95TH CONGRESS, 1st Session | SENATE | REPORT No. 95-325

DEPARTMENT OF DEFENSE APPROPRIATION BILL, 1978

JULY 1 (legislative day, MAY 18), 1977.—Ordered to be printed

Mr. STENNIS (for Mr. MCCLELLAN), from the Committee on Appropriations, submitted the following

REPORT

[To accompany H.R. 7933]

The Committee on Appropriations, to which was referred the bill (H.R. 7933) making appropriations for the Department of Defense for the fiscal year ending September 30, 1978, and for other purposes, reports the same to the Senate with various amendments. Information is herewith presented relative to the changes made:

Amount of bill as passed House (new obligational authority)	$110,082,308,000
Amount of increase recommended by Senate Committee	1,012,589,000
Total of bill as reported to Senate	111,094,897,000
Amount of 1978 budget estimate (new obligational authority)	113,877,280,000
Amount of 1977 appropriations	105,106,325,000
The bill as reported to the Senate:	
Under the fiscal year 1978 budget estimate	2,782,383,000
Over appropriations for fiscal year 1977	5,988,572,000

95-694 O

Base Operating Support Costs

As a result of the Committee's hearings in 1976, the Committee determined that a sizeable number of military bases had no mission other than to provide support to family housing or tenant units. Subsequently, the Committee requested the Department of Defense to provide base operating support (BOS) costs for all Department of Defense installations that had no military mission but existed primarily to provide support to tenant or family housing activities.

The department's response indicated that all installations exist, in essence, to provide support for tenant activities. However, there was a number of installations that clearly had little or no military mission. Data on these were provided in August 1976. The rationale used to select the installations generally involved selection of those with no substantial active force military strengths and/or combat type units or activities.

In November 1976, the Committee requested that a review be made of the same data previously provided for all similar military installations in the U.S. rather than just the select few that had been examined previously. The Committee requested the Department to dis-

play this data in meaningful form to include appropriate management indicators.

The Department recently responded to this request, and provided data for installations in the 50 States, using fiscal year 1975 as a baseline, but excluding certain logistics, research and development and other similar type facilities and installations that lack combat assigned missions or that are generally not capable of accepting such units.

The Committee received an analysis that for the first time displayed installations by mission categories, and included such data as total installation population, annual BOS costs for the installation, and certain school data. The data included such factors as the annual BOS cost per person, real property investment cost per person and other similar information. The report was prepared with the installations grouped using the installation Defense Planning and Programming category classification system developed for the Base structure annex required to be submitted to the Congress under the provisions of Section 302, Public Law 94–361, as part of the annual Defense Manpower Requirements report.

The various factors provided gross indicators of resource utilization for real property investment, annual BOS cost per mission and total personnel, ratio of supported personnel to support personnel, and ratio of BOS costs for each BOS personnel.

The Committee examined the data at various stages in the process, and questioned the military departments closely in the hearings on certain bases that appeared to be showing significant inefficiencies in their utilization of BOS resources. The Committee found a strong inclination for the military departments, in particular the Army, to fail to be responsive to questions about BOS costs and efficiencies. In the case of the Army, although the bases were clearly different, the responses to a Committee's questions tended to state repeatedly that all bases were funded in the "most austere" manner possible, that no base could be moved because it might damage recruiting potential, that any movement might degrade mission capability, that any additional travel might affect the zero energy growth program, and that base facilities were occupied at or near the 100-percent level. The Army responses further indicated that transfer of activities to other bases would be impractical because it would be too costly to duplicate technical equipment, that transfer to a nearby post would save little money, and relocation of a base would always require significant new construction.

In addition, the Army consistently maintained that unique services were being performed at almost every base and that this would preclude a move, and further that area support responsibilities were significant.

The general conclusion for almost every base hosting reserve components was that manning and costs were properly aligned with the nature of reserve operations.

The Committee found that the factual data submitted by the Army and the other services placed the validity of the above answers in grave doubt. When similar bases in the same planning/mission categories were compared, very great disparities in BOS costs and management indicators were noted.

As a result of this, the Committee decided that where there were significant and unexplained discrepancies, adjustments would be made in the fiscal year 1978 BOS costs. The method used was as follows:

Determine median BOS costs per mission personnel for each category of base.

Permit unexplained variances of up to 20 percent in excess of the median, but eliminate all unexplained variance in excess of 20 percent. This involved the reduction of both military and civilian personnel resulting from the calculated funding reductions. Although the data was from fiscal year 1975, the data was inflated by 20 percent to raise it to the fiscal year 1978 level.

The Committee has displayed below the results of this analysis. Although the funding reductions have been made to the various service budgets, the Committee wishes to emphasize that the military departments will be permitted to reallocate the reductions in a way that is different from that shown below. The Committee does not expect implementation of these reductions to result in any base closures, but rather in a more rational and reasonable allocation of base operating support costs at installations in the United States.

Grand total, all Services						—442.2 —181.3

[1] Because of the special nature of this base, no reduction was made by the Committee.
[2] Because of the special activities at this base, only a portion of the reduction was made, as shown in the next 2 cols.
[3] Because of announced realignments, no reductions were made by the Committee, or only a portion of the indicated reduction was made, as shown in the next 2 cols.

Note: Detail may not add to totals because of rounding.

The Committee is extremely pleased that it was able to review BOS costs systematically for the first time as a result of the submission of the detailed DOD data. Accordingly, the Committee directs that the following actions be implemented.

(1) DOD establish a *uniform* definition of BOS. This shall include but shall not be limited to: real property maintenance and operations, including installation engineering, installation transportation, installation supply operations (retail only), installation material maintenance, installation communications, administration (comptroller, command, procurement, personnel, training, et cetera) laundry, food service, community support (clubs, messes, libraries, morale, welfare, and recreational activities, etc.) medical and dental (except for area hospitals and dental clinics which should be considered separately) installation security, chaplain and any other activities at an installation which are required for direct support of the installation mission and tenants.

(2) DOD define and provide uniform workload and performance measures that can serve as management indicators.

(3) DOD provide *uniform* and realistic data reporting of such items as what population is, what staff and faculty is, what reserve load is, and what students loads are.

(4) DOD establish realistic unit BOS costs (e.g. cost per battalion, cost per squadron) at bases where such units exist.

(5) DOD provide military construction plans for each base along with the various data.

(6) DOD provide the same data for 1968 as it provides for the current year, to the extent that the 1968 data are available.

DOD should utilize the above direction to prepare and submit to the Committee a continuing report similar to the one provided to the committee this year, including all of the various management indica-

tors, averages, medians, et cetera, using standard definitions. The Committee directs that this report be submitted annually, coincident with the budget justifications, and include data for prior, current and budget years. The first submission is to be in January 1978.

DEPARTMENT OF DEFENSE

DOMESTIC BASE FACTORS REPORT

Explanation of Installation Data Column Entries
(All data entries apply to the Reporting Fiscal Year (RFY) unless otherwise identified)

Column	Explanation of Column Data
	PART I - GENERAL INSTALLATION DATA
1	Name of installation. (This entry is repeated on each separate page.)
2	Two letter standard State abbreviation of the State in which the installation is located. (This entry is repeated on each separate page).
3	Total land area of the installation, in acres, as contained in the installation Real Property Inventory (RPI) records for the reporting Fiscal Year (RFY). (Includes fee, public domain, easement, lease). The land area of the installation includes all separate satellite properties for which the installation provides support personnel and BOS funds.
4	Total real property acquisition costs as reported in the installation RPI for the RFY in millions of dollars ($ MIL).
5	Total gross building area as reported in the installation RPI for the RFY in thousands of gross square feet (GSF) - (000GSF).

Column	Explanation of Column Data
6	Total military construction (MILCON) (defined as including all facility projects regardless of source or appropriation, i.e., minor; RDT&E; Family Housing, Procurement, etc.) projects approved and funded which have been started but not yet completed in millions of dollars ($ MIL). This entry consists of all MILCON from FY minus 2-years to the FY being reported. • For the FY 1976 DBFR, this MILCON would include: - FY 1974 - FY 1975 - FY 1976 • For the FY 1977 DBFR, this MILCON would include: - FY 1975 - FY 1976 - FY 1977 • For each subsequent annual DBFR, the data entry follows the above pattern.
7	Total Five Year Defense Plan (FYDP) MILCON including that authorized and funded but not yet started in millions of dollars ($ MIL). • For the FY 1976 DBFR, this would include the cost of all projects in the FY 1977 Budget as approved by Congress. • For the FY 1977 DBFR, this would include the cost of all projects in the FY 1978 Budget as approved by Congress. • For each subsequent annual DBFR, the data entry follows the above pattern.

PLUS

Column	Explanation of Column Data
	All MILCON included in the remaining four years of the FYDP related to the President's Budget of the then current FY (not DBFR reporting FY) in millions of dollars ($ MIL). • For the FY 1976 DBFR, this includes the projects contained for the first four Fiscal Years in the FYDP of FY 1978 to FY 1982. • For the FY 1977 DBFR, this includes the projects contained for the first four Fiscal Years in the FYDP of FY 1979 to FY 1983 and may be estimated. • For each subsequent annual DBFR, the data entry follows the above pattern.
8	The total estimated value of the Backlog of Maintenance and Repair (BMAR) for all buildings regardless of source of funding or appropriation (i.e., Family Housing, RDT&E facilities, medical facilities, etc.) as of the end of the RFY, in millions of dollars ($ MIL). (The BMAR is the end of the fiscal year measurement of maintenance and repair work on all real property (i.e., buildings, utilities plants and systems, and other facilities such as roads, paved areas, etc.) remaining as a firm requirement of the installation's work plans prescribed by DoD Directive 4165.2 but which lack of resources prohibited accomplishment in that fiscal year.) Three categories of BMAR have been totalled for this entry - buildings, utilities and all other BMAR.
9	Total annual Base Operating Support (BOS) costs for the RFY, in millions of dollars ($ MIL) based upon the uniform definition of BOS contained in this document except MILCON for the reporting FY which is included separately as part of the data entry of Column 6.

Column	Explanation of Column Data
10	The sum of the FYDP MILCON plus the five year projection of the RFY total annual BOS in constant RFY millions of dollars ($ MIL).

PART II - INSTALLATION POPULATION DATA

11	The end FY 1968 Authorized Full Time Assigned (AFTA) military, civilian and appropriated fund financed contractor personnel for all activities at the installation. For civilian personnel, this data includes all appropriated fund financed full time, part time and intermittent workers which are part of end strengths (ceilings) of all activities at the installation.
12	Same as column 11 but for the RFY.
13	The change in the number of AFTA personnel at the installation from FY 1968 to the RFY.
14	The decimal value of the RFY utilization of the installation on the basis of its FY 1968 AFTA population (decimal).
15	The RFY TOTAL POPULATION at the installation. The total population consists of the AFTA population (Column 12) plus the sum of the Average Daily Load (ADL) of students (military and civilian) and the average equivalent daily Reserve Component training load (considered to be all military personnel) at the installation, as appropriate. The average equivalent daily Reserve Component (RC) training load is comprised of two components: (1) for RC aviation activities and (2) for other than aviation activities. This load is derived by identifying the total annual RC activity training load in man-years separately for each type of activity using the installation. This annual load is then converted to a monthly load for each of

Column	Explanation of Column Data
	the two types of activities. These monthly loads are then equated to a daily average equivalent load by use of a factor. The factor for estimating the average daily equivalent load for RC aviation activities is 26 percent of the average monthly RC aviation activity personnel using the installation for training purposes. Full time RC technicians located at an installation are included as part of this RC load. The factor for non-aviation RC activity personnel using the installation for training purposes is 14 percent of the average monthly RC load. The factor is greater for RC aviation activities because of more personnel required to support such activities.
	The ADL of students applies only to installations which have formal type school and training activities and represents the average daily load of both military and civilian students. Formal type schools and training activities exclude division/unit schools but include formal pilot training schools involved in transitioning, proficiency, combat, etc., training taught in Combat Crew Training type Schools (CCTS).
16	The RFY MISSION POPULATION at the installation. The MISSION POPULATION consists of the TOTAL POPULATION less the military and appropriated fund financed civilian and contractor personnel assigned to BOS functions at the installations.
17	The percentage of military personnel at the installation included in RFY MISSION POPULATION (%).
18	The number of military and appropriated fund financed civilian and contractor personnel assigned to BOS functions at the installation at the end of the RFY. (The personnel included in the AFTA population performing BOS functions and services).

Column	Explanation of Column Data
19	The percentage of military personnel assigned to BOS functions at the installation at the end of the RFY (%).
20	The end of the RFY dependent population (excluding sponsors) living both on and off-post in government housing and off-post in private housing for all sponsors who are assigned to any activity at the installation.
21	The end of the RFY population supported by the installation. This population figure includes the AFTA population, the Non-Appropriated fund (NAF) personnel assigned to all NAF activities at the installation, the dependents of all sponsors assigned to installation whether living on or off-post in government housing or off-post in private housing and the military retiree population which use installation facilities. Every effort has been made to avoid duplication of the military retiree population in areas where activities at more than one installation are used by retirees.

PART III - SELECTED INSTALLATION MANAGEMENT INDICATORS

22	The average real property acquisition cost per capita on the basis of the TOTAL POPULATION for the installation at the end of the RFY ($/Person). This factor is subject to serious distortion because the Government accounts for this acquisition on the basis of original cost at the time acquired which could have been many years ago. Care, therefore, must be used when evaluating this factor. This cautionary note applies to any factor involving the real property acquisition cost of military installations. Despite the difficulties with this factor, it has some utility since it is the only real property investment type installation data available.

Column	Explanation of Column Data
23	The average building area in gross square feet used per capita on the basis of the TOTAL POPULATION at the installation at the end of the RFY (GSF/person).
24	The average real property acquisition cost per gross square foot of building space at the installation at the end of the RFY ($/GSF). (See cautionary note under Column 22).
25	The per capita new real property investment (MILCON) authorized and funded by the Congress for the installation for the RFY plus one year on the basis of the MISSION POPULATION ($/person).
26	The five year planned new real property investment (MILCON) per capita for the installation on the basis of the MISSION POPULATION ($/person).
27	The five year planned new real property investment (MILCON) plus the projected five-year RFY constant dollar BOS costs per capita for the installation on the basis of the MISSION POPULATION ($/person).
28	The average annual BOS cost per capita for the installation for the RFY on the basis of the MISSION POPULATION ($/person).
29	The average annual BOS cost per gross square foot of building space at the installation at the end of the RFY ($/GSF).
30	The average annual BOS expenditure for each person assigned to BOS functions at the installation at the end of the RFY ($/person).
31	The ratio of the MISSION POPULATION to the personnel assigned to BOS functions at the installation at the end of RFY.

Column	Explanation of Column Data
32	The average number of appropriated fund financed contractor personnel per million dollars of annual BOS expenditure at the installation at the end of the RFY (persons/$MIL).
33	The military personnel assigned to BOS functions as a percentage of the total personnel assigned to BOS functions at the installation at the end of the RFY (%).
34	The cost of BOS personnel salaries (military and appropriated fund civilian personnel) as a percentage of the total annual BOS expenditures at the installation during the RFY (%).
35	The annual cost of energy as a percentage of the total annual BOS expenditures at the installation during the RFY (%).
36	The annual cost of purchased utilities as a percentage of the total annual BOS expenditures at the installation during the RFY (%).
37	The annual cost of purchased utilities per capita at the installation for the RFY on the basis of the AFTA population ($/person).
38	The average BMAR cost per gross square foot of building space at the installation at the end of RFY ($/GSF).
39	The ratio of BMAR cost per million dollars of real property acquisition cost for the installation at the end of the RFY ($/$ MIL).
40	The BMAR cost per capita at the installation at the end of RFY on the basis of the AFTA population ($/person).
41	The ratio of the population supported to the AFTA population of the installation at the end of the RFY.

Column	Explanation of Column Data
42	The ratio of the average number of dependents of sponsors assigned to the installation to the AFTA population at the installation at the end of the RFY.

PART IV - INSTALLATION TRAINING ACTIVITY DATA

43	The total number of military and appropriated fund civilian and contractor personnel assigned to all the staffs and faculties (S&F) of the formal school/training activities at the installation during FY 1968. This entry includes all command, instructors, administrative, clerical, support and other personnel assigned to all formal school/ training activities at the installation. This entry excludes BOS personnel assigned to the installation although they may support the school/training activity.
44	The total Average Daily Load (ADL) of students, both military and civilian, assigned to all formal school/training activities at the installation during FY 1968.
45	The Total Annual Output (TAO) of students at all the formal school/ training activities at the installation who successfully completed the school/training requirements during FY 1968.
46	The same entry as for Column 43, except for the RFY.
47	The same entry as for Column 44, except for the RFY.
48	The same entry as for Column 45, except for the RFY.
49	The change in S&F from FY 1968 to the RFY at the formal school/ training activities at the installation (persons).

Column	Explanation of Column Data
50	The change in the ADL of students from FY 1968 to the RFY at the formal school/training activities at the installation (students).
51	The change in TAO of students from FY 1968 to the RFY at the formal school/training activities at the installation (students).
52	The ADL of students using the formal school/training activities at the installation in the RFY as a function of the FY 1968 ADL of students (decimal).
53	The number of buildings used for all the formal school/training activities at the installation at the end of the RFY.
54	The building area in thousands of gross square feet, used for all the formal school/training activities at the installation at the end of the RFY (000GSF).
55	The total acquisition cost in millions of dollars of the school facilities used for all formal school/training activities at the installation at the end of the RFY ($ MIL).
56	The ratio of the ADL of students to the total S&F of the formal school/training activities at the installation for FY 1968.
57	The ratio of the TAO of students to the total S&F of the formal school/training activities at the installation for FY 1968.
58	The same as the entry for Column 56, except for the RFY.
59	The same as the entry for Column 57, except for the RFY.
60	The average building area used per student comprising the ADL for all formal school/training activities at the installation at the end of the RFY (GSF/student).

Column	Explanation of Column Data
61	The average school facility real property acquisition cost per student comprising the ADL for all formal school/training activities at the installation at the end of the RFY ($/student).
62	The total annual cost in millions of dollars of operating all the formal school/training activities at the installation for the RFY ($ MIL). This entry excludes all BOS costs attributable to the formal school/training activities but includes the cost of all military and appropriated fund financed civilian and contractor personnel assigned to those activities.
63	The total annual cost of operating all the formal school/training activities per student comprising the TAO at the installation during the RFY ($/student).

PART V - MISSION DATA

The mission data included in the report consists of total number divisions and wings; the total number of brigades, groups and similar sized military units; and the total number of battalions and squadrons assigned to the installation. These totals of the various military units include all combat type units plus all others which carry the appropriate designation regardless of mission or equipage (e.g., for the Air Force an assigned mobile communications squadron would be included in the total number of squadrons of the installation. This type of unit, however, is not included in the combat type squadrons contained in the report as indicated below.)

The mission data also includes information on the total number of combat type divisions and wings; brigades and groups; and battalions and squadrons assigned to the installation. For the preparation of this report, all battalions/squadrons with assigned aircraft are considered to be combat type units and their assigned aircraft are considered Unit Equipment (UE). In addition, all other aircraft assigned to aviation installations

are also included in the total combat Unit Equipment column entries. Further, for the Army and Marine Corps installations, only armored, mechanized, infantry, and amphibious battalions are considered combat type units and the UE column entry is limited to the number of tanks, armored personnel carriers (APC's) and the amphibious vehicles (LVT's) assigned to these combat type units and all other units at the installation. Accordingly, any review of factors involving the UE at an installation must take into account that there is not a direct correlation between the total number of combat type battalions/squadrons and the total combat UE column entry for the installation. For example, for Army and Marine Corps installations, the combat UE column entry includes the total number of tanks, APC's and LVT's assigned to the installation, whereas the combat type battalion/squadron column entry will include infantry battalions without such equipment. The report data has, of necessity, been limited, as indicated above, in order to display the most important, meaningful and readily quantifiable mission type data.

Column	Explanation of Column Data
64	The total number of combat type battalions/squadrons assigned to the installation in FY 1968. This entry includes the total number of aviation battalions and squadrons assigned to the installation in FY 1968. In addition, for Army and Marine Corps installations, the entry also includes the total number of infantry, mechanized, tank and amphibious (in the case of the Marine Corps) battalions assigned to the installation in FY 1968.
65	The total number of combat type unit equipment (UE) assigned to the installation in FY 1968. This includes the total number of aircraft assigned to the combat type battalions/squadrons and to all other units at the installation in FY 1968. For Army and Marine Corps installations, the entry also includes the total number of tanks, APC's and LVT's assigned to the combat type battalions and all other units at the installation in FY 1968.

Column	Explanation of Column Data
66	The total number of divisions/wings assigned to the installation during the RFY.
67	The total number of brigade/group type units assigned to the installation during the RFY.
68	The total number of battalions/squadrons assigned to the installation during the RFY.
69	The total number of combat type divisions/wings assigned to the installation during the RFY.
70	The total number of combat type brigade/group type units assigned to the installation during the RFY.
71	The same entry as for Column 64, except for the RFY.
72	The same entry as for Column 65, except for the RFY. The combat type Unit Equipment (UE) assigned to the installation during the RFY is limited to all aircraft and only tanks, APC's and LVT's.
73	The average number of combat type battalions/squadrons normally deployed away from the installation during the RFY.
74	The average number of UE (limited to the types contained in the Column 72 entry) associated with the combat type battalions/ squadrons normally deployed away from the installation during the RFY.
75	The change in the number of combat type battalions/squadrons at the installation from FY 1968 to the RFY.

Column	Explanation of Column Data
76	The changes in the combat type UE at the installation from FY 1968 to the RFY.
77	The RFY number of combat UE as a function of the FY 1968 combat type UE assigned to the installation (decimal).
78	The real property acquisition cost of the installation per combat type brigade/group assigned to the installation in the RFY ($ MIL/bde).
79	The sum of the land area at the installation and all associated properties per combat type brigade/group assigned to the installation in the RFY (acres/bde).
80	The real property acquisition cost of the installation per combat type battalion/squadron assigned to the installation in the RFY ($ MIL/bn).
81	The sum of the land area at the installation and all associated properties per combat type battalion assigned to the installation in the RFY (acres/bn).
82	The real property acquisition cost of the installation per combat type UE assigned to the installation in the RFY ($ MIL/piece of equipment).
83	The sum of the land area at the installation and all associated properties per combat type UE assigned to the installation in the RFY (acre/piece of equipment).
84	The average number of mission personnel at the installation per combat type battalion/squadron assigned to the installation in the RFY (persons/bn).

Column	Explanation of Column Data
85	The average number of mission personnel at the installation per combat type UE assigned to the installation in the RFY.
