PREFACE

During the past four years, which marks the organization and growth of oceanography at the Navy Underwater Sound Laboratory, a considerable amount of reporting has accumulated from investigations conducted by the Oceanography Branch (Code 2213) of the Ocean Sciences Division. This bibliography was compiled to make accessible to a wider audience, information that may be of interest or value to them.

## INTRODUCTION

This compilation contains technical memoranda, technical reports, proceedings, journal articles, presentations and films authored by members of the Oceanography Branch. In a few instances, technical memoranda, etc. which have been authored by members outside the Oceanography Branch, but pertain to Code 2213 data, have been included. In the process of compiling this bibliography, it was necessary to omit a few publications. All material is unclassified.

The procedure followed in presenting the material is shown by the table of contents. From observations of the yearly listings, it is noted that the bibliography reflects the expansion, both in numbers of people and projects, of the Oceanography Branch.
