Distribution of this publication is made to selected executive departments and agencies of the U.S. Government, but primarily to staff offices within the Office of the Secretary of Defense, the Military Departments and the Defense Agencies.

Requests for additional copies and changes in distribution should be addressed to the Directorate for Information Operations and Reports, Washington Headquarters Services, Room 4B930, The Pentagon, Washington, D.C. 20301.

I N T R O D U C T I O N

Selected Manpower Statistics (SMS) is an annual publication that provides basic manpower data on active duty military, civilian, reserve components and retired military personnel of the Department of Defense.

Although the focus of this publication is on summary data for the Department of Defense as a whole, in most instances the tables reflect associated component data for the Army, Navy, Marine Corps and Air Force.

With a few exceptions, as noted on applicable tables, this issue of the SMS contains figures either for, or through Fiscal Year 1978.

It should be noted that additional and/or more recent data of the type depicted by a number of tables in the SMS is available throughout the fiscal year on a quarterly or monthly basis. The table number should be referenced in requesting such data.

SOURCE OF DATA: TABLE P10

PERSONNEL SUMMARY

Department of Defense "strength" is generally considered to be the sum of active duty military personnel and civilian personnel - approximately 3,042,700 persons at the end of September 1978, excluding Indirect Hire personnel (Table P10).

Also shown on Table P10 are statistics relating to reservists and National Guardsmen who are on active duty and students enrolled in officer training in colleges.

Not reflected are approximately 1,244,000 retired military personnel and 2,868,000 dependents of active duty military personnel. Also, Table P10 does not depict the thousands of civilian employees of private industry engaged in defense work.

The total civilian strength includes Department of the Army Corps of Engineers Civil Functions personnel which consisted of approximately 34,000 civilian employees on September 30, 1978.

TOTAL MILITARY AND CIVILIAN PERSONNEL

Table P11 shows trends in Department of Defense active duty military personnel and civilian employment levels over the past 40 years.

Inasmuch as data on indirect hire civilian employment prior to 1953 is not available for purposes of comparability, this section includes figures for direct hire civilian personnel only. Table P30.2 in Section III contains statistics relevant to indirect hire civilian personnel.

Civilian personnel totals also include employees of the Army Corps of Engineers who are performing civil functions. During the first nine months of calendar year 1978, approximately 34,000 civilian employees were listed in this category.

g/ From January 1974 to present, Youth Program data has been included.

h/ Reflects a mass transfer of DoD Dependents School Employees from the Services to the Office of Dependents' Schools.

DEFENSE ORGANIZATIONAL COMPONENTS

Tables P12.2S through P13.11 provide a breakdown of Department of Defense manpower by the major organizational components, and by geographic area in the states of Maryland and Virginia and in the District of Columbia.

In the Department of Defense Reorganization Act of 1958, the Secretary of Defense was authorized, whenever he determined it to be advantageous to the Government to provide for the carrying out of any supply or service activity common to more than one military department by a single agency or such other organizational entities as he deemed appropriate. This authority was applied to the broad fields of atomic energy, communications, logistics, etc., through the establishment of separate agencies within the Department of Defense but outside of the three military departments. Many of the personnel working in these fields, previously assigned to the military departments, were transferred to these new agencies.

Included within the Department of the Army civilian totals are approximately 34,000 Civil Functions employees on September 30, 1978. Excluded are Indirect Hire personnel.

SOURCE OF DATA: TABLE P22.9

ACTIVE DUTY MILITARY PERSONNEL

Tables P22s and P22.2 show strength levels and fluctuations of the military forces over the past 184 years. Monthly strength levels for fiscal year 1978 are depicted by Table P22.1.

Active duty military strength has varied from the post-World War II low of 1,399,000 in 1948, to a Korean War peak of 3,685,000 in 1952, to a post-Korean War low of 2,465,000 in 1960, to a Vietnam Conflict peak of 3,548,000 in 1968, and to a 28-year record low of 2,062,000 at the end of FY 1978.

Table P22.9 shows average active duty military strength by fiscal year from 1941 through 1978. Direct military personnel costs from year to year have reflected these variations in average strength as well as increases in pay and allowances.

TABLE P22S

DEPARTMENT OF DEFENSE
HISTORICAL BACKGROUND AND NOTES

1. Officers include warrant officers, field clerks and nurses. Enlisted include West Point cadets, Annapolis midshipmen and other officer candidates. Excludes Coast Guard.
2. Data for year shown is as of 30 June beginning with 1878 for Army, 1900 for Navy, and 1798 for Marine Corps. For prior years the as of date is month for which records most completely reveal total strengths of each service. In some instances incremental reports of different dates had to be used to compile a service total with result that strength shown is not for any particular point in time.
3. Army data begin with 1789, the year in which the Department of War (now Department of the Army) was established by the new U.S. Congress. Although a "regular" Army existed continuously from that time the total strengths cannot be documented from available records, nor can reliable estimates be made, for years 1790-1793 and 1796-1800. Beginning with 1861, the data include all military personnel on extended active duty with the Army (Regulars, volunteers, militia, inductees, reserves and National Guardsmen) and U.S. Military Academy cadets. Data prior to 1861 are for Regular Army and cadets only, except for 1836-1840 (Seminole Indian War) and 1846-1848 (War with Mexico); source documents for other years do not contain adequate strength statistics on non-regular personnel called out during the War of 1812 or for short periods of service during the numerous Indian disturbances. Army data include strengths of the Army Air Corps and predecessor agencies.
4. Navy strengths for the period 1794-1798 are an approximation of the "on board" personnel authorized by the Continental Congress in conjunction with the construction of six frigates to reconstitute a Navy which had existed from 1775 to 1785 under the Continental Congress. A separate Navy Department was authorized and organized in 1798. Since the crews, during the early years of the Navy, usually were obligated for only a specific sailing or mission, rather than a continuous tour of duty, the strengths shown are more in the nature of an average and are therefore marked estimated. Data exclude an unknown number of Naval militia, supplied by the states, who served during the War of 1812, the Mexican War and the Spanish-American War.

TABLE P22S - HISTORICAL BACKGROUND AND NOTES (CONTINUED)

5. Marine Corps strengths as shown begin with 1798, the year in which the Navy Department and Marine Corps were authorized by Act of Congress. The Marine Corps was founded in 1775 by the Continental Congress and served during the Revolutionary War, but ceased to exist in 1783. The next activity of the Marines came in 1794 when Congress authorized the building of six frigates. A small number of Marines were used as guards. However, records do not reveal reliable strength data before 1798.

B/ KOREAN WAR PEAK TOTAL MILITARY PERSONNEL.

C/ VIETNAM CONFLICT PEAK TOTAL MILITARY PERSONNEL.

ACTIVE DUTY OFFICER CANDIDATES

Table P23.22s lists the numbers of persons on active duty who are enrolled in officer candidate training programs. This category of officer candidates is listed separately for personnel accounting purposes by the military services. It includes Academy Cadets, Midshipmen, and Aviation Cadets, which are statutory defined categories. Individuals who are enrolled in "in-service" officer training, i.e., Army OCS, Air Force OTS, and Marine Corps OCC are included in the enlisted personnel accounting summaries of this publication. In addition, Navy provides separate listing for other enlisted officer candidate training programs. Similar enlisted officer candidate trainees for the other three military services are included in the enlisted personnel accounting summaries.

The U.S. Air Force Academy, established by Act of April 1, 1954, was authorized an enrollment of approximately 2,600 Cadets, similar to the U.S. Military Academy. Amendments to Title 10 U.S.C. in 1964 provided for the gradual expansion of the U.S. Military Academy and the U.S. Air Force Academy, as facilities became available, to ultimately approximate the enrollment of the U.S. Naval Academy, i.e., approximately 4,400-4,500 Cadets each. (Note: Enrollments at the U.S. Military Academy on June 30 each year are after June graduation and before entrance of a new plebe class - thus, December 31 statistics are more representative of normal enrollments.)

PERSONS ENROLLED IN ARMY OFFICER CANDIDATE SCHOOL, AIR FORCE OFFICER TRAINING SCHOOL, AND MARINE CORPS OCC, ETC., IN-SERVICE OFFICER TRAINING PROGRAMS ARE SUMMARIZED WITH ENLISTED BY THESE MILITARY SERVICES.

MILITARY GRADE STRUCTURE

The current distribution of military personnel by grade and military service is listed by Table P26.0. The distribution of military personnel by grade for the period of September 30, 1973 through September 30, 1978 is provided by Table P26.01s.

The number of officers at the rank of Major and Lieutenant Commander and above are limited by law. Legislation enacted in 1958 places restrictions on the number of enlisted personnel who may be advanced to pay grades E-8 and E-9.

Table P26.3 provides the current grade titles corresponding to the various enlisted pay grades.

U.S. MILITARY STRENGTH OUTSIDE THE UNITED STATES

Changing attitudes with respect to United States military commitments abroad, resulting from various economic and political conditions, have focused increasing attention on U.S. military presence in foreign countries and areas.

As of the end of FY 1978, approximately 24 percent of our military personnel were stationed outside the United States; about 23 percent in foreign countries and areas; and about one percent in U.S. territorial areas.

Table P-309A shows worldwide U.S. military strengths as of September 30, 1978.

AGE DISTRIBUTION OF MILITARY PERSONNEL

Table P25.1 shows data since 1954 on the distribution by age of male military personnel.

Most enlisted volunteers enter active service at ages 19 and 20 with about one-fourth (currently) signing up for a second tour of duty. Officers normally first enter active duty at ages 23-24. Inductees used to enter at around 20 years of age. Personnel in these age groups currently comprise about three-fifths of total forces and account for the low median 24.3 years of age on June 30, 1978.

The percentage of total male military personnel in each age group is shown.

EDUCATIONAL LEVEL OF MILITARY PERSONNEL

Table P25.4 shows the percentages of officer and enlisted personnel who have completed various levels of formal high school and college education.

A wide variety of after-hour study programs are available to all military personnel and special training programs have been developed to provide selected individuals with further educational opportunities in connection with military career development and advancement.

Table P25.5 depicts a notable upward trend in the educational levels of military personnel. During the past fifteen years, the proportion of officers who are college graduates and the proportion of enlisted who are high school graduates has increased substantially.

^{A/} THE PERCENTAGE DISTRIBUTIONS SHOULD BE CONSIDERED AS APPROXIMATE. THE ESTIMATES WERE DERIVED FROM AVAILABLE INTERNAL SERVICE REPORTS APPROXIMATING THE "AS OF" DATES AND WERE WEIGHTED BY THE "AS OF DATE" SERVICE STRENGTHS TO ARRIVE AT DOD TOTALS. SAMPLE SURVEY DATA WERE USED FOR THE AIR FORCE AND ARMY WHERE CENSUS TABULATIONS WERE NOT AVAILABLE. THE EDUCATIONAL LEVEL DEFINITIONS USED BY THE SERVICES HAVE VARIED SLIGHTLY FROM PERIOD TO PERIOD, BUT IN GENERAL THE DATA REFLECT HIGHEST EDUCATIONAL ATTAINMENT INCLUDING G.E.D. CREDITS.

MILITARY DEPENDENTS AND MARITAL STATUS

Military dependents outnumber military personnel in total at a ratio of 1.4 to 1. Dependents encompass spouses (39%), children (58%), and other eligible persons (3%).

The average number of dependents per member of the uniformed services varies significantly among the military services and between officers and enlisted personnel. However, the average number of dependents per family unit is fairly consistent.

WOMEN IN THE ARMED FORCES

Tables P25.61 through P25.65 provide data relative to female members of the uniformed services since the end of World War II through the present.

Prior to World War II the number of women who joined the Armed Forces was relatively insignificant, although the military medical services had enrolled nurses for many years. However, with the expanded role of women into many other occupational fields during World War II, female personnel strength levels reached a peak of over 266,000 in 1945, or two percent of total active duty military strength.

As of September 30, 1978, 134,312 women were listed on active duty with the military services which approximates 6.5 percent of the total active duty military personnel strength.

Although total military strength has declined by 12,139 during FY 1978, female strength has increased by 14,900.

FEMALE MILITARY PERSONNEL BY RANK/PAY GRADE

Table P26.02 reflects the distribution by rank/pay grade of female active duty military personnel in each of the military services.

Increased occupational opportunities and policy changes allowing women with children to stay on active duty are considered contributing factors in a significant increase in the number of women choosing the military services as an employment alternative.

REENLISTMENT RATES

Fluctuations in overall reenlistment rates are due to variations in the composition of "First Term" and "Career" Regulars categories. "First Term" Regulars are comprised of military personnel who have served an initial active duty tour as Regulars. "Career" Regulars encompass military personnel who have served two or more tours of active duty.

CASUALTIES

Table P28.01s shows the number of U.S. military personnel in South Vietnam from 1960 through 1973. About 9.2 million men and women served in the active forces during the period of August 4, 1964 through December 31, 1973. Approximately 2.6 million served in Vietnam during the same period of time.

Table P28.1 shows the number of U.S. military personnel in Southeast Asia currently unaccounted for as the result of hostile and nonhostile actions.

Table P28.2 provides a statistical summary of principal wars or armed conflicts in which the United States has participated, showing the number of U.S. military personnel serving on active duty during each war period and the casualties incurred. "Battle deaths" and "wounds not mortal" are casualties resulting from enemy action, while "other deaths," except for the Vietnam Conflict, represent the number of in-service deaths, worldwide, from disease and injuries not the result of enemy action during the indicated war/conflict period. For the Vietnam Conflict, "other deaths" are those within the war zone not as a direct result of enemy action. Battle deaths occur when a member of the military service is either killed in action, has died of wounds received during battle, or has died while missing or in captivity.

TABLE P28.2

DEPARTMENT OF DEFENSE
HISTORICAL BACKGROUND AND NOTES

- A/ Data prior to World War I based on incomplete records in many cases. Casualty data are confined to dead and wounded and therefore exclude personnel captured or missing in action who were subsequently returned to military control. U.S. Coast Guard data are excluded.
- B/ Marine Corps data for World War II, the Spanish-American War and prior wars represent the number of individuals wounded, whereas all other data in this column represent the total number (incidence) of wounds.
- C/ Not known, but estimates range from 184,000 to 250,000.
- D/ As reported by the Commissioner of Pensions in his Annual Report for Fiscal Year 1903.
- E/ Authoritative statistics for the Confederate Forces are not available. Estimates of the number who served range from 600,000 to 1,500,000. The Final Report of the Provost Marshal General, 1863-1866, indicated 133,821 Confederate deaths (74,524 battle and 59,297 other) based upon incomplete returns. In addition, an estimated 26,000 - 31,000 Confederate personnel died in Union prisons.
- F/ Number serving covers the period 21 April - 13 August 1898, while dead and wounded data are for the period 1 May - 31 August 1898. Active hostilities ceased on 13 August 1898, but ratifications of the treaty of peace were not exchanged between the United States and Spain until 11 April 1899.
- G/ Includes Air Service. Battle deaths and wounds not mortal include casualties suffered by American forces in Northern Russia to 25 August 1919 and in Siberia to 1 April 1920. Other deaths cover the period 1 April 1917 - 31 December 1918.
- H/ Includes Army Air Forces.

TABLE P28.2 - HISTORICAL BACKGROUND AND NOTES (CONTINUED)

- I/ Data are for the period 1 December 1941 through 31 December 1946 when hostilities were officially terminated by Presidential Proclamation, but few battle deaths or wounds not mortal were incurred after the Japanese acceptance of Allied peace terms on 14 August 1945. Number serving from 1 December 1941 - 31 August 1945 were: Total - 14,903,213; Army - 10,420,000; Navy - 3,883,520; and Marine Corps - 599,693.
- J/ Battle deaths and wounds not mortal include casualties incurred in October 1941 due to hostile action.
- K/ Tentative final data based upon information available as of 30 September 1954, at which time 24 persons were still carried as missing in action.
- L/ Number serving covers the period 4 August 1964 - 27 January 1973 (date of ceasefire). Wounds not mortal exclude 150,332 persons not requiring hospital care. Known status of casualties is as of September 30, 1978.

SECTION III

CIVILIAN PERSONNEL

FIGURE P30.3
DEPARTMENT OF DEFENSE
DIRECT HIRE CIVILIAN PERSONNEL

SOURCE OF DATA: TABLE P30.3

CIVILIAN PERSONNEL - TOTAL

Most of the civilian personnel of the Department of Defense are hired directly by the Military Departments, the Defense Agencies, or the Office of the Secretary of Defense and the Organization Joint Chiefs of Staff as employees of the United States Government and are designated as "direct hire" civilians. Some foreign nationals are employed in the same manner as U.S. citizens in overseas areas.

In a few foreign countries, however, substantial numbers of foreign nationals, supporting military activities, are technically employees of the host government (or an agency of that government) and are assigned to work with the U.S. Forces under contracts or agreements with that government on a reimbursable cost or other predetermined basis. These foreign nationals are designated "indirect hire" civilians.

Both categories of civilian personnel must be included to provide a complete account of the DoD civilian work force. Figures on the number of indirect hire civilians, however, are unavailable prior to January 31, 1953.

Tables P30.2 and P30.11 list the two civilian employment categories separately. Furthermore, Table P30.11 distinguishes between direct hire civilians employed to perform military versus civil functions.

CIVILIAN PERSONNEL - DIRECT HIRE

Table P30.3 reflects wide fluctuations in direct hire civilian employment since the beginning of World War II, punctuated by peak employment levels during armed conflicts. The FY 1978 end strength level of 980,313 is the lowest for the Department of Defense since 1950.

Beginning in January 1953, the definition of direct hire civilians was revised to include approximately 100,000 native Koreans and Ryukyans not previously included.

All direct hire civilians are paid from appropriated funds. Civilian employees of military non-appropriated fund agencies, such as post exchanges, are not direct hire employees.

SALARIED AND WAGE BOARD CIVILIAN PERSONNEL

Table P31.1 provides an overview of direct hire civilian employees by major component and pay group. Direct hire civilians are grouped into two categories for pay purposes, namely salaried personnel and wage board personnel.

Salaried personnel consists primarily of employees occupying positions subject to the Classification Act of 1949, as amended, and a limited number of employees whose compensation is established by legislation other than the Classification Act either by executive order or by administrative determination.

Wage board personnel consists of employees whose compensation is determined by wage boards or similar administrative authority serving the same purpose and is adjusted periodically in accordance with local prevailing wage rates.

In general, salaried personnel comprise technical, scientific, administrative, supervisory, and clerical workers and for this reason are sometimes designated "white collar" employees. Wage board personnel, on the other hand, are usually craftsmen, production, or maintenance workers, and often are referred to as "blue collar" employees.

CIVILIAN PERSONNEL STRENGTHS (WORLDWIDE) BY
REGIONAL AREA AND BY COUNTRY

Table P309B shows the worldwide distribution of the Department of Defense civilian work force. It excludes 33,590 Civil Functions employees, nearly all of whom are under the control of the U.S. Army Corps of Engineers and are primarily U.S. citizens employed in the Fifty States.

Approximately 85 percent of total employment takes place in the United States, about one percent in U.S. territories, and about 14 percent in foreign countries.

Of the total U.S. citizen employees, 97 percent are located in the U.S. and its territories, with three percent in foreign countries. About 61 percent of those in foreign countries are stationed in Germany and about 10 percent are located in Japan.

Of the total foreign nationals (118,014), approximately 31 percent are direct hires and 69 percent are hired indirectly through arrangements with host governments.

About 68 percent of all direct hire foreign nationals are concentrated in two countries, the Philippines and South Korea, while the indirect hires are employed mostly in Germany (67 percent) and Japan (23 percent).

RESERVE STRENGTH

FIGURE R11.0
DEPARTMENT OF DEFENSE
RESERVE COMPONENTS STRENGTH SUMMARY
SEPTEMBER 30, 1978

SOURCE OF DATA: TABLE R11.0

RESERVE COMPONENTS SUMMARY

Table R11.0 summarizes the current status of the Department of Defense reserve components.

Members of the "Ready Reserve" are subject to active duty in time of national emergency proclaimed by the President, as well as in time of war or national emergency declared by Congress. The Ready Reserve includes Reservists on active duty who were counted as part of active military strength in preceding tables. Ready Reservists not on active duty participate, to the extent required and subject to the availability of funds, in drills or training periods regularly scheduled throughout the year, in two-weeks annual active duty training, and/or in various school and special active duty training programs.

Members of the "Standby Reserve" can be ordered involuntarily to active duty only as the result of Congressional action, and after the Director of Selective Service has determined their availability for active duty. They are not required to actively participate in reserve training.

The "Retired Reserve" consists of members of the reserve components who qualify for retirement through length of service, disability, etc., and who are formally placed on reserve retired lists.

RESERVE COMPONENTS BY CATEGORY

Table R14.0 shows the trends in numbers of personnel assigned to the reserve categories established by the Armed Forces Reserve Act of 1952.

Although these categories became effective on January 1, 1953, complete reports by reserve category prior to March 31, 1954, are unavailable.

Screening of the Ready Reserve is a continuous process to assure current availability of all members.

Following legislation establishing a ceiling on the number of Ready Reserves, effective June 30, 1957, the number of Ready Reserves not on active duty was maintained slightly in excess of 2,400,000 until the spring of 1961, then diminished below 1,700,000 in 1963, and again increased to 2,660,000 at the end of FY 1970. A steady decline of Ready Reserve strength levels since FY 1970 has reduced this number considerably. At the end of FY 1978, 1,143,836 persons were serving in the Ready Reserve. This figure is well below the authorized strength of 2,900,000 allocated to the Military Departments.

RESERVE STRENGTH

Table R12.0 shows reserve strength by duty status and personnel type since World War II.

The number of reserve officers, including those on active duty, declined during the period 1953 through 1957, and leveled off at around 800,000 during the 1958 through 1965 period. The number increased to 916,000 by the end of 1970 and reached its peak of 921,000 by the end of 1971. In 1972, the trend reversed itself and decreased to approximately 790,000 by the end of 1978.

The number of enlisted reserves has varied considerably over the years mainly due to variations in the number of individuals being released from active duty and reverting to the reserves for completion of their military service obligation. The number of enlisted reserves, including those on active duty, increased from a Vietnam-era low of approximately 1,870,000 in 1963 to approximately 3,234,000 in June of 1971, and has since declined to approximately 1,487,000 as of September 1978.

RESERVES ON ACTIVE DUTY

Tables R21.0 and R22.0 show the number of reservists, by component, who are serving with the active forces. These personnel are also included in the total active duty strengths reflected in Section II of this publication. All of these reservists are in the Ready Reserve.

Some reservists undergo prescribed tours -- currently four months or more -- of active duty for training. They are not included in this table or counted as part of the total active duty strength.

There are six Department of Defense reserve components, including the National Guard (Army) and the Air National Guard (Air Force).

Continuously, since World War II, there have been large numbers of reservists serving on active duty (Table R21.0).

Since 1960, reserve officers constitute about one-half of the total officers on active duty, with an increase during the Berlin build-up in 1961 and an increase to nearly three-fifths of the total peak officer strength in 1969.

The number of enlisted reserves on active duty has been small, except at times of reserve recalls for strength build-ups, and except for the significant number of Naval Reserve enlisted on active duty at all times resulting from implementation of the four-year active duty reserve enlistment program.

RESERVES NOT ON ACTIVE DUTY

Tables R23.0 and R24.0 exclude reservists on active duty. These numbers measure the strength of reserve forces which can be mobilized in an emergency to supplement and replace active military forces.

The number of reservists not on active duty decreased during the Korean Conflict as large numbers joined the active forces. With the conclusion of the Korean Conflict, inactive duty reserve strength levels evidenced a steady but substantial increase. These increases were in part attributed to the compulsory reserve service provisions of the Armed Forces Reserve Act of 1952, as amended, and the Universal Military Training and Service Act, as amended.

All members of the Army National Guard and Air National Guard are included in the Ready Reserve. The size of these components is restricted mainly by annual appropriations for paid drill and active duty training. The other four reserve components contain Ready Reserves not in paid training, as well as Standby and Retired Reserves. Their strengths have varied considerably in the past.

RESERVES IN PAID STATUS

Tables R26.5 and R18.0 provide current and historical data for reserve personnel in "paid status."

Approximately 1,300,000 Reservists are currently receiving pay for participation in reserve training programs.

Paid status personnel are in the Ready Reserve category.

Personnel in paid status fall into several pay groups related to the various reserve training programs:

RESERVE OFFICER TRAINING IN COLLEGES

The military services heavily rely on ROTC programs instituted at colleges and universities as a source of officer procurement. They also sponsor military training in some high schools and other "junior" schools.

RETIRED MILITARY PERSONNEL

Table P22.8 reflects trends in military retirements since 1950. The number of retired military annuitants has increased by 900 percent since that time. The sharp increase is due, in a large part, to the enormous number of individuals who entered the military service during World War II and who became eligible for annuities beginning in the early 1960's.
