PREFACE

The Advisory Group for Aerospace Research and Development (AGARD) is an agency of the North Atlantic Treaty Organization (NATO) devoted to the furtherance of aerospace science and technology and to the exchange of information in these fields among the Member-Nations of NATO. In 1960, as part of its publications programme, AGARD produced a Multilingual Aeronautical Dictionary, for which, in 1963, it issued a supplement.

Since 1963, substantial technological advances have taken place, and many new terms have been introduced into the language of aeronautical research, development, and engineering. At the same time, many terms previously in current use are obsolescent. For these reasons, the original AGARD Multilingual Aeronautical Dictionary has been completely revised and updated.

AGARD activities, conducted with the assistance of nine panels of eminent scientists and engineers from NATO Member-Nations, cover the diverse fields of aerospace technology. Each of the panels participated in the preparation of the revised dictionary, under the direction of the Technical Information Panel. The work has been a truly cooperative effort, with scientists and engineers from NATO Member-Nations combining their efforts to select the terms and prepare the definitions and the NATO countries themselves being responsible for providing the terms in their respective languages.

In his foreword to the first AGARD Multilingual Aeronautical Dictionary, the late Dr. Theodore von Kármán, world-renowned scientist and founder of AGARD, said, "I believe that one of the fundamental conditions for the exchange of scientific information is the exact definition of scientific and technical concepts and a knowledge of the corresponding terminology in various languages." It is AGARD's hope that this revised dictionary will help fulfil this objective and will prove a valuable tool for scientists, engineers, and translators in the field of aeronautics.

Alan M. Lovelace
Chairman of AGARD
(Deputy Administrator,
US National Aeronautics
and Space Administration,
Washington, D.C.)
January 1980

PREFACE

L'Advisory Group for Aerospace Research and Development (AGARD) est une agence de l'Organisation du Traité de l'Atlantique Nord (OTAN) se consacrant au développement de la science et de la technologie aérospatiales; de même qu'à l'échange d'informations dans ces domaines parmi les pays membres de l'OTAN. En 1960, l'AGARD a édité, au titre de son programme de publications, un Dictionnaire Aéronautique Multilingue, suivi en 1963 d'un supplément à ce dictionnaire.

Depuis cette date, la technologie s'est considérablement développée et de nombreux termes nouveaux ont été introduits dans le langage utilisé dans la recherche, le développement et la technique aéronautiques. Parallèlement, de nombreux termes qui étaient jusque là utilisés couramment, ne sont presque plus employés. C'est pour ces raisons que le Dictionnaire Aéronautique Multilingue de l'AGARD a été entièrement révisé et mis à jour.

Les activités de l'AGARD sont réalisées avec l'aide de neuf 'Panels' composés de scientifiques et d'ingénieurs éminents des pays membres de l'OTAN, et couvrent les divers domaines de la technologie aérospatiale. Chacun de ces Panels a participé à la préparation du Dictionnaire révisé, sous l'égide du Panel d'Informations Techniques. Ce travail a constitué un véritable effort de coopération: d'une part, des scientifiques et des ingénieurs des pays membres de l'OTAN ont conjugué leurs efforts pour choisir les termes et préparer les définitions; d'autre part, les pays membres de l'OTAN ont eux-mêmes été chargés des traductions.

Dans son préambule au premier Dictionnaire Aéronautique Multilingue publié par l'AGARD, feu le Dr. Dr. Théodore Kármán, scientifique de réputation mondiale et fondateur de l'AGARD disait: 'Je crois que l'une des conditions fondamentales de l'échange de renseignements scientifiques est la définition exacte des concepts scientifiques et techniques ainsi que la connaissance de la terminologie correspondante en plusieurs langues'. L'AGARD espère que ce Dictionnaire révisé permettra de réaliser cet objectif et qu'il constituera un outil de travail de grande valeur pour les scientifiques, les ingénieurs et les traducteurs du domaine de l'aéronautique.

Alan M. Lovelace
Président de l'AGARD
(Deputy Administrator,
U.S. National Aeronautics
& Space Administration,
Washington, D.C.)
Janvier 1980

INTRODUCTION

The preparation of the revised AGARD Multilingual Aeronautical Dictionary was supervised by a working group of the AGARD Technical Information Panel. The members of the working group were Mr. S. C. Schuler (United Kingdom), Chairman; Mr. J. Klopp (France); Mr. H. E. Pryor (United States); Miss E. H. Ridler (United Kingdom); Mr. G. Rosenau (Federal Republic of Germany); and Mr. A. J. R. Whitehead (AGARD staff).

As is evident from the acknowledgments, terms and definitions in this dictionary originated from sources in many different countries. It was not thought appropriate to impose a single editorial standard for terms and definitions from authoritative United Kingdom and United States sources; thus both British and United States spellings, for example, will be found in the text.

In view of the importance and wide use of acronyms and abbreviations in the language of aeronautics, a list of English language acronyms, abbreviations, and symbols, together with their expansions, is included in the dictionary.

Automatic data processing techniques have been used extensively in the preparation of the dictionary, both to facilitate the sorting of material and to permit ready updating in the future.

The field of aeronautics is subject to particularly rapid change, and it is clear that the content of a dictionary such as this cannot be static. Work will continue to be done, and many of the shortcomings in this edition will be corrected in future revised editions. Some English terms do not at present have acceptable or easily identifiable equivalent terms; in some other languages these have been identified by triple hyphenation, thus: ---. Suggestions for inclusions in revised editions of the dictionary are welcomed and should be sent to the Scientific Publication and Technical Information Executive, AGARD/NATO, 7 rue Ancelle, 92200 Neuilly sur Seine, France.

INTRODUCTION

La préparation du Dictionnaire Aéronautique Multilingue de l'AGARD a été placée sous la responsabilité d'un Groupe de Travail du Panel d'Informations Techniques de l'AGARD, composé de: S.C. Schuler (Royaume-Uni), Président; J. Klopp (France); H.E. Pryor (Etats-Unis); Mademoiselle E.H. Ridler (Royaume-Uni); G. Rosenau (République Fédérale d'Allemagne); et de A.J.R. Whitehead (du personnel de l'AGARD).

Comme on pourra le voir d'après les 'Remerciements', les termes et les définitions qui figurent dans ce Dictionnaire ont trouvé leur origine dans de nombreux pays. On n'a pas jugé utile d'imposer une seule norme rédactionnelle pour les termes et les définitions provenant de sources autorisées du Royaume-Uni et des Etats-Unis; et c'est ainsi que l'on trouvera par exemple dans le texte aussi bien l'orthographe britannique que l'orthographe américaine.

En raison de l'importance et de l'omniprésence d'abréviations et de sigles dans le langage de l'aéronautique, on a décidé d'inclure dans ce Dictionnaire une liste de sigles, d'abréviations et de symboles de langue anglaise, ainsi que les expressions complètes qu'ils représentent.

Les techniques de traitement automatique des données ont été largement employées dans la préparation de ce Dictionnaire pour faciliter aussi bien le tri des matières que les mises à jour futures.

Le domaine de l'aéronautique est sujet à une évolution particulièrement rapide et il est évident que le contenu d'un Dictionnaire tel que celui-ci ne peut pas demeurer statique. Il continuera de faire l'objet de révisions, ce qui permettra de remédier à beaucoup des défauts de la présente édition. Certains termes anglais n'ont pas, actuellement, de termes équivalents acceptables ou facilement identifiables; ceux-ci sont identifiés par trois tirets se présentant comme suit: ---. Les suggestions, à inclure dans les éditions révisées de ce Dictionnair, seront les bienvenues; veuillez les envoyer à: Scientific Publications & Technical Information Information Executive, AGARD/OTAN, 7 Rue Ancelle, 9200 Neuilly-sur-Seine, France.

ACKNOWLEDGMENTS

A publication of the scope and magnitude of this Multilingual Aeronautical Dictionary necessarily involves the time and talents of very many people. Space is obviously insufficient to mention all by name, but acknowledgment must first be paid to the many members of AGARD panels and AGARD staff who have taken part in the project by selecting terms, defining them, and reviewing drafts of the various subject fields covered in the dictionary.

Outside the AGARD community, special acknowledgment must be made to Dr. A. Barcala Herreros (Instituto Nacional de la Tecnia Aeronáutica, Madrid) and his colleagues, who have provided the Spanish equivalents. Some work has been undertaken by Contractors, and their contributions are much appreciated. In addition, for varying degrees of specialized assistance, special thanks are extended to Mrs. Heather Butler, United Kingdom Ministry of Defence, Mrs. A. E. Blagborough, Royal Air Force Institute of Aviation Medicine, and Wing Commander John Jewell (Royal Air Force, retired), Martin-Baker Aircraft Company, United Kingdom. It is hoped that all those who have not been mentioned by name will accept this general statement of acknowledgment and appreciation.

The list of acronyms, abbreviations, and symbols was prepared and edited by a team of AGARD staff members.

Many of the definitions in this dictionary are original, but naturally many have been extracted from material already published and are given here either verbatim or in a slightly amended form.

Permission to publish copyright material from the following sources is acknowledged with thanks:

American Society of Metals, Metals Park, Ohio, USA (for material from Metals Handbook, 8th edition)

Applied Science Publishers, Barking, Essex, England, and the author (for material from Dictionary of Rubber by K. H. Heinisch, 1974)

British Standards Institution, London, England (for material from BS 185, BS 661, BS 4236, BS 4727)

European Organization for Quality Control, Berne, Switzerland (for material from Glossary of Terms Used in Quality Control, 4th Edition, July 1976)

Ferranti Limited, Edinburgh, Scotland, and EUROCAE (for material from a glossary of avionics terms by E. J. Leaton)

Firth Brown Ltd., Sheffield, England (for material from Glossary of Metallurgical Terms)

Institute of Electrical and Electronics Engineers, New York, USA (for material from Standard Gyro and Accelerometer Terminology and from IEEE Transactions on Reliability, 1970)

International Civil Aviation Organization, Montreal, Canada (for material from the ICAO Lexicon)

United Kingdom Government (for material from various official publications, including Standard Vocabulary of Terms, Aircraft-Assisted Escape Systems, 1973)

United States Government (for material from various United States Government publications including the USAF Dictionary, the NASA Dictionary of Technical Terms for Aerospace Use, the NASA Aeronautical Dictionary, and the Picatinny Arsenal Glossary of Plastics Terms)

This publication was computer-formatted and photocomposed by the NASA Scientific and Technical Information Facility operated by the Informatics Information Systems Company, and AGARD is indebted to this facility for its original work on relevant computer techniques and for the high quality of the finished copy.

REMERCIEMENTS

Une publication ayant la portée et l'amplitude de ce Dictionnaire Aéronautique Multilingue implique la participation d'un très grand nombre de personnes. L'espace dont nous disposons est nettement insuffisant pour les mentionner toutes individuellement par leur nom, mais nos premiers remerciements doivent aller aux nombreux membres des Panels de l'AGARD et aux membres du personnel de l'AGARD qui ont participé à cette tâche, en choisissant les termes, en les définissant, et en révisant les brouillons successifs des sections de ce dictionnaire.

En dehors de la communauté de l'AGARD, nous devons remercier chaleureusement le docteur Barcala Herreros, de l'Instituto Nacional de la Tecnia Aeronautica, Madrid, ainsi que ses collaborateurs, qui ont fourni les équivalents espagnols. Certains travaux ont été effectués au titre d'un contrat et ces contributions ont été grandement appréciées. Nous devons en outre adresser nos remerciements aux personnes suivantes pour l'aide spécialisée qu'elles nous ont apportée: Madame Heather Butler, du Ministère de la Défense du Royaume-Uni, Madame A.E. Blagborough, de l'Institut de Médecine de l'Aviation de la Royal Air Force, le lieutenant-colonel en retraite John Jewell (Royal Air Force), la société Martin-Baker Aircraft Co., du Royaume-uni. Nous espérons que tous ceux que nous n'avons pu mentionner par leur nom accepteront ces remerciements exprimés en termes généraux.

La liste de sigles, abréviations et symboles a été établie et élaborée par un groupe de membres du personnel de l'AGARD.

De nombreuses définitions utilisées dans ce dictionnaire sont des définitions originales mais, bien entendu, nombreuses sont celles qui ont été extraites, soit directement, soit après légère modification, de textes déjà publiés.

L'autorisation de publier les informations faisant l'objet de droits d'auteur a été obtenue des organisations suivantes; et nous les en remercions vivement:

American Society of Metals, Metals Park, Ohio, USA (pour matière extraite du Manuel 'Metals Handbook', 8th Edition)

Applied Science Publishers, Barking, Essex, Angleterre, ainsi que l'auteur (pour matière provenant du 'Dictionary of Rubber' par K.H. Heinisch, 1974)

British Standards Institution, Londres, Angleterre (pour matière extraite des normes britanniques BS 185, BS 661, BS 4236, BS 4727)

Ferranti Limited, Edimbourg, Ecosse, et EUROCAE (pour matière extraite du 'Glossary of Avionics Terms' par E.J. Leaton)

Firth Brown Ltd., Sheffield, Angleterre (pour matière provenant du 'Glossary of Metallurgical Terms'

Gouvernement du Royaume-Uni (pour matière provenent de diverses publications officielles, y compris 'Standard Vocabulary of Terms, Aircraft Assisted Escape Systems, 1973')

Gouvernement des Etats-Unis (pour matière provenent de diverses publications officielles américaines, y compris le 'USAF Dictionary', le 'NASA Dictionary of Technical Terms for Aerospace Use', le 'NASA Aeronautical Dictionary' et le 'Glossary of Plastics Terms du Picatinny Arsenal)

Institute of Electrical and Electronics Engineers, New York, USA (pour matière extraite de la publication 'Standard Gyro and Accelerometer Terminology' et de l'IEEE Transactions on Reliability', 1970)

International Civil Aviation Organisation (Organisation de l'Aviation Civile Internationale), Montréal, Canada (pour termes extraits du Lexique des Termes Employés dans le domaine de l'Aviation Civile Internationale)

Organisation Européenne pour Contrôle de la Qualité, Berne, Suisse (pour matière provenant du 'Glossary of Terms Used in Quality Control', 4th Edition, July 1976)

La présente publication a été réalisée en photocomposition par l'organisme d'informations techniques et scientifiques de la NASA, qui est géré par l'Informatics Information Systems Company; l'AGARD est particulièrement reconnaissant à cet organisme du travail original qu'il a réalisé sur les techniques J'informatique appropriées et pour l'excellente qualité du travail accompli.

HOW TO USE THIS BOOK

THIS DICTIONARY CONTAINS:

PART I: An alphabetical list of English terms, accompanied by English language definitions and translations of each term into the nine other languages. Each English term and definition is accompanied by a reference number. The codes used to identify the nine languages other than English are as follows:

DE	German
ES	Spanish
FR	French
HE	Greek
IT	Italian
NE	Dutch
PO	Portuguese
RU	Russian
TU	Turkish

PART II: Nine alphabetical lists of terms in the languages other than English, each term being accompanied by a reference number, keyed to its English language equivalent in Part I. From these reference numbers, equivalents in the nine other languages, and definitions in English, can readily be found.

PART III: A list of English acronyms, abbreviations, and symbols, each accompanied by its expansion in English.

COMMENT UTILISER CE LIVRE

CE DICTIONNAIRE CONTIENT:

Dans la 1ère PARTIE, une liste alphabétique des termes anglais, avec leurs définitions en langue anglaise, et la traduction de chaque terme en neuf autres langues. Chaque définition et chaque terme anglais est accompagné d'un numéro de référence Les codes permettant d'identifier les neuf langues autres que l'anglais sont les suivants:

DE	Allemand
ES	Espagnol
FR	Français
HE	Grec
IT	Italien
NE	Néerlandais
PO	Portugais
RU	Russe
TU	Turc

Dans la 2e PARTIE, neuf listes alphabétiques des termes dans des langues autres que l'anglais, chaque terme étant accompagné d'un numéro de référence se rapportant à l'équivalent en langue anglaise donné dans la 1ère Partie. A l'aide de ces numéros de référence on peut facilement trouver les équivalents dans les neuf autres langues, ainsi que les définitions en langue anglaise.

Dans la 3e PARTIE, une liste de sigles, abréviations et symboles en langue anglaise, chacun accompagné de l'expression complète qu'il représente en anglais.

HOE GEBRUIK IK DIT BOEK

DE INHOUD VAN DIT WOORDENBOEK IS ALS VOLGT:

In DEEL I, een alfabetische lijst met engelse uitdrukkingen, tezamen met engelse taaldefinities en met vertalingen van iedere uitdrukking in de negen andere talen. Elke engelse uitdrukking en definitie heeft een verwijsnummer. De negen niet-engelse talen zijn gekodeerd als volgt:

DE	Duits
ES	Spaans
FR	Frans
HE	Grieks
IT	Italiaans
NE	Nederlands
PO	Portugees
RU	Russisch
TU	Turks

In DEEL II, negen alfabetische lijsten met uitdrukkingen in niet-engelse talen; daarbij heeft iedere uitdrukking een verwijsnummer afgestemd op de overeenkomstige engelse uitdrukking in Deel I. Met behulp van deze verwijsnummers zijn de corresponderende uitdrukkingen in de overige negen talen en de definities in de engelse taal gemakkelijk te vinden.

In DEEL III, een lijst met engelse acronymen, afkortingen en symbolen, samen met de volledige uitdrukking in het engels.

HINWEISE FUER DIE BENUTZUNG DIESES BUCHES

DIESES WOERTERBUCH ENTHAELT:

In TEIL I eine alphabetische Liste von englischen Ausdrücken, mit Definitionem in englischer Sprache und mit Uebersetzungen jedes Ausdruckes in den übrigen neun Sprachen. Jeder englische Ausdruck mit seiner Definition ist mit einer Bezugsnummer versehen. Die übrigen neun Sprachen sind wie folgt kodiert:

DE	Deutsch
ES	Spanisch
FR	Französisch
HE	Griechisch
IT	Italienisch
NE	Niederländisch
PO	Portugiesisch
RU	Russisch
TU	Türkisch

In TEIL II neun alphabetische Listen von Ausdrücken in allen Sprachen ausser Englisch, wobei jeder Ausdruck von einer Bezugsnummer begleitet ist, die sich auf das englische Aequivalent in Teil I bezieht. Mit Hilfe dieser Nummern können äquivalente Ausdrücke in den übrigen neun Sprachen sowie Definitionen in englischer Sprache leicht gefunden werden.

In TIEL III ein Liste englischer Akronyme, Abkürzungen und Zeichen je mit ihren Erläuterungen in englischer Sprache.

ΠΩΣ ΝΑ ΧΡΗΣΙΜΟΠΟΙΕΤΕ ΑΥΤΟ ΤΟ ΒΙΒΛΙΟ

ΤΟ ΛΕΞΙΚΟ ΑΥΤΟ ΣΥΜΠΕΡΙΛΑΜΒΑΝΕΙ

Στό ΜΕΡΟΣ Ι ἕνας ἀλφαβητικός κατάλογος τῶν ἀγγλικῶν ὅρων, πού συνοδεύεται ἀπό τούς ὁρισμούς στά ἀγγλικά καί ἀπό μεταφράσεις κάθε ὅρου στίς ἄλλες ἐννέα γλῶσσες. Κάθε ἀγγλικός ὅρος καί ὁρισμός συνοδεύεται ἀπό ἕνα ἀριθμόν παραπομπῆς. Οἱ κώδικες πού χρησιμοποιοῦνται γιά τήν ἀναγνώριση τῶν ἐννέα γλωσσῶν, ἐκτός τῆς Ἀγγλικῆς, εἶναι οἱ ἑξῆς,

DE	Γερμανικά
ES	Ισπανικά
FR	Γαλλικά
HE	Ελληνικά
IT	Ιταλικά
NE	Ολλανδικά
PO	Πορτογαλλικά
RU	Ρωσσικά
TU	Τουρκικά

Στό ΜΕΡΟΣ ΙΙ ἐννέα ἀλφαβητικοί κατάλογοι ὅρων στίς ἄλλες γλῶσσες, ἐκτός τῆς Ἀγγλικῆ καί κάθε ὅρος συνοδεύεται ἀπό ἕνα ἀριθμόν παραπομπῆς συνδεόμενος μέ τόν ταυτόσημον ὅρον στήν Ἀγγλική εἰς τό μέρος Ι. Ἀπό αὐτούς τούς ἀριθμούς παραπομπῆς εὔκολα βρίσκονται οἱ ταυτόσημοι ὅροι σέ ἄλλες γλῶσσες καί ὁρισμοί στά Ἀγγλικά.

Στό ΜΕΡΟΣ ΙΙΙ ἕνας κατάλογος ἀγγλικῶν ἀρκτικολέξων (ἀκρωνύμων) καί συντετμημένων λέξεων καί κάθε μία συνοδεύεται ἀπό τίς ἀγγλικές λέξεις ἀπό τίς ὁποῖες προέρχεται.

NORME PER L'USO DI QUESTO LIBRO

QUESTO DIZIONARIO CONTIENE:

Nella 1a PARTE una lista alfabetica dei termini inglesi con definizioni in inglese e con traduzioni di ogni termine nelle altre nove lingue. Ciascun termine a ciascuna definizione inglese sono accompagnati da un numero di riferimento. Tranne l'inglese le altre nove lingue si possono identificare come segue:

DE	Tedesco
ES	Spagnolo
FR	Francese
HE	Greco
IT	Italiano
NE	Olandese
PO	Portogese
RU	Russo
TU	Turco

Nella 11a PARTE nove liste alfabetiche di termini nelle lingue fuorché l'inglese, ciascun termine accompagnato da un numero di riferimento, accoppiato al suo termine equivalente in lingua inglese nella 1a Parte. Da questi numeri di riferimento si possono trovare facilmente gli equivalenti nelle altre nove lingue e le definizioni in lingua inglese.

Nella 111a PARTE una lista di acronimi ed abbreviazioni inglesi, ciascuno accompagnato dalla sua espansione in inglese.

COMO USAR ÊSTE LIVRO

ÊSTE DICIONÁRIO CONTEM:

Na PARTE I, uma lista alfabética de têrmos Ingleses, seguida por suas definições em língua Inglesa e pelas traduções de cadá palavra em outras nove línguas. Cada têrmo Inglês e definição é acompanhado por um número de referência. Os códigos aqui usados para identificar as nove línguas, aparte do Inglês, são:

DE	Alemão
ES	Espánhol
FR	Francês
HE	Grego
IT	Italiano
NE	Holandês
PO	Português
RU	Russo
TU	Turco

Na PARTE II, nove listas alfabéticas dos têrmos nas outras línguas, cada têrmo acompanhado por um número de referência, coincidente com seu equivalente na língua Inglesa na Parte I. Consultando estos números de referência é imensamente fácil encontrar as definições Inglesas e os equivalentes nas outras nove línguas contidas no dicionário.

Na PARTE III, encontra-se uma lista de iniciais que formam títulos e abreviaturas, todos acompanhados pelo seu significado em Inglês.

KİTABIN KULLANILIŞI

BU SÖZLÜĞÜN İÇİNDEKİLER:

I. BÖLÜM'de Ingilizce deyimlerin alfabetik listesinin yanı sıra İngilizce tanımları ve her deyimin dokuz ayrı dilde çevirisi. Her İngilizce deyim ve tanımın yanında bir referans numarası vardır. Ingilizce haric diyer dokuz dili belirten kısaltmalar aşağida gösterilmiştir:

DE	Almanca
ES	İspanyolca
FR	Fransızca
HE	Yunanca
IT	İtalyanca
NE	Hollandaca
PO	Portekizce
RU	Rusça
TU	Turkçe

II. BÖLÜM'de İngilizce hariç diyer dokuz dillerdeki deyimlerin alfabetik listesi ve her deyimin yanında. I. Bölümdeki Ingilizce karşılığına uyacak biçimde düzenlenen bir referans numarası vardır. Bu referans numaralarının yardımı ile diger dokuz dildeki karşılıklar ve İngilizce anlamları kolayca bulunabilir.

III. BÖLÜM'de İngilizce kısaltmaların ve sembollerin yanı sıra İngilizce açıklaman gösterilmiştir.

INSTRUCCIONES AL USO

CONTENIDO:

A PRIMERA PARTE presenta por orden alfabético una lista de términos ingelses y sus definiciones correspondientes en esta lengua así como la traducción de cada término a las otras nueve lenguas. A cada término inglés y su definición le corresponde un número de referencia. Se identifican come sigue las otras nueve lenguas:

DE	Alemán
ES	Español
FR	Francés
HE	Griego
IT	Itáliano
NE	Holandés
PO	Portugués
RU	Ruso
TU	Turco

LA SEGUNDA PARTE ofrece nueve listas de términos por orden alfabético, correspondientes a todas las lenguas con excepcion de la inglesa, cada término llevando un número clave que le refiere a su equivalente en lengua inglesa en la primera parte. Estos números permiten encontrar facilmente términos y definiciones en inglés y sus equivalentes en las otras nueve lenguas.

En la TERCERA PARTE se presenta una lista de siglas y abreviaciones inglesas, acompañadas por su significado en inglés.

КАК ПОЛЬЗОВАТЬСЯ СЛОВАРЕМ

В ЭТОМ СЛОВАРЕ ИМЕЕТСЯ:

ЧАСТЬ 1, в которой приведен в алфавитном порядке список английских терминов, определение этих терминов на английском языке и перевод каждого термина на девять других языков. Каждому английскому термину соответствует справочный номер. Кодовые обозначения, используемые для идентификации девяти других языков, приведены ниже:

DE	Немецкий
ES	Испанский
FR	Французский
HE	Греческий
IT	Итальянский
NE	Голландский
PO	Португальский
RU	Русский
TU	Турецкий

ЧАСТЬ 11, в которой приведены в алфавитном порядке девять списков на разных языках (кроме английского). Каждый термин снабжен справочным номером, связанным с английским эквивалентм данного термина, приведенным в ЧАСТЬ 1. По этим номером могут быть легко найдены эквиваленты данного термина на всех девяти языках (и толкование каждого термина на английском языке).

ЧАСТЬ 111, содержит список английских акронимов, сокращений и символов причем каждое из них сопровождается обьяснениями на английском языке.

10270
aircraft role equipment See 'aircraft mission equipment'.

10271
aircraft sound description system (ASDS) An airport noise description system under consideration by the US Federal Aviation Agency. It defines the extent of noise exposure for each aircraft type, in terms of the area defined by a maximum A-weighted sound level per aircraft event, equal to 85 dB, and a time constant per aircraft type and operation that provides a weighting based on the duration during which the level at various areas within the 85 dB contour exceeds 85 dB. Included in the system is the 'situation index' (SI), a linear summation of areas and durations obtained over all operations to obtain the quantity acre-minutes.

11574
cone angle An angle which is peculiar to parachute canopies of conical design. The surface of such canopy types can be represented by the surface of a regular pyramid. The magnitude of the cone angle is then equal to the angle measured from a plane parallel to the base and containing the vertex, to the line representing the pyramid slant height. For canopies of multiple conical design, i.e., bi-conical and tri-conical, the cone angle is the angle measured to the surface nearest the apex, while the angle to the next surface (bi-conical) is the 'second cone angle' and if a third unique surface is involved (tri-conical), the angle measured to this surface is called the 'third cone angle'.

12262
dynamic pressure (a) The pressure of a fluid, resulting from its motion, and equal to one half the fluid density times the fluid velocity squared; in the UK this quantity is often referred to as 'kinetic pressure' In incompressible flow, dynamic pressure is the difference between the total pressure and the static pressure; in the UK the term 'dynamic pressure' is often used for this difference in compressible flow as well. (b) In aerospace medicine, the aerodynamic forces acting on a body under conditions of relative motion within the atmosphere Proportional to the density of the medium and the square of the velocity, this is the pressure sensed by the airspeed indicator. The force is of importance in the assessment of the stresses applied to the human body during escape from a moving aircraft. Also known as 'Q-force' and 'ram pressure'.

13076

gimbal unbalance torque (tuned rotor gyro) The acceleration-sensitive torque caused by gimbal unbalance along the spin axis due to non-intersection of the flexure axes. Under constant acceleration, it appears as a second harmonic of the rotor spin frequency because of the single degree of freedom of the gimbal relative to the support shaft. When the gyro is subjected to vibratory acceleration applied normal to the spin axis at twice the rotor spin frequency, this torque results in a rectified unbalance drift rate

14037
Loran (Long Range Navigation) A medium- or low-frequency ground-referenced system of radio navigation in which a receiver in a craft measures the time interval between the arrivals of pulses from two or more synchronized ground transmitters comprising a chain (one master and one or more slaves) The craft is then located by reference to a map or chart on which a lattice of isochrones, in this case hyperbolic, is overprinted The original (1940) version, Loran A, is now (1975) obsolete. The current 100 kHz version, Loran C, uses ground and sky-wave propagation. Groups use eight (or nine, for master station) pulses Loran D, a tactical version of Loran C, operates at 16 pulses per group.

14068
Ludwieg tube wind tunnel Intermittently operating wind tunnel in which air is stored at high pressure in a long tube of constant cross-section upstream of the test section; the flow is initiated by opening a quick-acting valve downstream. Practically constant stagnation conditions are thus maintained until the expansion wave propagated upstream has returned to the test section after reflection from the closed end of the long tube. High flow quality is achieved, particularly in respect of freedom from low-frequency oscillations

nominal area In parachutes. A designation of a canopy's surface area which includes, for most canopy designs, the vent and slot areas. Canopies with vent areas greater than 1 percent of the nominal area calculated by including the vent area may exclude this area in subsequent nominal area calculations. The surface area produced by the addition of fullness to the cloth or rings is not considered. For most canopy types, which are constructed by assembling identically shaped gores, the nominal area is found by determining the area of a gore, multiplying this by the number of gores, and adding the design vent area.
