ABSTRACT

This report describes the development of a system that classifies both military and civilian personnel in the Department of Defense into a common occupational structure. It provides top level DoD management with the ability to understand and describe the occupational nature of the defense work force and may be used to:

- (1) Analyze the similarities and differences among the military Services' occupational content;
- (2) Facilitate DoD-wide work force management information reporting and analysis;
- (3) Monitor the labor force implication of reductions or additions to force strengths. In addition, the impact on the labor force caused by the introduction of new technology into the force structure can be monitored. Prior knowledge of the types of occupations affected by planned manpower shifts could preclude shortages of employees trained in required occupations.

The report was prepared for the Office of the Assistant Secretary of Defense (Manpower, Reserve Affairs and Logistics) under Contract MDA 903-77-C-0142.

PRESEARCH INCORPORATED

- Describe the DoD work force's active and reserve military and civilian components on a single vector. This would facilitate DoD-wide manpower management information reporting and analysis.
- Monitor the labor force implication of reductions or additions to force strengths. In addition, the impact on the labor force caused by the introduction of new technology into the force structure can be monitored. Prior knowledge of the types of occupations affected by planned manpower shifts could preclude shortages of employees trained in required occupations.

I. INTRODUCTION

1.1 This report is a documentation of the Integrated Defense Occupational Stratification (IDOS) system and the associated data base. It includes descriptions of the purpose, development and utility of the IDOS system. The report has been prepared for the Office of the Assistant Secretary of Defense (OASD) (Manpower, Reserve Affairs and Logistics) (MRA&L) under Contract MDA 903-77-C-0142.

1.2 The IDOS system is a management tool used for the functional categorization of DoD occupations. The system has been applied to Defense work force data provided to OSD by the Defense Manpower Data Center (DMDC). This data base is currently maintained on the Multics ADP system, which is operated by the Air Force Data Services Center.

1.3 A description of the general need for a functional categorization of occupations, the development of such a system and the utility for top-level management is included in Section II. Section III contains descriptions of the internal structure and of the information held in the IDOS data base. The Appendices contain the definitions of the entire IDOS structure and the translations between the IDOS system, the occupational management systems of the Services and the Civil Service Commission's Wage Board (WB) and General Schedule (GS) series.

PRESEARCH INCORPORATED

II. SYSTEM DEVELOPMENT

2.1 This section describes the overall need for the IDOS system, the process followed in its development, and its utility for DoD management.

PURPOSE

2.2 In the past, no system existed that classified both military and civilian personnel across all Services into a common occupational structure. Therefore, top-level management had no tool with which they could analyze and describe the total defense labor force.

2.3 A tool that functionally categorizes occupations is required to support management in a number of decision and analysis areas, such as:

- Overall analyses of defense occupational requirements
- Determination of requirement/inventory mismatches in occupational groups
- Integration of military and civilian manpower planning
- Overall civilian substitution planning
- Compensation equity
- Impact of defense manpower requirements on the civilian economy.

PRESEARCH INCORPORATED

DEVELOPMENT

2.4 A number of occupational categorization structures exist that apply to subsets of the total defense work force. The DoD Occupational Conversion Tables, developed by OASD (Manpower and Reserve Affairs), initially was applicable to only military occupations. The Defense Manpower Data Center (DMDC) expanded these DoD Occupational categories to include civilians in 1976, but the system still divides occupations into two nonoverlapping subsets, officer and enlisted. The Civil Service Commission uses the Professional, Administrative, Technical, Clerical, Other (PATCO) system, which categorizes only General Schedule (GS) series civilians. OSD previously adopted the Major Occupational Groups/Functional Occupational Groups (MOG/FOG) system developed by the Navy Office of Civilian Personnel. The MOG/FOG system categorizes the GS and Wage Board (WB) civilians into one structure, but does not include military occupations.

2.5 A revision of the MOG/FOG system was determined to be the best way to develop a system that categorizes the entire DoD work force. A majority of military occupations have equivalents in the civilian sector, and are thus implicitly contained in the MOG/FOG system. Therefore, the ability to categorize all military-unique and any noncodeable occupations was the only major addition necessary to allow for the complete categorization of the DoD work force. Modifications and additions to the set of FOGs, renamed Occupational Functional Subgroups (OSFGs), a general rework of the scopes and definitions of the MOGs and FOGs and the assignment of IDOS codes to each military occupation were also performed to complete the system. The guiding principle for creating an OSFG was the existence of sufficient numbers of DoD-employees in a homogeneous grouping of discrete occupations. The additions and revisions were performed by Presearch Incorporated in 1977 and are discussed in Section III.

PRESEARCH INCORPORATED

UTILITY

2.6 The IDOS system provides top level DoD management with the ability to understand and describe the occupational nature of the defense work force. The system can be best utilized in manpower management areas such as the following:

- Analyze the similarities and differences among the military departments' occupational content.^{1/}
- Describe the DoD work force's active and reserve military and civilian components on a single vector. This would facilitate DoD-wide manpower management information reporting and analysis.
- Monitor the labor force implication of reductions or additions to force strengths. In addition, the impact on the labor force caused by the introduction of new technology into the force structure can be monitored. Prior knowledge of the types of occupations affected by planned manpower shifts could preclude shortages of employees trained in required occupations.

2.7 There are a number of related areas in manpower management that cannot be adequately analyzed through the use of the IDOS system. These areas include:

- Justifying the military/civilian mix of DoD (it can only describe it)

^{1/} Presearch Incorporated, Description of Department of Defense Manpower (U), Technical Report No. 363, 31 January 1978, UNCLASSIFIED.

PRESEARCH INCORPORATED

- Describing the combat and support areas
(combat and support refers to types of units all of which contain a mix of occupations)
- Making specific civilian substitutions
(one needs job specifics to accomplish this)
- Military training course consolidation
(each course must be considered individually).

PRESEARCH INCORPORATED

III. IDOS STRUCTURE

3.1 This section describes the general structure of the IDOS system and the information contained in the MULTICS data base. The procedures necessary to update the information in the data base and to produce work force summaries are also included.

CATEGORIZATION STRUCTURE

3.2 The IDOS system categorizes occupations at two levels of detail. The first level breaks the universal set of occupations into 10 general occupational areas, which are defined as Major Occupational Groups (MOGs). The next level of detail is defined by the Occupational Functional Subgroups (OFSGs). The OFSGs break down each MOG into a number of specific occupational fields within the general area defined by the MOG. Appendix A contains a list of the MOGs and OFSGs and their associated definitions.

3.3 For the IDOS categorization, each occupation in the DoD work force has been assigned a two digit alpha code. The code represents the MOG (the first character) and the OFSG (the two character combinations given to the occupation). The definitions of the MOGs and OFSGs specify the type of occupations that are categorized. The categorization is based on the primary occupation of the individual, i.e., the activity that one is qualified to engage in. This differs from the function or purpose an individual fulfills through his occupation. For example, the General Schedule occupation "Chemical Engineering" has been

PRESEARCH INCORPORATED

assigned the IDOS Code "AB." The "A" in the first position specifies the MOG "Scientific and Engineering Professional." The "AB" combination categorizes this occupation within the OFSG "Engineers." A chemical engineer is placed in this category because of his professional background, regardless of the fact that he may be actually working as a budget analyst.

DATA BASE

3.4 The occupational management structure of each Service has been used in the data base to define the primary occupations of the individuals within the work force. An IDOS MOG and OFSG has been assigned to each of the occupational codes as defined by the Civil Service Commission and the Services' occupational management systems. The translation between the occupational codes of each work force subset and the corresponding IDOS code is provided in Appendix B. Note that only the basic part of the occupational codes is used. Any prefix or suffix to the occupational codes indicating additional skills or qualifications has been eliminated to retain the concept of using the "primary occupation."

3.5 The work force information contained in the MULTICS data base was obtained from DMDC and reflects the active military and civilian strengths for the Army, Air Force, Marine Corps, and Navy as of March 1976. The following data elements are contained in the MULTICS data base.

GS Civilians

- CSC series number
- CSC series title
- IDOS code

PRESEARCH INCORPORATED

- DoD occupational code
- PATCO code
- Pay grade

WB Civilians

- CSC series number
- CSC series title
- IDOS code
- DoD occupational code
- Pay plan, e.g., WG, WL, WS 1/
- Pay grade

Military

- Services' Occupational Code
 - . Army officers: MOS 2/
 - . Army warrant officers: MOS
 - . Army enlisted: MOS
 - . Air Force officers: AFSC 3/

1/ Refers to blue collar occupational pay plans established by the Civil Service Commission under the Classification Act of 1949:
WG = general pay plan - now supervisory
WL = identifies a supervisory position, i.e., leader
WS = identifies a supervisory position, i.e., supervisor.

2/ Military Occupational Specialty (MOS). A classification system used to describe a grouping of duties and responsibilities possessing such close occupational or functional relationships that a large degree of interchangeability among persons so classified exists at any given level of skill (e.g., MOS 1203 Tank Unit Commander).

3/ Air Force Specialty Code (AFSC). The Air Force equivalent of the Army and Marine Corps MOS system.

PRESEARCH INCORPORATED

- . Air Force enlisted: AFSC
- . Marine Corps officers: MOS
- . Marine Corps enlisted: MOS
- . Navy officers: NOC 4/
- . Navy enlisted: NEC 5/ and rating

- Pay grade
- IDOS code
- DoD occupational code.

3.6 The IDOS code was added to the MULTICS data base after Presearch Incorporated completed the analysis of the Services' occupational structure and the IDOS structure. Several other data elements were added to the data base to provide a correspondence to other management systems in future analytical work performed by OSD. The DoD occupation code, which is keyed to the Services' occupational codes, was added to all military, GS and WB civilian data sets. It is a direct application of the DoD Occupational Code system maintained by DMDC (see Appendix C). The Civil Service Commissions' (CSC) PATCO codes, which relate to the GS series, were added to the GS civilian data set (see Appendix D). In most cases the IDOS code assigned to each occupation is a logical extension of the PATCO category. For example

4/ Navy Officer Classification Code (NOC). The Navy equivalent to the MOS structure. When used to identify a billet requirement it is a general statement of duties performed to accomplish some part of an activity's mission. When used in officer classification it reflects qualifications acquired as a result of performance in a billet.

5/ Navy Enlisted Classification (NEC). A code that reflects special knowledge and skills that identify Navy enlisted personnel and requirements when the rating structure is insufficient by itself (e.g., 3383 Surface Ship Nuclear Propulsion Plant Operator).

PRESEARCH INCORPORATED

the IDOS MOG "Managers and Administrators" is conceptually the same as the PATCO code "A," "Administrators." This logical correspondence is outlined in Appendix C. However, several occupations did not fall into this pattern of logic due to the difference in manpower management viewpoints between OSD and CSC. The occupations receiving PATCO codes which differ from the PATCO-IDOS correspondence shown in Appendix C are listed in Appendix D.

PRESEARCH INCORPORATED

APPENDIX A
DEFINITIONS OF THE IDOS SYSTEM MAJOR
OCCUPATIONAL GROUPS (MOGs) AND
OCCUPATIONAL FUNCTIONAL
SUBGROUPS (OFGs)

A. Scientific and Engineering Professionals

Includes all officers and civilians with scientific, engineering or architectural backgrounds. This generally requires at least a bachelor's degree in engineering or science, or appropriate experience in the field.

AA. Scientists

All personnel qualified to perform research and development duties related to the natural and physical sciences, such as biology, chemistry, metallurgy, geology, oceanography, cartography, physics, and veterinary science.

AB. Engineers

All personnel trained in the engineering or architectural areas.

C. Other Professionals

Encompasses all officers and civilians trained in the mathematics, medical, law, education and intelligence fields. These positions require a college degree or an equivalent level of experience in the professional field.

CA. Mathematicians

All personnel trained to perform mathematical, statistical or operations research analysis.

PRESEARCH INCORPORATED

CB. Medical Professionals

All personnel qualified to provide service in health-care related professional areas, such as surgery, dentistry, general practice, pediatrics, orthopedics, nursing, medical technology or pharmacy.

CC. Legal Professionals

All personnel trained to work in law or patent examination areas.

CD. Education Professionals

All personnel qualified to teach or perform research in the education area.

CF. Intelligence Professionals

All personnel who are qualified in the military intelligence, communications intelligence or counter-intelligence areas.

CZ. Miscellaneous Professionals

All personnel trained in professional areas not specified in any other "Scientific and Engineering Professionals" or "Other Professionals" category. This includes the social science, public affairs and library science areas.

E. Managers and Administrators

Contains the officers and civilians trained as policymakers, organizers or managers. The professionals qualified to provide direct support to management in administrative areas such as accounting or data systems analysis are also included.

EA. Logistics Managers and Administrators

All personnel qualified to manage or administer the procurement, supply, transportation, safety or general logistics areas.

PRESEARCH INCORPORATED

- EB. Personnel Managers and Administrators
All personnel qualified to perform duties related to manpower planning, wage and salary administration, medical administration or training administration.
- EC. Financial Managers and Administrators
All personnel trained in budget preparation and control, accounting, auditing or fiscal analysis.
- ED. Data Systems Analysts
All personnel qualified to design and develop data systems, coordinate programming efforts or control the implementation and use of systems.
- EE. General Managers and Administrators
All personnel trained to manage and administer services, facilities or programs in areas not specifically defined in other "Managers and Administrators" categories.
- EF. Service Force Managers and Administrators
All personnel trained to command military forces or units in areas which have no civilian counterpart, such as tanks or tactical fighters.
- G. Technical Personnel
Encompasses specialists qualified in technical areas that require extensive special training. This includes supporting professional, aviation, and computer operations.
- GA. Scientific and Engineering Technical Personnel
All personnel trained to support engineering and scientific work through the application of mathematics and science.

PRESEARCH INCORPORATED

- GB. Medical Technical Personnel
All personnel qualified to assist health care professionals, operate medical or dental equipment or provide first aid and emergency treatment.
- GC. Logistics Technical Personnel
All personnel qualified to use and evaluate methods for efficient operation of supply, maintenance or transportation functions (excluding air or surface traffic control). Also may employ stock control techniques to maintain accountability of material.
- GD. Management/Personnel Technical Personnel
All personnel trained to provide direct support to management or personnel operations. This includes maintaining quality control, performing efficiency evaluation, instructing, and recruiting.
- GF. Aircraft Operations Personnel
All personnel qualified to pilot or navigate aircraft.
- GG. Air/Surface Traffic Controllers
All personnel qualified to direct, coordinate or schedule local air or surface traffic movement.
- GK. ADP Programmers
All personnel trained to write, analyze and test computer programs for data processing applications.

PRESEARCH INCORPORATED

GN. Intelligence Personnel

All personnel trained to operate EW, cryptographic or sonar equipment and collect, coordinate or evaluate intelligence data.

GZ. Miscellaneous Technical Personnel

All personnel qualified as specialists in the fields of photography, audiovisuals, T.V., lithography, printing or other fields not specified in other "Technical Personnel" categories.

J. Clerical Personnel

Includes all personnel trained to provide the typing, stenography, office equipment operation and filing in support office operations.

JA. Secretaries

All personnel qualified to directly aid supervisors through the provision of clerical and administrative assistance.

JB. Financial Clerks

All personnel trained to provide typing, filing, bookkeeping and machine operation in support of accountants, auditors or other financial administrators.

JC. Logistics Clerks

All personnel trained to provide clerical support in the administration of the purchase, movement, storage, maintenance and disposal of material.

PRESEARCH INCORPORATED

JD. General Office Clerks

All personnel trained to provide general clerical assistance to administrative functions. This includes those qualified as unit diary clerks, administrative specialists, receptionists, clerk-typists and general office equipment operators.

JE. Data Processing Equipment Operations

All personnel trained to operate computer peripheral equipment and consoles, provide keypunch services and control tape storage areas.

JH. Personnel/Medical Clerks

All personnel trained to provide clerical support in the administration of either personnel or medical areas.

JZ. Miscellaneous Clerks

All personnel trained to provide clerical support in specific areas not included above. Examples are those qualified to be chaplain's assistants, library assistants and editorial assistants.

M. Service Personnel

Contains all personnel qualified to provide security, fire protection, medical domestic services and personal services. Each subgroup encompasses supervisors, chiefs and superintendents.

MA. Medical Service Personnel

All personnel qualified to provide domestic services in hospitals and medical clinics.

PRESEARCH INCORPORATED

- MB. Fire Protection Service Personnel
All personnel trained to provide fire-fighting or aircraft crash rescue services.
- MC. Police/Security Service Personnel
All personnel trained to provide personnel and facility security and protection. This includes those qualified as detectives, patrolmen, security guards, and correctional facility guards.
- MD. Food Service Personnel
All personnel qualified to handle, prepare, and serve food and provide related food services, such as club operations.
- ME. Personal Service Personnel
All personnel qualified to provide exchange operations, steward services, missionary operations, and laundry services.
- MF. Investigative Service Personnel
All personnel trained to investigate security clearances and safety violations, inspect food and drugs or provide customs investigations services.
- MG. Communications Service Personnel
All personnel qualified to operate and provide limited maintenance to communications equipment. This includes the operation of radios, switchboards, telephones, teletypes and cryptographic equipment.
- MZ. Miscellaneous Service Personnel
All personnel trained to provide services in areas not specified in any of the above categories. This includes musicians and those qualified to provide audiovisual aids.

PRESEARCH INCORPORATED

P. Craftsmen, Mechanics and Production Workers

Includes personnel with the capability to install, maintain, repair or fabricate material and equipment. The maintenance personnel have at least intermediate-level support capabilities. Each subgroup contains supervisors, chiefs and superintendents.

PA. Electronic Repairmen

All personnel trained to install, maintain or repair all electronic equipment except computers (see PC "Computer Repairmen"). This includes radar systems, test and calibration equipment, satellite communication systems and avionics equipment.

PB. Electricians

All personnel trained to install, repair or maintain electrical systems and equipment that produce or transmit electrical power. This includes transformers, generators, motors and associated power lines and equipment.

PC. Computer Repairmen

All personnel trained to maintain, repair or install ADP equipment, such as computer consoles, memory devices, disk and tape drives and other peripheral equipment.

PD. Aircraft Mechanics

All personnel qualified to maintain and repair airframes and aircraft engines or powertrains.

PRESEARCH INCORPORATED

- PE. Vehicular Mechanics
All personnel qualified to maintain and repair internal combustion engines for all tracked and wheeled vehicles, including locomotives, as well as their powertrain and chassis components.
- PF. Marine Equipment Repairmen
All personnel qualified to install, maintain, and repair marine engines, pumps, shipboard cargo-handling equipment, and other marine equipment, including small vessels or harbor crafts.
- PG. Machine Tool Operators
All personnel trained to fabricate or repair metal parts, tools, dies, gauges, gears, or other such fixtures and equipment.
- PH. Metal Workers
All personnel trained to fabricate or repair sheet metal devices. Includes those qualified as welders, metal jig workers, foundry workers, solder workers, and metal body repairmen.
- PJ. Pipefitting Workers
All personnel trained to install, maintain, or repair rigid pipeline systems for fluids, such as, water, steam, gas, oil, and sewer lines. Includes those qualified as plumbers and other pipefitters.

PRESEARCH INCORPORATED

PL. Woodworkers

All personnel trained to fabricate, maintain, or repair lumber products such as buildings, furniture, or other timber products. Includes those qualified as carpenters, cabinetmakers, boat repairmen, patternmakers, and other wood craftsmen.

PM. Multiple Crafts Constructioner

All personnel qualified in more than one type of craft work or repair. Among these are personnel qualified as combat engineers, bridge specialists, and Seabee team technicians.

PN. Ordnance Maintenance

All personnel qualified to maintain and repair all ordnance and associated equipment. This includes explosive ordnance disposal and atomic demolitions.

PY. Miscellaneous Mechanics and Repairmen

All personnel trained to maintain and repair office equipment, chemical equipment, musical instruments and other equipment not classified elsewhere.

PZ. Miscellaneous Production Workers

All personnel qualified in the areas of fabric, leather, rubber, glass or plastics production and any other manufacturing not specified in the above categories.

R. Laborers, Operators and Routine Maintainers

Encompasses all personnel trained to provide equipment operation, labor and routine maintenance in the transportation, supply and installation support areas. This includes supervisors, chiefs and superintendents.

PRESEARCH INCORPORATED

- RA. Vehicle Operators
All personnel qualified to operate wheeled and tracked vehicles or locomotives.
- RB. Material Workers
All personnel qualified to handle material, gasoline and other petroleum products at warehouses, supply facilities or depots.
- RC. Installation Maintenance Workers
All personnel trained to provide upkeep and general housekeeping of buildings and grounds.
- RD. Ship/Boat Operators
All personnel qualified to provide deck and shipboard pilotage and ship propulsion operations.
- RE. Aircraft Routine Maintainers and Equipment Operators
All personnel qualified to operate and maintain all field and ground support equipment, provide pre-flight inspections or perform organizational level maintenance on aircraft.
- RF. Miscellaneous Equipment Operators and Laborers
All personnel trained to operate equipment not elsewhere specified or qualified as a laborer without an associated type of equipment or facility mentioned above.
- T. Military-Unique Personnel
Includes all military personnel trained in occupations with no civilian equivalent, e.g., infantrymen, artillerymen or torpedomen.

PRESEARCH INCORPORATED

TA. Infantry Personnel

All personnel trained to operate small arms and/or small caliber crew-served weapons. This includes those trained as infantrymen, motor men, assaultmen or special forces personnel.

TC. Armor and Amphibious Personnel

All personnel trained to conduct maneuvers with armor vehicles or amphibious assault craft.

TD. Artillery, Gunnery and Missile Personnel

All personnel trained to operate missile systems or large caliber gun systems. This includes cannon crewmen, gunner's mates, and rocket crewmen.

TZ. Miscellaneous Military-Unique Personnel

All personnel qualified in occupations with no civilian equivalent that is not specified in any of the above categories, e.g., Chemical Staff Specialist, or NBC Defense Specialist.

W. Other Personnel

Encompasses all personnel qualified in occupations that cannot be classified into any other major occupational group. This includes students, patients, and personnel on special assignments that are not defined in the Services' occupational systems.

WA. Trainees

All personnel designated by their parent military services' occupational management system as being a student or trainee.

WI. Other Personnel

All personnel designated with occupations not defined in the Services' or Civil Service Commission's occupational management systems.

* The first digit under Occupational Code indicates the following:

a = Grades 1 to 6

b = Grades 1 to 10

c = Grades 7 to 10

d = Grades 7 to 18

e = Grades 11 to 18.

** Underscore signifies any digit may be used in that position.
