NTIS COMPUTER PRODUCTS CATALOG DATA SHEET

15. COMPUTER PRODUCT ABSTRACT

Acquisition cost estimates developed as single point values are, at best, misleading and, at worst, impossible to achieve. Single point estimates do not sufficiently reflect the assumptions, judgment or apprehensions of the estimator. This program deals with a technique for incorporating uncertainty and risk into the acquisition cost estimating procedure such that the estimates are presented as a range of values, encompassing engineering, manufacturing and logistic support estimates. The cost estimating model, a pragmatic application of simulation and classical cost estimating procedures, has been programmed in BASIC and is generalizable and exportable. ...Software Description: The program is written in the BASIC programming language for implementation on a WANG 2200 computer using the Basic 2, Release 2.1, operating system. 32K bytes of core storage are required to operate the model.

16. DATA FILE TECHNICAL DESCRIPTION

Source tape is in ASCII character set. Character set restricts preparation to 9 track, one-half inch tape only. Identify recording mode by specifying density only. Call NTIS Computer Products, if you have any questions.

17. SOFTWARE TECHNICAL DESCRIPTION

Software is written in;

Fortran _____ COBOL _____ Basic X Assembly _____ Other (Specify) _____

Software requires;

CPR Mfr. WANG Model(s) 2200 Operating system(s) Basic 2, Rel. 2.1

Minimum of 32 K bytes core. The following special features and/or additional requirements in hardware:

INSTRUCTIONS FOR COMPLETING NTIS FORM 231
NTIS COMPUTER PRODUCTS CATALOG DATA SHEET

1. **ACCESSION NO.** Leave blank (for catalog reference).
2. **CONTRIBUTING AGENCY REPORT NO.** (If different from NTIS Accession No.) enter agency reference No. if available. e.g. "Paper No. 17; Report No. 967BA; Reference No. 589".
3. **SUBJECT** (Subject Category Code). Leave blank.
4. **PRODUCT.** Circle appropriate name.
5. **AGENCY, BUREAU, DIVISION, AND ADDRESS.** List hierarchally and give complete address. Use current federal organization manual.
6. **PRODUCT NAME.** Should describe product and subject.
7. **DESCRIPTORS OF PRODUCT.** Use words which identify the major concept of research and are sufficiently specific to be used as index entries for cataloging (terms from TEST or NTIS Business Thesaurus).
8. **DATES OF COVERAGE.** Term of data file (June '62 - June '70) or date of issue, preparation and release No. (software).
9. **FILE SIZE.** Enter number of reels of tape or number of punched cards, as appropriate. For Data Base Reference and Publications, leave blank.
10. **AVAILABILITY STATEMENT.** Information complete enough to allow ordering (purchase) of tape or cards, or how to obtain information from data base.
11. **PRICE INFORMATION.** Enter unit price per reel, card deck, search, program, issue or subscription.
12. **GEOGRAPHIC SCOPE.** Geocoding should specify geographic level and definition; such as, U.S., state, county, SMSA, tract, etc.
13. **TECHNICAL REPRESENTATIVES.** For subject: statistician, economist or program analyst. For media: compiler of file, programmer, EDP technician.
14. **DOCUMENTATION:** If available, check box; if not available enter date of availability.
15. **ABSTRACT.** Include a brief (200 words or less) factual summary of the most significant information describing the product. List such things as purpose; scope and coverage including data limitations, source documents (if significant) and publications produced by the product.
16. **DATA FILE TECHNICAL DESCRIPTION.** Enter relevant data. This entry is applicable only to data files.
17. **SOFTWARE TECHNICAL DESCRIPTION.** Special features and additional hardware requirements refers to those needed in addition to that necessary for the operating system. An example might be a plotter if the software requires it. Another might be a special print chain.

INSTRUCTIONS

GENERAL:

The purpose of this form is to facilitate the interchange of recorded magnetic tape. This form is not intended to replace other subject matter/content documentation. If elements of documentation are available, they should be attached, or their location should be indicated in Item 8. Examples are: description of the record and/or file content; file layout; record format; record sequence; file type (data, bibliographic, source or object program; "as of" date; period of coverage; record names; file function; location and number of tape marks; character set; padding character information; last block conventions; special (record/file) separation (marks/characters); end of file or end of reel conventions (other than standard labels); and characteristics peculiar to the operating system or the practices of the generating agency. See FIPS PUB 20 for a discussion of the elements of file documentation for information interchange.

A separate form should be completed for each file.

01. **Completion Date.** Enter the date this form was prepared.
02. **Form Prepared By.** Enter the name and phone number (including area code) of the individual who prepared this form.
03. **Reel I.D. Number.** Enter the number which uniquely identifies this reel. It, generally, will be a property control number for the submitting organization. If the file is recorded on multiple reels, enter the first reel number in this item and list all others, in sequence, in Item 33. This information is used to identify the tape reels transmitted.
04. **Recording Date.** Enter the date the reels identified in Item 3 were recorded (copied).
05. **File Identifier or Descriptive Title.** Enter the name used to identify the file. If it is a generally known file, use the name by which it is commonly known. If it is not generally known, make the title as descriptive as possible.
06. **Short Title.** Enter the commonly used abbreviation or acronym which identifies the file. This will usually be the file identification written on the external (gummed) reel label.
07. **Source Unavailable.** Enter the date when your organization will no longer be able to supply a copy of this file.
08. **Documentation Available.** Enter an "X" in the appropriate box. If documentation is available, but is not being forwarded to the recipient as part of this transaction, provide in this space a bibliographic citation or mailing address.
09. **File Position on Reel.** If this is the first or only file on the reel, enter a "1". If the reel contains multiple files, enter the file's position number on the reel. See Item 29.
10. **To Be Returned.** Enter an "X" in the appropriate box. If the file is to be returned to an organization other than the sender, enter an "X" in "to other than sender", fill in Item 13, and enter the appropriate address in Item 33; or include a completed mailing label, and enter instructions for return in Item 33.
11. **Submitting Organization and Address.** Identify the sending organization. Fill in complete mailing address, including street, city, state, and zip code of the sending organization.
12. **Receiving Organization and Address.** Identify the receiving organization. Fill in complete mailing address, including street, city, state, and zip code. If possible, include the name of the individual who is expecting the file.
13. **Due Back Date.** Enter the date the file is expected to be returned, if the "Yes" box was checked in Item 10.
14. **Technical Contact(s) and Phone Number(s).** Enter person(s) or office(s) to be contacted for clarification and further information concerning the tape reel contents. Include telephone area code. Provide the organization name and mailing address (in Item 33), if different from that in Item 11.

RECORDING SYSTEM CHARACTERISTICS

EQUIPMENT MANUFACTURER AND MODEL

15. **Processing Unit.** Enter the manufacturer's name and model number of the computer used (or emulated) to record the data.
16. **Tape Sub System.** Enter the manufacturer's name and model number of the tape drive used (or emulated) to record the data.
17. **Number of Tracks.** Enter an "X" in the appropriate box. If "Other" is checked, enter the number of tracks in Item 33.
18. **Parity.** Enter an "X" in the appropriate box.
19. **Density.** Enter the number of bits recorded per inch (e.g.: 200,556,800,1800,8250 BPI). For those unusual cases where "characters per inch" must be used, explain in Item 33.

RECORDING SOFTWARE

20. **Operating System, Release and Version.** Identify the system software used to record this tape.
21. **Utility Program or Data Base Language.** Enter the name of the utility program used to copy the tape or the data base language used to create it. Identify the release and/or level.
22. **Internal File Identifier.** If there is a recorded label, enter the file identification (e.g., Data Set Name) used in the label.
23. **Character Set (Graphics).** Place an "X" in all appropriate boxes. If "Other" and/or "non-print codes" are checked, describe briefly in Item 33 and supply appropriate documentation. If nonprinting formats (such as packed decimal or three-bytes-in-four-characters) are used, specify in Item 33 and include documentation.
24. **Recorded Label (Internal Label).** Enter an "X" in all appropriate boxes. If "Other" is checked, include documentation of the label(s).

FILE CHARACTERISTICS

NUMBER OF RECORDS

25. **Physical.** Enter the number of physical records (blocks) in the file. This number is normally supplied by utility programs which copy physical records without regard to the logical structure of the tape. Labels are not included in this count.
26. **Logical.** Enter the number of logical records in the file. This number is usually supplied by the program which created the file. Labels are not included in this count.
27. **Record Type.** Enter an "X" in the appropriate box. If "Other" is checked, provide documentation on how physical and logical record length control is established.
28. **Records/Block (Blocking Factor).** If "fixed length" is checked in Item 27, enter the blocking factor.
29. **Type of File Organization.** Enter an "X" in the appropriate box. If this form accompanies a single reel of tape which contains a single file, check "one file, one reel". If this form accompanies several reels of tape which contain a single file, check "one file, multiple reels". If this form is one of several which accompany a single reel of tape containing several files, check "multiple files, one reel". Finally, if this form accompanies several reels of tape which contain several files, check "multiple files, multiple reels" and describe this file's position in the file set in Item 33.

RECORD LENGTH

If the record is not fixed length, enter the maximum size record length, and describe techniques used to control and indicate size in Item 33. Enter an "X" in the appropriate box to indicate the unit of measurement. If size is indicated in number of words, also enter the word size as "bits per word".

30. **Physical.** Enter the physical record length (block size).
31. **Logical.** Enter the logical record length.

SUPPLEMENTAL INFORMATION

32. **Use/Handling Constraints.** If the data in this file is subject to National Security classification, Atomic Energy Act classification, any Privacy Act constraints, Reproduction constraints, etc., enter an "X" in the "Yes" box. If "Yes" has been checked, indicate the security level and procedures to be followed.
33. **For Submitting Organization Use.** This area is provided for use of the organization submitting this form. It may contain any additional information useful to the recipient of the file. If information is entered here as a result of checks in other item numbers, the information should be identified by the corresponding item number. Use additional pages, if necessary.
