APPENDIX D - SYSTEMS RANK ORDERING

Preface to System Rank Ordering

The data shown in each of the System Serial Listings and the rank orderings include the system serial number, the SALT TI number, the total benefits, the total cost with SAR, the measure of effectiveness, and the rank order (RO) of the system in terms of the specified measure of effectiveness.

Serial Listing includes both benefit cost ratio and benefits minus cost, where these measures are computed from the value of total benefits and total cost with SAR contained in the listing.

Total Benefits - Systems are rank ordered in descending order of expected benefits. The benefit cost ratio shown is the ratio of total benefits to total cost with SAR.

Total Cost - Systems are rank ordered in ascending order of expected costs. The benefit cost ratio shown is the ratio of total benefits to total cost with SAR.

Total Benefits: Cost Ratio with SAR - Systems are rank ordered in descending order of the difference, total benefits minus total cost.

The remaining listings are rank ordered by the measure of effectiveness described, but the benefits and costs shown are total benefits and total costs with SAR. For example the listing on page D-15 headed:

RANK ORDER: BENEFIT COST RATIO
COMMERCIAL TOTAL

will contain the systems rank ordered by the benefit cost ratio computed by using the ratio of total commercial benefits to total commercial costs.

INDEX TO
SYSTEMS RANK ORDERING

System Serial Listing	D-1
Total Benefit With SAR	D-3
Total Cost With SAR	D-5
Total Benefit:Cost Ratio With SAR	D-7
Total Benefit Minus Cost With SAR	D-9
Total Benefit:Cost Ratio Without SAR	D-11
Total Benefit Minus Cost Without SAR	D-13
