FOREWORD

This bibliography covers military periodical articles written on the subject of field fortification of position. The subject has to do with how well a unit or weapon is secured from enemy penetration. The term includes many related applications which have something to do with the subject, such as: camouflage, defilade, emplacement, entrenchment or fortification. They may take the form of a breastwork, bunker, cave, dugout, parapet, pill box, or trench. The emphasis in this bibliography is on Europe.

The number is arranged in two parts. For the sake of brevity part one lists military periodicals by an arbitrarily devised acronym. Part two presents representative periodical articles found in fourteen journals owned by the Morris Swett Library. Inclusion of an item, or omission, does not imply USAFAS indorsement or sanction of the compiler's point-of-view.

LESTER L. MILLER, JR.
