Sponsoring Agency Code	15. Supplementary Notes
16. Abstract The report presents the forecasts of Instrument Flight Rule (IFR) aircraft handled by FAA air route traffic control centers (ARTCC). It serves as a base for the FAA planning and budget process in determining future requirements for facilities, equipment and manpower. The forecasts show that total aircraft handled will increase from 25.7 million in FY 1977 to 41.5 million in FY 1989. These national total numbers along with those for the intervening years are broken down by FAA region and by each air route traffic control center in this report.

INTRODUCTION

This report provides forecasts of Instrument Flight Rule (IFR) aircraft handled by Federal Aviation Administration (FAA) air route traffic control centers (ARTCC). See Figure 1. It serves as a base for the FAA planning and budget process in determining future requirements for facilities, equipment, and manpower.

Forecasts of IFR aircraft departures and overs by air carrier, air taxi, general aviation, and military categories are presented for fiscal year 1978, through 1989 for ARTCC's in each of the eleven FAA regions. It should be noted that air taxi operations at centers began to be counted separately on July 1, 1971. Prior to July 1, 1971, much of the air taxi count was included in the air carrier statistics. This change accounts for a decline in national air carrier activity in fiscal year 1972 which is reflected in the data for many individual centers.

The national forecast of IFR aircraft handled, as reported in Aviation Forecasts, Fiscal Years 1978-1989, calls for a modest growth in air carrier activity, a substantial increase in general aviation and air taxi IFR flying, and stabilized level of military activity. See Figure 2. The forecasts for the

IFR Aircraft Handled at FAA ARTCCs

Figure 2

individual centers were derived by first analyzing the past relationship of each data series to the respective national totals. Based on this analysis, estimates were made of the future percentage each series will be of the national forecast. The resulting activity levels were next compared with each center's historical trend. Adjustments, as necessary, were made for consistency with these trends after taking into account inputs from FAA regional offices, announced plans of DOD (e.g., base closings and transfers) and known alterations in center boundaries. Major examples of the latter include the transfer of a portion of Iowa and Nebraska from the Chicago ARTCC to the Minneapolis ARTCC in November 1971, and the phase out of the Great Falls ARTCC in 1976.

The impact on center activity of expanded positive control of airspace, a greater number of airports with terminal control areas, and expanded radar service by FAA towers will continue to be monitored in order to give them proper weight in the forecast. To date, their impact appears to have been minimal.

An index to FAA regions and air route traffic control centers is included on the following page in order to facilitate the use of this report. Although regional and center boundaries do not coincide, for purposes of this report the total for a region includes all aircraft handled by centers headquartered within that region.

This report is one of a series of specialized aviation forecast studies issued annually by the FAA Aviation Forecast Branch, Office of Aviation Policy. The series includes "Aviation Forecasts 1978-1989," "Terminal Area Forecast 1978-1989," and "IFR Aircraft Handled Forecast by Air Route Traffic Control Centers 1978-1989." Copies of these reports are available from the National Technical Information Service, 5285 Port Royal Road, Springfield, Virginia 22151. Information on the sales price may be obtained from them.

Further information on specific projections and their underlying assumptions are available from the Aviation Forecast Branch (AVP-120), Federal Aviation Administration, Washington, D.C. 20591, phone area code 202-426-3103.
