APPENDIX A: COMPONENT DICTIONARY CODE LIST A-1

1
INTRODUCTION

The Ship Systems Definition and Index (SSDI) is an orderly identification and structuring of the systems and subsystems that make up a ship. In defining ship systems as well as their boundaries and interfaces, the SSDI creates a common language for communicating information about ship configurations. The SSDI is thus useful to all Navy activities involved in the life-cycle operation, maintenance, modernization, and support of ships.

This report discusses the general properties of SSDIs (Section 2), and the many ways SSDIs can be utilized by the various Navy activities (Section 3); and presents the SSDIs developed for the DDG-2 ship class (Section 4).

2
PROPERTIES OF SSDI

The hierarchical concept on which the Ship Systems Definition and Index is based is illustrated in Figure 1. As can be seen, the SSDI is structured such that the summation of SSDI items at any level defines the total ship. An actual application of Figure 1, showing a typical ship breakdown from the major system to the sub-subsystem level, is shown in Figure 2.

As illustrated by Figures 1 and 2, the SSDI is structured to:

a. Provide a multi-level breakdown of a ship's configuration.

b. Completely define the ship at each level.

c. Contain no redundancies in its definition of the ship.

d. Utilize the Ship Work Breakdown Structure (SWBS). This provides a standard language based on the same nomenclature and three-level coding system mandatory for use on a Navy-wide basis.

e. Utilize a standard Navy Component Dictionary Code list (see Appendix A) for assigning fifth-level identification codes. The last two characters of the identifier are from this list, e.g., 2551M7.

f. Tailor the SWBS to the configuration of a specific ship class. The ship class diagrams can in turn be tailored to the configuration of individual ships within the class.

Figure 3 extends a portion of Figure 2 to an additional level of detail to demonstrate the information provided in the SSDI. As shown, the following are identified:

a. System equipments

b. System boundaries

c. Shipboard maintenance work centers

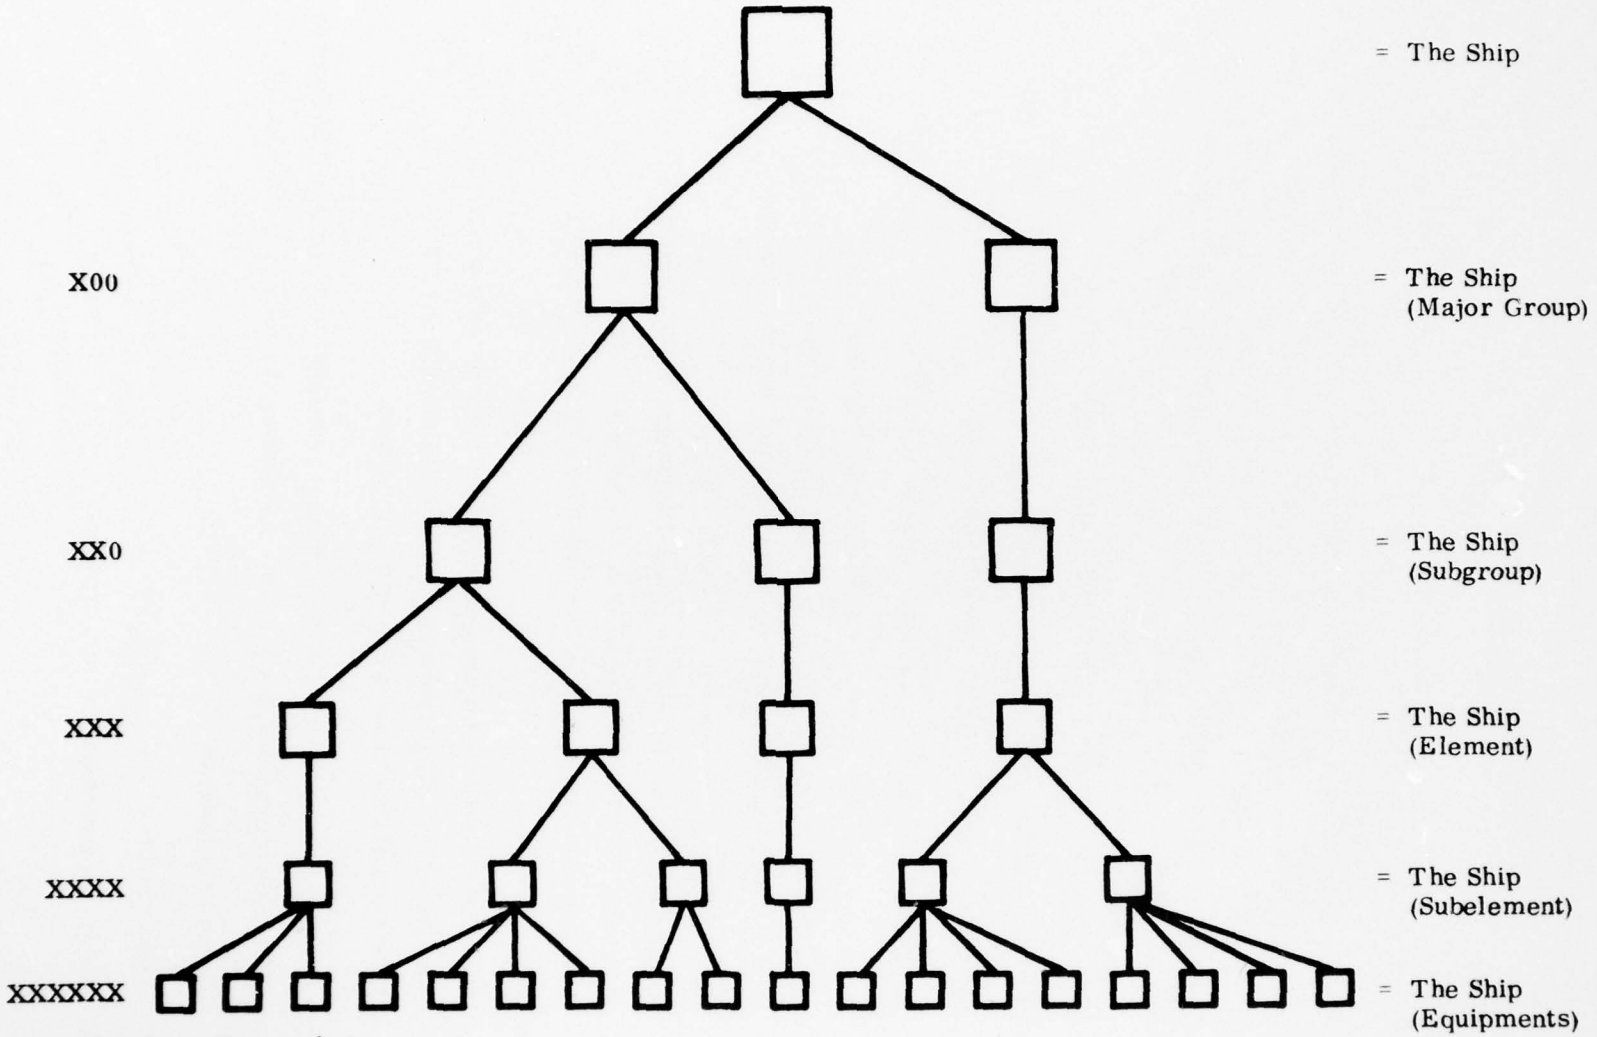

Figure 1. SSDI Concept

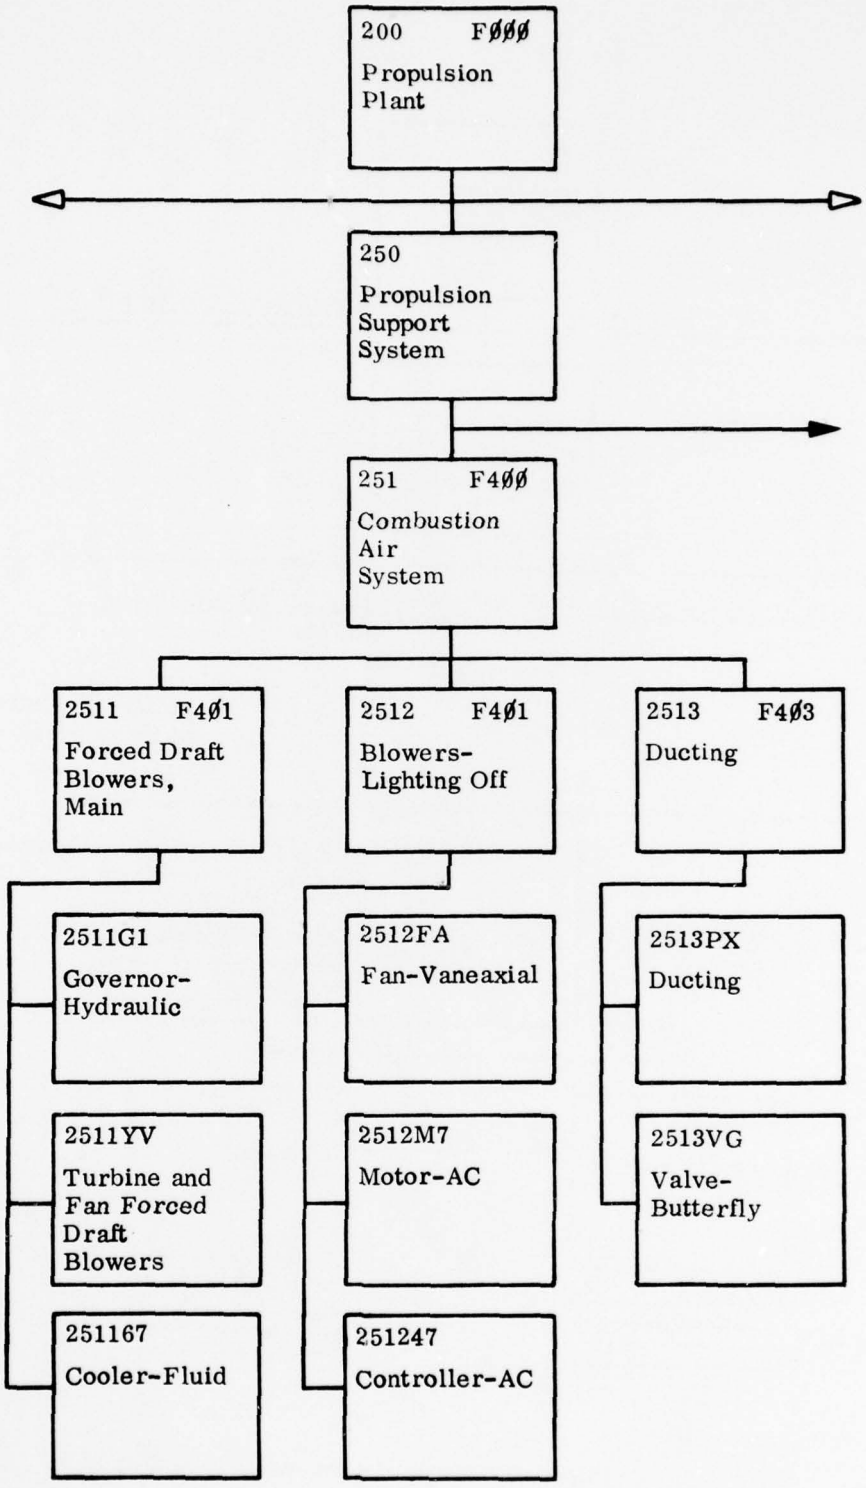

Figure 2. Portion of a Typical Ship's System

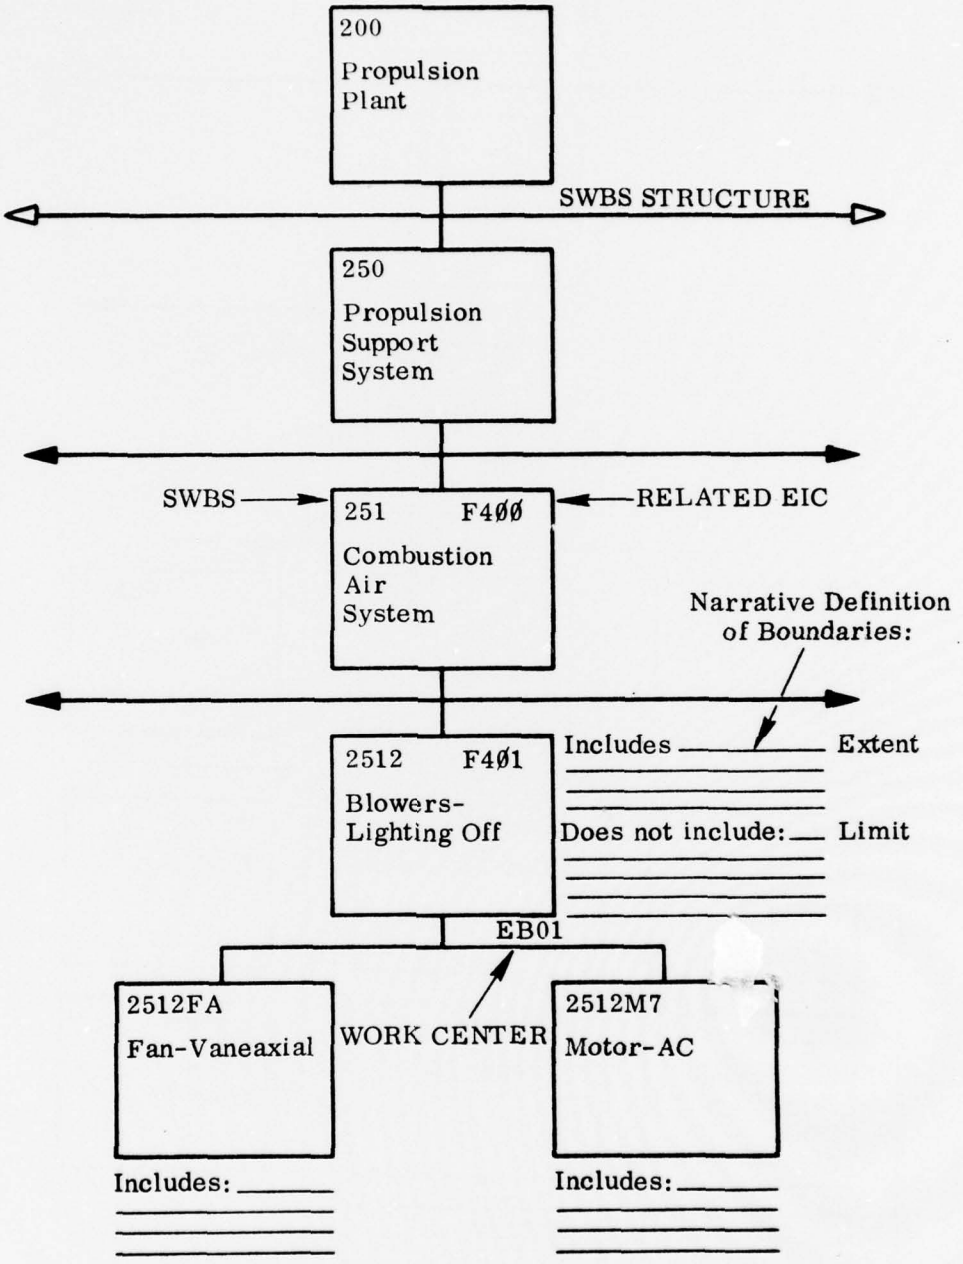

Figure 3. Example of System Diagrams Included in SSDI

In some cases, notably for the more complicated systems, the SSDI provides still further information in the form of line diagrams that:

a. Show the major hardware items within the system boundaries and their interrelationships.

b. Depict graphically the verbal descriptions given on system diagrams for selected SWBS-coded items. Those systems which are complex and interface with other complex systems are diagrammed as Figure 4 indicates.

In a line diagram, solid lines with the system boundary denote equipments or components which are part of that particular system. Dashed lines show interfaces between those equipments/components and elements of other systems (see Figure 4).

Although some line diagrams show functional relationships, that is not their intent. Their specific purpose is to aid in the identification of ship systems. For that reason the schematics are greatly simplified from the actual configuration. For example, although there may be two or more identical forced-draft blowers used in a condensate system, only one is shown on the schematic (see Figure 4). This is because all blowers of the same type are part of the same system.

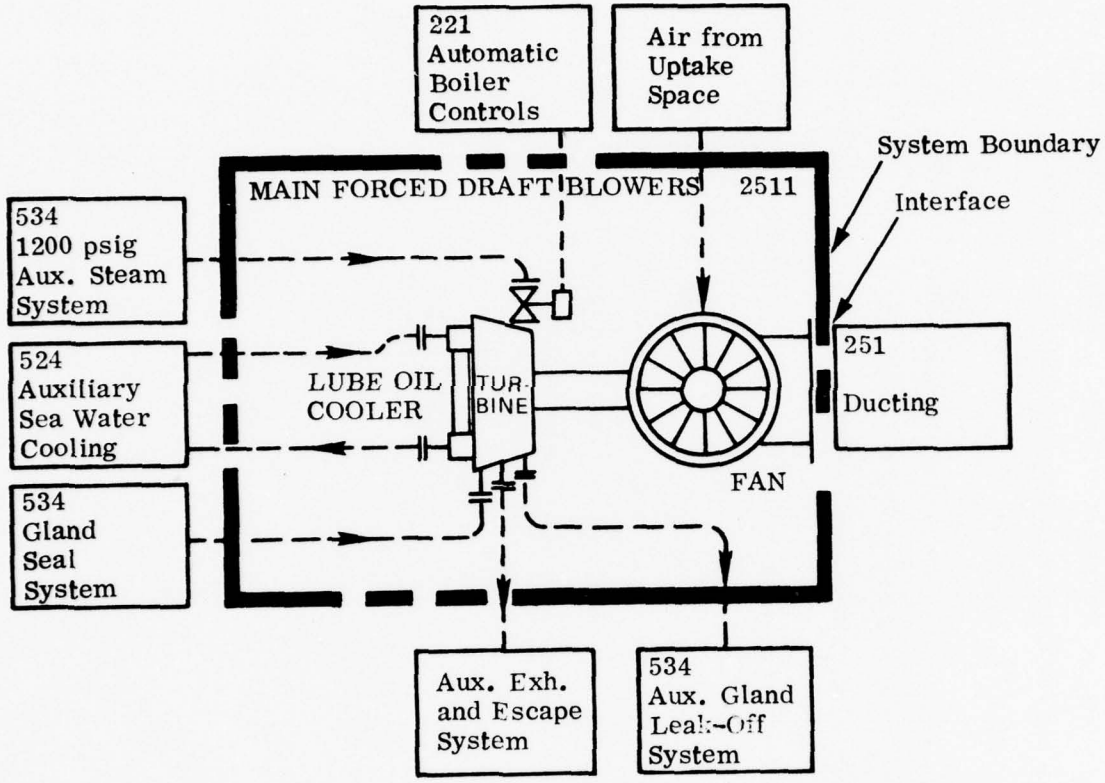

Figure 4. Example of Line Diagrams Included in SSDI

3
USES OF SSDI

Throughout a ship's life, ship's force personnel submit a vast amount of system, equipment, and parts information to their type commander and fleet support activities. Requests for alteration, reports of maintenance action, work requests, and parts requisitions are but a few examples. In each instance the submitted information must be related to a specific, definable portion of the ship.

In carrying out their responsibilities, the type commander and the support activities (PERAs, shipyards, etc.) must not only identify a specific item within the total ship, but also be aware of its interfaces. In planning alterations or modifications, for example, one must be able to identify the various systems that will be affected by a particular change to a ship's configuration. Also, when preparing for overhaul or other availabilities, the type commander, PERA, and repair activities must be able to organize a work package on the basis of specific as well as interrelated ship systems. This is done to ensure that the work package is completely and effectively defined.

Since so many activities are involved in supporting the ship, it is necessary that both ship and support personnel use a single, uniform language when communicating configuration information. The Ship Systems Definition and Index provides this common language by describing a specific ship in terms common to all ships of the fleet. Potential uses of the SSDI are outlined below.

3.1 SSDI SUPPORT TO SHIP'S FORCE

3.1.1 Maintenance

a. Serves as a checklist for planning and conducting inspections.

b. Provides the basis for comparing repair items with alterations.

c. Aids in establishing repair priorities.

d. Assists in identifying shipyard, ship's force, and tender interfaces.

e. Assists in making manpower assignments by ensuring that all systems of the ship are considered.

f. Aids ship's force in "buttoning up" all systems for post-repair testing.

g. Aids in alteration planning and analysis by showing possible interfaces in terms of various ship systems.

h. Aids in standardizing shipboard validation procedures.

i. Provides a means for identifying deficiencies in shipboard documentation such as the Coordinated Shipboard Allowance List (COSAL), Planned Maintenance System (PMS), etc.

j. Assists in identifying related Equipment Identification Codes (EIC) necessary for CSMP and Maintenance Data Collection System (MDCS) inputs.

k. Provides a standard language for maintenance documentation.

l. Provides a common set of system descriptions for the development of maintenance instructions (PMS) and operating instructions (Equipment Operational Sequencing System, EOSS).

3.1.2 Operation

a. Serves as a checklist for determining the completeness of EOSS coverage.

b. Provides a means of identifying the interrelationships among operating systems.

c. Identifies the boundaries for system testing.

d. Provides a means of determining test equipment and support requirements.

3.1.3 Training

a. Provides a disciplined method for displaying a ship's configuration, thereby identifying training requirements from the equipment through the system level.

b. Supports training shipboard operation/maintenance personnel in ship systems and system interfaces.

3.2 SSDI SUPPORT TO OTHER NAVAL ACTIVITIES

3.2.1 PERAs/Shipyards/Industrial Activities

a. Defines ship systems for alteration and repair planning.

b. Provides a standard indexing language for:

- Ship Alteration and Repair Package (SARP)
- Specification preparation
- Cost estimating and cost progressing
- Drawing numbering
- Material identification and ordering
- POT&I planning and organization
- Management information systems

c. Assists in determining priorities of work by displaying the affected equipment in relation to its system.

3.2.2 Ship Equipment Configuration Accounting System (SECAS)

a. Provides a standard structure for total shipboard validation.

b. Provides information for determining the desired level of validation.

3.2.3 Technical Systems Commands (NAVSEA, NAVELEX, NAVSUP)

a. Aids in determining the SWBS identification of alterations for inclusion in shipalt records and subsequently in other Navy data bases.

b. Identifies ship systems such that the impact of alterations can be determined and decisions made concerning recommended priorities for inclusion in the Fleet Modernization Program (FMP).

c. Provides a means for ensuring that standard failure-data correlation and analysis is performed to the desired level.

3.2.4 Type Commanders (TYCOMs)

a. Aids in determining work priorities by displaying the affected equipment in relation to its system.

b. Identifies the system such that the impact of alterations can be determined and decisions made concerning recommended priorities for inclusion in the FMP.

c. Enables the TYCOM to properly identify and budget the system for repairs.

3.2.5 Naval Ships Engineering Center (NAVSEC)

a. Provides a vehicle for ensuring that standard failure-data correlation and analysis is performed to the desired level.

b. Defines the systems for design consideration and subsequent corrective measures such as the Detection, Action, Response Technique (DART) program.

c. Provides information for determining the required level of repair parts support requirements.

3.2.6 Fleet Support Activities

a. Identifies shipboard systems as an aid in determining personnel and material requirements in response to solving specific ship problems.

b. Serves as a tool for establishing required support capabilities (people and equipment).

4
SSDI FOR DDG-2 CLASS SHIPS

4.1 SSDI INDEX

The SSDI for DDG-2 class ships is presented on the following pages. The diagrams are presented in the order indicated below.

a. Index Diagrams	Page
Overall	17
100 - Hull Structure	18
200 - Propulsion Plant	19
300 - Electric Plant	20
400 - Command and Surveillance	21
500 - Auxiliary Systems	22
600 - Outfit and Furnishings	23
700 - Armament	24
800 - Integration/Engineering	25
b. Legend of Symbols	27
c. SSDIs	
100 - Hull Structure	31
200 - Propulsion Plant	43
300 - Electric Plant	85
400 - Command and Surveillance	99
500 - Auxiliary Systems	137
600 - Outfit and Furnishings	189
700 - Armament	213
800 - Integration/Engineering	229

The Legend of Symbols supports the line diagrams that accompany certain of the ship system diagrams.

4.2 GENERAL COMMENTS

The following general comments apply to the DDG-2 class SSDIs:

a. This SSDI is structured to encompass the entire DDG-2 class, i.e., all identified combinations of systems and equipments have been included. Individual ships will not necessarily have all identified components because of such conditions as ship alterations that have/have not been accomplished, variations due to construction differences, etc.

b. In each WBS group, elements X01 through X09 are used for general requirements, and element X98 for operating liquids. These nonhardware elements are indicated by dashed blocks.

c. To maintain the principle of having equipments/components at the fifth level, some element titles have been repeated at the fourth and fifth levels and appropriately numbered, e.g., element 115.

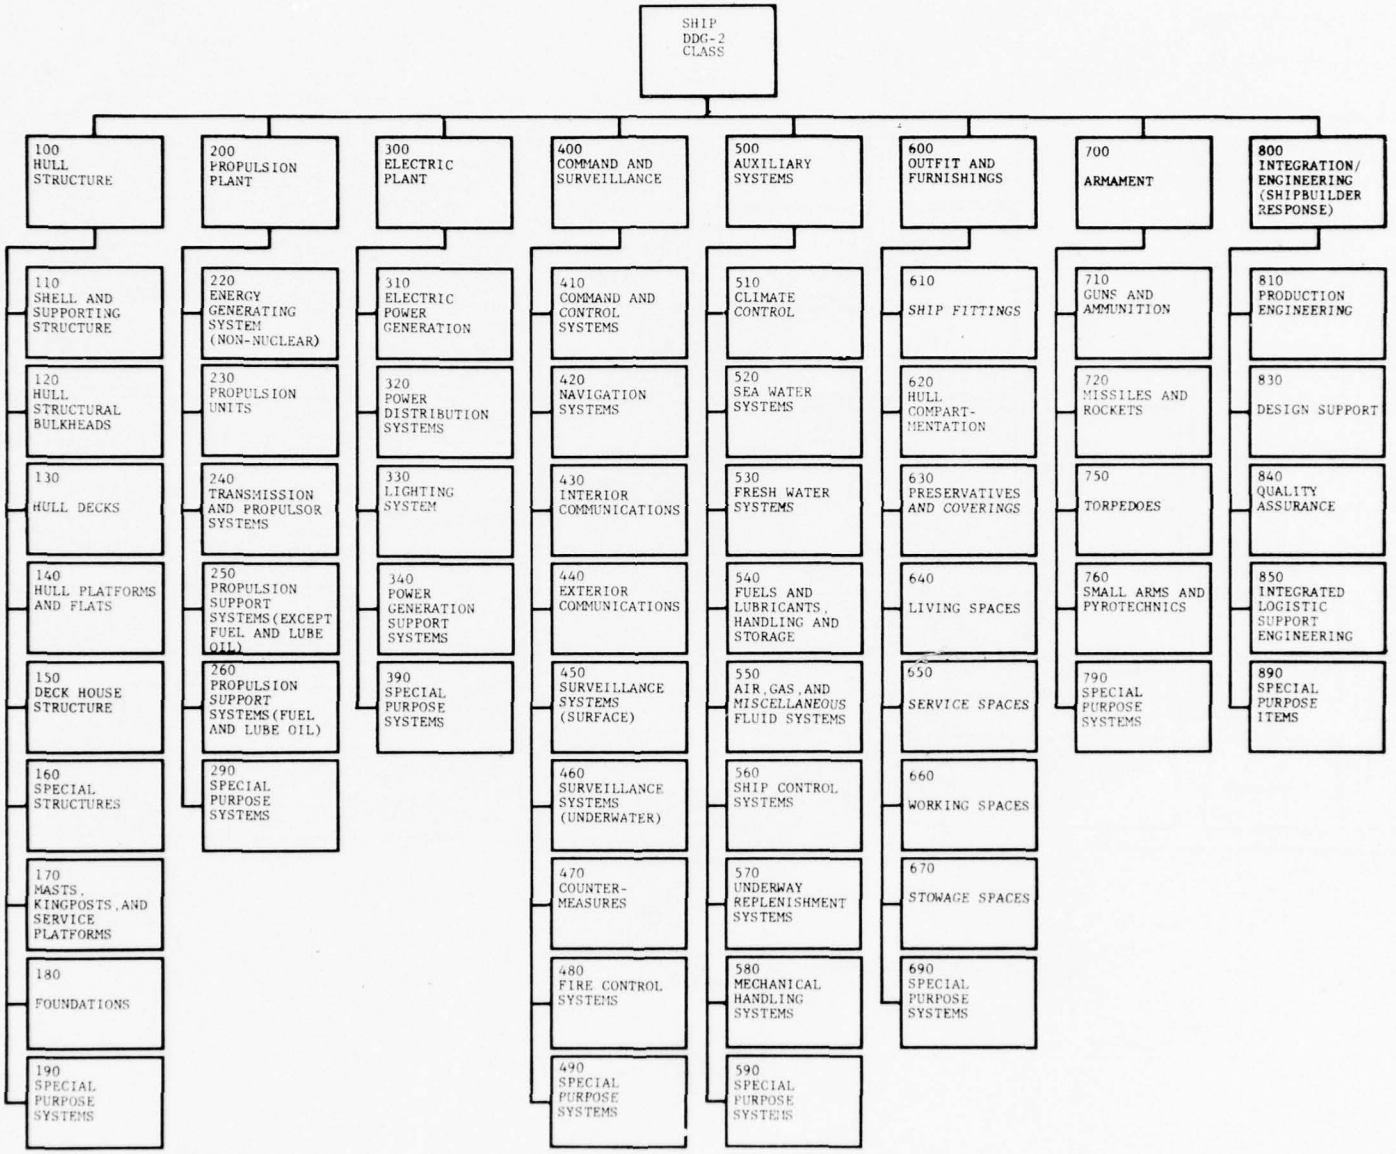

d. The term "With System", or "W.S.", indicates that the item is coded with the system of which it is a part or which it serves.

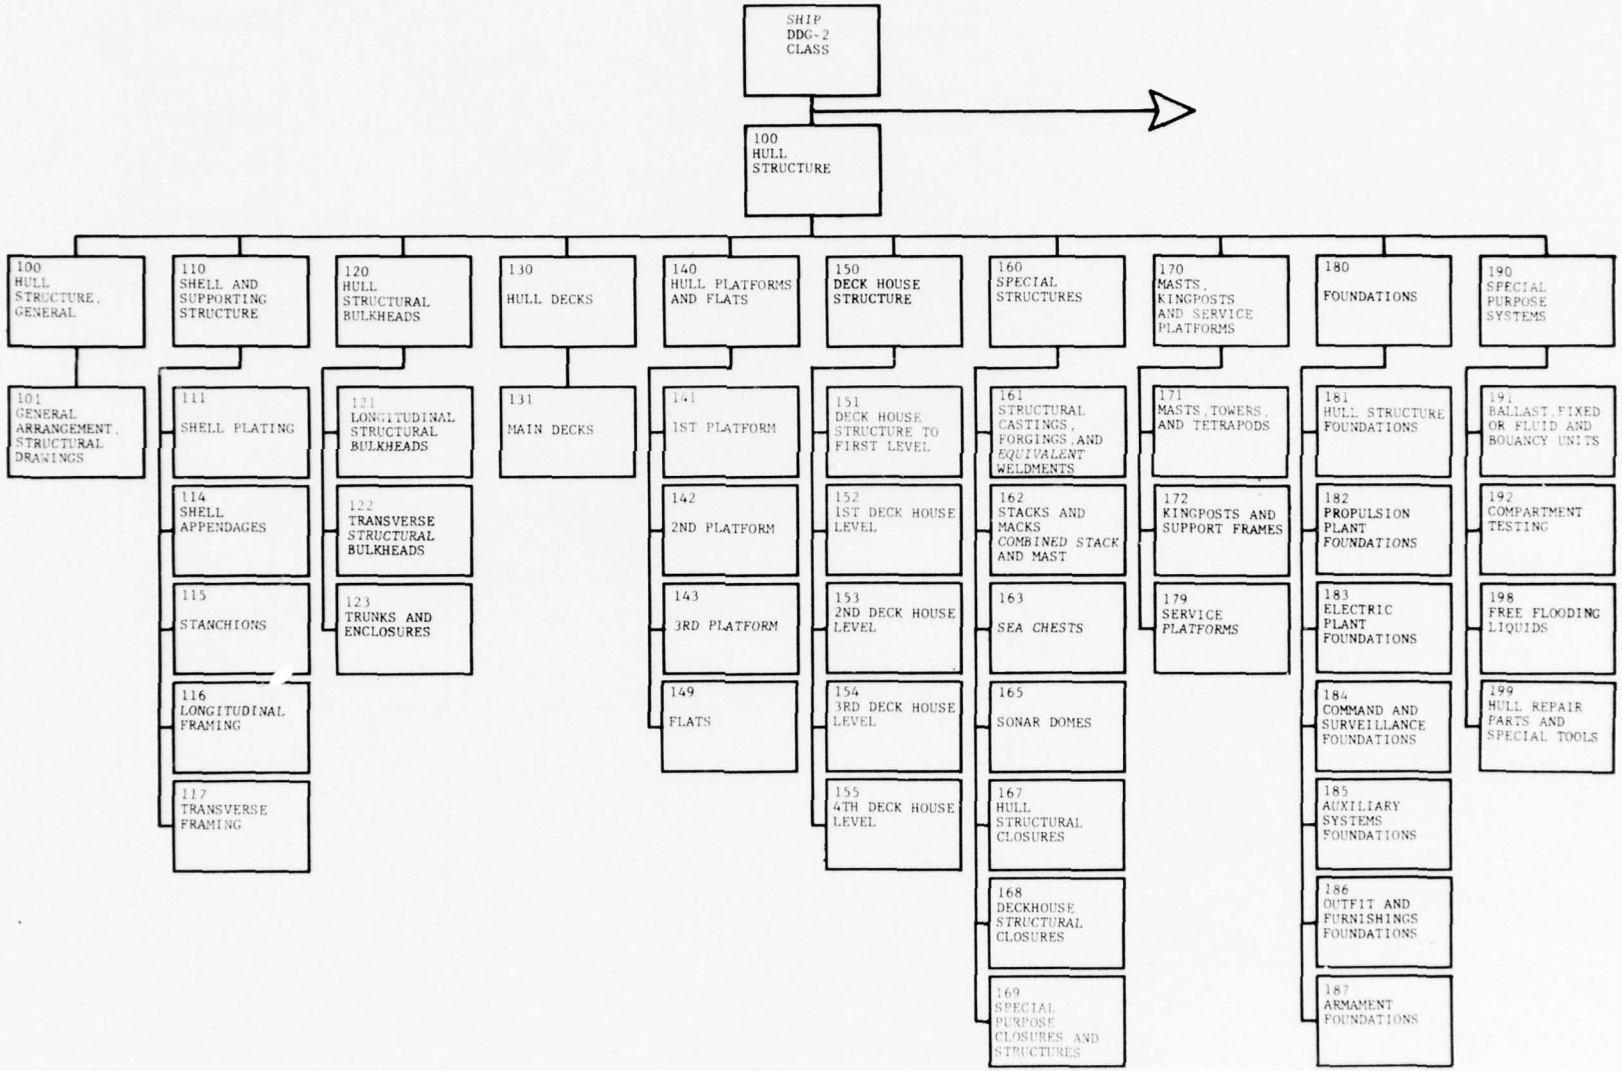

e. EIC cross-references are entered only blocks with a direct cross-reference, i.e., same system, subsystem, equipment as an SWBS classification.

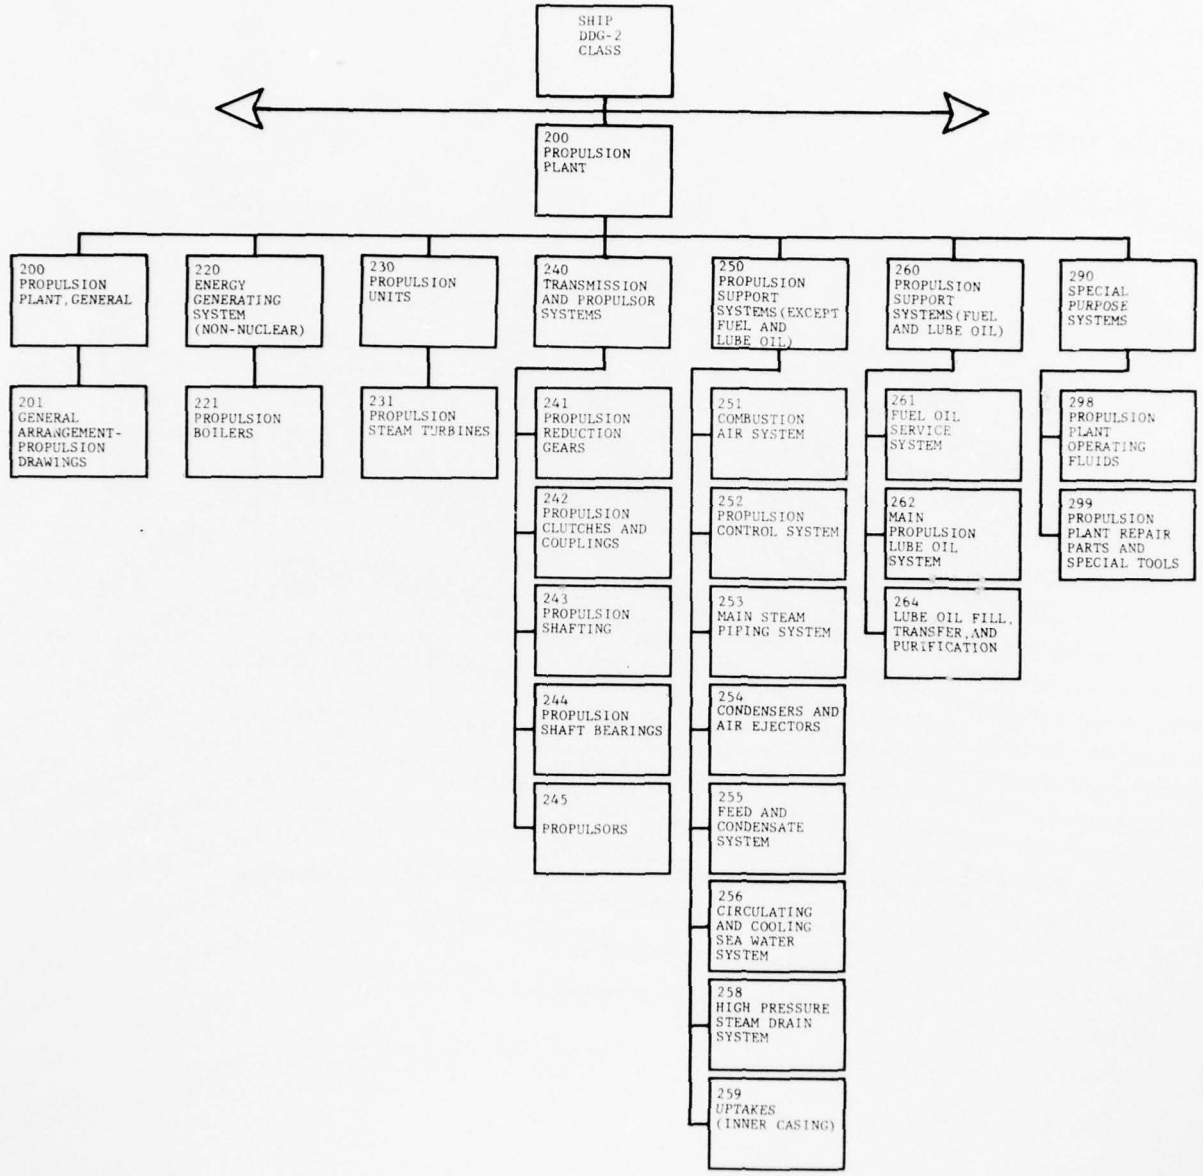

f. Work center assignments are representative. Use of the SSDI for specific ships of the class will require verification of applicable work centers.

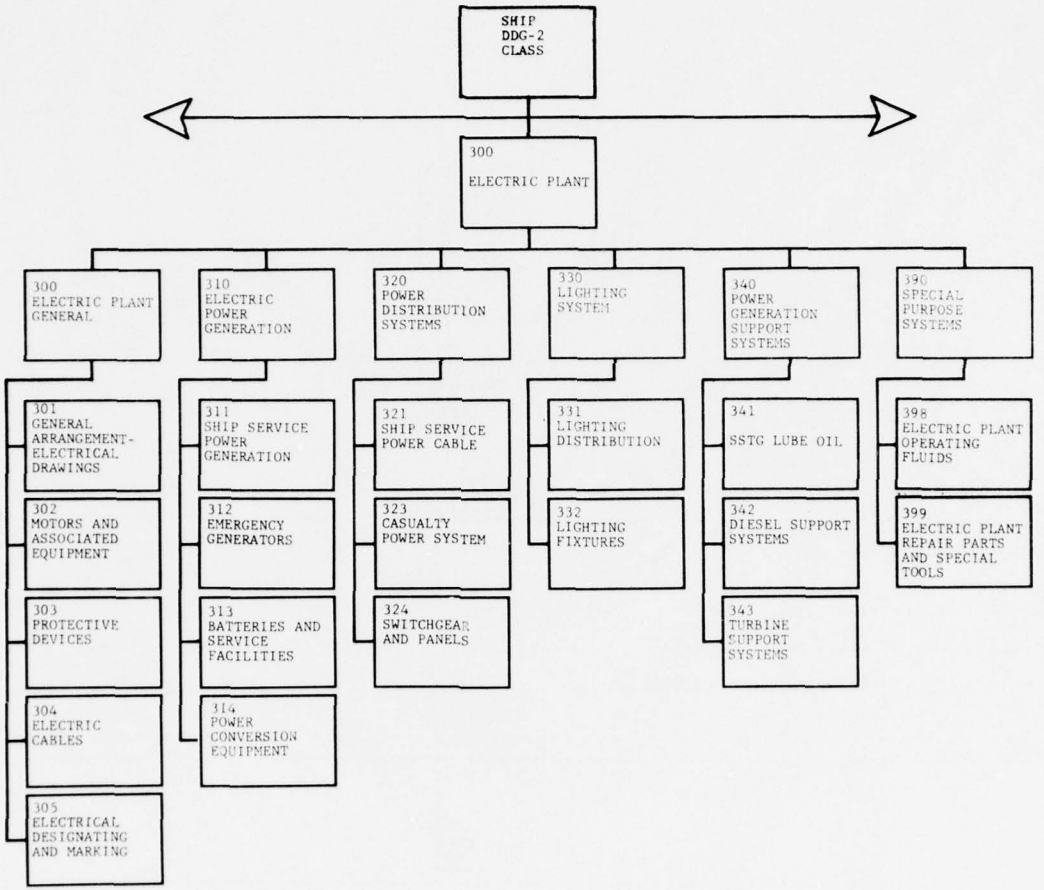

g. Elements where no specific equipments can be identified at this time (e.g., future installations) are shown by double-dashed blocks.

TELEPHONE SYSTEMS
4321 M403
SOUND POWERED TELEPHONE SYSTEM
INCLUDES ALL COMPONENTS MAKING UP THE SOUND POWERED TELEPHONE CIRCUITS (JA, JC, JCT, JD, JL, JN, 2JP1, 2JP2, 2JP3, 2JP10, 2JP20, 8JP, 10JP, JS, 1JS, 21JS, 22JS, 24JS, 61JS, 81JS, 1JV, 2JV, 5JV, JW, JX, 2JZ, X1J, X1JV, X6J1, X6J2, X17J1, X17J2, X40J, X43J), THEIR CALL BELL SIGNALS (CIRCUITS "2E" AND "4E"), MAGNETO CALL SIGNALS (CIRCUITS "EM" AND "MJ"), ASSOCIATED TELEPHONE SETS, INTERCONNECTING CABLING, AND TELEPHONE STATION EQUIPMENT.
4322
SHIP SERVICE TELEPHONE SYSTEM (CIRCUIT "J")
4321AM
SOUND POWERED TELEPHONE AMPLIFIERS
INCLUDES:
TYPE AM-2210( )/WTC
OR
TYPE AM-1850/STC
TYPE IC/ACB-7
4321A1
BELL/BUZZER
INCLUDES:
TYPE IC/B1S4 BELL
TYPE IC/Z1S4 BUZZER
4321A8
ANNUNCIATOR EM SYSTEM
INCLUDES:
TYPE IC/E4A
4321HS
SOUND POWERED HAND SETS CHEST SETS
INCLUDES:
H-203/U HANDSETS
H-200/U CHESTSETS
SA-3C CHESTSETS
TA-7( ) HANDSETS
43211C
MISCELLANEOUS TELEPHONE STATION EQUIPMENT
INCLUDES:
SOUNDPROOF BOOTHS
SPECIAL CABLE SHIELDING FOR SECURE PROCESSING AREAS
STOWAGE CONTAINERS
TELEPHONE SET HOOKS
TYPE IC/A EQUIPMENT RACK
WEATHERPROOF HANDSET HOLDERS
43211M
MAGNETO RINGER
INCLUDES:
CIRCUIT "EM", 2JV, JX, X1J
MAGNETO-RINGER, TYPE IC/D
43212B
TERMINAL BOARDS/BOXES AND JACKBOXES
INCLUDES:
TYPE IC/G-15( )
TYPE 8-6TB24C-2
TYPE 2-6TB24C-2
TYPE 6TB10C-2
TYPE 6TB6C-2
TYPE 3-6TB24C-2
TYPE 4-6TB24C-2
TYPE 6-6TB24C-3
4321SB
SWITCHBOARDS AND SWITCHBOXES
INCLUDES:
TYPE IC/A1 SWITCHBOARD
TYPE SB-82/SRR SWITCHBD
TYPE A-17A SWITCHBOX
(8JP, 5JV, JD, 10JP)
TYPE A-19A SWITCHBOX (2JV, X1JV, JC, JCT, 2JP1, 2JP2, 2JP3, 2JP10, 2JP20)
43212J
TOGGLE SWITCH
INCLUDES:
TYPE Z-27B
43218Z
SELECTOR SWITCHES (ROTARY)
INCLUDES:
TYPE A26A (16 CKT)
ROTARY SNAP (2 CKT)
TYPE S2JF1
TYPEJA2C-16
TYPE 5BJR10

ON SHIP

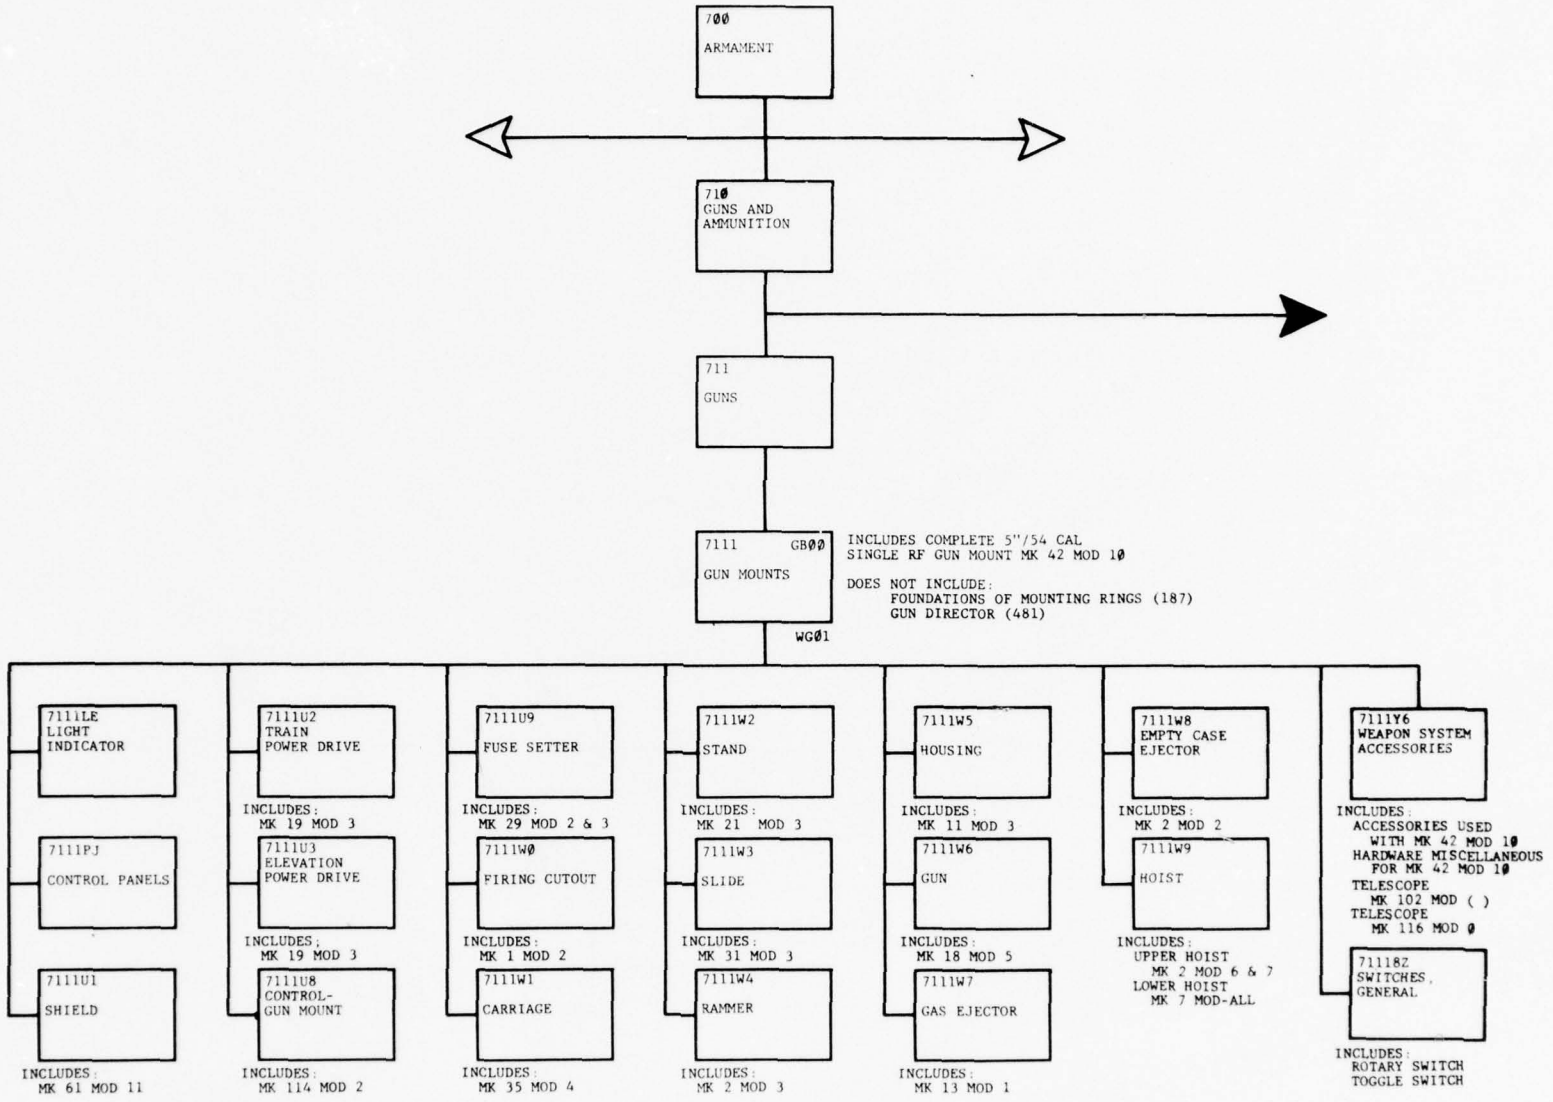

INCLUDES THE FOLLOWING STOREROOMS AND ISSUE ROOMS:
- WARDROOM STOREROOM
- MOTION PICTURE STOREROOM
- DRY PROVISIONS STOREROOM AND ISSUE ROOM
- BULK STORES AND REPAIR PARTS STROEROOM
- AUXILIARY STOREROOM
- CHEMICAL WARFARE DEFENSE EQUIPMENT STOREROOM
- LANDING FORCE EQUIPMENT STOREROOM
- SPECIAL CLOTHING STOREROOM
- MISCELLANEOUS STOREROOM
- BOSN'S STOREROOM
- EXECUTIVE OFFICER STOREROOM
- UNIT COMMANDER STOREROOM
- CAPTAINS STOREROOM
- ELECTRONIC STOREROOM
- ASROC COMPONENT STOREROOM
- BOSN'S AND DIVING GEAR STOREROOM
- CPO STOREROOM
- FLAMMABLE GAS CYLINDER STOREROOM
- MOORING AND TOWING GEAR STOREROOM
- NAVIGATORS STOREROOM
- SIGNAL EQUIPMENT STOREROOM
- MAA STOREROOM
- PAINT MIXING AND ISSUE STOREROOM
- LAUNDRY STOREROOM
- CENTRAL TOOL ROOM
- FLAMMABLE LIQUIDS STOREROOM
- SHIP'S STORE CLOTHING AND SMALL STORES STOREROOM

ASROC LAUNCHER
WS01 WW01
INCLUDES ASROC LAUNCHING GROUP MK 16 MODS 4, 5, & 6 WITH MK 112 LAUNCHER.
DOES NOT INCLUDE:
AIR TO LAUNCHER (551)
ASROC HEATING AND COOLING SYSTEM (728)
LAUNCHER CONTROL SYSTEM (727)
SPECIAL TOOLS (799)
7211FK FILTER-FLUID PRESSURE
7211L1 LAUNCHER STAND ASSEMBLY
INCLUDES: MK 107 MOD 1,2
7211L2 LAUNCHER GUIDES
INCLUDES: MK 7 MOD 1 & 2
7211L5 AMPLIFIER POWER DRIVE
INCLUDES: MK 153 MOD 0
7211PJ PANELS
INCLUDES: POWER PANEL MK 198 MOD 1 LAUNCHER CONTROL MK 199 MOD 1,3,4,5
7211U2 TRAIN POWER DRIVE
INCLUDES: MK 61 MOD 0,1,2,3
7211U3 ELEVATION POWER DRIVE
INCLUDES: MK 62 MOD 0,1,2,3
7211U6 TRAIN RECEIVER REGULATOR
INCLUDES: MK 46 MOD ( )
7211U7 ELEVATION RECEIVER REGULATOR
INCLUDES: MK 62 MOD ( )
7211W1 CARRIAGE ASSEMBLY
INCLUDES: MK 7 MOD 1,2,3,& 4
7211Y6 WEAPON SYSTEM ACCESSORIES
7211ZZ RAIL SELECTOR RELAY RACK
7212 5A00
TARTAR MISSILE LAUNCHING SYSTEM
WS01 WW01
NOTE: DOUBLE RAIL MISSILE SYSTEM, MK 11 INSTALLED ABOARD DDG-2 THROUGH DDG-14, SINGLE RAIL LAUNCH SYSTEM, MK 13, INSTALLED ABOARD DDG-15 THROUGH DDG-24.
DOES NOT INCLUDE:
LAUNCHER CONTROL SYSTEM (727)
7212L1 STAND
7212L2 GUIDE
7212PJ PANELS
INCLUDES: POWER PANELS CONTROL PANELS
7212U2 TRAIN POWER DRIVE
7212U3 ELEVATION POWER DRIVE
7212W1 CARRIAGE ASSEMBLY

APPENDIX A

COMPONENT DICTIONARY CODE LIST

APPENDIX A

COMPONENT DICTIONARY CODE LIST

CDC	LAPL	
AA	C92	ABANDON SHIP ACCESSORIES AND LIFE BOATS
AB	AB-	SUPPORTS, ANTENNA (ELEX)
AC	94-003	ACOUSTIC DEVICE-SEE ALSO CONTROL ACOUSTIC DEVICE-MINESWEEPING
AD	02-006	BOILER-AUXILIARY, STEAM, WASTE HEAT
AE	10-006	METER-ELECTRICAL INDICATING, AC AND DC METERS
AF	52-013	ACTUATOR-HYDRAULIC SEE ALSO CYL-ACT LINEAR
AG	61-265	ACTUATOR-PNEUMATIC & ELECTRO-PNEUMATIC
AH	41-040	CUTTING MACHINE-OXYGEN ACETYLENE
AI	31-009	CATHODIC PROTECTION EQUIPMENT
AJ	61-273	ACTUATOR-ELECTRO MECHANICAL
AK	85-008	ADAPTER-MISSILE HANDLING, CARGO HANDLING
AL	41-122	AGITATOR-PAINT, SHAKER TYPE
AM	AM-	AMPLIFIERS (ELEX/ORD)
AM		AMPLIFIERS (ELEX/ORD)
AN	33-002	AIR CONDITIONER
AO		NOT ASSIGNED
AP	88-011	VALVE-TEMPERATURE REGULATING, STEAM CONTROL
AQ	33-012	AIR CONDITIONER-WINDOW UNIT TYPE
AR	09-001	CHARGER-BATTERY,AC
AS	97-006	ANTENNA ASSEMBLY-BICONICAL OR STUB (HM&E/ELEX)
AS	AS-	ANTENNAE-SIMPLE & COMPLEX (HM&E/ELEX)
AT	AT-	ANTENNAE-SIMPLE (ELEX)
AU	36-001	ALARMS & SIGNALING DEVICES-HORNS, SIRENS AND WHISTLES, AIR OR STEAM
AV	41-006	CHARGER-MAGNET, PORTABLE
AW	36-005	ALARMS & SIGNALING DEVICES-WHISTLE, STEAM OR AIR
AX	41-046	CENTERING MACHINE-SINGLE SPINDLE
AY	03-007	COOLER-AIR
AZ	83-001	SEAL-STERNTUBE, SUBMARINE APPLICATION
A0	88-021	VALVE-BOILER BLOW
A1	36-003	ALARMS & SIGNALING DEVICES-BELL,BUZZER, SIREN ELECTRICAL
A2	23-009	ALARMS & SIGNALING DEVICES-LIGHT, INDICATOR, ELECTRICAL
A3	61-079	AMPLIFIER-MAGNETIC
A4	88-023	VALVE-SAFETY RELIEF, INCLUDING VACUUM BREAKERS
A5	61-082	AMPLIFIER-HYDRAULIC
A6	822	STEERING AND DIVING TOOLS AND REPAIR PARTS
A7	823	TOOLS AND EQUIPMENT O2N2 PLANT
A8	23-006	ANNUNCIATOR-MECHANICAL DROP-AC
A9	824	PERISCOPES - HOUSING FITTINGS
BA	BA-	BATTERY-PRIMARY TYPE (ELEX)
BB	BB-	BATTERY-SECONDARY TYPE (ELEX)
BC	C9-005	BATTERY-STORAGE
BD	37-001	BEARING ASSEMBLY-STERN TUBE & STRUT
BE	41-001	BALANCING INSTRUMENT-PORTABLE
BF	85-037	BALL, NUT, & SCREW ASSEMBLY
BG	C4-002	CONDENSER CHILLER-REFRIGERATION
BH	37-011	BEARING ASSEMBLY-THRUST, PIVOTED SEGMENTAL, SINGLE OR DOUBLE
BI	53-001	CAPSTAN-SEE ALSO MOORING ACCESSORIES
BJ	C37	MEDICAL EQUIPMENT-PORTABLE
BK	93-011	BRAKE-PROPULSION SHAFT(REGARDLESS OF PRIME MOVER)
BL	37-013	BEARING ASSEMBLY-THRUST AND JOURNAL WITH RESONANCE CHGR
BM	C5-023	COOLING UNIT-AIR TURBINE DRIVEN
BN	37-005	BEARING ASSEMBLY-LINE SHAFT
BO		NOT ASSIGNED
