• COMMANDANT INSTRUCTION M16465.12 (old CG-446-2)

Subj: Manual Two of the Chemical Hazards Response Information System (CHRIS)

1. PURPOSE. This revision adds 500 chemicals, corrects errors, and adds new data to CHRIS. A further expansion from the present 900 to approximately 1000 chemicals will be made in the future. This manual provides the On-Scene Coordinator or other officials with some of the technical information necessary to properly respond to discharges of hazardous chemicals. The information provided in this manual may also be used for contingency planning and orientation. This manual is one part of CHRIS and is fully effective only when used in conjunction with the other system elements, COMDTINST's M16465.11, .13 and .14 (series).
2. DIRECTIVES AFFECTED. Manual Two of the Chemical Hazards Response Information System (CG-446-2) is hereby cancelled. ✓
3. ACTION. District Commanders and appropriate unit commanding officers shall ensure that proper training in the use of CHRIS is conducted frequently for all response personnel.
4. CHANGES. The submittal of recommended changes and corrections to COMMANDANT (G-WEP) is encouraged.

1. INTRODUCTION

→ The Chemical Hazard Response Information System (CHRIS) is designed to provide information needed for decision-making by responsible Coast Guard personnel during emergencies that occur during the water transport of hazardous chemicals. CHRIS also provides much information that can be used by the Coast Guard in its efforts to achieve better safety procedures and so prevent accidents.

CHRIS consists of four handbooks or manuals, a hazard assessment computer system (HACS), and technical support personnel located at Coast Guard headquarters. These components and their relations to one another are described in Section 2 of this manual.

↖

2. COMPONENTS OF CHRIS

2.1 A CONDENSED GUIDE TO CHEMICAL HAZARDS

The Condensed Guide contains information needed to help personnel make the proper *response* in an emergency situation; it is the only CHRIS handbook that will be carried to the actual scene of an accident. It is intended for use by port security personnel and others who may be the first to arrive at the site of an accidental discharge or fire and who need readily available and easily understood information about the hazardous properties of the chemical involved. It will be used to determine the proper actions that should be taken immediately to safeguard life and property and to prevent contamination of the environment.

The Condensed Guide briefly describes the chemical and biological hazards of various materials so that personnel at the scene of an accident can assess the danger and consider the appropriate large-scale response. It also lists the on-scene information needed for proper use of the Hazard Assessment Handbook. Selected information on each chemical covered by CHRIS is summarized from the more extensive material in the Hazardous Chemical Data Manual and is presented on a single page.

2.2 HAZARDOUS CHEMICAL DATA

This manual is the cornerstone of CHRIS. For each substance, it lists the specific chemical, physical, and biological data needed for the preparation and use of the other components of the system. It can also be used after the initial response action, when there is sufficient time to use more detailed information.

The Hazardous Chemical Data Manual is intended for use primarily by the On-Scene Coordinator (OSC) and by Regional and National Response Centers for devising, evaluating, and carrying out response plans.

Much of the quantitative information found in the Hazardous Chemical Data Manual is needed for the hazard assessment calculations described in the Hazard Assessment Handbook. The Hazardous Chemical Data Manual contains the so-called Hazard Assessment Code which directs the user of the Hazard Assessment Handbook to the appropriate calculation procedure. The Hazardous Chemical Data Manual also suggests general responses to an accidental discharge which summarize the detailed information given in the Response Methods Handbook.

2.3 HAZARD ASSESSMENT HANDBOOK (CG-446-3)

The Hazard Assessment Handbook describes procedures to be used for estimating the quantity of a hazardous chemical that may be released accidentally during shipment. It also describes how to estimate its concentration in air and in water as a function of time and distance from the discharge. Methods for predicting the resulting toxicity, fire, and explosion effects are also described. The calculations use data from the Hazardous Chemical Data Handbook.

2.4 HAZARD ASSESSMENT COMPUTER SYSTEM

The Hazard Assessment Computer System (HACS) is a computerized version of the Hazard Assessment Handbook. It permits trained headquarters specialists to obtain very detailed hazard evaluations quickly, when requested by OSC personnel. Methods for using HACS are described in the Hazard Assessment Handbook.

Although HACS and the Hazardous Chemical Data Handbook are based on the same original body of data, differences will occasionally arise because HACS is more readily updated than the printed manual.

2.5 RESPONSE METHODS HANDBOOK

The Response Methods Handbook is written specifically for Coast Guard OSC personnel who have had some training or experience in hazard and pollution response. The handbook describes cautionary and corrective response methods for reducing and eliminating hazards that result from chemical discharge.

Although general types of response are suggested in the Hazardous Chemical Data Handbook, the specific response, to be chosen from among those described in the Response Methods Handbook, should be determined by the results from the Hazard Assessment Handbook.

2.6 REGIONAL DATA BASE

The Coast Guard's Regional Contingency Plans, although not considered a part of CHRIS, are an important adjunct to the system. Each Regional Contingency Plan contains a section (Annex XX) that presents data on a specific region, sub-region, or locale. These data, which are intended for use by OSC personnel, include such information as the following:

- An inventory of physical resources and strike forces;
- Vulnerable or exposed resources (critical water-use areas);
- Potential pollution sources;
- Geographic and environmental features;
- Cooperating organizations;
- Recognized experts with identified skills.

3. EXPLANATION OF TERMS

This section explains the special terms used in the data sheets in Section 11, gives the sources of specific items, and includes other information that will be useful to the reader in interpreting the data. The paragraphs below are keyed to the relevant portions of Section 11 by the subheading and number used in the data sheets.

The expression "Not pertinent" means that the data item either has no real meaning (such as the flash point of a nonflammable chemical) or is not required for assessing a hazardous situation. The expression "Data not available" means that the information sought was not found in the general or specialized data sources listed in Section 10 of this manual. In a few cases where important data were not available, values were estimated by usually reliable procedures: all such values are labeled "(est.)". If more accurate values for those items are found, they will be included in later revisions.

The *name* used for each of the chemicals included in the CHRIS manuals is either (1) that specified in the Code of Federal Regulations, Title 46, Table 151.01-10(b) (Compounds Regulated by Subchapter O) and Table 151.01-10(d) (Compounds to be Regulated by Subchapter D) or (2) a common name for those chemicals not now regulated by Subchapters O and D but known to be hazardous during shipment. The data sheets are arranged in alphabetical order by chemical name, not by the 3-letter code.

The *3-letter code* is designed to facilitate correct identification of chemicals in oral or written communication. The code should be used only *in addition* to the compound name: it should not be used alone. For transmitting the code, use the phonetic alphabet given in the "International Code of Signals."

1. RESPONSE TO DISCHARGE

In every case of a discharge or leak, it is obvious that an effort should be made to reduce, stop, or contain the flow of material at its source if this can be done safely. The purpose of the terms used in this section is to describe in a general way the cautionary and corrective responses that are described in greater detail in the Response Methods Handbook.

- "*Issue warning*" is used when the chemical is a *poison*, has a *high flammability*, is a *water contaminant*, is an *air contaminant* (so as to be hazardous to life), is an *oxidizing material*, or is *corrosive*. In the Response Methods Handbook the italicized properties are the bases for cautionary responses to restrict ignition, and to restrict contaminated water for human use, farm use, and industrial use.

- "*Restrict access*" is used only for those chemicals that are unusually and immediately hazardous to personnel unless they are protected properly by gas masks, eye goggles, protective clothing, etc. In the Response Methods Handbook this cautionary response is sometimes used in a broader sense to ensure exclusion of spectators and others who might ignite flammable compounds.
- "*Evacuate area*" is used primarily for unusually poisonous chemicals or those that ignite easily. The same expression is used in the Response Methods Handbook for this cautionary response.
- "*Mechanical containment*" is used for water-insoluble chemicals that float and do not evaporate readily. In the Response Methods Handbook the corresponding corrective response is "Contain".
- "*Should be removed*" is used for chemicals that cannot be allowed to disperse because of their harmful effect on humans or on the ecological system in general. The term is not used unless there is a reasonable chance of preventing dispersal, after a discharge or leak, by chemical and physical treatment.
- "*Chemical and physical treatment*" is recommended for chemicals that can be removed by skimming, pumping, dredging, burning, neutralization, absorption, coagulation, or precipitation. The corrective response may also include the use of dispersing agents, sinking agents, and biological treatment. Specific procedures to be followed are found in the Response Methods Handbook. Cleaning of the shoreline is also specified there for some compounds.
- "*Disperse and flush*" is used for chemicals that can be made non-hazardous to humans by simple dilution with water; a corresponding corrective response is used in the Response Methods Handbook. In a few cases the response is indicated even when the compound reacts with water because, when proper care is taken, dilution is still the most effective way of removing the primary hazard.

2. LABELS

The labels illustrated in Section 2 are those specified by the United Nations Labelling System (see Code of Federal Regulations, Title 49, Part 172). Labels are shown for all chemicals that are listed by name in the Code of Federal Regulations and also for most flammable chemicals that fall under listed generic categories, such as "Solvents," "Distillates," or "Alcohols."

3. CHEMICAL DESIGNATIONS

3.1 Synonyms — Alternative systematic chemical names and commonly used trivial names are given. Commercial or trade names are shown in a few cases where they are in common use. An index of synonyms is included in this manual (Section 8); it includes only those names given in Section 3.1.

3.2 Coast Guard Compatibility Classification — An entry is made when the chemical has been assigned to one of the 43 cargo groups listed in Navigation and Vessel Inspection Circular No. 4-75, "Guide to Compatibility of Chemicals." Appropriate parts of the Guide are included in this manual. Some chemicals not now included in the Guide were assigned to a group by the Cargo and Hazardous Materials Division, Coast Guard Headquarters. If the chemical is not a liquid carried in bulk in ships' tanks, this data item is "Not applicable."

3.3 Chemical Formula — This has been limited to a commonly used one-line formula. In the case of some organic compounds it has not been possible to represent chemical structure within such a limitation.

3.4 IMCO/United Nations Numerical Designation — The designation is that of the "International Maritime Dangerous Goods Code" published by the Inter-Governmental Maritime Consultative Organization (IMCO), London, 1972.

4. OBSERVABLE CHARACTERISTICS

4.1 Physical State (as shipped) — All chemicals that are listed in Code of Federal Regulations, Title 46, Tables 151.01-10(b) and 151.01-10(d) are shipped as liquids. Other designations include liquefied gas, liquefied compressed gas, and solid. Where a compound may be shipped either as a liquid or solid, both designations are given.

4.2 Color — All color descriptions found in the common reference sources are included. The color description is that for pure material. Occasionally the color of a chemical changes when it dissolves in water or becomes a gas.

4.3 Odor — All odor descriptions found in the common reference sources are included. The expression "characteristic" is used only when no other reasonable description was found. The odor description is that for pure material.

5. HEALTH HAZARDS

5.1 Personal Protective Equipment — The items listed are those recommended by (a) manufacturers, either in technical bulletins or in Material Safety Data Sheets, (b) the Manufacturing Chemists Association, or (c) the National Safety Council, for use by personnel while responding to fire or accidental discharge of the chemical. They are intended to protect the lungs, eyes, and skin. Safety showers and eyewash fountains are considered to be important protective equipment for the handling of almost all chemicals; they are not usually listed.

5.2 Symptoms Following Exposure — These are brief descriptions of the effects observed in humans when the vapor (gas) is inhaled, when the liquid or solid is ingested (swallowed), and when the liquid or solid comes in contact with the eyes or skin.

5.3 Treatment for Exposure — "First-aid" procedures are recommended. They deal with exposure to the vapor (gas), liquid, or solid and include inhalation, ingestion (swallowing) and contact with eyes or skin. The instruction "Do NOT induce vomiting" is given if an unusual hazard is associated with the chemical being sucked into the lungs (aspiration) while the patient is vomiting. "Seek medical attention" or "Call a doctor" is recommended in those cases where only competent medical personnel can treat the injury properly. In all cases of human exposure, seek medical assistance as soon as possible.

5.4 Toxicity by Inhalation (Threshold Limit Value) — The threshold limit value (TLV) is usually expressed in units of parts per million (ppm) — i.e., the parts of vapor (gas) per million parts of contaminated air by volume at 25°C (77°F) and atmospheric pressure. For a chemical that forms a fine mist or dust, the concentration is given in milligrams per cubic meter (mg/m^3). The TLV is defined as the concentration of the substance in air that can be breathed for five consecutive eight-hour workdays (40-hour work week) by most people without adverse effect.* As some people become ill after exposure to concentrations lower than the TLV, this value cannot be used to define exactly what is a "safe" or "dangerous" concentration.

No entry appears when the chemical is a mixture; it is possible to calculate the TLV for a mixture only when the TLV for each component of the mixture is known and the composition of the mixture by weight is also known.

*American Conference of Governmental Industrial Hygienists, "Threshold Limit Values for Substance in Workroom Air, Adopted by ACGIH for 1972"

5.5 Short-Term Inhalation Limits – The parts of vapor (gas per million parts of contaminated air by volume at 25°C (77°F) and atmospheric pressure is given. The limits are given in milligrams per cubic meter for chemicals that can form a fine mist or dust. The values given are the maximum permissible average exposures for the time periods specified. Most of the data came from the Commonwealth of Pennsylvania, Department of Environmental Resources, Title 25, Article IV, Chapter 201 (1971). Some of the data (called "Emergency Exposure Limits") were provided by the Committee on Toxicology, National Academy of Science – National Academy of Engineering, National Research Council.

In some instances the values disagree, or the short-term limits overlap the TLV given in 5.4. These are not errors; the values were supplied by several laboratories, each of which used its own experimental techniques and methods of calculation.

5.6 Toxicity by Ingestion – The Grade and corresponding LD₅₀ value are those defined by the National Academy of Sciences, Committee on Hazardous Materials, "Evaluation of the Hazard of Bulk Water Transportation of Industrial Chemicals, A Tentative Guide," Washington, D.C., 1972. Data were also collected from other sources and converted to the appropriate Grade before entry in this manual. The term LD₅₀ signifies that about 50% of the animals given the specified dose by mouth will die. Thus, for a Grade 4 chemical (below 50 mg/kg) the toxic dose for 50% of animals weighing 70 kg (150 lb) is $70 \times 50 = 3500 \text{ mg} = 3.5 \text{ g}$, or less than 1 teaspoonful; it might be as little as a few drops. For a Grade 1 chemical (5 to 15g/kg), the LD₅₀ would be between a pint and a quart for a 150-lb man. All LD₅₀ values have been obtained using small laboratory animals such as rodents, cats, and dogs. The substantial risks taken in using these values for estimating human toxicity are the same as those taken when new drugs are administered to humans for the first time.

5.7 Late Toxicity – Where there is evidence that the chemical can cause cancer, mutagenic effects, teratogenic effects, or a delayed injury to vital organs such as the liver or kidney, a qualitative description of the effect is given.

5.8 Vapor (Gas) Irritant Characteristics – The most appropriate of five statements listed below is given. (Source: National Academy of Sciences, Committee on Hazardous Materials, "Evaluation of the Hazard of Bulk Water Transportation of Industrial Chemicals, A Tentative Guide," Washington, D.C., 1970.)

(1) Vapors are nonirritating to eyes and throat.

- (2) Vapors cause a slight smarting of the eyes or respiratory system if present in high concentrations. The effect is temporary.
- (3) Vapors cause moderate irritation such that personnel will find high concentrations unpleasant. The effect is temporary.
- (4) Vapors are moderately irritating such that personnel will not usually tolerate moderate or high concentrations.
- (5) Vapors cause severe irritation of eyes and throat and can cause eye and lung injury. They cannot be tolerated even at low concentrations.

5.9 Liquid or Solid Irritant Characteristics – The most appropriate of the following five statements is given (same source as 5.8 above):

- (1) No appreciable hazard. Practically harmless to the skin.
- (2) Minimum hazard. If spilled on clothing and allowed to remain, may cause smarting and reddening of skin.
- (3) Causes smarting of the skin and first-degree burns on short exposure; may cause second-degree burns on long exposure.
- (4) Fairly severe skin irritant. May cause pain and second-degree burns after a few minutes' contact.
- (5) Severe skin irritant. Causes second- and third-degree burns on short contact and is very injurious to the eyes.

5.10 Odor Threshold – This is the lowest concentration in air that most humans can detect by smell. The value cannot be relied on to prevent over-exposure, because human sensitivity to odors varies over wide limits, some chemicals cannot be smelled at toxic concentrations, odors can be masked by other odors, and some compounds rapidly deaden the sense of smell.

6. FIRE HAZARDS

6.1 Flash Point – This is defined as the lowest temperature at which vapors above a volatile combustible substance will ignite in air when exposed to a flame. Depending on the test method used, the values given are either Tag closed cup (C.C.) (ASTM D56) or Cleveland open cup (O.C.) (ASTM D93). The values, along with those in 6.2 and 6.7 below, give an indication of the relative flammability of the chemical. In general, the open cup value is about 10° to 15°F higher than the closed cup value.

6.2 Flammable Limits in Air -- The percent concentration in air (by volume) is given for the lower (LFL) and upper (UFL) limit. The values, along with those in 6.1 and 6.7, give an indication of the relative flammability of the chemical. The limits are sometimes referred to as "lower explosive limit" (LEL) and "upper explosive limit" (UEL).

6.3 Fire Extinguishing Agents -- The agents are listed in decreasing order of importance. The general capabilities of all agents are described by G.H. Tryon, "Fire Protection Handbook," 13th ed., National Fire Protection Association, Boston, Mass., 1969.

6.4 Fire Extinguishing Agents Not to be Used -- The agents listed must not be used because they react with the chemical and create an additional hazard. In some cases they are listed because they are ineffective in putting out the fire.

6.5 Special Hazards of Combustion Products -- Some chemicals decompose or burn to give off toxic and irritating gases. Such gases may also be given off by chemicals that vaporize in the heat of a fire without either decomposing or burning. If no entry appears, the combustion products are thought to be similar to those formed by the burning of oil, gasoline, or alcohol; they include carbon monoxide (poisonous), carbon dioxide, and water vapor. The specific combustion products are usually not well known over the wide variety of conditions existing in fires; some may be hazardous.

6.6 Behavior in Fire -- Any characteristic behavior that might increase significantly the hazard involved in a fire is described. The formation of dense smoke or flammable vapor clouds, and the possibility of polymerization and explosions is stated. Unusual difficulty in extinguishing the fire is also noted.

6.7 Ignition Temperature -- This is the minimum temperature at which the material will ignite without a spark or flame being present. Along with the values in 6.1 and 6.2 above, it gives an indication of the relative flammability of the chemical. It is sometimes called the "autoignition temperature." The method of measurement is given in ASTM D-2155.

6.8 Electrical Hazard -- The ease with which the chemical is ignited by electrical equipment is indicated by the *Group* and *Class* assignment made in "Fire Codes," Vol. 5, National Fire Protection Association, Boston, Mass., 1972, pp. 70-289. This information is available for relatively few chemicals, so an absence of data does not necessarily mean that the substance is not hazardous in the presence of electrical equipment.

6.9 Burning Rate – The value is the rate (in millimeters per minute) at which the depth of a pool of liquid decreases as the liquid burns. Details of measurement are given by D.S. Burgess, A. Strasser, and J. Grumer, "Diffusive Burning of Liquid Fuels in Open Trays," Fire Research Abstracts and Reviews, 3, 177 (1961).

7. CHEMICAL REACTIVITY

7.1 Reactivity with Water – The term "No reaction" means that no hazard results when the chemical reacts or mixes with water. Where a hazard does result, it is described.

7.2 Reactivity with Common Materials – This is limited to hazardous reactions with fuels and with common materials of construction such as metal, wood, plastics, cement, and glass. The nature of the hazard, such as severe corrosion or formation of a flammable gas, is described.

7.3 Stability During Transport – The term "Stable" means that the chemical will not decompose in a hazardous manner under the conditions of temperature, pressure, and mechanical shock that are normally encountered during shipment; the term does *not* apply to fire situations. Where there is a possibility of hazardous decomposition, an indication of the conditions and the nature of the hazard is given.

7.4 Neutralizing Agents for Acids and Caustics – In all cases involving accidental discharge, dilution with water may be followed by use of the agent specified, particularly if the material cannot be flushed away; the agent specified need not necessarily be used. More detailed information for this kind of response is given in the Response Methods Handbook, CG-446-4.

7.5 Polymerization – A few chemicals can undergo rapid polymerization to form sticky, resinous materials, with the liberation of much heat. The containers may explode. For these chemicals the conditions under which the reaction can occur are given. See Section 13.16 for quantitative data.

7.6 Inhibitor of Polymerization – The chemical names and concentrations of inhibitors added by the manufacturer to prevent polymerization are given.

8. WATER POLLUTION

8.1 Aquatic Toxicity – The form of data presentation used by the Environmental Protection Agency's "Oil and Hazardous Material-Technical Assistance Data System (OHM-TADS)" is used here. Reading from left to right and separated by slashes (/) are the following data:

- Concentration in parts per million by weight (or milligrams per liter) at which the chemical was tested;
- Time of exposure in hours;
- Name of the aquatic species studied;
- Effect observed; LC_{50} means that approximately 50% of the fish will die under the conditions of concentration and time given. TL_m (Median Tolerance Limit) means that approximately 50% of the fish will show abnormal behavior (including death) under the conditions of concentration and time given; the term EC_{50} (Effective Concentration₅₀) is used sometimes instead of TL_m ;
- The kind of water used in the test (fresh or salt).

Some chemicals have been tested with many species of fish. Where the data were available, the data sheet cites one illustrative test in fresh water and one in salt water.

8.2 Waterfowl Toxicity —Very little information is available. In a few cases there is entered the LD_{50} value, which indicates the dose (in milligrams per kilogram of body weight) that is lethal to about half the waterfowl tested.

8.3 Biological Oxygen Demand (BOD) — Also called "biochemical oxygen demand," this is a standard way of describing how much oxygen dissolved in water is consumed by biological oxidation of the chemical during the stated period of time. The unit *lb/lb* indicates the pounds of oxygen consumed by each pound of chemical during the time stated. When given in *percent*, the values indicate the pounds of oxygen consumed by each 100 pounds of chemical during the time stated. If the percentage is followed by "(theor.)", it indicates the pounds of oxygen theoretically required to completely oxidize 100 pounds of the chemical.

8.4 Food Chain Concentration Potential — If the chemical is consumed by fish, marine plants, waterfowl, etc., that are in turn eaten by other species, the substance may accumulate and ultimately be consumed by humans. Where this occurs, an indication of the potential hazard and its significance is given.

9. SELECTED MANUFACTURERS

Three manufacturers are named wherever possible. When production data for the chemical were available, the manufacturers were selected from among the major producers. The "1972 Directory of Chemical Producers, United States of

America" (Chemical Information Services, Stanford Research Institute, Menlo Park, California) and "Buyers Guide Issue," *Chemical Week*, 111, No. 7, Part Two (October 25, 1972) were the sources used.

10. SHIPPING INFORMATION

10.1 Grades or Purity — The grades USP (United States Pharmacopoeia) and CP (chemically pure) are quite pure. Where "Technical" or "Commercial" grades are given, the percent by weight of the pure chemical present is usually indicated. In a few cases the identity of the major impurities is given. If the properties of the less pure grades differ significantly from those of the pure substance, the differences in properties are described in general terms.

10.2 Storage Temperature — The range of temperatures at which the chemical is normally shipped in bulk by water transport is given. "Ambient" means the temperature of the surroundings.

10.3 Inert Atmosphere — The terms used are "inerted," "padded," "ventilated (forced)," "ventilated (natural)," and "no requirement." They are given when found in the Code of Federal Regulations, Title 46, beginning in Part 151.05.

10.4 Venting — The terms used are "open," "pressure-vacuum," and "safety relief" (same source as 10.3 above).

11. HAZARD ASSESSMENT CODE

The code designates the assessment calculation route to be used in the Hazard Assessment Handbook when evaluating the hazard.

12. HAZARD CLASSIFICATIONS

12.1 Code of Federal Regulations — This is the hazard class specified in the Code of Federal Regulations, Title 49, Part 172, December 31, 1976. Chemicals not specifically listed therein have been classified as "Flammable" if their flash point (closed cup) is below 100°F.

12.2 NAS Hazard Rating for Bulk Water Transportation — The indicated ratings are given in "Evaluation of the Hazard of Bulk Water Transportation of Industrial Chemicals, A Tentative Guide," National Academy of Sciences, Committee on Hazardous Materials, Washington, D.C., 1972. An outline of the rating system is given in Table 1.

TABLE 1
EXPLANATION OF NAS HAZARD RATINGS

<u>Rating</u>	<u>Fire</u>	<u>Health</u>		
		<u>Vapor Irritant</u>	<u>Liquid or Solid Irritant</u>	<u>Poisons</u>
0	No hazard	No effect	No effect	No effect
1	Flash point (C.C.) above 140°F	Slight effect	Causes skin smarting	Slightly toxic
2	Flash point (C.C.) 100 to 140°F	Moderate irritation; temporary effect	First-degree burns, short exposure	Intermediate toxicity
3	Flash point (C.C.) below 100°F ; boiling point above 100°F	Irritating; cannot be tolerated	Second-degree burns, few minutes' exposure	Moderately toxic
4	Flash point (C.C.) below 100°F ; boiling point below 100°F	Severe effect; may do permanent injury	Second-degree and third-degree burns	Severely toxic

<u>Rating</u>	<u>Water Pollution</u>		
	<u>Human Toxicity</u>	<u>Aquatic Toxicity</u>	<u>Aesthetic Effect</u>
0	Nontoxic ; $LD_{50} > 15$ g/kg	Acute threshold limits above 10,000 ppm	No significant pollution; gases and odorless liquids
1	Practically non-toxic; LD_{50} 5 to 15 g/kg	Threshold limits 1,000 to 10,000 ppm	Mild-odored light oils and soluble chemicals
2	Slightly toxic; LD_{50} 0.5 to 5 g/kg	Threshold limits 100 to 1,000 ppm	Mild-odored, colorless, water-insoluble oils; boiling point 150-450°F
3	Moderately toxic; LD_{50} 50 to 500 mg/kg	Threshold limits 1 to 100 ppm	Light-colored high-boiling oils; odorous water-soluble compounds
4	Toxic; $LD_{50} < 50$ mg/kg	Threshold limits below 1 ppm	Heavy oils, colored or bad odors

TABLE 1 (Continued)

Rating	Reactivity		
	Other Chemicals	Water	Self-reaction
0	Inactive; may be attacked by materials rated 4	No reaction	No reaction
1	React only with materials rated 4	Mild reaction; unlikely to be hazardous	Mild self-reaction under some conditions
2	React with materials rated 3 or 4	Moderate reaction	Will undergo self-reaction if contaminated; do not require stabilizer
3	React with each other and with materials rated 2 or 4	More vigorous reaction; may be hazardous	Vigorous self-reaction; require stabilizer
4	React with each other and materials rated 0-3	Vigorous reaction; likely to be hazardous	Self-oxidizing chemical; capable of explosion or detonation

12.3 NFPA Hazard Classifications — The indicated ratings are given in "Fire Protection Guide on Hazardous Materials," Code 704M, 4th ed., National Fire Protection Association, Boston, Mass., 1972. Changes in the rating that are described in "1973 NFPA Technical Committee Reports, Volume A" are included. The classifications are defined in Table 2 below. The symbol used in conjunction with these ratings is illustrated in Section 4.2.

TABLE 2
EXPLANATION OF NFPA HAZARD CLASSIFICATIONS

<u>Classification</u>		<u>Definition</u>
<u>Health Hazard (blue)</u>		
4		Materials which on very short exposure could cause death or major residual injury even though prompt medical treatment were given.
3		Materials which on short exposure could cause serious temporary or residual injury even though prompt medical treatment were given.
2		Materials which on intense or continued exposure could cause temporary incapacitation or possible residual injury unless prompt medical treatment is given.
1		Materials which on exposure would cause irritation but only minor residual injury even if no treatment is given.
0		Materials which on exposure under fire conditions would offer no hazard beyond that of ordinary combustible material.
<u>Flammability (red)</u>		
4		Materials which will rapidly or completely vaporize at atmospheric pressure and normal ambient temperature, or which are readily dispersed in air and which will burn readily.
3		Liquids and solids that can be ignited under almost all ambient temperature conditions.
2		Materials that must be moderately heated or exposed to relatively high ambient temperatures before ignition can occur.

TABLE 2 (Continued)

<u>Classification</u>	<u>Definition</u>
<u>Flammability (red) cont'd</u>	
1	Materials that must be preheated before ignition can occur.
0	Materials that will not burn.
<u>Reactivity (yellow)</u>	
4	Materials which in themselves are readily capable of detonation or of explosive decomposition or reaction at normal temperatures and pressures.
3	Materials which in themselves are capable of detonation or explosive reaction but require a strong initiating source or which must be heated under confinement before initiation or which react explosively with water.
2	Materials which in themselves are normally unstable and readily undergo violent chemical change but do not detonate. Also materials which may react violently with water or which may form potentially explosive mixtures with water.
1	Materials which in themselves are normally stable, but which can become unstable at elevated temperatures and pressures or which may react with water with some release of energy but not violently.
0	Materials which in themselves are normally stable, even under fire exposure conditions, and which are not reactive with water.
<u>Other (white)</u>	
-W-	Materials which react so violently with water that a possible hazard results when they come in contact with water, as in a fire situation. Similar to Reactivity Classification 2.
Oxy	Oxidizing material; any solid or liquid that readily yields oxygen or other oxidizing gas, or that readily reacts to oxidize combustible materials.

13. PHYSICAL AND CHEMICAL PROPERTIES

13.1 Physical State at 15°C and 1 atm — The statement indicates whether the chemical is a solid, liquid, or gas after it has reached equilibrium with its surroundings at "ordinary" conditions of temperature and pressure.

13.2 Molecular Weight — The value given is the weight of a molecule of the chemical relative to a value of 12 for one atom of carbon.

The molecular weight is useful in converting from molecular units to weight units, and in calculating the pressure, volume and temperature relationships for gaseous materials. The ratio of the densities of any two gases is approximately equal to the ratio of their molecular weights (see 13.10).

The molecular weights of mixtures can be calculated if both the identity and quantity of each component of the mixture are known. Because the composition of mixtures described in this manual is not known exactly, or because it varies from one shipment to another, no molecular weights are given for such mixtures.

13.3 Boiling Point at 1 atm — The value is the temperature of a liquid when its vapor pressure is 1 atm. For example, when water is heated to 100°C (212°F) its vapor pressure rises to 1 atm and the liquid boils.

The boiling point at 1 atm indicates whether a liquid will boil and become a gas at any particular temperature and sea-level atmospheric pressure.

13.4 Freezing Point — The freezing point is the temperature at which a liquid changes to a solid. For example, liquid water changes to solid ice at 0°C (32°F). Some liquids solidify very slowly even when cooled below their freezing point. When liquids are not pure (for example, salt water) their freezing points are lowered slightly.

13.5 Critical Temperature — The maximum temperature at which a liquid can exist, no matter what the pressure on it, is called the critical temperature. For example, the critical temperature of water is 372°C (705°F). The value can be used to estimate many properties whose values are not immediately available.

13.6 Critical Pressure — The vapor pressure of a chemical at the critical temperature (see 13.5) is called the critical pressure. For example, the critical pressure of water is 218 atm. Values are given in pounds per square inch absolute, atmospheres, and meganewtons per square meter. The value can be used for estimating many property values that are not immediately available.

13.7 Specific Gravity – The specific gravity of a chemical is the ratio of the weight of the solid or liquid to the weight of an equal volume of water at 4°C (or at some other specified temperature).

If the specific gravity is less than 1.0 (or less than 1.03 in seawater) the chemical will float; if higher, it will sink. Where the change in the value with temperature is important, more data are found in 13.17.

13.8 Liquid Surface Tension – This property is a measure of the tensile force at the surface of a liquid that tends to shape liquid fragments into spherical drops. Values are expressed in dynes per centimeter and newtons per meter. Liquids with high surface tensions show less tendency to spread. Water has a surface tension of about 73 dynes/cm; seawater has a slightly higher value.

13.9 Liquid-Water Interfacial Tension – The value is a measure of the tensile forces existing at the interface between a liquid and water. Approximately, it is the difference between the individual surface tension of the liquid and that of water. Low values of the interfacial tension indicate that the chemical spreads readily on a water surface. The units are the same as in 13.8.

13.10 Vapor (Gas) Specific Gravity – The value is the ratio of the weight of vapor to the weight of an equal volume of dry air at the same conditions of temperature and pressure. Buoyant vapors have a vapor specific gravity less than one. The value may be approximated by the ratio $M/29$, where M is the molecular weight of the chemical (see 13.2).

In some cases the vapor may be at a temperature different from that of the surrounding air. For example, the vapor from a container of boiling methane at -172°F sinks in warm air, even though the vapor specific gravity of methane at 60°F is about 0.6.

For the effect of temperature on vapor density, see 13.23.

13.11 Ratio of Specific Heats of Vapor (Gas) – This property is the ratio of the specific heat at constant pressure (C_p) to the specific heat at constant volume (C_v); its value is always greater than one. In most cases it was calculated by use of the expression

$$\frac{C_p}{C_v} = \frac{C_p}{(C_p - R)}$$

where R is the Universal Gas Constant.

The ratio varies slightly with temperature; the value given is at 20°C (68°F). The ratio is often of value in estimating temperature changes when gases are compressed or expanded. Higher values of the ratio lead to larger temperature changes for a given pressure change.

13.12 Latent Heat of Vaporization — The value is the heat that must be added to the specified weight of a liquid before it can change to vapor (gas). It varies with temperature; the value given is that at the boiling point at 1 atm (see 13.3). The units used are Btu per pound, calories per gram, and joules per kilogram.

No value is given for chemicals with very high boiling points at 1 atm, because such substances are considered essentially nonvolatile.

13.13 Heat of Combustion — The value is the amount of heat liberated when the specified weight is burned in oxygen at 25°C. The products of combustion, including water, are assumed to remain as gases; the value given is usually referred to as the "lower heat value." The negative sign before the value indicates that heat is given off when the chemical burns. Units are the same as in 13.12.

13.14 Heat of Decomposition — The value is the amount of heat liberated when the specified weight decomposes to more stable substances. The value is given for very few chemicals, because most are stable and do not decompose under the conditions of temperature and pressure encountered during shipment. The negative sign before the value simply indicates that heat is given off during the decomposition. The value does *not* include heat given off when the chemical burns. Units are the same as in 13.13.

13.15 Heat of Solution — The value represents the heat liberated when the specified weight of chemical is dissolved in a relatively large amount of water at 25°C ("infinite dilution"). A negative sign before the value indicates that heat is given off, causing a rise in temperature. (A few chemicals absorb heat when they dissolve, causing the temperature to fall.) Units are the same as in 13.12.

In those few cases where the chemical reacts with water and the reaction products dissolve, the heat given off during the reaction is included in the heat of solution.

13.16 Heat of Polymerization — The value is the heat liberated when the specified weight of the compound (usually called the monomer) polymerizes to form the polymer. In some cases the heat liberated is so great that the temperature rises significantly, and the material may burst its container or

catch fire. The negative sign before the value indicates that heat is given off during the polymerization reaction. Units are the same as in 13.12.

Items 13.17 through 13.24 consist of graphs. The temperature range over which each graph is reliable is indicated by the length of the curve.

13.17 Saturated Liquid Density — The value is the weight (in pounds) of one cubic foot of liquid that is in equilibrium with its vapor. Liquid densities decrease slightly with an increase in temperature; where literature data or reliable estimation methods were applicable, a graph shows this effect.

13.18 Liquid Heat Capacity — The value is the heat (in Btu) required to raise the temperature of one pound of the liquid one degree Fahrenheit at constant pressure. For example, it requires almost 1 Btu to raise the temperature of 1 pound of water from 68°F to 69°F. The value is useful in calculating the increase in temperature of a liquid when it is heated, as in a fire. The value increases slightly with an increase in temperature; the graph shows this effect.

13.19 Liquid Thermal Conductivity — The value is a measure of the ability of a liquid to conduct heat. It represents the number of Btu per hour that pass through an area of liquid one square foot in cross-section when the temperature gradient is 1°F per inch of depth. Higher values indicate that the liquid conducts heat more readily.

Liquid thermal conductivities decrease slightly with an increase in temperature. Where applicable, the graph shows this effect.

A basic law of heat conduction states that the energy flow per unit area per unit time is proportional to the gradient in temperature. The constant of proportionality is the liquid thermal conductivity.

13.20 Liquid Viscosity — The value (in centipoise) is a measure of the ability of a liquid to flow through a pipe or a hole; higher values indicate that the liquid flows less readily under a fixed pressure head. For example, heavy oils have higher viscosities (i.e., are more viscous) than gasoline.

Liquid viscosities decrease rapidly with an increase in temperature. In some cases a graph is given to show the effect. In other cases only a single data point was found in the literature.

A basic law of fluid mechanics states that the force per unit area needed to shear a fluid is proportional to the velocity gradient. The constant of proportionality is the viscosity.

13.21 Solubility in Water — The value represents the pounds of a chemical that will dissolve in 100 pounds of pure water. Solubility usually increases when the temperature increases; where the change has been measured, a graph is given to show the effect. The following terms are used when numerical data are either unavailable or not applicable:

The term "Miscible" means that the chemical mixes with water in all proportions. The term "Reacts" means that the substance reacts chemically with water; thus, its solubility has no real meaning. "Insoluble" usually means that one pound of the chemical does not dissolve entirely in 100 pounds of water. (Weak solutions of "Insoluble" materials may still be hazardous to humans, fish, and waterfowl, however.)

13.22 Saturated Vapor Pressure — The value is the pressure (in pounds per square inch absolute) of the vapor in equilibrium with the liquid form at the specified temperature. Vapor pressure values can be used to estimate the relative volatility of chemicals at a given temperature, and to calculate the pressure over a liquid that is shipped in a closed container.

The vapor pressure increases as temperature increases; a graph is given to show this effect. Note that the vapor pressure scale is logarithmic.

13.23 Saturated Vapor Density — The value is the weight (in pounds) of one cubic foot of vapor that is in equilibrium with the liquid form.

If it is assumed that the vapor behaves as an ideal gas, the relation pM/RT holds, where p is the vapor pressure, M is the molecular weight, R is the gas constant, and T is the temperature (in absolute units).

Since the vapor pressure varies with temperature (see 13.22), the saturated vapor density also varies with temperature, as shown on the graph. Note that the density scale is logarithmic.

13.24 Ideal Gas Heat Capacity — The value is the number of Btu needed to raise the temperature of one pound of gas by 1° Fahrenheit. The property can be used only when the pressure of the gas is less than about 10 atm. The ideal gas heat capacity is not a function of pressure (below about 10 atm), but it does increase with temperature, and a graph is given to show the effect.

4. OTHER INFORMATION SYSTEMS

4.1 CHEMICAL TRANSPORTATION EMERGENCY CENTER (CHEMTREC)

The Manufacturing Chemists Association operates CHEMTREC 24 hours a day. By calling the appropriate toll-free number listed below, one can consult experts on chemicals and spill response.

Continental United States (except Alaska & District of Columbia)	800-424-9300
Alaska, Hawaii, and District of Columbia	202-483-7616

4.2 NATIONAL FIRE PROTECTION ASSOCIATION (NFPA)

The NFPA's "Recommended System for the Identification of the Fire Hazards of Materials" (NFPA No. 704M) provides basic warning information to fire fighters in industrial plants and storage facilities. This system uses a diamond-shaped warning symbol (Figure 4.1). The top, left, and right boxes refer to flammability, health, and reactivity hazards respectively and contain a number from 0 to 4. The exact meaning of each number is explained in Section 3 (§ 12.3) of this manual, and the applicable numbers for each chemical are listed in Section 11 under "NFPA Hazard Classifications." The bottom box is used for special hazards; the most common of these is a warning against the use of water, indicated by the symbol W .

FIGURE 4.1 NFPA 704M SYMBOL

4.3 INTERNATIONAL MARITIME CONSULTATIVE ORGANIZATION (IMCO)

Foreign vessels using U.S. waterways generally utilize, in addition to U.S. requirements, an international labeling system developed by IMCO. This system consists of 15 diamond-shaped labels (Figure 4.2). Each identifies a particular hazard by a descriptive picture, a word, and a distinctive color.

The number at the bottom of each diamond identifies the class to which IMCO has assigned the chemical and is the same as the first digit in the IMCO/UN numerical designation, one of the items given under "Chemical Designations" in Section 11 of this manual.

4.4 DEPARTMENT OF TRANSPORTATION (DOT)

At the time this manual was in preparation, a Hazard Information (HI) System had been proposed by the Department of Transportation – Hazardous Materials Regulation Board. It uses IMCO-type warning labels with a number between 1 and 89 added at the bottom of the diamond. This number refers to the section number in a guide containing general hazard and response information for 89 categories of chemicals. The information is similar to that provided in this manual, except that it does not consider water pollution. At the time of publication of this manual, the HI System had not yet been adopted.

4.5 NATIONAL ACADEMY OF SCIENCES (NAS)

A booklet entitled "Evaluation of the Hazard of Bulk Water Transportation of Industrial Chemicals – A Tentative Guide" was prepared for the USCG by the Committee on Hazardous Materials of the National Academy of Sciences, National Research Council. It rates the fire, health, water pollution, and radioactivity hazards of over 200 chemicals on a scale of 0 to 4; the meaning of each number is explained in Section 3 of this manual, and the applicable numbers for each chemical are listed in Section 11 under "NAS Hazard Rating for Bulk Water Transportation." No response guidance is provided.

4.6 OHM-TADS (EPA)

The Oil and Hazardous Materials Technical Assistance Data System (OHM-TADS) has been developed by the Environmental Protection Agency (EPA) to provide information on physical and chemical properties, hazards, pollution characteristics, and shipping information for over 800 hazardous materials. OHM-TADS consists of a computerized data base which can be accessed from terminals at the 10 EPA Regional Offices and from EPA Headquarters in Washington, D.C. The System can provide either information on specifically requested properties for a material, or it can print all the information in its files for that material.

FIGURE 4-2
IMCO SHIPPING LABELS

Some of the same information appears in both this manual and OHM-TADS, but each contains some information not found in the other.

4.7 POISON CONTROL CENTERS

Throughout the country, local Poison Control Centers are maintained at hospitals. These Centers can provide information on the chemical composition, appearance, and toxicity of common poisonous materials as well as information on the symptoms of exposure and on the emergency procedures recommended in the event of exposure. The information available at these centers deals mainly with common household materials.

Poison Control Centers are coordinated through the Department of Health, Education and Welfare in Washington, D.C., but information should be requested through the local centers.

The telephone number of the local Poison Control Center can be found in a local telephone directory or in the Regional Contingency Plan.

6. SELECTED PROPERTIES OF FRESH WATER, SEA WATER, ICE, AND AIR

The following properties are useful for engineering calculations described in the Hazard Assessment Handbook. The values for *fresh water* are those recorded for pure water. The values for the water of lakes and streams differ somewhat from those of pure water, but since no "standard" fresh water has ever been defined, the values for pure water must be used.

A "standard" *sea water* has been defined as one containing 35 grams of salts per kilogram of solution. The values for the water of tidal estuaries differ somewhat from those of "standard" sea water because the water has a salinity somewhere between those of fresh and sea waters.

The value for the density of *air* was derived from the ideal gas law; the air is assumed to be dry and at 1 atmosphere pressure.

7. GUIDE TO COMPATIBILITY OF CHEMICALS

The Guide is based in part upon information provided to the Coast Guard by the National Academy of Sciences – U.S. Coast Guard Advisory Committee on Hazardous Materials and represents the latest information available to the Coast Guard on chemical compatibility.

The accidental mixing of one chemical cargo with another can in some cases be expected to result in a vigorous and hazardous chemical reaction. The generation of toxic gases, the heating, overflow, and rupture of cargo tanks, and fire and explosion are possible consequences of such reactions.

The purpose of the Compatibility Chart is to show chemical combinations believed to be dangerously reactive in the case of accidental mixing. It should be recognized, however, that the Chart provides a broad grouping of chemicals with an extensive variety of possible binary combinations. Although one group, generally speaking, can be considered dangerously reactive with another group where an "X" appears on the Chart, there may exist between the groups some combinations which would not dangerously react. The Chart should therefore not be used as an infallible guide. It is offered as an aid in the safe loading of bulk chemical cargoes, with the recommendation that proper safeguards be taken to avoid accidental mixing of binary mixtures for which an "X" appears on the Chart. Proper safeguards would include consideration of such factors as avoidance of the use of common cargo and vent lines and carriage in adjacent tanks having a common bulkhead.

The following procedure explains how the Guide should be used in determining compatibility information:

- (1) Determine the reactivity group of a particular product by referring to the alphabetical list in Table 7.1.
- (2) Enter the Chart with the reactivity group. Proceed across the page. An "X" indicates a reactivity group that forms an unsafe combination with the product in question.

For example, crotonaldehyde is listed in Table 7.1 as belonging in Group 19 (Aldehydes). The Chart shows that chemicals in this group should be segregated from sulfuric and nitric acids, caustics, ammonia, and all types of amines (aliphatic, alkanol, and aromatic). According to note A, crotonaldehyde is also incompatible with non-oxidizing mineral acids.

It is recognized there are wide variations in the reaction rates of individual chemicals within the broad groupings shown reactive by the Compatibility Chart. Some individual materials in one group will react violently with some of the materials in another group and cause great hazard; others will react slowly, or not at all. Accordingly, a useful addition to the Guide would be the identification of specific binary combinations which are found *not* to be dangerously reactive, even though an "X" appears on the chart for those two chemicals. A few such combinations are listed in Table 7.3; other safe combinations will be listed in subsequent revisions.

COMPATIBILITY CHART

NOTE: COMPATIBILITY CHART:
REACTIVITY DIFFERENCE (DEVIATIONS) WITHIN CHEMICAL GROUPS

- A Acrolein (19), Crotonaldehyde (19), and 2-Ethyl-3-propyl acrolein (19) are not compatible with Group 1, Non-Oxidizing Mineral Acids.
- B Isophorone (18), and Mesityl Oxide (18) are not compatible with Group 8, Alkanolamines.
- C Acrylic Acid (4) is not compatible with Group 9, Aromatic Amines.
- D Allyl Alcohol (15) is not compatible with Group 12, Isocyanates.
- E Furfuryl Alcohol (20) is not compatible with Group 1, Non-oxidizing Mineral Acids.
- F Furfuryl Alcohol (20) is not compatible with Group 4, Organic Acids.
- G Dichloroethyl Ether (36) is not compatible with Group 2, Sulfuric Acid.
- H Trichloroethylene (36) is not compatible with Group 5, Caustics.
- I Ethylenediamine (7) is not compatible with Ethylene Dichloride (36).

Isooctyl alcohol (6)	Methyl methacrylate (inhibited) (14)	Phosphoric acid (1)	Xylene (10)
Isooctyl alcohol (6)	Styrene (inhibited) (14)	Polyol 3030 (6)*	Acrylonitrile (inhibited) (14)
Isooctyl alcohol (6)	Vinyl acetate (inhibited) (14)	Propyl acetate (iso-, n-) (13)	Caustic soda solution (3)
Isopropyl alcohol (6)	Furfural (7)	Propylene glycol (6)	Acrylonitrile (inhibited) (14)
Isopropyl alcohol (6)	Styrene (inhibited) (14)	Propylene glycol (6)	Styrene (inhibited) (14)
Isopropyl alcohol (6)	Vinyl acetate (inhibited) (14)	Styrene (inhibited) (14)	n-Butyl alcohol (6)
Lard (edible) (13)*	Caustic soda solution (3)	Styrene (inhibited) (14)	Acrylonitrile (inhibited) (14)
Linseed oil (raw) (13)*	Caustic soda solution (3)	Styrene (inhibited) (14)	Caustic soda solution (3)
Methyl alcohol (6)	Acrylonitrile (inhibited) (14)	Styrene (inhibited) (14)	Ethylene glycol (6)
Methyl alcohol (6)	Butyl acrylate (inhibited) (14)	Styrene (inhibited) (14)	2-Ethyl hexanol (6)
Methyl alcohol (6)	Styrene (inhibited) (14)	Styrene (inhibited) (14)	Isobutyl alcohol (6)
Methyl alcohol (6)	Vinyl acetate (inhibited) (14)	Styrene (inhibited) (14)	Isooctyl alcohol (6)
Methyl alcohol (6)	Caustic soda solution (3)	Styrene (inhibited) (14)	Isopropyl alcohol (6)
Methyl alcohol (6)	Vinyl acetate (inhibited) (14)	Styrene (inhibited) (14)	Methyl alcohol (6)
Methyl alcohol (6)	Caustic soda solution (3)	Styrene (inhibited) (14)	Propylene glycol (6)
Methyl alcohol (6)	Furfural (7)	Styrene (inhibited) (14)	Trichloroethylene (5)
Methyl alcohol (6)	Caustic soda solution (3)	Styrene (inhibited) (14)	Caustic soda solution (3)
Methyl isobutyl ketone (8)	Ethyl alcohol (6)	Styrene (inhibited) (14)	Phosphoric acid (1)
Methyl methacrylate (inhibited) (14)	Isooctyl alcohol (6)	Styrene (inhibited) (14)	Caustic soda solution (3)
Methyl methacrylate (inhibited) (14)	Acrylonitrile (inhibited) (14)	Styrene (inhibited) (14)	Styrene (inhibited) (14)
Niax polyol (6)*	Vinyl acetate (inhibited) (14)	Styrene (inhibited) (14)	n-Butyl alcohol (6)
Niax polyol (6)*	Caustic soda solution (3)	Styrene (inhibited) (14)	Ethylene glycol (6)
Oils, edible: coconut (13)*		Styrene (inhibited) (14)	

*Not presently included in CHRIS.

TABLE 7.3

COMBINATIONS NOT DANGEROUSLY REACTIVE (Continued)

Vinyl acetate (inhibited) (14)	Isobutyl alcohol (6)	Voranol CP 4100 (6) *	Vinyl acetate (inhibited) (14)
Vinyl acetate (inhibited) (14)	Isodecyl alcohol (6)	Xylene (10)	Phosphoric acid (1)
Vinyl acetate (inhibited) (14)	Isocetyl alcohol (6)	Toluene 2,4-diisocyanate (TDI), diphenylmethanediisocyanate (MDI), and polymethylene polyphenyl isocyanate (PAPI) * are considered compatible with reactivity groups 9, 10, 11, 12, 18, and 21.	
Vinyl acetate (inhibited) (14)	Isopropyl alcohol (6)		
Vinyl acetate (inhibited) (14)	Methyl alcohol (6)		
	Niax polyol (6) *		
	Voranol CP 4100 (6) *		
	Acrylonitrile (inhibited) (14)		
	Butyl acrylate (inhibited) (14)		
	Ethyl acrylate (inhibited) (14)		
Vinyl acetate (inhibited) (14)			
Vinyl acetate (inhibited) (14)			
Voranol CP 4100 (6) *			
Voranol CP 4100 (6) *			
Voranol CP 4100 (6) *			

*Not presently included in CHRIS.

8. INDEX OF SYNONYMS

SYNONYM		COMPOUND NAME
AATREX HERBICIDE	-	ATRAZINE
ABSORBENT OIL	-	OIL: ABSORPTION
ACETALDEHYDE	-	ACETALDEHYDE
ACETIC ACID	-	ACETIC ACID
ACETIC ACID, AMMONIUM SALT	-	AMMONIUM ACETATE
ACETIC ACID, BUTYL ESTER	-	N-BUTYL ACETATE
ACETIC ACID, CUPRIC SALT	-	COPPER ACETATE
ACETIC ACID, DIMETHYLAMIDE	-	DIMETHYLACETAMIDE
ACETIC ACID, ETHYL ESTER	-	ETHYL ACETATE
ACETIC ACID, ISOBUTYL ESTER	-	ISOBUTYL ACETATE
ACETIC ACID, ISOPROPYL ESTER	-	ISOPROPYL ACETATE
ACETIC ACID, METHYL ESTER	-	METHYL ACETATE
ACETIC ACID, NICKEL (II) SALT	-	NICKEL ACETATE
ACETIC ACID, PROPYL ESTER	-	N-PROPYL ACETATE
ACETIC ACID, SEC-BUTYL ESTER	-	SEC-BUTYL ACETATE
ACETIC ACID, ZINC SALT	-	ZINC ACETATE
ACETIC ALDEHYDE	-	ACETALDEHYDE
ACETIC ANHYDRIDE	-	ACETIC ANHYDRIDE
ACETIC ESTER	-	ETHYL ACETATE
ACETIC ETHER	-	ETHYL ACETATE
ACETOACETIC ACID, ETHYL ESTER	-	ETHYL ACETOACETATE
ACETOACETIC ESTER	-	ETHYL ACETOACETATE
ACETONE	-	ACETONE
ACETONE CYANOHYDRIN	-	ACETONE CYANOHYDRIN
ACETONITRILE	-	ACETONITRILE
ACETOPHENONE	-	ACETOPHENONE
ACETYLACETONE	-	ACETYLACETONE
ACETYLBENZENE	-	ACETOPHENONE
ACETYL BROMIDE	-	ACETYL BROMIDE
ACETYL CHLORIDE	-	ACETYL CHLORIDE
ACETYLENE	-	ACETYLENE
ACETYLENE DICHLORIDE	-	1,2-DICHLOROETHYLENE
ACETYLENE TETRACHLORIDE	-	TETRACHLOROETHANE
ACETYLENOGEN	-	CALCIUM CARBIDE
ACETYL HYDROPEROXIDE	-	PERACETIC ACID
ACETYL PEROXIDE SOLUTION	-	ACETYL PEROXIDE SOLUTION
ACID AMMONIUM CARBONATE	-	AMMONIUM BICARBONATE
ACID AMMONIUM FLUORIDE	-	AMMONIUM BIFLUORIDE
ACID CALCIUM PHOSPHATE	-	CALCIUM PHOSPHATE
ACRALDEHYDE	-	ACROLEIN
ACRIDINE	-	ACRIDINE
ACROLEIN	-	ACROLEIN
ACRYLALDEHYDE	-	ACROLEIN
ACRYLAMIDE	-	ACRYLAMIDE
ACRYLIC ACID	-	ACRYLIC ACID
ACRYLIC ACID, BUTYL ESTER	-	N-BUTYL ACRYLATE
ACRYLIC ACID, ETHYL ESTER	-	ETHYL ACRYLATE
ACRYLIC ACID, 2-ETHYLHEXYL ESTER	-	2-ETHYLHEXYL ACRYLATE, INHIBITED
ACRYLIC ACID, ISOBUTYL ESTER	-	ISO-BUTYL ACRYLATE
ACRYLIC ACID, METHYL ESTER	-	METHYL ACRYLATE
ACRYLIC ALDEHYDE	-	ACROLEIN
ACRYLIC AMIDE 50 PER CENT	-	ACRYLAMIDE
ACRYLONITRILE	-	ACRYLONITRILE
ACTIVATED CHARCOAL	-	CHARCOAL
ADACENE-12	-	1-DODECENE
ADIPIC ACID	-	ADIPIC ACID
ADIPIC ACID, BIS(2-ETHYLHEXYL) ESTER	-	DIOCTYL ADIPATE
ADIPINIC ACID	-	ADIPIC ACID
ADIPOL 2 EH	-	DIOCTYL ADIPATE
ADIPONITRILE	-	ADIPONITRILE
ADRONAL	-	CYCLOHEXANOL
AEROSOL SURFACTANT	-	DIOCTYL SODIUM SULFOSUCCINATE
AEROTHENE	-	TRICHLOROETHANE

SYNONYM	COMPOUND NAME
AFICIDE	BENZENE HEXACHLORIDE
AGROCIDE	BENZENE HEXACHLORIDE
ALBONE	HYDROGEN PEROXIDE
ALBUS	MERCURIC AMMONIUM CHLORIDE
ALCOHOL	ETHYL ALCOHOL
ALCOHOL C-10	N-DECYL ALCOHOL
ALCOHOL C-8	CCTANOL
ALDEHYDE C-10	DECALDEHYDE
ALDEHYDE-COLLIDINE	METHYLETHYLPYRIDINE
ALDEHYDINE	METHYLETHYLPYRIDINE
ALCIFEN	2,4-DINITROPHENOL
ALCRIN	ALDRIN
ALFA-TOX	DIAZINON
ALGYLEN	TRICHLOROETHYLENE
ALKAWAY LIQUID ALKALINE DERUSTER	BOILER COMPOUND, LIQUID
ALKYLBENZENESULFONIC ACIDS	ALKYLBENZENESULFONIC ACIDS
ALKYLBENZENESULFONIC ACID, SODIUM SALT	SODIUM ALKYLBENZENESULFONATES
ALLEN-METHYLACETYLENE MIXTURE	METHYLACETYLENE - PROPADIENE MIXTURE
ALLOMALEIC ACID	FUMARIC ACID
ALLYL ALCOHOL	ALLYL ALCOHOL
ALLYL BROMIDE	ALLYL BROMIDE
ALLYL CHLORIDE	ALLYL CHLORIDE
ALLYL CHLOROCARBONATE	ALLYL CHLOROFORMATE
ALLYL CHLOROFORMATE	ALLYL CHLOROFORMATE
ALLYLSILICONE TRICHLORIDE	ALLYLTRICHLOROSILANE
ALLYLTRICHLOROSILANE	ALLYLTRICHLOROSILANE
ALOWET D65	DIOCTYL SODIUM SULFOSUCCINATE
ALUMINUM CHLORIDE	ALUMINUM CHLORIDE
ALUMINUM ETHYL DICHLORIDE EADC	ETHYLALUMINUM DICHLORIDE
ALUMINUM ETHYL DICHLORIDE	ETHYLALUMINUM DICHLORIDE
ALUMINUM FLUORIDE	ALUMINUM FLUORIDE
ALUMINUM NITRATE	ALUMINUM NITRATE
ALUMINUM NITRATE NONAHYDRATE	ALUMINUM NITRATE
ALUMINUM SULFATE	ALUMINUM SULFATE
ALUMINUM TRIETHYL	TRIETHYLALUMINUM
ALUMINUM TRIISOBUTYL	TRIISOBUTYLALUMINUM
AMCHLOR	AMMONIUM CHLORIDE
AMERICAN PALM KERNEL OIL	OILS EDIBLE: TUCUM
AMINO BENZENE	ANILINE
1-AMINO BUTANE	N-BUTYLAMINE
AMINOCAPROIC LACTAM	CAPROLACTAM, LIQUID
1-AMINO-4-CHLOROBENZENE	P-CHLOROANILINE
2-AMINO-5-CHLOROTOLUENE	4-CHLORO-O-TOLUIDINE
AMINOCYCLOHEXANE	CYCLOHEXYLAMINE
AMINOETHANE	ETHYLAMINE
2-AMINOETHANOL	MONOETHANOLAMINE
BETA-AMINOETHYL ALCOHOL	MONOETHANOLAMINE
2-((2-AMINOETHYL)AMINO)ETHANOL	AMINOETHYLETHANOLAMINE
N-(2-AMINOETHYL)ETHANOLAMINE	AMINOETHYLETHANOLAMINE
AMINOETHYLETHANOLAMINE	AMINOETHYLETHANOLAMINE
AMINOFORM	HEXAMETHYLENETETRAMINE
2-AMINOISOBUTANE	TERT-BUTYLAMINE
AMINOMERCURIC CHLORIDE	MERCURIC AMMONIUM CHLORIDE
AMINOMETHANE	METHYLAMINE
2-AMINO-1-METHYLBENZENE	O-TOLUIDINE
1-AMINO-2-METHYLPROPANE	ISOBUTYLAMINE
2-AMINO-2-METHYLPROPANE	TERT-BUTYLAMINE
1-AMINONAPHTHALENE	1-NAPHTHYLAMINE
1-AMINONAPHTHALENE ALPHA-NAPHTHYLAMINE	1-NAPHTHYLAMINE
1-AMINO-2-NITROBENZENE	2-NITROANILINE
1-AMINO-4-NITROBENZENE	4-NITROANILINE
2-AMINOPROPANE	ISOPROPYLAMINE
1-AMINO-2-PROPANOL	MONOISOPROPANOLAMINE
2-AMINOTOLUENE	O-TOLUIDINE
ALPHA-AMINOTOLUENE	BENZYLAMINE

SYNONYM

AMFATE
 AMMOFORM
 AMMONERIC
 AMMONIA ANHYDROUS
 AMMONIA SOAP
 AMMONIATED MERCURY
 AMMONIA WATER

 AMMONIUM BIFLUORIDE
 AMMONIUM CARBONATE
 AMMONIUM CHLORIDE
 AMMONIUM CITRATE
 AMMONIUM CITRATE, DIBASIC
 AMMONIUM DECABORATE OCTAHYDRATE
 AMMONIUM DICHROMATE
 AMMONIUM DISULFATO-NICKELATE (II)
 AMMONIUM FERRIC CITRATE
 AMMONIUM FERRIC OXALATE TRIHYDRATE
 AMMONIUM FERROUS SULFATE
 AMMONIUM FLUORIDE
 AMMONIUM FLUOSILICATE
 AMMONIUM FORMATE
 AMMONIUM GLUCONATE
 AMMONIUM HYDROGEN CARBONATE
 AMMONIUM HYDROGEN FLUORIDE
 AMMONIUM HYDROGEN SULFIDE SOLUTION
 AMMONIUM HYDROXIDE
 AMMONIUM HYPO
 AMMONIUM HYPOSULFITE
 AMMONIUM IODIDE
 AMMONIUM IRON SULFATE
 AMMONIUM LACTATE
 AMMONIUM LACTATE SYRUP
 AMMONIUM LAURYL SULFATE
 AMMONIUM MOLYBDATE
 AMMONIUM MURIATE
 AMMONIUM NICKEL SULFATE
 AMMONIUM NITRATE
 AMMONIUM NITRATE-PHOSPHATE MIXTURE
 AMMONIUM NITRATE-SULFATE MIXTURE
 AMMONIUM NITRATE-UREA SOLUTION
 AMMONIUM OLEATE
 AMMONIUM OXALATE
 AMMONIUM OXALATE HYDRATE
 AMMONIUM PENTABORATE
 AMMONIUM PENTABORATE TETRAHYDRATE
 AMMONIUM PENTACHLOROZINCATE
 AMMONIUM PERCHLORATE
 AMMONIUM PEROXYDISULFATE
 AMMONIUM PERSULFATE
 AMMONIUM PHOSPHATE
 AMMONIUM PHOSPHATE, DIBASIC
 AMMONIUM RHODANATE
 AMMONIUM RHODANIDE
 AMMONIUM SILICOFLUORIDE
 AMMONIUM STEARATE
 AMMONIUM STEARATE DISPERSION
 AMMONIUM SULFAMATE

COMPOUND NAME

AMMONIUM SULFAMATE
 HEXAMETHYLENETETRAHIME
 AMMONIUM CHLORIDE
 AMMONIA ANHYDROUS
 AMMONIUM OLEATE
 MERCURIC AMMONIUM CHLORIDE
 AMMONIUM HYDROXIDE
 HEXAMETHYLENETETRAMINE
 AMMONIUM ACETATE
 AMMONIUM BIFLUORIDE
 AMMONIUM SULFAMATE
 AMMONIUM SULFAMATE
 AMMONIUM BENZOATE
 AMMONIUM BICARBONATE
 AMMONIUM DICHROMATE
 AMMONIUM BIFLUORIDE
 AMMONIUM CARBONATE
 AMMONIUM CHLORIDE
 AMMONIUM CITRATE
 AMMONIUM CITRATE
 AMMONIUM PENTABORATE
 AMMONIUM DICHROMATE
 NICKEL AMMONIUM SULFATE
 FERRIC AMMONIUM CITRATE
 FERRIC AMMONIUM OXALATE
 FERROUS AMMONIUM SULFATE

APD	■	TRIS(AZIRIDINYL)PHOSPHINE OXIDE
AQUEOUS AMMONIA	■	AMMONIUM HYDROXIDE
ARASAN	■	THIRAM

SYNONYM		COMPOUND NAME
ARCTON 9	-	TRICHLOROFLUOROMETHANE
ARGENTOUS FLUORIDE	-	SILVER FLUORIDE
ARGENTOUS OXIDE	-	SILVER OXIDE
AROCHLOR	-	POLYCHLORINATED BIPHENYL (PCB)
ARSECODILE	-	SODIUM CACODYLATE
ARSENIC ACID	-	ARSENIC ACID
ARSENIC CHLORIDE	-	ARSENIC TRICHLORIDE
ARSENIC DISULFIDE	-	ARSENIC DISULFIDE
ARSENIC PENTOXIDE	-	ARSENIC ACID
ARSENIC SESQUIOXIDE	-	ARSENIC TRIOXIDE
ARSENIC TRICHLORIDE	-	ARSENIC TRICHLORIDE
ARSENIC (III) TRICHLORIDE	-	ARSENIC TRICHLORIDE
ARSENIC TRIOXIDE	-	ARSENIC TRIOXIDE
ARSENIC TRISULFIDE	-	ARSENIC TRISULFIDE
ARSENIC YELLOW	-	ARSENIC TRISULFIDE
ARSENIOUS CHLORIDE	-	ARSENIC TRICHLORIDE
ARSENIOUS ACID	-	ARSENIC TRIOXIDE
ARSENGUS ACID ANHYDRIDE	-	ARSENIC TRIOXIDE
ARSENIOUS CHLORIDE	-	ARSENIC TRICHLORIDE
ARSENIOUS OXIDE	-	ARSENIC TRIOXIDE
ARSICODILE	-	SODIUM CACODYLATE
ARSYCODILE	-	SODIUM CACODYLATE
ARTIC	-	METHYL CHLORIDE
ARTIFICIAL CINNABAR	-	MERCURIC SULFIDE
ASPHALT	-	ASPHALT
ASPHALT BLEND STOCK:STRAIGHT RUN RESIDUE	-	ASPHALT BLEND STOCK:STRAIGHT RUN RESIDUE
ASPHALT BLENDING STOCK:ROOFERS FLUX	-	ASPHALT BLENDING STOCK:ROOFERS FLUX
ASPHALT CEMENTS	-	ASPHALT
ASPHALTIC BITUMEN	-	ASPHALT
ASPHALTUM OIL	-	ASPHALT BLENDING STOCK:ROOFERS FLUX
ATE	-	TRIETHYLALUMINUM
ATRAZINE	-	ATRAZINE
10-AZAANTHRACENE	-	ACRIDINE
AZACYCLOHEPTANE	-	HEXAMETHYLENEIMINE
1-AZANAPHTHALENE	-	QUINCLINE
AZINPHOSMETHYL	-	AZINPHOSMETHYL
AZIRANE	-	ETHYLENEIMINE
AZIRIDINE	-	ETHYLENEIMINE
TRIS (1-AZIRIDINYL) PHOSPHINE OXIDE	-	TRIS(AZIRIDINYL)PHOSPHINE OXIDE
AZOIC DIAZO COMPONENT 6	-	2-NITROANILINE
AZOIC DIAZO COMPONENT 37	-	4-NITROANILINE
BARIUM BINOXIDE	-	BARIUM PEROXIDE
BARIUM CARBONATE	-	BARIUM CARBONATE
BARIUM CHLORATE	-	BARIUM CHLORATE
BARIUM CHLORATE MONOHYDRATE	-	BARIUM CHLORATE
BARIUM DIOXIDE	-	BARIUM PEROXIDE
BARIUM NITRATE	-	BARIUM NITRATE
BARIUM PERCHLORATE	-	BARIUM PERCHLORATE
BARIUM PERCHLORATE TRIHYDRATE	-	BARIUM PERCHLORATE
BARIUM PERMANGANATE	-	BARIUM PERMANGANATE
BARIUM PEROXIDE	-	BARIUM PEROXIDE
BARIUM SUPEROXIDE	-	BARIUM PEROXIDE
BASIC BISMUTH CHLORIDE	-	BISMUTH OXYCHLORIDE
BASIC ZIRCONIUM CHLORIDE	-	ZIRCONIUM OXYCHLORIDE
BATTERY ACID	-	SULFURIC ACID
B8H	-	BENZENE HEXACHLORIDE
BEARING OIL	-	OIL: SPINDLE
BEET SUGAR	-	SUCROSE
BEN-HEX	-	BENZENE HEXACHLORIDE
BENZALDEHYDE	-	BENZALDEHYDE
1-BENZAZINE	-	QUINCLINE
BENZENE	-	BENZENE
BENZENE, MIXTURE WITH TOLUENE AND XYLENES	-	NAPHTHA COAL TAR

SYNONYM		COMPOUND NAME
BENZENECARBINOL	-	BENZYL ALCOHOL
BENZENECARBONYL CHLORIDE	-	BENZYL CHLORIDE
BENZENECARBOXYLIC ACID	-	BENZOIC ACID
1,2-BENZENEDICARBOXYLIC ACID ANHYDRIDE	-	PHTHALIC ANHYDRIDE
1,2-BENZENEDICARBOXYLIC ACID, DIETHYL ESTER	-	DIETHYL PHTHALATE
BENZENE CHLORIDE	-	CHLOROBENZENE
BENZENE-1,3-DICARBOXYLIC ACID	-	ISOPHTHALIC ACID
1,4-BENZENEDIOL	-	HYDROQUINONE
1,3-BENZENEDIOL	-	RESORCINOL
1,2-BENZENEDIOL	-	CATECHOL
BENZENE HEXACHLORIDE	-	BENZENE HEXACHLORIDE
BENZENE PHOSPHORUS DICHLORIDE	-	BENZENE PHOSPHORUS DICHLORIDE
BENZENE PHOSPHORUS THIODICHLORIDE	-	BENZENE PHOSPHORUS THIODICHLORIDE
BENZENETHIOPHOSPHONYL CHLORIDE	-	BENZENE PHOSPHORUS THIODICHLORIDE
1,2,3-BENZENETRIOL	-	PYROGALLIC ACID
BENZINFORM	-	CARBON TETRACHLORIDE
BENZOIC ACID	-	BENZOIC ACID
BENZOIC ACID, AMMONIUM SALT	-	AMMONIUM BENZOATE
BENZOIC ACID NITRILE	-	BENZONITRILE
BENZOIC ALDEHYDE	-	BENZALDEHYDE
BENZOL	-	BENZENE
BENZOLE	-	BENZENE
BENZONITRILE	-	BENZONITRILE
BENZOPHENONE	-	BENZOPHENONE
BENZO(B)PYRIDINE	-	QUINOLINE
BENZO(B)QUINOLINE	-	ACRIDINE
BENZOYLBENZENE	-	BENZOPHENONE
BENZOYL CHLORIDE	-	BENZOYL CHLORIDE
BENZOYL PEROXIDE	-	DIBENZOYL PEROXIDE
BENZOYL SUPEROXIDE	-	DIBENZOYL PEROXIDE
BENZYL ALCOHOL	-	BENZYL ALCOHOL
BENZYLAMINE	-	BENZYLAMINE
BENZYL BROMIDE	-	BENZYL BROMIDE
BENZYL N-BUTYL PHTHALATE	-	BENZYL N-BUTYL PHTHALATE
BENZYL CARBONYL CHLORIDE	-	BENZYL CHLOROFORMATE
BENZYL CHLORIDE	-	BENZYL CHLORIDE
BENZYL CHLOROCARBONATE	-	BENZYL CHLOROFORMATE
BENZYL CHLOROFORMATE	-	BENZYL CHLOROFORMATE
BENZYL DIMETHYLOCTADECYLAMMONIUM CHLORIDE	-	BENZYL DIMETHYLOCTADECYLAMMONIUM CHLORIDE
BENZYL DIMETHYLSTEARYLAMMONIUM CHLORIDE	-	BENZYL DIMETHYLSTEARYLAMMONIUM CHLORIDE
BENZYLTRIMETHYLAMMONIUM CHLORIDE	-	BENZYLTRIMETHYLAMMONIUM CHLORIDE
BERYLLIA	-	BERYLLIUM OXIDE
BERYLLIUM CHLORIDE	-	BERYLLIUM CHLORIDE
BERYLLIUM FLUORIDE	-	BERYLLIUM FLUORIDE
BERYLLIUM, METALLIC	-	BERYLLIUM, METALLIC
BERYLLIUM NITRATE	-	BERYLLIUM NITRATE
BERYLLIUM NITRATE TRIHYDRATE	-	BERYLLIUM NITRATE
BERYLLIUM OXIDE	-	BERYLLIUM OXIDE
BERYLLIUM SULFATE	-	BERYLLIUM SULFATE
BERYLLIUM SULFATE TETRAHYDRATE	-	BERYLLIUM SULFATE
BETAPROF	-	BETA-PROPIOLACTONE
BFC	-	BENZENE HEXACHLORIDE
BICHROME	-	POTASSIUM DICHROMATE
BICYCLO (4.4.0) DECANE	-	DECAHYDRONAPHTHALENE
BIEBERITE	-	COBALT SULFATE
BIETHYLENE	-	BUTADIENE, INHIBITED
BIFORMAL	-	GLYOXAL, 40% SOLUTION
BIFORMYL	-	GLYOXAL, 40% SOLUTION
DIPHENYL-DIPHENYL ETHER	-	DOWTHERM
BIS(ACETATO)DIOXOURANIUM	-	URANYL ACETATE
BIS(2-AMINOETHYL)AMINE	-	DIETHYLENETRIAMINE
N,N -BIS(2-AMINOETHYL) ETHYLENEDIAMINE	-	TRIETHYLENETETRAMINE

SYNONYM		COMPOUND NAME
BIS(P-CHLOROBENZOYL) PEROXIDE	-	DI-(P-CHLOROBENZOYL) PEROXIDE
BIS-(P-CHLOROBENZOYL) PEROXIDE	-	DI-(P-CHLOROBENZOYL) PEROXIDE
BIS(2-CHLOROETHYL) ETHER	-	DICHLOROETHYL ETHER
BIS (2-CHLOROETHYL) ETHER	-	DICHLOROETHYL ETHER
1,1-BIS(P-CHLOROPHENYL)-2,2,2- TRICHLOROETHANOL	-	4,4 -DICHLORO-ALPHA- TRICHLOROMETHYLBENZHYDROL
BIS (DIMETHYLTHIOCARBAMOYL) DISULFIDE	-	THIRAM
BIS(DIMETHYLTHIOCARBAMYL) DISULFIDE	-	THIRAM
S-(1,2-BIS(ETHOXYCARBONYL)ETHYL)-O,O- DIMETHYL PHOSPHORODITHIOATE	-	MALATHION
BIS(2-ETHYLHEXYL) HYDROGEN PHOSPHATE	-	DI-(2-ETHYLHEXYL) PHOSPHORIC ACID
BIS-(2-ETHYLHEXYL) HYDROGEN PHOSPHATE	-	DI-(2-ETHYLHEXYL) PHOSPHORIC ACID
BIS(2-ETHYLHEXYL) PHTHALATE	-	DIOCTYL PHTHALATE
BIS(2-ETHYLHEXYL) SODIUM SULFOSUCCINATE	-	DIOCTYL SODIUM SULFOSUCCINATE
BIS(2-(2-HYDROXYETHOXY)ETHYL) ETHER	-	TETRAETHYLENE GLYCOL
BIS(2-HYDROXYETHYL) AMINE	-	DIETHANOLAMINE
BIS(2-HYDROXYETHYL) ETHER	-	DIETHYLENE GLYCOL
2,2-BIS(4-HYDROXYPHENYL) PROPANE	-	BISPHENOL A
BIS(2-METHOXYETHYL) ETHER	-	DIETHYLENE GLYCOL DIMETHYL ETHER
2,2-BIS(P-METHOXYPHENYL)-1,1,1 - TRICHLOROETHANE	-	METHOXYCHLOR
BISMUTH CHLORIDE OXIDE	-	BISMUTH OXYCHLORIDE
BISMUTH OXYCHLORIDE	-	BISMUTH OXYCHLORIDE
BISMUTH SULCHLORIDE	-	BISMUTH OXYCHLORIDE
BISMUTHYL CHLORIDE	-	BISMUTH OXYCHLORIDE
BISPHENOL A	-	BISPHENOL A
BISPHENOL A DIGLYCIDYL ETHER	-	BISPHENOL A DIGLYCIDYL ETHER
BISPHENOL A EPICHLOROHYDRIN CONDENSATE	-	BISPHENOL A DIGLYCIDYL ETHER
BITUMEN	-	ASPHALT
BIVINYL	-	BUTADIENE, INHIBITED
BLACK LEAF 40 (40 PER CENT WATER SOLUTION)	-	NICOTINE SULFATE
BLACK OIL	-	ASPHALT BLENDING STOCK:ROCFERS FLUX
BLADAN	-	TETRAETHYL PYROPHOSPHATE
BLUE OIL	-	ANILINE
BLUE VITRIOL	-	COPPER SULFATE
BOILER COMPOUND, LIQUID	-	BOILER COMPOUND, LIQUID
BOLLETIC ACID	-	FUMARIC ACID
BORACIC ACID	-	BORIC ACID
BORAX, ANHYDROUS	-	SODIUM BORATE
BORIC ACID	-	BORIC ACID
BORON CHLORIDE	-	BORON TRICHLORIDE
BORON TRIBROMIDE	-	BORON TRIBROMIDE
BORON TRICHLORIDE	-	BORON TRICHLORIDE
BOTTLED GAS	-	LIQUEFIED PETROLEUM GAS (LPG)
BOX TOE GUM	-	CCELLGION
BP	-	DIPENZOYL PEROXIDE
BPC	-	DIBENZOYL PEROXIDE
BRIMSTONE (LIQUID)	-	SULFUR (LIQUID)
BROCID	-	ETHYLENE DICHLORIDE
BROMALLYLENE	-	ALLYL BROMIDE
BROMELLITE	-	BERYLLIUM OXIDE
BROMINE	-	BROMINE
BROMINE PENTAFLUORIDE	-	BROMINE PENTAFLUORIDE
BROMINE TRIFLUORIDE	-	BROMINE TRIFLUORIDE
BROMOBENZENE	-	BROMCBENZENE
BROMOPENZOL	-	BROMCBENZENE
BROMOFUME	-	ETHYLENE DIBROMIDE
BROMOMETHANE	-	METHYL BROMIDE
3-BROMOPROPENE	-	ALLYL BROMIDE
3-BROMOPROPYLENE	-	ALLYL BROMIDE
ALPHA-BROMOTOLUENE	-	BENZYL BROMIDE
BROMOTOLUENE, ALPHA	-	BENZYL BROMIDE
OMEGA-BROMOTOLUENE	-	BENZYL BROMIDE
BRUCINE	-	BRUCINE

SYNONYM		COMPOUND NAME
BRUCINE DIHYDRATE	-	BRUCINE
BTMAC	-	BENZYLTRIMETHYLAMMONIUM CHLORIDE
BUNKER C OIL	-	FUEL OIL: 6
1,3-BUTADIENE	-	BUTADIENE, INHIBITED
BUTADIENE, INHIBITED	-	BUTADIENE, INHIBITED
BUTAL	-	N-BUTYRALDEHYDE
BUTALDEHYDE	-	N-BUTYRALDEHYDE
BUTANAL	-	N-BUTYRALDEHYDE
1-BUTANAMINE, N-BUTYL	-	DI-N-BUTYLAMINE
BUTANE	-	BUTANE
N-BUTANE	-	BUTANE
1,4-BUTANEDICARBOXYLIC ACID	-	ADIPIC ACID
1,4-BUTANEDIOL	-	1,4-BUTANEDIOL
1-BUTANETHIOL	-	N-BUTYL MERCAPTAN
BUTANIC ACID	-	N-BUTYRIC ACID
BUTANOIC ACID	-	N-BUTYRIC ACID
BUTANOL	-	N-BUTYL ALCOHOL
1-BUTANOL	-	N-BUTYL ALCOHOL
2-BUTANOL	-	SEC-BUTYL ALCOHOL
2-BUTANONE	-	METHYL ETHYL KETONE
TRANS-2-BUTENAL	-	CROTONALDEHYDE
1-BUTENE	-	BUTYLENE
CIS-BUTENEDIOIC ACID	-	MALEIC ACID
TRANS-BUTENEDIOIC ACID	-	FUMARIC ACID
CIS-BUTENEDIOIC ANHYDRIDE	-	MALEIC ANHYDRIDE
1,4-BUTENEDIOL	-	1,4-BUTENEDIOL
CIS-2-BUTENE-1,4-DIOL	-	1,4-BUTENEDIOL
3-BUTEN-2-ONE	-	METHYL VINYL KETONE
1-BUTENE OXIDE	-	BUTYLENE OXIDE
BUTENE RESINS	-	POLYBUTENE
1-BUTOXYBUTANE	-	DI-N-BUTYL ETHER
BUTOXYDIETHYLENE GLYCOL	-	DIETHYLENE GLYCOL MONOBUTYL ETHER
BUTOXYDIGLYCOL	-	DIETHYLENE GLYCOL MONOBUTYL ETHER
2-BUTOXYETHANOL	-	ETHYLENE GLYCOL MONOBUTYL ETHER
2-BUTOXYETHANOL, ACETATE	-	ETHYLENE GLYCOL MONOBUTYL ETHER ACETATE
2-(2-BUTOXYETHOXY)ETHYL ACETATE	-	DIETHYLENE GLYCOL MONOBUTYL ETHER ACETATE
2-BUTOXYETHYL ACETATE	-	ETHYLENE GLYCOL MONOBUTYL ETHER ACETATE
BUTOXYETHYL 2,4-DICHLOROPHENOXYACETATE	-	2,4-D ESTERS
BUTOXYPROPYL TRICHLOROPHENOXYACETATE	-	2,4,5-T(ESTERS)
BUTTERCUP YELLOW	-	ZINC CHROMATE
BUTTER OF ANTIMONY	-	ANTIMONY TRICHLORIDE
BUTTER OF ARSENIC	-	ARSENIC TRICHLORIDE
BUTYL ACETATE	-	N-BUTYL ACETATE
N-BUTYL ACETATE	-	N-BUTYL ACETATE
SEC-BUTYL ACETATE	-	SEC-BUTYL ACETATE
BUTYL ACRYLATE	-	N-BUTYL ACRYLATE
ISO-BUTYL ACRYLATE	-	ISO-BUTYL ACRYLATE
N-BUTYL ACRYLATE	-	N-BUTYL ACRYLATE
BUTYL ALCOHOL	-	N-BUTYL ALCOHOL
N-BUTYL ALCOHOL	-	N-BUTYL ALCOHOL
SEC-BUTYL ALCOHOL	-	SEC-BUTYL ALCOHOL
TERT-BUTYL ALCOHOL	-	TERT-BUTYL ALCOHOL
BUTYL ALDEHYDE	-	N-BUTYRALDEHYDE
N-BUTYL ALPHA-METHYL ACRYLATE	-	N-BUTYL METHACRYLATE
BUTYLAMINE	-	N-BUTYLAMINE
N-BUTYLAMINE	-	N-BUTYLAMINE
SEC-BUTYLAMINE	-	SEC-BUTYLAMINE
TERT-BUTYLAMINE	-	TERT-BUTYLAMINE
BUTYL BENZYL PHTHALATE	-	BENZYL N-BUTYL PHTHALATE
N-BUTYL CARBINOL	-	N-AMYL ALCOHOL
N-BUTYL CARBINYL CHLORIDE	-	N-AMYL CHLORIDE
BUTYL CARBITOL	-	DIETHYLENE GLYCOL MONOBUTYL ETHER

SYNONYM	COMPOUND NAME
BUTYL CARBITOL ACETATE	DIETHYLENE GLYCOL MONOBUTYL ETHER ACETATE
BUTYL CELLOSOLVE	ETHYLENE GLYCOL MONOBUTYL ETHER
BUTYL (CELLOSOLVE) ACETATE	ETHYLENE GLYCOL MONOBUTYL ETHER ACETATE
BUTYL 2,4-DICHLOROPHENOXYACETATE	2,4-D ESTERS
BUTYLENE	BUTYLENE
2-BUTYLENE DICHLORIDE	DICHLOROBUTENE
BUTYLENE HYDRATE	SEC-BUTYL ALCOHOL
BUTYLENE OXIDE	BUTYLENE OXIDE
ALPHA-BUTYLENE OXIDE	BUTYLENE OXIDE
1,2-BUTYLENE OXIDE	BUTYLENE OXIDE
BUTYL ETHANOATE	N-BUTYL ACETATE
BUTYL ETHER	DI-N-BUTYL ETHER
N-BUTYLETHYR	DI-N-BUTYL ETHER
BUTYLETHYLACETALDEHYDE	ETHYLHEXALDEHYDE
TERT-BUTYL HYDROPEROXIDE	TERT-BUTYL HYDROPEROXIDE
N-BUTYL MERCAPTAN	N-BUTYL MERCAPTAN
BUTYL METHACRYLATE	N-BUTYL METHACRYLATE
N-BUTYL METHACRYLATE	N-BUTYL METHACRYLATE
BUTYL 2-METHACRYLATE	N-BUTYL METHACRYLATE
N-BUTYL METHYL KETONE	METHYL N-BUTYL KETONE
BUTYL 2-METHYL-2-PROPENOATE	N-BUTYL METHACRYLATE
P-TERT-BUTYLPHENOL	P-TERT-BUTYLPHENOL
BUTYL PHTHALATE	DIBUTYL PHTHALATE
BUTYL 2-PROPENOATE	N-BUTYL ACRYLATE
BUTYL TITANATE	TETRABUTYL TITANATE
BUTYL TITANATE MONOMER	TETRABUTYL TITANATE
BUTYL 2,4,5-TRICHLOROPHENOXYACETATE	2,4,5-T (ESTERS)
BUTYLTRICHLOROSILANE	BUTYLTRICHLOROSILANE
N-BUTYLTRICHLOROSILANE	BUTYLTRICHLOROSILANE
1,4-BUTYNE-1,4-DIOL	1,4-BUTYNE-1,4-DIOL
BUTYRAL	1,4-BUTYNE-1,4-DIOL
BUTYRALDEHYDE	N-BUTYRALDEHYDE
ISO-BUTYRALDEHYDE	N-BUTYRALDEHYDE
N-BUTYRALDEHYDE	ISO-BUTYRALDEHYDE
BUTYRIC ACID	N-BUTYRALDEHYDE
N-BUTYRIC ACID	N-BUTYRIC ACID
BUTYRIC ACID, ETHYL ESTER	N-BUTYRIC ACID
BUTYRIC ALDEHYDE	ETHYL BUTYRATE
BUTYRIC ETHER	N-BUTYRIC ACID
CACODYLIC ACID	ETHYL BUTYRATE
CADMIUM ACETATE	CACODYLIC ACID
CADMIUM ACETATE DIHYDRATE	CADMIUM ACETATE
CADMIUM BROMIDE	CADMIUM ACETATE
CADMIUM BROMIDE TETRAHYDRATE	CADMIUM BROMIDE
CADMIUM CHLORIDE	CADMIUM BROMIDE
CADMIUM FLUOROBORATE	CADMIUM CHLORIDE
CADMIUM FLUOROBORATE	CADMIUM FLUOROBORATE
CADMIUM FUME	CADMIUM FLUOROBORATE
CADMIUM NITRATE	CADMIUM OXIDE
CADMIUM NITRATE TETRAHYDRATE	CADMIUM NITRATE
CADMIUM OXIDE	CADMIUM NITRATE
CADMIUM SULFATE	CADMIUM OXIDE
CADOX HDP	CADMIUM SULFATE
CADOX PS	CYCLOHEXANONE PEROXIDE
CADOX TEP	DI-(P-CHLOROBENZOYL) PEROXIDE
CAKE ALUM	TERT-BUTYL HYDROPEROXIDE
CALCIUM	ALUMINUM SULFATE
CALCIUM ABIETATE	CALCIUM PHOSPHATE
CALCIUM ALKYLAROMATIC SULFONATE	CALCIUM RESINATE
CALCIUM ALKYL BENZENESULFONATE	DODECYLBENZENESULFONIC ACID, CALCIUM SALT
	DODECYLBENZENESULFONIC ACID, CALCIUM SALT

SYNONYM		COMPOUND NAME
CARBONYL DIAMINE PEROXIDE	-	UREA PEROXIDE
CARBOXYBENZENE	-	BENZIC ACID
CARENE	-	CARENE
3-CARENE	-	CARENE
CARPETING MATERIAL	-	ARSENIC ACID
CARPETING MEDIUM	-	ASPHALT BLEND STOCK=STRAIGHT RUN RESIDUE
CARTHAMUS TINCTORIUS OIL	-	OILS EDIBLE: SAFFLOWER
CARMINATE 125M	-	DIPHENYLMETHANEDIISOCYANATE (MDI)
CATECHIN	-	CATECHOL
CATECHOL	-	CATECHOL
CAUSTIC ARSENIC CHLORIDE	-	ARSENIC TRICHLORIDE
CAUSTIC OIL OF ARSENIC	-	ARSENIC TRICHLORIDE
CAUSTIC POTASH	-	POTASSIUM HYDROXIDE
CAUSTIC POTASH SOLUTION	-	CAUSTIC POTASH SOLUTION
CAUSTIC SODA	-	SODIUM HYDROXIDE
CAUSTIC SODA SOLUTION	-	CAUSTIC SODA SOLUTION
CD-68	-	CHLORDANE
CELLOSOLVE	-	ETHYLENE GLYCOL MONOETHYL ETHER
CELLOSOLVE ACETATE	-	ETHYLENE GLYCOL MONOETHYL ETHER ACETATE
CELLULOSE NITRATE SOLUTION	-	CELLULOSION
CETYL SODIUM SULFATE	-	HEXADECYL SULFATE, SODIUM SALT
CETYLTRIMETHYLAMMONIUM CHLORIDE SOLUTION	-	HEXADECYLTRIMETHYLAMMONIUM CHLORIDE
CHAMBER ACID	-	SULFURIC ACID
CHARCOAL	-	CHARCOAL
CHEM BAM	-	NABAM
CHINESE TANNIN	-	TANNIC ACID
CHINOLINE	-	QUINOLINE
CHLORACETIC ACID	-	MONOCHLOROACETIC ACID
CHLORACETYL CHLORIDE	-	CHLORACETYL CHLORIDE
CHLORATE OF POTASH	-	POTASSIUM CHLORATE
CHLORATE OF POTASSIUM	-	POTASSIUM CHLORATE
CHLORATE OF SODA	-	SODIUM CHLORATE
CHLORDAN	-	CHLORDANE
CHLORDANE	-	CHLORDANE
2-CHLORETHANOL	-	ETHYLENE CHLOROHYDRIN
CHLOREX	-	DICHLOROETHYL ETHER
CHLORIDE OF AMYL	-	N-AMYL CHLORIDE
CHLORINATED BIPHENYL	-	POLYCHLORINATED BIPHENYL (PCB)
CHLORINE	-	CHLORINE
CHLORINE TRIFLUORIDE	-	CHLORINE TRIFLUORIDE
CHLOROACETIC ACID	-	MONOCHLOROACETIC ACID
CHLOROACETIC ACID, ETHYL ESTER	-	ETHYL CHLOROACETATE
CHLOROACETOPHENONE	-	CHLOROACETOPHENONE
ALPHA-CHLOROACETOPHENONE	-	CHLOROACETOPHENONE
OMEGA-CHLOROACETOPHENONE	-	CHLOROACETOPHENONE
CHLOROACETYL CHLORIDE	-	CHLOROACETYL CHLORIDE
5-CHLORO-2-AMINOTOLUENE	-	4-CHLORO-O-TOLUICINE
4-CHLOROANILINE	-	P-CHLOROANILINE
P-CHLOROANILINE	-	P-CHLOROANILINE
CHLOROBENZENE	-	CHLOROBENZENE
P-CHLOROBENZOYL PEROXIDE	-	DI-(P-CHLOROBENZOYL) PEROXIDE
DI-(4-CHLOROBENZOYL) PEROXIDE	-	DI-(P-CHLOROBENZOYL) PEROXIDE
4-CHLOROBUTYRONITRILE	-	4-CHLOROBUTYRONITRILE
4-CHLOROBUTYRONITRILE (PRACTICAL MIXTURE WITH 4- BROMOBUTYRONITRILE)	-	4-CHLOROBUTYRONITRILE
CHLOROCARBONIC ACID, METHYL ESTER	-	METHYL CHLOROCARBONATE
CHLORODIFLUOROMETHANE	-	MONOCHLORODIFLUOROMETHANE
1-CHLORO-2,3-EPOXYPROPANE	-	EPICHLOROHYDRIN
CHLORETHANE	-	ETHYL CHLORIDE
2-CHLOROTHANOL	-	ETHYLENE CHLOROHYDRIN
CHLOROTHENE	-	VINYL CHLORIDE

SYNONYM	COMPOUND NAME
2-CHLOROETHYL ALCOHOL	ETHYLENE CHLOROHYDRIN
2-CHLORO-4-ETHYLAMINO-6-ISOPROPYLAMINO-5-TRIAZINE	ATRAZINE
CHLOROETHYLENE	VINYL CHLORIDE
CHLOROFORM	CHLOROFORM
CHLOROFORMIC ACID, BENZYL ESTER	BENZYL CHLOROFORMATE
CHLOROFORMIC ACID, ETHYL ESTER	ETHYL CHLOROFORMATE
CHLOROFORMIC ACID, METHYL ESTER	METHYL CHLOROFORMATE
CHLOROFORMYL CHLORIDE	PHOSGENE
CHLOROHYDRINS (CRUDE)	CHLOROHYDRINS (CRUDE)
GAMMA-CHLOROISOBUTYLENE	METHALLYL CHLORIDE
CHLOROMETHANE	METHYL CHLORIDE
4-CHLORO-2-METHYLANILINE	4-CHLORO-O-TOLUIDINE
CHLOROMETHYL METHYL ETHER	CHLOROMETHYL METHYL ETHER
CHLOROMETHYLOXIRANE	EPICHLOROHYDRIN
O-(3-CHLORO-4-METHYL-2-OXO-(2H)-1-BENZOPYRAN-7-YL)PHOSPHOROTHIOATE	COUMAPHOS

SYNONYM		COMPOUND NAME
1-DECENE	-	1-DECENE
ALPHA-DECENE	-	1-DECENE
N-DECYL ALCOHOL	-	N-DECYL ALCOHOL
N-DECYL ALDEHYDE	-	DECALDEHYDE
DECYLBENZENE	-	N-DECYLBENZENE
N-DECYLBENZENE	-	N-DECYLBENZENE
DEG	-	DIETHYLENE GLYCOL
DEMO	-	DIOCTYL PHTHALATE
DEHPA	-	DI-(2-ETHYLHEXYL) PHOSPHORIC ACID
DEHYDRITE	-	MAGNESIUM PERCHLORATE
DE KALIN	-	DECAHYDRONAPHTHALENE
DEMETON	-	DEMETON
DEN	-	DIETHYLAMINE
DENATURED ALCOHOL	-	ETHYL ALCOHOL
2,4-D ESTERS	-	2,4-D ESTERS
DETERGENT ALKYLATE #2	-	CODECYLBENZENE
DEXTROSE SOLUTION	-	DEXTROSE SOLUTION
DIACETIC ETHER	-	ETHYL ACETOACETATE
DIACETONE	-	DIACETONE ALCOHOL
DIACETONE ALCOHOL	-	DIACETONE ALCOHOL
DIACETYLMETHANE	-	ACETYLACETONE
DIACETYL PEROXIDE SOLUTION	-	ACETYL PEROXIDE SOLUTION
1,2-DIAMINOETHANE	-	ETHYLENEDIAMINE
2,2-DIAMINODIETHYLAMINE	-	DIETHYLENEDIAMINE
1,6-DIAMINOHEXANE	-	HEXAMETHYLENEDIAMINE
1,11-DIAMINO-3,6,9-TRIAZAUNDECANE	-	TETRAETHYLENEPENTAMINE
DIAMMONIUM CITRATE	-	AMMONIUM CITRATE
DIAMMONIUM HYDROGEN PHOSPHATE	-	AMMONIUM PHOSPHATE
DIAMMONIUM CRITHCOPHOSPHATE	-	AMMONIUM PHOSPHATE
DIAMMONIUM OXALATE	-	AMMONIUM OXALATE
DIAMYL PHTHALATE	-	DI-N-AMYL PHTHALATE
DI-N-AMYL PHTHALATE	-	DI-N-AMYL PHTHALATE
2,2-DI-(P-ANISYL)-1,1,1-TRICHLOROETHANE	-	METHOXYCHLOR
DIANTIMONY TRIOXIDE	-	ANTIMONY TRIOXIDE
DIAZINON	-	DIAZINON
DIBASIC CALCIUM PHOSPHATE	-	CALCIUM PHOSPHATE
DIBENZO(B,E)PYRIDINE	-	ACRIDINE
DIBENZOYL PEROXIDE	-	DIBENZOYL PEROXIDE
DIBK	-	DIISOBUTYL KETONE
1,2-DIBROMOETHANE	-	ETHYLENE DIBROMIDE
SYM-DIBROMOETHANE	-	ETHYLENE DIBROMIDE
DIBUTYLAMINE	-	DI-N-BUTYLAMINE
DI-N-BUTYLAMINE	-	DI-N-BUTYLAMINE
DIBUTYL ETHER	-	DI-N-BUTYL ETHER
N-DIBUTYL ETHER	-	DI-N-BUTYL ETHER
DI-N-BUTYL ETHER	-	DI-N-BUTYL ETHER
DI-N-BUTYL KETONE	-	DI-N-BUTYL KETONE
DIBUTYL OXIDE	-	DI-N-BUTYL ETHER
DIBUTYLPHENOL	-	DIBUTYLPHENOL
2,6-DI-TERT-BUTYLPHENOL	-	DIBUTYLPHENOL
DIBUTYL PHTHALATE	-	DIBUTYL PHTHALATE
DICALCIUM PHOSPHATE (ANHYDROUS OR DIHYDRATE)	-	CALCIUM PHOSPHATE
S-(1,2-DICARBETHOXYETHYL)-O,O-DIMETHYL DITHIOPHOSPHATE	-	MALATHION
DICARBOMETHOXYZINC	-	ZINC ACETATE
DICHLORIDE	-	P-DICHLOROBENZENE

SYNONYM		COMPOUND NAME
MULTRATHANE M	-	DIPHENYLMETHANEDIISOCYANATE (PDI)
MURIATIC ACID	-	HYDROCHLORIC ACID
MYRISTIC ALCOHOL	-	TETRADECANOL
MYRISTYL ALCOHOL	-	TETRADECANOL
NABAM	-	NABAM
NACCONATE 100	-	TOLUENE 2,4-DIISOCYANATE (TDI)
NACCONATE 300	-	DIPHENYLMETHANEDIISOCYANATE (MDI)
NADONE	-	CYCLOHEXANONE
NAPHTHA	-	MINERAL SPIRITS
NAPHTHA COAL TAR	-	NAPHTHA COAL TAR
NAPHTHA SOLVENT	-	NAPHTHA SOLVENT
NAPHTHA STODDARD SOLVENT	-	NAPHTHA STODDARD SOLVENT
NAPHTHA VM + P (75 PER CENT NAPHTHA)	-	NAPHTHA VM + P (75 PER CENT NAPHTHA)
NAPHTHALANE	-	DECAHYDRONAPHTHALENE
NAPHTHALENE, MOLTEN	-	NAPHTHALENE, MOLTEN
NAPHTHALIN	-	NAPHTHALENE, MOLTEN
NAPHTHANE	-	DECAHYDRONAPHTHALENE
NAPHTHENIC ACIDS	-	NAPHTHENIC ACIDS
ALPHA-NAPHTHYLAMINE	-	1-NAPHTHYLAMINE
1-NAPHTHYLAMINE	-	1-NAPHTHYLAMINE
1-NAPHTHYL N-METHYLCARBAMATE	-	CARBARYL
NATURAL GASOLINE	-	GASOLINE: CASINGHEAD
NEATSFOOT OIL	-	CIL: NEATSFOOT
NECATORINA	-	CARBON TETRACHLORIDE
NEOHXANE	-	NEOHXANE
NEUTRAL AMMONIUM FLUORIDE	-	AMMONIUM FLUORIDE
NEUTRAL ANHYDROUS CALCIUM HYPOCHLORITE	-	CALCIUM HYPOCHLORITE
NEUTRAL LEAD ACETATE	-	LEAD ACETATE
NEUTRAL NICOTINE SULFATE	-	NICOTINE SULFATE
NEUTRAL POTASSIUM CHROMATE	-	POTASSIUM CHROMATE
NEUTRAL SODIUM CHROMATE, ANHYDROUS	-	SODIUM CHROMATE
NEUTRAL VERDIGRIS	-	COPPER ACETATE
NICKEL ACETATE	-	NICKEL ACETATE
NICKEL ACETATE TETRAHYDRATE	-	NICKEL ACETATE
NICKEL AMMONIUM SULFATE	-	NICKEL AMMONIUM SULFATE
NICKEL AMMONIUM SULFATE HEXAHYDRATE	-	NICKEL AMMONIUM SULFATE
NICKEL BROMIDE	-	NICKEL BROMIDE
NICKEL BROMIDE TRIHYDRATE	-	NICKEL BROMIDE
NICKEL CARBONYL	-	NICKEL CARBONYL
NICKEL CHLORIDE	-	NICKEL CHLORIDE
NICKEL CHLORIDE	-	NICKEL CHLORIDE
NICKEL CYANIDE	-	NICKEL CYANIDE
NICKEL (II) FLUOBORATE	-	NICKEL FLUOROBORATE
NICKEL FLUOROBORATE SOLUTION	-	NICKEL FLUOROBORATE
NICKEL FLUOROBORATE	-	NICKEL FLUOROBORATE
NICKEL FORMATE	-	NICKEL FORMATE
NICKEL FORMATE DIHYDRATE	-	NICKEL FORMATE
NICKEL NITRATE	-	NICKEL NITRATE
NICKEL NITRATE HEXAHYDRATE	-	NICKEL NITRATE
NICKEL SULFATE	-	NICKEL SULFATE
NICKEL TETRACARBONYL	-	NICKEL CARBONYL
NICKELOUS ACETATE	-	NICKEL ACETATE
NICKELOUS SULFATE	-	NICKEL SULFATE
NICOTINE	-	NICOTINE
NICOTINE SULFATE	-	NICOTINE SULFATE
NIFOS	-	TETRAETHYL PYROPHOSPHATE
NITRALIN	-	NITRALIN
NITRAM	-	AMMONIUM NITRATE
O-NITRANILINE	-	2-NITROANILINE
P-NITRANILINE	-	4-NITROANILINE
NITREX NITROGEN SOLUTIONS (NON-PRESSURE)	-	AMMONIUM NITRATE-UREA SOLUTION
NITRIC ACID	-	NITRIC ACID
NITRIC ACID, ALUMINUM SALT	-	ALUMINUM NITRATE

SYNONYM	COMPOUND NAME
NITRIC ACID, IRON (III) SALT	FERRIC NITRATE
NITRIC ACID, LEAD (II) SALT	LEAD NITRATE
NITRIC OXIDE	NITRIC OXIDE
NITRILOTRIACETIC ACID AND SALTS	NITRILOTRIACETIC ACID AND SALTS
2,2,2 -NITRILOTRIETHANOL	TRIETHANCLAMINE
O-NITROANILINE	2-NITROANILINE
4-NITROANILINE	4-NITROANILINE
P-NITROANILINE	4-NITROANILINE
2-NITROANILINE	2-NITROANILINE
NITROBENZENE	NITROBENZENE
NITROBENZOL	NITROBENZENE
NITROCARBOL	NITROMETHANE
NITROCELLULOSE GUM	COLLODION
NITROCELLULOSE SOLUTION	COLLODION
NITROCHLOROFORM	CHLOROPICRIN, LIQUID
NITROETHANE	NITROETHANE
NITROGEN DIOXIDE	NITROGEN TETROXIDE
NITROGEN, LIQUEFIED	NITROGEN, LIQUEFIED
NITROGEN MONOXIDE	NITRIC OXIDE
NITROGEN PEROXIDE	NITROGEN TETROXIDE
NITROGEN TETROXIDE	NITROGEN TETROXIDE
NITROMETHANE	NITROMETHANE
O-NITROPHENOL	2-NITROPHENOL
2-NITROPHENOL	2-NITROPHENOL
P-NITROPHENOL	4-NITROPHENOL
4-NITROPHENOL	4-NITROPHENOL
SEC-NITROPROPANE	2-NITROPROPANE
2-NITROPROPANE	2-NITROPROPANE
NITROSYL CHLORIDE	NITROSYL CHLORIDE
NITROTRICHLOROMETHANE	CHLOROPICRIN, LIQUID
NITROUS ETHER	ETHYL NITRITE
NITROUS OXIDE	NITROUS OXIDE
N-MCPANE	MCPANE
MCPANE	MCPANE
MCPANOL	MCPANOL
1-MCPANOL	MCPANOL
5-MCPANONE	CI-N-BUTYL KETONE
MCPENE	MCPENE
1-MCPENE	1-MCPENE
MCPENE (MCP-LINEAR)	MCPENE
MCPYL ALCOHOL	MCPANOL
MCPYLCARBINOL	N-DECYL ALCOHOL
1-MCPYLENE	1-MCPENE
N-MCPYLETHYLENE	1-MCPENE
MCPYLPHENOL	MCPYLPHENOL
MCPMAL AMYL ALCOHOL	N-AMYL ALCOHOL
NORMAL BUTYL ACETATE	N-BUTYL ACETATE
MCPMAL BUTYL ACRYLATE	N-BUTYL ACRYLATE
MCPMAL BUTYL ALCOHOL	N-BUTYL ALCOHOL
NORMAL BUTYRALDEHYDE	N-BUTYRALDEHYDE
NORMAL DECYL ALCOHOL	N-DECYL ALCOHOL
NORMAL LEAD ACETATE	LEAD ACETATE
NORMAL PROPYL ACETATE	N-PROPYL ACETATE
MCPMAL PROPYL ALCOHOL	N-PROPYL ALCOHOL
MCPVALAMINE	N-BUTYLAMINE
2-MP	2-NITROPROPANE
NTA	NITRILOTRIACETIC ACID AND SALTS
1,2,4,5,6,7,8-8-	CHLORDANE
OCTACHLORO-2,3,3A,4,7,7A-HEXAHYCRO-	
4,7-METHANOINDENE	
OCTACHLOROCAMPHENE	TOXAPHENE
OCTADECANOIC ACID	STEARIC ACID
CIS-9-OCTADECENOIC ACID	CLEIC ACID
OCTADECYLDIMETHYLBENZYLAMMONIUM	BENZYLDECETHYLCOCTADECYLAMMONIUM
CHLORIDE	CHLORIDE

SYNONYM		COMPOUND NAME
CIS-OCTADECYLENIC ACID	-	OLEIC ACID
CIS-(DELTA 9)-	-	OLEIC ACID
OCTADECYLENIC ACID	-	
N-OCTADECYLIC ACID	-	STEARIC ACID
OCTANE	-	OCTANE
OCTA-KLOR	-	CHLORDANE
N-OCTANE	-	OCTANE
OCTANOL	-	OCTANOL
1-OCTANOL	-	OCTANOL
1-OCTENE	-	1-OCTENE
OCTOCHLOROCAMPHENE	-	TOXAPHENE
OCTOIL	-	DICCTYL PHTHALATE
OCTYL ALCOHOL	-	OCTANOL
OCTYL ALDEHYDE	-	ETHYLHEXALDEHYDE
OCTYL CARBINOL	-	NONANOL
ALPHA-OCTYLENE	-	1-OCTENE
OCTYL EPOXY TALLATE	-	OCTYL EPOXY TALLATE

OLEIC ACID, SODIUM SALT	-	OLEIC ACID, SODIUM SALT
OLEUM	-	OLEUM
OLIVE OIL	-	OIL: OLIVE

SYNONYM	COMPOUND NAME
OPAL	TRICHLOROPHENOL
ONA	2-NITROANILINE
ONP	2-NITROPHENOL
ORPIMENT	ARSENIC TRISULFIDE
ORTHOARSENIC ACID	ARSENIC ACID
ORTHOBORIC ACID	BORIC ACID
ORTHOCIDE	CAPTAN
ORTHODICHLOROBENZENE	O-DICHLOROBENZENE
ORTHO-DIHYDROXYBENZENE	CATECHOL
ORTHOPHOSPHORIC ACID	PHOSPHORIC ACID
ORTHOTITANIC ACID, TETRABUTYL ESTER	TETRABUTYL TITANATE
ORTHOXYLENE	O-XYLENE
OXAL	GLYOXAL, 40% SOLUTION
OXALDEHYDE	GLYOXAL, 40% SOLUTION
OXALIC ACID	OXALIC ACID
OXALIC ACID, DIAMMONIUM SALT	AMMONIUM OXALATE
OXALIC ACID DINITRILE	CYANOGEN
OXALIC ACID, FERROUS SALT	FERRIC OXALATE
OXALONITRILE	CYANOGEN
OXAMMONIUM SULFATE	HYDROXYLAMINE SULFATE
3-OXA-1,5-PENTANEDIGL	DIETHYLENE GLYCOL
2-OXETANONE	BETA-PROPIOLACTONE
OXIDES OF NITROGEN	NITROGEN TETROXIDE
OXIRANE	ETHYLENE OXIDE
ALPHA-OXCDIPHENYLMETHANE	BENZOPHENONE
ALPHA-OXODITANE	BENZOPHENONE
2,2 OXYBISETHANOL	DIETHYLENE GLYCOL
OXYGEN, LIQUEFIED	OXYGEN, LIQUEFIED
OXYLITE	DIBENZOYL PEROXIDE
OXYPHENIC ACID	CATECHOL
OXYTOLUENES	CRESOLS
PAINT DRIER	COPPER NAPHTHATE
PAINTERS NAPHTHA	NAPHTHA VP + P (75 PER CENT NAPHTHA)
PALM BUTTER	OILS EDIBLE: PALM
PALM FRUIT OIL	OILS EDIBLE: PALM
PALM SEED OIL	OILS EDIBLE: TIGER
PAN	PHthalic ANHYDRIDE
PAPI	POLYMETHYLENE POLYPHENYL ISOCYANATE
PARADI	P-DICHLOROBENZENE
PARADICHLOROBENZENE	P-DICHLOROBENZENE
PARADOM	P-DICHLOROBENZENE
PARAFORMALDEHYDE	PARAFORMALDEHYDE
PARA HYDROGEN	HYDROGEN, LIQUEFIED
PARA-MENTHA-1,8-DIENE	CIPENTENE
PARAMOTH	P-DICHLOROBENZENE
PARANAPHTHALENE	ANTHRACENE
PARATHION, LIQUID	PARATHION, LIQUID
PARATHION-METHYL	METHYL PARATHION
PARAXYLENE	P-XYLENE
PARIS GREEN	COPPER ACETOARSENITE
PARROT GREEN	COPPER ACETOARSENITE
PATENT ALUM	ALUMINUM SULFATE
PCB	POLYCHLORINATED BIPHENYL (PCB)
PE	PENTAERYTHRITOL
PEANUT OIL	GIL: PEANUT
PEARL WHITE	BISMUTH OXYCHLORIDE
PELARGONIC ALCOHOL	NONANOL
PENETRATING OIL	GIL: PENETRATING
PENTA	PENTACHLOROPHENOL
PENTABORANE	PENTABORANE
(9)-PENTABORON MONOHYDRIDE	PENTABORANE
PENTACHLOROPHENOL	PENTACHLOROPHENOL
PENTADECANOL	PENTADECANOL
1-PENTADECANOL	PENTADECANOL
PENTADECANOL	LINEAR ALCOHOLS (12-15 CARBONS)

SYNONYM		COMPOUND NAME
PENTADECYL ALCOHOL	-	PENTADECANOL
PENTADECYLBENZENESULFONIC ACID	-	ALKYLBENZENESULFONIC ACIDS
PENTAERYTHRIT	-	PENTAERYTHRITOL
PENTAERYTHRITOL	-	PENTAERYTHRITOL
PENTAMETHYLENE	-	CYCLOPENTANE
PENTANAL	-	VALERALDEHYDE
PENTANE	-	PENTANE
1,5-PENTANEDIAL SOLUTION	-	GLUTARALDEHYDE SOLUTION
2,4-PENTANEDIONE	-	ACETYLACETONE
1-PENTANETHIOL	-	N-AMYL MERCAPTAN
1-PENTANOL	-	N-AMYL ALCOHOL
PENTEK	-	PENTAERYTHRITOL
1-PENTENE	-	1-PENTENE
PENTYL ACETATES	-	AMYL ACETATE
PENTYL ALCOHOL	-	N-AMYL ALCOHOL
SEC-PENTYL CARBINOL	-	ETHYL BUTANOL
1-PENTYL CHLORIDE	-	N-AMYL CHLORIDE
PENTYL METHYL KETONE	-	N-AMYL METHYL KETONE
PENTYLSILICON TRICHLORIDE	-	N-AMYLTRICHLOROSILANE
PERACETIC ACID	-	PERACETIC ACID
PERCARBAMIDE	-	UREA PEROXIDE
PERCHLORIC ACID	-	PERCHLORIC ACID
PERCHLORIC ACID SOLUTION	-	PERCHLORIC ACID
PERCHLOROCYCLOPENTADIENE	-	HEXACHLOROCYCLOPENTADIENE
PERCHLOROETHYLENE	-	TETRACHLOROETHYLENE
PERCHLOROMETHANE	-	CARBON TETRACHLORIDE
PERCHLOROMETHYL MERCAPTAN	-	PERCHLOROMETHYL MERCAPTAN
PERCLEN	-	TETRACHLOROETHYLENE
PERHYDROL-UREA	-	UREA PEROXIDE
PERHYDRONAPHTHALENE	-	DECAHYDRONAPHTHALENE

 ANTIMONY POTASSIUM TARTRATE
 POTASSIUM ARSENATE
 POTASSIUM DICHRIMATE
 POTASSIUM BINOXALATE
 POTASSIUM CHLORATE

SYNONYM		COMPOUND NAME
POTASSIUM CHROMATE	-	POTASSIUM CHROMATE
POTASSIUM CHROMATE(VI)	-	POTASSIUM CHROMATE
POTASSIUM CYANIDE	-	POTASSIUM CYANIDE
POTASSIUM DICHLOROISOCYANURATE	-	POTASSIUM DICHLORO-S-TRIAZINETRIONE
POTASSIUM DICHLORO-S-TRIAZINETRIONE	-	POTASSIUM DICHLORO-S-TRIAZINETRIONE
POTASSIUM DICHROMATE	-	POTASSIUM DICHROMATE
POTASSIUM HYDROXIDE SOLUTION	-	CAUSTIC POTASH SOLUTION
POTASSIUM IODIDE	-	POTASSIUM IODIDE
POTASSIUM DIHYDROGEN ARSENATE	-	POTASSIUM ARSENATE
POTASSIUM HYDROXIDE	-	POTASSIUM HYDROXIDE
POTASSIUM, METALLIC	-	POTASSIUM, METALLIC
POTASSIUM OLEATE	-	OLEIC ACID, POTASSIUM SALT
POTASSIUM OXALATE	-	POTASSIUM OXALATE
POTASSIUM OXALATE MONOHYDRATE	-	POTASSIUM OXALATE
POTASSIUM PERMANGANATE	-	POTASSIUM PERMANGANATE
POTASSIUM PEROXIDE	-	POTASSIUM PEROXIDE
POTASSIUM SUPEROXIDE	-	POTASSIUM PEROXIDE
POTATOSPIRIT OIL	-	ISOPHYL ALCOHOL
POTERATE	-	POTASSIUM CHLORATE
PRESERVATIVE OIL	-	OIL: PENETRATING
PRIMARY CALCIUM PHOSPHATE	-	CALCIUM PHOSPHATE
PRIME STEAM LARD	-	OILS EDIBLE, LARD
PROPADIENE-METHYLACETYLENE MIXTURE	-	METHYLACETYLENE - PROPADIENE MIXTURE
PROPALDEHYDE	-	PROPIONALDEHYDE
PROPANAL	-	PROPIONALDEHYDE
PROPANE	-	PROPANE
PROPANE-BUTANE-(PROPYLENE)	-	LIQUEFIED PETROLEUM GAS (LPG)
PROPANE-2-CARBOXYLIC ACID	-	ISOBUTYRIC ACID
PROPANECARBOXYLIC ACID	-	N-BUTYRIC ACID
1,2-PROPANEDIOL	-	PROPYLENE GLYCOL
1,2-PROPANEDIOL 1-ACRYLATE	-	HYDROXYPROPYL ACRYLATE
1,2-PROPANEDIOL 1-METHACRYLATE	-	HYDROXYPROPYL METHACRYLATE
1-PROPANETHIOL	-	N-PROPYL MERCAPTAN
2-PROPANETHIOL	-	ISOPROPYL MERCAPTAN
PROPANE-1-THIOL	-	N-PROPYL MERCAPTAN
PROPANE-2-THIOL	-	ISOPROPYL MERCAPTAN
1,2,3-PROPANETRIOL	-	GLYCERINE
PROPANOIC ACID	-	PROPIONIC ACID
PROPANOIC ANHYDRIDE	-	PROPIONIC ANHYDRIDE
1-PROPANOL	-	N-PROPYL ALCOHOL
2-PROPANOL	-	ISOPROPYL ALCOHOL
PROPANOLIDE	-	BETA-PROPIOLACTONE
2-PROPANONE	-	ACETONE
2-PROPENAL	-	ACROLEIN
2-PROPEN-1-OL	-	ALLYL ALCOHOL
PROPENAMIDE 50 PER CENT	-	ACRYLAMIDE
PROPENE	-	PROPYLENE
PROPENE OXIDE	-	PROPYLENE OXIDE
PROPENE POLYMER	-	POLYPROPYLENE
PROPENOIC ACID	-	ACRYLIC ACID
BETA-PROPIOLACTONE	-	BETA-PROPIOLACTONE
PROPIONALDEHYDE	-	PROPIONALDEHYDE
PROPIONIC ACID	-	PROPIONIC ACID
PROPIONIC ALDEHYDE	-	PROPIONALDEHYDE
PROPIONIC ANHYDRIDE	-	PROPIONIC ANHYDRIDE
BETA-PROPIOLACTONE	-	BETA-PROPIOLACTONE
PROPIONYL OXIDE	-	PROPIONIC ANHYDRIDE
N-PROPYL ACETATE	-	N-PROPYL ACETATE
2-PROPYL ACETATE	-	ISOPROPYL ACETATE
PROPYL ALCOHOL	-	N-PROPYL ALCOHOL
SEC-PROPYL ALCOHOL	-	ISOPROPYL ALCOHOL
N-PROPYL ALCOHOL	-	N-PROPYL ALCOHOL
PROPYL ALDEHYDE	-	PROPIONALDEHYDE
N-PROPYLCARBINOL	-	N-BUTYL ALCOHOL
PROPYLENE	-	PROPYLENE

TRIETHYLENE GLYCOL MONOETHYL ETHER	TRIETHYLENE GLYCOL
TRIETHYLENEPHOSPHORAMIDE	ETHOXY TRIGLYCOL
TRIETHYLENETETRAMINE	TRIS(AZIRIDINYL)PHOSPHINE OXIDE
TRIETHYLOLAMINE	TRIETHYLENETETRAPINE
ALPHA,ALPHA,ALPHA-	TRIETHANOLAMINE
TRIFLUORO-2,6-DINITRO-N,N-DIPROPYL-P-TOLUIDINE	TRIFLURALIN
TRIFLUOROCHLOROETHYLENE	TRIFLUOROCHLOROETHYLENE
TRIFLUOROMONOCHLOROETHYLENE	TRIFLUOROCHLOROETHYLENE
TRIFLUOROVINYL CHLORIDE	TRIFLUOROCHLOROETHYLENE
TRIFLURALIN	TRIFLURALIN
TRIGLYCINE	NITRILOTRIACETIC ACID AND SALTS
TRIGLYCOL	TRIETHYLENE GLYCOL
TRIGLYCOL MONOETHYL ETHER	ETHOXY TRIGLYCOL
1,2,3-TRIHYDROXYBENZENE	PYROGALLIC ACID
3,4,5-TRIHYDROXYBENZOIC ACID	GALLIC ACID
1,2,3-TRIHYDROXYPROPANE	GLYCERINE
TRIHYDROXYTRIEETHYLAMINE	TRIETHANOLAMINE
TRIIISOBUTYLALUMINUM	TRIIISOBUTYLALUMINUM
TRILENE	TRICHLOROETHYLENE
TRILINE	TRICHLOROETHYLENE
TRIMAR	TRICHLOROETHYLENE
TRIMETHYLAMINE	TRIMETHYLAMINE
TRIMETHYLAMINOMETHANE	TERT-BUTYLAMINE
TRIMETHYLBENZYLAMMONIUM CHLORIDE	BENZYLTRIMETHYLAMMONIUM CHLORIDE
3,7,7-TRIMETHYLBICYCLO(0.1.4)HEPT-3-ENE	CARENE
TRIMETHYLCARBINDOL	TERT-BUTYL ALCOHOL
TRIMETHYLCHLOROSILANE	TRIMETHYLCHLOROSILANE
3,5,5-TRIMETHYL-2-CYCLOHEXENE-1-ONE	ISOPHORONE
TRIMETHYLENE	CYCLOPROPANE
TRIMETHYLHEPTANALS	ISODECALDEHYDE
4,7,7-TRIMETHYL-3-NORCARENE	CARENE

SYNONYM	COMPOUND NAME
2,4,4-TRIMETHYL-1-PENTENE	DISOBUTYLENE
TRIMETHYLSILYL CHLORIDE	TRIMETHYLCHLORSILANE
3,6,9-TRIOXAUNDECAN-1,11-DIOL	TETRAETHYLENE GLYCOL
TRIPROPYLENE	NONENE
TRIPROPYLENE GLYCOL	TRIPROPYLENE GLYCOL
TRIS(AZIRIDINYL)PHOSPHINE OXIDE	TRIS(AZIRIDINYL)PHOSPHINE OXIDE
TRIS (HYDROXYETHYL)AMINE	TRIETHANOLAMINE
TRISODIUM NITRILOTRIACETATE	NITRILOTRIACETIC ACID AND SALTS
TRI-P-TOLYL PHOSPHATE	TRICRESYL PHOSPHATE
P-TSA	P-TOLUENESULFONIC ACID
TURPENTINE	TURPENTINE
TURPS	TURPENTINE
TYRANTON	CI ETONE ALCOHOL
UCANE ALKYLATE 12	OC CYLBENZENE
UCAR BISPHENOL HP	BISPHENOL A
UCON 11	TRICHLOROFLUOROMETHANE
UCON 14	DICHLORODIFLUOROMETHANE
UCON 22	MONOCHLORODIFLUOROMETHANE
UDPH	1,1-DIMETHYLHYDRAZINE
UNDECANOL	UNDECANOL
1-UNDECANOL	UNDECANOL
1-UNDECENE	1-UNDECENE
UNDECYL ALCOHOL	UNDECANOL
N-UNDECYLBENZENE	N-UNDECYLBENZENE
UNDECYLBENZENESULFONIC ACID	ALKYLBENZENESULFONIC ACIDS
UNDECYLETHYLENE	1-TRIDECENE
UNDECYLIC ALCOHOL	UNDECANOL
UNSLAKED LIME	CALCIUM OXIDE
URANIUM ACETATE	URANYL ACETATE
URANIUM ACETATE DIHYDRATE	URANYL ACETATE
URANIUM NITRATE	URANYL NITRATE
URANIUM OXYACETATE DIHYDRATE	URANYL ACETATE
URANIUM SULFATE	URANYL SULFATE
URANIUM SULFATE TRIHYDRATE	URANYL SULFATE
URANYL ACETATE	URANYL ACETATE
URANYL ACETATE DIHYDRATE	URANYL ACETATE
URANYL NITRATE	URANYL NITRATE
URANYL SULFATE	URANYL SULFATE
URANYL SULFATE TRIHYDRATE	URANYL SULFATE
UREA	UREA
UREA HYDROGEN PEROXIDE	UREA PEROXIDE
UREA PEROXIDE	UREA PEROXIDE
URITONE	HEXAMETHYLENETETRAMINE
UROTRUPIN	HEXAMETHYLENETETRAMINE
VALENTINITE	ANTIMONY TRIOXIDE
VALERAL	VALERALDEHYDE
VALERALDEHYDE	VALERALDEHYDE
VALERIC ALDEHYDE	VALERALDEHYDE
VAM	VINYL ACETATE
VANADIC ANHYDRIDE	VANADIUM PENTOXIDE
VANADIUM OXYSULFATE	VANADYL SULFATE
VANADIUM OXYTRICHLORIDE	VANADIUM OXYTRICHLORIDE
VANADIUM PENTAOXIDE	VANADIUM PENTOXIDE
VANADIUM PENTOXIDE	VANADIUM PENTOXIDE
VANADYL CHLORIDE	VANADIUM OXYTRICHLORIDE
VANADYL SULFATE	VANADYL SULFATE
VANADYL SULFATE DIHYDRATE	VANADYL SULFATE
VANADYL TRICHLORIDE	VANADIUM OXYTRICHLORIDE
VANICIDE	CAPTAN
VAPOTONE	TETRAETHYL PYROPHOSPHATE
VASELINE	PETROLATUM
VC	VINYL CHLORIDE
VCL	VINYL CHLORIDE
VCM	VINYL CHLORIDE
VEGETABLE CARBON	CHARCOAL

SYNONYM		COMPOUND NAME
VEGETABLE CHARCOAL	-	CHARCOAL
VEGETABLE OIL	-	CIL: VEGETABLE
VELSICOL	-	HEPTACHLOR
VELSICOL 1068	-	CHLORDANE
VENTOX	-	ACRYLONITRILE
VERSENE ACID	-	ETHYLENEDIAMINE TETRACETIC ACID
VIC-M-XYLENOL	-	XYLENOL
VIENNA GREEN	-	COPPER ACETOARSENITE
VILRATHANE 4300	-	CIPHENYLMETHANEDIISOCYANATE (MDI)
VINEGAR ACID	-	ACETIC ACID
VINYL ACETATE	-	VINYL ACETATE
VINYL A MONOMER	-	VINYL ACETATE
VINYLBENZENE	-	STYRENE
VINYLCARBINOL	-	ALLYL ALCOHOL
VINYL CHLORIDE	-	VINYL CHLORIDE
VINYL C MONOMER	-	VINYL CHLORIDE
VINYL CYANIDE	-	ACRYLONITRILE
VINYLETHYLENE	-	BUTADIENE, INHIBITED
VINYL FLUORIDE, INHIBITED	-	VINYL FLUORIDE, INHIBITED
VINYLDIENECHLORIDE, INHIBITED	-	VINYLDIENECHLORIDE, INHIBITED
VINYL METHYL ETHER, INHIBITED	-	VINYL METHYL ETHER, INHIBITED
VINYLSILICON TRICHLORIDE	-	VINYLTRICHLOROSILANE
VINYLTOLUENE	-	VINYLTOLUENE
VINYLTRICHLOROSILANE	-	VINYLTRICHLOROSILANE
VYAC	-	VINYL ACETATE
WATER DISPLACING OIL	-	CIL: PENETRATING
WATER GLASS	-	SODIUM SILICATE
WAXES: CARNAUBA	-	WAXES: CARNAUBA
WAXES: PARAFFIN	-	WAXES: PARAFFIN
WEISSPIESSGLANZ	-	ANTIMONY TRIOXIDE
WHITE ARSENIC	-	ARSENIC TRIOXIDE
WHITE OIL	-	CIL: MINERAL
WHITE VITRIOL	-	ZINC SULFATE
WITCIZER 300	-	CIBUTYL PHTHALATE
WITCIZER 312	-	CICCTYL PHTHALATE
WOOD ALCOHOL	-	METHYL ALCOHOL
WOOD CHARCOAL	-	CHARCOAL
WOOD ETHER	-	DIMETHYL ETHER
WOOD NAPHTHA	-	METHYL ALCOHOL
WOOD SPIRIT	-	METHYL ALCOHOL
WOOD TURPENTINE	-	TURPENTINE
META-XYLENE	-	M-XYLENE
P-XYLENE	-	P-XYLENE
O-XYLENE	-	O-XYLENE
M-XYLENE	-	P-XYLENE
XYLENES, MIXTURE WITH BENZENE AND TOLUENE	-	NAPHTHA COAL TAR
XYLENOL	-	XYLENOL
2,6-XYLENOL	-	XYLENOL
XY'OL	-	P-XYLENE
YELLOW ARSENIC SULFIDE	-	ARSENIC TRISULFIDE
YELLOW PETROLATUM	-	PETROLATUM
YELLOW PHOSPHORUS	-	PHOSPHORUS, WHITE
ZINC ACETATE	-	ZINC ACETATE
ZINC ACETATE DIHYDRATE	-	ZINC ACETATE
ZINC AMMONIUM CHLORIDE	-	ZINC AMMONIUM CHLORIDE
ZINC ARSENATE	-	ZINC ARSENATE
ZINC BORATE	-	ZINC BORATE
ZINC BROMIDE	-	ZINC BROMIDE
ZINC O,O-DI-N-BUTYLPHOSPHORODITHIATE	-	ZINC DIALKYL DITHIOPHOSPHATE
ZINC CHLORIDE	-	ZINC CHLORIDE
ZINC CHROMATE	-	ZINC CHROMATE
ZINC CHROMATE(VI)HYDROXIDE	-	ZINC CHROMATE
ZINC DIACETATE	-	ZINC ACETATE
ZINC DIALKYL DITHIOPHOSPHATE	-	ZINC DIALKYL DITHIOPHOSPHATE

SYNONYM

ZINC DIETHYL
 ZINC DIHEXYLDITHIOPHOSPHATE
 ZINC DIHEXYLPHOSPHORODITHIOATE
 ZINC DIMETHYL
 ZINC ETHYL
 ZINC FLUOBORATE SOLUTION
 ZINC FLUOROBORATE
 ZINC FLUOSILICATE
 ZINC HEXAFLUOROSILICATE
 ZINC METHYL
 ZINC NITRATE
 ZINC NITRATE HEXAHYDRATE
 ZINC P-PHENOLSULFONATE
 ZINC PHENOLSULFONATE
 ZINC PHENOLSULFONATE OCTAHYDRATE
 ZINC PHOSPHIDE
 ZINC SILICOFLUORIDE
 ZINC SILICOFLUORIDE HEXAHYDRATE
 ZINC SULFATE
 ZINC SULFATE HEPTAHYDRATE
 ZINC SULFOCARBOLATE
 ZINC SULFOPHENATE
 ZINC VITRIOL
 ZINC YELLOW
 ZIRCONIUM ACETATE
 ZIRCONIUM ACETATE SOLUTION
 ZIRCONIUM NITRATE
 ZIRCONIUM NITRATE PENTAHYDRATE
 ZIRCONIUM OXIDE CHLORIDE
 ZIRCONIUM OXYCHLORIDE
 ZIRCONIUM OXYCHLORIDE HYDRATE
 ZIRCONIUM SULFATE
 ZIRCONIUM SULFATE TETRAHYDRATE
 ZIRCONYL CHLORIDE

COMPOUND NAME

DIETHYLZINC
 ZINC DIALKYLDITHIOPHOSPHATE
 ZINC DIALKYLDITHIOPHOSPHATE
 DIMETHYLZINC
 DIETHYLZINC
 ZINC FLUOROBORATE
 ZINC FLUOROBORATE
 ZINC SILICOFLUORIDE
 ZINC SILICOFLUORIDE
 DIMETHYLZINC
 ZINC NITRATE
 ZINC NITRATE
 ZINC PHENOLSULFONATE
 ZINC PHENOLSULFONATE
 ZINC PHENOLSULFONATE
 ZINC PHOSPHIDE
 ZINC SILICOFLUORIDE
 ZINC SILICOFLUORIDE
 ZINC SULFATE
 ZINC SULFATE
 ZINC PHENOLSULFONATE
 ZINC PHENOLSULFONATE
 ZINC SULFATE
 ZINC CHROMATE
 ZIRCONIUM ACETATE
 ZIRCONIUM ACETATE
 ZIRCONIUM NITRATE
 ZIRCONIUM NITRATE
 ZIRCONIUM OXYCHLORIDE
 ZIRCONIUM OXYCHLORIDE
 ZIRCONIUM OXYCHLORIDE
 ZIRCONIUM SULFATE
 ZIRCONIUM SULFATE
 ZIRCONIUM OXYCHLORIDE

INDEX OF CODES

AAC	ACETIC ACID	ALM	ALUMINUM SULFATE

10. DATA SOURCES

The source of every item of data contained in Section 11 is recorded in master data files and is available on request. The principal sources are listed below. Many other sources were consulted, but most of them provided only a few items and are not given here. In a few cases the information given is based on an analogy with that for a closely related chemical; the analogy was drawn by an expert in the field, whose identity appears in the master data file.

Where a source was used for a single category of data, the source is given in Section 3 ("Explanation of Terms") and is not repeated here.

10.1 GENERAL SOURCES

The following sources contained data for many of the 13 data categories used:

1. **Manufacturers' Technical Bulletins** – This is usually the best single source of general information about the chemical. All bulletins were solicited in late 1972 and contain the most recent data. Bulletins were not available for a few chemicals that are not items of commerce but are intermediates shipped from one manufacturing site to another.

2. **Material Safety Data Sheets** – These were provided by the manufacturer using the U.S. Department of Labor Form OSHA-20 or an approved modification.

3. **Code of Federal Regulations** – Office of the Federal Register, Archives and Record Service, Washington, D.C., 1972. Titles 46 (Shipping) and 49 (Transportation) were used in the most recent revision available, in all cases since January 1, 1971.

4. **Chemical Safety Data Sheets** – Manufacturing Chemists Association, Washington, D.C.

5. **Industrial Safety Data Sheets** – National Safety Council, Chicago, Illinois.

6. **International Maritime Dangerous Goods Code** – Inter-Governmental Maritime Consultative Organization (IMCO), London, 1972.

7. **Petroleum Products Handbook** – V.B. Guthrie (ed.), McGraw-Hill, New York, 1960.

8. Glossary of Terms Used in Petroleum Refining – 2nd edition, American Petroleum Institute, New York, 1962.
9. The Handling and Storage of Liquid Propellants – Office of Defense Research and Engineering, U.S. Government Printing Office, Washington, D.C., 1963.
10. Industrial Chemicals – W.L. Faith, D.B. Keyes, and R.L. Clark, 3rd edition, Wiley, New York, 1965.
11. Chemical Technology of Petroleum – W.A. Gruse and D.R. Stevens, 3rd edition, McGraw-Hill, New York, 1960.
12. Chemical Rocket/Propellant Hazards – CPIA Publication No. 194, Vol. III, 1970.
13. Organic Solvents – J.A. Riddick and W.B. Bunger, 3rd edition, Wiley-Interscience, New York, 1970.
14. Transport of Dangerous Goods – (4 vols) United Nations, New York, 1970.
15. Kirk-Othmer Encyclopedia of Chemical Technology – 1st edition (1947-1960) and 2nd edition (1963-1970), Interscience-Wiley, New York.
16. Evaluation of the Hazard of Bulk Water Transportation of Industrial Chemicals, A Tentative Guide – National Academy of Sciences, Washington, D.C., 1970; includes supplement with additions to March 1972.
17. Matheson Gas Data Book – 5th edition, Matheson Gas Products, East Rutherford, New Jersey, 1971.
18. Explosive and Toxic Hazardous Materials – J. H. Meidl, Glencoe Press, Beverly Hills, California, 1969.
20. Organic Phosphorus Compounds – G. M. Kosolapoff and L. Maier (6 vols.), Wiley-Interscience, New York.
21. The Chemistry of Organo-Phosphorus Pesticides – C. Fest and K. J. Schmidt, Springer-Verlag, New York, 1973.

10.2 CHEMICAL DESIGNATIONS

1. Commercial Organic Chemical Names – Compiled by the Synthetic Organic Chemical Manufacturers Association (SOCMA), Chemical Abstracts Service, Columbus, Ohio, 1965.
2. Chemical Synonyms and Trade Names – W. Gardner and E.I. Cooke, 7th edition, CRC press, Cleveland, Ohio, 1971.
3. The Merck Index of Chemicals and Drugs – 8th edition, Merck and Co., Rahway, New Jersey, 1968.

10.3 HEALTH HAZARDS

1. Industrial Hygiene and Toxicology – F.A. Patty, 2nd edition, Vol. II, Interscience, New York, 1963.
2. Toxicity and Metabolism of Industrial Solvents – E. Browning, Elsevier, New York, 1965.
3. Practical Toxicology of Plastics – R. Lefaux, CRC Press, Cleveland, Ohio, 1968.
4. Industrial Toxicology – L.T. Fairhall, Williams and Wilkins, 2nd edition, Baltimore, Maryland, 1957.
5. Toxicology of Drugs and Chemicals – W.B. Deichmann and H.W. Girarde, Academic Press, New York, 1969.
6. Clinical Toxicology of Commercial Products – M.N. Gleason, et al., 3rd edition, Williams and Wilkins, Baltimore, Maryland, 1969.
7. Handbook of Toxicology: Acute Toxicities of Solids, Liquids and Gases to Laboratory Animals – W.S. Spector, Saunders, Philadelphia, Pa., 1956.
8. Occupational Diseases: A Guide to their Recognition – U.S. Department of Health, Education, and Welfare. Public Health Service Publication No. 1097. Superintendent of Documents, Washington, D.C., 1964.
9. First Aid Textbook – American National Red Cross, Washington, D.C., 1972.
10. Electrical Safety Practice: Odor Warning for Safety – Monograph 113 Instrument Society of America (ISA), Pittsburgh, Pa., 1972.

11. Toxic Substances — Annual List 1971 — H.E. Christensen, U.S. Department of Health, Education, and Welfare, Superintendent of Documents, Washington, D.C., 1971.

12. Hygienic Guide Series — American Industrial Hygiene Association, Detroit, Michigan, 48227.

13. Toxicity of Industrial Metals — E. Browning, 2nd Edition, Appleton-Century-Crofts, New York, 1969.

10.4 FIRE HAZARDS

1. The Fire and Explosion Hazards of Commercial Oils — W. Vlachos and C.A. Vlachos, Vlachos and Co., Philadelphia, Pa., 1921.

2. 1972 Annual Book of ASTM Standards — American Society for Testing and Materials, Philadelphia, Pa., 1972.

3. Fire Protection Guide on Hazardous Materials — 4th edition, Nos. 325A, 325M, 49, 491M, and 704M, National Fire Protection Association (NFPA), Boston, Mass., 1972.

4. Fire Protection Handbook — G.H. Tryon (ed.), 13th edition, National Fire Protection Association (NFPA), Boston, Mass., 1969.

5. Handbook of Industrial Loss Prevention — 2nd edition, Factory Mutual Engineering Corp., McGraw-Hill, New York, 1967.

10.5 WATER POLLUTION

1. Water Quality Criteria Data Book — Vol. 1 — Organic Chemicals (1970) and Vol. 2 — Inorganic Chemicals (1971), United States Environmental Protection Administration, Superintendent of Documents, Washington, D.C.

2. Engineering Management of Water Quality — P.H. McGauhey, McGraw-Hill, New York, 1968.

3. The BOD of Textile Chemicals — Proceedings of the American Association of Textile Chemists and Colorists, *American Dyestuff Reporter*, August 29, 1966, p. 39.

4. Biodegradable Surfactants for the Textile Industry — *American Dyestuff Reporter*, January 30, 1967.

5. Water Quality Criteria – J.E. McKee and M.W. Wolf, 2nd edition, California State Water Quality Control Board, Sacramento, California, 1963.

6. Water Quality Criteria – National Technical Advisory Committee, Federal Water Pollution Control Administration, Washington, D.C., 1968.

7. Water Quality Characteristics of Hazardous Materials – R. W. Hann, Jr., and P. A. Jensen, Environmental Engineering Division, Texas A and M University, College Station, Texas, 1974.

10.6 PHYSICAL AND CHEMICAL PROPERTIES

1. Solubilities of Inorganic and Organic Compounds – H. Stephen and T. Stephen, Macmillan, New York, 1963, Vol. 1, Part 1.

2. The Critical Constants of Organic Compounds – A.P. Kudchadker, G.H. Alani and B.J. Zwolinski, *Chemical Reviews*, **68**,659 (1968).

3. Physical Properties of Hydrocarbons – Vol. 1 (1968) and Vol. 2 (1970), R.W. Gallant, Gulf Publishing Co., Houston, Texas.

4. International Critical Tables – McGraw-Hill, New York, 1926.

5. Handbook of Chemistry and Physics – R.C. Weast (ed.), 53rd edition, CRC Publishing Co., Cleveland, Ohio, 1972.

6. The Properties of Gases and Liquids – R.C. Reid and T.K. Sherwood, 2nd edition, McGraw-Hill, New York, 1966.

7. Thermal Conductivity of Gases and Liquids – N.V. Tsederberg, MIT Press, Cambridge, Mass., 1965.

8. Lange's Handbook of Chemistry – N.A. Lange, 10th edition, McGraw-Hill, New York, 1969.

9. The Chemical Thermodynamics of Organic Compounds – D.R. Stull, et al., Wiley, New York, 1969.

10. Matheson Gas Data Book – 4th edition, Matheson Co., Inc., 1966.

11. Physical Properties of Chemical Compounds – Vol. 1 (1955), Vol. 2 (1959), and Vol. 3 (1961), R.R. Dreisbach, American Chemical Society, Washington, D.C.

12. Beilsteins Handbuch der Organischen Chemie – Springer, Berlin, Germany.
13. Gmelins Handbuch der Anorganischen Chemie – Verlag Chemie, Weinheim, Germany.
14. Solubilities of Inorganic and Organic Compounds – 3rd edition and supplement, A. Seidell and W.F. Linke, Van Nostrand, New York, 1941-1952.
15. Selected Values of Physical and Thermodynamic Properties of Hydrocarbons and Related Compounds, – F.D. Rossini, et al., American Petroleum Institute Project 44, American Petroleum Institute, Pittsburgh, Pa., 1953.
16. Heat of Combustion and Formation of Organic Compounds – E.S. Domalski, *Journal of Physical and Chemical Reference Data*, **1**, 221 (1972).
17. Surface Tension of Pure Liquid Compounds – J.L. Jasper, *J. Phys. Chem. Ref. Data*, **1**, 841 (1972).
18. JANAF Thermochemical Tables – NSRDS-NBS-37 (1970); 1974 Supplement and complete index, *J. Phys. Chem. Ref. Data*, **3**, 311 (1974).
19. Physical and Thermodynamic Properties of Aliphatic Alcohols – R.C. Wilhoit and B. J. Zwolinski, *J. Phys. Chem. Ref. Data*, **2** (1973), Supplement 1.
20. Critical Constants of Hydrocarbons – C. A. Passut and R. P. Danner, *Ind. Eng. Chem., Proc. Des. Devel.*, **12**, 365 (1973).

11. CHEMICAL-SPECIFIC INFORMATION

AAD

ACETALDEHYDE

Common Synonyms Acetic aldehyde Ethanal	Watery liquid Colorless Sharp fruity odor Floats and mixes with water. Flammable, irritating vapor is produced. Boiling point is 69°F.
Fire	FLAMMABLE. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Vapor is heavier than air.
Exposure	VAPOR Irritating to eyes, nose and throat. If inhaled, will cause nausea, vomiting, headache, difficult breathing, or loss of consciousness. LIQUID Will burn skin and eyes. Harmful if swallowed. HAZARDOUS TO AQUIATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes.
Water Pollution	HARMFUL TO AQUIATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes.
1. RESPONSE TO DISCHARGE (See Response Codes Handbook CG 446-4) Issue warning of high flammability. Downwind and flash.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Acetic aldehyde Ethanal Ethyl aldehyde 3.2 Coast Guard Compatibility Classification: Aldehyde 3.3 Chemical Formula: CH ₃ CHO 3.4 IMCO United Nations Numerical Designation: 1.1, 1000	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Penetrating, fruity, sharp pungent
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Rubber gloves, eye goggles, and other equipment to prevent any contact with body. Organic vapor or air pack as required. 5.2 Symptoms Following Exposure: If breathing vapors will be irritating and may cause nausea, vomiting, headache, and unconsciousness. Contact with eyes may cause burns. Skin contact from cleaning w/ w/ chemical causes burns or severe irritation. 5.3 Treatment for Exposure: INHALATION: Remove victim to fresh air. If breathing has stopped give artificial respiration. If breathing is difficult give oxygen call a physician at once. SKIN: Wash with soap and water. EYES: Flush with water. 5.4 Toxicity by Inhalation (Threshold Limit Value): 100 ppm 5.5 Short-Term Inhalation Limits: 50 ppm for 60 min. 5.6 Toxicity by Ingestion: Grade 2 LD ₅₀ is 5 g/kg rat. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Vapor is moderately irritating such that personnel working usual conditions at moderate or high concentrations. 5.9 Liquid or Solid Irritant Characteristics: Minor irritant. If splashed on clothing and allowed to remain may cause smarting and reddening of the skin. 5.10 Odor Threshold: 0.21 ppm	

6. FIRE HAZARDS 6.1 Flash Point: -36°F (C) -54°F (C) 6.2 Flammable Limits in Air: 4 - 60% 6.3 Fire Extinguishing Agents: Dry chemical, alcohol foam, carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective. 6.5 Special Hazards of Combustion Products: Produces irritating vapor when heated. 6.6 Behavior in Fire: Vapors are heavier than air and may travel a considerable distance to a source of ignition and flash back. 6.7 Ignition Temperature: 36°F 6.8 Electrical Hazard: Class I Group C. 6.9 Burning Rate: 13 mm/min.	8. WATER POLLUTION 8.1 Aquatic Toxicity: 10 ppm/96 hr. sunfish 11 m. fresh water 70 ppm/24 hr. perch 11 m. salt water 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): 93 - 12% 5 days 8.4 Food Chain Concentration Potential: None																																				
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: No reaction. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent. 7.5 Polymerization: May occur. Avoid heat, dust, strong oxidizing or reducing substances, strong acids and bases. 7.6 Inhibitor of Polymerization: None.	9. SELECTED MANUFACTURERS 1. Celanese Corp. Celanese Chemical Co. REVISED 1978

AAC	ACETIC ACID
-----	-------------

Chemical Data Sheet Glacial acetic acid Ethanoic acid Vinegar acid	Watery liquid Colorless Strong vinegar odor
Sinks and mixes with water. Irritating vapor is produced. Freezing point is 62° F.	
Fire	Combustible Vapor may explode if ignited in an enclosed area. Will burn vigorously in air. Extinguish with water, carbon dioxide, or foam.
Exposure	CAUSE FOR MEDICAL ATTENTION VAPOR Irritating to nose and throat. If inhaled, will cause coughing, nausea, vomiting, or difficult breathing. LIQUID OR SOLID Will burn skin and eyes. Harmful if swallowed. First aid: If in eyes, wash with plenty of water. If inhaled, get to fresh air. If swallowed, do not induce vomiting. Seek medical attention.
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning, corrosive. Disperse and flush.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Ethanoic acid Glacial acetic acid Vinegar acid 3.2 Coast Guard Compatibility Classification: Organic acid 3.3 Chemical Formula: CH₃COOH 3.4 IMCO United Nations Numerical Designation: 1.1 (142)	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Characteristic vinegar, pungent vinegar-like sharp
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Protective clothing should be worn when skin contact might occur. Respiratory protection necessary when exposed to vapors. Eye protection. 5.2 Symptoms Following Exposure: Breathing of vapors causes coughing, chest pain, and irritation of nose and throat may cause nausea and vomiting. Contact with skin may cause severe burn. 5.3 Treatment for Exposure: INHALATION: move victim to fresh air. Breathing become difficult give oxygen. Get medical care quickly. INGESTION: if victim is conscious, have him drink water or milk. do NOT induce vomiting. SKIN OR EYE CONTACT: flush immediately with plenty of clean running water. Wash eyes for at least 15 min. and get medical care as quickly as possible. Remove contaminated clothing and launder before reuse. 5.4 Toxicity by Inhalation (Threshold Limit Value): 10 ppm 5.5 Short-Term Inhalation Limits: 40 ppm for 5 min. 5.6 Toxicity by Ingestion: Grade 2 (EPA 505.9-6 Agreement) 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause moderate to severe irritation to mucous membranes and find high concentrations unpleasant. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Liquid severe skin irritant. May cause pain and second degree burns after a few minutes of contact. 5.10 Odor Threshold: 1.0 ppm	

6 FIRE HAZARDS 61 Flash Point: 112°F (40°C) 62 Flammable Limits in Air: 4.2 - 16.0% 63 Fire Extinguishing Agents: Water, alcohol foam, dry chemical or carbon dioxide 64 Fire Extinguishing Agents Not to be Used: None 65 Special Hazards of Combustion Products: Irritating vapor generated when heated 66 Behavior in Fire: Not pertinent 67 Ignition Temperature: Stable 68 Electrical Hazard: Not pertinent 69 Burning Rate: 1.6 mm/min	8 WATER POLLUTION 81 Aquatic Toxicity: 10 ppm 96 hr. Daphnia 11 hr. Fresh water; 10 ppm 96 hr. Daphnia 11 hr. Fresh water; 100 330 ppm 48 hr. shrimp 15% acrated water 82 Waterfowl Toxicity: Not pertinent 83 Biological Oxygen Demand (BOD): 52, 62, 5 days 84 Food Chain Concentration Potential: None noted																																				
7. CHEMICAL REACTIVITY 71 Reactivity with Water: No reaction 72 Reactivity with Common Materials: Corrosive, particularly when diluted. Attacks most common metals including most stainless steels. Excellent solvent for many synthetic resins or rubber. 73 Stability During Transport: Stable 74 Neutralizing Agents for Acids and Caustics: Dilute with water; rinse with sodium bicarbonate solution 75 Polymerization: Not pertinent 76 Inhibitor of Polymerization: Not pertinent	9 SELECTED MANUFACTURERS 1. ACA

ACETIC ANHYDRIDE

Common Synonyms Ethanoic anhydride	Watery liquid Colorless Strong vinegar odor Sinks and reacts slowly with water. Irritating vapor is produced.
Fire	Combustible: Vapor may explode if ignited in an enclosed area.
Exposure	VAPOR: Will burn eyes. Irritating to nose and throat. If inhaled, will cause nausea, vomiting, or difficult breathing. LIQUID: Will burn skin and eyes. Harmful if swallowed.
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS. May be dangerous if it enters water intakes.
1. RESPONSE TO DISCHARGE (See Response Materials Handbook, CG 445-4) Issue warning, contain, and dispose and flush.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Ethanoic anhydride 3.2 Coast Guard Competibility Classification: Organic anhydride 3.3 Chemical Formula: CH ₃ COOCH ₃ 3.4 FMCO United Nations Numerical Designation: 140215	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Very strong, pungent, vinegar-like character.
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Protective clothing when skin contact might occur; respiratory protection equipment for all exposures; complete eye protection. 5.2 Systems Following Exposure: Liquid is irritant and causes skin irritation. Ingestion causes severe burns when clothing is wet with the chemical or if it enters the mouth. Nausea and vomiting may develop after exposure. 5.3 Treatment for Exposure: INHALATION: Move victim to fresh air. If breathing becomes difficult, give oxygen per medical advice quickly. INGESTION: do NOT induce vomiting. SKIN OR EYE CONTACT WITH LIQUID OR VAPOR: Flush immediately with plenty of clean running water. Wash eyes for at least 15 min. and get medical attention. 5.4 Toxicity by Inhalation (Threshold Limit Value): ppm 5.5 Short-Term Inhalation Limit: Data not available. 5.6 Toxicity by Ingestion: Toxic if it enters the stomach. 5.7 Late Toxicity: Not pertinent. 5.8 Vapor (Gas) Irritant Characteristics: Vapor is moderately irritating to the respiratory tract at levels above moderate to high vapor concentrations. 5.9 Liquid or Solid Irritant Characteristics: Liquid is severely irritant to the skin and causes severe burns after a few minutes of contact. 5.10 Odor Threshold: 0.1 ppm	

6. FIRE HAZARDS

- 6.1 **Flash Point:** 146°F (6°C) 120°F (50°C)
 5.2 **Flammable Limits in Air:** 2% - 10.0%
 6.3 **Fire Extinguishing Agents:** Water spray, dry chemical, alcohol foam, or carbon dioxide.
 6.4 **Fire Extinguishing Agents Not to be Used:** Water and foam react, but heat liberated is not enough to create a hazard. Dry chemical forced below the surface can cause foaming, and bubbling.
 6.5 **Special Hazards of Combustion Products:** Irritating vapors are generated when heated.
 6.6 **Behavior in Fire:** Not pertinent.
 6.7 **Ignition Temperature:** 640°F
 6.8 **Electrical Hazard:** Not pertinent.
 6.9 **Burning Rate:** 4.3 cm/min.

7. CHEMICAL REACTIVITY

- 7.1 **Reactivity with Water:** Reacts slowly with water; considerable heat liberated when water spray is used.
 7.2 **Reactivity with Common Materials:** Corrosive to steel and other metals.
 7.3 **Stability During Transport:** Stable.
 7.4 **Neutralizing Agents for Acids and Caustics:** Dilute with water; use sodium bicarbonate solution to treat.
 7.5 **Polymerization:** Not pertinent.
 7.6 **Inhibitor of Polymerization:** Not pertinent.

8. WATER POLLUTION

- 8.1 **Aquatic Toxicity:** 50 ppm 96 hr; bluegill; 1 mg/l for 96 hr; 100 mg/l for 48 hr; shrimp; 10 mg/l for 96 hr.
 8.2 **Waterfowl Toxicity:** Not pertinent.
 8.3 **Biological Oxygen Demand (BOD):** 5% 15 days.
 8.4 **Food Chain Concentration Potential:** None noted.

9. SELECTED MANUFACTURERS

1. Celanese Corp.
 Celanese Chemical Co., Inc.
 245 Park Ave.
 New York, N.Y. 10017
 2. Eastman Kodak Co.
 Eastman Eastman Co., Inc.
 Kingsport, Tenn. 37662
 3. Eastman Kodak Corp.
 Chemicals and Plastics Div.
 270 Park Ave.
 New York, N.Y. 10017

10. SHIPPING INFORMATION

- 10.1 **Gross or Purity:** Pure 99.9% min.
 Technical 99.9% min.
 10.2 **Storage Temperature:** Ambient.
 10.3 **Inert Atmosphere:** No requirement.
 10.4 **Venting:** Pressure required.

11. HAZARD ASSESSMENT CODE

From the hazard assessment codebook: 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 226, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 290, 291, 292, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 323, 324, 325, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 463, 464, 465, 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 611, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683, 684, 685, 686, 687, 688, 689, 690, 691, 692, 693, 694, 695, 696, 697, 698, 699, 700, 701, 702, 703, 704, 705, 706, 707, 708, 709, 710, 711, 712, 713, 714, 715, 716, 717, 718, 719, 720, 721, 722, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751, 752, 753, 754, 755, 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 769, 770, 771, 772, 773, 774, 775, 776, 777, 778, 779, 780, 781, 782, 783, 784, 785, 786, 787, 788, 789, 790, 791, 792, 793, 794, 795, 796, 797, 798, 799, 800, 801, 802, 803, 804, 805, 806, 807, 808, 809, 810, 811, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, 826, 827, 828, 829, 830, 831, 832, 833, 834, 835, 836, 837, 838, 839, 840, 841, 842, 843, 844, 845, 846, 847, 848, 849, 850, 851, 852, 853, 854, 855, 856, 857, 858, 859, 860, 861, 862, 863, 864, 865, 866, 867, 868, 869, 870, 871, 872, 873, 874, 875, 876, 877, 878, 879, 880, 881, 882, 883, 884, 885, 886, 887, 888, 889, 890, 891, 892, 893, 894, 895, 896, 897, 898, 899, 900, 901, 902, 903, 904, 905, 906, 907, 908, 909, 910, 911, 912, 913, 914, 915, 916, 917, 918, 919, 920, 921, 922, 923, 924, 925, 926, 927, 928, 929, 930, 931, 932, 933, 934, 935, 936, 937, 938, 939, 940, 941, 942, 943, 944, 945, 946, 947, 948, 949, 950, 951, 952, 953, 954, 955, 956, 957, 958, 959, 960, 961, 962, 963, 964, 965, 966, 967, 968, 969, 970, 971, 972, 973, 974, 975, 976, 977, 978, 979, 980, 981, 982, 983, 984, 985, 986, 987, 988, 989, 990, 991, 992, 993, 994, 995, 996, 997, 998, 999, 1000.

13. PHYSICAL AND CHEMICAL PROPERTIES

- 13.1 **Physical State at 15°C and 1 atm:** Liquid.
 13.2 **Molecular Weight:** 102.09.
 13.3 **Boiling Point at 1 atm:** 140.1°C = 284.2°F = 412.3 K.
 13.4 **Freezing Point:** -100.1°C = -148.2°F = 173.1 K.
 13.5 **Critical Temperature:** 304.1°C = 579.4°F = 577.3 K.
 13.6 **Critical Pressure:** 47.9 atm = 48.2 atm = 4.82 MN/m².
 13.7 **Specific Gravity:** 1.08 at 20°C (liquid).
 13.8 **Liquid Surface Tension:** Not pertinent.
 13.9 **Liquid-Water Interfacial Tension:** Not pertinent.
 13.10 **Vapor (Gas) Specific Gravity:** Not pertinent.
 13.11 **Ratio of Specific Heats of Vapor (Gas):** 1.09.
 13.12 **Latent Heat of Vaporization:** 114 Btu/lb = 26.2 cal/g = 277 J/g = 107 J/mol.
 13.13 **Heat of Combustion:** -1795 Btu/lb = -81.5 cal/g = -341 J/g = -132 J/mol.
 13.14 **Heat of Decomposition:** Not pertinent.
 13.15 **Heat of Solution:** Not pertinent.
 13.16 **Heat of Polymerization:** Not pertinent.

NOTES

REVISED 1978

ACT

ACETONE

Common Synonyms Dimethyl Ketone Propanone	Watery liquid Colorless Sweet odor Floats and mixes with water. Flammable, irritating vapor is produced.
Fire	FLAMMABLE Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area.
Exposure	CALL FOR MEDICAL AID VAPOR Irritating to eyes, nose and throat. If inhaled, may cause difficult breathing or loss of consciousness. LIQUID Irritating to eyes. Not irritating to skin.
Water Pollution	Dangerous to aquatic life in high concentrations. May be dangerous if it enters water intakes.
1. RESPONSE TO DISCHARGE See Response Methods Handbook, CG 444-1. Avoid warhead. High flammability. Dispose as usual.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Dimethyl ketone 2 Propanone 3.2 Coast Guard Compatibility Classification: None 3.3 Chemical Formula: <chem>CH3COCH3</chem> 3.4 IMCO United Nations Numerical Designation: 1101	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Sweetish, pleasant, sometimes sharp, pungent, sharp, penetrating, cooling, sometimes pleasant, sometimes pungent.
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Organic vapor canister or a self-supplied mask, synthetic rubber gloves, chemical safety goggles or face splash shield. 5.2 Symptoms Following Exposure: INHALATION: vapor irritating to eyes and mucous membranes; acts as an anesthetic in very high concentrations. INGESTION: a wide variety of toxicities but very irritating to mucous membranes. SKIN: prolonged excessive contact causes defatting of the skin, possibly leading to dermatitis. 5.3 Treatment for Exposure: INHALATION: if victim is overcome, remove to fresh air and call a physician. INGESTION: if victim has swallowed large amounts and is conscious and not having convulsions, induce vomiting and get medical help promptly. No specific antidote known. SKIN: wash well with water. EYES: flush with water immediately for at least 15 min. Consult a physician. 5.4 Toxicity by Inhalation (Threshold Limit Value): 100 ppm 5.5 Short-Term Inhalation Limits: 1000 ppm for 30 min 5.6 Toxicity by Ingestion: Grade I (Dose 10 g/kg) 5.7 Oral Toxicity: Not pertinent. 5.8 Vapor (Gas) Irritant Characteristics: If present in high concentrations, vapors cause moderate irritation of the eye or respiratory system. Effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: No appreciable hazard. Practically harmless to the skin because it is very volatile and evaporates quickly from the skin. 5.10 Odor Threshold: 100 ppm	

6. FIRE HAZARDS 6.1 Flash Point: 47°F (11°C) 6.2 Flammable Limits in Air: 2.5% - 12.5% 6.3 Fire Extinguishing Agents: Alcohol foam, dry chemical, carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Water in straight hose stream will wet and spread fire and should not be used. 6.5 Special Hazards of Combustion Products: Not pertinent. 6.6 Behavior in Fire: Not pertinent. 6.7 Ignition Temperature: 500°F 6.8 Electrical Hazard: Class I, Group D. 6.9 Burning Rate: Moderate.	8. WATER POLLUTION 8.1 Aquatic Toxicity: 4250 ppm, 24 hr; 5000 ppm, 96 hr; 1000 ppm, 48 hr; 2000 ppm, 144 hr; turbid water. 8.2 Waterway Toxicity: Not pertinent. 8.3 Biological Oxygen Demand (BOD): Theoretical 125% in 5 days. 8.4 Food Chain Concentration Potential: None noted.																																				
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: Not reactive. 7.2 Reactivity with Common Materials: Not reactive. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9. SELECTED MANUFACTURERS Allied Chemical Corp. Specialty Chemicals Div. Wilmington, Delaware Marcus Hook, Pa. 19381 2. Shell Chemical Co. Industrial Chemicals Div. Houston, Texas 77001 3. Union Carbide Corp. Chemicals and Plastics Div. 270 Park Ave. New York, N.Y. 10017																																				
11. HAZARD ASSESSMENT CODE See Hazard Assessment Handbook, CG 444-2. VP000	10. SHIPPING INFORMATION 10.1 Grades or Purity: Technical: 99.95% plus 0.05% water Reagent: 99.95% plus 0.05% water 10.2 Storage Temperature: Ambient 10.3 Inert Atmosphere: No requirement. 10.4 Venting: Open flame arrested or pressure vacuum.

REVISED 1978

ACY	ACETONE CYANOHYDRIN
------------	------------------------------

Common Synonyms: 2-Methyl lactonitrile Alpha-hydroxy nitrile	Waters: liquid Colorless Mild almond odor	Floats and mixes with water. Poisonous vapor is produced.
AVOID CONTACT WITH LIQUID AND VAPOR. KEEP PEOPLE AWAY. Wear chemical protective suit with self-contained breathing apparatus. Stop discharge if possible. Stop operation and use water spray to knock down vapor. Call fire department. Isolate and secure discharge material. Notify authorities with appropriate agency.		
Fire	Combustible POISONOUS GASES ARE PRODUCED WHEN HEATED Vapor may explode if ignited in an enclosed area. WEAR CHEMICAL PROTECTIVE SUIT WITH SELF-CONTAINED BREATHING APPARATUS. Combustible in solid, liquid, and vapor phase and oxidation. Extinguish with water. If burning in shell, use water to break shell. Exposed containers with water.	
 Exposure	CAUTION: MEDIUM VAPOR POISONOUS IF INHALED Irritating to eyes, nose and throat. More: Irritant. If breathing has stopped, give artificial respiration. If breathing is difficult, use oxygen. LIQUID POISONOUS IF SWALLOWED Will burn skin and eyes. Remove contaminated clothing. Wash with plenty of water. DO NOT ALLOW SWALLOWED LIQUID TO BE CONSIDERED SAFE (victim drinks water, milk, and has vomited). IF SWALLOWED AND VICTIM IS UNCONSCIOUS OR HAVING CONVULSIONS, DO NOT INDUCE VOMITING.	
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes. Signs of health of wildlife. Effects. Notify pertinent authority with release.	
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Two warning: poison. Restrict access. Should be removed: human toxicity.		
2. LABEL  POISON		
3. CHEMICAL DESIGNATIONS 31 Synonyms: alpha-Hydroxy nitrile; 2-Methyl lactonitrile 32 Coast Guard Compatibility Classification: Cyanohydrin 33 Chemical Formula: (CH₃)₂C(OH)CN 34 IMCO/United Nations Numerical Designation: 6.1 1541		
4. OBSERVABLE CHARACTERISTICS 41 Physical State (as shipped): liquid 42 Color: colorless 43 Odor: characteristic, distinct, strong cyanide.		
5. HEALTH HAZARDS 51 Personal Protective Equipment: Air supplied mask with canister, approved respirator with acrylonitrile, in less than 2% concentrations; rubber or plastic gloves; cover goggles or face mask; rubber boots; slicker suit; safety helmet. 52 Symptoms Following Exposure: At low dosages the earliest symptoms may be weakness, headaches, confusion and occasionally nausea and vomiting. Respiratory rate and depth will usually be increased at the beginning and at later stages become slow and easing. 53 Treatment for Exposure: Call a physician for all cases of exposure. INHALATION: remove victim to fresh air. (Rescuer should wear suitable risk.) INGESTION: if victim is conscious, induce vomiting by having him drink strong salt water. SKIN: remove contaminated clothing and wash affected skin thoroughly with soap and water. EYES: hold eyelids apart and wash with continuous gentle stream of water for at least 15 min. If breathing has stopped, give artificial respiration until physician arrives. If victim is unconscious, administer and ventilate by crushing an ampule of ethyl and holding it under his nose for 15 seconds, in every minute. Do not interrupt artificial respiration during this procedure. Replace ampule when its strength is spent. Continue treatment until victim's condition improves or physician arrives. 54 Toxicity by Inhalation (Threshold Limit Value): Data not available. 55 Short-Term Inhalation Limits: Data not available. 56 Toxicity by Ingestion: Grade 4 below 50 mg/kg (mice). 57 Late Toxicity: Causes liver damage in rats. 58 Vapor (Gaseous) Irritant Characteristics: Vapors irritate the eyes and respiratory system if present in high concentrations. The effect is temporary. (Continued on page 4)		

6. ATN

ACETONITRILE

Common Synonyms: Methyl cyanide Cyanoacetaldehyde Ethane nitrile	Watery liquid Colorless Sweet odor Floats and mixes with water. Flammable, irritating vapor is produced.
Fire	FLAMMABLE POISONOUS GASES MAY BE PRODUCED WHEN HEATED Flashback along vapor trail may occur Vapor may explode if ignited in an enclosed area
Exposure	VAPOR Irritating to eyes, nose and throat If inhaled, will cause difficult breathing LIQUID Irritating to skin and eyes Harmful if swallowed
Water Pollution	Dangerous to aquatic life in high concentrations May be dangerous if it enters water intakes
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning - high flammability. Dispense and flush.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Ethane nitrile Ethyl nitrile Cyanoacetaldehyde Methyl cyanide 3.2 Coast Guard Compatibility Classification: Nitrile 3.3 Chemical Formula: CH_3CN 3.4 IMCO/United Nations Numerical Designation: 6.1, 1645	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Sweet, ethereal
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Wear self-contained breathing apparatus. 5.2 Symptoms Following Exposure: Exposure to 100 ppm for 4 hours causes flushing of the face and a feeling of constriction in the chest. 500 ppm for brief periods is irritating to the nose and throat. Severe exposures cause irritability, skin eruptions, confusion, delirium, convulsions, paralysis and death due to central nervous system depression. 5.3 Treatment for Exposure: Remove victim from contaminated atmosphere. Give artificial respiration and oxygen if respiration is impaired. 5.4 Toxicity by Inhalation (Threshold Limit Value): 40 ppm 5.5 Short-Term Inhalation Limits: 40 ppm for 60 min 5.6 Toxicity by Ingestion: (Grade 3-5) 500 mg/kg (guinea pig) 5.7 Late Toxicity: Not pertinent 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause a slight smarting of the eyes or respiratory system if present in high concentrations. Effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain may cause smarting and red dening of the skin. 5.10 Odor Threshold: 4 ppm	

6. FIRE HAZARDS 6.1 Flash Point: 42°F (0°C) 6.2 Flammable Limits in Air: 4.4% - 16% 6.3 Fire Extinguishing Agents: Alcohol foam, dry chemical, carbon dioxide 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective 6.5 Special Hazards of Combustion Products: Toxic vapors are generated when heated 6.6 Behavior in Fire: Vapor heavier than air and may travel a considerable distance to a source of ignition and flash back 6.7 Ignition Temperature: 975°F 6.8 Electrical Hazard: Not pertinent 6.9 Burning Rate: 2" min/min	8. WATER POLLUTION 8.1 Aquatic Toxicity: 1150 ppm/24 hr. Fathead minnow, 11 m hard water 8.2 Waterfowl Toxicity: Not pertinent 8.3 Biological Oxygen Demand (BOD): 1/5 days 8.4 Food Chain Concentration Potential: None noted

REVISED 1978

REVISED 1978

ATA

ACETYLACETONE

Common Synonyms 2,4-Pentanedione Diacetyl methane		Liquid Colorless Unpleasant Odor
		Floats and mixes slowly with water. Flammable, irritating vapor is produced.
Short ignition sources. Call fire department. Stop discharge if possible. Keep people away. Avoid contact with liquid and vapor. Notify local health and pollution control agencies.		
Fire	Combustible Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Wear goggles and self-contained breathing apparatus. Extinguish with dry chemicals or alcohol foam. Carbon dioxide water may be ineffective. Do not use water spray. Do not mix with water.	
Exposure	CALL FOR MEDICAL AID VAPOR Irritating to eyes. If inhaled will cause dizziness, coughing, headache, or loss of consciousness. If on eyes, flush with plenty of water. If on clothing, "trapped" at or near head respiration. If breathing is difficult, give oxygen. LIQUID Irritating to skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED, do not induce VOMITING. IF UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.	
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and pollution control agencies. Notify water treatment plant.	
1 RESPONSE TO DISCHARGE (See Response Methods Handbook CG 444-4.) Issue warning - water contaminant. Disperse and flush.		2. LABELS No hazard label required by Code of Federal Regulations.
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Diacetyl methane 2,4-Pentanedione 3.2 Coast Guard Compatibility Classification: Not listed. 3.3 Chemical Formula: $\text{CH}_3\text{COCH}_2\text{COCH}_3$ 3.4 IMCO/United Nations Numerical Designation: Not listed.		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Water white 4.3 Odor: Unpleasant
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Safety glasses, eye bath and safety shower, air supplied mask for concentrations above 2%. 5.2 Symptoms Following Exposure: Inhalation causes dizziness, headache, nausea, vomiting and loss of consciousness. Contact with liquid irritates eyes. 5.3 Treatment for Exposure: INHALATION: remove to fresh air; if victim is not breathing, give artificial respiration and then oxygen; call a physician. EYES or SKIN: flush with water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 2, oral $\text{LD}_{50} = 1,000 \text{ mg/kg (rat)}$. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.		

6. FIRE HAZARDS

- 6.1 **Flash Point:** 105°F (30°C) 93°F (34°C)
 6.2 **Flammable Limits in Air:** 2.4% - 11.6%
 6.3 **Fire Extinguishing Agents:** Dry chemical, alcohol foam, carbon dioxide.
 6.4 **Fire Extinguishing Agents Not to be Used:** Water may be ineffective on fire.
 6.5 **Special Hazards of Combustion Products:**
 6.6 **Behavior in Fire:** Vapor is heavier than air and may travel to a source of ignition and flash back.
 6.7 **Ignition Temperature:** 643°F
 6.8 **Electrical Hazard:** Data not available.
 6.9 **Burning Rate:** 3.6 mm/min.

7. CHEMICAL REACTIVITY

- 7.1 **Reactivity with Water:** No reaction.
 7.2 **Reactivity with Common Materials:** May dissolve plastics.
 7.3 **Stability During Transport:** Stable.
 7.4 **Neutralizing Agents for Acids and Caustics:** Not pertinent.
 7.5 **Polymerization:** Not pertinent.
 7.6 **Inhibitor of Polymerization:** Not pertinent.

8. WATER POLLUTION

- 8.1 **Aquatic Toxicity:** Data not available.
 8.2 **Waterfowl Toxicity:** Data not available.
 8.3 **Biological Oxygen Demand (BOD):** Data not available.
 8.4 **Food Chain Concentration Potential:** None.

9. SELECTED MANUFACTURERS

1. Union Carbide Corp.
 Chemicals and Plastics Div.
 270 Park Avenue
 New York, N.Y. 10017
 2. Aldrich Chemical Co.
 940 W. Saint Paul Ave.
 Milwaukee, Wis. 53233
 3. Eastman Organic Chemicals
 343 State Street
 Rochester, N.Y. 14650

10. SHIPPING INFORMATION

- 10.1 **Grade or Purity:** Commercial.
 10.2 **Storage Temperature:** Ambient.
 10.3 **Inert Atmosphere:** No requirement.
 10.4 **Venting:** Open (flame arrester).

11. HAZARD ASSESSMENT CODE

(See Hazard Assessment Handbook CG 444-3.)
 A P G

12. HAZARD CLASSIFICATIONS

- 12.1 **Code of Federal Regulations:** Not listed.
 12.2 **NAS Hazard Rating for Bulk Water Transportation:** Not listed.
 12.3 **NFPA Hazard Classifications:**
- | Category | Classification |
|----------------------|----------------|
| Health Hazard (Blue) | 2 |
| Flammability (Red) | 2 |
| Reactivity (Yellow) | 0 |

13. PHYSICAL AND CHEMICAL PROPERTIES

- 13.1 **Physical State at 15°C and 1 atm:** Liquid.
 13.2 **Molecular Weight:** 100.12.
 13.3 **Boiling Point at 1 atm:**
 $244.7^\circ\text{F} = 140.4^\circ\text{C} = 413.6^\circ\text{K}$
 13.4 **Freezing Point:**
 $-10.3^\circ\text{F} = -23.5^\circ\text{C} = 249.7^\circ\text{K}$
 13.5 **Critical Temperature:** Not pertinent.
 13.6 **Critical Pressure:** Not pertinent.
 13.7 **Specific Gravity:** 0.975 at 20°C.
 13.8 **Liquid Surface Tension:**
 $31.2 \text{ dyne/cm} = 0.0312 \text{ N/m at } 20^\circ\text{C}$
 13.9 **Liquid-Water Interfacial Tension:** Not pertinent.
 13.10 **Vapor (Gas) Specific Gravity:** 3.45.
 13.11 **Ratio of Specific Heats of Vapor (Gas):** (est.) 1.072.
 13.12 **Latent Heat of Vaporization:**
 $194 \text{ Btu/lb} = 108 \text{ cal/g} = 4.52 \times 10^3 \text{ J/kg}$
 13.13 **Heat of Combustion:** -11,070 Btu/lb
 $= -6,150 \text{ cal/g} = -257 \times 10^3 \text{ J/kg}$
 13.14 **Heat of Decomposition:** Not pertinent.
 13.15 **Heat of Solution:** -11.5 Btu/lb
 $= -6.4 \text{ cal/g} = -0.27 \times 10^3 \text{ J/kg}$
 13.16 **Heat of Polymerization:** Not pertinent.

NOTES

ABM

ACETYL BROMIDE

Common Synonyms		Liquid	Colorless	Sharp unpleasant odor
Flammable, irritating vapor is produced				
AVOID CONTACT WITH LIQUID AND VAPOR. KEEF PROFFE AWAY VAPOR: If inhaled, get fresh air immediately. If in contact with skin, wash with water. If in contact with eyes, flush with water for at least 15 minutes. If in contact with clothing, remove clothing immediately. If in contact with hair, wash with water. If in contact with face, wash with water. If in contact with hands, wash with water. If in contact with feet, wash with water. If in contact with mouth, do not swallow. If in contact with nose, do not sniff. If in contact with ears, do not insert. If in contact with neck, do not touch. If in contact with back, do not scratch. If in contact with arms, do not rub. If in contact with legs, do not rub. If in contact with feet, do not rub.				
Fire	FLAMMABLE: Irritating gases are produced when heated Flashback along vapor trail may occur Vapor may explode if ignited in an enclosed area Weigh, seal, store, and dispose of in proper containers Do not use water on fire			
Exposure	VAPOR: Irritating to eyes, nose and throat If inhaled will cause difficult breathing If in eyes, hold eyes open and flush with plenty of water If in mouth, have victim spit out and drink water If in nose, have victim sniff water If in throat, have victim drink water If in lungs, have victim drink water LIQUID: Will burn skin and eyes Harmful if swallowed Remove contaminated clothing and shoes Flush affected areas with plenty of water If in EYES, hold eyes open and flush with plenty of water If SWALLOWED, have victim drink water If SWALLOWED and victim is UNCONSCIOUS, have victim drink water Do not induce vomiting			
Water Pollution	Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes Notify local health and welfare officials Notify appropriate water pollution agency			
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-1) Issue warning - corrosive Restrict access Evacuate area Disperse and flush		2. LABEL 		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: No common synonyms 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: CH3COBr 3.4 IMCO/United Nations Numerical Designation: 81716		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Acid and sharp		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Safety goggles, gloves, adequate ventilation provisions for flushing eyes or skin with water 5.2 Symptoms Following Exposure: Inhalation produces primary irritation of the respiratory tract. Symptoms of lung damage may be delayed. Contact with liquid produces primary irritation of eyes and severe skin damage. Delayed blistering is not uncommon. 5.3 Treatment for Exposure: INHALATION: remove victim from exposure; if breathing has stopped give artificial respiration, if breathing is difficult, give oxygen; watch for delayed lung damage. EYES: flush with water for at least 15 min.; get medical attention. SKIN: flush with water; treat burns as needed. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 2 oral rat LD50 = 3,310 mg/kg (acetic acid). Decomposes violently in water forming bismic acid and acetic acid. 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: 5.0 x 10^-4 ppm				

5. FIRE HAZARDS 6.1 Flash Point: Data not available 6.2 Flammable Limits in Air: Data not available 6.3 Fire Extinguishing Agents: Carbon dioxide, dry chemical 6.4 Fire Extinguishing Agents Not to be Used: Water 6.5 Special Hazards of Combustion Products: Toxic and irritating hydrogen bromide fumes may form in fires 6.6 Behavior in Fire: Do not apply water to adjacent fires. Reacts with water to produce toxic and irritating gases 6.7 Ignition Temperature: Data not available 6.8 Electrical Hazard: Data not available 6.9 Burning Rate: Data not available	8. WATER POLLUTION 8.1 Aquatic Toxicity: Data not available 8.2 Waterflow Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): Data not available 8.4 Food Chain Concentration Potential: None
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: Reacts violently forming corrosive and toxic fumes of hydrogen bromide 7.2 Reactivity with Common Materials: Attacks and corrodes wood and most metals in the presence of moisture. Flammable hydrogen gas may collect in enclosed spaces 7.3 Stability During Transport: Stable if protected from moisture 7.4 Neutralizing Agents for Acids and Caustics: Flood with water; rinse with dilute sodium bicarbonate or soda ash solution 7.5 Polymerization: Not pertinent 7.6 Inhibitor of Polymerization: Not pertinent	9. NOTES

ACC

ACETYL CHLORIDE

Common Synonyms		Liquid	Colorless	Sharp odor
		Reacts violently with water. Irritating visible vapor cloud is produced.		
See Response Methods Handbook, CG 448-1 True warning: high flammability, corrosive Restrict access Disperse and flush				
Fire		FLAMMABLE POISONOUS GASES ARE PRODUCED IN FIRE. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area.		
Exposure		VAPOR Irritating to eyes, nose and throat. If inhaled will cause difficult breathing. LIQUID Will burn skin and eyes. Harmful if swallowed.		
Water Pollution		Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes.		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 448-1)		2. LABEL		
True warning: high flammability, corrosive Restrict access Disperse and flush				
3. CHEMICAL DESIGNATIONS		4. OBSERVABLE CHARACTERISTICS		
3.1 Synonyms: No common synonyms 3.2 Coast Guard Competibility Classification: Not applicable 3.3 Chemical Formula: <chem>CH3COCl</chem> 3.4 IMCO/United Nations Numerical Designation: N-1717		4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Pungent		
5. HEALTH HAZARDS				
5.1 Personal Protective Equipment: Safety goggles, rubber or plastic gloves, self-contained breathing apparatus 5.2 Symptoms Following Exposure: Vapor irritates mucous membranes. Ingestion of liquid in contact with eyes or skin causes severe irritation 5.3 Treatment for Exposure: INHALATION: remove from exposure, seek medical attention. EYES: flush with copious amounts of water. SKIN: flush with copious amounts of water. INGESTION: give plenty of water; do NOT induce vomiting 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Readily hydrolyzes to form hydrochloric and acetic acids. Oral human LD₅₀ = 1470 mg/kg (acetic acid). Grade 2 oral rat LD₅₀ = 3310 mg/kg (acetic acid) 5.7 Late Toxicity: None 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause severe irritation of eyes and throat and can cause eye and lung injury. They cannot be tolerated even at low concentrations 5.9 Liquid or Solid Irritant Characteristics: Severe skin irritant. Causes second- and third-degree burns on short contact and is very injurious to the eyes 5.10 Odor Threshold: Acetic acid: 1 ppm; hydrochloric acid: 1 ppm				

6. FIRE HAZARDS

- 6.1 Flash Point: 40°F (4°C)
 6.2 Flammable Limits in Air: Data not available.
 6.3 Fire Extinguishing Agents: Carbon dioxide, dry chemical.
 6.4 Fire Extinguishing Agents Not to be Used: Water, foam.
 6.5 Special Hazards of Combustion Products: When heated to decomposition, hydrogen chloride and phosgene, extremely poisonous gases, are evolved.
 6.6 Behavior in Fire: Vapor is heavier than air and may travel a considerable distance to a source of ignition and flash back.
 6.7 Ignition Temperature: 774°F
 6.8 Electrical Hazard: Data not available.
 6.9 Burning Rate: 2.6 mm/min.

7. CHEMICAL REACTIVITY

- 7.1 Reactivity with Water: Reacts vigorously with water, evolving hydrogen chloride fumes (hydrochloric acid).
 7.2 Reactivity with Common Materials: Is highly corrosive to most metals in the presence of moisture.
 7.3 Stability During Transport: Stable.
 7.4 Neutralizing Agents for Acids and Caustics: Following dilution with water, limestone or sodium bicarbonate can be used.
 7.5 Polymerization: Not pertinent.
 7.6 Inhibitor of Polymerization: Not pertinent.

8. WATER POLLUTION

- 8.1 Aquatic Toxicity: Data not available.
 8.2 Waterfowl Toxicity: Data not available.
 8.3 Biological Oxygen Demand (BOD): Data not available.
 8.4 Food Chain Concentration Potential: None.

13. PHYSICAL AND CHEMICAL PROPERTIES

- 13.1 Physical State at 15°C and 1 atm: Liquid.
 13.2 Molecular Weight: 78.5.
 13.3 Boiling Point at 1 atm: 124°F = 51°C = 324°K .
 13.4 Freezing Point: -170°F = -112°C = 161°K .
 13.5 Critical Temperature: (est.) 474°F = 246°C = 519°K .
 13.6 Critical Pressure: (est.) 445 psia = 57.4 atm = 4.83 MN/m².
 13.7 Specific Gravity: 1.029 at 20°C (liquid).
 13.8 Liquid Surface Tension: 26 dynes/cm = 0.026 N/m at 20°C .
 13.9 Liquid-Water Interfacial Tension: Not pertinent.
 13.10 Vapor (Gas) Specific Gravity: 3.
 13.11 Ratio of Specific Heats of Vapor (Gas): 1.146.
 13.12 Latent Heat of Vaporization: 160 Btu/lb = 88 cal/g = 1.1×10^5 J/kg.
 13.13 Heat of Combustion: -6,000 Btu/lb = -3,400 cal/g = -140×10^3 J/kg.
 13.14 Heat of Decomposition: Not pertinent.
 13.15 Heat of Solution: (est.) 54 Btu/lb = 30 cal/g = 1.1×10^5 J/kg.
 13.16 Heat of Polymerization: Not pertinent.

NOTES

ACE

ACETYLENE

Common Synonyms Ethyne Ethere	Compressed gas Colorless Mild garlic odor This flammable gas is slightly lighter than air and will disperse slowly unless confined
Fire	FLAMMABLE. Containers may explode in fire. Flashback along gas trail may occur. May explode if ignited in an enclosed area.
Exposure	GAS Not irritating to eyes, nose or throat. If inhaled will cause headache, difficult breathing or loss of consciousness.
Water Pollution	Not harmful to aquatic life
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: high flammability	2. LABEL 
3. CHEMICAL DESIGNATIONS 31 Synonyms: Ethyne Ethere 32 Coast Guard Compatibility Classification: Not applicable 33 Chemical Formula: C_2H_2 34 IMCO United Nations Numerical Designation: 201001	4. OBSERVABLE CHARACTERISTICS 41 Physical State (as shipped): Compressed gas 42 Color: Colorless 43 Odor: Distinctive garlic-like
5. HEALTH HAZARDS 51 Personal Protective Equipment: Air supplied respirator in areas of high concentration. Avoid all sources of ignition. 52 Symptoms Following Exposure: Headache, dizziness and loss of consciousness may occur. Death from asphyxiation may occur if oxygen content of the air is severely reduced by dilution with acetylene. 53 Treatment for Exposure: INHALATION: no specific antidote known; remove victim to fresh air; keep him warm and quiet and call doctor; recovery usually rapid. If patient is unconscious, administer oxygen if breathing has stopped; give artificial respiration. 54 Toxicity by Inhalation (Threshold Limit Value): 500 ppm (suggested) 55 Short-Term Inhalation Limits: 100,000 ppm for 30 - 60 min 56 Toxicity by Ingestion: Not pertinent 57 Late Toxicity: Not pertinent 58 Vapor (Gas) Irritant Characteristics: None 59 Liquid or Solid Irritant Characteristics: Not pertinent 510 Odor Threshold: Data not available	

6. FIRE HAZARDS 61 Flash Point: Gas 62 Flammable Limits in Air: 2.5% - 80% 63 Fire Extinguishing Agents: Stop flow of gas 64 Fire Extinguishing Agents Not to be Used: Carbon dioxide, dry chemical and water sprays are not generally recommended because the discharged gas or volatile liquid may create a more serious explosion hazard. 65 Special Hazards of Combustion Products: Not pertinent 66 Behavior in Fire: May explode in fire 67 Ignition Temperature: 581°F 68 Electrical Hazard: Class I, Group A 69 Burning Rate: Not pertinent	8. WATER POLLUTION 81 Aquatic Toxicity: 1000 cc/l. 1 hr. sunfish not killed; fresh water 82 Waterfowl Toxicity: Not pertinent 83 Biological Oxygen Demand (BOD): Not pertinent 84 Food Chain Concentration Potential: Not pertinent								
7. CHEMICAL REACTIVITY 71 Reactivity with Water: No reaction 72 Reactivity with Common Materials: Under certain conditions forms spontaneously explosive compounds with copper 73 Stability During Transport: Stable as shipped 74 Neutralizing Agents for Acids and Caustics: Not pertinent 75 Polymerization: Not pertinent 76 Inhibitor of Polymerization: Not pertinent	9. SELECTED MANUFACTURERS 1. Monoschem Inc. P.O. Box 488 Grismer, Louisiana 70734 2. Monsanto Co. Monsanto Polymers & Petrochemicals Co. 800 North Lindbergh Blvd. St. Louis, Mo. 63166 3. ACETYL PEROXIDE SOLUTION

Common Synonyms Diacetyl peroxide solution		Liquid	Colorless	Sharp odor
Sinks in water				
Fire		Combustible May explode on contact with combustibles. Containers may explode in fire		
Exposure		VAPOR Irritating to eyes, nose and throat LIQUID Irritating to skin and eyes Harmful if swallowed		
Water Pollution		Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: Spilling material a water contaminant Should be removed Chemical and physical treatment		2. LABEL 		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Diacetyl peroxide solution 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: CH3COOACCH3 (dimethyl peroxide) 3.4 IMCO/United Nations Numerical Designation: 1.2 (1.1)		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Pungent		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Protective goggles, rubber apron and gloves 5.2 Symptoms Following Exposure: Contact with liquid causes irritation to eyes and skin. Irritation of mucous membranes and stomach 5.3 Treatment for Exposure: EYES: wash with plenty of water; flush; seek medical aid. SKIN: wash with plenty of soap and water. INGESTION: induce vomiting; seek medical aid. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Data not available 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available				

6. FIRE HAZARDS 6.1 Flash Point: 114 F (40) 6.2 Flammable Limits in Air: Not pertinent 6.3 Fire Extinguishing Agents: Water dry chemical, carbon dioxide 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent 6.5 Special Hazards of Combustion Products: Not pertinent 6.6 Behavior in Fire: May explode. Burns with accelerating intensity 6.7 Ignition Temperature: Explodes 6.8 Electrical Hazard: Data not available 6.9 Burning Rate: Data not available	8. WATER POLLUTION 8.1 Aquatic Toxicity: Data not available 8.2 Waterfowl Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): Data not available 8.4 Food Chain Concentration Potential: None								
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: Not reactive 7.2 Reactivity with Common Materials: May ignite combustible materials such as wood 7.3 Stability During Transport: Heat and shock, severe accidents may separate at very low temperatures during transport 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent 7.5 Polymerization: Not pertinent 7.6 Inhibitor of Polymerization: Not pertinent	9. ACD

ACRIDINE

Common Synonyms Dibenz[b,e]pyridine 10-Azaanthracene Benzo[b]pyrene		Solid	Yellow	Weak irritating odor
Sinks in water				
A N N N				
Fire		Combustible POISONOUS GASES MAY BE PRODUCED IN FIRE Burns severely Irritating to eyes, nose and throat If inhaled will cause coughing or difficult breathing		
Exposure		DUST Irritating to eyes, nose and throat If inhaled will cause coughing or difficult breathing SOLID Irritating to skin and eyes Harmful if swallowed If swallowed, give artificial respiration if breathing is difficult, give oxygen. EYES: wash with copious amounts of water for 20 min., seek medical attention. SKIN: wash with large amounts of water for 20 min.		
Water Pollution		HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: water contaminant Mechanical containment Should be removed Chemical and physical treatment		2. LABELS No hazard label required by Code of Federal Regulations		
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: 10-Azaanthracene Benzo[b]pyridine Dibenz[b,e]pyridine 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: C ₁₇ H ₉ N 3.4 IMCO/United Nations Numerical Designation: Not listed		4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: Yellow 4.3 Odor: Weak, somewhat irritating		
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Dust respirator, chemical goggles, rubber gloves 5.2 Symptoms Following Exposure: Inhalation irritates respiratory system and causes sneezing, coughing, and vomiting. Contact with liquid irritates eyes, skin, and mucous membranes. At high temperature and during sun exposure, damage to the cornea, skin, and mucous membranes may occur following the liberation of acridine vapor. 5.3 Treatment for Exposure: INHALATION: remove victim to fresh air; if breathing has stopped, give artificial respiration; if breathing is difficult, give oxygen. EYES: wash with copious amounts of water for 20 min.; seek medical attention. SKIN: wash with large amounts of water for 20 min. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 2 oral rat LD ₅₀ = 1000 mg/kg 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available				

6. FIRE HAZARDS

- 6.1 **Flash Point:** Not pertinent (combustible solid)
 6.2 **Flammable Limits in Air:** Not pertinent
 6.3 **Fire Extinguishing Agents:** Water, foam, monoammonium phosphate, dry chemical
 6.4 **Fire Extinguishing Agents Not to be Used:** Carbon dioxide and other dry chemicals may not be effective
 6.5 **Special Hazards of Combustion Products:** Toxic oxides of nitrogen may form in fire
 6.6 **Behavior in Fire:** Sublimes before melting
 6.7 **Ignition Temperature:** Data not available
 6.8 **Electrical Hazard:** Not pertinent
 6.9 **Burning Rate:** Not pertinent

8. WATER POLLUTION

- 8.1 **Aquatic Toxicity:** 9.7 ppm/L perch kill/fresh water
 *Time period not specified
 8.2 **Wetland Toxicity:** Data not available
 8.3 **Biological Oxygen Demand (BOD):** Data not available
 8.4 **Food Chain Concentration Potential:** None

NOTES

ACROLEIN

Common Synonyms Acrolein de Acrylic aldehyde Allyl aldehyde Ethyl vinyl aldehyde 2-propenal Acrylaldehyde		Waters liquid Colorless to light yellow Sharp irritating odor	
Floats and mixes with water. Poisonous flammable vapor is produced.			
Fire		FLAMMABLE POISONOUS GASES ARE PRODUCED WHEN HEATED Containers may explode in fire Flashback along vapor trail may occur Vapor may explode if ignited in an enclosed area	
 Exposure		VAPOR POISONOUS IF INHALED Irritating to eyes, nose and throat LIQUID POISONOUS IF SWALLOWED Will burn eyes Irritating to skin	
Water Pollution		HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes.	
1. RESPONSE TO DISCHARGE (See Response Methods Handbook (CG 446-4) Issue warning - high flammability air contaminant Restrict access Evacuate area Disperse and flush		2. LABELS 	
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Acrolein de Acrylic aldehyde 2 Propenal Acrylaldehyde 3.2 Coast Guard Compatibility Classification: Aldehyde 3.3 Chemical Formula: C_3H_4O 3.4 IMCO/United Nations Numerical Designation: 311092		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: colorless to slightly yellow 4.3 Odor: Extremely sharp. Irritating or piercing. Detectable extremely irritating and pungent	
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Chemical safety goggles and face shield, self contained breathing apparatus, positive pressure hose mask, or three mask or industrial canister type gas mask, rubber safety shoes, clothing made of rubber or other impervious material. 5.2 Symptoms Following Exposure: Inhalation causes irritation of nose and throat, a feeling of pressure in the chest, and shortness of breath. Nausea and vomiting commonly occur. Loss of consciousness if exposure has been sufficiently great. Congestion in the chest may be present in serious amounts and fluid may collect in the lungs. In serious cases edema of severe exposure persons. Vapor also causes severe eye irritation (redness, weeping, and swelling of eyelids) liquid burns eyes, contact with skin causes reddening, blistering. Ingestion causes severe irritation of mouth and throat. 5.3 Treatment for Exposure: Keep patient warm. The victim may require artificial respiration if breathing apparatus is not available. INHALATION: remove patient to fresh air if breathing becomes difficult give oxygen. If breathing has stopped start artificial respiration. EYES: immediately flush with plenty of water for at least 5 min. If medical attention is not immediately available continue eye irrigation for another 24 min. period. If pain completion of the first 24 min. of irrigation is impossible wait 10 or 15 min. after an effective hypodermic eye anesthetic for relief of pain. No other treatments should be used unless ordered by the physician. SKIN: flush at once with large volumes of water. Wash thoroughly with soap and water. If eyes are irritated with water. INGESTION: have victim drink large amounts of water. Induce vomiting by sucking a finger down back of throat. Do not give water until able to tolerate it with glass of water. Keep patient warm and quiet. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.1 ppm			

6. FIRE HAZARDS		8. WATER POLLUTION	
6.1	Flash Point: $< 0^{\circ}F$ ($< -17^{\circ}C$)	8.1	Aquatic Toxicity: 0.08 ppm/24hr rainbow trout, fresh water 9.054 ppm/96 hr oyster, 100% salt water
6.2	Flammable Limits in Air: 2% - 11%	8.2	Waterfowl Toxicity: Data not available
6.3	Fire Extinguishing Agents: Foam, dry chemical, carbon dioxide	8.3	Biological Oxygen Demand (BOD): 33% 10 days
6.4	Fire Extinguishing Agents Not to be Used: Water may be ineffective	8.4	Food Chain Concentration Potential: None
6.5	Special Hazards of Combustion Products: Poisonous vapor of acrolein is formed from hot liquid	9. SELECTED MANUFACTURERS	
6.6	Behavior in Fire: Vapor is heavier than air and may travel a considerable distance to a source of ignition and flash back. Polymerization may take place and containers may explode in fire	1.	Union Carbide Corporation Chemicals and Plastics Division 270 Park Avenue New York, N.Y. 10017
6.7	Ignition Temperature: 453°F	2.	Shell Chemical Company Industrial Chemicals Division P.O. Box 2463 Houston, Texas 77001
6.8	Electrical Hazard: Data not available	10. SHIPPING INFORMATION	
6.9	Burning Rate: 3.8 mm/min	10.1	Grade or Purity: Industrial 92+%
7. CHEMICAL REACTIVITY		10.2	Storage Temperature: Ambient
7.1	Reactivity with Water: No reaction	10.3	Inert Atmosphere: No requirement
7.2	Reactivity with Common Materials: No reaction	10.4	Venting: Pressure/vacuum
7.3	Stability During Transport: Stable when inhibited	11. HAZARD ASSESSMENT CODE	
7.4	Neutralizing Agents for Acids and Caustics: Not pertinent	(See Hazard Assessment Handbook CG 446-3)	
7.5	Polymerization: Undergoes uncatalyzed polymerization reaction around 200°C. Light promotes polymerization	APQRN/	
7.6	Inhibitor of Polymerization: Hydroquinone 0.10 to 0.25%	12. HAZARD CLASSIFICATIONS	
12. HAZARD CLASSIFICATIONS		13. PHYSICAL AND CHEMICAL PROPERTIES	
12.1	Code of Federal Regulations: Flammable liquid	13.1	Physical State at 15°C and 1 atm: Liquid
12.2	NAS Hazard Rating for Bulk Water Transportation:	13.2	Molecular Weight: 56.1
		13.3	Boiling Point at 1 atm: $20.9^{\circ}F = 5.9^{\circ}C = 273.15^{\circ}K$

		5. HEALTH HAZARDS (Cont'd)	
5.5	Short-Term Inhalation Limits: 0.1 ppm - 0.2 ppm - 0.5 ppm		
5.6	Toxicity by Ingestion: Grade 4 LD ₅₀ below 50 mg/kg		
5.7	Late Toxicity: Grade 4 oral rat LD ₅₀ = 46 mg/kg Grade 4 oral rabbit LD ₅₀ = 7 mg/kg		
5.8	Vapor (Gas) Irritant Characteristics: Vapor causes severe irritation of eyes and throat and can cause eye and lung injury. They cannot be tolerated even in low concentrations.		
5.9	Liquid or Solid Irritant Characteristics: Causes smarting of the skin and first degree burns on short exposure may cause red and degree burns on long exposure.		
5.10	Odor Threshold: 0.2 ppm		

AAM

ACRYLAMIDE

Common Synonyms Propenamide (50%) Acrylamide (50%)		Liquid	colorless	Odorless
		Sinks and mixes with water		
HAZARD STATEMENT: IRRITANT HAZARD PICTURE: C HAZARD SIGNAL: DANGER HAZARD CLASSIFICATION: H314				
Fire	Not flammable			
Exposure	VAPOR Irritating to eyes, nose and throat Harmful if inhaled			
	LIQUID Irritates skin and eyes Harmful if swallowed			
Water Pollution	INGESTION Harmful if swallowed			
	EFFECT OF LOW CONCENTRATIONS ON AQUATIC LIFE IS UNKNOWN MAY BE DANGEROUS IF IT ENTERS WATER INTAKES			
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 444-4) Issue warning - water contaminant Disperse and flush		2. LABELS No hazard label required by Code of Federal Regulations		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Acrylic amide 50% Propenamide 50% 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: $(CH_2=CHCONH_2)_2$ 3.4 IMCO/United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: None		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Safety glasses with side shields, clean body covering, clothing, rubber gloves, boots, apron as dictated by circumstances, in absence of proper environmental control, use approved dust respirator 5.2 Symptoms Following Exposure: Has produced central nervous system damage, which is partly reversible. Effects can be produced by oral or skin contact as well as by ingestion. Chronic acrylamide poisoning can cause midbrain disturbance and peripheral neuropathy. Contact with liquid can cause moderate irritation of eyes and skin and may cause moderate transient corneal injury. 5.3 Treatment for Exposure: INHALATION: If ill effects occur, immediately get patient to fresh air. Keep him quiet and warm, and get medical help. INGESTION: If ingested, immediately give large amounts of water (or milk if immediately available), then induce vomiting and get medical help. EYES: Immediately flush with plenty of water for at least 15 min. and get medical help promptly. SKIN: Immediate continuous and thorough washing in flowing water is imperative. preferably decontaminate with abundant soap, if burns are present, get medical help, discard all contaminated clothing and wearing accessories. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.1 mg/m ³ 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 3, oral rat LD ₅₀ = 1700 mg/kg 5.7 Late Toxicity: Repeated exposure to small amounts may cause eventually reversible neurological effects

ACR

ACRYLIC ACID

Common Synonyms Propenoic Acid	Physical State Liquid Boiling Point 163°C Freezing Point 16°C Density 1.18 g/cm³ Solubility Soluble in water, alcohol, ether, and many organic solvents.
Fire Flammability Flammable Flash Point -10°C Autoignition Temperature 480°C Explosion Limits 2.5% - 11.5%	Health Hazards Acute Toxicity Harmful if swallowed. Chronic Toxicity May cause skin irritation and respiratory irritation.
Exposure Routes Inhalation, ingestion, skin contact. Effects Irritation to eyes, nose, and throat. First Aid For inhalation: Move to fresh air. For skin contact: Wash with water. For ingestion: Do not induce vomiting.	Water Pollution Biodegradability Biodegradable. Ecotoxicity Harmful to aquatic life.
1. RESPONSE TO DISCHARGE (See Response Materials Handbook, CG 446-4) Evaporating, corrosive. Restrict access. Disperse and flush.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Propenoic acid 3.2 Coast Guard Compatibility Classification: Organic acid 3.3 Chemical Formula: CH ₂ =CHCOOH 3.4 IMCO United Nations Numerical Designation: Not listed	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Acid
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Use usual respirator at ambient temperatures to avoid inhalation of mists or fumes; rubber gloves if exposed to wet material; and goggles or face shield for splash exposure; safety shower and eye wash fountain may be required. 5.2 Symptoms Following Exposure: May burn skin or eyes upon short contact. INHALATION: eye and nasal irritation and lacrimation. INGESTION: may cause severe damage to the gastrointestinal tract. 5.3 Treatment for Exposure: Get medical attention promptly for all exposures. INHALATION: remove victim to fresh air. INGESTION: do NOT induce vomiting. SKIN OR EYES: flush with water for at least 15 min. 5.4 Toxicity by Inhalation (Threshold Limit value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 2.1 (D-0.5 to 0.5 g/kg). 5.7 Late Toxicity: Not pertinent. 5.8 Vapor (Gas) Irritant Characteristics: Vapor is moderately irritating; such that personnel will not usually tolerate moderate or high vapor concentrations. 5.9 Liquid or Solid Irritant Characteristics: Liquid, severe skin irritant; may cause pain and second degree burns after a few minutes of contact. 5.10 Odor Threshold: Data not available.	

6. FIRE HAZARDS 6.1 Flash Point: (Glass) 107°C 6.2 Flammable Limits in Air: (Glass) 2.4% LEL 6.3 Fire Extinguishing Agents: Water, foam, alcohol foam, dry chemical, or carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Toxic vapors are generated when heated. 6.6 Behavior in Fire: May polymerize and expand. 6.7 Ignition Temperature: 472°C 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: Not pertinent.	8. WATER POLLUTION 8.1 Aquatic Toxicity: Data not available. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): 35% 10 days. 8.4 Food Chain Concentration Potential: Not listed.																																				
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: No reaction. 7.3 Stability During Transport: Normally unstable but will not deteriorate. 7.4 Neutralizing Agents for Acids and Caustics: Wash with water; rinse with sodium bicarbonate solution. 7.5 Polymerization: May occur on contact with acids, iron salts, or at elevated temperatures and release high energy rapidly; may cause explosion under confinement. 7.6 Inhibitor of Polymerization: Monomethyl ether of hydroquinone (40-200 ppm), phenothiazine (the tech grade) (100 ppm), hydroquinone (10-20 ppm), methylene blue (0.1-0.5%), N,N-diphenyl-p-phenylenediamine (0.05%).	9. REVISED 1978

6. FIRE HAZARDS 6.1 Flash Point: 100°C (212°F) 6.2 Flammable Limits in Air: 1.1% - 7.1% 6.3 Fire Extinguishing Agents: Dry chemical, alcohol foam, carbon dioxide 6.4 Fire Extinguishing Agents Not to be Used: Water in foam may cause frothing 6.5 Special Hazards of Combustion Products: When heated or burned, MCN may evolve toxic fumes consisting of oxides of carbon and nitrogen 6.6 Behavior in Fire: Vapor is heavier than air and may travel along under air and ignite at a distance. It is flammable in air and may cause fire and explosion 6.7 Ignition Temperature: 500°C 6.8 Electrical Hazard: Class I Group D 6.9 Burning Rate: Data not available	8. WATER POLLUTION 8.1 Aquatic Toxicity: 100 ppm 24 hr LC50 (96 hr LC50) for fish 8.2 Waterfowl Toxicity: Not pertinent 8.3 Biological Oxygen Demand (BOD): Not pertinent 8.4 Food Chain Concentration Potential: Not pertinent																																				
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: Not pertinent 7.2 Reactivity with Common Inorganic: Attacks organic and inorganic materials. These materials should not be used. Penetrates weathered or contaminated materials and pipes should be destroyed. Attacks aluminum, magnesium, zinc, and cadmium 7.3 Stability During Transport: Stable 7.4 Neutralizing Agents for Acids and Corrosives: Not pertinent 7.5 Polymerization: May cause spontaneous polymerization of oxygen under pressure. In the presence of oxygen, the polymerization may be rapid and exothermic. The polymerization product is not flammable and not toxic 7.6 Inhibitor for Polymerization: Methylcyclopentadiene (1-4% ppm)	9. SELECTED MANUFACTURERS 1. E. I. du Pont de Nemours & Co., Inc., P.O. 5. HEALTH HAZARDS (Cont'd.) 5.8 Vapor (Gas) Irritant Characteristics: Vapor is moderately irritating such that personnel will not readily tolerate moderate or high vapor concentrations 5.9 Liquid or Solid Irritant Characteristics: Irritated on clothing and allowed to remain in place, causing staining and reddening of the skin. Large amounts may be absorbed through the skin and cause poisoning 5.10 Odor Threshold: 2.4 ppm (threshold of smell for pure liquid)																																					

ADA

ADIPIC ACID

Common Synonyms: Adipic acid 1,4-Benzenedicarboxylic acid Hexanedioic acid	Solid crystals White Odorless
	Sinks and mixes slowly with water

Fire

Combustible
Dust cloud may explode if ignited in an enclosed area

Exposure

DUST
Irritating to eyes, nose and throat.
If inhaled will cause coughing or difficult breathing.

SOLID
Irritating to skin and eyes.
Harmful if swallowed.

Water Pollution

Dangerous to aquatic life in high concentrations.
May be dangerous if it enters water intakes.

1. RESPONSE TO DISCHARGE

(See Response Methods Handbook, CG 446-4)

Should be removed
Chemical and physical treatment

2. LABELS

No hazard label required by
Code of Federal Regulations

3. CHEMICAL DESIGNATIONS

- 3.1 Synonyms: 1,4-Adipic acid
1,4-Benzenedicarboxylic acid
Hexanedioic acid
- 3.2 Coast Guard Compatibility Classification:
Data not available
- 3.3 Chemical Formula: $\text{HOOC}(\text{CH}_2)_4\text{COOH}$
- 3.4 MSD/MSD Hazard Numerical
Designation: Data not available

4. OBSERVABLE CHARACTERISTICS

- 4.1 Physical State (as shipped): Crystalline
- 4.2 Color: White
- 4.3 Odor: None

5. HEALTH HAZARDS

- 5.1 Personal Protective Equipment: Normal protection against exposure to fluids of solid organs, solvents, rubber gloves, plastic goggles
- 5.2 Symptoms Following Exposure: Inhalation of vapor irritates mucous membranes of the nose and lungs, causes coughing and sneezing. Contact with liquid irritates eyes and has a pronounced drying effect on the skin, may produce dermatitis.
- 5.3 Treatment for Exposure: **IRRITATION:** remove victim to fresh air, get medical attention if irritation persists. **EYES:** flush with water for at least 15 min. **SKIN:** flush with water.
- 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available
- 5.5 Short-Term Inhalation Limit: Data not available
- 5.6 Toxicity by Ingestion: Grate 1 oral mouse LD₅₀ = 1,900 mg/kg
- 5.7 Late Toxicity: Data not available
- 5.8 Vapor (Gas) Irritant Characteristics: Data not available
- 5.9 Liquid or Solid Irritant Characteristics: Data not available
- 5.10 Odor Threshold: Data not available

6. FIRE HAZARDS

- 6.1 Flash Point: Combustible solid
300°F (149°C) - 376°F (191°C)
- 6.2 Flammable Limits in Air: (dust)
10-15 mg/l
- 6.3 Fire Extinguishing Agents: Foam, water
for carbon dioxide or dry chemical
- 6.4 Fire Extinguishing Agents Not to be Used:
None
- 6.5 Special Hazards of Combustion Products:
None
- 6.6 Behavior in Fire: Melts and may decompose
to give volatile acids, vapors of valeric
acid and other substances. These may form
explosive mixture with air.
- 6.7 Ignition Temperature: 550°C
- 6.8 Electrical Hazard: Not pertinent
- 6.9 Burning Rate: Not pertinent

7. CHEMICAL REACTIVITY

- 7.1 Reactivity with Water: No reaction
- 7.2 Reactivity with Common Materials:
None
- 7.3 Stability During Transport: Stable
- 7.4 Neutralizing Agents for Acids and
Alkalies: Reacts with dilute sodium
bicarbonate or soda ash solution
- 7.5 Polymerization: Not pertinent
- 7.6 Inhibitor of Polymerization: Not pertinent

8. WATER POLLUTION

- 8.1 Aquatic Toxicity:
≤ 130 ppm: 24 hr. "No effect" 14 day fresh
water
- 8.2 Waterway Toxicity: Data not available
- 8.3 Biological Oxygen Demand (BOD):
(theoretical) 133.0 mg/l
- 8.4 Food Chain Concentration Factor:
None

NOTES

ADN

ADIPONITRILE

Common Synonyms 1,4-Dicyanobutane		Liquid	Colorless to light yellow	Odorless
Floats on water. Freezing point is 36°F.				
SAFETY DATA SHEET 1. IDENTIFICATION 2. HAZARD IDENTIFICATION 3. COMPOSITION 4. FIRST AID MEASURES 5. FIRE FIGHTING MEASURES 6. ACCIDENT PREVENTION 7. STORAGE 8. TRANSPORT 9. DISPOSAL 10. ADDITIONAL INFORMATION				
Fire	Combustible POISONOUS GASES MAY BE PRODUCED IN FIRE Vapor may explode if ignited in an enclosed area Water spray may cause violent reaction Extinguish with dry chemical, foam, or carbon dioxide.			
Exposure	LIQUID OR SOLID Irritating to skin and eyes If swallowed, will cause nausea or vomiting Inhalation may cause irritation of the respiratory system May cause dizziness or headache May cause nausea or vomiting May cause unconsciousness May cause death			
Water Pollution	Dangerous to aquatic life in high concentrations Floating to shoreline May be dangerous if it enters water intakes May cause death			
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446.4) Issue warning: poison, water contaminant Mechanical containment Should be removed		2. LABELS No hazard label required by Code of Federal Regulations		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: 1,4-Dicyanobutane 3.2 Coast Guard Compatibility Classification: Neutral 3.3 Chemical Formula: C ₄ H ₆ N ₂ 3.4 IMCO/United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Water white to light yellow 4.3 Odor: Practically odorless		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Rubber gloves and clothing giving full body and face protection to avoid contact with skin. Air or oxygen mask 5.2 Symptoms Following Exposure: Ingestion of a few ml. may cause weakness, mental confusion, vomiting, rapid respiration, and tachycardia and convulsions. Headache and convulsions can result from exposure to vapor 5.3 Treatment for Exposure: Symptomatic treatment. Call physician. Thiosulfate should be considered. Administer vapor or amyl nitrite if patient is unconscious 5.4 Toxicity by Inhalation (Threshold Limit Value): 50 ppm 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Data not available 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: If present in high concentrations, vapors cause a slight stinging of the eyes or respiratory system and may also cause more severe symptoms such as headache and convulsions 5.9 Liquid or Solid Irritant Characteristics: If spilled on clothing and allowed to remain, may cause smothering and reddening of the skin. If absorbed by skin may cause more severe symptoms such as headache and convulsions 5.10 Odor Threshold: Data not available				

6 FIRE HAZARDS

- 6.1 Flash Point: 199°F (93°C)
 6.2 Flammable Limits in Air: LFL = 1.0% at 200°C
 6.3 Fire Extinguishing Agents: Water spray, dry chemical, foam, or carbon dioxide.
 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent.
 6.5 Special Hazards of Combustion Products: Toxic gases are generated in fires.
 6.6 Behavior in Fire: Not pertinent.
 6.7 Ignition Temperature: Data not available.
 6.8 Electrical Hazard: Not pertinent.
 6.9 Burning Rate: 2.7 mm/min.

7 CHEMICAL REACTIVITY

- 7.1 Reactivity with Water: No reaction.
 7.2 Reactivity with Common Materials: No reaction.
 7.3 Stability During Transport: Stable.
 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent.
 7.5 Polymerization: Not pertinent.
 7.6 Inhibitor or Polymerization: Not pertinent.

8. WATER POLLUTION

- 8.1 Aquatic Toxicity: 1250 ppm, 24 hr, sunfish, 11 m, fresh water.
 8.2 Waterfowl Toxicity: Data not available.
 8.3 Biological Oxygen Demand (BOD): 40% 5 days.
 8.4 Food Chain Concentration Potential: Data not available.

NOTES

ALD

ALDRIN

Common Synonyms 1,2,3,4,10,10-hexachloro-1,4,4a,5,8,8a-hexahydro-1,4-endo-exo-5,8-dimethanonaphthalene		Solid crystals or solution	Light to dark brown	Mild chemical odor
		Solid sinks in water; solution flows on water		
AVOID CONTACT WITH LIQUID OR SOLID. KEEP PEOPLE AWAY. Wear goggles with vented breathing apparatus and rubber overclothing including gloves if splash hazard is possible. Call fire department if fire is discharged. Isolate area if there is discharged material. Notify local health and pollution control agencies.				
Fire		Solid is not flammable but usually is dissolved in a combustible liquid. POISONOUS GASES ARE PRODUCED WHEN HEATED. Wear goggles with vented breathing apparatus and rubber overclothing including gloves. Extinguish with water, dry chemical foam or carbon dioxide. Contact exposed containers with water.		
 Exposure		CALL FOR MEDICAL AID. SOLID OR SOLUTION POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED. Irritating to skin, eyes. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. If IN EYES, hold eyelids open and flush with plenty of water. If SWALLOWED, do not vomit. If CONSCIOUS, have victim drink water or milk and try to get him to vomit. If SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.		
Water Pollution		HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: poison, water contaminant. Liquid forms are flammable. Mechanical containment (of liquid form) should be removed.		2. LABEL 		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: endo-exo-1,2,3,4,10,10-hexachloro-1,4,4a,5,8,8a-hexahydro-1,4-endo-exo-5,8-dimethanonaphthalene HHDN 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: C ₁₂ H ₆ Cl ₆ 3.4 IMCO/United Nations Numerical Designation: 6.1 1542		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: Tan to dark brown 4.3 Odor: Mild chemical		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: During prolonged exposure to mixing and loading operations, wear clean synthetic rubber gloves and mask or respirator of the type posed by the U.S. Bureau of Mines for aldrin protection. 5.2 Symptoms Following Exposure: Ingestion, inhalation, or skin absorption of a toxic dose will induce nausea, vomiting, hyperexcitability, tremors, epileptiform convulsions, and ventricular fibrillation. Aldrin may cause temporary reversible kidney and liver injury. Symptoms may be seen after ingestion of less than 1 gram in an adult; ingestion of 25 mg has caused death in children. 5.3 Treatment for Exposure: SKIN CONTACT: Wash with soap and running water. If material gets into eyes, wash immediately with running water for at least 15 minutes; get medical attention. INGESTION: Call physician immediately on face vomiting immediately. Repeat until vomit fluid is clear. Never give anything by mouth to an unconscious person. Keep patient prone and quiet. PHYSICIANS: administer barbiturates as anti-convulsant therapy. Observe patient carefully because repeated treatment may be necessary. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.25 mg/m ³ 5.5 Short-Term Inhalation Limits: 1 mg/m ³ for 30 min 5.6 Toxicity by Ingestion: Grade 1 LD 50 is 500 mg/kg (rat) 5.7 Late Toxicity: Chronic exposure produces benign tumors in mice 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause slight irritation of the eyes or respiratory system if present in high concentrations. Effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain, may cause irritation and reddening of the skin. 5.10 Odor Threshold: Data not available.				

6 FIRE HAZARDS

- 6.1 **Flash Point:** Not flammable.
6.2 **Flammable Limits in Air:** Not pertinent.
6.3 **Fire Extinguishing Agents:** Water sprays, dry chemical foam or carbon dioxide for fires involving solutions of aldrin in hydrocarbon solvents.
6.4 **Fire Extinguishing Agents Not to be Used:** Not pertinent.
6.5 **Special Hazards of Combustion Products:** Irritating fumes of hydrochloric acid and chlorinated decomposition products are given off.
6.6 **Behavior in Fire:** Not pertinent.
6.7 **Ignition Temperature:** Not pertinent.
6.8 **Electrical Hazard:** Not pertinent.
6.9 **Burning Rate:** Not pertinent.

8 WATER POLLUTION

- 8.1 **Aquatic Toxicity:** 0.10 ppm/24 hr. bluegill, LC₅₀ fresh water; 0.05 ppm/24 hr. goldfish, LC₅₀ fresh water; 0.01 ppm/24 hr. oyster, sublethal effect, salt water.
8.2 **Waterfowl Toxicity:** 520 mg/kg.
8.3 **Biological Oxygen Demand (BOD):** Not pertinent.
8.4 **Food Chain Concentration Potential:** High.

9. SELECTED MANUFACTURERS

Shell Chemical Co.
Agricultural Div.
2401 Crow Canyon Rd.
San Ramon, Calif. 94583

7 CHEMICAL REACTIVITY

- 7.1 **Reactivity with Water:** No reaction.
7.2 **Reactivity with Common Materials:** No reaction.
7.3 **Stability During Transport:** Stable.
7.4 **Neutralizing Agents for Acids and Caustics:** Not pertinent.
7.5 **Polymerization:** Not pertinent.
7.6 **Inhibitor of Polymerization:** Not pertinent.

10. SHIPPING INFORMATION

- 10.1 **Grade or Purity:** 20-95% aldrin.
50% inert ingredients. Several solvents in hydrocarbon solvents.
10.2 **Storage Temperature:** Data not available.
10.3 **Inert Atmosphere:** Data not available.
10.4 **Venting:** Data not available.

11 HAZARD ASSESSMENT CODE

(See Hazard Assessment Handbook, CG 446-3)
11

12. HAZARD CLASSIFICATIONS

- 12.1 **Code of Federal Regulations:** Poisonous liquid or solid, Class B.

NOTES

REVISED 1978

ALKYLBENZENESULFONIC ACIDS

Common Synonyms Decylbenzenesulfonic acid Dis Du In Irr Tetra Penta Hexa		Liquid White to yellow Odorless	
Mixes with water		Not for sale as a pesticide. Keep in original container. Do not use for any other purpose. Avoid contact with liquid. Do not use on or around food or feed. Notify local health and fire departments of this product.	
Fire		Combustible Flammable gas may be produced on contact with metals. Extinguish with water or foam. Do not use dry chemical. Water may be ineffective.	
Exposure		ALL INFORMATION LIQUID Irritating to skin and eyes. If swallowed will cause nausea. Keep out of reach of children. Do not use for any other purpose. Do not use on or around food or feed. Do not use in or near water. Do not use in or near drinking water. Do not use in or near swimming pools. Do not use in or near hot tubs. Do not use in or near saunas. Do not use in or near showers. Do not use in or near bathtubs. Do not use in or near bedrooms. Do not use in or near living rooms. Do not use in or near dining rooms. Do not use in or near kitchens. Do not use in or near bathrooms. Do not use in or near closets. Do not use in or near attics. Do not use in or near basements. Do not use in or near garages. Do not use in or near sheds. Do not use in or near barns. Do not use in or near fields. Do not use in or near woods. Do not use in or near parks. Do not use in or near playgrounds. Do not use in or near schools. Do not use in or near hospitals. Do not use in or near nursing homes. Do not use in or near prisons. Do not use in or near military bases. Do not use in or near government buildings. Do not use in or near public places. Do not use in or near private places. Do not use in or near any place where people are gathered.	
Water Pollution		Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and fire departments of this product. Do not use in or near water bodies.	
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Isolate, contain, collect, dispose, and flush.		2 LABELS No hazard label required by Code of Federal Regulations.

ALA

ALLYL ALCOHOL

Common Synonyms Vinyl carbolol 2-Propen-1-ol	Waterly liquid Colorless Sharp mustard odor Flies and mixes with water. Poisonous, flammable vapor is produced.
AVOID CONTACT WITH LIQUID AND VAPOR. KEEP PLO... Shut off sources of fires and call fire department. Wear goggles, self-contained breathing apparatus and rubber overclothing including gloves. Stop discharge if possible. Stay upwind and use water spray to knock down vapor. Isolate and vent or discharge material. Notify local health and pollution control agencies.	
Fire	FLAMMABLE POISONOUS GASES MAY BE PRODUCED IN FIRE. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Wear goggles, self-contained breathing apparatus and rubber overclothing including gloves. Extinguish with dry chemical, alcohol foam, carbon dioxide. Water may be ineffective on fire. Cool exposed containers with water.
 Exposure	CALL FOR MEDICAL AID VAPOR POISONOUS IF INHALED OR IF SKIN IS EXPOSED Irritating to eyes, nose and throat. Move to fresh air. If in eyes, hold eyelids open and flush with plenty of water. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. LIQUID POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED Will burn eyes. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water. IF ASKED, have victim spit out.
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook CG 444-4) Issue warning: high flammability, poison. Restrict access. Disperse and flush.	2. LABELS  
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: 2-Propen-1-ol Vinylcarbinol 3.2 Coast Guard Competibility Classification: Substituted allyl 3.3 Chemical Formula: CH ₂ =CHCH ₂ OH 3.4 IMCO-United Nations Munerial Designation: 1.2 109X	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Characteristic pungent sharp, causes tears
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Organic canister or air pack, rubber gloves, goggles, other protective equipment as required to prevent all body contact. 5.2 Symptoms Following Exposure: Vapors are quite irritating to eyes, nose and throat. Eye irritation may be accompanied by complaints of photophobia and pain in the eyeballs; pain may not begin until 10 hours after exposure. Liquid may cause first- and second-degree burns of the skin, with blister formation; underlying part will become swollen and painful, and local muscle spasms may occur. 5.3 Treatment for Exposure: INHALATION: remove victim from contaminated area and administer oxygen; get medical attention immediately. SKIN: remove liquid with soap and water. EYES: flush with continuous stream of water for 15 min. 5.4 Toxicity by Inhalation (Threshold Limit Value): 2 ppm 5.5 Short-Term Inhalation Limits: 5 ppm for 30 min 5.6 Toxicity by Ingestion: Grade 3 LD ₅₀ 40 to 500 mg/kg mouse (rat) 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Vapor is moderately irritating such that personnel will not usually tolerate moderate or high vapor concentrations. 5.9 Liquid or Solid Irritant Characteristics: Causes smarting of the skin and first-degree burns on short exposure; may cause secondary burns on long exposure. 5.10 Odor Threshold: 0.2% ppm	

6. FIRE HAZARDS 6.1 Flash Point: 22°F (4°C) (90°F (32°C)) 6.2 Flammable Limits in Air: 2.5% - 18% 6.3 Fire Extinguishing Agents: Dry chemical, alcohol foam, carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective. 6.5 Special Hazards of Combustion Products: Toxic vapors are generated when heated. 6.6 Behavior in Fire: Vapor heavier than air and may travel a considerable distance to a source of ignition and flash back. 6.7 Ignition Temperature: 829°F 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: 2.7 mm/min.	8. WATER POLLUTION 8.1 Aquatic Toxicity: 10 ppm/*threshold/fresh water 2.5 ppm/*bivalve larvae/lethal/salt water *Time period not specified. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): 57% 10 days 20°C 5 days 8.4 Food Chain Concentration Potential: None noted.

REVISED 1978

ABR

ALLYL BROMIDE

Common Synonyms 3-Bromopropene Bromallylene 3-Bromopropylene	Liquid Colorless to light yellow Irritating odor Sinks in water. Flammable, irritating vapor is produced.
Fire	FLAMMABLE POISONOUS GASES MAY BE PRODUCED IN FIRE Flashback along vapor trail may occur Vapor may explode if ignited in an enclosed area
Exposure	VAPOR Irritating to eyes, nose and throat If inhaled will cause headache, dizziness, coughing or difficult breathing LIQUID Irritating to skin and eyes If swallowed will cause irritation of mouth and stomach
Water Pollution	Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning - high flammability Restrict access Should be removed Chemical and physical treatment	2. LABEL 
3. CHEMICAL DESIGNATIONS 31 Synonyms: Bromallylene 3-Bromopropene 3-Bromopropylene 32 Coast Guard Competibility Classification: Not applicable 33 Chemical Formula: CH ₂ =CH·CH ₂ Br 34 IMCO/United Nations Numerical Designation: 3.2/1099	4. OBSERVABLE CHARACTERISTICS 41 Physical State (as shipped): Liquid 42 Color: Colorless to light yellow 43 Odor: Irritating, unpleasant, pungent
5. HEALTH HAZARDS 51 Personal Protective Equipment: Goggles and face shield; protective clothing; self-contained breathing apparatus for high vapor concentrations 52 Symptoms Following Exposure: Inhalation of vapor irritates mucous membranes and causes dizziness, headache, and lung irritation. Contact with liquid irritates eyes and skin. Ingestion causes irritation of mouth and stomach. 53 Treatment for Exposure: INHALATION: remove from exposure; if breathing is difficult, give oxygen; call physician. EYES: flush with water for at least 15 min. and call physician. SKIN: flush with water; get medical attention for skin irritation. INGESTION: do NOT induce vomiting; get medical attention. 54 Toxicity by Inhalation (Threshold Limit Value): Data not available 55 Short-Term Inhalation Limits: Data not available 56 Toxicity by Ingestion: Grade 4 oral LD ₅₀ = 10 mg/kg (guinea pig) 57 Late Toxicity: Data not available 58 Vapor (Gas) Irritant Characteristics: Vapors are moderately irritating such that personnel will not usually tolerate moderate or high vapor concentrations. 59 Liquid or Solid Irritant Characteristics: Fairly severe skin irritant. May cause pain and second degree burns after a few minutes' contact. 510 Odor Threshold: Data not available	

6. FIRE HAZARDS

- 61 **Flash Point:** 30°F C.C.
- 62 **Flammable Limits in Air:** 1.4% - 7.3%
- 63 **Fire Extinguishing Agents:** Dry chemical, alcohol foam, or carbon dioxide
- 64 **Fire Extinguishing Agents Not to be Used:** Water may be ineffective
- 65 **Special Hazards of Combustion Products:** Toxic hydrogen bromide gas formed in fire
- 66 **Behavior in Fire:** Vapor is heavier than air and may travel a considerable distance to a source of ignition and flash back
- 67 **Ignition Temperature:** 563°F
- 68 **Electrical Hazard:** Data not available

NOTES

ALC

ALLYL CHLORIDE

Common Synonyms 3-Chloropropene 3-Chloropropylene	Liquid Colorless to yellowish brown or red Sharp, irritating odor Floats on water. Flammable; irritating vapor is produced.
Fire	FLAMMABLE POISONOUS GASES ARE PRODUCED IN FIRE. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Heat causes release of irritating, corrosive fumes. Extinguish with dry chemical or carbon dioxide. Do not use water.
 Exposure	CALL FOR MEDICAL AID. VAPOR POISONOUS IF INHALED OR IF SKIN IS EXPOSED. Irritating to eyes, nose and throat. If breathed, stop breathing and get fresh air. If swallowed, stop eating and drinking. LIQUID POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED. Will burn eyes. If on skin, wash with plenty of water. If in eyes, flush with plenty of water. If swallowed, do not vomit. Get medical attention. Do not drink water. If swallowed, do not induce vomiting. If swallowed, do not induce vomiting or having on. If swallowed, do not induce vomiting or having on.
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS. May be dangerous if it enters water intakes. Not recommended for use in water.
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 444-2) Issue warning: high flammability. Result: assess.	2 LABEL 
3. CHEMICAL DESIGNATIONS 31 Synonyms 3-Chloropropene 3-Chloropropylene 32 Coast Guard Compatibility Classification Substituted allyl 33 Chemical Formula: C_3H_5Cl 34 IMCO United Nations Numerical Designation: 1111 (11)	4 OBSERVABLE CHARACTERISTICS 41 Physical State (as shipped): Liquid 42 Color: Colorless 43 Odor: Sharp, pungent, irritating, characteristic pungent
5 HEALTH HAZARDS 51 Personal Protective Equipment: Respirator (gas/vapor) or equivalent; full face mask and canister (greater concentration); self-contained breathing apparatus or its equivalent; Rubber or neoprene gloves; apron; boots; clean body covering; other chemical goggles; gas tight goggles; or equivalent full face shield. 52 Symptoms Following Exposure: Causes irritation to eyes, nose and throat. Breathing effects may be delayed. 53 Treatment after Exposure: INHALATION: If effects develop in persons, fresh air, keep warm and quiet. Get medical attention if continued breathing apparatus stops. INGESTION: promptly induce vomiting. Get medical attention immediately. No known antidote; treat symptoms. EYES: immediately flush with plenty of water for at least 15 min. Get medical attention promptly. SKIN: remove clothing and flush affected area thoroughly. 54 Toxicity by Inhalation (Threshold Limit Value): 1 ppm 55 Short-Term Inhalation Limits: Data not available 56 Toxicity by Ingestion: Grade 2.1 (Data not available) 57 Late Toxicity: Lung, liver and kidney damage in experimental animals. 58 Vapor (Gas) Irritant Characteristics: Vapor is an irritant to eyes, nose and throat. Usually tolerate moderate when vapor concentrations. 59 Liquid or Solid Irritant Characteristics: Causes irritation of the skin and may cause secondary burns on long exposure. 510 Odor Threshold: 0.4 ppm	

6 FIRE HAZARDS 61 Flash Point: 20.1°C 62 Flammable Limits in Air: 3.4-11.1% 63 Fire Extinguishing Agents: Foam, dry chemical, carbon dioxide. 64 Fire Extinguishing Agents Not to be Used: Water. 65 Special Hazards of Combustion Products: Release of irritating hydrocarbon fumes. 66 Behavior in Fire: Not pertinent. 67 Ignition Temperature: 579°C 68 Electrical Hazard: No pertinent. 69 Burning Rate: Data not available.	8 WATER POLLUTION 81 Aquatic Toxicity: 45 ppm 96 hr LC50 (H. zosterops) 82 Waterfowl Toxicity: Data not available 83 Biological Oxygen Demand (BOD): Data not available 84 Food Chain Concentration Potential: Not pertinent.

REVISED 1978

ACF

ALLYL CHLOROFORMATE

Common Synonyms Allyl chloroformate		Watery liquid Colorless Extremely irritating odor Sinks in water. Flammable; irritating vapor is produced.
Fire		FLAMMABLE Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area.
Exposure		VAPOR Irritating to eyes, nose and throat. If inhaled will cause difficult breathing. LIQUID Irritating to skin and eyes. Harmful if swallowed.
Water Pollution		Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes.
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Avoid breathing vapors. Remove from area. Dispense and flush.		2. LABEL 
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Allyl chloroformate 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: $\text{CH}_2=\text{CH}-\text{CH}_2-\text{O}-\text{COCl}$ 3.4 IMCO/United Nations Numerical Designation: 8.122		4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Extremely irritating; causes severe pungent
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Vapor proof protective goggles and face shield, plastic or rubber gloves, and tubing gas mask or self-contained breathing apparatus. 5.2 Symptoms Following Exposure: Vapor irritates eyes and respiratory tract. Contact with liquid causes eye and skin irritation and nausea or irritation of mouth and stomach. 5.3 Treatment for Exposure: INHALATION: Remove from exposure, support respiration if necessary, call physician. EYES: If irritated by either vapor or liquid, flush with water for at least 15 min. SKIN: Wash with large quantities of water for at least 15 min. INGESTION: DO NOT induce vomiting. Give water, call physician. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade III Dose Not Determined. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Vapors are moderately irritating such that persons will not usually tolerate moderate or high vapor concentrations. 5.9 Liquid or Solid Irritant Characteristics: Both severe skin irritant and cause pain and second degree burns after a few minutes contact. 5.10 Odor Threshold: 1.4 ppm		

6 FIRE HAZARDS

- 6.1 Flash Point: 92.1°C (198°F) C
- 6.2 Flammable Limits in Air: Data not available
- 6.3 Fire Extinguishing Agents: Dry chemical, foam, carbon dioxide
- 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective
- 6.5 Special Hazards of Combustion Products: When heated to decomposition emits highly toxic phosphine gas
- 6.6 Behavior in Fire: Vapor is heavier than air and may travel considerable distance to a source of ignition and flash back
- 6.7 Ignition Temperature: Data not available
- 6.8 Electrical Hazard: Data not available
- 6.9 Burning Rate: 4 M/min. (m)

8 WATER POLLUTION

- 8.1 Aquatic Toxicity: Data not available
- 8.2 Waterfowl Toxicity: Data not available
- 8.3 Biological Oxygen Demand (BOD): Data not available
- 8.4 Food Chain Concentration Potential: None

7 CHEMICAL REACTIVITY

- 7.1 Reactivity with Water: Reacts slowly generating hydrogen chloride
- 7.2 Reactivity with Common Materials: Corrodes metals
- 7.3 Stability During Transport: Stable
- 7.4 Neutralizing Agents for Acids and Caustics: Flush with water, rinse with lime or sodium bicarbonate solution
- 7.5 Polymerization: Not pertinent
- 7.6 Inhibitor of Polymerization: Not pertinent

9 SELECTED MANUFACTURERS

- 1. Chemetron Corporation
Organic Chemicals Division
393 Seventh Avenue
New York, N.Y. 10018
- 2. Ono Chemical Co.
540 Nyard Rd.
Muskegon, Mich. 49444
- 3. Polysciences, Inc.
Paul Valley Industrial Park
Warrington, Pa. 18976

10 SHIPPING INFORMATION

- 10.1 Grades or Purity: Commercial 97+
- 10.2 Storage Temperature: Keep cool
- 10.3 Inert Atmosphere: No requirements
- 10.4 Venting: Pressure/vacuum

NOTES

ATC

ALLYLTRICHLOROSILANE

Common Synonyms Allylsilane trichloride	Liquid Colorless Sharp, irritating odor Reacts violently with water. Irritating visible vapor cloud is produced.
Fire	Combustible. POISONOUS GASES MAY BE PRODUCED IN FIRE. EXTINGUISH WITH WATER OR FOAM.
Exposure	VAPOR Irritating to eyes, nose and throat. If inhaled will cause coughing or difficult breathing. LIQUID Will burn skin and eyes. Harmful if swallowed. DO NOT INHALE VAPOR.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes.
1. RESPONSE TO DISCHARGE (See Response Manual Handbook, CG 446-4) Issue warning: corrosive Restrict access Disperse and flush	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Allylsilane trichloride 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: $\text{CH}_2=\text{CH}-\text{CH}_2-\text{SiCl}_3$ 3.4 IMCO/United Nations Numerical Designation: 8 1724	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: sharp pungent irritating like hydrochloric acid
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Acid vapor type respiratory protection, rubber gloves, chemical goggles, other equipment necessary to protect skin and eyes. 5.2 Symptoms Following Exposure: Inhalation of vapor irritates mucous membranes. Liquid causes severe burns of eyes and skin and severe internal burns if ingested. 5.3 Treatment for Exposure: Get medical attention after all exposures to this compound. INHALATION: remove from exposure, support respiration. EYES: flush with water 15 min. SKIN: flush with water. INGESTION: do NOT induce vomiting, give water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 3 LD ₅₀ 50 to 500 mg/kg 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause severe irritation of eyes and throat and can cause eye or lung injury. They cannot be tolerated even at low concentrations. 5.9 Liquid or Solid Irritant Characteristics: Severe skin irritant. Causes second- and third-degree burns on short contact and is very injurious to the eyes. 5.10 Odor Threshold: Data not available	

6. ACL

ALUMINUM CHLORIDE

Common Synonyms Anhydrous aluminum chloride	Solid crystals or powder Yellow-orange to grayish-white Irritating odor Sinks in water. Poisonous gas is produced on contact with water.
First Aid Inhalation: Move to fresh air. If breathing is difficult, give artificial respiration. If swallowed, give milk or water. If on skin, wash with plenty of water. If in eyes, flush with plenty of water.	Fire Not flammable.
Exposure DUST Irritating to eyes, nose and throat. Harmful if inhaled. May cause pneumonia. If inhaled, get medical attention immediately. If on skin, wash with plenty of water. If in eyes, flush with plenty of water. If swallowed, give milk or water. If on skin, wash with plenty of water. If in eyes, flush with plenty of water. If swallowed, give milk or water.	Water Pollution HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS. May be dangerous if it enters water intakes. Do not allow to enter water.
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Disperse and flush with care. Issue warning: Corrosive.	2 LABELS No hazard label required by Code of Federal Regulations.
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Anhydrous aluminum chloride. 3.2 Coast Guard Compatibility Classification: Not applicable. 3.3 Chemical Formula: $AlCl_3$. 3.4 IMCO United Nations Numerical Designation: 5.0.126.	4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid. 4.2 Color: Orange to yellow through gray to white. 4.3 Odor: Fume hydrogen chloride, i.e., hydrochloric acid.
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: All personnel in the area should wear safety clothing including fully closed goggles, rubber or plastic cover gloves, rubber shoes, and coveralls of acid-resistant material. An acid vapor canister mask should be carried in case of emergency. In case of application, it may be advisable to wear this equipment in a resting posture. 5.2 Symptoms Following Exposure: Contact with the skin or eyes in the presence of moisture causes thermal and acid burn. 5.3 Treatment for Exposure: INGESTION: If victim is conscious have him drink water or milk. Do NOT induce vomiting. SKIN: Flush immediately with plenty of water. For eye contact, flush with water for at least 15 mins. and get medical attention immediately. 5.4 Toxicity by Inhalation (Threshold Limit Value): 5 ppm hydrogen chloride. 5.5 Short-Term Inhalation Limits: 5 ppm for 5 min.; 10 ppm for 10 min.; 20 ppm for 20 min.; 10 ppm for 40 min. (all for hydrogen chloride). 5.6 Toxicity by Ingestion: No systemic effects but severe burn of mouth. 5.7 Late Toxicity: None recognized. 5.8 Vapor (Gas) Irritant Characteristics: Vapor of hydrogen chloride is moderately irritating such that persons will not usually tolerate moderate or high vapor concentrations. 5.9 Liquid or Solid Irritant Characteristics: Fairly severe skin irritant; may cause pain and second degree burns after a few minutes' contact. 5.10 Odor Threshold: 1-5 ppm hydrogen chloride.	

6 FIRE HAZARDS 6.1 Flash Point: Not flammable. 6.2 Flammable Limits in Air: Not flammable. 6.3 Fire Extinguishing Agents: Not pertinent. 6.4 Fire Extinguishing Agents Not to be Used: Do not use water on adjacent fires. 6.5 Special Hazards of Combustion Products: Not pertinent. 6.6 Behavior in Fire: Reacts violently with water used in extinguishing adjacent fires. 6.7 Ignition Temperature: Not flammable. 6.8 Electrical Hazards: Not pertinent. 6.9 Burning Rate: Not flammable.	8 WATER POLLUTION 8.1 Aquatic Toxicity: Not pertinent. 8.2 Waterlow Toxicity: Not pertinent. 8.3 Biological Oxygen Demand (BOD): Not pertinent. 8.4 Food Chain Concentration Potential: Not pertinent.										
7 CHEMICAL REACTIVITY 7.1 Reactivity with Water: Reacts violently with water, liberating hydrogen chloride gas and heat. 7.2 Reactivity with Common Materials: None if dry. If wet it attacks metals because of hydrochloric acid formed. Flammable hydrogen is formed. 7.3 Stability During Transport: Stable if kept dry and protected from atmospheric moisture. 7.4 Neutralizing Agents for Acids and Caustics: Hydrochloric acid formed by reaction with water can be flushed away with water. Rinse with sodium bicarbonate or lime solution. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9. SELECTED MANUFACTURERS 1 Allied Chemical Corp. Industrial Chemicals Division Morristown, N. J. 07960 2 Pearlsall Corp. Pearlsall Chemical Co., Inc. 4635 Southwest Freeway Houston, Texas 77022 3 Stauffer Chemical Co. Industrial Chemical Div. REVISED 1978

ALN

ALUMINUM NITRATE

Common Synonyms Aluminum nitrate nonahydrate Nitric acid aluminum salt	Solid White Sinks and mixes slowly with water
Fire	Not flammable POISONOUS GASES MAY BE PRODUCED IN FIRE
Exposure	DUST Irritating to eyes, nose and throat Harmful if inhaled SOLID Irritating to skin and eyes If swallowed will cause nausea or vomiting
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes
1 RESPONSE TO DISCHARGE See Response Methods Handbook, CG 445-1 Flush with lots of water; flush skin with copious amounts of water	2. LABEL 
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Aluminum nitrate nonahydrate Nitric acid aluminum salt 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: $\text{Al}(\text{NO}_3)_3 \cdot 9\text{H}_2\text{O}$ 3.4 IMCO/United Nations Numerical Designation: Not listed	4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: White 4.3 Odor: None
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Goggles, washcloth, soap and water 5.2 Symptoms Following Exposure: Irritation, severe irritation, and burns if inhaled; irritation and burns if swallowed 5.3 Treatment for Exposure: EYES: Flush with water for at least 15 minutes. Flush with lots of water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Irritation, severe irritation and burns if swallowed 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Not listed

ALM

ALUMINUM SULFATE

Common Synonyms Cake aluminum Patent aluminum		Solid	Gray white	Odorless
		Sinks and mixes slowly with water		
AVOID CONTACT WITH DUST AND VAPOR. KEEP FLOUT AWAY While working, avoid breathing dust or vapor. If inhaled, go to fresh air. If on skin, wash with soap and water. If in eyes, flush with water for 15 minutes. If swallowed, drink water. Do not induce vomiting. If on clothing, remove and wash separately. Do not use in food or feed.				
Fire		Not flammable Will not burn. May cause irritation to skin and eyes. If inhaled, go to fresh air. If on skin, wash with soap and water. If in eyes, flush with water for 15 minutes. If swallowed, drink water. Do not induce vomiting. If on clothing, remove and wash separately. Do not use in food or feed.		
Exposure		CAUTION DUST AND VAPOR DUST Irritating to eyes, nose and throat. If inhaled will cause difficulty breathing. If swallowed, hold head back and breathe deeply. If on skin, wash with soap and water. If in eyes, flush with water for 15 minutes. If swallowed, drink water. Do not induce vomiting. If on clothing, remove and wash separately. Do not use in food or feed. SOLID Irritating to skin and eyes. If swallowed will cause nausea or vomiting. If on skin, wash with soap and water. If in eyes, flush with water for 15 minutes. If swallowed, drink water. Do not induce vomiting. If on clothing, remove and wash separately. Do not use in food or feed. HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes. Do not discharge into water bodies. Do not use in food or feed.		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 444-1) Issue warning - water contaminant Should be removed Chemical and physical treatment		2. LABELS No hazard label required by Code of Federal Regulations		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Cake alum Patent alum 3.2 Coast Guard Competibility Classification: Not listed 3.3 Chemical Formula: $Al_2(SO_4)_3 \cdot 18H_2O$ 3.4 IMCO/United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: Gray white 4.3 Odor: None		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Dust respirator, goggles or face shield, rubber gloves 5.2 Symptoms Following Exposure: Inhalation of dust irritates nose and mouth. Ingestion of large doses causes gastric irritation, nausea, vomiting, and purging. Dust irritates eyes and skin. 5.3 Treatment for Exposure: INHALATION: rinse nose and mouth with water. INGESTION: give large amounts of water. EYES: flush with water for at least 15 min. SKIN: flush with water, wash with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limit: Data not available 5.6 Toxicity by Ingestion: Grade 2 oral mouse LD ₅₀ = 770 mg/kg 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available				

6. FIRE HAZARDS		8. WATER POLLUTION	
6.1 Flash Point: Not flammable		8.1 Aquatic Toxicity: 14ppm - 36h, fundulus fetal, fresh water 240ppm - 48h, monoglyph, 11m * *Water is deoxygenated

AEA

AMINOETHYLETHANOLAMINE

Common Synonyms: N-(2-Aminoethyl)ethanolamine 2-(2-Aminoethyl)ethanolamine (Ethanolamine) N-Ethyl-Diethanolamine (Diethanolamine) N-Hydroxyethyl-2-Ethanolamine		Liquid	Colorless	Mild ammoniacal odor
		Sinks and mixes with water		
Fire	Combustible			
Exposure	LIQUID Will burn skin and eyes.			
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes.			
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446.4) Dispense and flush		2. LABELS No hazard label required by Code of Federal Regulations		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: 2-(2-Aminoethyl)ethanolamine N-Ethyl-Diethanolamine N-Ethyl-Diethanolamine N-Hydroxyethyl-2-ethanolamine N-Hydroxyethyl-2-ethanolamine 3.2 Coast Guard Compatibility Classification: Miscellaneous 3.3 Chemical Formula: HOCH ₂ CH ₂ NHCH ₂ CH ₂ NH ₂ 3.4 (IMCO) United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Mild ammoniacal		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Goggles or face shield, protective clothing 5.2 Symptoms Following Exposure: Skin contact will cause mild irritation; eye contact will cause more severe irritation 5.3 Treatment for Exposure: INGESTION: Do NOT induce vomiting; call physician immediately. SKIN: Wash area with plenty of water. EYES: Flush thoroughly with running water, preferably for 15 min. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 2.1 (Dose 1 to 5 g/kg) 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: High concentrations of vapor may cause a slight irritation of the eyes or respiratory system. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Fairly severe skin irritant; may cause pain and second degree burns after a few minutes contact. 5.10 Odor Threshold: Data not available

AMA

AMMONIA, ANHYDROUS

Common Synonyms Liquid ammonia		Liquefied compressed gas	Colorless	Ammonia odor
Throat and burn on water. Poisonous; stable vapor cloud is produced.				
Ammonia is a colorless, pungent gas with a characteristic odor. It is highly soluble in water, forming ammonium hydroxide. Ammonia is used in a wide variety of industrial processes, including the production of fertilizers, explosives, and dyes. It is also used as a refrigerant and in the synthesis of many organic compounds. Ammonia is highly flammable and can form explosive mixtures with air. It is also highly corrosive and can cause severe burns on contact with skin or eyes. Inhalation of ammonia vapor can cause respiratory irritation and damage to the lungs. Ammonia is also toxic to aquatic life and can cause environmental damage if released into the environment.				
Fire	Combustible Flash point: -17.8°C (-1°F) Flammable limits in air: 15.7% to 27.4% (vol) Fire extinguishing agents: Water, carbon dioxide, dry chemical			
 Exposure	VAPOR POISONOUS IF INHALED Irritating to eyes, nose and throat May cause frostbite May cause severe burns on contact with skin or eyes May cause respiratory irritation and damage to the lungs May cause environmental damage if released into the environment LIQUID Will burn skin and eyes Harmful if swallowed Will cause frostbite May cause severe burns on contact with skin or eyes May cause respiratory irritation and damage to the lungs May cause environmental damage if released into the environment			
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes May cause environmental damage if released into the environment

REVISED 1978

AAT

AMMONIUM ACETATE

Common Synonyms Acetic acid, ammonium salt		Solid	White	Weak ammonia odor
		Sticky and mixes with water		
Store in airtight container. Keep away from heat and fire. Avoid contact with skin and eyes. Do not inhale vapors. Do not swallow. Do not use in food or drink.				
Fire		Not flammable Irritating gases may be produced when heated Weak acids may be formed when heated		
Exposure		CALL FOR MEDICAL AID DUST Irritating to eyes, nose and throat If inhaled will cause difficult breathing If inhaled, remove to fresh air and breathe deeply If in eyes, flush with plenty of water If on skin, flush with plenty of water If swallowed, drink plenty of water If swallowed, do not induce vomiting If swallowed, do not induce vomiting If swallowed, do not induce vomiting		
Water Pollution		Dangerous to aquatic life in high concentrations May be dangerous if it enters water intakes Not recommended for use in water supply		
1 RESPONSE TO DISCHARGE (See Response Handbook, CG 446-4) Disperse and flush		2. LABELS No hazard label required by Code of Federal Regulations		
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Acetic acid, ammonium salt 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: $\text{NH}_4\text{CH}_3\text{COO}$ 3.4 IMCO/United Nations Numerical Designation: Not listed		4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: White 4.3 Odor: Weak ammonia		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Dust mask, goggles or face shield, rubber gloves 5.2 Symptoms Following Exposure: Inhalation of dust irritates nose and mouth. Ingestion irritates mouth and stomach. Contact with dust causes irritation of eyes and mild irritation of skin. 5.3 Treatment for Exposure: INHALATION: Remove to fresh air, breathe deeply. If in eyes, flush with plenty of water. If on skin, flush with plenty of water. If swallowed, drink plenty of water. If swallowed, do not induce vomiting. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Data not available 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available				
6 FIRE HAZARDS 6.1 Flash Point: Not flammable 6.2 Flammable Limits in Air: Not flammable 6.3 Fire Extinguishing Agents: Not pertinent 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent 6.5 Special Hazards of Combustion Products: Irritating vapors of ammonia and acetic acid may form in fires 6.6 Behavior in Fire: Not pertinent 6.7 Ignition Temperature: Not pertinent 6.8 Electrical Hazard: Not pertinent 6.9 Burning Rate: Not pertinent		7 CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction 7.2 Reactivity with Common Materials: Not pertinent 7.3 Stability During Transport: Stable 7.4 Neutralizing Agents for Acids and Cautistics: Not pertinent 7.5 Polymerization: Not pertinent 7.6 Inhibitor of Polymerization: Not pertinent		
8 WATER POLLUTION 8.1 Aquatic Toxicity: 5 ppm, 24 hr, mosquito fish, 11 m, fresh water 8.2 Waterfowl Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): 79% in 5 days 8.4 Food Chain Concentration Potential: None		9. SELECTED MANUFACTURERS 1. Allied Chemical Corp. Specialty Chemicals Div. P.O. Box 1087R Morristown, N.J. 07960 2. M. J. Chemicals, Inc. 223 Westside Ave. P.O. Box 384 Frederick City, Md. 21703 3. J. NOTES

ABZ

AMMONIUM BENZOATE

Common Synonyms Benzoic acid, ammonium salt		Solid	White	Odorless
		Sinks and mixes slowly with water		
See page 6 for possible health effects. Avoid contact with solid and dust. Avoid inhalation and eye contact. See page 6 for health and pollution effects.				
Fire		Combustible Dust cloud may explode if ignited in an enclosed area POISONOUS GASES MAY BE PRODUCED IN FIRE Irritating gases may be produced when heated Wear goggles or TWP. Stand back if fire starts Flush exposed area with water. Do not use water on fire.		
Exposure		CALL FOR MEDICAL AID DUST Irritating to eyes, nose and throat. Harmful if inhaled Avoid dust. If inhaled, move to fresh air. If in eyes, flush with water. If on skin, wash with water. SOLID Irritating to skin and eyes. Avoid contact. If on skin, wash with water. If in eyes, flush with water. POISONOUS GASES MAY BE PRODUCED IN FIRE Avoid fire. If inhaled, move to fresh air. If in eyes, flush with water. If on skin, wash with water.		
Water Pollution		Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes Avoid contact with water. If in water, flush with water.		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook CG 444-4) Disperse and flush		2. LABELS No hazard label required by Code of Federal Regulations		
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Benzoic acid, ammonium salt 3.2 Coast Guard Competibility Classification: Not listed 3.3 Chemical Formula: $\text{C}_6\text{H}_5\text{COONH}_4$ 3.4 IMCO/United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: White 4.3 Odor: None		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Safety glasses, gloves 5.2 Symptoms Following Exposure: Inhalation of dust may irritate nose. Contact with eyes causes irritation. 5.3 Treatment for Exposure: INHALATION: move to uncontaminated atmosphere. EYES: flush with water for at least 15 min. SKIN: flush with water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Data not available 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available				

6. FIRE HAZARDS 6.1 Flash Point: Not pertinent (combustible solid) 6.2 Flammable Limits in Air: Not pertinent 6.3 Fire Extinguishing Agents: Water, foam, dry chemical, carbon dioxide 6.4 Fire Extinguishing Agents Not to be Used: 6.5 Special Hazards of Combustion Products: Irritating. Toxic ammonia gas may form in fires. 6.6 Behavior in Fire 6.7 Ignition Temperature: Not pertinent 6.8 Electrical Hazard: Not pertinent 6.9 Burning Rate: Not pertinent	8. WATER POLLUTION 8.1 Aquatic Toxicity: Data not available 8.2 Waterway Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): Data not available 8.4 Food Chain Concentration Potential: None
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction 7.2 Reactivity with Common Materials: 7.3 Stability During Transport: Slowly releases ammonia gas, which may collect in closed container 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent 7.5 Polymerization: Not pertinent 7.6 Inhibitor of Polymerization: Not pertinent	9. SELECTED MANUFACTURERS 1. Ashland Oil, Inc. P. O. Box 2219 Columbus, Ohio 43216 2. Heco, Inc. Delaware Water Gap, Pa. 18327 3. Gallard Schlesinger Chemical Mfg. Co. 584 Mineola Ave. Carle Place, N. Y. 11514
11. HAZARD ASSESSMENT CODE (See Hazard Assessment Handbook, CG 444-3) SS	10. SHIPPING INFORMATION 10.1 Grades or Purity: Technical 10.2 Storage Temperature: Ambient 10.3 Inert Atmosphere: No requirement 10.4 Venting: Open
12. HAZARD CLASSIFICATIONS 12.1 Code of Federal Regulations: Not listed 12.2 NAS Hazard Rating for Bulk Water Transportation: Not listed 12.3 NFPA Hazard Classifications: Not listed	13. (Continued on pages 5 and 6)	
NOTES	

ABC

AMMONIUM BICARBONATE

Common Synonyms: Acid ammonium carbonate Ammonium hydrogen carbonate Carbolic acid, ammonium salt		Solid White Weak ammonia odor Sinks and mixes slowly with water. Freezing point is 95°F
A white, crystalline powder. It is soluble in water and forms a weakly alkaline solution. It is stable in air and does not decompose at room temperature. It is used as a leavening agent in baking powder and as a fire retardant.		
Fire	Not flammable POISONOUS GASES MAY BE PRODUCED IN FIRE Irritating gases may be produced when heated When heated it will decompose to ammonia gas	
Exposure	CALL FOR MEDICAL AID DUST Irritating to eyes, nose and throat If inhaled will cause difficult breathing If eyes are affected, flush with plenty of water If breathing has stopped, artificial respiration If swallowed, drink plenty of water SOLID Irritating to skin and eyes Harmful if swallowed Remove contaminated clothing and shoes If on skin, wash with plenty of water If in eyes, flush with plenty of water If SWALLOWED, drink plenty of water If SWALLOWED, do not induce vomiting unless told to do so If SWALLOWED, do not eat, drink or have any other food or drink	
Water Pollution	Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes Not a threat to water quality Not a pollutant in domestic water	
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Disperse and flush		2. LABELS No hazard label required by Code of Federal Regulations
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Acid ammonium carbonate Ammonium hydrogen carbonate Carbolic acid, monoammonium salt 3.2 Coast Guard Competibility Classification Not listed 3.3 Chemical Formula: NH_4HCO_3 3.4 IMCO/United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: White 4.3 Odor: Slight ammonia
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Work gloves, dust respirator, safety glasses or chemical safety goggles if dusty 5.2 Symptoms Following Exposure: Inhalation may cause respiratory irritation. Ingestion could be harmful. Contact with eyes or skin causes irritation. 5.3 Treatment for Exposure: Consult physician in case of ingestion or severe irritation. INHALATION: move to uncontaminated atmosphere. EYES OR SKIN: wash with large amounts of water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Data not available 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available		

6. FIRE HAZARDS 6.1 Flash Point: Not flammable 6.2 Flammable Limits in Air: Not flammable 6.3 Fire Extinguishing Agents: Not pertinent 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent 6.5 Special Hazards of Combustion Products: Irritating and toxic ammonia gas may form in fires 6.6 Behavior in Fire: Decomposes, but reaction is not explosive. Ammonia gas is formed 6.7 Ignition Temperature: Not pertinent 6.8 Electrical Hazard: Not pertinent 6.9 Burning Rate: Not pertinent		8. WATER POLLUTION 8.1 Aquatic Toxicity: Data not available 8.2 Waterway Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): Data not available 8.4 Food Chain Concentration Potential: None
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction 7.2 Reactivity with Common Materials: May attack copper, nickel and zinc 7.3 Stability During Transport: Decomposes above 34°C (91°F) with formation of ammonia gas, which may collect in closed containers 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent 7.5 Polymerization: Not pertinent 7.6 Inhibitor of Polymerization: Not pertinent		9. SELECTED MANUFACTURERS 1. Diamond Shamrock Chemical Co. 300 Union Commerce Building Cleveland, Ohio 44115 2. Allied Chemical Corp. Industrial Chemical Division P. O. Box 1139P Morristown, N. J. 07960 3. J. T. Baker Chemical Co. Phillipsburg, N. J. 08865
11. HAZARD ASSESSMENT CODE (See Hazard Assessment Handbook, CG 446-3) SS		10. SHIPPING INFORMATION 10.1 Grades or Purity: Low Reagent 10.2 Storage Temperature: Below 33°C (91°F) 10.3 Inert Atmosphere: No requirement 10.4 Venting: Open
12. HAZARD CLASSIFICATIONS 12.1 Code of Federal Regulations: Not listed 12.2 NAS Hazard Rating for Bulk Water Transportation: Not listed 12.3 NFPA Hazard Classifications: Not listed		13. ABF

AMMONIUM BIFLUORIDE

Common Synonyms Ammonium hydrogen fluoride Acid ammonium fluoride Ammonium acid fluoride		Solid	White	Odorless
Sinks and mixes with water				

6 FIRE HAZARDS

- 6.1 Flash Point: Not flammable
- 6.2 Flammable Limits in Air: Not flammable
- 6.3 Fire Extinguishing Agents: Not pertinent
- 6.4 Fire Extinguishing Agents Not to be Used:
Do not apply water to adjacent fires
- 6.5 Special Hazards of Combustion Products:
Toxic ammonia and hydrogen fluoride gases may form in fire
- 6.6 Behavior in Fire
- 6.7 Ignition Temperature: Not pertinent
- 6.8 Electrical Hazard: Not pertinent
- 6.9 Burning Rate: Not pertinent

8 WATER POLLUTION

- 8.1 Aquatic Toxicity: Data not available
- 8.2 Waterway Toxicity: Data not available
- 8.3 Biological Oxygen Demand (BOD):
Data not available
- 8.4 Food Chain Concentration Potential: None

NOTES

AMC

AMMONIUM CHLORIDE

Common Synonyms Ammonium chloride Sal ammoniac Salmar Amchloride Ammonerite	Solid White Odorless Sinks and mixes slowly with water
See detailed information on this chemical in the MSDS Handbook. Avoid contact with skin and eyes. Wash thoroughly with water if contact occurs. Do not inhale dust or fumes.	
Fire	Not flammable POISONOUS GASES MAY BE PRODUCED IN FIRE. Irritating gases may be produced when heated. Wear goggles and wear a respirator breathing apparatus.
Exposure	CALL FOR MEDICAL AID DUST Irritating to eyes, nose and throat. If inhaled will cause coughing or difficult breathing. If swallowed will cause nausea and vomiting. If swallowed, do not induce vomiting. If swallowed, drink plenty of water. SOLID Irritating to skin and eyes. If swallowed will cause nausea. If swallowed, do not induce vomiting. If swallowed, drink plenty of water. POISONOUS GASES MAY BE PRODUCED IN FIRE. Irritating gases may be produced when heated. Wear goggles and wear a respirator breathing apparatus.
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS. May be dangerous if it enters water intakes. Do not discharge into waterways.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Disperse and flush.	2. LABELS No hazard label required by Code of Federal Regulations.
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Amchlor, Ammonerite, Ammonium chloride, Sal ammoniac, Salmar. 3.2 Coast Guard Compatibility Classification: Not listed. 3.3 Chemical Formula: NH_4Cl 3.4 IMCO/United Nations Numerical Designation: Not listed.	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: White 4.3 Odor: None
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Gloves of any material, safety glasses or chemical safety goggles, dust mask or respirator as necessary. 5.2 Symptoms Following Exposure: Inhalation of fumes irritates respiratory passages. Ingestion irritates mouth and stomach. Fumes are irritating to eyes. Contact with skin may cause irritation. 5.3 Treatment for Exposure: INHALATION: remove to fresh air. INGESTION: give large amount of water, get medical attention if irritation persists. EYES OR SKIN: flush with plenty of water. 5.4 Toxicity by Inhalation (Threshold Limit Value): 10 mg/m ³ 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 2, oral rat LD ₅₀ = 1.650 mg/kg. 5.7 Lethal Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Odorless.	

6. FIRE HAZARDS 6.1 Flash Point: Not flammable. 6.2 Flammable Limits in Air: Not flammable. 6.3 Fire Extinguishing Agents: Not pertinent. 6.4 Fire Extinguishing Agents Not to Be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Toxic and irritating ammonia and hydrogen chloride gases may form in fire. 6.6 Behavior in Fire: May volatilize and condense on cool surfaces. 6.7 Ignition Temperature: Not pertinent. 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Date: Not pertinent.	8. WATER POLLUTION 8.1 Aquatic Toxicity: 6 ppm 96 hr. sunfish TL ₅₀ fresh water. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: None.
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9. ACI

AMMONIUM CITRATE

Common Synonyms Diammonium citrate Ammonium citrate Citric acid Diammonium salt		Solid	White	Weak Ammonia Odor
		Sinks and mixes with water		
Fire		Combustible POISONOUS GASES MAY BE PRODUCED IN FIRE		
Exposure		DUST Irritating to eyes, nose and throat If inhaled will cause coughing or difficult breathing SOLID Irritating to skin and eyes If swallowed will cause nausea		
Water Pollution		Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes		
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG-44) Disperse and flush		2. LABELS No hazard label required by Code of Federal Regulations		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Ammonium citrate d basic Citric acid diammonium salt Diammonium citrate 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: $(\text{NH}_4)_2\text{HC}_3\text{H}_5\text{O}_7$ 3.4 IMCO/United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): solid 4.2 Color: White 4.3 Odor: Slight ammoniacal		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Approved dust respirator, eye goggles 5.2 Symptoms Following Exposure: Inhalation causes respiratory irritation. Ingestion causes diarrhea. Contact with eyes causes mild irritation. 5.3 Treatment for Exposure: INHALATION: move to fresh air. EYES: flush with water or physiological saline. get medical care if irritation persists. SKIN: flush with water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Data not available 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available				

6 FIRE HAZARDS

- 6.1 Flash Point: Not pertinent (combustible solids)
6.2 Flammable Limits in Air: Not pertinent
6.3 F + Extinguishing Agents: Water
6.4 Fire Extinguishing Agents Not to be Used: Not pertinent
6.5 Special Hazards of Combustion Products: Toxic ammonia gas may form in fire
6.6 Behavior in Fire:
6.7 Ignition Temperature: Not pertinent
6.8 Electrical Hazard: Not pertinent
6.9 Burning Rate: Not pertinent

7 CHEMICAL REACTIVITY

- 7.1 Reactivity with Water: No reaction
7.2 Reactivity with Common Materials:
7.3 Stability During Transport: Stable
7.4 Neutralizing Agents for Acids and Caustics: Not pertinent
7.5 Polymerization: Not pertinent
7.6 Inhibitor of Polymerization: Not pertinent

8. WATER POLLUTION

- 8.1 Aquatic Toxicity: Data not available
8.2 Waterway Toxicity: Data not available
8.3 Biological Oxygen Demand (BOD): Data not available
8.4 Food Chain Concentration Potential: None

9. SELECTED MANUFACTURERS

1. Pfizer Chemicals Div.
235 E. 42nd St.
New York, N.Y. 10017
2. Allied Chemical Corp.
Specialty Chemicals Div.
P.O. Box 1067R
Morristown, N.J. 07960
3. J. T. Baker Chemical Co.
Phillipsburg, N.J. 08865

10 SHIPPING INFORMATION

- 10.1 Grades or Purity: Reagent
10.2 Storage Temperature: Ambient
10.3 Inert Atmosphere: No requirement
10.4 Venting: Open

11 HAZARD ASSESSMENT CODE

(See Hazard Assessment Handbook, CG 44B-3)
SS

12. HAZARD CLASSIFICATIONS

- 12.1 Code of Federal Regulations: Not listed
12.2 HAS Hazard Rating for Bulk Water Transportation: Not listed
12.3 NFPA Hazard Classifications: Not listed

13 PHYSICAL AND CHEMICAL PROPERTIES

- 13.1 Physical State at 15°C and 1 atm: Solid
13.2 Molecular Weight: 226
13.3 Boiling Point at 1 atm: Not pertinent (decomposes)
13.4 Freezing Point: Not pertinent
13.5 Critical Temperature: Not pertinent
13.6 Critical Pressure: Not pertinent
13.7 Specific Gravity: 1.48 at 20°C (solid)
13.8 Liquid Surface Tension: Not pertinent
13.9 Liquid-Water Interfacial Tension: Not pertinent
13.10 Vapor (Gas) Specific Gravity: Not pertinent
13.11 Ratio of Specific Heats of Vapor (Gas): Not pertinent
13.12 Latent Heat of Vaporization: Not pertinent
13.13 Heat of Combustion: Data not available
13.14 Heat of Decomposition: Not pertinent
13.15 Heat of Solution: Not pertinent
13.16 Heat of Polymerization: Not pertinent

NOTES

AGC

AMMONIUM GLUCONATE

Common Synonyms		Solubility	White	Weak ammoniacal odor
Smells and mixes with water				
Fire		Combustible POISONOUS GASES MAY BE PRODUCED IN FIRE.		
Exposure		DUST Irritating to eyes, nose and throat. If inhaled will cause coughing or difficult breathing. SOLID Irritating to skin and eyes. Harmful if swallowed.		
Water Pollution		Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes.		
1 RESPONSE TO DISCHARGE (See Appendix L—Toxicity Information, CG 446-4) Dispense and flush.		2 LABELS No hazard label required by Code of Federal Regulations		
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: No common synonyms. 3.2 Coast Guard Compatibility Classification: Not listed. 3.3 Chemical Formula: $\text{NH}_4\text{C}_6\text{H}_{11}\text{O}_7$ 3.4 IMCO/United Nations Numerical Designation: Not listed.		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid. 4.2 Color: White. 4.3 Odor: Weak ammonia.		
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Respirator for nuisance dust. 5.2 Symptoms Following Exposure: Inhalation of dust irritates nose and throat. Contact with eyes causes mild irritation. 5.3 Treatment for Exposure: INHALATION: remove to fresh air. EYES AND SKIN: flush with water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Data not available. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.				

11. HAZARD ASSESSMENT CODE

(See Appendix A—Hazard Assessment Information, CG 446-3)
N5

12. HAZARD CLASSIFICATIONS

- 12.1 Code of Federal Regulations: Not listed.
12.2 H.S. Hazard Rating for Bulk Water Transportation: Not listed.
12.3 NFPA Hazard Classifications: Not listed.

13. PHYSICAL AND CHEMICAL PROPERTIES

- 13.1 Physical State at 15°C and 1 atm: Solid.
13.2 Molecular Weight: 213.
13.3 Boiling Point at 1 atm: Not pertinent.
13.4 Freezing Point: Not pertinent.
13.5 Critical Temperature: Not pertinent.
13.6 Critical Pressure: Not pertinent.
13.7 Specific Gravity: > 1 at 20°C (solid).
13.8 Liquid Surface Tension: Not pertinent.
13.9 Liquid-Water Interfacial Tension: Not pertinent.
13.10 Vapor (Gas) Specific Gravity: Not pertinent.
13.11 Ratio of Specific Heats of Vapor (Gas): Not pertinent.
13.12 Latent Heat of Vaporization: Not pertinent.
13.13 Heat of Combustion: Data not available.
13.14 Heat of Decomposition: Not pertinent.
13.15 Heat of Solution: Data not available.
13.16 Heat of Polymerization: Not pertinent.

7. CHEMICAL REACTIVITY

- 7.1 Reactivity with Water: No reaction.
7.2 Reactivity with Common Materials:
7.3 Stability During Transport: Stable.
7.4 Neutralizing Agents for Acids and Caustics: Not pertinent.
7.5 Polymerization: Not pertinent.
7.6 Inhibitor of Polymerization: Not pertinent.

10. SHIPPING INFORMATION

- 10.1 Grades or Purity: Pure.
10.2 Storage Temperature: Ambient.
10.3 Inert Atmosphere: No requirement.
10.4 Venting: Open.

AMH

AMMONIUM HYDROXIDE

(< 28% AQUEOUS AMMONIA)

Common Synonyms: Aqueous water Liquid ammonia	Waters: liquid colorless Ammonia: colorless floats and mixes with water. Irritating vapor is produced.
1. Fire Not flammable	
2. Exposure VAPOR Irritating to skin, eyes, nose and throat. If inhaled will cause nausea, vomiting, difficult breathing, or loss of consciousness. LIQUID Will burn skin and eyes. Harmful if swallowed.	
3. Water Pollution HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS. May be dangerous if it enters water intakes.	
4. 1 RESPONSE TO DISCHARGE See Response Methods Manual, CG 445-4. Isolation: 100 ft (30 m) downwind. Protective actions: Decontamination:	5. 2. LABEL 
6. 3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Ammonia, Ammonium Hydroxide, Aqueous Ammonia, Liquid Ammonia 3.2 Coast Guard Compatibility Classification: A 3.3 Chemical Formula: NH_4OH 3.4 IMCO United Nations Numerical Designation: 1512	7. 4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Pungent
8. 5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Rubber boots, gloves, and suit; and goggles; and a respirator with a full facepiece and a high efficiency particulate filter. 5.2 Symptoms Following Exposure: Irritation to skin, eyes, nose and throat; coughing; wheezing; shortness of breath; chest pain; nausea; vomiting; difficulty breathing; loss of consciousness. 5.3 Treatment for Exposure: INHALATION: Move to fresh air. If breathing is difficult, give oxygen. INGESTION: DO NOT induce vomiting. Give water to drink. EYES: Flush with water for at least 15 minutes. SKIN: Flush with water for at least 15 minutes. 5.4 Toxicity by Inhalation (Threshold Limit Value): 1 ppm 5.5 Short-Term Inhalation Limits: 10 ppm (15 min) 5.6 Toxicity by Ingestion: Grade 3, oral rat, LD₅₀ = 140 mg/kg 5.7 Late Toxicity: Do not know. 5.8 Vapor (Gas) Irritant Characteristics: Very irritating to skin, eyes, nose and throat. 5.9 Liquid or Solid Irritant Characteristics: Very irritating to skin, eyes, nose and throat. 5.10 Odor Threshold: 1 ppm	

9. 6 FIRE HAZARDS 6.1 Flash Point: Not applicable 6.2 Flammable Limits in Air: Not applicable 6.3 Fire Extinguishing Agents: Not applicable 6.4 Fire Extinguishing Agents Not to be Used: Not applicable 6.5 Special Hazards of Combustion Products: Not applicable 6.6 Behavior in Fire: Not applicable 6.7 Ignition Temperature: Not applicable 6.8 Electrical Hazard: Do not use electrical equipment 6.9 Turning Rate: Not applicable	10. 8 WATER POLLUTION 8.1 Aquatic Toxicity: Not applicable 8.2 Waterway Toxicity: Not applicable 8.3 Biological Oxygen Demand (BOD): Not applicable 8.4 Food Chain Concentration Potential: Not applicable

NOTES			

ALS

AMMONIUM LAURYL SULFATE

Common Synonyms Dodecyl sulfate, ammonium salt Lauryl ammonium sulfate		Liquid Light yellow May float or sink and mix with water
Not flammable if possible. Keep away from heat and fire. Harmful if swallowed. May be dangerous if it enters water makes. Not flammable if possible.		
Fire	Not flammable POISONOUS GASES MAY BE PRODUCED IN FIRE Overheated solids may produce toxic light gases	
Exposure	LIQUID Irritating to skin and eyes. Harmful if swallowed. May be dangerous if it enters water makes. Not flammable if possible.	
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water makes. Not flammable if possible.	
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Disperse and flush		2 LABELS No hazard label required by Code of Federal Regulations
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Dodecyl sulfate, ammonium salt, Lauryl ammonium sulfate 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: $C_{12}H_{25}OSO_2NH_4 \cdot H_2O$ 3.4 IMCO/United Nations Numerical Designation: Not listed		4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Light yellow 4.3 Odor: Data not available
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Rubber gloves, goggles or face shield 5.2 Symptoms Following Exposure: Contact with liquid irritates eyes and may have drying effect on the skin. Prolonged contact will cause skin irritation. 5.3 Treatment for Exposure: EYES OR SKIN: flush with water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short Term Inhalation Limits: Data not available. 5.6 Toxicity by Injection: Data not available. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.		

6 FIRE HAZARDS

- 5.1 Flash Point: Not pertinent (non combustible water solution)
 6.2 Flammable Limits in Air: Not pertinent
 6.3 Fire Extinguishing Agents: Not pertinent
 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent
 6.5 Special Hazards of Combustion Products: Toxic oxides of nitrogen and sulfur may form in fires.
 6.6 Behavior in Fire:
 6.7 Ignition Temperature: Not pertinent
 6.8 Electrical Hazard: Not pertinent
 6.9 Burning Rate: Not pertinent

8 WATER POLLUTION

- 8.1 Aquatic Toxicity: Data not available
 8.2 Waterway Toxicity: Data not available
 8.3 Biological Oxygen Demand (BOD): Data not available
 8.4 Food Chain Concentration Potential: None

NOTES

AMB

AMMONIUM MOLYBDATE

Common Synonyms Molybdic acid (55%)	Solid Colorless to greenish-yellow or white Odorless Sinks and mixes with water
See also: Molybdenum compounds Molybdenum compounds Molybdenum compounds Molybdenum compounds Molybdenum compounds	
Fire	Not flammable POISONOUS GASES MAY BE PRODUCED IN FIRE When heated, it may decompose to form toxic molybdenum oxides.
Exposure	ALL FORMS OF AMMONIUM MOLYBDATE DUST Irritating to eyes, nose and throat. If inhaled will cause coughing or difficult breathing. Inhalation may cause irritation of the respiratory tract. SOLID Irritating to skin and eyes. Harmful if swallowed. Ingestion may cause irritation of the gastrointestinal tract. ENVIRONMENTAL If swallowed, it may cause irritation of the gastrointestinal tract. If swallowed, it may cause irritation of the gastrointestinal tract. If swallowed, it may cause irritation of the gastrointestinal tract. If swallowed, it may cause irritation of the gastrointestinal tract.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Not recommended for use in water treatment.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook CG 446.4) Issue warning - water contaminant. Should be removed. Chemical and physical treatment.	2. LABELS No hazard label required by Code of Federal Regulations.
3. CHEMICAL DESIGNATIONS 3.1 Synonyms Molybdic acid (55%) 3.2 Coast Guard Compatibility Classification Not listed 3.3 Chemical Formula (NH ₄) ₂ MoO ₄ · 4H ₂ O (for C.P. and Reagent grades only) 3.4 IMCO/United Nations Numerical Designation Not listed	4. AMN

AMMONIUM NITRATE

Common Synonyms Nitrate	Solid pellets or flakes White to light gray or brown Odorless Sinks and mixes with water
Call Fire Department & keep people away Evacuate area as far as possible Do not eat, drink, or breathe dust or fumes Notify local health department	
Fire	May cause fire and explode on contact with combustibles CONTAINERS MAY EXPLODE IN FIRE POISONOUS GASES MAY BE PRODUCED WHEN HEATED Water soluble and non-toxic in small quantities Toxic in large quantities Combustible in dust form Do not use water to extinguish fire Use dry chemical, carbon dioxide, or foam
Exposure	CAUTION: FORMULATED AMN DUST Irritating to eyes, nose, and throat If inhaled, may cause coughing or difficult breathing May be dangerous if it enters water intakes Not a health hazard in solid form Not a hazard to plants or animals
Water Pollution	Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes Not a health hazard in solid form Not a hazard to plants or animals
1 RESPONSE TO DISCHARGE See Response Methods Handbook, CG 445-41 Dispose as instructed	2 LABEL 
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: None 3.2 Coast Guard Commodity Classification: Ammonia 3.3 Chemical Formula: NH ₄ NO ₃ 3.4 IMO/CO United Nations Numerical Designation: 1943	4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: White to light gray or brown 4.3 Odor: None
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Wear self-contained breathing apparatus 5.2 Symptoms Following Exposure: Irritation of eyes and mucous membranes Attention: Ingestion or inhalation causes urination and acid urine. Large amount causes systemic acidosis and methemoglobinemia (abnormal hemoglobin) 5.3 Treatment for Exposure: Remove from exposure — symptoms reversible 5.4 Toxicity by Inhalation (Threshold Limit Value): Not pertinent 5.5 Short-Term Inhalation Limits: Not pertinent 5.6 Toxicity by Ingestion: Not pertinent 5.7 Late Toxicity: Not pertinent 5.8 Vapor (Gas) Irritant Characteristics: Not pertinent 5.9 Liquid or Solid Irritant Characteristics: Not pertinent 5.10 Odor Threshold: Not pertinent	

6 FIRE HAZARDS 6.1 Flash Point: Not flammable 6.2 Flammable Limits in Air: Not flammable 6.3 Fire Extinguishing Agents: Use flooding amounts of water in early stages of fire When large quantities are involved, no massive fires, control efforts should be continued to prevent a fire from expanding 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent 6.5 Special Hazards of Combustion Products: Do not use vacuum devices which may draw in oxygen 6.6 Behavior in Fire: May explode in fire Support fire, shut off the main gas supply 6.7 Ignition Temperature: Not flammable 6.8 Electrical Hazard: Not flammable 6.9 Burning Rate: Not flammable	8 WATER POLLUTION 8.1 Aquatic Toxicity: Data not available 8.2 Waterfowl Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): Data not available 8.4 Food Chain Concentration Potential: None								
7 CHEMICAL REACTIVITY 7.1 Reactivity with Water: Not a reactor 7.2 Reactivity with Common Materials: Not a reactor 7.3 Stability During Transport: If heated, strongly decomposes, giving off a gas and gases which support combustion. Undergoes detonation if heated under confinement 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent 7.5 Polymerization: Not pertinent 7.6 Inhibitor of Polymerization: Not pertinent	9 SELECTED MANUFACTURERS 1. ANS

AMMONIUM NITRATE-SULFATE MIXTURE

Common Synonyms	Solid	Grayish white	Odorless
Sinks and mixes with water			
Small quantities of water will cause the mixture to become very moist. The mixture will not freeze at -20°C (-4°F). The mixture will not ignite at 200°C (392°F). The mixture will not explode at 200°C (392°F).			
Fire	Not flammable Will increase the intensity of a fire POISONOUS GASES MAY BE PRODUCED IN FIRE. Irritating gases may be produced when heated Containers may explode in fire		
Exposure	DUST Irritating to eyes, nose and throat If inhaled will cause coughing or difficult breathing SOLID Irritating to skin and eyes Harmful if swallowed		
Water Pollution	Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning - oxidizing material Disperse and flush		2. LABELS No hazard label required by Code of Federal Regulations

AOL

AMMONIUM OLEATE

Common Synonyms Oleic acid, ammonium salt Lardless soap	Solid paste Yellow brown Weak ammonia odor Sinks and mixes with water
Stop discharge if possible. Keep people away. Avoid contact with skin. Do not eat and do not swallow. Notify local health and pollution control agencies.	
Fire	Combustible POISONOUS GASES MAY BE PRODUCED IN FIRE. Wear goggles and self-contained breathing apparatus. Extinguish with dry chemical or water.
Exposure	CALL FOR MEDICAL AID SOLID Irritating to skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES: hold eyelids open and flush with plenty of water. IF SWALLOWED: and if not unconscious, have victim drink water. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS: do not give anything by mouth.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify pollution control authorities.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Disperse and flush.	
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Ammonia soap Oleic acid, ammonium salt 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: $C_{18}H_{33}OONH_4 \cdot H_2O$ 3.4 INCO/United Nations Numerical Designation: Not listed	2. LABELS No hazard label required by Code of Federal Regulations.
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: goggles or face shield, rubber gloves. 5.2 Symptoms Following Exposure: Contact with eyes causes irritation. Prolonged contact may cause skin irritation. 5.3 Treatment for Exposure: EYES OR SKIN: flush with water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Not pertinent. 5.5 Short-Term Inhalation Limits: Not pertinent. 5.6 Toxicity by Ingestion: Data not available. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Not pertinent. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.	
4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Paste, solid. 4.2 Color: Yellow-brown. 4.3 Odor: Weak ammonia.	

6. FIRE HAZARDS 6.1 Flash Point: Not pertinent. 6.2 Flammable Limits in Air: Not pertinent. 6.3 Fire Extinguishing Agents: Water, dry chemical. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Toxic oxides of nitrogen may form in fire. 6.6 Behavior in Fire: 6.7 Ignition Temperature: Not pertinent. 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: Not pertinent.	8. WATER POLLUTION 8.1 Aquatic Toxicity: Data not available. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: None.
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9. SELECTED MANUFACTURERS 1. Emkay Chemical Co. 319 Second Street Elizabeth, N. J. 07206 2. Pfaltz and Bauer, Inc. 126-04 Northern Blvd. Flushing, N. Y. 11368
10. SHIPPING INFORMATION 10.1 Grades or Purity: 70% in water. Technical. 10.2 Storage Temperature: Ambient. 10.3 Inert Atmosphere: Ventilated (natural). 10.4 Venting: Open.	
11. HAZARD ASSESSMENT CODE (See Hazard Assessment Handbook, CG 446-3) NS	13. 12. HAZARD CLASSIFICATIONS 12.1 Code of Federal Regulations: Not listed. 12.2 NAS Hazard Rating for Bulk Water Transportation: Data not available. 12.3 MFPA Hazard Classifications: Data not available.	
NOTES	

(Continued on pages 1 and 6)

AOX

AMMONIUM OXALATE

Common Synonyms Oxalic acid, diammonium salt Diammonium oxalate Ammonium oxalate hydrate		Solid White Odorless
Seaks and mixes slowly with water		
AVOID CONTACT WITH SOLIDS AND DUST. KEEF PROFILE AWAY Wear eye respirator and gloves when working with solids including gloves. Stop the use of solids. Call fire department. Isolate and remove materials if possible. Notify state health and safety officials if necessary.		
Fire		Combustible POISONOUS GASES MAY BE PRODUCED IN FIRE Wear goggles and wear protective clothing. Extinguish with water.
 Exposure		CALL FOR MEDICAL AID DUST POISONOUS IF INHALED OR IF SKIN IS EXPOSED If inhaled will cause coughing or difficult breathing. If inhaled, remove person to fresh air. If severe, call for medical aid. SOLID POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED Will burn skin and eyes. If on skin, remove by flushing with plenty of water. If IN EYES, flush with plenty of water. If IN EYES, flush with plenty of water. If SWALLOWED, do not induce vomiting. If SWALLOWED, do not induce vomiting. If SWALLOWED, do not induce vomiting. If SWALLOWED, do not induce vomiting.
Water Pollution		Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify state health and safety officials if necessary.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 448-4) Issue warning: poison water contaminant. Restrict access. Should be removed. Chemical and physical treatment.		2. LABELS No hazard label required by Code of Federal Regulations.
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Ammonium oxalate hydrate; Diammonium oxalate; Oxalic acid; diammonium salt. 3.2 Coast Guard Compatibility Classification: Not listed. 3.3 Chemical Formula: $(\text{NH}_4)_2\text{C}_2\text{O}_4 \cdot \text{H}_2\text{O}$ 3.4 IMCO/United Nations Numerical Designation: Not listed.		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid. 4.2 Color: White. 4.3 Odor: None.
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Approved dust respirator; rubber or plastic coated gloves; chemical goggles. 5.2 Symptoms Following Exposure: Ingestion or excessive inhalation of dust causes system poisoning; possible symptoms include pain in throat, esophagus and stomach; mucous membranes turn white; vomiting; severe purging; weak pulse; card or vascular collapse; neuromuscular symptoms. Contact with eyes causes irritation. Contact with skin causes irritation or severe burns. 5.3 Treatment for Exposure: Speed is essential. INHALATION: remove to fresh air. INGESTION: call physician immediately; induce vomiting. EYES: flush with water and seek medical attention. SKIN: flush with water. OTHER: watch for swelling of the gottis and delayed constriction of the esophagus. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Data not available. 5.7 Late Toxicity: Kidney damage. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Uliquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Odorless.		

6. FIRE HAZARDS 6.1 Flash Point: Not pertinent (combustible solid) 6.2 Flammable Limits in Air: Not pertinent 6.3 Fire Extinguishing Agents: Water, foam 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent 6.5 Special Hazards of Combustion Products: Toxic oxides of nitrogen may form in fire 6.6 Behavior in Fire: 6.7 Ignition Temperature: Not pertinent 6.8 Electrical Hazard: Not pertinent 6.9 Burning Rate: Not pertinent	8. (Continued on pages 4 and 6)	
NOTES	

APB

AMMONIUM PENTABORATE

Common Synonyms: Ammoniate pentaborate tetrahydrate Ammonium decaborate octahydrate	Solid White Odorless Sinks and mixes slowly with water
Not a hazard to water, land, or air Avoid contact with water, land, or air Avoid contact with food, feed, or water Not a hazard to fish, birds, or mammals	
Fire	Not flammable POISONOUS GASES MAY BE PRODUCED IN FIRE. Wear goggles and gloves when handling apparatus
Exposure	CALL FOR MEDICAL AID DUST Irritating to eyes, nose and throat. If inhaled will cause coughing or difficult breathing. Remove person to fresh air and rest. If severe, call doctor. If on skin, wash with plenty of water. If in eyes, hold open and flush with plenty of water. SOLID Irritating to skin and eyes. If swallowed will cause nausea and vomiting. Remove contaminated clothing and shoes. Flush affected area with plenty of water. If in eyes, hold open and flush with plenty of water. If swallowed, drink plenty of water. If on skin, wash with plenty of water. If in eyes, hold open and flush with plenty of water. If swallowed, drink plenty of water. If on skin, wash with plenty of water. If in eyes, hold open and flush with plenty of water.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Water is a health hazard if drunk. Not a hazard to land water, stream
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Disperse and flush	2. LABELS No hazard label required by Code of Federal Regulations
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Ammonium decaborate octahydrate Ammonium pentaborate tetrahydrate 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: $\text{NH}_4\text{B}_5\text{O}_{14} \cdot 4\text{H}_2\text{O}$ or $(\text{NH}_4)_5\text{B}_5\text{O}_{14} \cdot 8\text{H}_2\text{O}$ 3.4 IMCO/United Nations Numerical Designation: Not listed	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: White 4.3 Odor: None
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Disposable type respirator, side shield safety spectacles, full brimmed hard hat, goggles, ammonia gas mask. 5.2 Symptoms Following Exposure: Inhalation of dust may result in non-specific irritation of upper respiratory tract. Ingestion of large quantities may produce symptoms of non-specific irritation of the gastrointestinal tract: nausea, vomiting, cramps, diarrhea. Contact with dust causes moderate eye irritation and minor skin irritation. 5.3 Treatment for Exposure: INHALATION: move from contaminated atmosphere, if respirators discomfort persists, see a physician. INGESTION: give large amounts of water or warm salty water to induce vomiting and continue until vomitus is clear. obtain medical attention if abdominal discomfort persists. EYES: flush with large quantities of running water for a minimum of 15 min. obtain medical help if irritation persists. SKIN: immediately flush affected areas with water. obtain medical help if irritation persists. 5.4 Toxicity by Inhalation (Threshold Limit Value): 10 mg/m ³ as TSP, not listed. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Data not available. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.	

6. APE

AMMONIUM PERSULFATE

Common Synonyms Ammonium persulfate Peroxy disulfuric acid, ammonium salt		Solid	Light straw to colorless	Mild unpleasant odor
		Sinks and mixes with water		
See the safety data sheet for more information. Call for MSDS Form Avoid contact with skin and dust. Isolate and remove the spilled material. Notify your local health department for disposal.				
Fire	Not flammable Will increase the intensity of a fire POISONOUS GASES MAY BE PRODUCED IN FIRE Wear goggles and avoid contact with the eyes. Evacuate area and call for help.			
Exposure	CALL FOR MEDICAL AID DUST Irritating to eyes, nose and throat Harmful if inhaled Breathing irritants can cause difficulty in breathing. If irritation occurs, get fresh air and call for help. SOLID Irritating to skin and eyes Harmful if swallowed. Remove contaminated clothing and shoes. If irritation occurs, get fresh air and call for help. IF SWALLOWED: Do not induce vomiting. If swallowed, rinse mouth with water. IF SWALLOWED: Do not induce vomiting. If swallowed, rinse mouth with water. IF SWALLOWED: Do not induce vomiting. If swallowed, rinse mouth with water.			
Water Pollution	Dangerous to aquatic life in high concentrations. May be dangerous if it enters water intakes. Notify your local health department for disposal. Notify your local health department for disposal.			
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 444-4.) Toxic warning: avoid breathing material. Disperse and flush.		2. LABEL 		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Ammonium persulfate Peroxydisulfuric acid, ammonium salt 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: (NH4)2S2O8 3.4 IBCO/United Nations Material Designation: 5.1, 1244		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: Light straw to colorless 4.3 Odor: Slight acid		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: U.S. Bureau of Mines approved toxic dust mask, chemical goggles, rubber gloves, nonpermeated shoes. 5.2 Symptoms Following Exposure: Inhalation produces slight toxic effects. Contact with dust irritates eyes and causes skin rash. 5.3 Treatment for Exposure: INHALATION: Remove to fresh air. EYES: Wash with water for 20 min. call a physician. SKIN: Wash with water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 2, oral LD50 = 120 mg/kg. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.				

6 FIRE HAZARDS 6.1 Flash Point: Not pertinent 6.2 Flammable Limits in Air: Not pertinent 6.3 Fire Extinguishing Agents: Water 6.4 Fire Extinguishing Agents Not to be Used: 6.5 Special Hazards of Combustion Products: Toxic oxides of nitrogen and sulfur gases fumes may form in fire 6.6 Behavior in Fire: Decomposes with loss of oxygen that increases intensity of fire 6.7 Ignition Temperature: Not pertinent 6.8 Electrical Hazard: Not pertinent 6.9 Burning Rate: Not pertinent	8 WATER POLLUTION 8.1 Aquatic Toxicity: 120 ppm 48 hr daphnia 11 ppm fresh water 8.2 Waterway Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): None 8.4 Food Chain Concentration Potential: None
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction 7.2 Reactivity with Common Materials: Contact with grease, wood and other combustibles may result in a fire 7.3 Stability During Transport: Stable 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent 7.5 Polymerization: Not pertinent 7.6 Inhibitor of Polymerization: Not pertinent	9. SELECTED MANUFACTURERS 1. FMC Corporation 6810 River Rd. and Sawyer Ave. Tonawanda, N.Y. 14150 2. Allied Chemical Corp. Specialty Chemicals Co. P.O. Box 1007R Morristown, N.J. 07960 3. J.T. NOTES	

AMMONIUM PHOSPHATE

Common Synonyms: Monoammonium orthophosphate Ammonium phosphates, diamer Secondary ammonium phosphate Diammonium hydrogen phosphate Diammonium orthophosphate	Solid White Weak ammonia odor Sinks and mixes with water
No acute or chronic toxicity was observed in rats or mice by oral or inhalation routes. No irritation was observed in the eyes or skin of rats. No irritation was observed in the respiratory tract of rats.	
Fire	Not flammable Irritating fumes may be produced when heated
Exposure	CALL FOR MEDICAL AID PELT Irritating to eyes, nose and throat If inhaled will cause coughing or difficult breathing If in contact with skin, wash with water If in contact with clothing, remove clothing and wash with water SOLID Irritating to skin and eyes Harmful if swallowed If swallowed, do not induce vomiting If swallowed, drink with water If in contact with skin, wash with water If in contact with clothing, remove clothing and wash with water If swallowed, do not induce vomiting If swallowed, drink with water
Water Pollution	Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes No data available on biodegradability No data available on persistence
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Expense and flush	2. LABELS No hazard labels required by Code of Federal Regulations
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Ammonium phosphate, diamer Diammonium hydrogen phosphate Diammonium orthophosphate Monoammonium orthophosphate Secondary ammonium phosphate 3.2 Corrosion/Compatibility Classification: Not listed 3.3 Chemical Formula: $\text{NH}_4\text{H}_2\text{PO}_4$ and $(\text{NH}_4)_2\text{HPO}_4$ (Consult page 4)	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): solid 4.2 Color: White 4.3 Odor: Diammonium - faint ammonia Monoammonium - faint acid
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Dust mask, protective gloves and goggles. When diammonium phosphate is stored in closed area, self contained breathing apparatus is required to protect against ammonia fumes. 5.2 Symptoms Following Exposure: Irritation of mucous membranes. Inhalation of monoammonium form causes irritation of mucous membranes. With diammonium form, ammonia vapors are evolved, which cause pulmonary edema and asphyxiation. Contact with solid or with ammonia gas causes irritation of eyes and skin. 5.3 Treatment for Exposure: INHALATION: If exposed to ammonia fumes from diammonium phosphate, give artificial respiration and oxygen. Provide enclosed respiration. EYES: Flush with water for at least 15 min. IRRITATION PERIODS: Get medical attention. SKIN: Wash with water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Data not available 5.7 Low Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: (None)	

6. FIRE HAZARDS 6.1 Flash Point: Not flammable 6.2 Flammable Limits in Air: Not flammable 6.3 Fire Extinguishing Agents: Not pertinent 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent 6.5 Special Hazards of Combustion Products: Toxic and irritating fumes of ammonia and oxides of nitrogen may form in fires. 6.6 Behavior in Fire: 6.7 Ignition Temperature: Not pertinent 6.8 Electrical Hazard: Not pertinent 6.9 Burning Rate: Not pertinent	8. WATER POLLUTION 8.1 Aquatic Toxicity: 155 ppm NH ₄ ⁺ at head mussels 100% 8.2 Waterfowl Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): Data not available 8.4 Food Chain Concentration Potential: None
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction 7.2 Reactivity with Common Materials: 7.3 Stability During Transport: Stable 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent 7.5 Polymerization: Not pertinent 7.6 Inhibitor of Polymerization: Not pertinent	9. ASL

AMMONIUM SILICOFLUORIDE

Common Synonyms Ammonium Fluoroborate	Solid White Odorless Sinks and mixes slowly with water
AVOID CONTACT WITH NOSE AND DON'T GET IT STUFFED AWAY WITH A TONGUE OR FINGER. IF IT GETS IN YOUR EYE, WASH IT OUT WITH WATER. IF IT GETS ON YOUR SKIN, WASH IT OFF WITH WATER. IF IT GETS ON YOUR CLOTHING, REMOVE IT IMMEDIATELY.	
Fire	Not flammable POISONOUS GASES MAY BE PRODUCED IN FIRE Irritating gases may be produced when heated
 Exposure	AVOID MEDICAL USE DUST POISONOUS IF INHALED OR IF SKIN IS EXPOSED It is irritating to the eyes, nose, throat, and skin. If swallowed, it may cause severe irritation of the digestive tract and may be fatal. SOLID POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED Will burn skin and eyes. Harmful if swallowed. Remove contaminated clothing immediately. Flush skin and eyes with water for at least 15 minutes. IF SWALLOWED, DO NOT INDUCE VOMITING. Rinse mouth with water and take to a hospital immediately. IF SWALLOWED, DO NOT INDUCE VOMITING. Rinse mouth with water and take to a hospital immediately.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water bodies. Do not discharge into water bodies.
1. RESPONSE TO DISCHARGE (See Response Memory Handbook, CG 446-4) Issue warning: water contamination. Protect access. Evacuate and flush.	2. LABELS No hazard label required by Code of Federal Regulations.
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Ammonium Fluoroborate 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: $(NH_4)_2SiF_6$ 3.4 HACO/United Nations Numerical Designation: Not listed	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: White 4.3 Odor: None
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Dust: respiratory and resistant clothing and non-rubber gloves, goggles and safety shoes. 5.2 Symptoms Following Exposure: Inhalation: Irritation, cough, pulmonary irritation and, in fatal in some cases. Ingestion may be fatal. Contact with dust causes irritation of eyes and irritation or ulceration of skin. 5.3 Treatment for Exposure: INHALATION: remove patient to fresh air. INGESTION: cause vomiting by giving warm water or mustard water. Have patient drink large quantities of warm water. If necessary, give stimulant such as strong coffee. Keep patient warm. EYES: Flush with water for 15 minutes. Holding eyelids open. SKIN: Wash with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): 2.5 mg/m ³ 5.5 Short-Term Inhalation Limit: Data not available 5.6 Toxicity by Ingestion: Grade 3. LD 50: 300 mg/kg 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available

AMR

AMMONIUM STEARATE

Common Synonyms Ammonium Stearate derivative Stearic acid, ammonium salt		Solid paste or liquid White to yellow Weak ammoniac odor May float or sink in water
Stop discharge if possible. Keep people away. Call fire department. Avoid contact with liquid and solid. Isolate and remove discharged material. Notify local health and pollution control agencies.		
Fire	Combustible solid. Solution not flammable. POISONOUS GASES MAY BE PRODUCED IN FIRE. Wear goggles and self-contained breathing apparatus. Extinguish with water dry chemical foam or carbon dioxide.	
Exposure	CALL FOR MEDICAL AID LIQUID OR SOLID: Irritating to skin and eyes. If swallowed will cause nausea. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES: hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS: have victim drink water. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS: do nothing except keep victim warm.	
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operation of nearby water intakes.	
1. RESPONSE TO DISCHARGE See Response Methods Handbook, CG 445-4. Discharge instructions.		2. LABELS See Response Methods Handbook, CG 445-4. Labels: Federal, DOT, etc.
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Ammonium stearate derivative, Stearic acid, ammonium salt. 3.2 Coast Guard Competibility Classification: Not listed. 3.3 Chemical Formula: $C_{17}H_{35}NO_2$, H_{35} 3.4 HMCO/United Nations Numerical Designation: Not listed.		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Paste, solid or liquid. 4.2 Color: White to yellow. 4.3 Odor: Slight ammoniac.
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Goggles and gloves. 5.2 Symptoms following Exposure: Not known. 5.3 Treatment for Exposure: INHALATION: INGESTION: IF SWALLOWED: IF IN EYES: IF ON SKIN: Wash with water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Not listed. 5.5 Short-Term Inhalation Limits: Not listed. 5.6 Toxicity by Ingestion: Not listed. 5.7 Acute Toxicity: Not listed. 5.8 Vapor (Gas) Irritant Characteristics: Not listed. 5.9 Liquid or Solid Irritant Characteristics: Not listed. 5.10 Odor Threshold: Not listed.		

6. FIRE HAZARDS 6.1 Flash Point: Greater than 100°C (approximate value for most fatty acids). 6.2 Flammable Limits in Air: Not pertinent. 6.3 Fire Extinguishing Agents: Water, foam, dry chemical, carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: None. 6.5 Special Hazards of Combustion Products: Toxic amount of ammonia, carbon monoxide, carbon dioxide. 6.6 Behavior in Fire: None. 6.7 Ignition Temperature: Data not available. 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: Not pertinent.		8. ASM

AMMONIUM SULFAMATE

Common Synonyms Amisate Sulfamic acid, monoammonium salt Ammonium amidosulfonate Ammonium amidosulphate AMS		Solid White or brownish gray Quotless Sinks and mixes with water
Stop discharge if possible. Keep people away. Avoid contact with solid and dust. Isolate and remove discharged material. Notify local health and pollution control agencies.		
Fire	Not flammable. POISONOUS GASES MAY BE PRODUCED IN FIRE. Wear goggles and full contained breathing apparatus.	
Exposure	CALL FOR MEDICAL AID DUST Irritating to eyes, nose and throat. If inhaled will cause coughing or difficult breathing. If in eyes, hold eyelids open and flush with plenty of water. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. SOLID Irritating to skin and eyes. If swallowed will cause nausea or vomiting. Remove contaminated clothing and shoes. Push affected areas with plenty of water. If IN EYES, hold eyelids open and flush with plenty of water. If SWALLOWED and victim is CONSCIOUS, have victim drink water or milk. If SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.	
Water Pollution	Dangerous to aquatic life in high concentrations. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.	
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Disperse, and flush.		2. LABELS No hazard label required by Code of Federal Regulations.
3. NOTES			

REVISED 1978

ASF

AMMONIUM SULFIDE

Common Synonyms Ammonium sulfide solution Ammonium hydrogen sulfide solution Ammonium sulfhydrate solution	Liquid Colorless to yellow Strong odor of rotten eggs and ammonia Mixes with water. Irritating vapor is produced. Boiling point is 104°F
Avoid contact with skin, eyes, or clothing. Wear protective clothing and equipment. See also MSDS for Ammonium Sulfide.	
Fire	FLAMMABLE. POISONOUS GASES MAY BE PRODUCED IN FIRE. When heated, it releases toxic and irritating hydrogen sulfide gas.
Exposure	VAPOR Irritating to eyes, nose and throat. If inhaled will cause dizziness, headache, coughing, or difficult breathing. LIQUID Will burn skin and eyes. If swallowed will cause nausea. IF SWALLOWED: Give large amount of water. Do not induce vomiting. IF IN EYES: Flush with large amounts of water. IF SWALLOWED: Give large amount of water. Do not induce vomiting.
Water Pollution	Dangerous to aquatic life in high concentrations. May be dangerous if it enters water intakes.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CO 444-4) Issue warning: air-contaminant, water-contaminant. Restrict access. Should be removed. Chemical and physical treatment.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Ammonium hydrogen sulfide solution, Ammonium sulfhydrate solution, Ammonium sulfide solution. 3.2 Coast Guard Compatibility Classification: Not listed. 3.3 Chemical Formula: (NH ₄) ₂ S, NH ₄ SH, H ₂ S. 3.4 IMCO/United Nations Numerical Designation: Not listed.	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Yellow to orange (fuming solution); colorless to yellow. 4.3 Odor: Strong odor of sulfide and ammonia.
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Self-contained breathing apparatus, rubber or plastic gloves, splash goggles, rubber shoes. 5.2 Symptoms Following Exposure: Inhalation of 500 ppm for 30 min. produces headaches, dizziness, bronchial pneumonia; 600 ppm for 30 min. can cause death. Ingestion causes severe irritation of mucous membranes and stomach. Contact with liquid causes severe burns of eyes and severe skin irritation. May be absorbed through skin and cause hydrogen sulfide poisoning. 5.3 Treatment for Exposure: Get medical attention following all overexposures to this compound. INHALATION: move victim to fresh air, give artificial respiration, oxygen, consult physician. INGESTION: give large amount of water. EYES OR SKIN: wash with large quantities of water for 15 min., consult physician. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Data not available. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.	

6. FIRE HAZARDS 6.1 Flash Point: 72°F C C 6.2 Flammable Limits in Air: 4% - 46% (hydrogen sulfide) 6.3 Fire Extinguishing Agents: Water, dry chemical, carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: 6.5 Special Hazards of Combustion Products: Toxic hydrogen sulfide gas is released when solution is heated. If ignited, this will form irritating sulfur dioxide gas. 6.6 Behavior in Fire: 6.7 Ignition Temperature: Data not available. 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: Not pertinent.	8. WATER POLLUTION 8.1 Aquatic Toxicity: 100 ppm/72 hr/goldfish/killed/fresh water; 248 ppm/48 hr/moquitosfish/TI ₅₀ /fresh water. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: None.
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: Severely corrodes copper, zinc and their alloys. 7.3 Stability During Transport: Stable, but toxic hydrogen sulfide and ammonia gases may collect in enclosed spaces. 7.4 Neutralizing Agents for Acids and Caustics: Dilute with water. Do not attempt to neutralize with acid. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9. SELECTED MANUFACTURERS 1. Argus Chemical Corp. Halby Division 600 Terminal Avenue New Castle, Del. 19720 2. J. T. Baker Chemical Co. Phillipsburg, N. J. 08865 3. Chemical Products Corporation Cartersville, Ga. 30120
11. HAZARD ASSESSMENT CODE (See Hazard Assessment Handbook, CO 444-3) A-P	10. SHIPPING INFORMATION 10.1 Grade or Purity: Technical, 45-50% in water; Reagent, 52-60% in water. 10.2 Storage Temperature: Ambient. 10.3 Inert Atmosphere: Ventilated (natural). 10.4 Venting: Open (flame arrester).
12. HAZARD CLASSIFICATIONS 12.1 Code of Federal Regulations: Flammable Liquid. 12.2 NAS Hazard Rating for Bulk Water Transportation: Not listed. 12.3 NFPA Hazard Classifications: Not listed.	13. PHYSICAL AND CHEMICAL PROPERTIES 13.1 Physical State at 15°C and 1 atm: Solid or liquid. 13.2 Molecular Weight: 68.14 (solute). 13.3 Boiling Point at 1 atm: 104°F = 40°C = 313°K. 13.4 Freezing Point: Not pertinent. 13.5 Critical Temperature: Not pertinent. 13.6 Critical Pressure: Not pertinent. 13.7 Specific Gravity: 0.99-1.01 at 20°C (liquid). 13.8 Liquid Surface Tension: Data not available. 13.9 Liquid-Water Interfacial Tension: Not pertinent. 13.10 Vapor (Gas) Specific Gravity: Not pertinent. 13.11 Ratio of Specific Heats of Vapor (Gas): Not pertinent. 13.12 Latent Heat of Vaporization: Not pertinent. 13.13 Heat of Combustion: Not pertinent. 13.14 Heat of Decomposition: Not pertinent. 13.15 Heat of Solution: 95.0 Btu/lb = 52.8 cal/g = 2.21 x 10 ⁵ J/kg. 13.16 Heat of Polymerization: Not pertinent.

ATR

AMMONIUM TARTRATE

Common Synonyms 1 Tartaric acid, ammonium salt		Solid	White	Odorless
		Sinks and mixes with water		
Stop discharge as soon as possible. Keep people away. Call for decontamination. Avoid contact with solid and dust. Isolate and remove discharged material. Notify local health and pollution control agencies.				
Fire	Combustible POISONOUS GASES MAY BE PRODUCED IN FIRE. Wear goggles and self-contained breathing apparatus. Extinguish with water.			
Exposure	CALL FOR MEDICAL AID DUST Irritating to eyes, nose and throat Harmful if inhaled If in eyes, hold eyelids open and flush with plenty of water. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. SOLID Irritating to skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. If IN EYES, hold eyelids open and flush with plenty of water. If SWALLOWED, induce vomiting. DO NOT induce vomiting if swallowed. If SWALLOWED, give plenty of water to drink. If SWALLOWED, give plenty of water to drink.			
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and pollution control agencies. Notify operators of nearby water intakes.

NOTES

AMT

AMMONIUM THIOCYANATE

Common Synonyms: Ammonium isothiocyanate Ammonium rhodanide Ammonium rhodanide Ammonium thiocyanate Thiocyanic acid, ammonium salt	Solid or solution (in water): White Odor: a Sinks and mixes with water
No. of charge if combustible: Keep people away Call fire department Action: To fight: Report to fire department Action: To fight: Report to fire department Action: To fight: Report to fire department Action: To fight: Report to fire department	
Fire	Combustible Solid: Solution not flammable POISONOUS GASES MAY BE PRODUCED IN FIRE. Wear goggles and wear a flame-resistant respirator. Extinguish with water.
Exposure	CALL FOR MEDICAL AID VAPOR OR DUST: Irritating to eyes, nose and throat. If inhaled will cause coughing or difficult breathing. If eyes are irritated, flush with plenty of water. If nose is irritated, wipe with moist absorbent tissue. If mouth is irritated, gargle with water. LIQUID OR SOLID: Irritating to skin and eyes. If swallowed will cause nausea or vomiting. If on skin, wash with plenty of water. If in eyes, flush with plenty of water. If swallowed, do not induce vomiting. If swallowed, do not induce vomiting. If swallowed, do not induce vomiting. If swallowed, do not induce vomiting.
Water Pollution	Dangerous to aquatic life in high concentrations. May be dangerous if it enters water intakes. No known chronic toxicity to fish. No known chronic toxicity to birds.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 444-2) Issue warning: water contaminant Disperse and flush	2. LABELS No hazard label required by Code of Federal Regulations
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Ammonium rhodanide, Ammonium rhodanide, Ammonium isothiocyanate, Ammonium thiocyanate, Thiocyanic acid, ammonium salt 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: NH ₄ SCN 3.4 IMCO/United Nations Numerical Designation: Not listed	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid, or solution in water 4.2 Color: White 4.3 Odor: None
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Rubber or plastic gloves, rubber or plastic apron, standard goggles 5.2 Symptoms Following Exposure: Inhalation of dust causes irritation of nose and throat. Ingestion causes dizziness, cramps, nervous disturbances. Dust irritates eyes. Can be absorbed through skin. Prolonged contact may produce various skin eruptions, dizziness, cramps, nausea, and mild to severe disturbance of the nervous system. 5.3 Treatment for Exposure: INHALATION: move to fresh air. INGESTION: give large amount of water, get medical attention. EYES OR SKIN: wash with water, consult physician. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 2, oral rat LD ₅₀ = 854 mg/kg 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available

ATF

AMMONIUM THIOSULFATE

Common Synonyms Ammonium hyposulfite		Solid or solution (in water)	Colorless liquid or white solid	Ammonia odor
Sinks and mixes with water				
Stop discharge if possible. Keep people away. Avoid contact with liquid and solid. Avoid contact with dust and dust. Isolate and remove discharged material. Notify local health and pollution control agencies.				
Fire	Not flammable POISONOUS GASES MAY BE PRODUCED IN FIRE. Wear goggles and use confined breathing apparatus.			
Exposure	CALL FOR MEDICAL AID DUST Irritating to eyes, nose and throat. If inhaled will cause difficult breathing. If eyes hold eyelids open and flush with plenty of water. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. SOLUTION OR SOLID Irritating to skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. If EYES hold eyelids open and flush with plenty of water. SWALLOWED: Do not induce vomiting. If victim is conscious, give water orally. If SWALLOWED: Do not induce vomiting. If victim is unconscious, give water orally. Do nothing except keep victim warm.			
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and pollution control agencies. Notify operating nearby water intakes.			
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 448-4) Issue warning, water contaminant. Disperse and flush.		2. LABELS No hazard label required by Code of Federal Regulations.		
3. NOTES	

AML

AMYL ACETATE

Common Synonyms: Acetic acid (any) ester	Watery liquid Colorless to yellow Banana odor Floats on water. Flammable. Irritant. Vapor is produced.
Shut off ignition sources and call fire department. Stop discharge if possible. Keep people away. Avoid contact with liquid and vapor. Spray upward and use water spray to knock down vapor. Isolate and remove discharged material. Notify local health and pollution control agencies.	
Fire	FLAMMABLE Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Extinguish with dry chemical, alcohol foam, or carbon dioxide. Water may be ineffective on fire. Cool exposed containers with water.
Exposure	CALL FOR MEDICAL AID VAPOR Irritating to eyes, nose and throat. If inhaled, may cause nausea, headache or dizziness. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. LIQUID Irritating to skin and eyes. Remove clothing and flush skin and eyes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water.
Water Pollution	Effect of low concentrations on aquatic life is unknown. Fouling to shoreline. May be dangerous if it enters water intakes. Notify local health and pollution control officials. Notify operators of nearby water intakes.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-3) Toxic warning: High flammability. Mechanical containment. Chemical and physical treatment.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Amyl acetate, mixed isomers. Pentyl acetates. 3.2 Coast Guard Competibility Classification: Ester. 3.3 Chemical Formula: $\text{CH}_3\text{COOC}_5\text{H}_{11}$ 3.4 IMCO United Nations Numerical Designation: 1.2 1104	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Colorless to yellow. 4.3 Odor: Pleasant banana-like mild, characteristic banana or pear-like odor.
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Air supplied mask, chemical cartridge respirator, protective gloves, goggles, safety shower, and eye bath. 5.2 Symptoms Following Exposure: Irritation of eyes, nose and throat; headache, nausea, headache. 5.3 Treatment for Exposure: INHALATION: move victim to fresh air; call physician; administer oxygen. SKIN OR EYES: flush with water. 5.4 Toxicity by Inhalation (Threshold Limit Value): 500 ppm. 5.5 Short-Term Inhalation Limits: 200 ppm for 15 min. 5.6 Toxicity by Ingestion: Grade I; LD50 = 6.5 g/kg (rat). 5.7 Late Toxicity: None. 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause a slight smarting of the eyes or respiratory system if present in high concentration. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: No appreciable hazard. Practically harmless to the skin. If spilled on clothing and allowed to remain, may cause smarting and reddening of the skin. 5.10 Odor Threshold: 0.067 ppm.	

6. FIRE HAZARDS 6.1 Flash Point: (est.) 69°F (21°C) (est.) 91°F (33°C) 6.2 Flammable Limits in Air: 1.1% - 7.5% (v) 6.3 Fire Extinguishing Agents: Alcohol foam, dry chemical, carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Water in straight hose stream with water and spread fire and should not be used. 6.5 Special Hazards of Combustion Products: Not pertinent. 6.6 Behavior in Fire: Not pertinent. 6.7 Ignition Temperature: 522°F (272°C) 6.8 Electrical Hazard: No ignition. 6.9 Burning Rate: 4 ft/min (v)	8. NOTES	

REVISED 1978

AAN

n-AMYL ALCOHOL

Common Synonyms n-Pentanol 1-Pentanol n-Buthanol	Liquid Colorless Mild, sweet odor Floats on water. Flammable; irritating vapor is produced.
	Avoid all fire sources and call fire department. Stop discharge if possible; keep people away. Avoid contact with liquid and vapor. May be washed off with water; wash with soap and water. Do not inhale vapors or discharge material. Notify local health and pollution control agencies.
Fire	FLAMMABLE. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Fight fires with dry chemical, alkali, foam, carbon dioxide. Water may be ineffective on fire. Do not expose containers with water.
Exposure	CALL FOR MEDICAL AID. VAPOR Irritating to eyes, nose and throat. If inhaled, will cause coughing, nausea, headache, or difficult breathing. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. LIQUID Irritating to eyes. Harmful if swallowed. Not irritating to skin. Flush affected areas with plenty of water. IF IN EYES, flush eyelids open and flush with plenty of water. IF SWALLOWED, flush mouth with water. DO NOT INDUCE VOMITING. Have victim drink water or milk.
Water Pollution	Effect of low concentrations on aquatic life is unknown. Floating to shoreline. May be dangerous if it enters water intakes. Notify local health and pollution control agencies. Notify port and local water intakes.
1. RESPONSE TO DISCHARGE (See Response Methods Manual, CG 446-4) Dispense and flush.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: n-Amyl alcohol n-Butyl alcohol 1-Pentanol Pentanol, 1-ol 3.2 Coast Guard Compatibility Classification: Alcohol 3.3 Chemical Formula: C ₅ H ₁₂ O 3.4 IMCO United Nations Numerical Designation: 1.2, 1.20	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Like alcohol, causes coughing
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Face splash shield, goggles, protective clothing, and cartridge respirator. 5.2 Symptoms Following Exposure: Irritation to skin, eyes, and respiratory tract; headache and vertigo; dizziness and nausea; vomiting and diarrhea. Double vision, deafness, delirium, and occasionally fatal poisoning preceded by severe nervous symptoms have been reported. Coma, glycosuria, and methemoglobinemia can occur. 5.3 Treatment for Exposure: SKIN: remove chemicals by thorough washing with soap and water. EYES: wash promptly with large quantities of water for at least 15 mins. Call a doctor. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: 150 ppm for 30 min. 5.6 Toxicity by Ingestion: Grade 2.1 Dose 5 to 5 g/kg. 5.7 Late Toxicity: None. 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause a slight smarting of the eyes or respiratory system if present in high concentrations. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: No appreciable hazard. Practically harmless to the skin. 5.10 Odor Threshold: 0.12 ppm.	

6. AMY

n-AMYL CHLORIDE

Common Synonyms Amyl chloride 1-Chloropentane n-Butylcarbamyl chloride 1-Pentyl chloride Chloride of amyl	Liquid Colorless to purple Pleasant odor Floats on water. Flammable vapor is produced.
First Aid Inhalation: Remove to fresh air. If breathing is difficult, give artificial respiration. If unconscious, give artificial respiration. If swallowed, give water. If on skin, wash with soap and water. If in eyes, flush with water.	
Fire	FLAMMABLE Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Irritating gases may be produced when heated. Fight fire with dry chemical, foam, carbon dioxide, or water.
Exposure	VAPOR Irritating to eyes, nose and throat. LIQUID Irritating to skin and eyes. Harmful if swallowed. May cause drowsiness and loss of consciousness. If swallowed, give water. If on skin, wash with soap and water. If in eyes, flush with water.
Water Pollution	Effect of low concentrations on aquatic life is unknown. Fouling to shoreline. May be dangerous if it enters water intakes.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 448-4) Mechanical containment Chemical and physical treatment	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Amylchloride, Chloropentane, n-Butylcarbamyl chloride, 1-Pentyl chloride, Chloride of amyl. 3.2 Coast Guard Compatibility Classification: Halogenated compounds (5). 3.3 Chemical Formula: CH ₃ (CH ₂) ₄ Cl 3.4 IMCO/United Nations Numerical Designation: 1.2 +10*	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless to deep purple 4.3 Odor: Aromatic
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Protective goggles or face shield, rubber gloves. 5.2 Symptoms Following Exposure: Inhalation causes mild irritation of mucous membranes. Irritation of hand or contact with skin or eyes causes mild irritation. 5.3 Treatment for Exposure: INHALATION: Remove to fresh air, apply artificial respiration if required. EYES: Flush with water. SKIN: Wash well with soap and water. INGESTION: Induce vomiting, give water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limit: Data not available. 5.6 Toxicity by Ingestion: Grade 1 LD ₅₀ 1.5 g/kg. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause a slight stinging of the eyes or respiratory system if present in high concentrations. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Moderate hazard. If spilled on clothing and allowed to remain, may cause stinging and reddening of the skin. 5.10 Odor Threshold: Data not available.	

6. FIRE HAZARDS 6.1 Flash Point: 55°F (13°C) 6.2 Flammable Limits in Air: 1.4 - 8% 6.3 Fire Extinguishing Agents: Dry chemical, foam, carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective. 6.5 Special Hazards of Combustion Products: Irritating hydrogen chloride and toxic phosgene may be formed in fires. 6.6 Behavior in Fire: Not pertinent. 6.7 Ignition Temperature: 500°F 6.8 Electrical Hazard: Data not available. 6.9 Burning Rate: 4.4 mm/min.	8. AMM

n-AMYL MERCAPTAN

Common Synonyms 1-Pentanethiol Amyl hydrosulfide Amyl sulfide Amyl thiol	Liquid Colorless to yellow Strong garlic odor Floats on water. Flammable vapor is produced.
Note: This information is for identification purposes only. It is not intended to be used for hazard assessment or for the purpose of determining the appropriate protective measures.	
Fire	FLAMMABLE. POISONOUS GASES ARE PRODUCED IN FIRE. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Containers may explode in fire. Fire extinguishers: Water, foam, dry chemical, carbon dioxide. Fire hazard: High.
Exposure	VAPOR May be irritating to the respiratory tract. LIQUID Irritating to skin and eyes. May cause severe burns if in contact with skin for extended periods. May cause severe eye irritation if in contact with eyes for extended periods. May cause severe damage to the mucous membranes of the mouth and throat if swallowed. May cause severe damage to the lungs if inhaled for extended periods.
Water Pollution	Effect of low concentrations on aquatic life is unknown. Fading to shorting. May be dangerous if it enters water intakes.
1. RESPONSE TO DISCHARGE See Response to Discharge Handbook, CG 446-4. Issue warning: High flammability. Mechanical containment. Should be removed. Clean up and physical treatment.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: 1-Pentanethiol, Amyl hydrosulfide, Amyl sulfide, Amyl thiol. 3.2 Coast Guard Compatibility Classification: Not listed. 3.3 Chemical Formula: CH ₃ (CH ₂) ₄ SH. 3.4 HBCO/United Nations Numerical Designation: 1.2 (1.1).	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Colorless, water white to yellow. 4.3 Odor: Strong offensive garlic.
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Plastic gloves, goggles. 5.2 Symptoms Following Exposure: Irritation may cause nausea because of offensive odor. Contact with eyes or skin causes slight irritation. Ingestion may cause vomiting. 5.3 Treatment for Exposure: INHALATION: remove to fresh air, apply artificial respiration if required. SKIN: wash with water. See a physician. SKIN: wash with soap and water. INGESTION: induce vomiting if it does not occur spontaneously. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Data not available. 5.7 Late Toxicity: None. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: 0.3 mg/m ³ .	

6. FIRE HAZARDS 6.1 Flash Point: 55°F (11°C). 6.2 Flammable Limits in Air: Data not available. 6.3 Fire Extinguishing Agents: Dry chemical, foam, carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective. 6.5 Special Hazards of Combustion Products: No further hazards are formed. 6.6 Behavior in Fire: Vapor is heavier than air and may travel considerable distance to a source of ignition and flash back. 6.7 Ignition Temperature: Data not available. 6.8 Electrical Hazard: Data not available. 6.9 Burning Rate: 4.7 mm/min.	8. WATER POLLUTION 8.1 Aquatic Toxicity: Data not available. 8.2 Waterway Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: None.								
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: No reaction. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Bases: Not pertinent. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9. AMK

n-AMYL METHYL KETONE

Synonyms Methyl amyl ketone 2-Heptanone 2-Amyloxypropane Methyl pentyl ketone Pentyl methyl ketone	Physical State Liquid Color White Odor Penetrating fruity odor Specific Gravity Floats and mixes slowly with water
First Aid Inhalation: Remove from exposure area. If breathing is difficult, give oxygen. If unconscious, move to fresh air and call for medical help. Skin Contact: Wash with soap and water. If irritation persists, call for medical help. Eye Contact: Flush with water for 15 minutes. Call for medical help.	
Fire	Flammability Flash Point: 11°F (12°C) Ignition Temperature: 110°F (43°C) Fire Extinguishing Agents: Dry chemical, foam, carbon dioxide Fire Extinguishing Agents Not to be Used: Water may be ineffective Special Hazards of Combustion Products: None
Exposure	VAPOR Irritating to eyes, nose and throat If inhaled will cause dizziness, headache, or difficult breathing LIQUID Irritating to skin and eyes If swallowed will cause nausea or vomiting Repeated exposure may cause skin irritation Prolonged contact with skin may cause dryness or cracking Ingestion may cause nausea or vomiting Inhalation may cause dizziness, headache, or difficulty breathing
Water Pollution	Effect of low concentrations on aquatic life is unknown Floating to shoreline May be dangerous if it enters water intakes
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Toxic warning: water contamination Mechanical contamination Should be removed Chemical and physical treatment	2. LABELS No label and label required by Code of Federal Regulations
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: 2-Heptanone 2-Ketooxane, Methylamyl ketone, Methylpentyl ketone, Pentyl methyl ketone 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: CH ₃ CH ₂ CH ₂ CH ₂ CH ₂ COCH ₃ 3.4 IMCO/United Nations Numerical Designation: 1112, 11	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: colorless 4.3 Odor: Characteristic
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Gloves and goggles 5.2 Symptoms Following Exposure: Inhalation of concentrated vapor may have narcotic effect. Repeat or prolonged contact with eyes causes irritation. Prolonged and repeated contact with skin may cause defatting with resultant irritation. 5.3 Treatment for Exposure: INHALATION: move to fresh air. INGESTION: get medical attention. EYES: flush with water for 15 to 20 min. SKIN: flush affected areas with water. 5.4 Toxicity by Inhalation (Threshold Limit Value): 100 ppm (suggested) 5.5 Short-Term Inhalation LC ₅₀ : Data not available 5.6 Toxicity by Ingestion: Code 2 oral LD ₅₀ = 6,700 mg/kg rat 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: 0.07 pp	

6. (continued on page 4 and 5)

ANT

n-AMYL NITRATE

Common Synonyms Mixed primary amyl nitrates Diesel Ignition Improver		Liquid	Colorless to light straw	Ether like odor
		May float or sink in water		
Stop discharge if possible. Keep people away. Avoid contact with liquid and vapor. Shut off ignition sources. Call fire department. Stay upwind. Use water spray to knock down vapor. Isolate and remove discharged material. Notify local health and pollution control agencies.				
Fire	Combustible POISONOUS GASES MAY BE PRODUCED IN FIRE May explode if exposed to heat or flames Wear goggles and self contained breathing apparatus Extinguish with dry chemical foam or carbon dioxide Water may be ineffective on fire Cool exposed containers with water			
Exposure	CALL FOR MEDICAL AID VAPOR Irritating to eyes, nose and throat If inhaled will cause headache If in eyes, hold eyelids open and flush with plenty of water If breathing is stopped, give artificial respiration If breathing is difficult, give oxygen LIQUID Irritating to skin and eyes. If swallowed will cause nausea or headache Remove contaminated clothing and shoes Flush affected areas with plenty of water If IN EYES, hold eyelids open and flush with plenty of water If SWALLOWED and victim is CONSCIOUS, have victim drink water or milk and have victim induce vomiting If SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm			
Water Pollution	Effect of low concentrations on aquatic life is unknown Fouling to shoreline May be dangerous if it enters water intakes Notify local health and wildlife officials Notify operators of nearby water intakes			
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: air contaminant Restrict access Mechanical containment Should be removed Chemical and physical treatment		2. LABELS No hazard label required by Code of Federal Regulations

iso-AMYL NITRITE

Common Synonyms Isopentyl nitrite Amyl nitrite 3-Methylbutyl nitrite		Liquid Colorless to light yellow Pleasant fruity odor
Floats on water. Poisonous gas is produced on contact with water.		
Shut off ignition sources. Call fire department. Wear goggles, self-contained breathing apparatus and rubber overclothing. Notify police. Avoid contact with skin, eyes, nose, mouth. Stop breathing if possible. Notify and remove disoriented personnel. Notify local health and pollution control agencies.		
Fire	FLAMMABLE POISONOUS GASES ARE PRODUCED IN FIRE Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. DO NOT USE WATER ON FIRE Use exposed container with water.	
 Exposure	CALL FOR MEDICAL AID VAPOR POISONOUS IF INHALED Irritating to eyes, nose and throat. May cause dizziness. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. LIQUID Will burn skin and eyes. If swallowed will cause dizziness, headache or loss of consciousness. Remove contaminated clothing and shoes. Flush skin, nose and eyes with plenty of water. IF IN EYES: Hold eyelids open and flush with plenty of water. IF SWALLOWED: Do not induce vomiting. Do not drink water. DO NOT INDUCE VOMITING.	
Water Pollution	Effect of low concentrations on aquatic life is unknown. Fouling to shoreline. May be dangerous if it enters water intakes. Notify local health and pollution control agencies. Notify operators of downstream intakes.	
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-1) Issue warning, high flammability. Restrict access. Disperse and flush.		2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Isopentyl nitrite Amyl nitrite 3-Methylbutyl nitrite 3.2 Coast Guard Compatibility Classification: Not applicable. 3.3 Chemical Formula: $(CH_3)_2CHCH_2CH_2ONO$ 3.4 IMCO/United Nations Numerical Designation: 111113		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Light yellow, transparent 4.3 Odor: Pleasant, fragrant, fruity
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Protective goggles or face shield, self-contained breathing apparatus, protective gloves and clothing. 5.2 Symptoms Following Exposure: Inhalation or ingestion causes flushing of the face, pulsatile headache, disturbing tachycardia, cyanosis (methemoglobinemia), weakness, confusion, restlessness, faintness, and collapse. Contact with eyes or skin causes irritation. 5.3 Treatment for Exposure: INHALATION or INGESTION: place patient in recumbent position, if necessary administer oxygen. For treatment of severe methemoglobinemia, transfuse with whole blood or give 1 V. or 1 M. a dose of 1.2 mg/kg methylene blue or an oral dose of 4.5 mg/kg 1-YES; after contact with liquid, irrigate with large quantities of water for 15 min; call physician. SKIN: after contact with liquid, wash with large amounts of water. Call physician. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade I, LD ₅₀ 5 to 15 g/kg. 5.7 Late Toxicity: Methemoglobinemia may occur. 5.8 Vapor (Gas) Irritant Characteristics: Vapors are nonirritating to the eyes and throat. 5.9 Liquid or Solid Irritant Characteristics: Severe skin irritant. Causes second- and third-degree burns on short contact and is very injurious to the eyes. 5.10 Odor Threshold: Data not available.

ATS

n-AMYLTRICHLOROSILANE

Common Synonyms Trichloropentylsilane Pentyl trichlorosilane Trichloroamylsilane	Liquid Colorless Sharp irritating odor Reacts violently with water. Irritating visible vapor cloud is produced.
Avoid contact with liquid and vapor. Keep people away. Wear eye protection. Obtain breathing apparatus and rubber gloves. Use self-contained breathing device. If possible, stop discharge if possible. Call fire department. Notify local health and pollution control agencies.	
Fire	Combustible POISONOUS GASES ARE PRODUCED IN FIRE Wear goggles and self-contained breathing apparatus. Extinguish with dry chemicals or carbon dioxide. DO NOT USE WATER OR FOAM ON FIRE.
Exposure	VAPOR Irritating to eyes, nose and throat. If inhaled will cause difficult breathing. Move victim to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. LIQUID Will burn skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. If IN EYES, hold eyelids open and flush with plenty of water. If SWALLOWED, and victim is CONSCIOUS, have victim drink water or milk. DO NOT INDUCE VOMITING.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operator of nearby water intakes.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: corrosive Restrict access Disperse and flush	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Trichloropentylsilane Pentyltrichlorosilane Trichloroamylsilane 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: $\text{CH}_3(\text{CH}_2)_4\text{SiCl}_3$ 3.4 IMCO/United Nations Numerical Designation: 8/1/28	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Sharp, like hydrochloric acid pungent acid
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Acid vapor type respiratory protection, rubber gloves, chemical worker's goggles. 5.2 Symptoms Following Exposure: Inhalation causes irritation of mucous membrane. Contact of liquid with eyes or skin causes severe burns, and ingestion causes severe burns of mouth and stomach. 5.3 Treatment for Exposure: Get medical attention immediately after exposure to this compound. INHALATION: remove from exposure, support respiration. EYES: flush with water for 15 min. SKIN: flush with water. INGESTION: give large amounts of water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 2 oral rat LD_{50} = 2,340 mg/kg. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Vapors are moderately irritating such that personnel will not usually tolerate moderate or high vapor concentrations. 5.9 Liquid or Solid Irritant Characteristics: Severe skin irritant. Causes second and third degree burns on short contact and is very injurious to the eyes. 5.10 Odor Threshold: Data not available.	

6. FIRE HAZARDS 6.1 Flash Point: 145°F (63°C) 6.2 Flammable Limits in Air: Data not available. 6.3 Fire Extinguishing Agents: Dry chemical, carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Water, foam. 6.5 Special Hazards of Combustion Products: Irritating hydrogen chloride and toxic phosgene may be formed. 6.6 Behavior in Fire: Difficult to extinguish. Re-ignition may occur. 6.7 Ignition Temperature: Data not available. 6.8 Electrical Hazard: Data not available. 6.9 Burning Rate: 2.5 mm/min.	8. WATER POLLUTION 8.1 Aquatic Toxicity: Data not available. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: None.																												
7. ANL

ANILINE

Common Synonyms Aniline Aniline oil Phenylamine Blue oil	Only liquid Colorless to yellowish brown Weak odor Sinks slowly in water
AVOID CONTACT WITH LIQUID AND VAPOR. KEEP PEOPLE AWAY. Wear chemical protective suit with self-contained breathing apparatus. Stop discharge if possible. Wash upwind and use water spray to "knock down" vapor. Call fire department. Isolate and remove discharged material. Notify local health and pollution control agencies.	
Fire	Combustible POISONOUS GAS IS PRODUCED WHEN HEATED Vapor may explode if ignited in an enclosed area. Wear chemical protective suit with self-contained breathing apparatus. Extinguish with water, dry chemical, foam or carbon dioxide. Cool exposed containers with water.
 Exposure	CALL FOR MEDICAL AID LIQUID POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED Irritating to eyes. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES: hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS: have victim drink water or milk.
Water Pollution	Dangerous to aquatic life in high concentrations. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: poison water contaminant. Restrict access. Should be removed. Chemical and physical treatment.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Aniline/benzene Aniline oil Blue oil Phenylamine 3.2 Coast Guard Compatibility Classification: Aromatic amine 3.3 Chemical Formula: C ₆ H ₅ NH ₂ 3.4 IMCO/United Nations Numerical Designation: 6.1 + 5.2	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): liquid 4.2 Color: colorless to pale brown 4.3 Odor: aromatic amine like; characteristic regular, strongly amine like
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Respirator for organic vapors; splashproof goggles; rubber gloves; boots. 5.2 Symptoms Following Exposure: ACUTE EXPOSURE: Blue discoloration of finger tips, cheeks, lips, and nose; nausea; vomiting; headache and drowsiness followed by delirium, coma and shock. CHRONIC EXPOSURE: Loss of appetite; loss of weight; headaches; visual disturbances; skin lesions. 5.3 Treatment for Exposure: Remove victim to fresh air and call a physician at once. SKIN: EYE CONTACT: immediately flush skin or eyes with plenty of water for at least 15 min. If vasovagal is present, shower with soap and warm water, with special attention to scalp and fingernails. Administer oxygen until physician arrives. 5.4 Toxicity by Inhalation (Threshold Limit Value): 5 ppm 5.5 Short-Term Inhalation Limits: 50 ppm for 10 min; 5 ppm for 8 hr. 5.6 Toxicity by Ingestion: Grade 3 LD ₅₀ 50 to 500 mg/kg. 5.7 Late Toxicity: None recognized. 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause a slight stinging of the eyes or respiratory system if present in high concentrations. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: If spilled on clothing and allowed to remain, may cause smarting and reddening of the skin. 5.10 Odor Threshold: 0.5 ppm	

6. FIRE HAZARDS 6.1 Flash Point: 168°F O.C. 188°F C.C. 6.2 Flammable Limits in Air: 1.3% (L) 11.1% (U) 6.3 Fire Extinguishing Agents: Water, foam, dry chemical, or carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Toxic vapors are generated when heated. 6.6 Behavior in Fire: Not pertinent. 6.7 Ignition Temperature: 1418°F 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: 30 mm/min.	8. WATER POLLUTION 8.1 Aquatic Toxicity: 1020 ppm 1 hr. - fish killed; fresh water; 10 ppm 96 hr. - scud deaths; 11 ppm fresh water. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): 180% 5 days. 8.4 Food Chain Concentration Potential: None.

ATH

ANTHRACENE

Common Synonyms Anthracene Paranaphthalene Green oil		Solid	White to yellow	Weak aromatic odor
		Sinks in water		
Stop discharge if possible. Keep people away. Avoid contact with solids and liquids. Isolate and remove discharge. Notify local health and pollution control agencies.				
Fire		Combustible Dust cloud may explode if ignited in an enclosed area Extinguish with water, dry-chemical foam or carbon dioxide		
Exposure		CALL FOR MEDICAL AID DUST Irritating to eyes, nose and throat If inhaled will cause coughing or difficult breathing If in eyes, hold eyelids open and flush with plenty of water If breathing has stopped, give artificial respiration If breathing is difficult, give oxygen SOLID Irritating to skin and eyes Harmful if swallowed Remove contaminated clothing and shoes Flush affected areas with plenty of water IF IN EYES, hold eyelids open and flush with plenty of water IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm		
Water Pollution		Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Should be removed Chemical and physical treatment		2. LABELS No hazard label required by Code of Federal Regulations

ANTIMONY PENTACHLORIDE

Common Synonyms Antimony (V) chloride Antimony perchloride		Liquid	Colorless to brown	Unpleasant odor																												
		Sinks in water. Irritating vapor is produced. Freezing point is 370°F.																														
As this is a toxic substance, it should be handled with care. See the MSDS for more information. No data is available for this substance. Do not use water or foam on adjacent fires.																																
Fire	Not flammable POISONOUS GASES ARE PRODUCED WHEN HEATED DO NOT USE WATER ON ADJACENT FIRES																															
Exposure	VAPOR Irritating to eyes, nose and throat If inhaled will cause coughing or difficult breathing May irritate the throat If in eyes: flush with plenty of water If in mouth: spit out and swallow water If swallowed: drink plenty of water LIQUID Will burn skin and eyes If swallowed will cause nausea, vomiting or loss of consciousness If on skin: flush with plenty of water If in eyes: flush with plenty of water If in mouth: spit out and swallow water If swallowed: drink plenty of water DO NOT INDUCE VOMITING																															
Water Pollution	Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes. No data is available for this substance.																															
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446.4) Issue warning - corrosive Restrict access Dispense and flush		2. LABEL 																														
3. CHEMICAL DESIGNATIONS 31 Synonyms: Antimony (V) chloride Antimony perchloride 32 Coast Guard Compatibility Classification: Not applicable 33 Chemical Formula: SbCl ₅ 34 IMCO/United Nations Numerical Designation: N 1750		4. OBSERVABLE CHARACTERISTICS 41 Physical State (as shipped): Liquid 42 Color: Colorless to medium brown, yellow red brown 43 Odor: Pungent, offensive																														
5. HEALTH HAZARDS 51 Personal Protective Equipment: Organic vapor acid gas type canister mask, rubber, neoprene vinyl etc. gloves, chemical safety goggles, plus face shield where appropriate, acid resistant clothing, plus apron for splash protection, rubber safety shoes or boots, hard hat 52 Symptoms Following Exposure: Inhalation causes irritation of nose and throat. Contact of liquid with eyes or skin causes severe burns. Ingestion causes vomiting and severe burns of mouth and stomach. Overexposure by any route can cause bloody stools, slow pulse, low blood pressure, coma, convulsions, cardiac arrest. 53 Treatment for Exposure: INHALATION: remove to clean air, rinse mouth and gargle with water. If overexposure is serious, get prompt medical attention. EYES: flush eyes and eye lids thoroughly with large amounts of water, get prompt medical attention. SKIN: flush thoroughly with water, remove contaminated clothing, wash affected area with soap and water. If overexposure is serious, get prompt medical attention. INGESTION: dilute by drinking water. If vomiting occurs, administer more water. If overexposure is serious, get prompt medical attention. 54 Toxicity by Inhalation (Threshold Limit Value): 0.1 mg/m ³ as antimony 55 Short-Term Inhalation Limits: Data not available 56 Toxicity by Ingestion: Grade 2 oral LD ₅₀ = 1.115 mg/kg (rat) 900 mg (ca pig) 57 Late Toxicity: An irritant posing no long term results 58 Vapor (Gas) Irritant Characteristics: Vapors are moderately irritating such that personnel will not usually tolerate moderate or high vapor concentrations.																																
6. FIRE HAZARDS 61 Flash Point: Not flammable 62 Flammable Limits in Air: Not flammable 63 Fire Extinguishing Agents: Not pertinent 64 Fire Extinguishing Agents Not to be Used: Do not use water or foam on adjacent fires. 65 Special Hazards of Combustion Products: Not pertinent 66 Behavior in Fire: Irritating fumes of hydrogen chloride given off when water or foam is used to extinguish adjacent fire. 67 Ignition Temperature: Not pertinent 68 Electrical Hazard: Not pertinent 69 Burning Rate: Not pertinent																																
7. CHEMICAL REACTIVITY 71 Reactivity with Water: Reacts to form hydrogen chloride gas (hydrochloric acid) 72 Reactivity with Common Materials: Causes corrosion of metal 73 Stability During Transport: Stable 74 Neutralizing Agents for Acids and Caustics: Soda ash or soda ash lime mixture 75 Polymerization: Not pertinent 76 Inhibitor of Polymerization: Not pertinent

APF

ANTIMONY PENTAFLUORIDE

Common Synonyms	Liquid Colorless Sharp odor
Reacts violently with water. Poisonous gas is produced on contact with water. Freezing point is 450° F.	
AVOID CONTACT WITH LIQUID AND VAPOR. KEEP PEOPLE AWAY. Wear goggles and self-contained breathing apparatus. Stop discharge if possible. Call fire department. Isolate and remove discharged material. Notify local health and pollution control agencies.	
Fire	Not flammable. May cause fire on contact with combustibles. POISONOUS GASES ARE PRODUCED WHEN HEATED. DO NOT USE WATER OR FOAM ON FIRE OR ON ADJACENT FIRES. Extinguish with dry chemicals or carbon dioxide.
 Exposure	CALL FOR MEDICAL AID. VAPOR POISONOUS IF INHALED. Irritating to eyes, nose and throat. Moves quickly to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. LIQUID POISONOUS IF SWALLOWED. Will burn skin and eyes. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water. DO NOT INDUCE VOMITING.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and pollution control agencies. Notify nearest fire-fighting water supplies.
1 RESPONSE TO DISCHARGE (See Response Methods Handbook CG 446-4) Issue warning: extremely air contaminant. Restrict access. Disperse and flush.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: No common synonyms. 3.2 Coast Guard Compatibility Classification: Not applicable. 3.3 Chemical Formula: SbF ₅ . 3.4 IMCO/United Nations Numerical Designation: N 1732.	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Colorless. 4.3 Odor: Pungent.
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Acid gas type canister mask, rubber gloves, protective clothing, safety goggles and face shield. 5.2 Symptoms Following Exposure: Inhalation causes irritation of nose and throat. Contact of liquid with eyes or skin causes severe burns. Ingestion causes vomiting and severe burns of mouth and throat. Overexposure by any route can cause bloody stools, slow pulse, low blood pressure, coma, convulsions, cardiac arrest. 5.3 Treatment for Exposure: INHALATION: remove to fresh air, rinse mouth with water, give oxygen if necessary to assist breathing, get medical attention. EYES: irrigate with copious amounts of water for at least 15 min., get medical attention. SKIN: flush with copious amounts of water, wash well with soap and water. INGESTION: dilute by drinking water; if vomit occurs, drink more water; get medical attention promptly. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.5 mg/m as antimony. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Data not available. 5.7 Late Toxicity: Antimony poisoning may result. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.	

6 FIRE HAZARDS 6.1 Flash Point: Not flammable (but see 7.2). 6.2 Flammable Limits in Air: Not flammable. 6.3 Fire Extinguishing Agents: Not pertinent. 6.4 Fire Extinguishing Agents Not to be Used: Do not use water or foam on adjacent fires. 6.5 Special Hazards of Combustion Products: Not pertinent. 6.6 Behavior in Fire: Gives off toxic hydrogen fluoride fumes when water is used to extinguish adjacent fire. 6.7 Ignition Temperature: Not pertinent. 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: Not pertinent.	8. WATER POLLUTION 8.1 Aquatic Toxicity: Data not available. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): None. 8.4 Food Chain Concentration Potential: None.
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: Reacts vigorously to form toxic hydrogen fluoride (hydrofluoric acid). 7.2 Reactivity with Common Materials: When moisture is present, causes severe corrosion of metals (except steel) and glass. If confined and wet can cause explosion. May cause fire in contact with combustible material. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Flush with water; rinse with sodium bicarbonate or lime solution. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9 SELECTED MANUFACTURERS Ozark-Mahoning Company Special Chemicals Division 1870 South Boulder Tulsa, Okla. 4119 Ventron Corp. APT

ANTIMONY POTASSIUM TARTRATE

Common Synonyms Tartaric acid Tartaric antimony Tartaric antimony Potassium antimony tartrate	Solid Sinks in water	White	Odorless
AVOID CONTACT WITH SOLID AND DUST. KEEP PEOPLE AWAY Wear dust respirator or at least wear something that filters dust Notify the proper authorities if you have discharged material Notify your health and pollution control agencies			
Fire	Not flammable		
Exposure	CALL FOR MEDICAL AID DUST POISONOUS IF INHALED OR IF SKIN IS EXPOSED If inhaled will cause coughing, headache, coughing, or difficult breathing In case of eye contact, flush with plenty of water In case of skin contact, wash with plenty of water If SWALLOWED, do not induce vomiting. Have victim drink water If SWALLOWED, do not induce vomiting. Have victim drink water If SWALLOWED, do not induce vomiting. Have victim drink water		
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes Notify the proper authorities if you have discharged material		
1. RESPONSE TO DISCHARGE See Appendix Methods Manual, CG 446-4 Issue warning: harmful water contaminant Restrict access Dispose: no flush		2. LABELS No hazard label required by Code of Federal Regulations	
3. CHEMICAL DESIGNATIONS Synonyms: Potassium antimony tartrate, Tartaric antimony, Tartaric antimony Coast Guard Compatibility Classification: Not listed Chemical Formula: K₂SB₂O₆ (K₂SB₂O₆) IMCO/United Nations Numerical Designation: N/A		4. OBSERVABLE CHARACTERISTICS Physical State (as shipped): Solid Color: white Odor: None	
5. HEALTH HAZARDS Personal Protective Equipment: Dust respirator, rubber or plastic coated gloves, chemical goggles, safety shoes, closed toe shoes, full body protective suit Symptoms Following Exposure: Inhalation causes inflammation of membranes of nose and throat, upper respiratory irritation, headache, dizziness. Ingestion causes gastroenteritis and upper respiratory irritation. Skin contact with dust causes irritation. Further symptoms of irritation include nervous complaints, fatigue, dizziness, muscle pain and neurological pain Treatment for Exposure: INHALATION: Move to fresh air. INGESTION: Call physician immediately. Use water to rinse mouth and spit out. If glasses or contact lenses are worn, remove them. Flush with water for 15 minutes. Consult a physician. SKIN: Flush with water. Wash well with soap and water Toxicity by Inhalation (Threshold Limit Value): 0.5 mg/m³ as antimony Short-Term Inhalation Limit: Data not available Toxicity by Ingestion: Grade I oral rat LD₅₀ = 115 mg/kg Late Toxicity: Data not available Vapor (Gas) Irritant Characteristics: Data not available Liquid or Solid Irritant Characteristics: Data not available Odor Threshold: Odorless

NOTES (Continued on page 1 and 2)	

ATM

ANTIMONY TRICHLORIDE

Common Synonyms: Butter of antimony Antimony (III) Chloride	Solub: White to pale yellow Sharp unpleasant odor Sinks and mixes violently with water
AVOID CONTACT WITH SOLID AND DUST. KEEF PEOPLE AWAY Wear dust respirator and rubber over-knitting nitrile gloves. Stop discharge if possible. Isolate and remove discharged material. Notify local health authorities if toxic effects are seen.	
Fire	Not flammable POISONOUS GASES MAY BE PRODUCED IN FIRE. Irritating gases may be produced when heated. Wear goggles and suit for protection breathing apparatus. DO NOT USE WATER ON ADDITIONAL FIRES.
 Exposure	CALL FOR MEDICAL AID DUST POISONOUS IF INHALED OR IF SKIN IS EXPOSED If inhaled will cause coughing or difficult breathing. If in eyes, flush eyes with plenty of water. If breathing is difficult, give artificial respiration. If breathing is difficult, give oxygen. SOLID Will burn skin and eyes. If swallowed will cause nausea, vomiting or loss of consciousness. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED, do not induce vomiting. Give plenty of water. OR MILK. IF SWALLOWED AND IN CONJUNCTION WITH ORAL OR NASAL CONJUNCTIONS, do nothing except keep person warm.
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify personnel of nearby water intakes.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: water contaminant corrosive Disperse and flush	2. LABEL  3. CHEMICAL DESIGNATIONS 3* Synonyms: Antimony butter Antimony (III) chloride Butter of antimony 32 Coast Guard Compatibility Classification: Not listed 33 Chemical Formula: SbCl ₃ 34 IMCO/United Nations Numerical Designation: 9.111
5. HEALTH HAZARDS <i>Note: The respiratory system is the usual avenue of entrance of antimony and its compounds into the body.</i> 5.1 Personal Protective Equipment: Bu. Mines approved respirator, chemical safety goggles, shield, leather or rubber safety shoes, rubber apron, rubber gloves. 5.2 Symptoms Following Exposure: Inhalation of small amounts may cause irritation of the nose, throat and air passages, large exposures result in severe air passage irritation. Ingestion causes vomiting, purging with bloody stools, slow pulse and low blood pressure, slow shallow breathing, coma and convulsions, sometimes followed by death. Contact with eyes causes severe eye burns or at least severe eye irritation. Contact of dry chemical with skin may result in deep chemical burns. 5.3 Treatment for Exposure: INHALATION: move victim at once to fresh air and keep him warm but not hot; call a physician immediately; nasal passages may be irrigated from a gently flowing hose. INGESTION: induce vomiting by giving large quantities of warm salt water; have a physician see the patient at once. EYES: flush with copious amounts of water for at least 15 min.; call physician at once. SKIN: flush with large quantities of flowing water followed by washing of skin surfaces with soap and water; remove all contaminated clothing promptly. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.1 mg/m ³ as antimony. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 2 oral rat LD ₅₀ = 675 mg/kg.

As a contaminant with a 5.1 Isolate and remove discharged material. Notify local health and industrial waste agencies.				
Fire		No flammable		
Exposure		CALL FOR MEDICAL AID SOLID Irritating to skin and eyes. Harmful if swallowed. Remove or decontaminate clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water if possible.		
Water Pollution		HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS Feeding to shoreline. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify appropriate health water intakes.		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 444-4.) Issue warning - water contaminant Disperse and flush.		2. LABELS No hazard label required by Code of Federal Regulations		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: No common synonyms 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: SbF ₃ 3.4 IMCO United Nations Numerical Designation: 6.1 1549		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: White 4.3 Odor: None		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Approved respirator, rubber gloves 5.2 Symptoms Following Exposure: Resemble those of lead and arsenic poisoning. ACUTE POISONING: irritation of the mouth, nose, stomach and intestines, vomiting, purging with bloody stools, slow pulse and low blood pressure, slow, shallow breathing, coma and convulsions, sometimes followed by death from cardiac and respiratory exhaustion. CHRONIC POISONING: dryness of throat, pain on swallowing, occasional vomiting and persistent nausea, susceptibility to fainting, weakness, loss of appetite and weight, giddiness, dermatitis, either pustular or ulcerative, anemia. 5.3 Treatment for Exposure: If any symptoms, however slight, are noticed the affected individual should be removed from contact with the chemical and placed under the care of a physician who is versed in the treatment necessary. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.5 mg/m 5.5 Short-Term Inhalation Limits: Not pertinent 5.6 Toxicity by Ingestion: Grade 3.1 Dose 50 to 500 mg. Air (residue per) 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Not pertinent 5.9 Liquid or Solid Irritant Characteristics: Fairly severe skin irritant. May cause pain and second-degree burns after a few minutes contact 5.10 Odor Threshold: Not pertinent				

6. FIRE HAZARDS 6.1 Flash Point: Not flammable 6.2 Flammable Limits in Air: Not flammable 6.3 Fire Extinguishing Agents: Not pertinent 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent 6.5 Special Hazards of Combustion Products: Not pertinent 6.6 Behavior in Fire: Not pertinent 6.7 Ignition Temperature: Not flammable 6.8 Electrical Hazard: Not pertinent 6.9 Burning Rate: Not flammable	8. ATX

ANTIMONY TRIOXIDE

Common Synonyms: Distomony trioxide Senarmontite Valentinite Euxenite Wernersgitzite	Solid White Odorless Sinks in water
AVOID CONTACT WITH SOLID AND DUST. KEEP PEOPLE AWAY. Wear dust respirator and rubber overclothing including gloves. Stop discharge if possible. Isolate and remove discharged material. Notify local health and pollution control agencies.	
Fire	Not flammable
 Exposure	CALL FOR MEDICAL AID DUST POISONOUS IF INHALED OR IF SKIN IS EXPOSED If inhaled will cause coughing, difficult breathing or loss of consciousness. If in eyes, hold eyelids open and flush with plenty of water. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. SOLID POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED If swallowed will cause dizziness, nausea, vomiting or loss of consciousness. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. If IN EYES: hold eyelids open and flush with plenty of water. If SWALLOWED and victim is CONSCIOUS: have victim drink water or milk and have victim induce vomiting. If SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS: do nothing except keep victim warm.
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes. Notice local health and wildlife officials. Notify operators of nearby water intakes.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-1) Issue warning: poison. Restrict access. Should be removed. Chemical and physical treatment.	2. LABELS No hazard label required by Code of Federal Regulations.
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Distomony trioxide Euxenite, Flowers of antimony Senarmontite, Valentinite Wernersgitzite 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: As_2O_3 3.4 IMCO/United Nations Numerical Designation: N.T. 1529	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: White 4.3 Odor: None
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Rubber gloves, safety goggles, dust mask. 5.2 Symptoms Following Exposure: Inhalation causes inflammation of upper and lower respiratory tract, including pneumonia. Ingestion causes irritation of the mouth, nose, stomach and intestines, vomiting, purging with bloody stools, slow pulse and low blood pressure, slow shallow breathing, coma and convulsions, sometimes followed by death. Contact with eyes causes conjunctivitis. Contact with skin causes dermatitis and rashes. 5.3 Treatment for Exposure: If any of the symptoms of poisoning even slight, are noticed, the affected individual should be removed from contact with the chemical and placed under care of a physician. INGESTION: induce vomiting. EYES: flush with water for at least 15 min. SKIN: wash well with soap and water. 5.4 Toxicity by Inhalation (Threshold ¹ - ml Value): 0.5 mg/m ³ as antimony. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Toxicity oral rat LD ₅₀ = 20,000 mg/kg. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.	

6. NOTES (Continued on pages 4 and 5)	

ASA

ARSENIC ACID

Common Synonyms Orthoarsenic acid Arsenic peroxide	Solid crystals or solution White or colorless Odorless Sinks and mixes with water. Freezing point is 95° F
AVOID CONTACT WITH SOLUTION, SOLID AND DUST KEEP PEOPLE AWAY Wear rubber overalls, including gloves. No open flame or smoking. Isolate and remove discharged materials. Notify local health and pollution control agencies.	
Fire	Not flammable
 Exposure	CALL FOR MEDICAL AID DUST POISONOUS IF INHALED Irritating to eyes, nose and throat. Move victim to fresh air. If in eyes, hold eyelids open and flush with plenty of water. If breathing is difficult, give oxygen. SOLUTION OR SOLID POISONOUS IF SWALLOWED Irritating to skin and eyes. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. If IN EYES, hold eyelids open and flush with plenty of water. If SWALLOWED and victim is CONSCIOUS, have victim drink milk or water. If SWALLOWED and victim is UNCONSCIOUS, DO NOT HAVE VOMITING INDUCED. If SWALLOWED and victim is UNCONSCIOUS, DO NOT HAVE GASTRIC LAVAGE. If SWALLOWED and victim is UNCONSCIOUS, DO NOT HAVE GASTRIC LAVAGE.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify local health and pollution control agencies.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning - poison water contaminant. Restrict access. Should be removed. Chemical and physical treatment.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Arsenic peroxide, Orthoarsenic acid. 3.2 Coast Guard Compatibility Classification: Not applicable. 3.3 Chemical Formula: As ₂ O ₃ or H ₃ AsO ₃ , As ₂ O ₅ . 3.4 IMCO/United Nations Numerical Designation: 1.1 (1991)	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid, a concentrated water solution is sometimes shipped. 4.2 Color: White. 4.3 Odor: None.
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Clothing below and over, oxide powder or harm, and other skin areas, rubber gloves, U.S. Bureau of Mines approved dust respirator. 5.2 Symptoms Following Exposure: Irritation causes irritation, stomach weakness, other gastrointestinal symptoms. Overdose can cause arsenic poisoning, but symptoms are delayed. 5.3 Treatment for Exposure: Get medical attention after all exposures to this compound. Be alert for arsenic poisoning symptoms. SKIN: wash well with soap and water. INGESTION: induce vomiting, drink freely (milk, water, milk or raw egg, give a cathartic). 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.5 mg/m ³ as a sens. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 4 oral LD ₅₀ = 40 mg/kg (mouse, rat). 5.7 Late Toxicity: Arsenic compounds may be carcinogenic. 5.8 Vapor (Gas) Irritant Characteristics: Vapors are irritating to eyes and throat. 5.9 Liquid or Solid Irritant Characteristics: Arsenic acid. If spilled on clothing and allowed to remain may cause staining and reddening of the skin. 5.10 Odor Threshold: Odorless.

NOTES

ARD

ARSENIC DISULFIDE

Common Synonyms Realgar Red arsenic glass Red arsenic sulfide Red orpiment Rubi arsenic	Color Red brown Odorless Sinks in water
AVOID CONTACT WITH DUST AND FUME using proper controls. Avoid breathing dust or fumes. Wash with soap and water immediately after contact. Do not eat, drink, or use tobacco while handling this material. Notify your supervisor if you experience any symptoms.	
Fire	Not Flammable May become flammable if heated above 300°C (572°F)
 Exposure	CALL FOR MEDICAL AID DUST POISONOUS IF INHALED Harmful to skin May cause irritation Repeated or prolonged exposure may cause skin lesions SOLID POISONOUS IF SWALLOWED Will burn eyes and skin Repeated or prolonged exposure may cause skin lesions Flammable if heated above 300°C (572°F) Do not breathe dust or fumes. Wash with soap and water immediately after contact. Do not eat, drink, or use tobacco while handling this material. Notify your supervisor if you experience any symptoms.
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes. Notify your supervisor if you experience any symptoms.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: poison water contaminant Restrict access Should be removed Chemical and physical treatment	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Realgar, Red arsenic glass, Red arsenic sulfide, Red orpiment, Rubi arsenic 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: As ₂ S ₂ 3.4 IMCO/United Nations Numerical Designation: 4.1 155	4. 5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Approved respirator, goggles, rubber gloves, clean protective clothing 5.2 Symptoms Following Exposure: Irritation and subsequent poisoning are not common. Repeated inhalation causes irritation of nose, laryngitis, mild bronchitis. Ingestion causes weakness, loss of appetite, gastrointestinal disturbances, peripheral neuritis, occasional hepatitis. Contact with eyes causes irritation. Irritates skin, especially where moist; if not treated, may cause ulceration. 5.3 Treatment for Exposure: Consult physician after all overexposure to this compound. INHALATION: move to fresh air. INGESTION: induce vomiting by giving warm salt water repeat until vomit is clear. EYES: flush with water for at least 15 min. SKIN: wash well with water. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.5 mg/m (as arsenic) 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 4 LD ₅₀ < 50 mg/kg 5.7 Late Toxicity: Possible skin and lung cancer 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Odorless

AST

ARSENIC TRICHLORIDE

Common Synonyms Fuming liquid arsenic Arsenic (III) trichloride Arsenic chloride Arsenous chloride Caustic arsenic chloride	Liquid Colorless Unpleasant odor Sinks and reacts in water. Poisonous visible vapor cloud is produced.
AVOID CONTACT WITH LIQUID AND VAPOR. KEEP FLOUT AWAY. Wear goggles and self-contained breathing apparatus. Stop discharge if possible. Isolate and remove discolored material. Notify local health and police authorities if released.	
Fire	Not Flammable POISONOUS GASES ARE PRODUCED WHEN HEATED
 Exposure	CALL FOR MEDICAL AID VAPOR POISONOUS IF INHALED Move victim to fresh air. Breathing is difficult; give oxygen. LIQUID POISONOUS IF SWALLOWED Irritating to skin and eyes. Remove contaminated clothing. Flush affected area with plenty of water. IF IN EYES: hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS: have victim drink water or milk and have vomit induced by stomach pumping. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS: do nothing except keep victim warm.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notifies local health and police authorities. Notifies port authorities if water intakes.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: poison, water contaminant, corrosive. Restrict access. Disperse and flush.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Arsenic (III) trichloride; Arsenic chloride; Arsenous chloride; Butte of arsenic; Caustic arsenic chloride; Caustic oil of arsenic; Fuming liquid arsenic. 3.2 Coast Guard Compatibility Classification: Not applicable. 3.3 Chemical Formula: AsCl ₃ 3.4 IMCO/United Nations Numerical Designation: 6.1 (56)	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Acid
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Safety goggles and face shield; acid type canister gas mask; rubber gloves; protective clothing. 5.2 Symptoms Following Exposure: Inhalation causes irritation of nose and throat. Contact of liquid with eyes or skin causes severe irritation. Ingestion causes weakness and severe irritation of mouth and stomach. Oxidation can cause arsenic poisoning, but symptoms are delayed. 5.3 Treatment for Exposure: Get medical attention after all exposures to the compound. Be alert for arsenic poisoning symptoms. INHALATION: remove to fresh air; give artificial respiration if needed. EYES: flush with water for at least 15 min. SKIN: flush with water. INGESTION: give large amounts of water; then induce vomiting: give lime water, milk, or raw egg; give a cathartic. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.5 mg/m ³ as arsenic. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 3, oral rat LD ₅₀ = 1.8 mg/kg; fatal human dose 70-180 mg depending on weight. 5.7 Late Toxicity: Arsenic compounds may be carcinogenic. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.	

6. FIRE HAZARDS

- 6.1 **Flash Point:** Not flammable
 6.2 **Flammable Limits in Air:** Not flammable
 6.3 **Fire Extinguishing Agents:** Not pertinent
 6.4 **Fire Extinguishing Agents Not to be Used:** Avoid water on adjacent fires.
 6.5 **Special Hazards of Combustion Products:** Irritating and toxic hydrogen chloride formed when involved in fire.
 6.6 **Behavior in Fire:** Becomes gaseous and causes irritation. Forms hydrogen chloride (hydrochloric acid) by reaction with water used on adjacent fires.
 6.7 **Ignition Temperature:** Not pertinent
 6.8 **Electrical Hazard:** Not pertinent
 6.9 **Burning Rate:** Not pertinent

7. CHEMICAL REACTIVITY

- 7.1 **Reactivity with Water:** Reacts with water to generate hydrogen chloride (hydrochloric acid).
 7.2 **Reactivity with Common Materials:** Corrodes metal.
 7.3 **Stability During Transport:** Stable
 7.4 **Neutralizing Agents for Acids and Caustics:** Flush with water; rinse with sodium bicarbonate or lime solution.
 7.5 **Polymerization:** Not pertinent
 7.6 **Inhibitor of Polymerization:** Not pertinent

8. WATER POLLUTION

- 8.1 **Aquatic Toxicity:** Data not available
 8.2 **Waterfowl Toxicity:** Data not available
 8.3 **Biological Oxygen Demand (BOD):** Data not available
 8.4 **Food Chain Concentration Potential:** None

- 13.1 **Physical State at 15°C and 1 atm:** Liquid
 13.2 **Molecular Weight:** 181.3
 13.3 **Boiling Point at 1 atm:** 266.4°F = 130.2°C = 403.4°K
 13.4 **Freezing Point:** 9°F = -13°C = 260°K
 13.5 **Critical Temperature:** Not pertinent
 13.6 **Critical Pressure:** Not pertinent
 13.7 **Specific Gravity:** 2.156 at 25°C (liquid)
 13.8 **Liquid Surface Tension:** (est.) 20 dynes/cm = 0.020 N/m at 20°C
 13.9 **Liquid-Water Interfacial Tension:** Not pertinent
 13.10 **Vapor (Gas) Specific Gravity:** Not pertinent
 13.11 **Ratio of Specific Heats of Vapor (Gas):** Not pertinent
 13.12 **Latent Heat of Vaporization:** 88.31 Btu/lb = 49 Or. cal/g = 2.054 X 10⁵ J/kg
 13.13 **Heat of Combustion:** Not pertinent
 13.14 **Heat of Decomposition:** Not pertinent
 13.15 **Heat of Solution:** (est.) -18 Btu/lb = -10 cal/g = -0.42 X 10⁵ J/kg
 13.16 **Heat of Polymerization:** Not pertinent

(Continued on page 5 and 6)

NOTES

ATO

ARSENIC TRIOXIDE

Common Synonyms Arsenous acid Arsenous acid anhydride Arsenous oxide Arsenic sesquioxide White arsenic	Solid crystals or powder White Odorless Sinks and mixes slowly with water
AVOID CONTACT WITH SOLID AND DUST. KEEP PEOPLE AWAY. Stay upwind. Use water spray to knock down dust. Isolate and remove discharge material. Notify local health and pollution control agencies.	
Fire	Not flammable POISONOUS GASES MAY BE PRODUCED WHEN HEATED
 Exposure	CALL FOR MEDICAL AID DUST POISONOUS IF INHALED Irritating to eyes, nose and throat Move victim to fresh air. If in eyes, hold eyelids open and flush with plenty of water. If breathing is difficult, give oxygen. SOLID POISONOUS IF SWALLOWED Irritating to skin and eyes. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. If IN EYES, hold eyelids open and flush with plenty of water. If SWALLOWED and victim is CONSCIOUS, have victim drink water or milk and have victim induce vomiting. If SWALLOWED and victim is UNCONSCIOUS, DO NOT HAVE CON- VULSIONS. Do nothing except keep victim warm.
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook CG 446-4) Issue warning - poison water contaminant. Restrict access. Should be removed. Chemical and physical treatment.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Arsenous acid; Arsenous acid anhydride; Arsenous oxide; Arsenic sesquioxide; White arsenic. 3.2 Coast Guard Compatibility Classification: Not applicable. 3.3 Chemical Formula: As ₂ O ₃ . 3.4 IMCO/United Nations Numerical Designation: 6.1/1561.	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid. 4.2 Color: White. 4.3 Odor: Like garlic; none.
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Bureau of Mines approved respirator; protective gloves; eye protection; full protective overalls. 5.2 Symptoms Following Exposure: Ingestion causes irritation of mucous membrane; weakness; loss of appetite; gastrointestinal disturbances. Overdose can cause arsenic poisoning, but symptoms are delayed. 5.3 Treatment for Exposure: Get medical attention after all exposures to this compound. Be alert for arsenic poisoning symptoms. SKIN: wash thoroughly with soap and water - remove contaminated clothing and shower with soap and water. Irritations except for rashes which disappear in a day or two should have medical attention. INGESTION: vomiting should be induced and a physician should be called at once; drink freely of lime water, sweet milk or raw eggs followed by castor oil or any brisk cathartic. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.5 mg/m as arsenic. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 4 - oral mouse LD ₅₀ - 45 mg/kg. 5.7 Late Toxicity: Arsenic compounds may be carcinogenic. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Odorous.	

6. FIRE HAZARDS 6.1 Flash Point: Not flammable. 6.2 Flammable Limits in Air: Not flammable. 6.3 Fire Extinguishing Agents: Not pertinent. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Toxic fumes of arsenic trioxide and arsine may be formed in fire situations. 6.6 Behavior in Fire: May volatilize and form toxic fumes of arsenic trioxide. 6.7 Ignition Temperature: Not pertinent. 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: Not pertinent.	8. WATER POLLUTION 8.1 Aquatic Toxicity: 53 mg/l - 50% salmon/barramundi.* *Type of water not specified. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: None.
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: No reaction. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Flush with water. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9. SELECTED MANUFACTURERS 1. American Smelting and Refining Company 120 Broadway New York, N.Y. 10005 2. Gallard-Schlesinger Chemical Manufacturing Co. 584 Mineola Avenue Carle Place, N.Y. 11514 3. Ventron Corp. Alfa Products P.O. Box 159 Beverly, Mass. 01915.
11. HAZARD ASSESSMENT CODE (See Hazard Assessment Handbook CG 446-3) H 355	10. SHIPPING INFORMATION 10.1 Grade or Purity: Refined 99% Crude 95%. 10.2 Storage Temperature: Ambient. 10.3 Inert Atmosphere: No requirement. 10.4 Venting: Pressure/vacuum.
12. HAZARD CLASSIFICATIONS 12.1 Code of Federal Regulations: Poisonous, Class B. 12.2 NAS Hazard Rating for Bulk Water Transportation: Not listed. 12.3 NFPA Hazard Classifications: Not listed.	13. PHYSICAL AND CHEMICAL PROPERTIES 13.1 Physical State at 15°C and 1 atm: Solid. 13.2 Molecular Weight: 197.5. 13.3 Boiling Point at 1 atm: 855°F = 457°C = 730°K. 13.4 Freezing Point: 599°F = 315°C = 588°K. 13.5 Critical Temperature: Not pertinent. 13.6 Critical Pressure: Not pertinent. 13.7 Specific Gravity: 3.7 at 20°C (solid). 13.8 Liquid Surface Tension: Not pertinent. 13.9 Liquid-Water Interfacial Tension: Not pertinent. 13.10 Vapor (Gas) Specific Gravity: Not pertinent. 13.11 Ratio of Specific Heats of Vapor (Gas): Not pertinent. 13.12 Latent Heat of Vaporization: Not pertinent. 13.13 Heat of Combustion: Not pertinent. 13.14 Heat of Decomposition: Not pertinent. 13.15 Heat of Solution: Data not available. 13.16 Heat of Polymerization: Not pertinent.
NOTES Continued on pages 5 and 6.	

ART

ARSENIC TRISULFIDE

Common Synonyms Arsenic yellow King's gold King's yellow Orpiment Yellow arsenic sulfide		Solid	Yellow orange	Odorless
AVOID CONTACT WITH SOLID AND DUST. Keep people away. Wear chemical protective suit with self-contained breathing apparatus. Isolate and remove discharge of material. Notify local health and pollution control agencies.				
Fire	Not flammable Wear chemical protective suit with self-contained breathing apparatus			
 Exposure	CALL FOR MEDICAL AID DUST POISONOUS IF INHALED Harmful to skin Move to fresh air If on the skin has stopped, give artificial respiration. If on the skin is difficult to remove SOLID POISONOUS IF SWALLOWED Will burn eyes and skin Remove contaminated clothing and shoes Flush affected areas with plenty of water If IN EYES, hold eyelids open and flush with plenty of water If SKIN ALLOWED, and victim is CONSCIOUS, have victim drink water or milk, and follow stomach instructions If SWALLOWED, do not vomit unless INSTRUCTIONS OR HAVING CON- SCIOUS, do not take any except oral medicine			
Water Pollution	HAZARDOUS TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes Notify local health and pollution agencies Notify appropriate authorities if water intake			
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 444-4) Issue warning: poison water contaminant Restrict access Should be removed Chemical and physical treatment		2. LABEL 		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Arsenic yellow, King's gold, King's yellow, Orpiment, Yellow arsenic sulfide 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: As ₂ S ₃ 3.4 IMCO/United Nations Numerical Designation: 6.1/1557		4. 5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Self contained breathing apparatus, goggles, rubber gloves, clean protective clothing 5.2 Symptoms Following Exposure: (Acute and sub-acute poisoning are not common.) Repeated inhalation causes irritation of nose, laryngitis, mild bronchitis. Ingestion causes weakness, loss of appetite, gastrointestinal disturbances, peripheral neuritis, occasional hepatitis. Contact with eyes causes irritation. Irritates skin, especially where moist; if not treated, may cause ulceration. 5.3 Treatment for Exposure: Consult physician after all overexposures to this compound INHALATION: move to fresh air. INGESTION: induce vomiting by giving warm salt water, repeat until vomit is clear. EYES: flush with water for at least 15 min. SKIN: wash well with water. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.5 mg/m ³ (as arsenic) 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 4.1 D ₅₀ < 50 mg/kg 5.7 Late Toxicity: Possible skin and lung cancer 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Odorless

ASP

ASPHALT

Common Synonyms: Asphaltic bitumen Bitumen Petroleum asphalt		Thick liquid (generally heated) Dark Brown to black Tar odor
Stop discharge if possible Avoid contact with liquid Call fire department Isolate and remove discharged material Notify local health and pollution control agencies		May float or sink in water. Rubbery solid is produced when cooled
Fire	Combustible	Ext. flush with water. Do not use foam or other side sale Food exposed: flush with water
Exposure	LIQUID Will burn skin and eyes	Flush affected areas with plenty of water
Water Pollution	Effect of low concentrations on aquatic life is unknown POULING TO SL. RELINE May be dangerous if it enters water intakes Notify local health and pollution control agencies Notify petroleum control water intakes	
1. RESPONSE TO DISCHARGE (See Response Methods Manual CG 446-4) Mechanical containment Chemical and physical treatment		2. LABELS No hazard label required by Code of Federal Regulations
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Asphalt cements Asphalt bitumen Bitumen Petroleum asphalt 3.2 Coast Guard Compatibility Classification: Miscellaneous hydrocarbon mixtures 3.3 Chemical Formula: Not pertinent 3.4 IMCO/United Nations Numerical Desig.: 3.2 1999 3.3 1999		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Dark brown to black 4.3 Odor: Tarry
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Protective clothing, face and eye protection when handling hot material 5.2 Symptoms Following Exposure: Contact with skin may cause dermatitis. Inhalation of vapors may cause moderate irritation of nose and throat. Hot liquid burns skin. 5.3 Treatment for Exposure: Severe burns may result from contact with hot asphalt. If molten asphalt strikes the exposed skin, cool the skin immediately by quenching with cold water. A burn should be covered with a sterile dressing and the patient should be taken immediately to a hospital. 5.4 Toxicity by Inhalation (Threshold Limit Value): 5 mg/m 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 1 LD ₅₀ 5 to 15 kg 5.7 Late Toxicity: None observed 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause a slight smarting of the eyes or respiratory system if present in high concentrations. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Causes smarting of the skin and first degree burns on short exposure. It may cause secondary burns on long exposure. 5.10 Odor Threshold: Data not available		

6. REVISED 1978

ATZ

ATRAZINE

Common Synonyms: 2-Chloro-4-ethylamino-6-isopropylamino-s-triazine Atrax Herbicide		Solid crystals White Sinks in water
AVOID CONTACT WITH SOLID AND DUST. KEEP PEOPLE AWAY. Wear goggles and gloves. If contaminated by fire, extinguish with water spray. Use water spray to keep dust from spreading. Do not breathe dust. Do not get on skin.		
Fire	Not flammable POISONOUS GASES MAY BE PRODUCED WHEN HEATED	
 Exposure	CALL FOR MEDICAL AID DUST POISONOUS IF INHALED Irritating to eyes, nose and throat May irritate to skin If in eyes, hold eyes open and flush with plenty of water. If breathing is difficult, give oxygen. SOLID POISONOUS IF SWALLOWED Irritating to skin and eyes If on skin, contaminated clothing and shoes, flush with plenty of water. If in eyes, hold eyes open and flush with plenty of water. If swallowed, do not induce vomiting. If unconscious, have victim drink water. If swallowed and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.	
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes. Not a pollutant if used as directed. Not a pollutant if used as directed.	
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning - water contamination. Should be removed. Chemical and physical treatment.		2. LABELS No hazard label required by Code of Federal Regulations.
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: 2-Chloro-4-ethylamino-6-isopropylamino-S-triazine, Atrax herbicide 3.2 Coast Guard Compatibility Classification: To be developed. 3.3 Chemical Formula: C ₁₁ H ₁₄ N ₆ Cl 3.4 IMCO/United Nations Numerical Designation: 6.1 (609)		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: White 4.3 Odor: Data not available
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Dust mask, goggles, rubber gloves. 5.2 Symptoms Following Exposure: Irritates eyes and skin. If ingested, irritates mouth and stomach. 5.3 Treatment for Exposure: EYES: flush with copious amounts of water for 15 min. SKIN: wash with large amounts of water. INGESTION: no specific antidote; induce vomiting and give saline laxative and supportive therapy. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 2 oral rat LD ₅₀ = 3000 mg/kg. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Vapors are nonirritating to eyes and throat. 5.9 Liquid or Solid Irritant Characteristics: Causes smarting of the skin and first degree burns in short exposure and may cause second degree burns on long exposure. 5.10 Odor Threshold: Data not available.		

6 FIRE HAZARDS

- 6.1 **Flash Point:** Not flammable
 6.2 **Flammable Limits in Air:** Not flammable
 6.3 **Fire Extinguishing Agents:** Not pertinent
 6.4 **Fire Extinguishing Agents Not to be Used:** Not pertinent
 6.5 **Special Hazards of Combustion Products:** Irritating hydrogen chloride and toxic oxides of nitrogen may be formed.
 6.6 **Behavior in Fire:** Not pertinent
 6.7 **Ignition Temperature:** Not pertinent
 6.8 **Electrical Hazard:** Not pertinent
 6.9 **Burning Rate:** Not pertinent

8 WATER POLLUTION

- 8.1 **Aquatic Toxicity:** 12.6 mg/l 48 hr rainbow trout TL₅₀ fresh water.
 8.2 **Waterfowl Toxicity:** > 2000 mg/kg LD₅₀.
 8.3 **Biological Oxygen Demand (BOD):** Data not available.
 8.4 **Food Chain Concentration Potential:** None

9. SELECTED MANUFACTURERS

Ciba Geigy Corporation
 Agricultural Division
 P.O. Box 11422
 Greensboro, N.C. 27409

7 CHEMICAL REACTIVITY

- 7.1 **Reactivity with Water:** No reaction
 7.2 **Reactivity with Common Materials:** No reaction
 7.3 **Stability During Transport:** Stable
 7.4 **Neutralizing Agents for Acids and Caustics:** Not pertinent
 7.5 **Polymerization:** Not pertinent
 7.6 **Inhibitor of Polymerization:** Not pertinent

10 SHIPPING INFORMATION

- 10.1 **Grades or Purity:** Various grades 70-90%. Mixtures with sodium chlorate and sodium metaborate.
 10.2 **Storage Temperature:** Ambient
 10.3 **Inert Atmosphere:** No requirement
 10.4 **Venting:** Open

11 HAZARD ASSESSMENT CODE

(See Hazard Assessment Handbook, CG 446-3)
 II

12. HAZARD CLASSIFICATIONS

- 12.1 **Code of Federal Regulations:** Not Listed
 12.2 **NAS Hazard Rating for Bulk Water Transportation:**
- | Category | Rating |
|--------------------------|--------|
| Fire | 0 |
| Health | 0 |
| Vapor Irritant | 0 |
| Liquid or Solid Irritant | 2 |
| Poisons | 0 |
| Water Pollution | |
| Human Toxicity | |
| Aquatic Toxicity | 3 |
| Aesthetic Effect | 1 |
| Reactivity | |
| Other Chemicals | 1 |
| Water | 0 |
| Self Reaction | 0 |
- 12.3 **NIHA Hazard Classifications:** Not Listed

13 PHYSICAL AND CHEMICAL PROPERTIES

- 13.1 **Physical State at 15°C and 1 atm:** Solid
 13.2 **Molecular Weight:** 214.6
 13.3 **Boiling Point at 1 atm:** Decomposes
 13.4 **Freezing Point:** 34°F = 1°C = 345°K
 13.5 **Critical Temperature:** Not pertinent
 13.6 **Critical Pressure:** Not pertinent
 13.7 **Specific Gravity:** (solid) 1.2 at 20°C
 13.8 **Liquid Surface Tension:** Not pertinent
 13.9 **Liquid-Water Interfacial Tension:** Not pertinent
 13.10 **Vapor (Gas) Specific Gravity:** Not pertinent
 13.11 **Ratio of Specific Heats of Vapor (Gas):** Not pertinent
 13.12 **Latent Heat of Vaporization:** Not pertinent
 13.13 **Heat of Combustion:** (solid) -9,400 Btu/lb = -5,500 cal/g = -230 x 10³ J/kg
 13.14 **Heat of Decomposition:** Not pertinent
 13.15 **Heat of Solution:** Not pertinent
 13.16 **Heat of Polymerization:** Not pertinent

NOTES

(Continued on pages 5 and 6)

AZM

AZINPHOSMETHYL

Common Synonyms O, O Dimethyl S [(4-oxo-1,2,3-benzotriazin-3(4H)-ylidene) phosphorothioate] Gethion insecticide Gethion insecticide	Solid Brown Sinks in water
AVOID CONTACT WITH SOLID AND DUST. KEEP PEOPLE AWAY. Wear goggles and self-contained breathing apparatus. Stop work. Use water spray to knock down dust before and remove discharged material. Notify health and pollution control agencies.	
Fire	Not flammable. POISONOUS GASES MAY BE PRODUCED WHEN HEATED
 Exposure	CALL FOR MEDICAL AID. DUST POISONOUS IF INHALED. Move victim to fresh air. If eyes, hold eyelids open and flush with plenty of water. If breathing is difficult, give oxygen. SOLID POISONOUS IF SWALLOWED. If SWALLOWED and victim is CONSCIOUS, have victim drink water or milk and have victim induce vomiting. If SWALLOWED and victim is UNCONSCIOUS, DO NOT HAVE GASTRIC LAVAGE. Call for medical aid. Keep victim warm.
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS. May be dangerous if it enters water intakes. Notify health and wildlife agencies. Notify operators of nearby water intakes.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: water contaminant. Should be removed. Chemical and physical treatment.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: O, O Dimethyl S [(4-oxo-1,2,3-benzotriazin-3(4H)-ylidene) phosphorothioate] Gethion insecticide; Gethion insecticide. 3.2 Coast Guard Compatibility Classification: Not applicable. 3.3 Chemical Formula: C ₁₁ H ₁₂ N ₄ O ₂ PS ₂ . 3.4 IMCO/United Nations Numerical Designation: 6.1/1615.	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid. 4.2 Color: Brown. 4.3 Odor: Data not available.
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Dust mask, protective goggles, rubber gloves. 5.2 Symptoms Following Exposure: Dust irritates eyes. Inhalation or ingestion causes sweating, constriction of pupils of eyes, asthmatic symptoms, cramps, weakness, convulsions, collapse. 5.3 Treatment for Exposure: INHALATION: remove to fresh air, keep warm, call doctor. EYES: flush with water for at least 15 min. SKIN: flush with water, wash with soap and water. INGESTION: get medical attention at once, give water slurry of charcoal, do NOT give milk or alcohol. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.2 mg/m. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 4, oral rat LD ₅₀ = 1119.5 mg/kg. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.	

6. FIRE HAZARDS 6.1 Flash Point: Not flammable. 6.2 Flammable Limits in Air: Not flammable. 6.3 Fire Extinguishing Agents: Not pertinent. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Oxides of sulfur and phosphorus may be formed when in fire situation. 6.6 Behavior in Fire: Data not available. 6.7 Ignition Temperature: Not pertinent. 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: Not pertinent.	8. WATER POLLUTION 8.1 Aquatic Toxicity: 0.005 mg/l / 96 hr bluegill/TI m/fresh water. 8.2 Waterfowl Toxicity: 136 mg/kg LD ₅₀ . 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: None.
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: No reaction. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9. SELECTED MANUFACTURERS Baychem Corporation Chemagro Division Box 4913 Kansas City, Mo. 64120.
11. HAZARD ASSESSMENT CODE (See Hazard Assessment Handbook, CG 446-3) II	10. SHIPPING INFORMATION 10.1 Grade or Purity: Technical, 50% wettable powder, water emulsions. 10.2 Storage Temperature: Ambient. 10.3 Inert Atmosphere: No requirement. 10.4 Venting: Open.
12. HAZARD CLASSIFICATIONS 12.1 Code of Federal Regulations: Poisonous, Class B. 12.2 NAS Hazard Rating for Bulk Water Transportation: Not listed. 12.3 NFPA Hazard Classifications: Not listed.	13. PHYSICAL AND CHEMICAL PROPERTIES 13.1 Physical State at 15°C and 1 atm: Solid. 13.2 Molecular Weight: 317. 13.3 Boiling Point at 1 atm: Decomposes. 13.4 Freezing Point: 163°F = 73°C = 346°K. 13.5 Critical Temperature: Not pertinent. 13.6 Critical Pressure: Not pertinent. 13.7 Specific Gravity: 1.4 at 20°C (solid). 13.8 Liquid Surface Tension: Not pertinent. 13.9 Liquid-Water Interfacial Tension: Not pertinent. 13.10 Vapor (Gas) Specific Gravity: Not pertinent. 13.11 Ratio of Specific Heats of Vapor (Gas): Not pertinent. 13.12 Latent Heat of Vaporization: Not pertinent. 13.13 Heat of Combustion: (est.) -8,600 Btu/lb = -4,800 cal/g = -200 X 10 ³ J/kg. 13.14 Heat of Decomposition: Not pertinent. 13.15 Heat of Solution: Not pertinent. 13.16 Heat of Polymerization: Not pertinent.
NOTES (Continued on pages 2 and 3)	

BRC

BARIUM CARBONATE

Common Synonyms		Solid crystals or powder	White	Odorless
		Sinks in water		
Health and Environmental Hazards: None known for this product.				
Fire	Not flammable			
Exposure	CALL FOR MEDICAL AID SOLID If swallowed, will cause nausea and vomiting. If SWALLOWED and it turns to CONSUMPTION, do not drink water. (note)			
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS Fouling to shoreline May be dangerous if it enters water intakes Slightly irritates health and wildlife (fishes) Slightly irritates to fresh water marine life			
1. RESPONSE TO DISCHARGE (See Response Methods Handbook CG 446-4) Should be removed Chemical and physical treatment		2. LABELS No hazard label required by Code of Federal Regulations		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: No common synonyms 3.2 Coast Guard Competibility Classification: Not applicable 3.3 Chemical Formula: BaCO ₃ 3.4 IMCO United Nations Numerical Designation: 6.1.1564		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: White 4.3 Odor: None		
5. HEALTH HAZARDS				
5.1 Personal Protective Equipment: Dust respirator				
5.2 Symptoms Following Exposure: (INGESTION ONLY): excessive salivation, vomiting, severe abdominal pain, and violent purging with watery and bloody stools, a slow and often irregular pulse and a transient elevation in arterial blood pressure, tinnitus, eddiness and vertigo, muscle twitchings progressing to convulsions and, or paralysis, dilated pupils with impaired accommodation, confusion and increasing somnolence, without coma, collapse and death from respiratory failure and cardiac arrest.				
5.3 Treatment for Exposure: Rapid oral administration of a soluble sulfate in water, such as magnesium or sodium sulfate (2 oz) alum (4 gm) or very dilute sulfuric acid (30 ml of a 10% solution diluted to 1 qt). These agents precipitate barium as the insoluble sulfate. (Gastric lavage or induced emesis. Seek medical attention.)				
5.4 Toxicity by Inhalation (Threshold Limit Value): Not pertinent.				
5.5 Short-Term Inhalation Limits: Not pertinent				
5.6 Toxicity by Ingestion: Grade 2 LD ₅₀ 5 to 5 g/kg (rat, rat, guinea pig)				
5.7 Late Toxicity: None observed				
5.8 Vapor (Gas) Irritant Characteristics: Not pertinent				
5.9 Liquid or Solid Irritant Characteristics: None				
5.10 Ocular Threshold: Not pertinent				

6. FIRE HAZARDS

- 6.1 Flash Point: Not flammable
 6.2 Flammable Limits in Air: Not flammable
 6.3 Fire Extinguishing Agents: Not pertinent
 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent
 6.5 Special Hazards of Combustion Products: Not pertinent
 6.6 Behavior in Fire: Not pertinent
 6.7 Ignition Temperature: Not flammable

NOTES

BCR

BARIUM CHLORATE

Common Synonyms		Solid	White	Odorless
		Sinks and mixes with water		
AVOID CONTACT WITH SOLID AND DUST. KEEP PEOPLE AWAY. Wear goggles, self-contained breathing apparatus and other protective clothing. Call for department. Isolate and remove discharged material. Notify local health and pollution control agencies.				
Fire	Not flammable May cause fire on contact with combustibles POISONOUS GASES MAY BE PRODUCED IN FIRE Containers may explode in fire Combustion fires from solid discharge products may cause explosion Flood discharge area with water Solid exposed containers will leak			
 Exposure	CALL FOR MEDICAL AID DUST POISONOUS IF INHALED Irritating to eyes, nose and throat Move victim to fresh air If in eyes, hold eyelids open and flush with plenty of water If breathing is difficult, give oxygen SOLID POISONOUS IF SWALLOWED Irritating to skin and eyes Remove contaminated clothing and shoes Flush affected areas with plenty of water If IN EYES hold eyelids open and flush with plenty of water If SWALLOWED drink water to help wash down solids If SWALLOWED and feeling sick, unconscious or having convulsions, do not induce vomiting. Call for medical aid.			
Water Pollution	Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes Notify local health and pollution control agencies Notify appropriate regulatory water agencies			
1. RESPONSE TO DISCHARGE See Response Methods handbook, CG 446-4. Issue warning - oxidizing material water contaminant Should be removed Chemical and physical treatment Disperse and flush		2. LABEL 		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Barium chlorate monohydrate 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: Ba(ClO₃)₂ · H₂O 3.4 IMCO/United Nations Numerical Designation: 5.1 1425		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: White 4.3 Odor: None		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Goggles or face shield, dust respirator (U.S. Bureau of Mines approved), rubberized shoes and gloves, coveralls or other suitable outer clothing 5.2 Symptoms Following Exposure: Inhalation causes irritation of upper respiratory system. Contact with eyes or skin causes irritation. Ingestion causes abdominal pain, nausea and vomiting, diarrhea, pallor, blueness, shortness of breath, excessive salivation, convulsive tremors, slow, hard pulse, elevated blood pressure, unconsciousness. Hemorrhages may occur in the stomach, intestines and kidneys. Muscular paralysis may follow 5.3 Treatment for Exposure: Get medical attention. Alert doctor to possibility of barium poisoning, particularly if compound was swallowed. INHALATION: remove to fresh air. EYES: flush with copious quantities of water for at least 15 minutes. Get medical attention. SKIN: flush with water. INGESTION: induce vomiting and call a physician. Have victim drink aqueous 10% solution of magnesium or sodium sulfate for severe intoxication. Calcium or a magnesium salt may have to be given IV, with caution. Treatment otherwise is supportive and symptomatic. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.5 mg/m³ 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Data not available 5.7 Late Toxicity: Barium poisoning 5.8 Vapor (Gas) Irritant Characteristics: Not pertinent 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Not pertinent

Common Synonyms		Solid	White	Odorless
		Sinks and mixes with water		
AVOID CONTACT WITH GASES AND DUST. KEEP PEOPLE AWAY. Wear rubber boots that discharge no air. Do not use any pneumatic discharge method. No dust or health and pollution hazards.				
Fire	Not flammable. May explode on contact with combustibles. POISONOUS GASES MAY BE PRODUCED WHEN HEATED Containers may explode in fire. Combat fires from safe distance. Do not flood burns. Flood discharge area with water. Do not expose containers to water.			
Exposure	CALL FOR MEDICAL AID DUST POISONOUS IF INHALED Irritating to eyes, nose and throat. May cause throat and lung irritation. If in eyes, hold eyelids open and flush with plenty of water. If breathing is difficult, get oxygen. SOLID POISONOUS IF SWALLOWED Irritating to skin and eyes. If on skin, wash with plenty of water. If in eyes, hold eyelids open and flush with plenty of water. If swallowed, do not induce vomiting. Get medical attention.			
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. No data on health and wildlife effects. No data on potential for bioaccumulation.			
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4.) Issue warning: oxidizing material, water contaminant. Should be removed. Chemical and physical treatment. Disperse and flush.		2. LABEL OXIDIZER		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Barium perchlorate trihydrate 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: Ba(ClO ₄) ₂ · 3H ₂ O 3.4 IMCO/United Nations Numerical Designation: 4.1, 144		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: White 4.3 Odor: None		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Goggles or face shield, dust respirator, rubber gloves and shoes, suitable coveralls. 5.2 Symptoms Following Exposure: Inhalation or contact with eyes or skin causes irritation. Ingestion causes excessive salivation, vomiting, constipation, diarrhea, convulsive tremors, slow, hard pulse, and elevated blood pressure. Hemorrhages may occur in the stomach, intestines, and kidneys. Muscular paralysis may follow. 5.3 Treatment for Exposure: Get medical attention. Alert doctor to possibility of barium poisoning, particularly if compound was swallowed. INHALATION: remove to fresh air. EYES: flush with water for at least 15 min. SKIN: flush with water. INGESTION: oral administration of an aqueous 10% solution of magnesium or sodium sulfate, not severe intoxication. Calcium or a magnesium salt may have to be given IV, with caution; treatment otherwise is supportive and symptomatic. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.5 mg/m. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Data not available. 5.7 Oral Toxicity: Barium poisoning. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Not pertinent.				

6 FIRE HAZARDS

- 6.1 Flash Point: Not flammable (but see 7.2)

NOTES

BPM

BARIUM PERMANGANATE

Common Synonyms	Solid Dark purple to black Odorless Sinks and mixes with water
AVOID CONTACT WITH SKIN AND EYES. KEEP FLOPPY AWAY. Wear gloves and eye protection when handling. Wash thoroughly with water if contact occurs. Do not ingest.	
Fire	Not flammable. May cause fire on contact with combustibles. Containers may explode in fire.
Exposure	CAUTION: DUST POISONOUS IF INHALED Irritating to eyes, nose and throat. SOLID POISONOUS IF SWALLOWED Irritating to skin and eyes. Swallowing may cause severe irritation of the digestive tract. If swallowed, drink plenty of water. Do not induce vomiting.
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes.
1. RESPONSE TO DISCHARGE (See Response Booklet Handbook, CG 446-7) Issue warning: oxidizing material, water contaminant. Should be removed. Chemical and physical treatment. Disperse and flush.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: No common synonyms. 3.2 Coast Guard Compatibility Classification: Not applicable. 3.3 Chemical Formula: Ba(MnO ₄) ₂ 3.4 IMCO/United Nations Numerical Designation: 5.1 1441	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid. 4.2 Color: Dark purple to black. 4.3 Odor: None.
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Goggles or face shield, dust respirator, rubber gloves and shoes. 5.2 Symptoms Following Exposure: Irritation on contact with eyes or skin causes irritation. Ingestion causes abdominal pain, nausea, vomiting, pulse, shortness of breath. 5.3 Treatment for Exposure: Get medical attention. Alert doctor to possibility of barium poisoning, particularly if compound was swallowed. INHALATION: remove to fresh air. EYES: flush with copious amounts of water for 15 min. SKIN: wash with copious amounts of water. INGESTION: induce vomiting, give a 10% water solution of Epsom salt. 5.4 Toxicity by Inhalation (Threshold Limit Values): 0.5 mg/m. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Data not available. 5.7 Late Toxicity: Barium poisoning. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Not pertinent.	

6. FIRE HAZARDS 6.1 Flash Point: Not flammable. 6.2 Flammable Limits in Air: Not flammable. 6.3 Fire Extinguishing Agents: Not pertinent. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Not pertinent. 6.6 Behavior in Fire: Can increase the intensity of fire. 6.7 Ignition Temperature: Not pertinent. 6.8 Electrical Hazards: Not pertinent. 6.9 Burning Rate: Not pertinent.	8. WATER POLLUTION 8.1 Aquatic Toxicity: 2.2 to 4.1 mg/L for Mn; 8 to 18 hr fish killed. *Type of water not specified. 8.2 Waterway Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): None. 8.4 Food Chain Concentration Potential: None.
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: When mixed with combustible material, can ignite by friction or acids may be ignited; normally combustible. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9. SELECTED MANUFACTURERS 1. Cerac, Inc. 1440 W. Silver Spring Rd. Meadowdale, W. Va. 26041 2. Ventron Corp. Alfa Products P.O. Box 159 Beverly, Mass. 01915

BPO

BARIUM PEROXIDE

Common Synonyms Barium dioxide Barium superoxide Barium baroxide	Solid Light gray to tan Odorless Sinks in water
AVOID CONTACT WITH SOLID AND DUST. KEEP PEOPLE AWAY. Wear rubber work shoes including pants. Isolate and remove discharged material. Notify local health and pollution control agencies.	
Fire	Not flammable. May cause fire on contact with combustibles. Containers may explode in fire. Combat fires from safe distance or per listed location. Flood discharge area with water. Cool exposed containers with water.
 Exposure	CALL FOR MEDICAL AID. DUST POISONOUS IF INHALED. Irritating to eyes, nose and throat. Move victim to fresh air. If in eyes, hold eyelids open and flush with plenty of water. If breathing is difficult, give oxygen. SOLID POISONOUS IF SWALLOWED. Will burn skin and eyes. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water. DO NOT INDUCE VOMITING.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4.) Issue warning - oxidizing material. water contaminated. Should be removed. Chemical and physical treatment.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Barium dioxide Barium superoxide Barium baroxide 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: BaO 3.4 IMCO/United Nations Numerical Designation: N/A 1449	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: Light grayish tan, grayish white 4.3 Odor: None
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: U.S. OSHA approved toxic dust respirator or liquid proof PVC gloves, chemical safety goggles, full cover clothing. 5.2 Symptoms Following Exposure: Irritation, cough, irritation in mouth, nose, eyes, throat, and skin. If contact with eyes or skin causes severe burns. Ingestion causes excessive salivation, vomiting, diarrhea, convulsions, tremors, numb, hard pulse, and elevated blood pressure. Severe burns may occur in the stomach, intestines, and esophagus. Muscular paralysis may follow. 5.3 Treatment for Exposure: Get medical attention. Alert doctor to possible toxicity of barium peroxide. Inhalation: If compound was swallowed, INHALATION: remove to fresh air. EYES: Flush with water for 15 min. SKIN: Flush with water. INGESTION: oral administration of a series of solutions of magnesium or sodium sulfate. In a severe intoxication, calcium or a magnesium salt may have to be given IV. In all cases, treatment of burning is symptomatic and symptomatic. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.5 mg/m 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Data not available 5.7 Late Toxicity: Barium poisoning 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Not pertinent	

6 FIRE HAZARDS

- 6.1 **Flash Point:** Not flammable but may cause fire on contact with combustibles.
 6.2 **Flammable Limits in Air:** Not pertinent.
 6.3 **Fire Extinguishing Agents:** Flood with water, dry powder or a graphite powdered limestone.
 6.4 **Fire Extinguishing Agents Not to be Used:** Not pertinent.
 6.5 **Special Hazards of Combustion Products:** Not pertinent.
 6.6 **Behavior in Fire:** Can increase intensity of fire.
 6.7 **Ignition Temperature:** Not pertinent.
 6.8 **Electrical Hazard:** Not pertinent.
 6.9 **Burning Rate:** Not pertinent.

8 WATER POLLUTION

- 8.1 **Aquatic Toxicity:** Data not available.
 8.2 **Waterway Toxicity:** Data not available.
 8.3 **Ecological Oxygen Demand (BOD):** None.
 8.4 **Food Chain Concentration Potential:** None.

9. SELECTED MANUFACTURERS

1. MC Corporation

 Mechanicsville, Ohio 43052

7 CHEMICAL REACTIVITY

- 7.1 **Reactivity with Water:** Decomposes slowly.
 The reaction is not hazardous.
 7.2 **Reactivity with Common Materials:** Corrodes metal slowly. If mixed with combustible material or finely divided metal, can cause spontaneous combustion.
 7.3 **Stability During Transport:** Stable.
 7.4 **Neutralizing Agents for Acids and Corrosives:** Not pertinent.
 7.5 **Polymerization:** Not pertinent.
 7.6 **Inhibitor of Polymerization:** Not pertinent.

10. SHIPPING INFORMATION

- 10.1 **Grade or Purity:** Technical 91-92% high purity reagent.
 10.2 **Storage Temperature:** Ambient.
 10.3 **Inert Atmosphere:** Not requirement.
 10.4 **Venting:** Pressure vacuum.

11 HAZARD ASSESSMENT CODE

(See Hazard Assessment Handbook, CG 446-3.)
 II

12. HAZARD CLASSIFICATIONS

- 12.1 **Code of Federal Regulations:** Oxidizing material.
 12.2 **HAS Hazard Rating for Bulk Water Transportation:** Not listed.
 12.3 **NFPA Hazard Classifications:**

NOTES

BZD

BENZALDEHYDE

Common Synonyms Oil of bitter almond Benzoyl aldehyde	Waxy liquid Colorless to pale yellow Bitter almond odor May float or sink in water
Stop discharge if possible. Keep people away. Avoid contact with liquid. Call fire department. Isolate and remove discharged material. Notify local health and pollution control agencies.	
Fire	Combustible Extinguish with wet or dry chemical foam or carbon dioxide. Cool exposed containers with water.
Exposure	CALL FOR MEDICAL AID LIQUID Irritating to skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES: hold eyelids open and flush with plenty of water. IF SWALLOWED: do not induce vomiting. Have victim drink water or milk and get to hospital as soon as possible. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS: do not induce except keep victim warm.
Water Pollution	Effect of low concentrations on aquatic life is unknown. Floating to shoreline. May be dangerous if it enters water intakes. Notify local health and pollution control officials. Notify operators of nearby water intakes.
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning - water contaminant. Should be removed.	2 LABELS No hazard label required by Code of Federal Regulations.
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Benzoyl aldehyde Oil of bitter almond 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: C ₇ H ₆ O 3.4 IMCO/United Nations Numerical Designation: 331900	4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless to pale yellow 4.3 Odor: Like almonds
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Chemical goggles and protective clothing. 5.2 Symptoms Following Exposure: Inhalation of concentrated vapor may irritate eyes, nose and throat. Liquid is irritating to the eyes. Prolonged contact with the skin may cause irritation. 5.3 Treatment for Exposure: SKIN EYE CONTACT: move victim to fresh air. Call physician immediately. Wash contaminated skin areas with water. Flush eyes with plenty of water for at least 15 min. INGESTION: induce vomiting. Call a physician. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 2 LD ₅₀ 5 to 5 g/kg. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause severe irritation of eyes and throat and can cause eye and lung injury. They cannot be tolerated even at low concentrations. 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain may cause smarting and reddening of the skin. 5.10 Odor Threshold: 0.042 ppm

REVISED 1978

BNZ

BENZENE

Common Synonyms Benzol Benzole		Watery liquid	Colorless	Gasoline-like odor
Floats on water. Flammable, irritating vapor is produced. Freezing point is 42° F.				
Avoid contact with liquid and vapor. Keep people away. Wear goggles and self-contained breathing apparatus. Shut off gas flow and call fire department. Soap & large amounts. Soap and add use water. Do not use clean vapor. Isolate and remove discharged material. Notify local health and pollution control agencies.				
Fire		FLAMMABLE Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Wear goggles and self-contained breathing apparatus. Extinguish with dry chemical foam or carbon dioxide. Water may be ineffective on fire. Confined vapors react with water.		
Exposure		CALL FOR MEDICAL AID VAPOR Irritating to eyes, nose and throat. If inhaled, will cause headache, difficult breathing, or loss of consciousness. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, use oxygen. LIQUID Irritating to skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. If IN EYES, hold eyelids open and flush with plenty of water. If SWALLOWED and victim is CONSCIOUS, have victim drink water or milk.		
Water Pollution		HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: high flammability. Restrict access.		2. LABEL 		
3. CHEMICAL DESIGNATIONS		4. OBSERVABLE CHARACTERISTICS		
3.1 Synonyms: Benzol Benzole		4.1 Physical State (as shipped): Liquid		
3.2 Coast Guard Compatibility Classification: Aromatic hydrocarbon		4.2 Color: Colorless		
3.3 Chemical Formula: C ₆ H ₆		4.3 Odor: Aromatic, rather pleasant aromatic odor, characteristic odor		
3.4 IMCO/United Nations Numerical Designation: 12.1114				
5. HEALTH HAZARDS				
5.1 Personal Protective Equipment: Hydrocarbon vapor canister, supplied air or a hose mask, hydrocarbon insoluble rubber or plastic gloves, chemical goggles or face splash shield, hydrocarbon insoluble apron such as neoprene.				
5.2 Symptoms Following Exposure: Dizziness, excitation, pallor, followed by flushing, weakness, headache, breathlessness, chest constriction, coma and possible death.				
5.3 Treatment for Exposure: SKIN: Flush with water. Followed by soap and water. Remove contaminated clothing and wash skin. EYES: Flush with plenty of water until irritation subsides. INHALATION: Remove from exposure immediately. Call a physician. If breathing is irregular or stopped, start resuscitation, administer oxygen.				
5.4 Toxicity by Inhalation (Threshold Limit Value): 75 ppm				
5.5 Short-Term Inhalation Limits: 75 ppm for 30 min.				
5.6 Toxicity by Ingestion: Grade 3 LD ₅₀ 500-500 mg/kg				
5.7 Late Toxicity: Unknown				
5.8 Vapor (Gas) Irritant Characteristics: If present in high concentrations, vapors may cause irritation of eyes or respiratory system. The effect is temporary.				
5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain may cause smarting and reddening of the skin.				
5.10 Odor Threshold: 4.65 ppm.

BHC

BENZENE HEXACHLORIDE

Common Synonyms 1,2,3,4,5,6-Hexachloro- cyclohexane Lindane BHC Camphene Tish	Solid: crystal or powder, or solution Solid: light to dark brown Musty odor Solid sinks in water. Solution generally floats on water.
Avoid contact with liquid and solid. Keep people away. Wear goggles and self-contained breathing apparatus. Stop discharge if possible. Call fire department. May upwind and use water spray to knock down vapor. Isolate and remove discharged material. Notify local health and pollution control agency.	
Fire	Solid not flammable, but usually dissolved in combustible liquid. POISONOUS GASES ARE PRODUCED WHEN SOLID IS HEATED OR WHEN SOLUTION BURNS. Wear goggles and self-contained breathing apparatus. Extinguish with foam, dry chemical, or carbon dioxide.
 Exposure	CALL FOR MEDICAL AID SOLID OR SOLUTION POISONOUS IF SWALLOWED Irritating to skin and eyes. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES: hold eyelids open and flush with plenty of water. IF SWALLOWED: do not vomit. CONSIDER have victim drink water if mild.
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS Fouling to shoreline. May be dangerous if it enters water intakes. Notify local health and pollution control officials. Notify operators of nearby water intakes.
1. RESPONSE TO DISCHARGE (See Response Memo's Handbook, CG 446-4) Issue warning: water contaminant poison. Should be removed. Chemical and physical treatment.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: BHC Camphene 1,2,3,4,5,6-Hexachlorocyclohexane Lindane 3.2 Coast Guard Compatibility Classification: Not applicable. 3.3 Chemical Formula: C ₆ H ₆ Cl ₆ 3.4 IMCO United Nations Numerical Designation: 6.1 1615	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: Light tan to dark brown 4.3 Odor: Characteristic
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Data not available. 5.2 Symptoms Following Exposure: Hyperirritability and central nervous excitation: notably vomiting, restlessness, muscle cramps, ataxia, and clonic and tonic convulsions. Subsequent central nervous depression leading to respiratory failure. Occasional dermatitis and urticaria. 5.3 Treatment for Exposure: Gastric lavage and saline cathartics (not oil laxatives because they promote absorption). Sedatives: pentobarbital or phenobarbital in amounts adequate to control convulsions. Calcium gluconate intravenously may be used in conjunction with sedatives to control convulsions. Rest and quiet. Do NOT give epinephrine because ventricular fibrillation may result. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.5 mg/m. 5.5 Short-Term Inhalation Limits: Time not less than 30 min. 5.6 Toxicity by Ingestion: Gamma isomer (Lindane): Grade 3 LD ₅₀ 50 to 500 mg/kg (rat). Technical mixture: Grade 2 LD ₅₀ 0.5 to 5 g/kg. 5.7 Late Toxicity: Mutagen to human lymphocytes. 5.8 vapor (Gas) Irritant Characteristics: Moderately irritating. Personnel will not usually tolerate moderate or high concentrations. 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain may cause smarting and reddening of the skin. 5.10 Odor Threshold: Data not available.	

6. FIRE HAZARDS 6.1 Flash Point: Not flammable. 6.2 Flammable Limits in Air: Not flammable. 6.3 Fire Extinguishing Agents: Not pertinent. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Toxic gases are generated when solid is heated or when solution burns. 6.6 Behavior in Fire: Not pertinent. 6.7 Ignition Temperature: Not flammable. 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: Not flammable.	8. WATER POLLUTION 8.1 Aquatic Toxicity: 0.77 ppm: 96-hr. LC ₅₀ fish, fresh water. 0.18 ppm: 96-hr. LC ₅₀ fish, fresh water. 0.04 ppm: 10-hr. LC ₅₀ fish, 100% lethal salt water. 8.2 Waterfowl Toxicity: 2000 mg/kg. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: High.								
7. REVISED 1978

BPD

BENZENE PHOSPHORUS DICHLORIDE

Common Synonyms Phenylphosphorus dichloride		Liquid	Colorless	Unpleasant odor
Reacts violently with water. Poisonous visible vapor cloud is produced.				
Store in dry, cool place. Keep people away. Avoid contact with liquid and vapor. Wear eye protection. Discharge into sewer. Notify local health and pollution agencies.				
Fire	Fire data not available			
	CALL FOR MEDICAL AID GAS PRODUCED IN REACTION WITH WATER POISONOUS IF INHALED Irritating to eyes, nose and throat. If inhaled, move exposed person to fresh air. If breathing is stopped, give artificial respiration. If necessary, use mouth-to-mouth respiration. LIQUID Irritating to skin and eyes. Harmful if swallowed. If swallowed, do not induce vomiting. If in eyes, flush with water for at least 15 minutes. If on skin, flush with water. If swallowed, give large amounts of milk or water. Do NOT induce vomiting.			
Exposure				
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and pollution agencies.			
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: corrosive. Restrict access. Disperse and flush.		2. LABEL 		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Phenyl phosphorus dichloride Phenylphosphine dichloride Dichlorophenylphosphine 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: C ₆ H ₅ PCl ₂ 3.4 IMCO/United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Acid pungent		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Self-contained breathing apparatus, acid-type canister, mask, goggles and face shield, rubber gloves, protective clothing. 5.2 Symptoms Following Exposure: Inhalation causes irritation of nose and throat, pulmonary edema may develop following severe exposures. Contact with skin or eyes causes severe burns. Ingestion causes severe burns of mouth and stomach. 5.3 Treatment for Exposure: Get medical attention following all exposures to this compound. INHALATION: remove to fresh air; if breathing has stopped, start mouth-to-mouth resuscitation. EYES: flush with water for at least 15 min; do not use oils or ointments. SKIN: flush with water, wash with soap and water. INGESTION: give large amounts of milk or water; do NOT induce vomiting; if vomiting does occur, give milk or beaten eggs at one-hour intervals. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Data not available. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.				

6 FIRE HAZARDS 6.1 Flash Point: 218-10°C. May be lower because of presence of dissolved phosphorus 6.2 Flammable Limits in Air: Not pertinent 6.3 Fire Extinguishing Agents: Large amounts of water 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent 6.5 Special Hazards of Combustion Products: Toxic fumes include oxides of phosphorus and hydrogen chloride 6.6 Behavior in Fire: Containers may rupture; not liquid is spontaneously flammable because of presence of dissolved phosphorus 6.7 Ignition Temperature: 319°F 6.8 Electrical Hazard: Data not available 6.9 Burning Rate: Data not available	8 WATER POLLUTION 8.1 Aquatic Toxicity: Data not available 8.2 Waterfowl Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): Data not available 8.4 Food Chain Concentration Potential: None
7 CHEMICAL REACTIVITY 7.1 Reactivity with Water: Reacts vigorously to form hydrogen chloride (hydrochloric acid) 7.2 Reactivity with Common Materials: Corrodes metal except 316 stainless steel, nickel or Hastelloy 7.3 Stability During Transport: Stable 7.4 Neutralizing Agents for Acids and Caustics: Flush with water; rinse with sodium bicarbonate or lime solution 7.5 Polymerization: Not pertinent 7.6 Inhibitor of Polymerization: Not pertinent	9. SELECTED MANUFACTURERS 1. PCR, Inc. P.O. Box 1466 Gainesville, Fla. 32602 2. Aldrich Chemical Co. 940 West St. Paul Ave. Milwaukee, Wis. 53233 3. Stauffer Chemical Co. NOTES (Continued on pages 2 and 3)	

BZA

BENZOIC ACID

Common Synonyms Benzenecarboxylic acid Carboxybenzene	Solid crystals or powder White Faint pleasant odor Sinks in water
Avoid contact with skin and face. Keep people away from vapors. Always use in a well-ventilated area. If exposed, wash eyes and face with plenty of water. If inhaled, move to fresh air. If ingested, do not induce vomiting. Seek medical attention.	
Fire	Combustible Vapor may explode if ignited in an enclosed area. Dust may form explosive mixture with air. Extinguish with water spray. Do not use chemical extinguishers.
Exposure	CAUTION FOR MEDICAL AID DUST Irritating to nose and throat if inhaled. Move to fresh air. SOLID Irritating to skin and eyes. Flush affected areas with plenty of water. If IN EYES, hold eyelids open and flush with plenty of water.
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446.4) Disperse and flush.	2. LABELS No hazard label required by Code of Federal Regulations.
3. CHEMICAL DESIGNATIONS 3.1 Synonyms Benzenecarboxylic acid Carboxybenzene Diacrylic acid 3.2 Coast Guard Compatibility Classification Not applicable 3.3 Chemical Formula: <chem>c1ccccc1C(=O)O</chem> 3.4 IMCO/United Nations Numerical Designation: Not listed	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: White 4.3 Odor: Faint, pleasant, slight aromatic
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Bureau of Mines dust respirator when melted material present; use eye protection and organic respirator for fumes. 5.2 Symptoms Following Exposure: Dust may be irritating to nose and eyes. At elevated temperatures fumes may cause irritation of eyes, respiratory system, and skin. 5.3 Treatment for Exposure: Remove patient to fresh air. EYE CONTACT: Flush eyes with water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Not pertinent. 5.5 Short-Term Inhalation Limits: Not pertinent. 5.6 Toxicity by Ingestion: Grade 2 LD ₅₀ 0.5 g/kg. 5.7 Late Toxicity: None. 5.8 Vapor (Gas) Irritant Characteristics: Not pertinent. 5.9 Liquid or Solid Irritant Characteristics: Minimal hazard. If applied on clothing and allowed to remain may cause smarting and reddening of the skin. Dust may irritate the nose and eyes. 5.10 Odor Threshold: Not pertinent.	

6. BZN

BENZONITRILE

Common Synonyms Phenylcyanide Cyanobenzene Benzoic acid nitrile		Liquid	Colorless	Almond-like odor
May float or sink in water				
AVOID CONTACT WITH LIQUID AND VAPOR. KEEP PEOPLE AWAY. NO FUMES OR GASES FROM LIQUID OR VAPOR. NO TOXIC EFFECTS FROM LIQUID OR VAPOR. NO TOXIC EFFECTS FROM LIQUID OR VAPOR.				
Fire	Combustible POISONOUS GASES MAY BE PRODUCED IN FIRE. Weak explosives when heated, but not detonates. Liquefies with heat. Burns with a blue flame. Water may be used to extinguish fire. AVOID CONTACT WITH LIQUID AND VAPOR.			
Exposure	CALL FOR MEDICAL AID VAPOR Irritating to eyes, nose and throat. If inhaled will cause headache, difficult breathing or loss of consciousness. If inhaled, get fresh air immediately with plenty of water. If inhaled, get fresh air immediately with plenty of water. If inhaled, get fresh air immediately with plenty of water. LIQUID Irritating to skin and eyes. If swallowed will cause headache, nausea, vomiting or loss of consciousness. If swallowed, get fresh air immediately with plenty of water. If swallowed, get fresh air immediately

BZP

BENZOPHENONE

Common Synonyms Benzoyl benzene Diphenyl ketone Diphenyl methanone Alpha-oxodiphenylmethane Alpha-oxodione		Liquid or solid	White	Flowers odor
May float or sink in water				
Not flammable, combustible, or toxic Not a severe irritant Not a severe skin sensitizer Not a severe eye irritant				
Fire		Combustible Flammable liquid and vapor May burn to a black smoke		
Exposure		ALL OR MOSTLY VAPOR LIQUID OR SOLID Irritating to skin and eyes. If swallowed will cause nausea, or vomiting. If inhaled, irritation of the respiratory tract. If in eyes, flush with water for at least 15 min. If on skin, wash with soap and water. If swallowed, do not induce vomiting unless instructed by a physician. If swallowed, do not induce vomiting unless instructed by a physician.		
Water Pollution		Effect of low concentrations on aquatic life is unknown. Fouling to shoreline. May be dangerous if it enters water intakes. Not a severe water pollutant.		
1 RESPONSE TO DISCHARGE See Response Methods Handbook, CG 444-4. Issue warning - water contaminant Mechanical containment Should be removed Chemical and physical treatment		2. LABELS No hazard label required by Code of Federal Regulations		
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Benzobenzene Diphenyl ketone, Diphenyl methanone alpha-Oxodiphenylmethane alpha-Oxodione 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: C ₁₃ H ₁₀ O 3.4 IMCO/United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid or solid 4.2 Color: White 4.3 Odor: Characteristic		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Goggles or face shield, rubber gloves 5.2 Symptoms Following Exposure: Ingestion causes gastrointestinal disturbances. Contact causes eye irritation and, if prolonged, irritation of skin. 5.3 Treatment for Exposure: INHALATION: remove to fresh air. INGESTION: get medical attention. EYES: flush with water for at least 15 min. get medical attention if irritation persists. SKIN: flush with water, wash with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion, Grade 1 acute oral rat LD ₅₀ : 10,000 mg/kg 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available				

6 FIRE HAZARDS (Material is combustible) 6.1 Flash Point: Data not available. 6.2 Flammable Limits in Air: Data not available. 6.3 Fire Extinguishing Agents: Foam, dry chemical, carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective. 6.5 Special Hazards of Combustion Products: 6.6 Behavior in Fire: 6.7 Ignition Temperature: Data not available. 6.8 Electrical Hazard: Data not available. 6.9 Burning Rate: Not pertinent.	8 WATER POLLUTION 8.1 Aquatic Toxicity: Data not available. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: None.
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: Will attack some plastics. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9. SELECTED MANUFACTURERS 1. Eastman Organic Chemicals, Rochester, N.Y. 14600. 2. Aldrich Chemical Co., 540 W. Saint Paul Ave., Milwaukee, Wis. 53204. 3. Guller & Schlegel Chemical Mfg. Co., 544 Milwaukee Avenue, Carle Place, N.Y. 11514.

BZC

BENZOYL CHLORIDE

Common Synonyms Benzencarbonyl chloride	Water liquid Color less to slightly brown Sinks and reacts slowly with water producing a poisonous gas.
Avoid contact with liquid and vapor. Wear goggles and with retained breathing apparatus. Keep people away. Evacuate area in case of large discharge. Stop discharge if possible. Call fire department. To avoid fire from discharged material. Notify local health and pollution control agencies.	
Fire	Combustible POISONOUS GASES ARE PRODUCED IN FIRE AND WHEN HEATED Wear goggles and with retained breathing apparatus. DO NOT USE WATER Extinguish with foam dry chemical or carbon dioxide.
Exposure	CALL FOR MEDICAL AID LIQUID Will burn skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. If IN EYES, hold eyes wide open and flush with plenty of water. If SWALLOWED, do not induce vomiting. DO NOT INDUCE VOMITING . If SKIN ALREADY IRRITATED, DO NOT USE WATER.
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes. Notify local health and water pollution agencies. Notify operators of nearby water intakes.
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 444-4) Evacuate area in case of large discharge. Call fire department. Chemical and physical control.	2 LABEL 
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Benzencarbonyl chloride 3.2 Coast Guard Compatibility Classification: No applicability 3.3 Chemical Formula: C ₆ H ₅ COCl 3.4 IMCO United Nations Numerical Designation: 2.3	4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless, may become slightly brownish on standing 4.3 Odor: Pungent, characteristic
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Full protective clothing, including full face respirator for acid gases and organic vapors (yellow GMS canisters), close fitting goggles, nonslip rubber gloves, plastic apron, face shield. 5.2 Symptoms Following Exposure: INHALATION: may irritate eyes, nose and throat. INGESTION: causes acute discomfort. SKIN: causes irritation and burning. 5.3 Treatment for Exposure: INHALATION: remove to fresh air, administer oxygen with patient in sitting position. INGESTION: give water, call physician at once, give milk. EYES: flush with water for 15 min., get medical attention. SKIN: wash with plenty of soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Data not available. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause severe irritation of eyes and throat and can cause eye and lung injury. They cannot be tolerated even at low concentrations. 5.9 Liquid or Solid Irritant Characteristics: Severe skin irritant. Causes second- and third-degree burns on direct contact and is very irritating to the eyes. 5.10 Odor Threshold: Data not available.	

6 FIRE HAZARDS

- 6.1 **Flash Point:** 102°F (39°C)
6.2 **Flammable Limits in Air:** 2-14%
6.3 **Fire Extinguishing Agents:** Foam, carbon dioxide, dry chemical, water fog.
6.4 **Fire Extinguishing Agents Not to be Used:** Water spray. Do not allow water to enter containers.
6.5 **Special Hazards of Combustion Products:** Highly poisonous phosgene gas may be formed in fire.
6.6 **Behavior in Fire:** At high temperatures, the compound may react violently with water to steam.
6.7 **Ignition Temperature:** 550°F
6.8 **Electrical Hazard:** Not pertinent.
6.9 **Burning Rate:** Data not available.

8 WATER POLLUTION

- 8.1 **Aquatic Toxicity:** 200 ppm 7-day goldfish lethal, fresh water; 500 ppm 14-day goldfish lethal, fresh water.
8.2 **Waterfowl Toxicity:** Data not available.
8.3 **Biological Oxygen Demand (BOD):** 168% 5 days.
8.4 **Food Chain Concentration Potential:** None.

9 SELECTED MANUFACTURERS

- Northwest Industries, Inc.
Velsicol Chemical Corp.
4411 Ohio St.
Chicago, Ill. 60641
- Occidental Petroleum Corp.
Hooker Chemical Corp.
Industrial Chemical Division
Naperville, Ill. 60563
- Stauffer Chemical Co.
Specialty Chemicals Division
Green Farms Rd.
Westport, Conn. 06881

7 CHEMICAL REACTIVITY

- 7.1 **Reactivity with Water:** Slow reaction with water to produce hydrochloric acid fumes. Reaction much faster with steam.
7.2 **Reactivity with Common Materials:** Slow corrosion of metals, but no immediate hazard.
7.3 **Stability During Transport:** Not pertinent.
7.4 **Neutralizing Agents for Acids and Caustics:** Soda ash and water, lime.
7.5 **Polymerization:** Does not occur.
7.6 **Inhibitor of Polymerization:** Not pertinent.

10 SHIPPING INFORMATION

- 10.1 **Grades or Purity:** 99+%, special grade.
10.2 **Storage Temperature:** Store in cool, dry area.
10.3 **Inert Atmosphere:** Data not available.
10.4 **Ventings:** Pressure Safety.

11 HAZARD ASSESSMENT CODE

(See Hazard Assessment Handbook, CG 444-3)
XXXO

12 HAZARD CLASSIFICATIONS

- 12.1 **Code of Federal Regulations:** Corrosive material.
12.2 **HAS Hazard Rating for Bulk Water Transportation:**
- | Category | Rating |
|--------------------------|--------|
| Fire | 1 |
| Health | |
| Vapor Irritant | 4 |
| Liquid or Solid Irritant | 4 |
| Poisons | 2 |
| Water Pollution | |
| Human Toxics | 2 |
| Aquatic Toxics | 2 |
| Acute Effect | 2 |
| Reactivity | |
| Other Chemicals | 1 |
| Water | 4 |
| Self Reaction | 0 |
- 12.3 **NFPA Hazard Classifications:**
- | Category | Classification |
|----------------------|----------------|
| Health Hazard (Blue) | 1 |
| Flammability (Red) | 2 |
| Reactivity (Yellow) | 1 |
| | W |

13. PHYSICAL AND CHEMICAL PROPERTIES

- 13.1 **Physical State at 15°C and 1 atm:** Liquid
13.2 **Molecular Weight:** 140.57
13.3 **Boiling Point at 1 atm:** 197.3°C = 470.3°F
13.4 **Freezing Point:** 109.1°C = 228.4°F
13.5 **Critical Temperature:** Not pertinent.
13.6 **Critical Pressure:** Not pertinent.
13.7 **Specific Gravity:** 1.211 at 25°C (liquid)
13.8 **Liquid Surface Tension:** 36.3 dynes/cm = 0.00363 N/m at 20°C
13.9 **Liquid-Water Interfacial Tension:** Not pertinent.
13.10 **Vapor (Gas) Specific Gravity:** Not pertinent.
13.11 **Ratio of Specific heats of Vapor (Gas):** Not pertinent.
13.12 **Latent Heat of Vaporization:** Data not available.
13.13 **Heat of Combustion:** -10,030 Btu/lb = -5500 cal/g = -23,220 J/g
13.14 **Heat of Decomposition:** Not pertinent.
13.15 **Heat of Solution:** Not pertinent.
13.16 **Heat of Polymerization:** Not pertinent.

NOTES

REVISED 1978

BAL

BENZYL ALCOHOL

Common Synonyms Benzylcarbinol Benzylcarbinol Alpha-hydroxytoluene Phenylmethanol Phenylmethyl alcohol		Liquid Colorless Mild, pleasant odor May float or sink in water
AVOID CONTACT LIQUID AND VAPOR. KEEP PEOPLE AWAY. Wear gloves over bathing suit if clothing gets wet. Notify fire department. Notify and remove animals, birds, fish, etc. Notify and remove plants, trees, etc.		
Fire		Combustible Extinction with dry chemical, carbon dioxide, water. Water may cause frothing. Low flashpoint, low boiling point.
Exposure		CALL FOR MEDICAL AID VAPOR Irritating to eyes, nose and throat. If inhaled will cause headache, coughing, or difficult breathing. If in eyes, flush with water. If in nose, wipe with moist cloth. If breathing apparatus is used, use only fresh air. If breathing apparatus is used, use only fresh air. LIQUID Irritating to skin and eyes. If swallowed will cause nausea or vomiting. MAY BE READILY ABSORBED THROUGH THE SKIN Remove contaminated clothing. Flush skin with water. If in eyes, flush with water. If swallowed, do not induce vomiting. Notify physician. IF SWALLOWED, DO NOT INDUCE VOMITING. IF SWALLOWED, DO NOT INDUCE VOMITING. IF SWALLOWED, DO NOT INDUCE VOMITING.
Water Pollution		Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intake.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-3) Issue warning - water contaminant. Disperse and flush.		2. LABELS No hazard label required by Code of Federal Regulations.
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Benzylcarbinol, Alpha-hydroxytoluene, Phenylmethanol, Phenylmethyl alcohol. 3.2 Coast Guard Compatibility Classification: Not listed. 3.3 Chemical Formula: C ₇ H ₈ O. 3.4 IMCO/United Nations Numerical Designation: No listed.		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Colorless. 4.3 Odor: Mild, pleasant.
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Rubber gloves, chemical safety goggles. 5.2 Symptoms Following Exposure: Inhalation: Vapor may cause irritation of upper respiratory tract. Prolonged or excessive inhalation may result in headache, nausea, vomiting and diarrhea. In severe cases, respiratory stimulation followed by respiratory and muscular paralysis, convulsions, narcosis and death may result. Ingestion may produce severe irritation of the gastrointestinal tract, followed by nausea, vomiting, cramps and diarrhea. Tissue ulceration may result. Contact with eyes causes local irritation. Material can be absorbed through skin with anesthetic or irritant effect. 5.3 Treatment for Exposure: INHALATION: Remove victim from contaminated atmosphere, call physician immediately. INGESTION: Induce vomiting and contact a physician. EYES: Flush with plenty of water for 15 min. and contact a physician. SKIN: Flush with water, wash with soap and water. Obtain medical attention in case of irritation or central nervous system depression. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 2 oral rat LD ₅₀ = 1,230 mg/kg. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: < 5 ppm.		

6. FIRE HAZARDS 6.1 Flash Point: 229°F (0°C) 219°F (0°C) 6.2 Flammable Limits in Air: Data not available 6.3 Fire Extinguishing Agents: Alcohol foam, dry chemical, carbon dioxide 6.4 Fire Extinguishing Agents Not to be Used: Water or foam may cause frothing 6.5 Special Hazards of Combustion Products: 6.6 Behavior in Fire: 6.7 Ignition Temperature: 317°F 6.8 Electrical Properties: Data not available 6.9 Burning Rate: 1.74 mm/min	8. BZM

BENZYLAMINE

Common Synonyms Alpha-aminotoluene Phenylmethylamine	Liquid Colorless to light yellow Strong ammonia odor Floats and mixes with water
Avoid contact with skin and eyes. Keep away from heat and open flame. Do not breathe vapors. Do not get in eyes, on clothing, or on skin. If in eyes, flush with water for 15 min. If on skin, wash with soap and water. If swallowed, do not induce vomiting. Call a physician.	
Fire	Combustible POISONOUS GASES MAY BE PRODUCED IN FIRE. Wear goggles and suit. Do not breathe vapors. Do not get in eyes, on clothing, or on skin. If in eyes, flush with water for 15 min. If on skin, wash with soap and water. If swallowed, do not induce vomiting. Call a physician.
Exposure	CAUTION FOR MEDICAL USE VAPOR Irritating to eyes, nose and throat If inhaled will cause dizziness, headache, or difficult breathing LIQUID Will burn skin and eyes Harmful if Swallowed HAZARD STATEMENT H314 Causes severe skin burns and eye irritation H332 Irritating to respiratory system ENVIRONMENTAL STATEMENT P201 + P202 Hazardous. Do not handle without appropriate supervision. P273 Release to the environment without permission. ENVIRONMENTAL PRECAUTION Do not release into the environment.
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes
1 RESPONSE TO DISCHARGE (See Resource Materials Handbook, CG 446-4) Issue warning - air contaminant, water contaminant Restrict access Disperse and flush	2. LABELS No hazard label required by Code of Federal Regulations
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: alpha-Aminotoluene Phenylmethylamine 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: C ₇ H ₉ NH ₂ 3.4 IMCO/United Nations Numerical Designation: Not listed	4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless to light yellow 4.3 Odor: Strong ammonia
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Self-contained breathing apparatus, goggles or face shield, rubber gloves 5.2 Symptoms Following Exposure: Inhalation of vapor causes irritation of the mucous membranes of the nose and throat and lung irritation with respiratory distress and cough. Headache, nausea, faintness, and anxiety can occur. Exposure to vapor produces eye irritation with lacrimation, conjunctivitis, and corneal edema resulting in halos around lights. Direct local contact with liquid is known to produce severe and sometimes permanent eye damage and skin burns. Vapors may also produce primary skin irritation and dermatitis. 5.3 Treatment for Exposure: INHALATION: remove victim from exposure, if breathing is difficult administer oxygen. If breathing has stopped, begin artificial respiration. EYES or SKIN: wash with copious amounts of water for 15 min. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Data not available 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available

BENZYL n-BUTYL PHTHALATE

Common Synonyms Benzyl butyl phthalate Phthalic acid, benzyl n-butyl ester		Liquid	Colorless	Slight odor
Sinks in water				
Fire		Combustible Irritating gases may be produced when heated		
Exposure		LIQUID Irritating to skin and eyes		
Water Pollution		Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes.		
1. RESPONSE TO DISCHARGE See Response Methods Handbook, CG 446.4 Not applicable (chemical and physical hazard not present)		2. LABELS Not required (not required by U.S. Federal Regulations)		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: benzyl butyl phthalate Phthalic acid, benzyl n-butyl ester 3.2 Coast Guard Compatibility Classification: Ester 3.3 Chemical Formula: C ₁₆ H ₂₂ O ₄ 3.4 IMCO/United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Slight, pleasant		
5. HEALTH HAZARDS				
5.1 Personal Protective Equipment: Protective gloves and goggles				
5.2 Symptoms Following Exposure: Prolonged contact with liquid causes irritation to skin, eyes, and nose				
5.3 Treatment for Exposure: If in eyes, flush with water for 15 min. SKIN: Wash with soap and water				
5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available				
5.5 Short-Term Inhalation Limit: Data not available				
5.6 Toxicity by Ingestion: Grade I irritant (LD ₅₀ 1.3 g/kg)				
5.7 Late Toxicity: Data not available				
5.8 Vapor (Gas) Irritant Characteristics: Vapors are irritating to eyes and throat				
5.9 Liquid or Solid Irritant Characteristics: No appreciable hazard; practically harmless to skin				
5.10 Odor Threshold: Data not available				

6. FIRE HAZARDS 6.1 Flash Point: Not available 6.2 Flammable Limits in Air: Data not available 6.3 Fire Extinguishing Agents: Dry chemical, carbon dioxide, foam 6.4 Fire Extinguishing Agents Not to be Used: Water or foam may cause frothing 6.5 Special Hazards of Combustion Products: Irritating vapors of unburned chemical may form in fires 6.6 Behavior in Fire: 6.7 Ignition Temperature: Data not available 6.8 Electrical Hazard: Data not available 6.9 Burning Rate: Data not available	8. WATER POLLUTION 8.1 Aquatic Toxicity: Data not available 8.2 Waterway Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): Data not available 8.4 Food Chain Concentration Potential: None

BENZYL CHLORIDE

Common Synonyms alpha-Chlorobenzene omega-Chlorobenzene		Waters liquid Sinks in water	Colorless to yellow Sharp irritating odor
Fire Combustible Irritating gases are produced when heated			
Exposure LIQUID Will burn skin and eyes If swallowed will cause nausea and vomiting			
Water Pollution HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes.			
1. RESPONSE TO DISCHARGE (See Response Methods Appendix CC 445-4) For a warning: Informative Retention: Informative Absorption: Informative Control and physical treatment		2. LABEL 	
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: alpha-Chlorobenzene omega-Chlorobenzene (Chlorobenzene, alpha) 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: C₆H₅Cl 3.4 IMCO/United Nations Numerical Designation: 1.103		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless to pale yellow 4.3 Odor: Pungent, irritating	
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Chemical safety goggles or face shield; self-contained breathing apparatus; positive pressure hose mask; air line mask; industrial carrier type gas mask; or chemical cartridge respirator; rubber gloves; protective clothing 5.2 Symptoms Following Exposure: Inhalation causes severe irritation of upper respiratory tract with coughing, burning of the throat, headache, dizziness, and weakness; lung damage and pulmonary edema may occur after severe exposure; chronic irritation of the upper respiratory tract may result after prolonged and repeated exposure to vapors. Immediate and severe eye irritation may result from contact with the liquid or vapors; prolonged or permanent eye damage may result. Vapors irritate skin and liquid may cause severe burns. Ingestion may cause immediate and severe burns of the mouth, throat, and gastro-intestinal tract; nausea, vomiting, cramps, and diarrhea may follow; gastrointestinal damage and systemic effects may result. 5.3 Treatment for Exposure: INHALATION: Remove from contaminated atmosphere. Breathing has ceased, start mouth-to-mouth respiration, oxygen if available. Should be administered only by an experienced person when authorized by a physician. Keep patient warm and comfortable with a physician immediately. EYES: Immediately flush with large quantities of running water for a minimum of 15 min. Hold eyelids apart during irrigation to insure flushing of the entire surface of the eye and help with water. Do not attempt to neutralize with chemicals; apply moist medical attention as soon as possible. SKIN: Remove contaminated clothing and shoes. Continue washing with water. Do not attempt to neutralize with chemicals; apply moist medical attention if irritation persists. INGESTION: Give large amounts of water. Do NOT induce vomiting.			

6 FIRE HAZARDS 6.1 Flash Point: 115°F (40.5°C) 6.2 Flammable Limits in Air: 1.1% - 11.1% 6.3 Fire Extinguishing Agents: Water and chemical, foam and carbon dioxide 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent 6.5 Special Hazards of Combustion Products: Irritating hydrogen chloride gas may be formed 6.6 Behavior in Fire: Forms superheated vapors and irritating gas 6.7 Ignition Temperature: 1,100°F 6.8 Electrical Hazard: Data not available 6.9 Burning Rate: 4.2 mm/min	8 WATER POLLUTION 8.1 Aquatic Toxicity: 0.05 mg/l - marine fish, no effect response with water 0.1 mg/l - marine fish, sudden irritant activity with water *Time period not specified 8.2 Waterford Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): Data not available 8.4 Food Chain Concentration Potential: None																																				
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: Liquid produces hydrochloric acid liberating hydrogen chloride (hydrogen acid) 7.2 Reactivity with Common Materials: Decomposes rapidly in the presence of all common metals with the exception of nickel and lead; liberates hydrogen and hydrogen chloride 7.3 Stability During Transport: Stable 7.4 Neutralizing Agents for Acids and Corrosives: React with sodium bicarbonate or lime solution 7.5 Polymerization: Polymerizes with evolution of heat and hydrogen chloride when in contact with all common metals except nickel and lead 7.6 Inhibitor of Polymerization: Triethylamine, propylene oxide, or sodium carbonate	9 SELECTED MANUFACTURERS Master Chemical Company Specialty Chemical Division Westport, Connecticut Allied Chemical Corporation 341 East Ohio Street Chicago, Illinois Monsanto Company Monsanto Industrial Chemicals 800 North Lindbergh Boulevard St. Louis, Missouri

They cannot be tolerated even at low concentrations 5.9 Liquid or Solid Irritant Characteristics: Severe skin irritant. Causes second- and third-degree burns on short contact and is very corrosive to the eyes 5.10 Odor Threshold: 0.02 ppm																																					

BCF

BENZYL CHLOROFORMATE

Common Synonyms Carbobenzoxy chloride Chloroformic acid, benzyl ester Benzylcarbonyl chloride Benzyl chloroformate	Liquid Colorless Sharp, irritating odor Sinks in water. Reacts with water.
Call for department Avoid contact with liquid. Keep as low as possible. Stop discharge if possible. Isolate and remove from area if possible. Notify all other employees in the area.	
Fire	Combustible POISONOUS GASES ARE PRODUCED IN FIRE Containers may explode in fire. Water chemically reacts with contents and may cause explosion. Extinguish with dry chemical or carbon dioxide.
Exposure	All forms of acid LIQUID Irritating to skin and eyes Harmful if swallowed Runny eyes and redness of eyes Discharge of pus with pain in water If INEYES flush with copious amounts of water If SWALLOWED give oral EMERGENCY first aid with water.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify all other employees in the area.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook CG 446-4) Issue warning: corrosive Restrict access Should be removed Chemical and physical treatment	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Carbobenzoxy chloride Chloroformic acid, benzyl ester Benzylcarbonyl chloride Benzyl chloroformate 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: C ₆ H ₅ CH ₂ OCOCl 3.4 IMCO/United Nations Numerical Designation: 8.1719	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Irritating sharp penetrating
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Self contained breathing apparatus or hood type canister mask goggles or face shield, rubber gloves, protective clothing. 5.2 Symptoms Following Exposure: Inhalation causes mucous membrane irritation. Eyes are irritated by excessive exposure to vapor. Liquid causes severe irritation of eyes and irritates skin. Ingestion causes irritation of mouth and stomach. 5.3 Treatment for Exposure: INHALATION: Remove from exposure support respiration call physician. EYES: Irrigate with copious amounts of water for 15 min. SKIN: flush with large quantities of water wash with soap and water. INGESTION: give large amounts of water, do NOT induce vomiting. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 3 LD 50 to 800 mg/kg 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause moderate irritation such that personnel will find high concentrations unpleasant. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Causes smarting of the skin and first degree burns on short exposure and may cause second degree burns on long exposure. 5.10 Odor Threshold: Data not available	

6 FIRE HAZARDS

- 6.1 **Flash Point:** 176°F (80°C) 227°F (110°C)
 Vigorous decomposition occurs at these temperatures, thus these values are anomalous due to the effect of the decomposition products (benzyl chloride and CO).
 6.2 **Flammable Limits in Air:** Not pertinent
 6.3 **Fire Extinguishing Agents:** Dry chemical foam and carbon dioxide
 6.4 **Fire Extinguishing Agents Not to be Used:** Data not available
 6.5 **Special Hazards of Combustion Products:** Toxic phosgene, hydrogen chloride, and benzyl chloride vapors may form.
 6.6 **Behavior in Fire:** Containers may explode.
 6.7 **Ignition Temperature:** Data not available
 6.8 **Electrical Hazard:** Data not available
 6.9 **Burning Rate:** 4.0 mm/min

7. CHEMICAL REACTIVITY

- 7.1 **Reactivity with Water:** Forms hydrogen chloride (hydrochloric acid). The reaction is not very vigorous in cold water.
 7.2 **Reactivity with Common Materials:** Slow corrosion of metal.
 7.3 **Stability During Transport:** Stable
 7.4 **Neutralizing Agents for Acids and Caustics:** Flush with water, rinse with sodium bicarbonate or lime solution.
 7.5 **Polymerization:** Not pertinent
 7.6 **Inhibitor of Polymerization:** Not pertinent

8 WATER POLLUTION

- 8.1 **Aquatic Toxicity:** Data not available
 8.2 **Waterfowl Toxicity:** Data not available
 8.3 **Biological Oxygen Demand (BOD):** Data not available
 8.4 **Food Chain Concentration Potential:** None

9 SELECTED MANUFACTURERS

- 1 Chemetron Corporation
 Organic Chemicals Division
 393 Seventh Avenue
 New York, N.Y. 10001
 2 Aldrich Chemical Co.
 940 West St. Paul Avenue
 Milwaukee, Wis. 53233
 3 PC R, Inc.
 P.O. Box 1466
 Gainesville, Fla. 32602

10 SHIPPING INFORMATION

- 10.1 **Grade or Purity:** 97+ %
 10.2 **Storage Temperature:** Ambient, in cool place
 10.3 **Inert Atmosphere:** No requirement
 10.4 **Venting:** Pressure vacuum

NOTES

BZO

BENZYL DIMETHYLOCTADECYLAMMONIUM CHLORIDE

Common Synonyms Stearyl dimethylbenzylammonium chloride Tallow benzyl dimethylammonium chloride Benzyl dimethyl laurylammonium chloride	Solid or thick liquid White Mild odor Sinks and mixes with water
Stop discharge if possible. Keep people away. Avoid contact with liquid and solid. Isolate and remove as far as practical. Notify local health and pollution control agencies.	
Fire	Combustible POISONOUS GASES MAY BE PRODUCED IN FIRE. Wear goggles and self-contained breathing apparatus. Extinguish with water.
Exposure	CALL FOR MEDICAL AID LIQUID OR SOLID Irritating to skin and eyes. If swallowed will cause nausea or vomiting. Remove contaminated clothing and shoes. Flush affected area with plenty of water. If IN EYES, hold eyes open and flush with plenty of water. If SWALLOWED, do not induce vomiting. Have victim drink water. If SWALLOWED, but victim is UNCONSCIOUS OR HAVING CONVULSIONS, do not drink. Accept victim water. DO NOT INDUCE VOMITING.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and pollution control agencies. Notify operators of water works.
1 RESPONSE TO DISCHARGE (See Response Methods Handbook CG 445-4) Issue warning - water contaminant. Disperse and flush.	2. LABELS No hazard label required by Code of Federal Regulations.
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Benzyl dimethylstearylamm. onium chloride, Dimethylbenzyl octadecyl ammonium chloride, Dimethyloctadecylbenzyl- ammonium chloride, Octadecyl dimethylbenzyl ammonium chloride 3.2 Coast Guard Compatibility Classification: Not listed <i>(Continued on page 4)</i>	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid or viscous liquid 4.2 Color: White 4.3 Odor: Mild
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Goggles or face shield, rubber gloves. 5.2 Symptoms Following Exposure: Ingestion causes gastrointestinal disturbances. Contact with chemical irritates eyes and skin and may damage eyes. 5.3 Treatment for Exposure: INGESTION: do NOT induce vomiting; give large quantities of fluid and call physician immediately. EYES: flush with plenty of water for at least 15 min.; call a physician. SKIN: remove contaminated clothing; flush skin with plenty of water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 2, oral rat LD ₅₀ = 4,000 mg/kg. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.	

6 FIRE HAZARDS 6.1 Flash Point: Not pertinent. 6.2 Flammable Limits in Air: Not pertinent. 6.3 Fire Extinguishing Agents: Not pertinent. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Toxic oxides of nitrogen and hydrochloric acid fumes may form in fires. 6.6 Behavior in Fire: 6.7 Ignition Temperature: Not pertinent. 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: Not pertinent.	8 WATER POLLUTION 8.1 Aquatic Toxicity: 5 ppm/48 hr. (australorbis snails/80% km/fresh water) 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: None.
7. 11 HAZARD ASSESSMENT CODE (See Hazard Assessment Handbook CG 446-3) SS	10. SHIPPING INFORMATION 10.1 Grades or Purity: Pure 95+%, 24-26% solution in water. 10.2 Storage Temperature: Ambient. 10.3 Inert Atmosphere: No requirement. 10.4 Venting: Open.
12. HAZARD CLASSIFICATIONS 12.1 Code of Federal Regulations: Not listed. 12.2 HAS Hazard Rating for Bulk Water Transportation: Not listed. 12.3 NFPA Hazard Classifications: Not listed.	13 PHYSICAL AND CHEMICAL PROPERTIES 13.1 Physical State at 15°C and 1 atm: Solid. 13.2 Molecular Weight: 411. 13.3 Boiling Point at 1 atm: Not pertinent (decomposes at 120°C). 13.4 Freezing Point: Not pertinent. 13.5 Critical Temperature: Not pertinent. 13.6 Critical Pressure: Not pertinent. 13.7 Specific Gravity: > 1.1 at 20°C (solid). 13.8 Liquid Surface Tension: Not pertinent. 13.9 Liquid-Water Interfacial Tension: Not pertinent. 13.10 Vapor (Gas) Specific Gravity: Not pertinent. 13.11 Ratio of Specific Heats of Vapor (Gas): Not pertinent. 13.12 Latent Heat of Vaporization: Not pertinent. 13.13 Heat of Combustion: Not pertinent. 13.14 Heat of Decomposition: Not pertinent. 13.15 Heat of Solution: Data not available. 13.16 Heat of Polymerization: Not pertinent. <i>(Continued on pages 5 and 6)</i>
3 CHEMICAL DESIGNATIONS (Cont'd) 3.3 Chemical Formula: (C ₁₈ H ₃₇)(C ₁₈ H ₃₇)(C ₁₈ H ₃₇)NCl 3.4 IMCO/United Nations Numerical Designation: Not listed.	

BMA

BENZYLTRIMETHYLAMMONIUM CHLORIDE

Common Synonyms BTMAC Trimethylbenzylammonium chloride		Liquid Light yellow Mild almond odor May float or sink in water
Stop discharge if possible. Keep people away. Avoid contact with liquid. Evacuate and remove discharged material. Notify local health and pollution control agencies.		
Fire		Combustible POISONOUS GASES MAY BE PRODUCED IN FIRE Wear goggles and self-contained breathing apparatus. Extinguish with dry chemical, carbon dioxide, or water. Water may be ineffective in fire.
Exposure		CALL FOR MEDICAL AID LIQUID Irritating to skin and eyes. If swallowed will cause nausea or vomiting. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES: Flush with water for 15 minutes. IF SWALLOWED: Give victim 1-2 glasses of water. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS: Do not induce vomiting. Keep victim warm.
Water Pollution		Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and pollution control agencies. Notify operator of nearby water intakes.
1 RESPONSE TO DISCHARGE (See Response Methods Handbook CG 446-4) Issue warning - water contaminant. Disperse and flush.		2. LABELS No hazard label required by Code of Federal Regulations.
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: BTMAC Trimethylbenzylammonium chloride 3.2 Coast Guard Competibility Classification: Not listed 3.3 Chemical Formula: $C_6H_5CH_2N(CH_3)_3Cl$ 3.4 IMCO/United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Light yellow 4.3 Odor: Mild almond
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Goggles and rubber gloves. 5.2 Symptoms Following Exposure: Ingestion causes gastrointestinal disturbances. Contact with liquid irritates eyes and may irritate skin. 5.3 Treatment for Exposure: INGESTION: Give large amount of water. Get medical attention. EYES: Flush with water for at least 15 minutes. If irritation continues, get medical attention. SKIN: Flush well with water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 3 LD ₅₀ 50-900 mg/kg. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.		

6 FIRE HAZARDS

- 6.1 **Flash Point:** Not pertinent
 6.2 **Flammable Limits in Air:** Not pertinent
 6.3 **Fire Extinguishing Agents:** Not pertinent
 6.4 **Fire Extinguishing Agents Not to be Used:** Not pertinent
 6.5 **Special Hazards of Combustion Products:** Toxic oxides of nitrogen and hydrochloric acid fumes may form in fire.
 6.6 **Behavior in Fire:**
 6.7 **Ignition Temperature:** Not pertinent
 6.8 **Electrical Hazard:** Not pertinent
 6.9 **Burning Rate:** Not pertinent

8. WATER POLLUTION

- 8.1 **Aquatic Toxicity:** Data not available.
 8.2 **Waterfowl Toxicity:** Data not available.
 8.3 **Biological Oxygen Demand (BOD):** Data not available.
 8.4 **Food Chain Concentration Potential:** None.

9 SELECTED MANUFACTURERS

1. Tanalox Chemical Company
 Page and Schuster Avenues

NOTES

BIC

BERYLLIUM CHLORIDE

Common Synonyms		Solid	White to green	Sharp odor
		Sinks and mixes violently with water		
AVOID CONTACT WITH SOLID AND DUST. KEEP PEOPLE AWAY. Wear dust respirator and rubber-vented gloves, including gloves when the hands are soiled. Isolate area from unshielded material. Notify local health and pollution control agencies.				
Fire		Not flammable Irritating gases may be produced when heated. Wear goggles and mask. Do not use water on fires. DO NOT USE WATER ON ADJACENT FIRES.		
Exposure		CALL FOR MEDICAL AID DUST POISONOUS IF INHALED OR IF SKIN IS EXPOSED If inhaled will cause coughing, difficult breathing, or loss of consciousness. If inhaled, immediately flush with plenty of water. If breathing has stopped, artificial respiration. If breathing is difficult, give oxygen. SOLID POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED Will burn skin and eyes. If swallowed will cause nausea, coughing, or loss of consciousness. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. If IN EYES, flush with water for at least 15 min. If irritation persists, get medical attention. If SWALLOWED and victim is conscious, flush with water. If SWALLOWED and victim is unconscious or having convulsions, do nothing except keep victim warm.		
Water Pollution		HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes. Notify local health and pollution control agencies.		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: poison corrosive Restrict access Should be removed Chemical and physical treatment		2. LABEL 		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: No common synonyms 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: BeCl ₂ 3.4 IMCO/United Nations Numerical Designation: 6.1 (1566)		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: White to green 4.3 Odor: Sharp, acrid		
5. HEALTH HAZARDS				
5.1 Personal Protective Equipment: Respirators, protection gloves, freshly laundered clothing, chemical safety goggles 5.2 Symptoms Following Exposure: Inhalation causes pneumonitis, nasopharyngitis, tracheitis, dyspnea, chronic cough. Ingestion causes irritation of mouth and stomach. Contact with dust causes conjunctival inflammation of eyes and irritation of skin. Any dramatic, unexplained weight loss should be considered as a possible first indication of beryllium disease. 5.3 Treatment for Exposure: INHALATION: chest x-ray should be taken immediately for evidence of pneumonitis. EYES: flush with water for at least 15 min.; if irritation persists, get medical attention. SKIN: cuts or puncture wounds in which beryllium may be embedded under the skin should be thoroughly cleansed immediately by a physician. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.002 mg./m ³ (as beryllium) 5.5 Short-Term Inhalation Limits: 0.025 mg./m ³ less than 30 min. 5.6 Toxicity by Ingestion: Grade 3 oral: LD ₅₀ = 86 mg./kg. 5.7 Late Toxicity: Reproduces a chronic systemic disease that primarily affects the lung but also can involve other organs such as lymph nodes, liver, bones, and kidneys. 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available				

6. FIRE HAZARDS

- 6.1 Flash Point: Not flammable.
 6.2 Flammable Limits in Air: Not flammable.
 6.3 Fire Extinguishing Agents: Not pertinent.
 6.4 Fire Extinguishing Agents Not to be Used: Do not use water on adjacent fires.
 6.5 Special Hazards of Combustion Products: Toxic and irritating beryllium oxide fumes and hydrogen chloride may form in fires.
 6.6 Behavior in Fire:
 6.7 Ignition Temperature: Not pertinent.
 6.8 Electrical Hazard: Not pertinent.
 6.9 Burning Rate: Not pertinent.

7. CHEMICAL REACTIVITY

- 7.1 Reactivity with Water: Reacts vigorously with evolution of heat. Forms beryllium oxide and hydrochloric acid solution.
 7.2 Reactivity with Common Materials: Corrodes most metals in presence of moisture. Flammable and explosive hydrogen gas may collect in enclosed spaces.
 7.3 Stability During Transport: Stable.
 7.4 Neutralizing Agents for Acids and Caustics: Flush with water, rinse with dilute solution of sodium bicarbonate or soda ash.
 7.5 Polymerization: Not pertinent.
 7.6 Inhibitor of Polymerization: Not pertinent.

8. WATER POLLUTION

- 8.1 Aquatic Toxicity: 0.15 ppm* /96 hr./fathead minnow, TL_m/soft fresh water.
 15 ppm* /96 hr./fathead minnow, TL_m/hard fresh water.
 *as beryllium.
 8.2 Waterfowl Toxicity: Data not available.
 8.3 Biological Oxygen Demand (BOD): None.

(See Hazard Assessment Handbook, CG 446-3)
 RR

12. HAZARD CLASSIFICATIONS

- 12.1 Code of Federal Regulations: Poisonous solid, Class B.
 12.2 NAS Hazard Rating for Bulk Water Transportation: Not listed.
 12.3 NFPA Hazard Classifications: Not listed.

13. PHYSICAL AND CHEMICAL PROPERTIES

- 13.1 Physical State at 15°C and 1 atm: Solid.
 13.2 Molecular Weight: 79.9.
 13.3 Boiling Point at 1 atm: (sublimes) 988°F = 520°C = 793°K.
 13.4 Freezing Point: 824°F = 440°C = 713°K.
 13.5 Critical Temperature: Not pertinent.
 13.6 Critical Pressure: Not pertinent.
 13.7 Specific Gravity: 1.90 at 25°C (solid).
 13.8 Liquid Surface Tension: Not pertinent.
 13.9 Liquid-Water Interfacial Tension: Not pertinent.
 13.10 Vapor (Gas) Specific Gravity: Not pertinent.
 13.11 Ratio of Specific Heats of Vapor (Gas): Not pertinent.
 13.12 Latent Heat of Vaporization: Not pertinent.
 13.13 Heat of Combustion: Not pertinent.
 13.14 Heat of Decomposition: Not pertinent.
 13.15 Heat of Solution: -1,000 Btu/lb = -457 cal/g = -213 × 10³ J/kg.
 13.16 Heat of Polymerization: Not pertinent.

(Continued on pages 5 and 6)

8. WATER POLLUTION (Cont'd.)

- 8.4 Food Chain Concentration Potential: Bioconcentration of 100 fold can occur under constant exposure. Not significant in spill conditions.

BEF

BERYLLIUM FLUORIDE

Common Synonyms		Solid	White	Odorless
Sinks and mixes with water				
AVOID CONTACT WITH SOLID AND DUST. KEEP PEOPLE AWAY. Wash hands thoroughly with soap and water after handling. Do not eat, drink, or use tobacco while handling. Do not breathe dust.				
Fire	Not flammable			
	CALL FOR MEDICAL AID DUST POISONOUS IF INHALED. IF SWALLOWED OR IF SKIN IS EXPOSED Will burn eyes. May cause severe irritation and burns. SOLID POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED Will burn eyes. May cause severe irritation and burns. If inhaled, get medical attention immediately. If swallowed, get medical attention immediately. If skin is exposed, get medical attention immediately. Do not breathe dust.			
Exposure				
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes. Do not discharge into water.			
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 444-1)		2. LABEL		
Issue warning: poison, water contaminant. Restrict access. Should be removed. Chemical and physical treatment.				
3. CHEMICAL DESIGNATIONS		4. OBSERVABLE CHARACTERISTICS		
3.1 Synonyms: No common synonyms.		4.1 Physical State (as shipped): Solid		
3.2 Coast Guard Compatibility Classification: Not listed.		4.2 Color: White		
3.3 Chemical Formula: BeF ₂		4.3 Odor: None		
3.4 IMCC/United Nations Numerical Designation: 6.1.1560				
5. HEALTH HAZARDS				
5.1 Personal Protective Equipment: Respiratory protection, gloves, goggles.				
5.2 Symptoms Following Exposure: Any dramatic weight loss should be considered as possible first indication of beryllium disease. Inhalation causes irritation of nose, throat, and lungs; severe pneumonitis and/or pulmonary edema. Ingestion causes fatigue, weakness, loss of appetite. Contact with eyes causes severe irritation and burns. Contact with skin causes dermatitis and non-healing ulcers.				
5.3 Treatment for Exposure: INHALATION: move to fresh air; chest x-ray should be taken immediately to detect pneumonitis; if exposure has been severe, INGESTION: induce vomiting; get medical attention. EYES: flush with water for at least 15 min; get medical attention. SKIN: flush with water; get medical attention if skin has been broken.				
5.4 Toxicity by Inhalation (Threshold Limit Value): 0.002 mg/m ³ (as beryllium)				
5.5 Short-Term Inhalation Limits: 0.025 mg/m ³ less than 30 min				
5.6 Toxicity by Ingestion: Grade 3, oral LD ₅₀ = 100 mg/kg (mouse)				
5.7 Late Toxicity: Berylliosis of lungs may occur from 3 months to 15 years after exposure. Chronic systemic diseases of the liver, spleen, lymph nodes, bone, kidney, and other organs may also occur.				
5.8 Vapor (Gas) Irritant Characteristics: Data not available				
5.9 Liquid or Solid Irritant Characteristics: Data not available				
5.10 Odor Threshold: Data not available				

6 FIRE HAZARDS

BERYLLIUM NITRATE

Common Synonyms Beryllium nitrate trihydrate		Solid	White	Odorless
Sinks and mixes with water				
AVOID CONTACT WITH SOLID AND DUST. KEEP PEOPLE AWAY. Wear full respirator and rubber suit, gloves, and shoe covers. Stop discharging if possible. Isolate and contain discharge immediately. Notify local health and fire departments.				
Fire	Not flammable. Will increase the intensity of a fire. POISONOUS GASES MAY BE PRODUCED IN FIRE. Wear goggles and self-contained breathing apparatus. Flush with water.			
	CALL FOR MEDICAL AID DUST POISONOUS IF INHALED OR IF SKIN IS EXPOSED If inhaled will cause coughing or difficult breathing. If eyes are affected, flush open and flush with plenty of water. If breathing is affected, give artificial respiration. If breathing is difficult, give oxygen.			
Exposure	SOLID POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED If swallowed will cause nausea, vomiting or loss of consciousness. If eyes are affected, flush open and flush with plenty of water. If in eyes, flush with plenty of water. If SWALLOWED, give water immediately. If SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do not give anything by mouth.			
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes. Notify local health and fire departments.			
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: POISON, Water contaminant. Restrict access. Should be removed. Chemical and physical treatment.		2. LABEL 		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Beryllium nitrate trihydrate 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: $\text{Be}(\text{NO}_3)_2 \cdot 3\text{H}_2\text{O}$ 3.4 IMCO/United Nations Numerical Designation: 6.1 1566		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: White 4.3 Odor: None		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Respiratory protection, gloves, freshly laundered clothing, chemical safety goggles. 5.2 Symptoms Following Exposure: Any dramatic, unexplained weight loss should be considered as possible first indication of beryllium disease. Inhalation causes pneumonitis, nasopharyngitis, tracheobronchitis, dyspnea, chronic cough. Ingested on causes anorexia, fatigue, weakness, malaise. Contact with eyes causes conjunctival inflammation. Contact with skin causes dermatitis and non-healing ulcers. 5.3 Treatment for Exposure: INHALATION: remove to fresh air, take chest x-ray immediately, check for pneumonia. INGESTION: induce vomiting, get medical attention. EYES: flush with water for at least 15 min., get medical attention. SKIN: cuts or puncture wounds in which beryllium may be embedded under the skin should be thoroughly cleaned immediately by a physician. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.002 mg/m ³ as beryllium. 5.5 Short-Term Inhalation Limits: 0.025 mg/m ³ for less than 40 min. 5.6 Toxicity by Ingestion: Data not available. 5.7 Late Toxicity: May cause chronic, systemic disease of the lung as well as other organs such as liver, spleen, lymph nodes, bone and kidneys. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.

BE0

BERYLLIUM OXIDE

Common Synonyms Beryllia Beryllite	Solid White Odorless Sinks in water
AVOID CONTACT WITH SOLIDS AND DUST. KEEF PEOPLE AWAY. Wear Dust Respirator and Protective Clothing in all operations. Not to be discharged if possible. Isolate and remove discharged material. Notify local health and pollution control agencies.	
Fire	Not flammable POISONOUS GASES MAY BE PRODUCED IN FIRE Wear goggles and soft contact lenses in fire situations
 Exposure	CALL FOR MEDICAL AID DUST POISONOUS IF INHALED If inhaled will cause coughing and difficult breathing. If inhaled, stop work immediately, get fresh air, and seek medical attention. SOLID POISONOUS IF SWALLOWED Irritating to skin and eyes. If swallowed, do not induce vomiting. Drink water and seek medical attention. If swallowed, do not induce vomiting. Drink water and seek medical attention. If swallowed, do not induce vomiting. Drink water and seek medical attention.
Water Pollution	Effect of low concentration on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and pollution control agencies.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 444-1) Issue warning: poison water contamination. Restrict access. Should be removed. Chemical and physical treatment.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Beryllia, Beryllite 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical formula: BeO 3.4 IMCO/United Nations Numerical Designation: 6.1.1.566	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: White 4.3 Odor: None
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Respiratory protection, gloves, freshly laundered clothing, chemical safety goggles. 5.2 Symptoms Following Exposure: Any dramatic, unexplained weight loss should be considered as possible first indication of beryllium disease. Other symptoms include anorexia, fatigue, weakness, malaise. Inhalation causes pneumonia, nasopharyngitis, tracheobronchitis, dyspnea, chronic cough. Contact with dust causes conjunctival inflammation of eyes and irritation of skin. 5.3 Treatment for Exposure: INHALATION: Take chest x-ray immediately, check for pneumonia. INGESTION: Induce vomiting, get medical attention. EYES: Flush with water for at least 15 min. SKIN: Get medical attention. SKIN: Get medical attention. SKIN: Get medical attention. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.002 mg/m ³ as beryllium. 5.5 Short-Term Inhalation Limits: 0.025 mg/m ³ less than 30 min. 5.6 Toxicity by Ingestion: Data not available. 5.7 Late Toxicity: Beryllium disease may occur in lymph nodes, liver, spleen, kidneys, as well as lungs. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.

NOTES (See notes on pages 3 and 4)	

BES

BERYLLIUM SULFATE

Common Synonyms Beryllium sulfate tetrahydrate		Solid	White	Odorless
		Sinks and mixes with water		
AVOID CONTACT WITH SOLID AND DUST. KEEP PEOPLE AWAY Wear eye protection, gloves, and a respirator when handling solid and dust. Avoid contact with skin and eyes. Avoid contact with clothing. Avoid contact with food and drink. Avoid contact with children and pets.				
Fire		Not flammable POISONOUS GASES MAY BE PRODUCED IN FIRE Wear eye protection, gloves, and a respirator when handling solid and dust.		
		CALL FOR MEDICAL AID DUST POISONOUS IF INHALED OR IF SKIN IS EXPOSED If inhaled will cause coughing or difficult breathing. If skin is exposed will cause irritation or difficulty breathing. If swallowed will cause irritation or difficulty breathing. SOLID Irritating to skin and eyes Harmful if swallowed Wear eye protection, gloves, and a respirator when handling solid and dust. Avoid contact with skin and eyes. Avoid contact with clothing. Avoid contact with food and drink. Avoid contact with children and pets.		
Exposure		If swallowed If swallowed will cause irritation or difficulty breathing.

NOTES	

BOC

BISMUTH OXYCHLORIDE

Common Synonyms Basic bismuth chloride Basic bismuth chloride Bismuthyl chloride Bismuth subchloride		Solid	White	Colorless
		Sinks in water		
Stop discharge if possible. Keep people away. Avoid contact with solid and dust. Isolate and remove discharged material. Notify local health and pollution control agencies.				
Fire		Not flammable Irritating gases may be produced when heated Wear goggles and self-contained breathing apparatus		
Exposure		CALL FOR MEDICAL AID DUST Irritating to eyes, nose and throat Harmful if inhaled If in eyes: Hold eyelids open and flush with copious amounts of water. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. SOLID Irritating to skin and eyes Harmful if swallowed Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES: Hold eyelids open and flush with plenty of water. IF SWALLOWED: and victim is CONSCIOUS: Have victim drink water or milk. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING TROUBLE SWALLOWING: do nothing except keep person warm.		
Water Pollution:		Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife agencies. Notify operators of water intakes.		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Should be removed. Chemical and physical treatment.		2. LABELS No hazard label required by Code of Federal Regulations.

BDE

BISPHENOL A DIGLYCIDYL ETHER

Common Synonyms 4,4'-isopropylidenediphenol; epichlorohydrin resin Bisphenol A - epichlorohydrin condensate 2,2-Bis(p-hydroxyphenyl) propane, diglycidyl ether	Liquid Yellowish brown Sinks in water
Storage and Handling: Keep in original container, tightly closed. Avoid contact with liquid. Do not inhale vapors or dust. Notify local health and pollution control agencies.	
Fire	Combustible Extinguish with water or chemicals suitable for liquid.
Exposure	CALL FOR MEDICAL AID LIQUID Irritating to skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Wash affected areas with plenty of water. If IN EYES, hold open and flush with plenty of water. If SWALLOWED, do not induce vomiting. Give of first drink of water or milk. If SWALLOWED, get medical attention for possible HAVING CONSEQUENCES. Do not induce vomiting.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and pollution control agencies.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 444-4) Should be removed. Chemical and physical treatment.	2. LABELS No hazard label required by Code of Federal Regulations.
3. BAC

BORIC ACID

Common Synonyms Orthoboric acid Boric acid		Solid	White	Odorless
		Sinks and mixes with water		
See Section 5.1 for information on the physical and chemical properties of boric acid. The following information is provided for the purpose of identifying the material and is not intended to be used for identification purposes.				
Fire	Not flammable			
Exposure	CALL FOR MEDICAL AID. SOLID Irritating to skin and eyes. If swallowed will cause nausea or vomiting. Respiratory irritation may occur if inhaled. Eye irritation may occur if contact with eyes. IF IN EYES: Flush eyes with water for at least 15 minutes. IF SWALLOWED: Do not induce vomiting. Drink water. IF ON SKIN: Wash with water. IF ON CLOTHING: Remove clothing and wash with water. IF ON EYES: Flush eyes with water for at least 15 minutes. IF SWALLOWED: Do not induce vomiting. Drink water. IF ON SKIN: Wash with water.			
Water Pollution	Dangerous to aquatic life in high concentrations. May be dangerous if it enters water intakes. No known adverse effects on humans. No known adverse effects on the environment.			
1. RESPONSE TO DISCHARGE See Response Methods Handbook, CG 446-1. Issue warning: water contaminant. Should be removed. Chemical and physical treatment.		2. LABELS No hazard label required by Code of Federal Regulations.		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Boric acid, Orthoboric acid. 3.2 Coast Guard Compatibility Classification: Not listed. 3.3 Chemical Formula: H_3BO_3 . 3.4 IMCO/United Nations Numerical Designation: Not listed.		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid. 4.2 Color: White. 4.3 Odor: None.		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Chemical goggles. 5.2 Symptoms Following Exposure: Although no adverse effect has been reported from the use of boric acid dust, it is absorbed through mucous membranes. Ingestion of 1 gram or more may irritate gastrointestinal tract and affect central nervous system. Contact with dust or aqueous solutions may irritate eyes. No known effects have been recognized but unknown effects should be avoided. Dust and solutions are absorbed through burns and open wounds but not through unbroken skin. 5.3 Treatment for Exposure: INHALATION: Remove from contaminated atmosphere. INGESTION: Obtain medical attention as soon as possible. If the patient is conscious, induce vomiting by giving warm salty water (2 tablespoons of table salt to a pint of water or warm soap suds). If this measure is unsuccessful, vomiting may be induced by tickling the back of the patient's throat with a finger. Vomiting should be encouraged about three times or until the vomitus is clear. Additional water may be given to wash out the stomach. EYES: Immediately flush the eyes with large quantities of running water for a minimum of 15 minutes. Hold the eyelids apart during the irrigation to ensure flushing of the entire surface of the eye. Flush with water when medical attention is available. Continue the irrigation for at least 15 minutes. If the physician cannot locate the SKIN, immediately flush affected area with water. Remove contaminated clothing under the shower. Continue washing with water. Do not attempt to treat skin with chemical agents. Obtain medical attention as soon as possible. 5.4 Toxicity by Inhalation (Threshold Limit Value): 1 mg/m ³ as TSP, 0.1 mg/m ³ as respirable. 5.5 Short-Term Inhalation Limits: Data not available.

BTB

BORON TRIBROMIDE

Common Synonyms	Liquid	Colorless	Sharp odor
Reacts violently with water Poisonous vapor is produced			
Avoid contact with liquid in large quantities. Avoid contact with skin. Avoid contact with eyes. Avoid contact with clothing. Avoid contact with food and drink. Avoid contact with children.			
Fire	Not flammable POISONOUS GASES MAY BE PRODUCED IN FIRE Wear mask and self-contained breathing apparatus. DO NOT USE WATER ON ABOVE FIRES.		
Exposure	CALL FOR MEDICAL AID VAPOR Irritating to eyes, nose and throat If inhaled will cause coughing or difficult breathing If in eyes: Flush eyes with plenty of water. If in clothing: Flush with plenty of water. If in food: Flush with plenty of water. LIQUID Will burn skin and eyes If swallowed will cause nausea and vomiting If in eyes: Flush eyes with plenty of water. If in clothing: Flush with plenty of water. If in food: Flush with plenty of water. If SWALLOWED: Give large amounts of water. If in eyes: Flush with plenty of water. If in clothing: Flush with plenty of water. If in food: Flush with plenty of water.		
Water Pollution	Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes Notify local health department. Notify police for leaks or spills.		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook CG 446-6) Issue warning: corrosive, air contaminant Restrict access Disperse and flush with care		2. LABEL

NOTES	

BRT

BORON TRICHLORIDE

Common Synonyms		Liquid	Colorless	Irritating odor
		Reacts violently with water. Irritating visible vapor cloud is produced. Boiling point is 54°F.		
AVOID CONTACT WITH LIQUID AND VAPOR. KEEP FROM FIRE. Wear goggles with indirect ventilation and face shield. Do not breathe vapors. Do not get liquid on skin or clothing. If on skin, wash with plenty of water. If on clothing, remove clothing and wash skin. If in eyes, hold closed, pour and flush with plenty of water. If swallowed, do not induce vomiting. If victim is unconscious, have victim drink water or milk. DO NOT INDUCE VOMITING.				
Fire		Not flammable. POISONOUS GASES MAY BE PRODUCED WHEN HEATED. Do not expose container to fire.		
 Exposure		CALL FOR MEDICAL AID. VAPOR Irritating to eyes, nose and throat. If inhaled will cause coughing or difficult breathing. May irritate lungs. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. LIQUID POISONOUS IF SWALLOWED. Will burn skin and eyes. Remove contaminated clothing. If on face, flush affected areas with plenty of water. If IN EYES, hold closed, pour and flush with plenty of water. If SWALLOWED, do not induce vomiting. If victim is UNCONSCIOUS, have victim drink water or milk. DO NOT INDUCE VOMITING.		
Water Pollution		Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Not to be discharged into water. Not to be poured down the drain.		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: corrosive air contaminant. Restrict access. Evacuate area. Disperse and flush.		2. LABEL  CORROSIVE		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Boron trichloride. 3.2 Coast Guard Compatibility Classification: Not applicable. 3.3 Chemical Formula: BCl ₃ . 3.4 IMCO/United Nations Numerical Designation: 2.1741.		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Colorless. 4.3 Odor: Acid and irritating.		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Chemical goggles, rubber protective clothing and gloves, self-contained breathing apparatus. 5.2 Symptoms Following Exposure: Inhalation causes edema and severe irritation of the upper respiratory system. Contact with liquid causes acid burns of eyes and severe burns of skin. Ingestion causes severe burns of mouth and stomach. 5.3 Treatment for Exposure: INHALATION: remove to fresh air, give oxygen or apply artificial respiration. Keep arm, call a doctor at once, observe for pulmonary edema. EYES: wash with plenty of water for 15 min., consult an eye specialist. SKIN: wash off with plenty of water. INGESTION: do NOT induce vomiting, give large amount of water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 2, LD ₅₀ 0.5 to 5 g/kg. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause severe irritation of eyes and throat and can cause eye or lung injury. They cannot be tolerated even at low concentrations. 5.9 Liquid or Solid Irritant Characteristics: Severe skin irritant. Causes second and third degree burns on short contact and is very injurious to the eyes. 5.10 Odor Threshold: Decomposes in moist air, releasing hydrochloric acid and decomposition products: hydrochloric acid 1 ppm.				

6. FIRE HAZARDS

6.1 **Flash Point** Not flammable
6.2 **Flammable Limits in Air** Not flammable
6.3 **Fire Extinguishing Agents** Not pertinent
6.4 **Fire Extinguishing Agents Not to be Used** Not pertinent
6.5 **Special Hazards of Combustion Products** Not pertinent
6.6 **Behavior in Fire** Toxic fumes of hydrogen chloride are given off upon contact with water applied to adjacent fires
6.7 **Ignition Temperature** Not pertinent
6.8 **Electrical Hazard** Not pertinent
6.9 **Burning Rate** Not pertinent

7. CHEMICAL REACTIVITY

7.1 **Reactivity with Water:** Reacts vigorously to liberate heat and forms hydrogen chloride fumes (hydrochloric acid) and boric acid
7.2 **Reactivity with Common Materials:** Vigorously attacks elastomers and packing materials. Viton, Teflon, Saran or silastic elastomers and natural and synthetic rubbers are not recommended for service. Lead and graphite impregnated asbestos are to be avoided. In the presence of moisture, highly corrosive to most metals
7.3 **Stability During Transport:** Stable
7.4 **Neutralizing Agents for Acids and Caustics:** Flush with water, rinse with sodium bicarbonate or solution
7.5 **Polymerization:** Not pertinent
7.6 **Inhibitor of Polymerization:** Not pertinent

8. WATER POLLUTION

8.1 **Aquatic Toxicity:** Data not available
8.2 **Waterfowl Toxicity:** Data not available
8.3 **Biological Oxygen Demand (BOD):** None
8.4 **Food Chain Concentration Potential:** None

13.9 **Liquid-Water Interfacial Tension:** Not pertinent
13.10 **Vapor (Gas) Specific Gravity:** 4
13.11 **Ratio of Specific Heats of Vapor (Gas):** 1.1470
13.12 **Latent Heat of Vaporization:** 68.8 Btu/lb = 38.2 cal/g = 1.60 × 10³ J/kg
13.13 **Heat of Combustion:** Not pertinent
13.14 **Heat of Decomposition:** Not pertinent
13.15 **Heat of Solution:** -13,000 Btu/lb = -7,200 cal/g = -300 × 10³ J/kg
13.16 **Heat of Polymerization:** Not pertinent

(Continued on pages 4 and 5)

NOTES

BRX

BROMINE

Common Synonyms	Watery liquid Reddish-brown Sharp irritating odor Sinks in water. Irritating brown vapor is produced.
AVOID CONTACT WITH LIQUID AND VAPOR. Keep people away from goggles, self-contained breathing apparatus and other very effective including rescue breathing apparatus. No breathing apparatus should be used in the vicinity.	
Fire	Not flammable May cause fire or contact with combustibles POISONOUS GASES ARE PRODUCED IN FIRE If exposed, get persons with water - wear goggles, self-contained breathing apparatus and rubber protective clothing and goggles.
Exposure	CALL FOR MEDICAL AID VAPOR Irritating to eyes, nose and throat If inhaled, will cause coughing, difficult breathing, or loss of consciousness Move to fresh air If breathing has stopped, give artificial respiration. Do NOT mouth-to-mouth If breathing is difficult, give oxygen LIQUID Will burn skin and eyes Harmful if swallowed Remove contaminated clothing and shoes Flush affected areas with plenty of water IF IN EYES, hold eyelids open and flush with plenty of water IF SWALLOWED, do not induce vomiting. Have victim drink water or milk.
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes Notify health and welfare officials Notify operator of nearby water intakes
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 444-4) Issue warning - poison air contaminant Restrict access Isolate area Disperse and flush	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: No common synonyms 3.2 Coast Guard Compatibility Classification: Halogen 3.3 Chemical Formula: Br ₂ 3.4 IMCO/United Nations Numerical Designation: 80/1744	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Dark red-red brown 4.3 Odor: Sharp harsh penetrating
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Chemical safety goggles, face shield, self-contained air line, canister mask, rubber suit 5.2 Symptoms Following Exposure: SKIN: contact with liquid or vapor may cause acne and slow healing ulcers. INHALATION: induces severe irritation of the respiratory passages and pulmonary edema. Prob. Lethal oral dose (for an adult) is 1 ml. A brief exposure to 1000 ppm may be fatal. 5.3 Treatment for Exposure: SKIN AND EYES: wash well with water and sodium bicarbonate solution. RESPIRATORY SYSTEM: if there is obstruction to breathing establish airway by pulling tongue forward, inserting an airway tube or doing a tracheostomy, begin artificial respiration. If difficulty in breathing is a result of pulmonary edema, treatment should be carried out with the patient in the sitting position. Administration of oxygen is most important. INGESTION: do not induce vomiting. Have victim drink water and milk. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.1 ppm 5.5 Short-Term Inhalation Limits: 0.4 ppm for 30 min 5.6 Toxicity by Ingestion: Not pertinent 5.7 Late Toxicity: None 5.8 Vapor (Gas) Irritant Characteristics: Causes severe eye or throat irritations which can cause eye or lung injury. Cannot be tolerated even at low concentrations. 5.9 Liquid or Solid Irritant Characteristics: Severe skin irritant. Causes second- and third-degree burns on short contact. Very injurious to the eyes. 5.10 Odor Threshold: 3.5 ppm	

6 FIRE HAZARDS

- 6.1 **Flash Point:** Not flammable
6.2 **Flammable Limits in Air:** Not flammable
6.3 **Fire Extinguishing Agents:** Use water spray to cool exposed containers and to wash away spills.
6.4 **Fire Extinguishing Agents Not to be Used:** Not pertinent
6.5 **Special Hazards of Combustion Products:** Toxic and irritating gases are generated when heated or in fires.
6.6 **Behavior in Fire:** Not pertinent
6.7 **Ignition Temperature:** Not flammable
6.8 **Electrical Hazard:** Not pertinent
6.9 **Burning Rate:** Not flammable

8 WATER POLLUTION

- 8.1 **Aquatic Toxicity:** 10 ppm 10 hr cladophora killed fresh water
10 ppm * fish irritant salt water
* Time period not specified
8.2 **Waterway Toxicity:** Data not available
8.3 **Biological Oxygen Demand (BOD):** Not pertinent
8.4 **Food Chain Concentration Potential:** None

BPF

BROMINE PENTAFLUORIDE

Common Synonym:		Liquefied gas	Colorless	Irritating odor
Reacts violently with water Poisonous vapor is produced				
Store in airtight container. Keep people away. Avoid contact with liquid and vapor. Isolate and remove discharged material. Notify local health and pollution control agencies.				
Fire		Not flammable May cause fire on contact with combustibles Will increase the intensity of a fire POISONOUS GASES MAY BE PRODUCED IN FIRE Containers may explode in fire Wear goggles and self-contained breathing apparatus DO NOT USE WATER OR FOAM ON FIRE		
Exposure		CAUTION FOR MEDICAL AID: VAPOR Irritating to eyes, nose and throat If inhaled will cause coughing or difficult breathing If eyes, nose and throat are irritated with persistent water If breathing has stopped, give artificial respiration If breathing is difficult, give oxygen LIQUID Will burn skin and eyes Harmful if swallowed Remove contaminated clothing and shoes Flush affected areas with plenty of water If IN EYES, hold eyelids open and flush with plenty of water If SWALLOWED and victim is CONSCIOUS, have victim drink water or milk If SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm		
Water Pollution		Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes Notify local health and pollution control agencies Notify appropriate federal water intakes		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook CG 446-1) Issue warning: corrosive air contaminant Restrict access Evacuate area Disperse and flush		2. LABEL 		
3. BTF

BROMINE TRIFLUORIDE

Common Synonyms	Liquid Colorless Extremely irritating odor Reacts violently with water. Poisonous gas is produced on contact with water. Freezing point is 28° F.
AVOID CONTACT WITH LIQUID AND VAPOR. KEEP PEOPLE AWAY. Notify the following people: City or department Fire department Local health department Notify the following people: Notify the following people: Notify the following people:	
Fire	Not flammable. May cause fire on contact with combustibles. POISONOUS GASES MAY BE PRODUCED IN FIRE. Containers may explode in fire. Wear goggles and gloves when fighting fire. Extinguish with dry chemicals or carbon dioxide. DO NOT USE WATER OR FOAM ON FIRE.
Exposure	CALL FOR MEDICAL AID. VAPOR POISONOUS IF INHALED. Irritating to eyes, nose and throat. May cause throat irritation. If in eyes, flush with plenty of water. If on skin, flush with plenty of water. If inhaled, get fresh air and breathe deeply. LIQUID POISONOUS IF SWALLOWED. Will burn skin and eyes. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES: hold eyelids open and flush with plenty of water. IF SWALLOWED: do not induce vomiting. Do not eat or drink. DO NOT INDUCE VOMITING.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify the local health department. Notify the local water supply authority.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 448-4) Issue warning: corrosive, air contaminant. Restrict access. Evacuate area. Disperse and flush.	2. LABELS  
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: No common synonyms. 3.2 Coast Guard Compatibility Classification: Not applicable. 3.3 Chemical Formula: BrF ₃ . 3.4 IMCO/United Nations Numerical Designation: 5.1746.	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Colorless to gray-yellow. 4.3 Odor: Extremely irritating.
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Self-contained breathing apparatus, complete protective clothing, safety glasses, face shield. 5.2 Symptoms Following Exposure: Inhalation causes severe irritation of upper respiratory system. Contact with liquid or vapor causes severe burns of eyes and can cause ulcers and blindness. Contact with skin causes severe burns. Ingestion causes severe burns of mucous membranes. 5.3 Treatment for Exposure: Get immediate medical attention for all exposures. INHALATION: remove from exposure, support respiration. EYES: irrigate with copious amounts of water for at least 15 min. SKIN: wash with large amounts of water for at least 15 min, then rinse with sodium bicarbonate or lime solution. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.1 ppm (suggested). 5.5 Short-Term Inhalation Limits: 50 ppm, 30 min; 100 ppm, 3 min. 5.6 Toxicity by Ingestion: Data not available. 5.7 Lethal Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.	

6. FIRE HAZARDS 6.1 Flash Point: Not flammable but may cause fire on contact with combustibles. 6.2 Flammable Limits in Air: Not flammable. 6.3 Fire Extinguishing Agents: Dry chemical, carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Water, foam. 6.5 Special Hazards of Combustion Products: Data not available. 6.6 Behavior in Fire: Forms very toxic and irritating fume. 6.7 Ignition Temperature: Not pertinent. 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: Not pertinent.	8. WATER POLLUTION 8.1 Aquatic Toxicity: Data not available. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): None. 8.4 Food Chain Concentration Potential: None.
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: Reacts vigorously to generate toxic hydrogen fluoride gas (hydrofluoric acid). 7.2 Reactivity with Common Materials: Will cause severe corrosion of common metals and glass. May cause fire in contact with organic materials such as wood, cotton or straw. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Flush with water, rinse with sodium bicarbonate or lime solution. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9. NOTES			

BRU

BRUCINE

Common Synonyms 1011 Dimethoxytryptamine (+) Brucine dihydrate		Solid	White	Odorless
Sinks in water				
AVOID CONTACT WITH SOLID AND DUST. KEEP PEOPLE AWAY. Wear dust respirator and rubber gloves. Do not breathe dust. Do not ingest or swallow. Do not get on skin or clothes. Do not get in eyes, nose or mouth. Do not get in eyes, nose or mouth.				
Fire		Combustible POISONOUS GASES MAY BE PRODUCED IN FIRE Water-soluble. Vaporizes. Toxic. Irritant. Corrosive. Extinguish with dry chemical or water.		
		CALL FOR MEDICAL AID DUST POISONOUS IF INHALED Irritating to eyes, nose and throat. If in eyes, flush with water. If on skin, wash with soap and water. If swallowed, do not induce vomiting. If unconscious, have someone drink water. SOLID POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED If swallowed will cause nausea and vomiting. If on skin, wash with soap and water. If in eyes, flush with water. If on skin, wash with soap and water. If swallowed, do not induce vomiting. If unconscious, have someone drink water. If swallowed, do not induce vomiting. If unconscious, have someone drink water.		
Exposure				
Water Pollution		Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Not recommended for use in water. Not recommended for use in water.		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: poison water contaminant. Restrict access. Should be removed. Chemical and physical treatment.		2. LABEL 		
3. CHEMICAL DESIGNATIONS 31 Synonyms: Brucine dihydrate 1011 Dimethoxytryptamine 32 Coast Guard Compatibility Classification: Not listed 33 Chemical Formula: $C_{17}H_{14}N_2O_4$ ($C_{17}H_{14}N_2O_4 \cdot 2H_2O$) 34 IMCO/United Nations Numerical Designation: 611570		4. NOTES

BDI

BUTADIENE, INHIBITED

Common Synonyms Diene Viable diene 1,3-Butadiene	Liquefied compressed gas Colorless Gasoline-like odor Floats and boils on water. Flammable visible vapor cloud is produced.
Avoid contact with liquid and any key, or the away from a fire. If contact with liquid occurs, wash immediately with water. If contact with gas occurs, move to fresh air. If inhaled, get fresh air. If swallowed, do not induce vomiting. If on skin, wash with soap and water. If in eyes, flush with water for 15 minutes. If inhaled, get fresh air. If in eyes, flush with water for 15 minutes. If on skin, wash with soap and water. If in eyes, flush with water for 15 minutes.	FLAMMABLE Containers may explode in fire. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Wear goggles, gloves, and safety shoes. Avoid contact with skin and eyes. Do not breathe vapor. Do not get liquid or vapor on skin or clothing. Do not get liquid or vapor in eyes. Do not get liquid or vapor on clothing. Do not get liquid or vapor on skin or clothing.
Fire	CALL FOR MEDICAL AID VAPOR Irritating to eyes, nose and throat. May be harmful if inhaled. LIQUID Irritating to skin and eyes. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. Do not use solvents to clean skin. Do not use solvents to clean skin.
Exposure	Not harmful to aquatic life. May be dangerous if it enters water intakes. Not a pollutant of surface water.
Water Pollution	
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Toxic warning: High flammability. Evaluate area.	2 LABEL 
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Butadiene 1,3-Butadiene Butene Diene Vinylbutadiene 3.2 Coast Guard Compatibility Classification: Orlfin 3.3 Chemical Formula: C_4H_6 3.4 IMCO United Nations Numerical Designation: 2010	4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Gas 4.2 Color: Colorless 4.3 Odor: Mild aromatic
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Chemical safety goggles, respirator, and gloves. If in contact with liquid, wear gloves. If in contact with gas, wear a respirator. If in contact with liquid, wear gloves. If in contact with gas, wear a respirator. 5.2 Symptoms Following Exposure: Nausea, headache, dizziness, and irritation of the eyes, nose, and throat. 5.3 Treatment for Exposure: Remove from exposure immediately. If a physician is available, INHALATION: If breathing is irregular or stopped, start resuscitation; administer oxygen. SKIN CONTACT: Remove contaminated clothing and wash affected skin area. EYE CONTACT: Flush with water for 15 minutes. 5.4 Toxicity by Inhalation (Threshold Limit Value): 1 ppm 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Data not available 5.7 Late Toxicity: None 5.8 Vapor (Gas) Irritant Characteristics: Vapor causes a stinging irritation of the eyes, nose, and throat at high concentrations. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. Irritation to skin and a mild skin rash may occur on contact and reddening of the skin because of irritation. 5.10 Odor Threshold: 4 mg/m ³	

6 FIRE HAZARDS 6.1 Flash Point: -40°F (-40°C) 6.2 Flammable Limits in Air: 2.0 - 12.5 6.3 Fire Extinguishing Agents: Stop flow of gas. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Not pertinent. 6.6 Behavior in Fire: Vapor heavier than air and may travel a considerable distance to source of ignition and flash back. Containers may explode due to ductile polymerization. 6.7 Ignition Temperature: 750°F 6.8 Electrical Hazard: Class I, Group B 6.9 Burning Rate: Not pertinent	8 WATER POLLUTION 8.1 Aquatic Toxicity: Not pertinent. 8.2 Waterway Toxicity: Not pertinent. 8.3 Biological Oxygen Demand (BOD): Not pertinent. 8.4 Food Chain Concentration Potential: Not pertinent.																																				
7 CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: No reaction. 7.3 Stability During Transport: Explosive decomposition when contaminated with peroxides formed by reaction with air. 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent. 7.5 Polymerization: Stable when inhibitors present. 7.6 Inhibitor of Polymerization: eth. Butylated hydroxytoluene	9. SELECTED MANUFACTURERS 1. Nacex Butene Products Co. Port Neches, Texas 77659 2. Petro-Tex Chemical Corp. Houston, Texas 77017 3. Phillips Petroleum Co. BUT

BUTANE

Common Synonyms as Butane	Liquefied compressed gas Colorless Gasoline-like odor Floats and boils on water Flammable, visible vapor cloud is formed
Fire	FLAMMABLE Flashback along vapor trail may occur Vapor may explode if ignited in an enclosed area Vapor is flammable
Exposure	VAPOR If inhaled, will cause dizziness or difficult breathing Not irritating to eyes, nose or throat LIQUID Will cause frostbite
Water Pollution	Not harmful to aquatic life May be dangerous if it enters water intakes
1 RESPONSE TO DISCHARGE See Response Methods Handbook, CG 434.4. Fire warning: High flammability Major hazard: Flammable	2. LABEL 
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: n-Butane 3.2 Coast Guard Compatibility Classification: Paraffin 3.3 Chemical Formula: C_4H_{10} 3.4 IMCO United Nations Numerical Designation: 2015	4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Compressed gas 4.2 Color: Colorless 4.3 Odor: Gasoline-like
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Not required when handling properly and in proper place 5.2 Symptoms Following Exposure: High concentration of vapor may cause dizziness or difficulty breathing 5.3 Treatment for Exposure: ORAL AND ASPIRATION: Not recommended. INHALATION: Fresh air. If severe, vapor may cause dizziness or difficulty breathing. Apply artificial respiration. If unconscious, place in recovery position. If in contact with eyes, flush with water. If on skin, wash with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): 100 ppm 5.5 Short-Term Inhalation Limits: Data is available 5.6 Toxicity by Ingestion: Not pertinent 5.7 Late Toxicity: None 5.8 Vapor (Gas) Irritant Characteristics: None 5.9 Liquid or Solid Irritant Characteristics: No appreciable hazard. Practically harmless. No data available on liquid and solid irritant qualities from human or animal testing. 5.10 Odor Threshold: 100 ppm

REVISED 1976

BDO

1,4-BUTANEDIOL

Common Synonyms 1,4-Dihydroxybutane Tetramethylene glycol		Thick liquid Colorless Odorless Sinks and mixes with water. Freezing point is 68°F.
Fire		Combustible Flammable in air. Ignites at 110°C (230°F). Water may become flammable.
Exposure		HAZARDOUS TO HEALTH LIQUID OR SOLID Irritating to skin or eyes. Harmful if swallowed. Skin affected more with heating. Flammable. UNWASHED HANDS MAY CONTAMINATE FOOD OR DRINK.
Water Pollution		Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Not biodegradable and persistent in the environment. Not a priority pollutant.
1. RESPONSE TO DISCHARGE See Response Methods Handbook, CG 446-1. Dispense and Flush.		2. LABELS No hazard label required by Code of Federal Regulations.
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: 1,4-Dihydroxybutane Tetramethylene glycol 3.2 Coast Guard Compatibility Classification: Alcohol 3.3 Chemical Formula: HOCH ₂ CH ₂ CH ₂ CH ₂ OH 3.4 IMCO United Nations Numerical Designation: 1.1.1.1.1		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Odorless
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Eye protection 5.2 Symptoms Following Exposure: Ingestion of large amounts needed to produce any symptoms. 5.3 Treatment for Exposure: SKIN OR EYES: Wash off immediately with plenty of water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Not pertinent. 5.5 Short-Term Inhalation Limits: Not pertinent. 5.6 Toxicity by Ingestion: Grade 2.1 Data not available. 5.7 Late Toxicity: None. 5.8 Vapor (Gas) Irritant Characteristics: None. 5.9 Liquid or Solid Irritant Characteristics: None. 5.10 Odor Threshold: Not pertinent.		

6. FIRE HAZARDS 6.1 Flash Point: -25°F (-32°C) 6.2 Flammable Limits in Air: Data not available. 6.3 Fire Extinguishing Agents: Alcohol resistant chemical or carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Water and foam may cause a fire. 6.5 Special Hazards of Combustion Products: Not pertinent. 6.6 Behavior in Fire: Not pertinent. 6.7 Ignition Temperature: Data not available. 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: Data not available.		8. WATER POLLUTION 8.1 Aquatic Toxicity: Data not available. 8.2 Waterway Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: None.

NOTES		

BUD

1,4-BUTENEDIOL

Common Synonyms 2-Buten-1,4-diol 1,4-Dihydroxy-2-butene	Thick liquid Light yellow Odorless Sinks and mixes with water. Freezing point is 45°F.
Supplies Not applicable.	Supplies Not applicable.
Fire	Combustible Extinguish with water, foam, carbon dioxide, or other dry agent. Water may be effective.
Exposure	CALL FOR MEDICAL AID LIQUID Irritating to skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED, do not induce vomiting. Have medical attention.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. No data for acute or chronic toxicity.
1. RESPONSE TO DISCHARGE Use appropriate methods (NFPA 704, 442, 443). Dispense and flush.	2. LABELS No hazard label required by Code of Federal Regulations.
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: cis-2-Butene-1,4-diol 1,4-Dihydroxy-2-butene 3.2 Coast Guard Compatibility Classification: Not applicable. 3.3 Chemical Formula: HOCH ₂ CH=CHCH ₂ OH 3.4 IMCO United Nations Numerical Designation: 1.4.1997	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Pale yellow 4.3 Odor: Odorless
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Eye protection. 5.2 Symptoms Following Exposure: Data not available. 5.3 Treatment for Exposure: SEE OR EYE CONTACT: Flush with water. A small amount of liquid may be swallowed. Do not induce vomiting. 5.4 Toxicity by Inhalation (Threshold Limit Value): Not pertinent. 5.5 Short-Term Inhalation Limits: Not pertinent. 5.6 Toxicity by Ingestion: Grade 2.1 (2.0 to 2.9). 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Not pertinent. 5.9 Liquid or Solid Irritant Characteristics: Minimum 5.0 (2.0 to 2.9). 5.10 Odor Threshold: Not pertinent.	

6. FIRE HAZARDS 6.1 Flash Point: 26°F (0°C) 6.2 Flammable Limits in Air: Not pertinent. 6.3 Fire Extinguishing Agents: Dry chemical or carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Foam or water may cause burning. 6.5 Special Hazards of Combustion Products: Not pertinent. 6.6 Behavior in Fire: Not pertinent. 6.7 Ignition Temperature: Data not available. 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: Data not available.	8. WATER POLLUTION 8.1 Aquatic Toxicity: Data not available. 8.2 Waterway Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: None.
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: No reaction. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Bases: Not pertinent. 7.5 Polymerization: Stable. 7.6 Inhibitor of Polymerization: Not pertinent.	9. SELECTED MANUFACTURERS Celanese Corporation Chemical Division California, Kentucky 42029
11. HAZARD ASSESSMENT CODE See Hazard Assessment Code (NFPA 704, 442, 443). A P O	10. SHIPPING INFORMATION 10.1 Grades or Purity: Not applicable. 10.2 Storage Temperature: Above 45°F. 10.3 Inert Atmosphere: Inerted. 10.4 Viscosity: Data not available.
12. HAZARD CLASSIFICATIONS 12.1 Code of Federal Regulations: Not listed. 12.2 NAA Hazard Rating for Both Water Transport: Not listed. 12.3 NFPA Hazard Classification: Not listed.	13. NOTES	

BCN

n-BUTYL ACETATE

Common Synonyms: Acetic Acid n-Butyl Ester Butyl acetate Butyl ethanoate	Appearance: Watery liquid Color: Colorless Odor: Pleasant fruity odor Other: Floats on water. Flammable emitting vapor is produced.
Stop discharge if possible. Keep people away. Wash thoroughly with soap and water. Avoid breathing vapors. No smoking or open flames. Do not eat or drink. Do not get in eyes. Do not get on skin or clothing.	
Fire	FLAMMABLE Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Do not use with flame, heat, or sparks. Do not use near open flames. Do not use near hot surfaces.
Exposure	CALL FOR MEDICAL AID VAPOR: Irritating to eyes, nose and throat. If inhaled will cause nausea, dizziness, headache or difficult breathing. May irritate skin. If inhaled, move to fresh air immediately. LIQUID: Irritating to skin and eyes. Harmful if swallowed. If swallowed, do not induce vomiting. If in eyes, flush with plenty of water. If on skin, wash with plenty of water. If swallowed, drink plenty of water. If swallowed, do not induce vomiting. If on skin, wash with plenty of water. If swallowed, drink plenty of water.
Water Pollution	Effect of low concentrations on aquatic life is unknown. Fouling to shoreline. May be dangerous if it enters water intakes. No known health or pollution effects. No known effects on aquatic life.
1 RESPONSE TO DISCHARGE See Response Methods Manual, CG 444-4 For handling instructions. Minimum quantities.	2. LABEL 
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Acetic Acid n-Butyl Ester, Butyl acetate, Butyl ethanoate. 3.2 Coast Guard Compatibility Classification: 1. 3.3 Chemical Formula: CH ₃ COOC ₄ H ₉ 3.4 IMCO United Nations Numerical Designation: 1.1	4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Colorless. 4.3 Odor: Pleasant, fruity, acetone-like.
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Avoid skin contact with chemical. Use gloves, goggles, and mask. 5.2 Symptoms Following Exposure: SKIN: Irritation, redness, itching. EYES: Irritation, redness, tearing. INHALATION: Headache, dizziness, nausea, difficulty breathing. 5.3 Treatment for Exposure: EYES: Flush with plenty of water. INHALATION: Move to fresh air. If breathing is difficult, give oxygen. 5.4 Toxicity by Inhalation (Threshold Limit Value): 100 ppm. 5.5 Short-Term Inhalation Limits: 100 ppm. 5.6 Toxicity by Ingestion: Irritation to the stomach. 5.7 Lethal Toxicity: None. 5.8 Vapor (Gas) Irritant Characteristics: Vapor is irritating to the eyes, nose, and throat. 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard if inhaled, ingested, and absorbed. 5.10 Odor Threshold: None.	

6 FIRE HAZARDS 6.1 Flash Point: 99°F (37°C) 6.2 Flammable Limits in Air: 2.5% - 12.5% 6.3 Fire Extinguishing Agents: Alcohol, chemical carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Water, steam, dry chemical, foam, and halon. 6.5 Special Hazards of Combustion Products: None. 6.6 Behavior in Fire: Non-persistent. 6.7 Ignition Temperature: 500°F (260°C) 6.8 Electrical Hazard: Class I, Group 1. 6.9 Burning Rate: 4.4 ft/min.	8 WATER POLLUTION 8.1 Aquatic Toxicity: 44 ppm (4.4% in 11% water). 8.2 Waterfowl Toxicity: 1.1% in water. 8.3 Biological Oxygen Demand (BOD): 0.1% in 11% water. 8.4 Food Chain Concentration Potential: None.																																				
7. A T I

13 PHYSICAL AND CHEMICAL PROPERTIES

13.1 Physical State at 15°C and 1 atm:

13.2 Molecular Weight:

13.3 Boiling Point at 1 atm:

13.4 Freezing Point:

13.5 Critical Temperature:

13.6 Critical Pressure:

13.7 Specific Gravity:

13.8 Liquid Surface Tension:

13.9 Liquid-Water Interfacial Tension:

13.10 Vapor (Gas) Specific Gravity:

13.11 Ratio of Specific Heats of Vapor (Gas):

13.12 Latent Heat of Vaporization:

13.13 Heat of Combustion:

13.14 Heat of Decomposition:

13.15 Heat of Solidation:

13.16 Heat of Polymerization:

12 HAZARD CLASSIFICATIONS

BAI

iso-BUTYL ACRYLATE

Common Synonyms: Isobutyl Acrylate isobutyl methacrylate Waxy liquid Colorless Sharp fragrant odor Floats on water. Irritating vapor is produced.		6 FIRE HAZARDS 6.1 Flash Point: 141°F (61°C) 6.2 Flammable Limits in Air: 1.1-10.0% 6.3 Fire Extinguishing Agents: Dry chemical, foam, water (not damped) 6.4 Fire Extinguishing Agents Not to be Used: None known 6.5 Special Hazards of Combustion Products: None known 6.6 Behavior in Fire: None known 6.7 Ignition Temperature: 141°F (61°C) 6.8 Electrical Hazard: None known 6.9 Burning Rate: None known	
7 CHEMICAL REACTIVITY 7.1 Reactivity with Water: None known 7.2 Reactivity with Common Materials: None known 7.3 Stability During Transport: Stable 7.4 Neutralizing Agents for Acids and Caustics: None known 7.5 Polymerization: Will polymerize when heated or in presence of certain catalysts 7.6 Inhibitor of Polymerization: Methyl ethyl butyl peroxide, benzoyl peroxide, hydroquinone, etc.		8 WATER POLLUTION 8.1 Aquatic Toxicity: Data not available 8.2 Waterfowl Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): Data not available 8.4 Food Chain Concentration Potential: Data not available	
9 SELECTED MANUFACTURERS Colson Corp. Crescent Chemical Co., Inc. J. T. Baker Co. Nacac Chemical Co. Rohm and Haas Co. Independent Methyl Methacrylate Producers Union Carbide Corp. Chemical and Plastics Division N. E. A. Co. New York, N. Y.		10 SHIPPING INFORMATION 10.1 Grades or Purities: 99.5% min. 10.2 Storage Temperature: 5-10°C 10.3 Inert Atmosphere: None known 10.4 Venting: If container is pressurized	
11 HAZARD ASSESSMENT CODE See Table 1 of Assessment Code, 1973, 1974, 1975, 1976, 1977, 1978, 1979, 1980, 1981, 1982, 1983, 1984, 1985, 1986, 1987, 1988, 1989, 1990, 1991, 1992, 1993, 1994, 1995, BTC

n-BUTYL ACRYLATE

Common Synonyms Butyl acrylate n-Butyl 2-propenoate Acrylic acid, n-butyl ester		Watery liquid	Colorless	Sharp, fragrant odor
		Floats on water		
Stop discharge if possible Call fire department Avoid contact with liquid Isolate and remove contaminated material Notify local health and pollution control agencies				
Fire		Combustible Containers may explode in fire Extinguish with dry chemical, foam, or water Exposed containers with water		
Exposure		CALL FOR MEDICAL AID LIQUID Irritant to skin and eyes Harmful if swallowed Remove contaminated clothing, shoes Flush affected areas with plenty of water IF IN EYES: Wash with plenty of water IF SWALLOWED: Do not induce vomiting. Have victim drink water IF SWALLOWED and not pregnant: DO NOT INDUCE VOMITING. CONSULT A PHYSICIAN. Things to expect from water		
Water Pollution		Effect of low concentrations on aquatic life is unknown Fouling to shoreline May be dangerous if it enters water intake Notify local health and pollution control agencies Notify local fire department		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-3) Mechanical containment Chemical and physical treatment		2. LABELS No hazard label required by Code of Federal Regulations		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Acrylic acid n-butyl ester Butyl acrylate Butyl propenoate 3.2 Coast Guard Compatibility Classification Acrylate 3.3 Chemical Formula $\text{C}_8\text{H}_{10}\text{O}_2$ 3.4 MCO/United Nations Numerical Designation Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped) Liquid 4.2 Color Colorless 4.3 Odor Characteristic of acrylics		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Self-contained breathing apparatus, rubber gloves, acid goggles 5.2 Symptoms Following Exposure: Vapor is irritating when breathed at high concentrations. Contact with liquid causes irritation of skin and burning of eyes 5.3 Treatment for Exposure: INHALATION: remove to fresh air, administer artificial respiration or oxygen if indicated, call a physician. SKIN AND EYES: wash with plenty of water 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: 100 ppm (4 hr) 5.6 Toxicity by Ingestion: Not available 5.7 Late Toxicity: Not available 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause a slight stinging of the eyes or respiratory system if present at high concentrations. The effect is temporary 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain, may cause stinging and reddening of the skin 5.10 Odor Threshold: Data not available				

6 FIRE HAZARDS

6.1 Flash Point: 118°F (43°C)
 6.2 Flammable Limits in Air: 1.4% - 9.4%
 6.3 Fire Extinguishing Agents: Dry chemical, foam or carbon dioxide
 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent
 6.5 Special Hazards of Combustion Products: Not pertinent
 6.6 Behavior in Fire: Not pertinent
 6.7 Ignition Temperature: 534°F
 6.8 Electrical Hazard: Not pertinent
 6.9 Burning Rate: 4.7 mm/min

7 CHEMICAL REACTIVITY

7.1 Reactivity with Water: No reaction
 7.2 Reactivity with Common Materials: No reaction
 7.3 Stability During Transport: Stable
 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent
 7.5 Polymerization: Will polymerize on application of heat; uncontrolled bulk polymerization can be explosive
 7.6 Inhibitor of Polymerization: Methyl ether of hydroquinone
 15-100 ppm. Store in contact with air

8 WATER POLLUTION

8.1 Aquatic Toxicity: Data not available
 8.2 Waterfowl Toxicity: Data not available
 8.3 Biological Oxygen Demand (BOD): Data not available
 8.4 Food Chain Concentration Potential: None

9 SELECTED MANUFACTURERS

1. Celanese Corp.
 Celanese Chemical Co. Division
 245 Park Ave.
 New York, N.Y. 10017
 2. Rohm and Haas Co.
 Independence Mall West
 Philadelphia, Pa. 19108
 3. Union Carbide Corp.
 Chemicals and Plastics Div.
 270 Park Ave.
 New York, N.Y. 10017

10. SHIPPING INFORMATION

10.1 Grades or Purity: 99+%
 10.2 Storage Temperature: Ambient
 10.3 Inert Atmosphere: No requirement
 10.4 Venting: Pressure venting

11 HAZARD ASSESSMENT CODE

(See Hazard Assessment Handbook, CG 446-3)
 A-T U-Z

12. HAZARD CLASSIFICATIONS

12.1 Code of Federal Regulations: Combustible Liquid
 12.2 HAS Hazard Rating for Bulk Water Transportation:

Category	Rating
Fire	2
Health	
Vapor Irritant	1
Liquid or Solid Irritant	1
Poisons	1
Water Pollution	
Human Toxicity	1
Aquatic Toxicity	2
Aesthetic Effect	2
Reactivity	
Other Combustion	2
Water	0
Self Reaction	1

12.3 NFPA Hazard Classifications:

Category	Classification
Health Hazard (Blue)	2
Flammability (Red)	2
Reactivity (Yellow)	2

13 PHYSICAL AND CHEMICAL PROPERTIES

13.1 Physical State at 15°C and 1 atm: Liquid
 13.2 Molecular Weight: 126.17
 13.3 Boiling Point at 1 atm: 299°F = 148.9°C = 422.9 K
 13.4 Freezing Point: -53°F = -64°C = 209 K
 13.5 Critical Temperature: 621°F = 327°C = 600 K
 13.6 Critical Pressure: 426 psia = 2.9 atm = 2.9 MPa
 13.7 Specific Gravity: 0.899 at 20°C (liquid)
 13.8 Liquid Surface Tension: (estimated) 20 dynes/cm = 0.020 N/m at 20°C
 13.9 Liquid-Water Interfacial Tension: (estimated) 100 dynes/cm = 0.060 N/m at 20°C
 13.10 Vapor (Gas) Specific Gravity: Not pertinent
 13.11 Ratio of Specific Heats of Vapor (Gas): 1.0
 13.12 Latent Heat of Vaporization: 120 Btu/lb = 66.4 cal/g = 2.78 x 10⁵ J/kg
 13.13 Heat of Combustion: -13,860 Btu/lb = -7700 cal/g = -3224 x 10³ J/kg
 13.14 Heat of Decomposition: Not pertinent
 13.15 Heat of Solution: Not pertinent
 13.16 Heat of Polymerization: -25.9 Btu/lb = -144 cal/g = -6.0 x 10³ J/kg

(continued, page 500)

NOTES

REVISED 1978

BAN

n-BUTYL ALCOHOL

Common Synonyms Butanol Butyl alcohol 1-Butanol 1-Hydroxybutane n-Propylcarbutol	Water liquid Colorless Alcohol odor Floats and mixes slowly with water. Flammable, irritating vapor is produced.
Stop discharge if possible. Keep people away. Call fire department. Avoid contact with liquid and vapor. Stay upwind and use water spray to knock down vapor. Isolate and remove discharged material. Notify local health and pollution control agencies.	
Fire	FLAMMABLE Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Extinguish with dry chemical or carbon dioxide. Water and alcohol foam may be ineffective on fire. Cover exposed containers with water.
Exposure	CAUTION MEDICAL AID VAPOR Irritating to eyes, nose and throat if inhaled; will cause nausea, headache, dizziness. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. LIQUID Irritating to skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF SWALLOWED, but do not vomit and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk.
Water Pollution	Dangerous to aquatic life in high concentrations. May be dangerous if it enters water intakes. Notify local health and pollution control officials. Notify operators of nearby water intakes.
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Restrict access. Disperse and flush.	
3 CHEMICAL DESIGNATIONS 3.1 Synonyms : Butanol, Butyl alcohol, 1-Butanol, 1-Hydroxybutane, n-Propylcarbutol. 3.2 Coast Guard Compatibility Classification : Alcohol. 3.3 Chemical Formula : C ₄ H ₉ CHOH. 3.4 IMCO United Nations Numerical Designation : 33-1120.	2. LABEL  4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped) : Liquid. 4.2 Color : Colorless. 4.3 Odor : Alcohol like, pungent, strong characteristic, mildly alcoholic, non-residual.
5 HEALTH HAZARDS 5.1 Personal Protective Equipment : Organic vapor respirator or air supplied mask, chemical goggles or face splash shield. 5.2 Symptoms Following Exposure : Anesthesia, nausea, headache, dizziness, irritation of respiratory passages, mild irritation to the skin and eyes. 5.3 Treatment for Exposure: INHALATION : Remove from exposure immediately, call a physician if breathing is irregular or has stopped, start resuscitation and administer oxygen. INGESTION : Induce vomiting and call a physician. EYES : Flush with water for at least 15 minutes. 5.4 Toxicity by Inhalation (Threshold Limit Value) : 100 ppm. 5.5 Short-Term Inhalation Limits : 150 ppm for 30 min. 5.6 Toxicity by Ingestion : Grade 3 LD ₅₀ 6.5 g/kg (rat). 5.7 Late Toxicity : None. 5.8 Vapor (Gas) Irritant Characteristics : A vapor cause a slight stinging of the eyes or respiratory system if present in high concentrations. Effect is temporary. 5.9 Liquid or Solid Irritant Characteristics : Minimum hazard. If spilled on clothing and allowed to remain, may cause irritation and reddening of the skin. 5.10 Odor Threshold : 25 ppm.	

6 FIRE HAZARDS 6.1 Flash Point : 34°C (93°F) C.C. 6.2 Flammable Limits in Air : 1.4 - 11.2% 6.3 Fire Extinguishing Agents : Carbon dioxide, dry chemicals. 6.4 Fire Extinguishing Agents Not to be Used : Not pertinent. 6.5 Special Hazards of Combustion Products : Not pertinent. 6.6 Behavior in Fire : Not pertinent. 6.7 Ignition Temperature : 650°F. 6.8 Electrical Hazard : Class I, Group D. 6.9 Burning Rate : 3.2 mm/min.	8 WATER POLLUTION 8.1 Aquatic Toxicity : 1000 ppm 24 hr. goldfish died fresh water. 8.2 Waterway Toxicity : Data not available. 8.3 Biological Oxygen Demand (BOD) : 1 - 12 lb./lb. 5 days 15°C 5 days. 8.4 Food Chain Concentration Potential : None.																																				
7 CHEMICAL REACTIVITY 7.1 Reactivity with Water : No reaction. 7.2 Reactivity with Common Materials : No reaction. 7.3 Stability During Transport : Stable. 7.4 Neutralizing Agents for Acids and Caustics : Not pertinent. 7.5 Polymerization : Not pertinent. 7.6 Inhibitor of Polymerization : Not pertinent.	9 SELECTED MANUFACTURERS 1. BAS

sec-BUTYL ALCOHOL

Common Synonyms 2-Butanol 2-Hydroxybutane Methyl ethyl carbinol	Physical Properties Very liquid Colorless Alcohol odor Floats and mixes slowly with water. Flammable, irritating vapor is produced.
First Aid Stop exposure if possible. Keep people away. Shut off ignition sources and call fire department if fire starts. Contact with liquid and vapor: Stay upwind and use water spray to knock down vapor. In fire and burn: Flush charged material. Notify local health and pollution control agencies.	
Fire	FLAMMABLE Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Extinguish with dry chemical or carbon dioxide. Water and alcohol foam may be ineffective on fire. Avoid exposed containers with water.
Exposure	CALL FOR MEDICAL AID VAPOR Irritating to eyes, nose and throat. If inhaled, will cause headache, dizziness or difficult breathing. Move to fresh air. If breathing has stopped, artificial respiration. If breathing is difficult, give oxygen. LIQUID Irritating to eyes. Flush eyes with plenty of water. Flush skin with plenty of water.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and pollution control agencies. Notify operators of nearby water intake.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Restrict access. Disperse and flush.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms 2-Butanol Butylene Glycol 2-Hydroxybutane Methyl ethyl carbinol 3.2 Coast Guard Compatibility Classification Alcohol 3.3 Chemical Formula CH ₃ CH ₂ CHOHCH ₃ 3.4 IMCO United Nations Hazardous Chemical Designation 3.121	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Strong, pleasant
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Wear gloves, eye protection, and supplied mask, chemical goggles, or face shield. 5.2 Symptoms Following Exposure: Headache, dizziness, and respiratory irritation. Liquid is severely irritating to the eyes and may cause excuburn. 5.3 Treatment for Exposure: INHALATION: Remove from exposure immediately, call a physician if breathing is irregular or has stopped, start resuscitation and administer oxygen. INGESTION: Induce vomiting and call a physician. EYES: Flush with water for at least 15 minutes. 5.4 Toxicity by Inhalation (Threshold Limit Value): 150 ppm 5.5 Short-Term Inhalation Limits: 200 ppm for 60 min 5.6 Toxicity by Ingestion: Grade I - 15g/kg (rat), single oral dose 5.7 Late Toxicity: None 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause a slight stinging of the eyes or respiratory system if present in high concentrations. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: No appreciable hazard. Practically harmless to the skin. 5.10 Odor Threshold: Data not available.

n-BUTYLAMINE

Common Synonyms 1. Azobutane Butylamine Mono-n-butylamine N-butylamine	Liquid Colorless Fishy, ammonia like odor Mixes with water
SAFETY DATA SHEET (SDS) INFORMATION This document contains information that is essential for the safe handling and use of the product. It is intended to provide a summary of the most important safety information. For more detailed information, consult the full SDS.	
Fire	Flammable POISONOUS GASES MAY BE PRODUCED IN FIRE Flashback along vapor trail may occur Vapor may explode if ignited in an enclosed area Will burn with a white, smoky flame Ext. agent: dry chemical, foam, carbon dioxide Water may be ineffective
 Exposure	CAUTION: IRRITANT VAPOR POISONOUS IF INHALED OR IF SKIN IS EXPOSED If inhaled will cause dizziness, headache, coughing or difficult breathing If swallowed will cause nausea and vomiting LIQUID Will burn skin and eyes If swallowed will cause nausea and vomiting If in contact with eyes will cause severe irritation and edema of the cornea If swallowed will cause severe irritation and edema of the cornea If swallowed will cause severe irritation and edema of the cornea
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning - high flammability, air contaminant, water contaminant Restrict access Disperse and flush	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: 1. Aminobutane Butylamine, Mono-n-butylamine, N-butylamine 3.2 Coast Guard Compatibility Classification: Aliphatic amine 3.3 Chemical Formula: CH ₃ (CH ₂) ₃ NH ₂ 3.4 IMCO/United Nations Numerical Designation: 3.2 1125	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Fish like ammonia like
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Air supplied mask, rubber gloves, coverall goggles, face shield, full rubber apron 5.2 Symptoms Following Exposure: Inhalation causes irritation, nausea, vomiting, headache, faintness, severe coughing, and chest pains. Can cause lung edema. Ingestion causes severe irritation of mouth and stomach. Contact with eyes causes severe irritation and edema of the cornea. Contact with skin causes burns, abrasions, and through skin may cause nausea, vomiting and shock. 5.3 Treatment for Exposure: INHALATION: remove victim to fresh air, call a physician, give oxygen if breathing is difficult, if not breathing, give artificial respiration. INGESTION: give large amounts of water, get medical attention. EYES: flush with water at least 15 min., get medical care. SKIN: remove contaminated clothing, flush skin with plenty of water at least 15 min. 5.4 Toxicity by Inhalation (Threshold Limit Value): 5 ppm 5.5 Short-Term Inhalation Limits: 5 ppm, 4 min 5.6 Toxicity by Ingestion: Grade 3 oral LD ₅₀ = 500 mg/kg (rat) 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available	

6. FIRE HAZARDS 6.1 Flash Point: 30°F (0°C) 10°F (1°C) 6.2 Flammable Limits in Air: 1.7% - 9.8% 6.3 Fire Extinguishing Agents: Alcohol, foam, dry chemical, carbon dioxide 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective 6.5 Special Hazards of Combustion Products: Toxic oxides of nitrogen may form in fire 6.6 Behavior in Fire: Vapor is heavier than air and may travel to a source of ignition and flash back. Containers may explode in fire 6.7 Ignition Temperature: 94°F 6.8 Electrical Hazard: Data not available 6.9 Burning Rate: 5.79 ft/min	8. WATER POLLUTION 8.1 Aquatic Toxicity: 30-70 ppm 24 hr. week class critical range, fresh water 8.2 Waterflow Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): 26% theoretical 5 days 8.4 Food Chain Concentration Potential: None								
7. BTL

sec-BUTYLAMINE

Common Synonyms	Liquid White Ammonia like odor
	Mixes with water
	Short attention to safety calls for equipment. Avoid contact with skin and eyes. Keep promptly away from heat, open flame, and electrical sparks. No discharge if possible. If discharge occurs, use water spray to knock down vapor. If fire occurs, use dry chemical or carbon dioxide. Do not use water. Do not use high pressure water. Do not use steam.
Fire	FLAMMABLE POISONOUS GASES MAY BE PRODUCED IN FIRE Flashback along vapor trail may occur Vapor may explode if ignited in an enclosed area Do not extinguish with water. Use dry chemical or carbon dioxide. Extinguish with dry chemicals. Do not use water. Do not use steam. Do not use high pressure water. Do not use steam.
Exposure	CAUTION FOR MEDICAL AID VAPOR Irritating to eyes, nose and throat If inhaled will cause coughing or difficult breathing If inhaled, move victim to fresh air. If necessary, give artificial respiration. If necessary, give artificial respiration. If necessary, give artificial respiration. If necessary, give artificial respiration. LIQUID Will burn skin and eyes If swallowed will cause nausea and vomiting If swallowed, give plenty of water. If necessary, give artificial respiration. If necessary, give artificial respiration. If necessary, give artificial respiration. If necessary, give artificial respiration. IF SWALLOWED, give plenty of water. If necessary, give artificial respiration. If necessary, give artificial respiration. If necessary, give artificial respiration. If necessary, give artificial respiration. IF SWALLOWED, give plenty of water. If necessary, give artificial respiration. If necessary, give artificial respiration. If necessary, give artificial respiration. If necessary, give artificial respiration.
Water Pollution	Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes Not known if it is toxic to fish Not known if it is toxic to birds
1 RESPONSE TO DISCHARGE (See response methods NFPA 704 NFPA 704-4)	2 LABEL
Issue warning: high flammability air contaminant water contaminant Restrict access Disperse and Push	
3 CHEMICAL DESIGNATIONS	4 OBSERVABLE CHARACTERISTICS
3.1 Synonyms: No common synonyms 3.2 Coast Guard Compatibility Classification: Aliphatic amine 3.3 Chemical Formula: CH₃CH₂CH₂CH₂NH₂ 3.4 IMCO/United Nations Numerical Designation: Not listed	4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Ammonia like
5 HEALTH HAZARDS	
5.1 Personal Protective Equipment: Chemical safety goggles, rubber gloves and, upon respiratory protection, use equipment not sparking shoes 5.2 Symptoms Following Exposure: Inhalation causes irritation. Burns of the respiratory system exposure to concentrated vapors can cause asphyxiation. Ingestion causes burning of mouth and stomach. Contact with eyes cause lachrimation conjunctivitis, burns, corneal edema. Contact with skin causes irritation or burns dermatitis. 5.3 Treatment for Exposure: If INHALATION, remove patient from exposure, keep him breathing, if not breathing, INGESTION, give large amount of water, induce vomiting, consult physician. EYES, flush thoroughly with water for 15 min., call physician, immediately. SKIN, remove all contaminated clothing, flush affected area with large quantities of water, consult physician. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limit: Data not available 5.6 Toxicity by Ingestion, Grade 3 oral LD₅₀: 350 mg/kg rat 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Vapors are moderately irritating such that persons will not usually tolerate moderate or high concentrations. 5.9 Liquid or Solid Irritant Characteristics: Severe dermatitis if in contact with skin and if dried, severe burns on skin contact and very obnoxious to the eyes. 5.10 Odor Threshold: Data not available	

6 FIRE HAZARDS

- 6.1 Flash Point: 16.1°C
- 6.2 Flammable Limits in Air: Data not available
- 6.3 Fire Extinguishing Agents: Alcohol foam, dry chemical, carbon dioxide
- 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective
- 6.5 Special Hazards of Combustion Products: Toxic oxides of nitrogen may be formed in fire
- 6.6 Behavior in Fire: Vapor is heavier than air and may travel to a source of ignition and flashback. Container may explode in fire
- 6.7 Ignition Temperature: 712.1
- 6.8 Electrical Hazard: Data not available
- 6.9 Burning Rate: 6.15 m/min

7 CHEMICAL REACTIVITY

- 7.1 Reactivity with Water: No reaction
- 7.2 Reactivity with Common Materials: May corrode some metals in presence of water
- 7.3 Stability During Transport: Stable
- 7.4 Neutralizing Agents for Acids and Caustics: Flush with water
- 7.5 Polymerization: Not pertinent
- 7.6 Inhibitor of Polymerization: Not pertinent

8 WATER POLLUTION

- 8.1 Aquatic Toxicity: Data not available
- 8.2 Waterfowl Toxicity: Data not available
- 8.3 Biological Oxygen Demand (BOD): Data not available
- 8.4 Food Chain Concentration Potential: None

tert-BUTYLAMINE

Common Synonyms 2-Aminobutane 2-Amino-2-methylpropane 1,1-Dimethylethylamine IPA Trimethylaminomethane	Liquid Colorless Ammonia-like odor Floats and mixes with water. Flammable; irritating vapor is produced.
Fire	FLAMMABLE Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Extinguish with water spray or alcohol foam. Water may be ineffective.
Exposure	CAUTION: IRRITANT VAPOR Irritating to eyes, nose and throat. If inhaled, will cause difficult breathing. LIQUID Irritating to skin and eyes. Harmful if swallowed. If in contact with skin, wash with water. If swallowed, do not induce vomiting.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes.
1. RESPONSE TO DISCHARGE (See Response to Incidents Handbook, CG 444.4) Issue warning: high flammability and contaminant. Restrict access. Evacuate area. Direct and Push.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: 2-Aminobutane 2-Amino-2-methylpropane 1,1-Dimethylethylamine (IBA) Trimethylaminomethane 3.2 Coast Guard Compatibility Classification: Aliphatic amine 3.3 Chemical Formula: (C ₄ H ₉) ₃ NH 3.4 IMCO/United Nations Numerical Designation: 3.2 1993	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Like ammonia
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Self-contained breathing apparatus, goggles or face shield, rubber gloves. 5.2 Symptoms Following Exposure: Inhalation causes irritation of nose, mouth, and lungs. Ingestion causes irritation of mouth and stomach. Contact with liquid causes severe irritation of eyes and moderate irritation of skin. 5.3 Treatment for Exposure: INHALATION: move to fresh air, give artificial respiration if breathing has stopped. INGESTION: give large amounts of water and induce vomiting. EYES: immediately flush with water for at least 15 min; seek medical attention. SKIN: flush with water; wash with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 3 oral LD ₅₀ = 150 mg/kg (rat). 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.	

6. FIRE HAZARDS 6.1 Flash Point: 16°C 6.2 Flammable Limits in Air: 1.7 - 8.9% (at 21°C) 6.3 Fire Extinguishing Agents: Dry chemical, alcohol foam, carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective. 6.5 Special Hazards of Combustion Products: Toxic oxides of nitrogen may form in fire. 6.6 Behavior in Fire: 6.7 Ignition Temperature: 16°C 6.8 Electrical Hazard: Data not available. 6.9 Burning Rate: ~7 mm/min.	8. WATER POLLUTION 8.1 Aquatic Toxicity: Data not available. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: None.
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: Liquid will attack some forms of plastics. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Flush with water. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9. SELECTED MANUFACTURERS 1. Monsanto Company 900 N. Lindbergh Blvd. St. Louis, Mo. 63166 2. Eastman Organic Chemicals Patchogue, N.Y. 11769 3. March Chemical Co. 920 W. Saint Paul Avenue Milwaukee, Wis. 53233
11. HAZARD ASSESSMENT CODE (See Hazard Assessment Handbook, CG 148.3) A P Q R S	10. SHIPPING INFORMATION 10.1 Grades or Purities: 99+% 10.2 Storage Temperature: Ambient. 10.3 Inert Atmosphere: No requirement. 10.4 Venting: Open.
12. HAZARD CLASSIFICATIONS 12.1 Code of Federal Regulations: Flammable liquid. 12.2 NAS Hazard Rating for Bulk Water Transportation: Not listed. 12.3 NFPA Hazard Classifications: Not listed.	13. PHYSICAL AND CHEMICAL PROPERTIES 13.1 Physical State at 15°C and 1 atm: Liquid. 13.2 Molecular Weight: 73.14. 13.3 Boiling Point at 1 atm: 11.3°C = 45°C = 318°K. 13.4 Freezing Point: Not pertinent. 13.5 Critical Temperature: Data not available. 13.6 Critical Pressure: Data not available. 13.7 Specific Gravity: 0.696 at 20°C (liquid). 13.8 Liquid Surface Tension: 19 dynes/cm = 0.019 N/m at 20°C. 13.9 Liquid-Water Interfacial Tension: Not pertinent. 13.10 Vapor (Gas) Specific Gravity: 3.13. 13.11 Ratio of Specific Heats of Vapor (Gas): Data not available. 13.12 Latent Heat of Vaporization: 1670 Btu/lb = 92 kcal/g = 3.88 x 10 ⁵ J/kg. 13.13 Heat of Combustion: -17600 Btu/lb = -9790 cal/g = -410 x 10 ³ J/kg. 13.14 Heat of Decomposition: 13.15 Heat of Solution: 170 Btu/lb = 96 cal/g = 4.0 x 10 ⁵ J/kg. 13.16 Heat of Polymerization: Not pertinent.
NOTES (Continued on pages 5 and 6)	

BTN

BUTYLENE

Common Synonyms 1 Butene		Liquefied compressed gas Colorless Fragrant gasoline-like odor	
Floats and boils on water Flammable, visible vapor cloud is produced.			
Stop discharge if possible. Keep people away. Stop if you are alone and do not feel confident about the situation. Notify your supervisor and the fire department. Notify the local health department. Notify the local environmental agency.			
Fire		FLAMMABLE Flashback along vapor trail may occur Vapor may explode if ignited in an enclosed area May form explosive peroxide. May be ignited by static electricity.	
Exposure		VAPOR If inhaled, will cause dizziness and difficult breathing. May cause irritation to the eyes, nose, and throat. May cause frostbite. LIQUID Will cause frostbite. May cause irritation to the eyes, nose, and throat.	
Water Pollution		Not harmful to aquatic life May be dangerous if it enters water intakes.	
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: high flammability. Restrict access. Evacuate area.		2. LABEL 	
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: 1 Butene 3.2 Coast Guard Compatibility Classification: Other 3.3 Chemical Formula: C ₄ H ₈ 3.4 IMCO/United Nations Numerical Designation: 201012		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Compressed gas 4.2 Color: Colorless 4.3 Odor: Sweetish	
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Chemical goggles, gloves, self-contained breathing apparatus or organic canister. 5.2 Symptoms Following Exposure: May cause irritation, dizziness, or slight anesthesia at high vapor concentrations. Vapor concentrations are not usually a hazard at room temperature except in enclosed spaces. 5.3 Treatment for Exposure: INHALATION: Remove victim to fresh air and apply first aid as directed on label. EYES AND SKIN: Flush with water for at least 15 minutes. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Not pertinent. 5.7 Late Toxicity: None. 5.8 Vapor (Gas) Irritant Characteristics: Vapors are non-irritating to the eyes and throat. 5.9 Liquid or Solid Irritant Characteristics: No appreciable hazard. Physically harmful to the skin because it is very volatile and evaporates quickly. May cause frostbite. 5.10 Odor Threshold: Data not available.			

6 FIRE HAZARDS

- 6.1 Flash Point: Not pertinent
 6.2 Flammable Limits in Air: 1.6% - 10%
 6.3 Fire Extinguishing Agents: Stop flow of gas.
 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent.
 6.5 Special Hazards of Combustion Products: Not pertinent.
 6.6 Behavior in Fire: Containers may explode in fire. Vapor is heavier than air and may travel long distance to a source of ignition and flash back.
 6.7 Ignition Temperature: 1250°F
 6.8 Electrical Hazard: Not pertinent.
 6.9 Burning Rate: 8.8 mm/min.

8 WATER POLLUTION

- 8.1 Aquatic Toxicity: None.
 8.2 Waterway Toxicity: None.
 8.3 Biological Oxygen Demand (BOD): None.
 8.4 Food Chain Concentration Potential: None.

9 SELECTED MANUFACTURERS

1. Air Products and Chemicals, Inc., Allentown, Pa. 18105
 2. Gulf Oil Corp., Gulf Oil Chemicals Co., Division, Pittsburgh, Pa. 15230
 3. Petro-Tex Chemical Corp., Houston, Texas 77017

7 CHEMICAL REACTIVITY

- 7.1 Reactivity with Water: No reaction.
 7.2 Reactivity with Common Materials: No reaction.
 7.3 Stability During Transport: Stable.
 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent.
 7.5 Polymerization: Not pertinent.
 7.6 Inhibitor of Polymerization: Not pertinent.

10 SHIPPING INFORMATION

- 10.1 Grades or Purity: Data not available.
 10.2 Storage Temperature: Ambient.
 10.3 Inert Atmosphere: No requirements.
 10.4 Venting: Safety relief.

11 HAZARD ASSESSMENT CODE

(See Hazard Assessment Handbook, CG 446-3)
 A B C D E F G

12. HAZARD CLASSIFICATIONS

- 12.1 Code of Federal Regulations: Flammable compressed gas.
 12.2 NAS Hazard Rating for Bulk Water Transportation: Not listed.
 12.3 NFPA Hazard Classifications: Not listed.

13. PHYSICAL AND CHEMICAL PROPERTIES

- 13.1 Physical State at 15°C and 1 atm.: Gas.
 13.2 Molecular Weight: 56.10
 13.3 Boiling Point at 1 atm.: 20.7°C = 68.5°F = 268.9°K.
 13.4 Freezing Point: -22.7°C = -8.9°F = 250.5°K.
 13.5 Critical Temperature: 295.5°C = 544.5°F = 411.5°K.
 13.6 Critical Pressure: 58.4 psia = 39.7 atm = 4.02 MN/m².
 13.7 Specific Gravity: 0.595 at 20°C (liquid).
 13.8 Liquid Surface Tension: 12.5 dynes/cm = 0.0125 N/m at 20°C.
 13.9 Liquid-Water Interfacial Tension: 16.5 dynes/cm = 0.0165 N/m at 20°C.
 13.10 Vapor (Gas) Specific Gravity: 1.9.
 13.11 Ratio of Specific Heats of Vapor (Gas): 1.104.
 13.12 Latent Heat of Vaporization: 108 Btu/lb = 97.4 cal/g = 391 x 10³ J/kg.
 13.13 Heat of Combustion: -9.45° Btu/lb = -10.826 cal/g = -453.26 x 10³ J/kg.
 13.14 Heat of Decomposition: Not pertinent.
 13.15 Heat of Solution: Not pertinent.
 13.16 Heat of Polymerization: Not pertinent.

(Continued on pages 7 and 8)

NOTES

REVISED 1978

BTO

BUTYLENE OXIDE

Common Synonyms 1,2-Butylene oxide 1,2-Epoxybutane 1-Butene oxide Alpha-butylene oxide		Liquid	Colorless	Sharp odor
		Mixes with water		
<u>File</u>		FLAMMABLE Flashback along vapor trail may occur Vapor may explode if ignited in an enclosed area		
<u>Exposure</u>		VAPOR Irritating to eyes, nose and throat If inhaled will cause coughing or difficult breathing. LIQUID Will burn skin and eyes If swallowed will cause nausea and vomiting		
Water Pollution		Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 448-4) Issue warning: high flammability, air contaminant Protect: access Disperse and flush		2. LABEL 		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: 1-Butene oxide 1,2-Butylene oxide, alpha-Butylene oxide, 2-Epoxybutane 3.2 Coast Guard Compatibility Classification: Alkylene oxide 3.3 Chemical Formula: C ₄ H ₈ O 3.4 IMCO/United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 1. Physical State (as shipped): Liquid 2. Color: Colorless 3. Odor: Pungent		
5. HEALTH HAZARDS				
5.1 Personal Protective Equipment: Clean protective clothing, rubber gloves, chemical work goggles, self-contained breathing apparatus				
5.2 Symptoms Following Exposure: Inhalation: irritable odor and irritation, respiratory injury may occur at higher levels. Ingestion: causes irritation of mouth and stomach. Contact with eyes, liquid or vapor may cause burns of eyes. If inhaled, causes possible type of skin burn if free to evaporate. If confined to skin, burn may cause skin sensitization, not readily absorbed in toxic amounts.				
5.3 Treatment for Exposure: INHALATION: if any ill effects occur, immediately remove person to fresh air and get medical help; if breathing stops, start artificial respiration. INGESTION: induce vomiting promptly and get medical help. EYES: promptly flush with plenty of water for at least 15 min. and get medical help. SKIN: promptly flush with plenty of water, remove all contaminated clothing and wash before reuse.				
5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available				
5.5 Short-Term Inhalation Limits: Data not available				
5.6 Toxicity by Ingestion: Grade 2, oral LD ₅₀ = 1,410 mg/kg (rat)				
5.7 Late Toxicity: Data not available				
5.8 Vapor (Gas) Irritant Characteristics: Data not available				
5.9 Liquid or Solid Irritant Characteristics: Data not available				
5.10 Odor Threshold: Data not available

BHP

tert-BUTYL HYDROPEROXIDE

Common Synonyms Cubes T3H		Watery liquid	Colorless	Odorless
Floats and mixes slowly with water				
Fire		FLAMMABLE. May explode if subjected to heat, flame, or shock. May cause fire and explode on contact with combustibles. Vapor may explode if ignited in an enclosed area.		
Exposure		VAPOR: Irritating to eyes, nose and throat. LIQUID: Irritating to skin and eyes. Harmful if swallowed.		
Water Pollution		Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes.		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 44-4) Is not burning: high flammability. Reserve a case. Mechanical containment. Chemical and physical treatment.		2. LABELS  		
3. CHEMICAL DESIGNATIONS 2.1 Synonyms: Cubes T3H 2.2 Coast Guard Compatibility Classification: Not applicable 2.3 Chemical Formula: $(CH_3)_3COOH$ 3.4 IMCO/United Nations Numerical Designation: 2.2.2.2.2		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless to pale yellow 4.3 Odor: Data not available		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Goggles, well-fitting gloves, barrier cream. 5.2 Symptoms Following Exposure: Liquid causes severe burns of skin and eyes. 5.3 Treatment for Exposure: INGESTION: induce vomiting and follow with gastric lavage. INHALATION: remove individual from area, stimulated through a gas mask, breathe pure air and oxygen if needed. SKIN/EYE/NOSE/MOUTH CONTACT: Wash with lots of water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 1 skin irritant. 5.7 Late Toxicity: None. 5.8 Vapor (Gas) Irritant Characteristics: Vapor causes high irritation of the eye, respiratory system. In event of high concentrations, the eyes are irritated. 5.9 Liquid or Solid Irritant Characteristics: Powerful irritant to skin and eyes. 5.10 Odor Threshold: Data not available.				

6. FIRE HAZARDS

- 6.1 Flash Point: 100-110°C
- 6.2 Flammable Limits in Air: Not pertinent
- 6.3 Fire Extinguishing Agents: Dry chemical, foam or carbon dioxide
- 6.4 Fire Extinguishing Agents Not to be Used: None known

BTM

n-BUTYL MERCAPTAN

Common Synonyms n-Butyl Mercaptan	Liquid Colorless to yellow Skunk like odor Floats on water. Poisonous vapor is produced.
Fire	FLAMMABLE Irritating gases may be produced when heated. Containers may explode in fire. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area.
Exposure	VAPOR POISONOUS IF INHALED Irritating to eyes. LIQUID Irritating to skin and eyes. Harmful if swallowed.
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS Fouling to shoreline. May be dangerous if it enters water intakes.
1. RESPONSE TO DISCHARGE (See Response Methods Manual, CG 445-4) Issue warning - High flammability. Rear of access. Mechanical containment. Should be removed. Chemical and physical reaction.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: n-Butyl Mercaptan 3.2 Coast Guard Compatibility Classification: Not applicable. 3.3 Chemical Formula: C ₄ H ₉ SH 3.4 IMCO/United Nations Numerical Designation: 1112	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless to yellow 4.3 Odor: Strong skunk-like
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: May require complex respiratory protection apparatus. 5.2 Symptoms Following Exposure: Inhalation causes irritation to the respiratory tract, weakness, vomiting, and respiratory paralysis may develop. Irritation to the eyes may occur. Irritation to the skin may occur. 5.3 Treatment for Exposure: INHALATION: Remove from exposure area. Administer oxygen. If breathing is difficult, administer artificial respiration. EYES: Wash with plenty of water. SKIN: Wash with plenty of water. INGESTION: Do not induce vomiting. If swallowed, give water. 5.4 Toxicity by Inhalation (Threshold Limit Value): 100 ppm 5.5 Short-Term Inhalation Limit: Data not available. 5.6 Toxicity by Ingestion: Grade 1 - Irritant. Starting up to 100 ppm. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: 100 ppm

n-BUTYL METHACRYLATE

Common Synonym Methacrylic acid, butyl ester Butyl methacrylate Butyl 2-methylacrylate n-Butyl 2-methylacrylate	Liquid Colorless Mild odor Floats on water
Fire	Flammable Flash point: 100°F (38°C) Boiling point: 160°F (71°C) Freezing point: -100°F (-73°C) Vapor pressure: 1.5 mm Hg (20°C) Specific gravity: 0.85 (20°C) Refractive index: 1.41 (20°C) Density: 0.85 g/cm³ (20°C) Solubility: Insoluble in water Miscible with: acetone, alcohol, benzene, ether, gasoline, kerosene, oil, toluene, xylene
Exposure	Liquids Irritating to skin and eyes Harmful if swallowed Inhalation: Irritating to respiratory tract Ingestion: Irritating to gastrointestinal tract Skin contact: Irritating to skin
Water Pollution	Effect of low concentrations on aquatic life is unknown Fouling to shoreline May be dangerous if it enters water intakes
1. RESPONSE TO DISCHARGE See Response Manual Handbook, CG 446-4 Methacrylate is nonhazardous Should be removed Chemical and physical treatment	2. LABELS Not required by Code of Federal Regulations
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Methacrylic acid, butyl ester; Butyl methacrylate; Butyl 2-methylacrylate; Butyl alpha-methylacrylate; Butyl 2-methyl-2-propenoate 3.2 Coast Guard Compatibility Classification: A/B/Life 3.3 Chemical Formula: $CH_2=CHCO_2CH_2CH_2CH_2CH_3$ 3.4 IMCO/United Nations Numerical Designation: Not listed	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Mild odor, acrylate
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Not required except when using concentrated vapors 5.2 Symptoms Following Exposure: Irritation to eyes, nose, throat, and skin; dizziness; headache; nausea; vomiting; diarrhea; and skin rash 5.3 Treatment for Exposure: INHALATION: Remove to fresh air and administer first aid as required. EYES: Flush with copious amounts of water for 15 minutes and seek medical attention. SKIN: Wash with soap and water. INGESTION: Induce vomiting with a physical emetic 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 0 (LD ₅₀) Not available 5.7 Late Toxicity: Both defects in rats, gross and chronic effects in fish 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available	

6. FIRE HAZARDS 6.1 Flash Point: 100°F (38°C) 6.2 Flammable Limits in Air: 1.5% to 11.5% 6.3 Fire Extinguishing Agents: (1) Alcohol foam; carbon dioxide 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective 6.5 Special Hazards of Combustion Products: Not pertinent 6.6 Behavior in Fire: Containers may explode 6.7 Ignition Temperature: 160°F (71°C) 6.8 Electrical Hazard: Data not available 6.9 Burning Rate: 4.5 in/min	8. WATER POLLUTION 8.1 Aquatic Toxicity: Data not available 8.2 Waterflow Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): Data not available 8.4 Food Chain Concentration Potential: Not available								
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction 7.2 Reactivity with Common Materials: No reaction 7.3 Stability During Transport: Stable 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent 7.5 Polymerization: May occur when heated 7.6 Inhibitor of Polymerization: Hydroquinone, 20 ppm hydroquinone	9. BTP

p-tert-BUTYLPHENOL

Common Synonyms		Solid	White	Disinfectant like odor
		May float or sink in water		
Fire	Combustible			
Exposure	DUST Irritating to eyes, nose and throat If inhaled will cause difficult breathing			
	SOLID Will burn skin and eyes If swallowed will cause nausea and vomiting			
Water Pollution	Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes			
1. RESPONSE TO DISCHARGE See Response Methods Handbook, CG 446-4 Mechanical containment Should be removed Chemical and physical treatment		2. LABELS No hazard label required by Code of Federal Regulations		
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: No common synonyms 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: $C_{10}H_{14}O$ 3.4 IMCO/United Nations Numerical Designation: Not listed		4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: White 4.3 Odor: Aromatic		
5 HEALTH HAZARDS				
5.1 Personal Protective Equipment: Chemical workers goggles, clean hands, protective clothing				
5.2 Symptoms Following Exposure: Inhalation of vapors causes irritation of respiratory system. Ingestion causes irritation of mouth and stomach. Contact with eyes causes burns. Contact with dry skin causes severe frostbite. Skin contact with vapor causes moderate irritation, even a mild burn.				
5.3 Treatment for Exposure: INHALATION: move to fresh air, begin artificial respiration. Breathing has ceased: INGESTION: force milk or water and then immediate medical attention. Induce vomiting, treat symptomatically. EYES: immediately flush eyes with plenty of water for at least 15 minutes. Get medical attention promptly. SKIN: flush with plenty of water. Remove person's clothing if it is soiling.				
5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available				
5.5 Short-Term Inhalation Limits: Data not available				
5.6 Toxicity by Ingestion, Grade 2 (oral LD ₅₀): 2500 mg/kg rats				
5.7 Late Toxicity: Data not available				
5.8 Vapor (Gas) Irritant Characteristics: Data not available				
5.9 Liquid or Solid Irritant Characteristics: Data not available				
5.10 Odor Threshold: Data not available

		NOTES	

BUTYLTRICHLOROSILANE									
Common Synonyms: n-Butyltri-chlorosilane	Liquid Colorless Sharp, irritating odor Reacts violently with water. Irritating visible vapor cloud is produced.								
AVOID CONTACT WITH EYES OR SKIN. IF CONTACT OCCURS, WASH IMMEDIATELY WITH WATER AND CONSULT A PHYSICIAN. Wear goggles with side shields, chemical resistant gloves, and protective clothing. Avoid contact with skin. If liquid or vapor comes in contact with skin, wash immediately with plenty of water. If liquid or vapor gets into eyes, flush immediately with plenty of water. If swallowed, drink plenty of water. Do not induce vomiting. Seek medical attention if symptoms persist.									
Fire	Combustible POISONOUS GASES MAY BE PRODUCED IN FIRE. Extinguish with dry chemical, carbon dioxide, or foam. DO NOT USE WATER FOR FLOODING.								
Exposure	VAPOR Irritating to eyes, nose and throat. Harmful if inhaled. LIQUID Will burn skin and eyes. Harmful if swallowed. IF ONLY SKIN IS EXPOSED, Wash immediately with plenty of water. IF SWALLOWED, Drink plenty of water. IF INHALED, Move to fresh air. IF NECESSARY, Seek Medical Attention.								
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes.								
1. RESPONSE TO DISCHARGE (See Response Methods Manual Book CG 446-4) Evacuate area. Contain spill. Restrict access. Disperse and flush.									
2. LABEL  CORROSIVE									
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: n-Butyltri-chlorosilane 3.2 Coast Guard Competibility Classification: Not applicable 3.3 Chemical Formula: C₄H₉Cl₃Si 3.4 IMCO/United Nations Numerical Designation: 3.1.4*	4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Sharp hydrochloric acid like pungent and irritating								
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Avoid vapor type respiratory protection. Wear eye protection, gloves, and other protective equipment as necessary to protect skin and eyes. 5.2 Symptoms Following Exposure: Effects are irritative to eyes, upper respiratory system, throat, and lungs. Ingestion causes burns to mouth and stomach. 5.3 Treatment for Exposure: Seek medical attention at all exposures. If necessary, INHALATION: Remove from exposure and administer oxygen if required. EYES: Flush with water for 15 min. SKIN: Wash with water. INGESTION: Do NOT induce vomiting. Consult physician for treatment. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Data not available 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Thresh. old: Data not available									
6 FIRE HAZARDS 6.1 Flash Point: 100°F (38°C) 6.2 Flammable Limits in Air: Data not available 6.3 Fire Extinguishing Agents: Dry chemical or carbon dioxide 6.4 Fire Extinguishing Agents Not to be Used: Water spray 6.5 Special Hazards of Combustion Products: Hydrogen chloride, hydrogen sulfide, silicon tetrachloride may result 6.6 Behavior in Fire: Difficult to extinguish. Reactions may occur 6.7 Ignition Temperature: Data not available 6.8 Electrical Hazard: Data not available 6.9 Burning Rate: Data not available									
7 CHEMICAL REACTIVITY 7.1 Reactivity with Water: Reacts vigorously to generate hydrogen chloride fumes which are toxic 7.2 Reactivity with Common Materials: Will react with common metals such as aluminum, magnesium, and zinc to form flammable hydrogen gas 7.3 Stability During Transport: Stable 7.4 Neutralizing Agents for Acids and Caustics: Flush with water. Flush with weak ammonia solution if long time with acid 7.5 Polymerization: Not pertinent 7.6 Inhibitor of Polymerization: Not pertinent									
8 WATER POLLUTION 8.1 Aquatic Toxicity: Data not available 8.2 Waterfowl Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): Data not available 8.4 Foul Chain Concentration Potential: None

BAD

iso-BUTYRALDEHYDE

Common Synonyms 2-Methylpropanal Isobutyric aldehyde Isobutyraldehyde Isobutyraldehyde	Watery liquid Colorless Pleasant gasoline-like odor Floats and mixes slowly with water Flammable, irritating vapor is produced
Avoid contact with liquid and vapor. Keep people away. Wear goggles and self-contained breathing apparatus. Shut off ignition sources and call fire department. Stop discharge if possible. Stay upwind and use water spray to knock down vapor. Evacuate and remove downwind material. Notify local health and pollution control agencies.	
Fire	FLAMMABLE Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Wear goggles and self-contained breathing apparatus. Extinguish with dry chemical foam or a nondestructive water may be ineffective on fire. Cool exposed containers with water.
Exposure	CALL FOR MEDICAL AID VAPOR Irritating to eyes, nose and throat. If inhaled, will cause difficult breathing. Move to fresh air. If breathing has stopped, use artificial respiration. If breathing is difficult, give oxygen. LIQUID Irritating to skin. Will burn eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES: hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS: have victim drink water or milk.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and pollution control officials. Notify operators of nearby water intakes.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning - high flammability. Restrict access. Disperse and flush.	2. LABEL 
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Isobutyraldehyde Isobutyraldehyde Isobutyraldehyde 2-Methylpropanal 3.2 Coast Guard Compatibility Classification: Aldehyde 3.3 Chemical Formula: (C ₄ H ₈ O) 3.4 IMCO/United Nations Numerical Designation: 3.2 2045	4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Pungent
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Appropriate protective clothing including rubber gloves, rubber shoes and protective eyewear. 5.2 Symptoms Following Exposure: Vapor is irritating to the eyes and mucous membranes. 5.3 Treatment for Exposure: EYES: immediately flush with plenty of water for at least 15 min. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 2.0 (5 to 5 g/kg body wt). 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause a moderate irritation such that personnel will find high concentrations unpleasant. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain, may cause smarting and reddening of the skin. 5.10 Odor Threshold: 0.047 ppm	

6 FIRE HAZARDS 6.1 Flash Point: 11°F (C) - 40°F (C) 6.2 Flammable Limits in Air: 2.0% - 10.0% 6.3 Fire Extinguishing Agents: Foam, dry chemical or carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Data not available. 6.5 Special Hazards of Combustion Products: Not pertinent. 6.6 Behavior in Fire: Vapors are heavier than air and may travel considerable distance to a source of ignition and flash back. Fires are difficult to control due to severe re-ignition. 6.7 Ignition Temperature: 355°F 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: 4.8 mm/min	8. WATER POLLUTION 8.1 Aquatic Toxicity: Data not available. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): 162 lb/lb in 5 days. 8.4 Food Chain Concentration Potential: None.

n-BUTYRALDEHYDE

Common Synonyms Butyraldehyde Butaldehyde Butyric aldehyde Butanal Butylaldehyde	Watery liquid Colorless Pungent odor Floats and mixes slowly with water. Flammable, irritating vapor is produced.
Additional information: This chemical is highly flammable and reacts violently with strong oxidizing agents. It is also highly irritating to the eyes, skin, and respiratory system.	
Fire	FLAMMABLE. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area.
Exposure	CALL FOR MEDICAL AID. VAPOR Irritating to eyes, nose and throat. If inhaled, will cause nausea, vomiting, headache or loss of consciousness. LIQUID Irritating to skin. Will burn eyes. Harmful if swallowed.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook CG 446-4) Issue warning: highly flammable. Restrict access. Disperse and flush.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Butanal Butyraldehyde Butyric aldehyde Butyl aldehyde 3.2 Coast Guard Compatibility Classification: Aldehyde 3.3 Chemical Formula: $\text{CH}_3\text{CH}_2\text{CH}_2\text{CHO}$ 3.4 IMCO/United Nations Numerical Designation: 3.2 1129	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Pungent aldehyde; pungent and intense
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Protective goggles, gloves, and organic canister gas mask. 5.2 Symptoms Following Exposure: Inhalation will cause irritation and possibly nausea, vomiting, headache, and loss of consciousness. Contact with eyes causes burns. Skin contact may be irritating. 5.3 Treatment for Exposure: INHALATION: remove victim to fresh air; if breathing has stopped, give artificial respiration; if breathing is difficult, give oxygen; call a doctor at once. SKIN AND EYES: immediately flush with water for at least 15 min.; get medical care for eyes; remove contaminated clothing and wash underlying skin. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade I: 5-15 g/kg (rat). 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause moderate irritation such that personnel will find high concentrations unpleasant. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain, may cause smearing and reddening of the skin. 5.10 Odor Threshold: 0.0046 ppm.	

6. FIRE HAZARDS 6.1 Flash Point: 15°F (0°C - 20°F) (C.C.) 6.2 Flammable Limits in Air: 2.5% - 10.6% 6.3 Fire Extinguishing Agents: Dry chemical, carbon dioxide, foam. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Not pertinent. 6.6 Behavior in Fire: Vapors are heavier than air and may travel considerable distance to a source of ignition and flash back. Fires are difficult to control due to ease of reignition. 6.7 Ignition Temperature: 446°F. 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: 4.4 mm/min.	8. WATER POLLUTION 8.1 Aquatic Toxicity: Data not available. 8.2 Waterlow Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): 1.62 lb/lb 5 days, 106% 5 days (theor.). 8.4 Food Chain Concentration Potential: Data not available.																																				
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: None. 7.2 Reactivity with Common Materials: None. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent. 7.5 Polymerization: May occur in presence of heat, acids, or alkalis. 7.6 Inhibitor of Polymerization: Not pertinent.	9. SELECTED MANUFACTURERS 1. Dow Chemical Co. Williamsburg, VA 23185 2. Eastman Kodak Co. Texas Eastman Division Longview, Texas 75601 3. Union Carbide Corp. Chemicals and Plastics Division 270 Park Ave. New York, N.Y. 10017

n-BUTYRIC ACID

Common Synonyms Butanoic acid Butanoic acid Ethylacetic acid Propanecarboxylic acid Butyric acid	Liquid Colorless Pungent butter odor Floats and mixes with water Freezing point is 23°F	Butanoic acid Butanoic acid Ethylacetic acid Propanecarboxylic acid Butyric acid
Fire	Combustible	Butanoic acid Butanoic acid Ethylacetic acid Propanecarboxylic acid Butyric acid
Exposure	CALL FOR MEDICAL AID	Butanoic acid Butanoic acid Ethylacetic acid Propanecarboxylic acid Butyric acid
Water Pollution	Dangerous to aquatic life in high concentrations May be dangerous if it enters water intakes	Butanoic acid Butanoic acid Ethylacetic acid Propanecarboxylic acid Butyric acid
1. RESPONSE TO DISCHARGE	2. LABEL	
3. CHEMICAL DESIGNATIONS	4. OBSERVABLE CHARACTERISTICS	Butanoic acid Butanoic acid Ethylacetic acid Propanecarboxylic acid Butyric acid
31 Synonyms: Butanoic acid Butanoic acid Butyric acid Ethylacetic acid Propanecarboxylic acid 32 Coast Guard Compatibility Classification: Organic acid 33 Chemical Formula: <chem>CH3CH2CH2COOH</chem> 34 IMCO/United Nations Chemical Designation: Not listed	41 Physical State (as shipped): Liquid 42 Color: Clear 43 Odor: Rancid disagreeable strong penetrating like rancid butter	Butanoic acid Butanoic acid Ethylacetic acid Propanecarboxylic acid Butyric acid
5. HEALTH HAZARDS		
51 Personal Protective Equipment: Self contained breathing apparatus, rubber gloves, vapor proof plastic goggles, impervious apron and boots 52 Symptoms Following Exposure: Inhalation causes irritation of mucous membrane and respiratory tract; may cause nausea and vomiting. Ingestion causes irritation of mouth and stomach. Contact with eyes may cause serious injury. Contact with skin may cause burns; chemical is readily absorbed through the skin and may cause damage by its source. 53 Treatment for Exposure: INHALATION: remove victim to fresh air; give oxygen if breathing is difficult; call a physician. INGESTION: give large amount of water and induce vomiting. EYES: irrigate with water for 15 min. and get medical attention. SKIN: flush affected areas immediately and thoroughly with water. 54 Toxicity by Inhalation (Threshold Limit Value): Data not available 55 Short-Term Inhalation Limits: Data not available 56 Toxicity by Ingestion: Grade 2 Oral LD₅₀ (Rat) 2 g/kg (rat) 57 Late Toxicity: Data not available 58 Vapor (Gas) Irritant Characteristics: Vapor is a strong irritant in such that it causes temporary blindness. 59 Liquid or Solid Irritant Characteristics: Rancid irritant. May cause pain and second degree burns after a few minutes. 510 Odor Threshold: 0.002 ppm		

6. FIRE HAZARDS 6.1 Flash Point: 166°F (74°C) 110°F (43°C) 6.2 Flammable Limits In Air: 2.1% - 13.4 6.3 Fire Extinguishing Agents: Dry chemical, alcohol, foam, carbon dioxide 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective 6.5 Special Hazards of Combustion Products: 6.6 Behavior in Fire: 6.7 Ignition Temperature: 842°F 6.8 Electrical Hazard: Data not available 6.9 Burning Rate: 2.7 mm/min	8. WATER POLLUTION 8.1 Aquatic Toxicity: 400 ppm = trout lethal, fresh water 200 ppm 24 hr bluegill 11 m fresh water *Time period not specified 8.2 Waterfowl Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): 1150 lb. 5 days 1150 lb. 20 days 8.4 Food Chain Concentration Potential: Seafowl may be tainted following a spill but chemical does not concentrate in food chain

NOTES	

CADMIUM BROMIDE

Common Synonyms: Cadmium bromide tetrahydrate		Solid	White	Odorless
		Mixes with water		
AVOID CONTACT WITH SKIN AND EYES IN KIEFFER ASSAY Wear dust respirator and gloves. Avoid contact with skin and eyes. Do not breathe vapors. Do not get material on face, neck, or in eyes. If contact occurs, flush with water.				
Fire		Not flammable POISONOUS GASES MAY BE PRODUCED IN FIRE Wear goggles and gloves.		
		CAUTION: MEDICAL AID DUST POISONOUS IF INHALED If inhaled will cause coughing or difficult breathing. If inhaled, remove person to fresh air. If breathing is difficult, give artificial respiration. If swallowed, give milk or water to drink. If on skin, wash with soap and water. SOLID POISONOUS IF SWALLOWED Irritating to skin and eyes. If swallowed will cause nausea, vomiting and loss of consciousness. Remove contaminated clothing and shoes. Flush affected areas with copious amounts of water. IF IN EYES, flush eyes open with water for 15 minutes. IF SWALLOWED, do not induce vomiting. If conscious, drink water. If unconscious, do not give anything by mouth. IF SWALLOWED, give 1-2 glasses of water to drink. If unconscious, give 1-2 glasses of water to drink.		
Exposure				
Water Pollution		Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Do not pour down drain or into water. Do not pour down drain or into water.		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 646-4) Issue warning: water contaminant Disperse and flush		2. LABELS No hazard label required by Code of Federal Regulations		
3. 5 HEALTH HAZARDS

- 51 **Personal Protective Equipment:** Dust mask, goggles or face shield, rubber gloves
- 52 **Symptoms Following Exposure:** Inhalation causes coughing, sneezing, symptoms of lung damage. Ingestion produces severe toxic symptoms. Both kidneys and liver injuries may occur. Contact with eyes causes irritation.
- 53 **Treatment for Exposure:** INHALATION: remove patient to fresh air, seek medical attention. INGESTION: induce vomiting, allow stimulation by giving milk or egg whites at frequent intervals, perform gastric lavage, seek medical attention. EYES: flush with water for at least 15 min.
- 54 **Toxicity by Inhalation (Threshold Limit Value):** 0.2 mg/m³ as cadmium
- 55 **Short-Term Inhalation Limits:** Data not available
- 56 **Toxicity by Ingestion:** Grade 4 LD₅₀ < 50 mg/kg
- 57 **Late Toxicity:** Delayed liver, kidney, and lung damage has followed respiratory exposure to cadmium salts in industry.
- 58 **Vapor (Gas) Irritant Characteristics:** Data not available
- 59 **Liquid or Solid Irritant Characteristics:** Data not available
- 510 **Odor Threshold:** Data not available

NOTES

CADMIUM CHLORIDE

Common Synonyms	Solid crystals White Odorless Sinks and mixes with water
To life and limb, in the highest measure. No hazard and no pollution.	
Fire	Not flammable
Exposure	CALL FOR MEDICAL AID SOLID Harmful if swallowed. IF SWALLOWED, DO NOT INDUCE VOMITING. Have victim drink water or milk. Have victim swallow solid contents. IF SWALLOWED, DO NOT INDUCE VOMITING OR HAVE CONVERSATION. Do not eat or drink. Keep victim warm.
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS. May be dangerous if it enters water intakes. Not a local hazard and no pollution. Not a respiratory or aquatic water intake.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: water contaminant. Should be removed.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: No common synonyms. 3.2 Coast Guard Compatibility Classification: Not applicable. 3.3 Chemical Formula: CdCl ₂ 3.4 IMCO United Nations Numerical Designation: Not listed.	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Crystalline solid. 4.2 Color: White. 4.3 Odor: Odorless.
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Safety glasses, rubber gloves, and respirator with proper filter. 5.2 Symptoms Following Exposure: Ingestion causes gastrointestinal distress, pain and penetration. Nervous disturbances, liver injury, and convulsions have been observed in severe intoxications. 5.3 Treatment for Exposure: INGESTION: induce vomiting and follow with castor oil. Have a saline cathartic and demulcents. Consider nasogastric intubation and fluid therapy. CANCER: ED ₀₁ has been effective in acutely poisoned animals and in a few humans. BAL has been found to be effective in animal experiments to justify its use in human intoxication. Since the BAL sodium complex has a nephrotoxic action, the physician will have to decide whether or not to use this salt. 5.4 Toxicity by Inhalation (Threshold Limit Value): 2 ppm 5.5 Short-Term Inhalation Limits: Not pertinent. 5.6 Toxicity by Ingestion: Grade 4 LD ₅₀ below 50 mg/kg. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Not pertinent. 5.9 Liquid or Solid Irritant Characteristics: Causes smarting of the skin and first degree burns on short exposure; may cause second degree burns on long exposure. 5.10 Odor Threshold: Not pertinent.	

6. FIRE HAZARDS 6.1 Flash Point: Not flammable. 6.2 Flammable Limits in Air: Not flammable. 6.3 Fire Extinguishing Agents: Not pertinent. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Not pertinent. 6.6 Behavior in Fire: Not pertinent. 6.7 Ignition Temperature: Not flammable. 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: Not flammable.	8. WATER POLLUTION 8.1 Aquatic Toxicity: 150 ppm. White blood cell in fresh water. 8.2 Waterfowl Toxicity: LC50 >5000 ppm. 8.3 Biological Oxygen Demand (BOD): Not pertinent. 8.4 Food Chain Concentration Potential: Not pertinent.
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: No reaction. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9. NOTES	

CFB

CADMIUM FLUOROBORATE

Common Synonyms Cadmium fluoroborate Cadmium fluoroborate solution	Liquid Colorless Odorless Sinks and mixes with water
AVOID CONTACT WITH DUST AND VAPOR. KEEP PEOPLE AWAY. Wear goggles and wear a respirator if there is a possibility of exposure. In case of emergency, call for medical attention. Notify your health and safety officer.	
Fire	Not flammable POISONOUS GASES MAY BE PRODUCED IN FIRE. Wear goggles and wear a respirator if there is a possibility of exposure.
 Exposure	CALL FOR MEDICAL AID VAPOR POISONOUS IF INHALED If inhaled will cause coughing or difficult breathing. If inhaled, remove person to fresh air. If breathing is difficult, give oxygen. LIQUID Irritating to skin and eyes. Harmful if swallowed. If swallowed, do not induce vomiting. Give person 1-2 glasses of water. If INGESTED, do not induce vomiting. Give person 1-2 glasses of water. If SWALLOWED, do not induce vomiting. Give person 1-2 glasses of water. If SWALLOWED, do not induce vomiting. Give person 1-2 glasses of water. If SWALLOWED, do not induce vomiting. Give person 1-2 glasses of water.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify your health and safety officer.
1. RESPONSE TO DISCHARGE See Response Methods Handbook, CG 446-4. Issue warning: water contains heat. Dispense and flush.	2. LABELS No hazard label required by Code of Federal Regulations.
3. COX

CADMIUM OXIDE

Common Synonyms Cadmium fume		Solid	Yellow brown	Odorless
Sinks in water				
Not flammable POISONOUS GASES MAY BE PRODUCED IN FIRE.				
Fire				
		DUST POISONOUS IF INHALED If inhaled will cause coughing.		
Exposure		SOLID Irritating to skin and eyes. If swallowed will cause nausea and vomiting.		
Water Pollution		Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes.		
1. RESPONSE TO DISCHARGE See Response Summary paragraph CG 446.4. Should be removed. Chemical and physical treatment.		2. LABELS See Hazard Label required by Code of Federal Regulations.		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Cadmium fume 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: (Cd) 3.4 IMCO/United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: Yellow brown to brown 4.3 Odor: None		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: BA. Must use approved respirator, goggles, rubber gloves. 5.2 Symptoms Following Exposure: A single exposure to cadmium oxide fumes can cause severe or fatal lung irritation. Chronic poisoning is characterized by lung injury, emphysema, and kidney dysfunction. Ingestion produces severe toxic effects. Both kidney and liver damage may occur. Contact with eyes causes irritation. 5.3 Treatment for Exposure: INHALATION: If there has been known exposure to dense cadmium oxide fume or cough, chest tightness, or respiratory distress occur after possible exposure, place patient at bed rest and call a physician. INGESTION: Induce vomiting, stop irritation by giving milk or egg whites at frequent intervals, perform gastric lavage, seek medical attention. EYES: Flush with water for at least 15 min. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.1 mg/m ³ 5.5 Short-Term Inhalation Limit: 0.1 mg/m ³ 10 min 5.6 Toxicity by Ingestion: Oral LD ₅₀ rat 110 mg/kg 5.7 Late Toxicity: Delayed liver, lung, and kidney damage has followed respiratory exposures to cadmium oxide in rodents. 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available

CCA

CALCIUM ARSENATE

Common Synonyms Tricalcium arsenate Tricalcium ortho arsenate Cucumber dust		Solid	White	Odorless
Sinks in water				
AVOID CONTACT WITH SOLID AND DUST. KEEP PEOPLE AWAY. Wear eye protection. Stop breathing apparatus. Wear gloves and protective clothing. Wash thoroughly after handling.				
Fire	Not flammable POISONOUS GASES MAY BE PRODUCED IN FIRE Wear goggles and face shield if breathing apparatus			
 Exposure	CALL FOR MEDICAL AID DUST POISONOUS IF INHALED. If inhaled will cause coughing or difficult breathing. Pneumonia, bronchitis, and other respiratory diseases may result from dust inhalation. SOLID POISONOUS IF SWALLOWED If swallowed will cause nausea and vomiting. Rinse mouth thoroughly with water. If swallowed, do not induce vomiting. If in EYES, flush with water for 15 minutes with plenty of water. If SWALLOWED, do not induce vomiting. Give milk or water to drink. If SWALLOWED, do not induce vomiting. Give milk or water to drink. If SWALLOWED, do not induce vomiting. Give milk or water to drink.			
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes. Not listed as a water pollutant. Not listed as a water pollutant.			
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CC-14) Issue warning - poison, water contaminant Restrict access Should be removed Chemical and physical treatment		2. LABEL 		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Cucumber dust Tricalcium arsenate Tricalcium orthoarsenate 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: $\text{Ca}_3(\text{AsO}_4)_2$ 3.4 IMCO/United Nations Numerical Designation: 6.1 1573		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: White 4.3 Odor: None		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Dust mask, goggles or face shield, protective gloves 5.2 Symptoms Following Exposure: Inhalation causes respiratory irritation. Ingestion causes irritation of mouth and stomach. Contact with eyes causes irritation. 5.3 Treatment for Exposure: INHALATION: move to fresh air. INGESTION: give victim one tablespoonful of salt in glass of water, repeat until vomit is clear, then give 2 tablespoonfuls of 1% pepsin solution or milk of magnesia and force fluids; call a physician in all cases of suspected poisoning. EYES: flush with water for at least 15 min. SKIN: flush with water, wash with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): 1 mg/m^3 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 4 oral rat $\text{LD}_{50} = 20 \text{ mg/kg}$ 5.7 Late Toxicity: Arsenic compounds may cause skin and lung cancer 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available				

6. FIRE HAZARDS 6.1 Flash Point: Not flammable 6.2 Flammable Limits in Air: Not flammable 6.3 Fire Extinguishing Agents: Not pertinent 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent 6.5 Special Hazards of Combustion Products: Toxic arsenic fume may be formed in fires 6.6 Behavior in Fire: 6.7 Ignition Temperature: Not pertinent 6.8 Electrical Hazard: Not pertinent 6.9 Burning Rate: Not pertinent	8. WATER POLLUTION 8.1 Aquatic Toxicity: 1.1 ppm/48 hr/perch/toxic/fresh water 4.3 ppm/264 hr/crabs/toxic/fresh water 8.2 Waterfowl Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): None 8.4 Food Chain Concentration Potential: Possible bioaccumulation problem
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction 7.2 Reactivity with Common Materials: 7.3 Stability During Transport: Stable 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent 7.5 Polymerization: Not pertinent 7.6 Inhibitor of Polymerization: Not pertinent	9. NOTES	

CALCIUM CARBIDE

Common Synonyms Carbide Acetylenes	Solid granules Grey to bluish black Garlic odor Sinks in water, and bubbles appear on surface as flammable gas is produced
No toxic fumes, vapors, or dusts. Short-term exposure to dust may irritate eyes. Avoid contact with skin. If gas escapes, move away. No toxic health or pollution hazard.	
Fire	Not flammable FLAMMABLE, EXPLOSIVE GAS IS PRODUCED ON CONTACT WITH WATER Extinguish by DO NOT USE WATER OR FOAM ON VESSEL FIRES
Exposure	CALL FOR MEDICAL AID SOLID Irritating to skin and eyes Run water over face if the gas escapes. Flush contact of eyes with plenty of water. IF IN EYES, FLUSH EYES FOR AT LEAST 15 MIN.
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS No toxic substances are known to be released.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 448-4) Issue warning - high flammability. Should be removed. Chemical and physical treatment.	2. LABELS  
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Acetylenes Carbide 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: CaC_2 3.4 IMCO/United Nations Numerical Designation: 4.3/1402	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: Grey to bluish black 4.3 Odor: Garlic like
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Chemical safety goggles and (for those exposed to unusually dusty operations) a respirator such as those approved by the U.S. Bureau of Mines for nuisance dusts. 5.2 Symptoms Following Exposure: Eye and skin irritation. 5.3 Treatment for Exposure: INHALATION OF DUST: remove from further exposure and call a doctor. SKIN: wash with plenty of water. EYES: flush with clean running water at an eye wash fountain for at least 15 min. and get medical attention. 5.4 Toxicity by Inhalation (Threshold Limit Value): Not pertinent. 5.5 Short-Term Inhalation Limits: Not pertinent. 5.6 Toxicity by Ingestion: Data not available. 5.7 Late Toxicity: None. 5.8 Vapor (Gas) Irritant Characteristics: None. 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled in clothing and allowed to remain may cause smarting and reddening of the skin. 5.10 Odor Threshold: Not pertinent.	

6. FIRE HAZARDS 6.1 Flash Point: Not flammable. 6.2 Flammable Limits in Air: Not flammable. 6.3 Fire Extinguishing Agents: Dry powder preferably allow fire to burn. 6.4 Fire Extinguishing Agents Not to be Used: Water, vaporizing liquid or foam, carbon dioxide. 6.5 Special Hazards of Combustion Products: Not pertinent. 6.6 Behavior in Fire: If wet by water, highly flammable acetylene gas is formed. 6.7 Ignition Temperature: Not flammable. 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: Not flammable.	8. WATER POLLUTION 8.1 Aquatic Toxicity: Not pertinent. 8.2 Waterfowl Toxicity: Not pertinent. 8.3 Biological Oxygen Demand (BOD): Not pertinent. 8.4 Food Chain Concentration Potential: None.										
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: Reacts vigorously with water to form the highly flammable acetylene gas, which may ignite spontaneously. 7.2 Reactivity with Common Materials: Reacts with copper and brass to form explosive compound. 7.3 Stability During Transport: Stable in absence of moisture. 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9. CCC

CALCIUM CHLORATE

Common Synonyms		Solid	White	Odorless
		Sinks and mixes with water.		
Calcium Chlorate A. per. ch. was 1. Chlorate is a strong oxidant 2. Active with fish and pollution control agencies				
Fire	Not flammable. May explode on contact with combustibles Irritating gases may be produced when heated Combat fires from safe distance or protect fire from Flood discharge area with water			
Exposure	Call for medical aid DUST Irritating to eyes, nose and throat Move victim to fresh air For eyes: hold closed and flush with plenty of water SOLID Irritating to skin and eyes Harmful if swallowed Remove contaminated clothing and shoes Flush contaminated areas with plenty of water If IN EYES: hold eyelids open and flush with plenty of water If SWALLOWED: do not induce vomiting. Have victim drink water or milk and have victim seek medical attention If SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS: do not induce vomiting. Call for medical aid			
Water Pollution	Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes Notify health authorities if wildlife affected Notify operators of nearby water intakes			
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 445-3) Issue warning - oxidizing material water contaminant Should be removed Chemical and physical treatment Disperse and flush		2. LABEL 		
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: No common synonyms 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: $\text{Ca}(\text{ClO}_3)_2$ 3.4 IMCO/United Nations Numerical Designation: 511452		4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: White 4.3 Odor: None		
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Goggles or face shield, dust respirator, coveralls or other protective clothing 5.2 Symptoms Following Exposure: Inhalation of dust causes irritation of upper respiratory system. Dust irritates eyes and skin. Ingestion causes abdominal pain, nausea, vomiting, diarrhea, pallor, shortness of breath, unconsciousness 5.3 Treatment for Exposure: INHALATION: remove to fresh air. EYES: flush with water for 1 min. SKIN: flush with water. INGESTION: induce vomiting and get medical attention 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 2 oral $\text{LD}_{50} = 4,500 \text{ mg/kg (rat)}$ 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Not pertinent 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Not pertinent				

6 FIRE HAZARDS 6.1 Flash Point: Not flammable but may cause fire with other materials 6.2 Flammable Limits in Air: Not pertinent 6.3 Fire Extinguishing Agents: Flood with water 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent 6.5 Special Hazards of Combustion Products: Not pertinent 6.6 Behavior in Fire: When involved in a fire may cause an explosion. Irritating gases may be generated when heated 6.7 Ignition Temperature: Not pertinent 6.8 Electrical Hazard: Not pertinent 6.9 Burning Rate: Not pertinent	8 WATER POLLUTION 8.1 Aquatic Toxicity: Data not available 8.2 Waterfowl Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): None 8.4 Food Chain Concentration Potential: None
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction 7.2 Reactivity with Common Materials: May form an explosive mixture with finely divided combustible material. The mixture may ignite when rubbed 7.3 Stability During Transport: Stable 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent 7.5 Polymerization: Not pertinent 7.6 Inhibitor of Polymerization: Not pertinent	9 SELECTED MANUFACTURERS 1 Cera, Inc. CLC

CALCIUM CHLORIDE

Common Synonyms Calcium chloride, anhydrous Calcium chloride hydrates		Solid or water solution	White to off-white	Odorless
Sinks and mixes with water				
Avoid contact with liquid and solid. Keep people away. Wear rubber overalls, including gloves. Stop discharge at possible. Isolate and remove discharge on a trail. Notify local health and safety authorities.				
Fire		Not flammable		
Exposure		CALL FOR MEDICAL AID SOLUTION OR SOLID Will burn skin and eyes. If swallowed will cause nausea and vomiting. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED, do not induce vomiting. If conscious, have victim drink water. IF SWALLOWED, do not induce vomiting. If unconscious or having convulsions, do not give anything by mouth.		
Water Pollution		Dangerous to aquatic life in high concentrations. May be dangerous if it enters water intakes. Notify local health and safety authorities. Notify operators of nearby water intakes.		
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Disperse and flush		2. LABELS No hazard label required by Code of Federal Regulations		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Calcium chloride anhydrous; Calcium chloride hydrates. 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: $\text{CaCl}_2 \cdot x\text{H}_2\text{O}$ where $x = 0$ to 6 3.4 IMCO/United Nations Numerical Designation: Not listed		4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid or water solution 4.2 Color: White to off white 4.3 Odor: None		
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Safety glasses or face shield; dust type respirator; rubber gloves 5.2 Symptoms Following Exposure: Inhalation causes irritation of nose and throat. Ingestion causes irritation of mouth and stomach. Contact with eyes (particularly by dust) causes irritation and possible transient corneal injury. Contact of solid with dry skin causes mild irritation. Strong solutions can cause marked irritation or even a superficial burn. 5.3 Treatment for Exposure: INHALATION: move to fresh air; if discomfort persists, get medical attention. INGESTION: give large amounts of water. EYES: promptly flush with water and continue washing for at least 15 min.; consult an ophthalmologist. SKIN: flush with water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 2, oral $\text{LD}_{50} = 1,000 \text{ mg/kg (rats)}$ 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available

CCN

CALCIUM CYANIDE

Common Synonyms Cyanide of calcium		Solid	White to gray or black	Almond odor
		Sinks and mixes with water		
AVOID CONTACT WITH SOLID FLOOD AROUND WASH OFF IMMEDIATELY IF ON SKIN OR CLOTHING IF IN EYES, FLUSH WITH WATER IF SWALLOWED, DO NOT INDUCE VOMITING				
Fire		Not flammable POISONOUS GASES ARE PRODUCED WHEN HEATED DO NOT USE WATER TO EXTINGUISH FIRE ON DISCRIPTION ADD WATER TO PUT OUT		
		CALL FOR MEDICAL AID DUST POISONOUS IF INHALED Irritating to eyes, nose and throat May cause death IF INHALED, MOVE TO FRESH AIR IMMEDIATELY IF IN EYES, FLUSH WITH WATER IF SWALLOWED, DO NOT INDUCE VOMITING		
Exposure		SOLID POISONOUS IF SWALLOWED Irritating to skin and eyes IF SWALLOWED, DO NOT INDUCE VOMITING IF IN EYES, FLUSH WITH WATER IF SWALLOWED, DO NOT INDUCE VOMITING IF SWALLOWED, DO NOT INDUCE VOMITING		
Water Pollution		HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS MAY BE DANGEROUS IF IT ENTERS WATER INTAKES N/A		
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: poison air contaminant, water contaminant Restrict access Evacuate area Should be removed Chemical and physical treatment		2. LABEL 		
3 CHEMICAL DESIGNATIONS 31 Synonyms: Cyanide of Calcium Cyanogas G Fumigan, Cyanogas A Dust 32 Coast Guard Compatibility Classification: Not applicable 33 Chemical Formula: Ca(CN) ₂ plus inert ingredients 34 IMCO/United Nations Numerical Designation: 6.1/1575		4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: White to gray to black 4.3 Odor: Compound reacts with moisture in air to form hydrogen cyanide gas which has a characteristic almond like odor		
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Self contained breathing apparatus and full protective clothing including rubber footwear 5.2 Symptoms Following Exposure: Inhalation or ingestion causes headache, nausea, vomiting and weakness, high concentrations are rapidly fatal 5.3 Treatment for Exposure: Call a doctor immediately. INHALATION: break amyl nitrite pearl in cloth and hold tightly under nose for 15 sec., repeat 5 times at 15 sec. intervals, use artificial respiration if breathing stops. EYES: flush with water for 15 min. do not allow water to enter nose or mouth. SKIN: flush with water, do not allow water to enter nose or mouth. INGESTION: break an amyl nitrite pearl in a cloth and hold tightly under nose for 15 sec. if patient is conscious induce vomiting and repeat until vomit is clear. repeat inhalation of amyl nitrite 5 times at 15 sec. intervals, use artificial respiration if breathing has stopped 5.4 Toxicity by Inhalation (Threshold Limit Value): 5 mg./m. (as cyanide) 5.5 Short-Term Inhalation Limits: 5 mg./m. for 30 min 5.6 Toxicity by Ingestion: Grade 4, oral LD ₅₀ = 39 mg./kg. (rat) 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Not pertinent				

6 FIRE HAZARDS

- 6.1 **Flash Point:** Not flammable
 6.2 **Flammable Limits in Air:** Not flammable
 6.3 **Fire Extinguishing Agents:** Use dry
 chemical, sand or earth on adjacent fires
 6.4 **Fire Extinguishing Agents Not to be Used:**
 Do not use water or carbon dioxide on
 adjacent fires
 6.5 **Special Hazards of Combustion Products:**
 Decomposes in fire to give very toxic
 gases including hydrogen cyanide
 6.6 **Behavior in Fire:** Not pertinent
 6.7 **Ignition Temperature:** Not pertinent
 6.8 **Electrical Hazard:** Not pertinent
 6.9 **Burning Rate:** Not pertinent

8 WATER POLLUTION

- 8.1 **Aquatic Toxicity:**
 0-12 ppm 96 hr. sunfish/11 m. fished
 water
 >25 ppm 48 hr. cockle/14% salt water
 8.2 **Waterlow Toxicity:** Data not available
 8.3 **Biological Oxygen Demand (BOD):**
 Data not available
 8.4 **Flood Chain Concentration Potential:**
 None

9. SELECTED MANUFACTURERS

- 1 American Cyanamid Co.
 Agricultural Division
 P.O. Box 400
 Princeton, N.J. 08540
 2 Pfaltz and Bauer, Inc.
 126-04 Northern Boulevard
 Flushing, N.Y. 11368

7 CHEMICAL REACTIVITY

- 7.1 **Reactivity with Water:** Releases very
 poisonous hydrogen cyanide gas slowly
 on contact with water. Release is rapid if
 acid is also present
 7.2 **Reactivity with Common Materials:**
 No reaction
 7.3 **Stability During Transport:** Stable if kept dry
 7.4 **Neutralizing Agents for Acids and
 Caustics:** Not pertinent
 7.5 **Polymerization:** Not pertinent
 7.6 **Inhibitor of Polymerization:** Not pertinent

10. SHIPPING INFORMATION

- 10.1 **Grades or Purity:** 42% with 58% inert
 ingredients. May contain up to 1%
 calcium carbide which releases
 flammable acetylene gas when wet
 10.2 **Storage Temperature:** Ambient
 10.3 **Inert Atmosphere:** No requirement
 10.4 **Venting:** Sealed containers in well
 ventilated area

11 HAZARD ASSESSMENT CODE

(See Hazard Assessment Handbook, CG 446-3)
 SS

12 HAZARD CLASSIFICATIONS

- 12.1 **Code of Federal Regulations:**
 Poisonous class B
 12.2 **NAS Hazard Rating for Bulk Water
 Transportation:** Not listed
 12.3 **NFPA Hazard Classifications:**
- | Category | Classification |
|----------------------|----------------|
| Health Hazard (Blue) | 3 |
| Flammability (Red) | 0 |
| Reactivity (Yellow) | 0 |

13. PHYSICAL AND CHEMICAL PROPERTIES

- 13.1 **Physical State at 15°C and 1 atm:** Solid
 13.2 **Molecular Weight:** 92
 13.3 **Boiling Point at 1 atm:** Decomposes
 13.4 **Freezing Point:** Not pertinent
 13.5 **Critical Temperature:** Not pertinent
 13.6 **Critical Pressure:** Not pertinent
 13.7 **Specific Gravity:** 1.353 at 20°C (solid)
 13.8 **Liquid Surface Tension:** Not pertinent
 13.9 **Liquid-Water Interfacial Tension:**
 Not pertinent
 13.10 **Vapor (Gas) Specific Gravity:**
 Not pertinent
 13.11 **Ratio of Specific Heats of Vapor (Gas)**
 Not pertinent
 13.12 **Latent Heat of Vaporization:**
 Not pertinent
 13.13 **Heat of Combustion:** Not pertinent
 13.14 **Heat of Decomposition:** Not pertinent
 13.15 **Heat of Solution:** 264 Btu/lb
 = 147 cal/g = 6.14 x 10³ J/kg
 13.16 **Heat of Polymerization:** Not pertinent

CALCIUM HYDROXIDE

Common Synonyms Slaked lime	Solid granules	White	Odorless
Sinks in water			
Available in various grades. Keep away from children. When exposed to air it reacts with carbon dioxide and moisture to form calcium carbonate. Do not breathe dust or fumes. Do not get in eyes, nose, mouth or on skin.			
Fire	Not flammable		
Exposure	ALL LOOK MEDICAL DUST Irritating to nose and throat if inhaled. May cause coughing. SOLID Will burn skin and eyes Harmful if swallowed Keep away from children. Do not breathe dust or fumes. Do not get in eyes, nose, mouth or on skin. If you have been exposed to this material, call your doctor immediately. NOT AN EXPOSURE		
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes. DO NOT DISCHARGE INTO WATERWAYS.		
1. RESPONSE TO DISCHARGE See Response Methods Handbook CG 664-4. Disperse and flush		2. LABELS No hazard label required by Code of Federal Regulations	
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Slaked lime 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: Ca(OH) ₂ 3.4 IMCO United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: White 4.3 Odor: None	
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Dry-proof goggles and mask 5.2 Symptoms Following Exposure: Dust irritates eyes, nose, and throat 5.3 Treatment for Exposure: EYES: Flush with lukewarm water for at least 10 min. and consult an ophthalmologist for further treatment without delay. SKIN: Wash off the lim. and consult a physician. 5.4 Toxicity by Inhalation (Threshold Limit Value): Not pertinent. 5.5 Short-Term Inhalation Limits: Not pertinent. 5.6 Toxicity by Ingestion: Grade III Dose Severe Aggravated 5.7 Late Toxicity: None 5.8 Vapor (Gas) Irritant Characteristics: Not pertinent. 5.9 Liquid or Solid Irritant Characteristics: None 5.10 Odor Threshold: Not pertinent.

NOTES

CHY

CALCIUM HYPOCHLORITE

Common Synonyms HTH HTH Dry Chlorine Neutral anhydrous calcium hypochlorite Sentry	Solid granules White Household Bleaching powder odor Sinks and mixes with water
Avoid contact with acid and dust. Keep away from water, gas, and oil. Do not use in confined spaces. Toxic and severe irritant material. Not a health hazard.	
Fire	Not flammable May cause fire on contact with combustible. POISONOUS GASES ARE PRODUCED WHEN HEATED When heated, it will release chlorine gas which is extremely irritating to the respiratory system.
Exposure	CALL FOR MEDICAL AID SOLID Irritating to skin and eyes If swallowed, will cause nausea, vomiting or loss of consciousness. Breathing irritant gas may cause death. May cause irritation to the eyes. If NEYES have been exposed, wash with plenty of water. If SWALLOWED, give ORAL FLUIDS. Do not induce vomiting. If SWALLOWED, do not induce vomiting. If unconscious, do not induce vomiting. If conscious, give ORAL FLUIDS. If SWALLOWED, do not induce vomiting. If unconscious, do not induce vomiting. If conscious, give ORAL FLUIDS.
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS. May be dangerous if it enters water intakes. Not a health hazard.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-1) Twice warning corrosive Disperse and flush	2. LABEL 
3. CHEMICAL DESIGNATIONS 31 Synonyms: HTH HTH Dry Chlorine Neutral anhydrous calcium hypochlorite Sentry 32 Coast Guard Compatibility Classification: Not applicable 33 Chemical Formula: $\text{Ca}(\text{OCl})_2$ 34 IMCO United Nations Numerical Designation: 51 174X	4. OBSERVABLE CHARACTERISTICS 41 Physical State (as shipped): Solid 42 Color: White 43 Odor: Like bleaching powder
5. HEALTH HAZARDS 51 Personal Protective Equipment: Protective goggles, dust mask 52 Symptoms Following Exposure: INHALATION: hypochlorous acid fumes* cause severe respiratory tract irritation and pulmonary edema. INGESTION: pain and inflammation of mouth, pharynx, esophagus, and stomach; erosion of mucous membranes; chiefly of the stomach; vomiting; hemorrhaging may cause vomitus to resemble coffee grounds; circulatory collapse with cold, red, clammy skin; cyanosis; and shallow respirations; confusion; delirium; coma; edema of pharynx, glottis, and larynx; with stridor and obstruction; perforation of esophagus or stomach; with mediastinitis or peritonitis. SKIN CONTACT: may cause vesicular eruptions and eczematoid dermatitis. 53 Treatment for Exposure: INGESTION: swallow immediately milk, egg white, starch paste, milk of magnesia, aluminum hydroxide gel, or magnesium trisilicate gel. Avoid sodium bicarbonate because of the release of carbon dioxide. Do not use acids, antacids, caustics, gastric lavage with tap water or a 1% solution of sodium thiosulfate; milk of magnesia (if left in the stomach is useful as a mild antacid, adsorbent, demulcent, and cathartic; demulcents such as starch, egg white, milk, gelatin, opiate for the control of pain. Treat shock vigorously with intravenous fluids. Prompt surgical intervention when indicated, e.g., tracheotomy, gastrostomy. SKIN: wash with liberal quantities of water and apply a paste of baking soda. 54 Toxicity by Inhalation (Threshold Limit Value): Not pertinent 55 Short-Term Inhalation Limits: Not pertinent 56 Toxicity by Ingestion: Grade II LD ₅₀ above 15 g/kg * Given off only if compound comes in contact with acid.

CALCIUM OXIDE

Common Synonyms Limited time Quicklime	Solid granules White to gray Odorless Sinks and reacts violently with water. Water appears to boil.	
Keep away from children. Wash hands thoroughly after handling. Wear rubber gloves if there are splashes or spills. Do not inhale dust and fumes. Avoid contact with eyes and skin.		
Fire	Not flammable May cause fire on contact with water and combustibles Extinguish with dry powder or carbon dioxide. Do not use water on adjacent fires.	
Exposure	CALL FOR MEDICAL AID DUST Irritating to nose and throat May irritate lungs SOLID Will burn skin and eyes. Harmful if swallowed Ingestion: Swallow nothing and drink milk or water. If swallowed immediately dilute with several glasses of water. If swallowed immediately dilute with several glasses of water. If swallowed immediately dilute with several glasses of water. DO NOT INDUCE VOMITING	
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes.	
1. RESPONSE TO DISCHARGE (See Response Materials Manual, CG 404-4) Issue warning - call spillage Restrict access Chemical and physical treatment		2. LABELS No hazard label required by Code of Federal Regulations
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Quicklime Unslaked lime 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: CaO 3.4 IMCO United Nations Hazardous Designation: 4.0 (1910)		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: White to gray 4.3 Odor: Odorless
5. HEALTH HAZARDS		
5.1 Personal Protective Equipment: Protect respiratory system and any type of respirator prescribed for free flow 5.2 Symptoms Following Exposure: Causes burns on mucous membrane and skin. Inhalation of dust causes sneezing 5.3 Treatment for Exposure: INGESTION: If victim consciousness have him drink water or milk. Do NOT induce vomiting. SKIN AND EYES: Flush with water and seek medical help 5.4 Toxicity by Inhalation (Threshold Limit Value): 5 mg/m³ 5.5 Short-Term Inhalation Limits: 0.1 mg/m³ for 15 min 5.6 Toxicity by Ingestion: Data not available 5.7 Late Toxicity: None 5.8 Vapor (Gas) Irritant Characteristics: Not pertinent 5.9 Liquid or Solid Irritant Characteristics: Causes stinging of the skin and first degree burns on short exposure and may cause secondary burns on long exposure 5.10 Odor Threshold: Not pertinent		

6. FIRE HAZARDS 6.1 Flash Point: Not flammable 6.2 Flammable Limits in Air: Not flammable 6.3 Fire Extinguishing Agents: Not pertinent 6.4 Fire Extinguishing Agents Not to be Used: Do not use water on adjacent fires 6.5 Special Hazards of Combustion Products: Not pertinent 6.6 Behavior in Fire: Not pertinent 6.7 Ignition Temperature: Not flammable 6.8 Electrical Hazards: Not pertinent 6.9 Burning Rate: Not flammable	8. WATER POLLUTION 8.1 Aquatic Toxicity: 92 ppm 96 hr LC50 in 10% fresh water 240 ppm 24 hr LC50 in 10% salt water 8.2 Waterway Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): Not pertinent 8.4 Food Chain Concentration Potential: Not pertinent								
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: Heat may cause ignition of combustibles. Material is stable during reaction. 7.2 Reactivity with Common Materials: No reaction with water present. Then white effect is that of heat liberated. 7.3 Stability During Transport: Stable 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent 7.5 Polymerizations: Not pertinent 7.6 Inhibitor of Polymerization: Not pertinent	9. SELECTED MANUFACTURERS Alcon Chemical Corp. Specialty Chemical Division Marcus Hook, Pa. 19366 2. Ash Grove Chemical Co. 1001 Lee Manufacturing Kansas City, Mo. 64105 3. United States Gas Products Chemical Division Chicago, Ill. 60606

NOTES

CCP

CALCIUM PEROXIDE

Common Synonyms Calcium Oxide		Solid powder Sinks in water	Yellow to white Odorless
1. IDENTIFICATION 1.1 Chemical Name: Calcium Oxide 1.2 CAS Number: 1317-76-1 1.3 Molecular Weight: 56.08 1.4 Formula: CaO			
Fire	Not flammable May cause fire on contact with combustibles Containers may explode in fire Flashed due to contact with water When exposed to air, it will ignite		
Exposure	DUST Irritating to eyes, nose and throat Harmful if inhaled Harmful if swallowed SOLID Irritating to skin and eyes Harmful if swallowed HAZARDS Inhalation of dust irritates nose and throat. Dust also irritates eyes and skin on contact and irritates mouth and stomach if ingested. Treatment for Exposure: INHALATION: remove to fresh air. EYES: flush with water for 1 min. and consult physician. SKIN: flush with water. INGESTION: give large amounts of water.		
Water Pollution	Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes		
1. RESPONSE TO DISCHARGE (See Response Methods Page 100) Issue warning: oxidizing material Disperse and flush		2. LABEL 	
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Calcium oxide 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: CaO 3.4 HCS/United Nations Hazard Designation: 2.1 125°		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: Yellow-white 4.3 Odor: None	
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: U.S. N. M. approved toxic dust respirator, general purpose gloves, chemical safety goggles, full cover clothing 5.2 Symptoms Following Exposure: Inhalation of dust irritates nose and throat. Dust also irritates eyes and skin on contact and irritates mouth and stomach if ingested. 5.3 Treatment for Exposure: INHALATION: remove to fresh air. EYES: flush with water for 1 min. and consult physician. SKIN: flush with water. INGESTION: give large amounts of water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Lethal: Data not available 5.6 Toxicity by Ingestion: Data not available 5.7 Skin Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Not pertinent			

6 FIRE HAZARDS 6.1 Flash Point: Not flammable but may cause fire on contact with combustible material 6.2 Flammable Limits in Air: Not pertinent 6.3 Fire Extinguishing Agents: Flood with water or use a powder (e.g. graphite or powdered limestone) 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent 6.5 Special Hazards of Combustion Products: Not pertinent 6.6 Behavior in Fire: Can increase severity of fire. Containers may explode 6.7 Ignition Temperature: Not pertinent 6.8 Electrical Hazard: Not pertinent 6.9 Burning Rate: Not pertinent	8 WATER POLLUTION 8.1 Aquatic Toxicity: Data not available 8.2 Waterfowl Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): None 8.4 Food Chain Concentration Potential: None
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: Reacts very slowly with water at room temperature to form lime water and oxygen gas 7.2 Reactivity with Common Materials: Heavy metals and dirt can accelerate decomposition. Lime and oxygen. The reaction is not explosive 7.3 Stability During Transport: Stable 7.4 Neutralizing Agents for Acids and Caustics: Flush with water 7.5 Polymerization: Not pertinent 7.6 Inhibitor of Polymerization: Not pertinent	9 SELECTED MANUFACTURERS FMC Corporation Industrial Chemical Division 431 Third Avenue New York, N.Y. 10017 2. CALCIUM PHOSPHATE

Common Synonyms MCP Monocalcium phosphate monohydrate Calcium biphosphate DCP Dicalcium phosphate Calcium pyrophosphate	Subst Smells and mixes with water	White	Odorless
Not a discharge of poison, it being not an acid. Acid is only in the dust and dust No acid in form of discharge or material No acid in form of dust or material			
Fire	Not flammable		
Exposure	CALL FOR MEDICAL AID DUST Irritating to eyes, nose and throat If inhaled will cause coughing or difficult breathing If eyes are irritated, flush with plenty of water If nose is irritated, flush with plenty of water If throat is irritated, gargle with water SOLID Irritating to skin and eyes If swallowed will cause nausea and vomiting If on skin, wash with plenty of water If on clothes, remove clothing and wash with plenty of water If in eyes, flush with plenty of water If in nose, flush with plenty of water If in mouth, swallow and drink plenty of water If swallowed, get medical attention If swallowed and vomited, do not have convulsions If in eyes, flush with plenty of water		
Water Pollution	Effect of low concentrations on aquatic life: unknown May be dangerous if it enters water intakes. No acute or chronic toxicity to fish No acute or chronic toxicity to birds		
1. RESPONSE TO DISCHARGE See hazardous materials monographs CG 464.4 Disperse and flush		2. LABELS No hazard label required by Code of Federal Regulations	
3. CHEMICAL DESCRIPTIONS 3.1 Synonyms: (a) MCP Monocalcium phosphate, monohydrate, Calcium phosphate, monohydrate, monohydrate, Acid calcium phosphate, calcium superphosphate, Calcium biphosphate, Primars, calcium phosphate (b) DCP Dicalcium phosphate (c) hydroxide or dihydrate, (d) basic calcium phosphate, Calcium monohydrogen phosphate, Secondary calcium phosphate, (e) TCP Calcium <i>(Continued on page 6)</i>	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: White 4.3 Odor: None		
5. HEALTH HAZARDS			
5.1 Personal Protective Equipment: Dust mask, goggles and gloves 5.2 Symptoms Following Exposure: Inhalation of MCP or DCP may cause irritation of upper respiratory tract. prolonged inhalation of concentrated pyrophosphate may cause a deposit of TCP in the lungs. Ingestion of large quantities of any form of calcium phosphate may cause nausea, vomiting, cramps, and diarrhea. MCP may also be corrosive to a membrane of mouth, throat, and gastrointestinal tract. Local irritation of the eye may result from contact with any of these phosphates. prolonged or repeated exposure to MCP may lead to chronic conjunctivitis. Contact with skin by MCP may cause local irritation or chronic dermatitis, prolonged or repeated contact with concentrated aqueous solutions of DCP may cause local irritation. 5.3 Treatment for Exposure: INHALATION: move to clear air, see physician in case of persistent coughing, expectoration, chest pain, or shortness of breath. INGESTION: get medical attention quickly, induce vomiting by giving large amounts of water or warm salty water, or by treating back of patient's throat; continue until vomiting is clear, follow with milk, eggs, or olive oil to soothe stomach. EYES: immediately flush with large quantities of running water for at least 15 min, holding eyelids apart to insure thorough flushing of eyes and lids; do not attempt to neutralize with chemical agents; get medical attention quickly if physician is not available; continue irrigation for another 15 min. SKIN: immediately flush with water; remove contaminated clothing under shower; do not attempt to neutralize with chemical agent; get medical attention for persistent irritation. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limit: Data not available 5.6 Toxicity by Ingestion: Grade 0 LD₅₀ > 15g/kg <i>(Continued on page 6)</i>			

6. FIRE HAZARDS 6.1 Flash Point: Not flammable 6.2 Flammable Limits in Air: Not flammable 6.3 Fire Extinguishing Agents: Not pertinent 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent 6.5 Special Hazards of Combustion Products: 6.6 Behavior in Fire: 6.7 Ignition Temperature: Not pertinent 6.8 Electrical Hazard: Not pertinent 6.9 Burning Rate: Not pertinent	8. WATER POLLUTION 8.1 Aqueous Toxicity: Data not available 8.2 Waterfowl Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): None 8.4 Food Chain Concentration Potential: None
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction 7.2 Reactivity with Common Materials: Some calcium phosphates form acid solutions in water. These may attack metals with formation of flammable hydrogen gas which may collect in enclosed spaces 7.3 Stability During Transport: Stable 7.4 Neutralizing Agents for Acids and Corrosives: Flush with water 7.5 Polymerization: Not pertinent 7.6 Inhibitor of Polymerization: Not pertinent	9. SELECTED MANUFACTURERS 1. Stauffer Chemical Co. Industrial Chemical Division Weopuer, Ohio 43080 2. Mallinckrodt Chemical Works 223 Westside Avenue P.O. Box 344 Jersey City, N.J. 07303 3. Monsanto Company 400 North Lindbergh Blvd. St. Louis, Mo. 63166

CPP

CALCIUM PHOSPHIDE

Common Synonyms Phosphor	Solid Gray Musty odor Reacts violently with water. Poisonous, flammable; vapor is produced
AVOID CONTACT WITH LIQUID AND VAPOR. KEEP PEOPLE AWAY. Wear goggles and suit contained breathing apparatus. Call fire department. Be late and remove discharged material. Notify local health and pollution control agencies.	
Fire	FLAMMABLE IGNITES WHEN EXPOSED TO MOISTURE POISONOUS GASES ARE PRODUCED IN FIRE Wear goggles and suit contained breathing apparatus. Extinguish with dry chemical or carbon dioxide. DO NOT USE WATER OR FOAM ON FIRE. Cool exposed containers with water.
 Exposure	CALL FOR MEDICAL AID VAPOR PRODUCED IN REACTION WITH WATER POISONOUS IF INHALED Irritating to eyes, nose and throat. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. DUST Irritating to eyes. Move victim to fresh air. If in eyes, hold eyes closed and flush with plenty of water. SOLID Irritating to skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. If swallowed, give victim plenty of water. If IN EYES, hold eyes closed and flush with plenty of water. If SWALLOWED and SKIN OR CLOTHING have not in direct contact with or milk.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify appropriate federal water intakes.
1 RESPONSE TO DISCHARGE (See Hazmat Response Methods Handbook, CG 444-1) Issue warning: high flammability, poison air contaminant, water contaminant. Restrict access. Evacuate area (large discharge only). Should be removed.	2. LABELS  
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Phosphor 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: Ca_3P_2 3.4 IMCO/United Nations Numerical Designation: 4.3/1360	4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: Gray 4.3 Odor: Musty like acetylene
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Dust respirator, protective gloves and clothing, goggles. 5.2 Symptoms Following Exposure: Inhalation or ingestion causes faintness, weakness, nausea, vomiting. External contact with dust causes irritation of eyes and skin. 5.3 Treatment for Exposure: INHALATION: remove to fresh air, call a physician and alert to possibility of phosphine poisoning. EYES or SKIN: flush with water. INGESTION: give large amounts of water, call physician and alert to possibility of phosphine poisoning. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Data not available. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: 1.100 mg/m³	

6. FIRE HAZARDS 6.1 Flash Point: Not flammable but may ignite spontaneously if wetted. 6.2 Flammable Limits in Air: Not flammable. 6.3 Fire Extinguishing Agents: Extinguish adjacent fires with dry chemical or carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Water, foam. 6.5 Special Hazards of Combustion Products: Not pertinent. 6.6 Behavior in Fire: Can cause spontaneous ignition if wet. Contributes dense smoke of phosphoric acid. 6.7 Ignition Temperature: Not pertinent. 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: Not pertinent.	8 WATER POLLUTION 8.1 Aquatic Toxicity: Data not available. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: None.
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: Reacts vigorously, generating phosphine (a poisonous, spontaneously flammable gas). 7.2 Reactivity with Common Materials: Can react with surface moisture to evolve phosphine, which is toxic and spontaneously flammable. 7.3 Stability During Transport: Stable if dry. 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9 SELECTED MANUFACTURERS 1. Ventron Corp. Alfa Products P.O. Box 159 Beverly, Mass. 01915 2. Vetoac, Inc. 1460 W. Silver Spring Rd. Menomonee Falls, Wis. 53051
11 HAZARD ASSESSMENT CODE (See Hazard Assessment Handbook, CG 444-3) RR	13 PHYSICAL AND CHEMICAL PROPERTIES 13.1 Physical State at 15°C and 1 atm: Solid. 13.2 Molecular Weight: 182.2. 13.3 Boiling Point at 1 atm: Decomposes. 13.4 Freezing Point: (approx.) 2,910°F = 1,600°C = 1,870°K. 13.5 Critical Temperature: Not pertinent. 13.6 Critical Pressure: Not pertinent. 13.7 Specific Gravity: 2.51 at 20°C (solid). 13.8 Liquid Surface Tension: Not pertinent. 13.9 Liquid-Water Interfacial Tension: Not pertinent. 13.10 Vapor (Gas) Specific Gravity: Not pertinent. 13.11 Ratio of Specific Heats of Vapor (Gas): Not pertinent. 13.12 Latent Heat of Vaporization: Not pertinent. 13.13 Heat of Combustion: Not pertinent. 13.14 Heat of Decomposition: Not pertinent. 13.15 Heat of Solution: Data not available. 13.16 Heat of Polymerization: Not pertinent.
12 HAZARD CLASSIFICATIONS 12.1 Code of Federal Regulations: Flammable solid. 12.2 NAB Hazard Rating for Bulk Water Transportation: Not listed. 12.3 NFPA Hazard Classifications: Not listed.	
NOTES	

Continued on pages 1 and 8

CRE

CALCIUM RESINATE

Common Synonyms Metallic resinate Calcium abetate Calcium resin Calcium resin, fused		Solid Yellow to dark brown Odorless Sinks in water
Call fire department. Stop discharge if possible. Keep people away. Avoid contact with solid and dust. Isolate and remove discharged material. Notify local health and pollution control agencies.		
Fire	Combustible MAY IGNITE WHEN EXPOSED TO AIR Extinguish with dry chemical, foam or carbon dioxide.	
Exposure	CALL FOR MEDICAL AID DUST Irritating to eyes, nose and throat. If inhaled will cause coughing or difficult breathing. If in eyes: Hold eyes open and flush with plenty of water. If contact has stopped, give artificial respiration. If breathing is difficult, give oxygen. SOLID Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. If IN EYES: Hold eyelids open and flush with plenty of water. If SWALLOWED: Do not induce vomiting. Have victim drink water or milk and have vomit induced vomiting. If SWALLOWED: Do not induce vomiting. Have victim drink water or milk and have vomit induced vomiting.	
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Some local health officials advise against notifying water intakes.	
1. RESPONSE TO DISCHARGE (See Response Manual Handbook, CG 446-4) Should be removed. Chemical and physical treatment.		2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Calcium abetate, Calcium resinate, fused, calcium resin, fused wood resin, Metallic resinate. 3.2 Coast Guard Competibility Classification: Not listed. 3.3 Chemical Formula: (approx.) $\text{Ca}(\text{OOCCH}_3)_2$. 3.4 IMCO/United Nations Numerical Designation: Not listed.		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid. 4.2 Color: Amber, very dark brown. 4.3 Odor: None.
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Dust mask, goggles or face shield, gloves. 5.2 Symptoms Following Exposure: Inhalation of fumes from heated chemical may cause irritation of nose and throat. Ingestion causes irritation of nose and throat. Contact with eyes causes irritation. Contact of molten material with skin causes burns. 5.3 Treatment for Exposure: INHALATION: move victim to fresh air, get medical help immediately. INGESTION: give large amounts of water, induce vomiting. EYES: flush immediately with cold water, get medical help immediately. SKIN: if molten chemical burns skin, apply cold water immediately, get medical help for burn treatment. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Data not available. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.		

6. FIRE HAZARDS 6.1 Flesh Point: Not pertinent (combustible solid). 6.2 Flammable Limits in Air: Not pertinent. 6.3 Fire Extinguishing Agents: Foam, dry chemical, carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Water. 6.5 Special Hazards of Combustion Products: 6.6 Behavior in Fire: 6.7 Ignition Temperature: 480°F (may ignite spontaneously). 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: Not pertinent.		8. WATER POLLUTION 8.1 Aquatic Toxicity: Data not available. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: None.
7. NOTES		

(Continued on pages 5 and 6)

CPH

CAMPHENE

Common Synonyms 1,3-Dimethyl-2-methylene-norbornane 2,2-Dimethyl-3-methylene-norbornane		Solid White Camphor like odor
Floats on water		
Spills/Discharge: If possible, keep people away. Call fire department. Avoid contact with solid and dust. Isolate and contain any discharge's material. Notify local health and pollution control agencies.		
Fire	Combustible Extinguish with dry chemicals. Do not use water. Do not use foam.	
Exposure	CALL FOR MEDICAL AID DUST Irritating to eyes, nose and throat. If inhaled will cause headache or difficult breathing. If in eyes, flush eyes with clean water for 15 minutes. If in mouth, have victim swallow and drink water. If inhaled, have victim move to fresh air. SOLID Irritating to skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eye open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water to "flush" it down. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing, except keep victim warm.	
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife agencies. Notify operators of nearby water intakes.	
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Mechanical containment. Should be removed. Chemical and physical treatment.		2. LABELS No hazard label required by Code of Federal Regulations.
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: 2,2-Dimethyl-3-methylenenorbornane 1,3-Dimethyl-2-methylenenorcamphane 3.2 Coast Guard Compatibility Classification: Not listed. 3.3 Chemical Formula: C ₁₁ H ₁₈ 3.4 IMCO/United Nations Numerical Designation: Not listed.		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: White 4.3 Odor: Camphoraceous
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Gloves and face shield. 5.2 Symptoms Following Exposure: Inhalation: eye, irritation of nose and throat. Contact with eyes or skin causes irritation. 5.3 Treatment for Exposure: INHALATION: move victim to fresh air; call physician immediately. EYES: flush immediately with clean, cool water; call physician immediately. SKIN: wash with alcohol; follow with soap and water wash. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Data not available. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.		

6. FIRE HAZARDS 6.1 Flash Point: 108°F O.C., 92°F C.C. (typical) 6.2 Flammable Limits in Air: Data not available. 6.3 Fire Extinguishing Agents: Foam, dry chemical, carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Water. 6.5 Special Hazards of Combustion Products: 6.6 Behavior in Fire: 6.7 Ignition Temperature: Data not available. 6.8 Electrical Hazard: Data not available. 6.9 Burning Rate: Not pertinent.		8. WATER POLLUTION 8.1 Aquatic Toxicity: Data not available. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Ford Chain Concentration Potential: None.
7. CPO

CAMPHOR OIL

Common Synonyms Liquid camphor		Only liquid Colorless or brown or blue Penetrating camphor odor Usually floats on water
Stop discharge if possible Call fire department Avoid contact with liquid Isolate and remove discolored material Notify local health and pollution control agencies		
Fire	Combustible Extinguish with dry chemical, foam or carbon dioxide	
Exposure	CALL FOR MEDICAL AID VAPOR Not irritating to eyes, nose or throat Move to fresh air LIQUID Irritating to skin and eyes If swallowed, will cause nausea, vomiting or loss of consciousness Remove contaminated clothing and shoes Flush affected areas with plenty of water IF IN EYES: hold eyelids open and flush with plenty of water IF SWALLOWED and victim is CONSCIOUS: have victim drink water or milk	
Water Pollution	Effect of low concentrations on aquatic life is unknown Floating to shoreline May be dangerous if it enters water intakes Notify local health and pollution control officials Notify operators of nearby water intakes	
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 445.4) Issue warning: water contaminant Mechanical containment Should be removed		2. LABELS No hazard label required by Code of Federal Regulations
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Liquid impure camphor Liquid gum camphor 3.2 Coast Guard Compatibility Classification Ketone 3.3 Chemical Formula: C ₁₅ H ₂₄ O 3.4 IMDG/United Nations Numerical designation: 31110		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless, brown, blue 4.3 Odor: Like camphor, fragrant and penetrating
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Eye protection 5.2 Symptoms Following Exposure: Within 5 to 90 minutes after swallowing, the following may be noted: nausea and vomiting, feeling of warmth, headache, confusion, excitability, restlessness, delirium, and hallucinations; increased muscular excitability, tremors, and jerky movements; epileptiform convulsions, followed by depression (convulsions sometimes occur early in the syndrome and may be severe, but they do not have the grave prognosis of strychnine convulsions); coma; central nervous depression may at times be the primary clinical response; death results from respiratory failure or from status epilepticus; slow convalescence (days or weeks), often with persistent gastric distress 5.3 Treatment for Exposure: For an oral ingestion, administer gastric lavage, cathartics, diuretics, and sedatives. Control convulsions with a short-acting barbiturate, chloral hydrate, or ether. Do NOT use an hypnotic or opiate. 5.4 Toxicity by Inhalation (Threshold Limit Value): 2 ppm 5.5 Short-Term Inhalation Limits: 1 ppm for 30 min 5.6 Toxicity by Ingestion: Data not available 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Vapors are nonirritating to the eyes and throat 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain, may cause smarting and reddening of the skin 5.10 Odor Threshold: Data not available		

6 FIRE HAZARDS

- 6.1 **Flash Point:** 117°F (41°C)
 6.2 **Flammable Limits in Air:** Data not available
 6.3 **Fire Extinguishing Agents:** Foam, carbon dioxide, or dry chemical
 6.4 **Fire Extinguishing Agents Not to be Used:** Not pertinent
 6.5 **Special Hazards of Combustion Products:** Not pertinent
 6.6 **Behavior in Fire:** The solid often evaporates without first melting
 6.7 **Ignition Temperature:** 466°C
 6.8 **Electrical Hazard:** Not pertinent
 6.9 **Burning Rate:** Data not available

7 CHEMICAL REACTIVITY

- 7.1 **Reactivity with Water:** No reaction
 7.2 **Reactivity with Common Materials:** No reaction
 7.3 **Stability During Transport:** Stable
 7.4 **Neutralizing Agents for Acids and Caustics:** Not pertinent
 7.5 **Polymerization:** Not pertinent
 7.6 **Inhibitor of Polymerization:** Not pertinent

8 WATER POLLUTION

- 8.1 **Aquatic Toxicity:** Data not available
 8.2 **Waterfowl Toxicity:** Data not available
 8.3 **Biological Oxygen Demand (BOD):** Data not available
 8.4 **Food Chain Concentration Potential:** None

9 SELECTED MANUFACTURERS

1. CPO International, Inc.
 S. B. Penick and Co. Division
 100 Church St.
 New York, N. Y. 10007
 2. Glaxo Chemicals, Inc.
 51 Weaver St.
 Greenwich, Conn. 06830
 3. R. W. Greel & Co., Inc.
 1 Rockefeller Plaza
 New York, N. Y. 10020

10 SHIPPING INFORMATION

- 10.1 **Grades or Purity:** Each lot of camphor oil has a unique composition which varies with the season of the year and the country of origin. At least a dozen grades are known; all have Chinese names. Most can purify sold in the U. S. as synthetic and is quite pure.
 10.2 **Storage Temperature:** Ambient
 10.3 **Inert Atmosphere:** No requirement
 10.4 **Venting:** Open

11 HAZARD ASSESSMENT CODE

CLS

CAPROLACTAM, LIQUID

Common Synonyms Aminocaproic lactam 2-Ketohexamethylbenzamine 2-Oxohexamethylbenzamine epsilon-Caprolactam Hexahydro-2H-azepine-2-one		Liquid	Colorless	Mild odor
Sinks and mixes with water				
Stop discharge if possible. Keep people away. Call fire department. Isolate and remove discharged material. Notify local health and pollution control agencies.				
Fire	Combustible POISONOUS GASES MAY BE PRODUCED IN FIRE Extinguish with water, dry chemicals, foam, or carbon dioxide. Cool exposed containers with water.			
Exposure	Call for medical aid. LIQUID Irritating to skin and eyes Harmful if swallowed Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk.			
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.			
1. RESPONSE TO DISCHARGE (See Response Manual Handbook, CG 446-3) Issue warning: water contaminant. Disperse and flush.		2. LABELS No label required by Code of Federal Regulations.		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Aminocaproic lactam, epsilon-Caprolactam, Hexahydro 2H-azepine-2-one, 2-Ketohexamethylbenzamine. 3.2 Coast Guard Compatibility Classification: Caprolactam solution. 3.3 Chemical Formula: H ₂ NCH ₂ CH ₂ CH ₂ CO 3.4 IMCO/United Nations Numerical Designation: Not listed.		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Mild		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Gas mask or self-contained breathing apparatus, rubber gloves and boots, goggles or face shield. 5.2 Symptoms Following Exposure: Inhalation causes coughing or mild irritation. Contact with hot liquid will burn eyes and skin. 5.3 Treatment for Exposure: INHALATION: remove patient to fresh air. EYES: wash with copious quantities of water for at least 15 min.; call physician. SKIN: wash with water; call physician in case of thermal burn. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Not pertinent. 5.6 Toxicity by Ingestion: Grade 2, oral rat LD ₅₀ = 2,140 mg/kg. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Vapors are nonirritating to the eyes and throat. 5.9 Liquid or Solid Irritant Characteristics: No appreciable hazard. Practically harmless to the skin. 5.10 Odor Threshold: 0.3 mg/m ³ .				

6 FIRE HAZARDS

- 6.1 **Flash Point:** 257°F O.C. 230°F C.C.
 6.2 **Flammable Limits in Air:** 1.84% (L.L.)
 6.3 **Fire Extinguishing Agents:** Water, dry chemical, foam, carbon dioxide.
 6.4 **Fire Extinguishing Agents Not to be Used:** Not pertinent.
 6.5 **Special Hazards of Combustion Products:** Toxic oxides of nitrogen.
 6.6 **Behavior in Fire:** Not pertinent.
 6.7 **Ignition Temperature:** Data not available.
 6.8 **Electrical Hazard:** Not pertinent.
 6.9 **Burning Rate:** 2.4 mm/min.

8 WATER POLLUTION

- 8.1 **Aquatic Toxicity:** Data not available.
 8.2 **Waterfowl Toxicity:** Data not available.
 8.3 **Biological Oxygen Demand (BOD):** Data not available.
 8.4 **Food Chain Concentration Potential:** None.

9. SELECTED MANUFACTURERS

1. Dow Badische Company
Williamsburg, Va. 23185
 2. Allied Chemical Corporation
Plastics Division
P. O. Box 2365R
Morristown, N. J. 07960
 3. Nipiro Incorporated

NOTES

CPT

CAPTAN

Common Synonyms N [(Trichloromethylthio)-4-cyclohexene-1,2-dicarboximide N-trichloromethylthio-cis- Δ^4 -cyclohexene-1,2-dicarboximide Orthoide Vanicide	Solid Sinks in water	White to brown Slight odor
VOID CONTACT WITH SOLID AND DUST. KEEF PEOPLE AWAY. Wear goggles, gloves, and a flame three-piece apparatus and rubber overalls when handling this chemical. Call fire department. Stay upwind. Use water spray to knock down dust. Keep away from open flame and hot surfaces. Notify local health and safety authorities.		
Fire	FLAMMABLE POISONOUS GASES MAY BE PRODUCED IN FIRE Wear goggles and self-contained breathing apparatus. Extinguish with water, dry chemicals, foam, or carbon dioxide. Cool exposed containers with water.	
 Exposure	CALL FOR MEDICAL AID DUST POISONOUS IF INHALED OR IF SKIN IS EXPOSED. Move victim to fresh air. Provide first aid: victims get out of dust with plenty of water. If breath is being stopped, give artificial respiration. If unconscious, do not give anything by mouth. SOLID POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED Remove contaminated clothing and shoes. Flush affected areas with plenty of water. If in eyes, hold eyelids open and flush with plenty of water. If SWALLOWED and victim is CONSCIOUS, have victim drink water or milk and have a vomit-inducing agent given. If SWALLOWED and victim is UNCONSCIOUS, DO NOT INDUCE VOMITING. ALLERGENS: dermal and respiratory irritant.	
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if at entry water intakes. Extremely difficult to remove from fish. Notify personnel about water intakes.	
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 444-4) Issue warning: poison water contaminant. Restrict access. Should be removed. Chemical and physical treatment.		2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: N [(Trichloromethylthio)-4-cyclohexene-1,2-dicarboximide N-Trichloromethylthio-cis- Δ^4 -cyclohexene-1,2-dicarboximide Orthoide Vanicide 3.2 Coast Guard Compatibility Classification: Not applicable. 3.3 Chemical Formula: C ₁₁ H ₁₀ Cl ₃ N ₂ O ₂ 3.4 IMCO/United Nations Numerical Designation: 6.1 (609)		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: White to buff 4.3 Odor: Slight pungent
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Dust mask, rubber gloves, and goggles. 5.2 Symptoms Following Exposure: Vapor irritates eyes. Ingestion causes depression, tachycardia, labored respiration, diarrhea. 5.3 Treatment for Exposure: Remove from exposure. Keep airways open. Administer artificial respiration if necessary. EYES: flush with water for 15 min. and get medical attention. SKIN: wash with soap and water. INGESTION: maintain respiration; induce vomiting; passage stomach if patient is unconscious; give symptomatic and supportive treatment; save agent and submit for laboratory examination. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 3: oral rat LD ₅₀ = 450 mg/kg. 5.7 Late Toxicity: None observed in several species. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.		

6. FIRE HAZARDS 6.1 Flash Point: Flammable solid. 6.2 Flammable Limits in Air: Not pertinent. 6.3 Fire Extinguishing Agents: Water, carbon dioxide, foam. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Irritating and toxic gases are produced in a fire; they may include sulfur dioxide, hydrogen chloride, phosgene, and oxides of nitrogen. 6.6 Behavior in Fire: Not pertinent. 6.7 Ignition Temperature: Data not available. 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: Not pertinent.	8. WATER POLLUTION 8.1 Aquatic Toxicity: 30 ppm, 24 hr, zebrafish, 11 m, fresh water. 8.2 Waterfowl Toxicity: >5,000 ppm LC ₅₀ . 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: Bioaccumulation not likely.
7. NOTES (Continued on pages 4 and 5)	

CBY

CARBARYL

Common Synonyms: Sevin 1-Naphthyl N-methylcarbamate		Solid powder, or in solution	White to gray	Weak odor
Solid sinks in water; solution may float on water				
Stop discharge if possible. Call fire department. Avoid contact with solid and solution. Wash exposed areas thoroughly with soap and water. Notify local health and wildlife officials. Notify operators of nearby water intakes.				
Fire		Solid not flammable, but usually dissolved in combustible liquid. Extremely flammable if in solution.		
Exposure		CALL FOR MEDICAL AID. SOLID OR SOLUTION Irritating to skin and eyes. Harmful if swallowed. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED, do not induce vomiting. Have victim drink water, or milk and have victim induce vomiting. IF SKIN IS IRRITATED, wash with soap and water. IF SKIN IS IRRITATED, wash with soap and water. CONVULSIONS: do not induce vomiting. Keep victim warm.		
Water Pollution		HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS. Fouling to shoreline. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning if water contaminant. Should be removed.		2. LABELS No hazard label required by Code of Federal Regulations.		
3. CHEMICAL DESIGNATIONS 31 Synonyms: 1-Naphthyl N-methylcarbamate Sevin 32 Coast Guard Compatibility Classification: Not applicable 33 Chemical Formula: C₁₁H₁₀NO 34 IMCO/United Nations Numerical Designation: 6.1, 6.2, 1615		4. REVISED 1978

CBO

CARBOLIC OIL

Common Synonyms: Middle Oil Layered phenol	Liquid Colorless — darkens on exposure to light Sweet — odor Sinks and mixes with water
AVOID CONTACT WITH LIQUID: Keep people away. Wear chemical protective suit with self-contained breathing apparatus. Stop discharge if possible. Call fire department. Isolate and remove discharged material. Notify local health and pollution control agencies.	
Fire	Combustible POISONOUS GASES ARE PRODUCED WHEN HEATED Wear chemical protective suit with self-contained breathing apparatus. Extinguish with water, dry chemical, foam or carbon dioxide.
 Exposure	ALL FOR MEDICAL AID LIQUID POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED Remove contaminated clothing and shoes. Flush affected area with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water. DO NOT INDUCE VOMITING.
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4.) Issue warning: poison. Restrict access. Should be removed. Chemical and physical treatment.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Middle Oil Layered phenol 3.2 Coast Guard Compatibility Classification: Phenol 3.3 Chemical Formula: $C_{12}H_{10}O$ 3.4 IMCO/United Nations Numerical Designation: 90-16-1	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless; darkens on exposure to light 4.3 Odor: Sweet tar like
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Fresh air mask for confined areas; rubber gloves; protective clothing; full face shield. 5.2 Symptoms Following Exposure: Will burn eyes and skin. The analgesic action may cause loss of pain sensation. Readily absorbed through skin, causing increased heat, convulsions, and death. 5.3 Treatment for Exposure: INHALATION: remove victim to fresh air; keep quiet and warm. If breathing stops, start artificial respiration. INGESTION: do NOT induce vomiting. Give milk, egg whites, or large amounts of water. Get medical assistance. No known antidote. EYES AND SKIN: remove contaminated clothing. Flush eyes with water for 15 minutes or until physician arrives. Wash skin with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): 5 ppm 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 2 LD ₅₀ 5 to 6 g/kg rats 5.7 Late Toxicity: Causes cancer in experimental animals 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause moderate irritation such that personnel will find high concentrations unpleasant. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Fairly severe skin irritant. May cause pain and second degree burns after a few minutes contact. 5.10 Oral Threshold: 0.05 ppm	

6. CDO

CARBON DIOXIDE

Common Synonyms Carbonic acid gas Carbonic anhydride		Liquefied compressed gas or solid Colorless gas or white solid Odorless Solid sinks and boils in water. Visible vapor cloud is produced.
AVOID CONTACT WITH FLUID AND SOLID STATE PEOPLE AWAY Wear goggles, well-ventilated breathing apparatus, and protective clothing. If exposed, remove clothing as soon as possible. Stop breathing if possible.		
Fire	Not flammable Containers may explode in fire Containers exposed to fire with water	
Exposure	Call for medical aid VAPOR If inhaled will cause dizziness, or difficult breathing Move victims to fresh air If breathing is difficult, give oxygen LIQUID OR SOLID Will cause frostbite Fluid affected areas with pure liquid water DO NOT RUB AFFECTED AREAS	
Water Pollution	Not harmful to aquatic life	
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Restrict access Disperse and flush		2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Carbonic acid gas Carbonic anhydride 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: CO ₂ 3.4 HCSO/Unit and Name Numerical Designation: 2 1013		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquefied compressed gas or solid ("Dry Ice") 4.2 Color: Colorless 4.3 Odor: None
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Self-contained breathing apparatus in excessively high CO ₂ concentration areas. For handling liquid or solid, wear safety goggles or face shield, insulated gloves, long sleeved shirt, and trousers worn outside boots or over high top shoes to shed spilled liquid. 5.2 Symptoms Following Exposure: Inhalation causes increased respiration rate, headache, subtle physiological changes for up to 35% concentration and prolonged exposure. Higher concentrations can cause unconsciousness and death. Solid can cause skin contact burns. Liquid or solid gas can cause freezing injury to skin or eyes similar to a burn. 5.3 Treatment for Exposure: INHALATION: move victim to fresh air. SKIN: treat burns from contact with solid in same way as frostbite. 5.4 Toxicity by Inhalation (Threshold Limit Value): 9000 ppm 5.5 Short-Term Inhalation Limits: 30,000 ppm for 60 min 5.6 Toxicity by Ingestion: Not pertinent (gas with low boiling point) 5.7 Late Toxicity: None 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Not pertinent

CBB

CARBON BISULFIDE

Common Synonyms Carbon disulfide	Watery liquid Colorless to yellow Rotten egg to sweet odor Sinks in water. Flammable, irritating vapor is produced.
Avoid contact with liquid and vapor. Keep people away. Wear goggles, self-contained breathing apparatus and rubber overclothing including gloves. Shut off ignition sources and call fire department. Stop discharge if possible. Stay upwind and use water spray to knock out fire. Isolate and remove discharged material. Notify local health and pollution control agencies.	
Fire	FLAMMABLE Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Wear goggles, self-contained breathing apparatus and rubber overclothing including gloves. Extinguish with dry chemical or carbon dioxide. Water and foam may be ineffective on fire. Cool exposed containers with water.
Exposure	CALL FOR MEDICAL AID VAPOR Irritating to eyes, nose and throat. If inhaled, will cause nausea, vomiting, difficult breathing, or loss of consciousness. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. LIQUID Will burn skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES: hold eyelids open and flush with plenty of water. IF SWALLOWED: do not induce vomiting. Have victim drink water or milk and have victim induce vomiting. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS: do nothing except keep victim warm.
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.
1. RESPONSE TO DISCHARGE (See Response Methods No. 20000, CG 446-4) Issue warning: High Flammability Restrict access Evacuate area	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Carbon disulfide 3.2 Coast Guard Compatibility Classification: Carbon disulfide 3.3 Chemical Formula: CS ₂ 3.4 IMCO United Nations Numerical Designation: 1.1 (1.1)	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Fairly sweetish disagreeable offensive like that of decaying cabbage
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Only self-contained breathing mask with full face approved by the United States Bureau of Mines is recommended. If the vapor concentration exceeds 2% by volume or is unknown, supply of air respiratory equipment of appropriate design with full face masks should be used by all persons entering contaminated area. Masks should be used only for emergency situations and should be discarded accordingly. Almost any type of industrial clothing is satisfactory. Splashes of small quantities are not harmful to fabrics and evaporation from clothing is quite rapid. Clothing should, however, be removed and the skin washed with water. Goggles should be used when the eyes are in danger of CS ₂ splashes or sprays. 5.2 Symptoms Following Exposure: ACUTE EXPOSURE: mild to moderate irritation of skin, eyes and mucous membranes from liquid or concentrated vapors; headache, garlicky breath, nausea, vomiting, diarrhea (even after vapor exposure) and occasionally abdominal pain; weak pulse, palpitations, fatigue, weakness in the legs, unsteady gait, vertigo, mania, hallucinations of sight, hearing, taste and smell in acute massive vapor exposures; central nervous depression with respiratory paralysis, death may occur during coma or after a convulsion. 5.3 Treatment for Exposure: INHALATION: remove victim promptly from contaminated area. Administer oxygen and artificial respiration if needed. SKIN CONTACT: wash affected areas with copious quantities of water. INGESTION: induce vomiting and follow with gastric lavage and saline cathartics. 5.4 Toxicity by Inhalation (Threshold Limit Value): 20 ppm 5.5 Short-Term Inhalation Limits: 100 ppm for 30 minutes; 200 ppm for 10 minutes; 100 ppm for 30 minutes and 50 ppm for 60 minutes	

6. FIRE HAZARDS 6.1 Flash Point: -22°F (-30°C) 6.2 Flammable Limits in Air: 1.3% - 10% 6.3 Fire Extinguishing Agents: Dry chemical, carbon dioxide 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent 6.5 Special Hazards of Combustion Products: Toxic gases are generated; wear self-contained breathing apparatus 6.6 Behavior in Fire: Not pertinent 6.7 Ignition Temperature: 21.1°F 6.8 Electrical Hazard: Contact of the liquid or vapor with the surface of a lighted electric light bulb could result in ignition. 6.9 Burning Rate: 2.7 mm/min	8. REVISED 1978

CARBON MONOXIDE

Common Synonyms Monoxide		Compressed gas or liquefied compressed gas		Colorless		Odorless	
Liquid floats and boils on water. Poisonous. Flammable. Visible vapor cloud is produced.							
AVOID CONTACT WITH LIQUID AND VAPOR. KEEP PEOPLE AWAY. Wash exposed skin with plenty of water for at least 15 min. If inhaled, get fresh air and seek medical attention. If swallowed, do not induce vomiting. Seek medical attention. If on skin, remove contaminated clothing and shoes. Wash skin with plenty of water for at least 15 min.							
Fire		FLAMMABLE Containers may explode in fire. Will ignite a fire. Burns with a blue flame. No known health effects from fire.					
 Exposure		CAUTION: MEDICAL VAPOR POISONOUS IF INHALED May cause irritation of the respiratory tract. May cause dizziness and headache. LIQUID Will cause frostbite. Do not get liquid on skin or clothes.					
Water Pollution		HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS. May be dangerous if it enters water intake. No known health effects from water pollution.					
1. RESPONSE TO DISCHARGE (See Response Memo, Handbook CG 446-4) Issue warning: poison high Flammable Restrict access Evacuate area				2. LABEL 			
3. CHEMICAL DESIGNATIONS 31 Synonyms: Monoxide 32 Coast Guard Competibility Classification: No appreciable 33 Chemical Formula: CO 34 IMCO/United Nations Numerical Designation: 21016				4. OBSERVABLE CHARACTERISTICS 41 Physical State (as shipped): Compressed gas or liquefied gas 42 Color: Colorless 43 Odor: None			
5. HEALTH HAZARDS 51 Personal Protective Equipment: Self-contained breathing apparatus, safety glasses and safety shoes. Type D or Type S canister mask. 52 Symptoms Following Exposure: Inhalation causes headache, dizziness, weakness of limbs, confusion, nausea, unconsciousness and finally death. 0.04% conc. 2 hr. or 0.6% conc. 1 hr. headache and discomfort with moderate exercise. 0.1 to 2% will produce throbbing in the head in about 1 hr. Tendency to stagger in about 1 hr. and confusion of the mind. Headache and nausea in about 2 hrs. 0.20-25% usually produces unconsciousness in about 1 hr. Inhalation of a 0.4% conc. can prove fatal in less than 1 hr. Inhalation of high concentrations can cause sudden unexpected collapse. Contact of liquid with skin will cause frostbite. 53 Treatment for Exposure: INHALATION: Remove from exposure, give oxygen if available, support respiration, call a doctor. SKIN: If burned by liquid, treat as frostbite. 54 Toxicity by Inhalation (Threshold Limit Value): 40 ppm 55 Short-Term Inhalation Limits: 800 ppm, 15 min. 56 Toxicity by Ingestion: Not pertinent gas with low boiling points. 57 Late Toxicity: Toxicity from overexposure persists for many days. 58 Vapor (Gas) Irritant Characteristics: Data not available. 59 Liquid or Solid Irritant Characteristics: Data not available. 60 Odor Threshold: Not pertinent.							

6. FIRE HAZARDS 61 Flash Point: Not pertinent. 62 Flammable Limits in Air: 12% - 5% 63 Fire Extinguishing Agents: Let fire burn out off flow of gas and cool adjacent containers with water. Extinguish tools of wearing self-contained breathing apparatus with dry chemicals or carbon dioxide. 64 Fire Extinguishing Agents Not to be Used: Not pertinent. 65 Special Hazards of Combustion Products: Asphyxiation due to carbon dioxide production may result. 66 Behavior in Fire: Flame has very little color. Containers may explode in fire. 67 Ignition Temperature: 1124°F 68 Electrical Hazard: Data not available. 69 Burning Rate: Not pertinent.	8. CARBON TETRACHLORIDE

Common Synonyms Carbon Tet Tetrachloroethane		Waxy liquid	Colorless	Sweet odor
		Sinks in water. Poisonous vapor is produced.		
Avoid contact with liquid and vapor. Keep person away from vapors until fully contained through appropriate decontamination procedures. Not reported as flammable under normal conditions, but it may become flammable under certain circumstances.				
Fire		Not Flammable POISONOUS AND IRRITATING GASES ARE PRODUCED WHEN HEATED Use extinguishers and other contained firefighting apparatus.		
		CALL FOR MEDICAL AID VAPOR POISONOUS IF INHALED Irritating to eyes. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. LIQUID POISONOUS IF SWALLOWED Irritating to skin and eyes. Remove contaminated clothing and shoes. Flush eye(s) for at least 10 minutes with plenty of water. If IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water if available and have victim induce vomiting. IF SWALLOWED and victim is UNCONSCIOUS or HAVING CONVULSIONS, do nothing except keep victim warm.		
Exposure				
Water Pollution		Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Affects local health and environment. No safe level of contamination in water intake.		
1. RESPONSE TO DISCHARGE See Response Methods Handbook, CG 666-4. Involuntary persons. Rescue victims. Should be removed.		2. LABELS No hazard label required by Code of Federal Regulations.		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Benzobismuth Nonaqueous Perchloromethane Tetrachloroethane 3.2 Coast Guard Compatibility Classification: Halogenaed hydrocarbon. 3.3 Chemical Formula: CCl ₄ 3.4 IMCO United Nations Numerical Designation: 2800		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Sweetish, aromatic, moderately strong ethereal somewhat resembling that of chloroform.		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Organic vapor cartridges for full mask; protect respiratory surfaces. 5.2 Symptoms Following Exposure: Dizziness, muscle titration, anesthesia may be accompanied by nausea and liver damage. Kidney damage also occurs, often producing decrease or stopping of urinary output. 5.3 Treatment for Exposure: EYES AND SKIN: Flush with plenty of water for eyes; get medical attention. Remove contaminated clothing and wash before reuse. INHALATION: Immediately remove to fresh air. Keep patient warm and quiet and get medical attention promptly. Start artificial respiration if breathing stops. INTENTION: Induce vomiting and get medical attention promptly. No specific antidote known. 5.4 Toxicity by Inhalation (Threshold Limit Value): 10 ppm 5.5 Short-Term Inhalation Limits: 10 ppm for 15 min. 5.6 Toxicity by Ingestion: Grade 2 - Death follows rapidly. 5.7 Low Toxicity: Causes severe liver, kidney and death stages and. 5.8 Vapor (Gas) Irritant Characteristics: Vapor causes moderate irritation such that personnel would find lower concentrations unpleasant. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain it may cause staining and reddening of the skin. 5.10 P.D. Threshold: Greater than 10 ppm.				

6 FIRE HAZARDS 6.1 Flash Point: Not flammable 6.2 Flammable Limits in Air: Not flammable 6.3 Fire Extinguishing Agents: Not pertinent 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent 6.5 Special Hazards of Combustion Products: Very poisonous phosgene gas when exposed to open flames 6.6 Behavior in Fire: Decomposes to form chlorine and phosgene 6.7 Ignition Temperature: Not flammable 6.8 Electrical Hazard: Not pertinent 6.9 Burning Rate: Not flammable	8 WATER POLLUTION 8.1 Aquatic Toxicity: Data not available 8.2 Waterfowl Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): None 8.4 Food Chain Concentration Potential: None

NOTES

CAR

CARENE

Common Synonyms M-carene Isodurene 4,7,7-Trimethyl-3-norbornene 3,7,7-Trimethylbicyclo[2,1,1] hex-3-ene		Liquid	Colorless	Sweet turpentine-like odor
Floats on water				
Stop discharge if possible. Keep fire away. Avoid contact with liquids. In case a fire occurs discharge immediately. Not a health hazard when inhaled. Not a skin irritant and is not a severe eye irritant.				
Fire	Combustible Compatible with dry chemicals and carbon dioxide. May become more flammable with heat. Not a severe eye irritant.			
Exposure	ALL FOR MEDICAL USE VAPOR Irritating to eyes, nose and throat. If inhaled will cause headache, coughing or difficult breathing. If inhaled in large quantities may cause respiratory distress. If inhaled in very large quantities may cause respiratory failure. LIQUID Irritating to skin and eyes. If swallowed will cause nausea and vomiting. Skin irritation may occur if contact is prolonged. Not a severe eye irritant. If swallowed will cause nausea and vomiting. If inhaled in large quantities may cause respiratory distress. If inhaled in very large quantities may cause respiratory failure. If swallowed will cause nausea and vomiting. If inhaled in large quantities may cause respiratory distress. If inhaled in very large quantities may cause respiratory failure.			
Water Pollution	Effect of low concentrations on aquatic life is unknown. Feeding to shorebirds. May be dangerous if it enters water intakes. Not a severe eye irritant. Not a severe eye irritant.			
1. RESPONSE TO DISCHARGE (See Response to Discharge Handbook, CG 446-4) Toxic, may be a flame hazard. Mechanical contamination Should be removed by chemical and physical treatment		2. LABELS No hazard label required by Code of Federal Regulations		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: M-carene Isodurene 4,7,7-Trimethyl-3-norbornene 3,7,7-Trimethylbicyclo[2,1,1]hex-3-ene 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: C ₁₀ H ₁₆ 3.4 HMCO/United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Sweet, pungent, like turpentine		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Organic vapor or air-supplied mask, goggles or face shield, rubber gloves. 5.2 Symptoms Following Exposure: Inhalation causes headache, confusion, respiratory distress. Ingestion irritates entire digestive system and may cause nausea if liquid enters lungs. It causes severe pneumonitis. Contact with eyes or skin causes irritation. 5.3 Treatment for Exposure: INHALATION: move victim to fresh air, call a doctor, administer artificial respiration and oxygen if required. INGESTION: give large amounts of water and induce vomiting, call a doctor. EYES: Flush with water for at least 15 min. SKIN: wipe off, wash with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limit: Data not available. 5.6 Toxicity by Ingestion: Grade 2 oral rat LD ₅₀ = 4.7 g/kg. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.				

6. FIRE HAZARDS 6.1 Flash Point: Data not available 6.2 Flammable Limits in Air: Data not available 6.3 Fire Extinguishing Agents: Foam, dry chemical, carbon dioxide 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective on fire 6.5 Special Hazards of Combustion Products: 6.6 Behavior in Fire: 6.7 Ignition Temperature: Data not available 6.8 Electrical Hazard: Data not available 6.9 Burning Rate: Data not available	8. WATER POLLUTION 8.1 Aquatic Toxicity: Data not available 8.2 Waterfowl Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): Data not available 8.4 Food Chain Concentration Potential: None
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction 7.2 Reactivity with Common Materials: Will attack some forms of plastics 7.3 Stability - During Transport: Stable 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent 7.5 Polymerization: Not pertinent 7.6 Inhibitor of Polymerization: Not pertinent	9. (continued on pages 1 and 2)	
NOTES	

CTC

CATECHOL

Common Synonyms: Oxyphenic acid Pyrocatechic acid Pyrocatechin, acid		Solid	White	Odorless
Sinks and mixes with water				
Very slightly soluble in water at room temperature. More soluble in water at higher temperatures. Insoluble in alcohol, ether, and benzene. Soluble in dilute aqueous solutions of sodium hydroxide and potassium hydroxide.				
Fire		Combustible POISONOUS GASES MAY BE PRODUCED WHEN HEATED When exposed to fire, it may produce irritating and/or toxic fumes. It may also produce carbon monoxide and carbon dioxide. It is not flammable.		
Exposure		AIRBORNE DUST DUST Irritating to eyes, nose and throat. If inhaled will cause coughing or difficult breathing. Inhalation may cause irritation of the respiratory tract. It may also cause irritation of the skin. SOLID Will burn skin and eyes. Harmful if swallowed. When in contact with skin, it may cause irritation. If swallowed, it may cause irritation of the gastrointestinal tract. It may also cause irritation of the skin.		
Water Pollution		Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes.		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 444-4) Flush with water. Water contamination. Dispose and flush.		2. LABELS No hazard labels required under code of Federal Regulations.		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: 1,2-Benzenediol; Catechol; 1,2-Dihydroxybenzene; ortho-Dihydroxybenzene; Oxyphenic acid; Pyrocatechol; Pyrocatechic acid; Pyrocatechol; Pyrocatechic acid. 3.2 Coast Guard Compatibility Classification: Not listed. 3.3 Chemical Formula: 1,2-DIHYDROXYBENZENE 3.4 INCOG Used Name as Numerical Designation: Not listed.		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: White 4.3 Odor: None		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Dust respirator if required; rubber gloves; apron; and boots; face shield. 5.2 Symptoms Following Exposure: Irritation of eyes or nose may cause irritation of eyes, nose, and throat. Ingestion may cause convulsions and respiratory failure. Contact with eyes causes burns and if possible permanent impairment of vision. Prolonged or repeated contact with skin may cause burn. 5.3 Treatment for Exposure: INHALATION: If effects occur, get medical attention. INGESTION: promptly give 1 quart of water and induce vomiting; get medical attention promptly; do not give anything if unconscious. EYES AND SKIN: immediately flush with plenty of water for at least 15 min. For eyes get medical attention promptly; remove and wash all contaminated clothing before reuse. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limit: Data not available. 5.6 Toxicity by Ingestion: Grade 2 (LD50 = 5 g/kg rats). 5.7 Late Toxicity: Causes tumors in mice. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.

CPS

CAUSTIC POTASH SOLUTION

Common Synonyms Potassium hydroxide solution Eye	Thick liquid Colorless Odorless Sinks and mixes with water
AVOID CONTACT WITH LIQUID Keep people away Wear rubber overclothing (including gloves) Stop discharge if possible Isolate and remove discharged material Notify local health and pollution control agencies	
Fire	Not flammable
Exposure	CALL FOR MEDICAL AID LIQUID Will burn skin and eyes. Harmful if swallowed Remove contaminated clothing and shoes Flush affected areas with plenty of water If IN EYES, hold eyelids open and flush with plenty of water If SWALLOWED and victim is CONSCIOUS, have victim drink water or milk DO NOT INDUCE VOMITING
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes Notify local health and wildlife officials Notify operators of nearby water intakes
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-3) Issue warning: corrosive Restrict access Unspill and flush	2 LABEL 
3 CHEMICAL DESIGNATIONS 31 Synonyms: Potassium hydroxide solution Eye 32 Coast Guard Compatibility Classification: Corrosive 33 Chemical Formula: KOH/H ₂ O 34 IMCO/United Nations Numerical Designation: N 01814	4 OBSERVABLE CHARACTERISTICS 41 Physical State (as shipped): Liquid 42 Color: Colorless 43 Odor: None
5. HEALTH HAZARDS 51 Personal Protective Equipment: Wide brimmed hat and close fitting safety goggles equipped with rubber side shields. Long sleeved cotton shirt or jacket with buttoned collar and buttoned sleeves. Rubber or rubber coated canvas gloves. Shirt sleeves should be buttoned over the gloves so that any spilled material will run down the outside of the gloves. Rubber safety toe shoes or boots and cotton coveralls. (Trousers cuffs should be worn outside of boots.) Rubber apron. 52 Symptoms Following Exposure: Causes severe burns of eyes, skin, and mucous membranes. 53 Treatment for Exposure: (Not quickly) EYES: flush with water for at least 15 min. SKIN: flush with water, then rinse with dilute vinegar (acetic acid). INGESTION: give water and milk. Do NOT induce vomiting. Call physician at once, even when injury seems to be slight. 54 Toxicity by Inhalation (Threshold Limit Value): Not pertinent 55 Short-Term Inhalation Limits: Not pertinent 56 Toxicity by Ingestion: Grade 2, oral rat LD ₅₀ = 365 mg/kg 57 Late Toxicity: None 58 Vapor (Gas) Irritant Characteristics: Not pertinent 59 Liquid or Solid Irritant Characteristics: Severe skin irritant. Causes second- and third-degree burns on short contact and is very injurious to the eyes. 510 Odor threshold: Not pertinent

CHC

CHARCOAL

Common Synonyms Vegetable carbon Animal carbon Activated charcoal Wood charcoal Shell charcoal		Solid powder, lumps, or grains	Black	Odorless
May float or sink in water				
Shut off ignition sources. Call fire department. Stay upwind. Use water spray to knock down dust. Isolate and remove discharged material. Notify local health and pollution control agencies.				
Fire		Combustible POISONOUS GASES MAY BE PRODUCED IN FIRE Flood discharge area with water		
Exposure		DUST Irritating to eyes, nose and throat. Move victim to fresh air. If in eyes, hold eyelids open and flush with plenty of water. SOLID Not harmful		
Water Pollution		Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Not biologically available if in solid form. Not a potential nutrient with nutrients.		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 448-4) Issue warning: high flammability. Disperse and flush.		2. LABEL 		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Vegetable carbon, Vegetable charcoal, Animal carbon, Animal charcoal, Mineral carbon, Mineral charcoal, Activated charcoal, Wood charcoal, Shell charcoal. 3.2 Chemical Compatibility Classification: Not applicable. 3.3 Chemical Formula: C. 3.4 IMCO/United Nations Numerical Designation: 4.2/1361, 1362.		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Powder, lumps, grains or sticks. 4.2 Color: Black. 4.3 Odor: None.		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Respirator for dust. 5.2 Symptoms Following Exposure: No significant symptoms. 5.3 Treatment for Exposure: No treatment required. 5.4 Toxicity by Inhalation (Threshold Limit Value): Not pertinent. 5.5 Short-Term Inhalation Limits: Not pertinent. 5.6 Toxicity by Ingestion: Non-toxic (actually used in therapy of poisoning cases). 5.7 Late Toxicity: None. 5.8 Vapor (Gas) Irritant Characteristics: Not pertinent. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Not pertinent.				

6. FIRE HAZARDS 6.1 Flash Point: Flammable solid may ignite spontaneously in air. 6.2 Flammable Limits in Air: Not pertinent. 6.3 Fire Extinguishing Agents: Water. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Incomplete combustion forms toxic carbon monoxide. 6.6 Behavior in Fire: Not pertinent. 6.7 Ignition Temperature: 600-750°F. 6.8 Electrical Hazard: Class I, Group I. 6.9 Burning Rate: Not pertinent.		8. WATER POLLUTION 8.1 Aquatic Toxicity: None. 8.2 Waterfowl Toxicity: None. 8.3 Biological Oxygen Demand (BOD): None. 8.4 Food Chain Concentration Potential: None.	
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: No reaction. 7.3 Stability During Transport: May ignite spontaneously in air. 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.		9. SELECTED MANUFACTURERS 1. Barney Cherry Co. Cassady at Eighth Street Columbus, Ohio 43216. 2. North American Carbon Inc. P. O. Box 19737 Columbus, Ohio 43219. 3. Union Carbide Corp. Carbon Products Division 270 Park Avenue New York, N. Y. 10017.	
11. HAZARD ASSESSMENT CODE (See Hazard Assessment Handbook, CG 448-3) II		10. SHIPPING INFORMATION 10.1 Grades or Purities: Various grades; those containing appreciable volatile material are more likely to catch fire. All shipments must be exposed to air and so certified. 10.2 Storage Temperature: Ambient. 10.3 Inert Atmosphere: No requirement. 10.4 Venting: Open (flame arrester).	
12. HAZARD CLASSIFICATIONS 12.1 Code of Federal Regulations: Flammable solid. 12.2 HAS Hazard Rating for Bulk Water Transportation: Not listed. 12.3 NFPA Hazard Classifications: Not listed.		13. PHYSICAL AND CHEMICAL PROPERTIES 13.1 Physical State at 15°C and 1 atm: Solid. 13.2 Molecular Weight: 12. 13.3 Boiling Point at 1 atm: Very high. 13.4 Freezing Point: Not pertinent. 13.5 Critical Temperature: Not pertinent. 13.6 Critical Pressure: Not pertinent. 13.7 Specific Gravity: 2 at 20°C (solid). 13.8 Liquid Surface Tension: Not pertinent. 13.9 Liquid-Water Interfacial Tension: Not pertinent. 13.10 Vapor (Gas) Specific Gravity: Not pertinent. 13.11 Ratio of Specific Heats of Vapor (Gas): Not pertinent. 13.12 Latent Heat of Vaporization: Not pertinent. 13.13 Heat of Combustion: 14,100 Btu/lb = 7,850 cal/g = 328 × 10 ³ J/kg. 13.14 Heat of Decomposition: Not pertinent. 13.15 Heat of Solution: Not pertinent. 13.16 Heat of Polymerization: Not pertinent.

NOTES			

CDN

CHLORDANE

Common Synonyms Chlordane 1, 2, 4, 5, 6, 7, 8-Octachloro-2, 3, 3a, 4, 7, 7a-hexahydro-4, 7-methanonendene Toxicity Octa-Klor Velocot 1068	Liquid or solution Brown Sharp odor Sinks in water
AVOID CONTACT WITH EYES. KEEP AWAY Wash eyes with plenty of water. If irritation persists, consult a physician. If on skin, wash with plenty of water. If in eyes, hold eyelids open and flush with plenty of water. If swallowed, induce vomiting and have victim drink water. If in milk and have victim induce vomiting. If swallowed, induce vomiting and have victim drink water. If in milk and have victim induce vomiting.	
Fire	Not flammable but solution may be combustible POISONOUS GASES MAY BE PRODUCED IN FIRE Extinguish with dry chemicals or carbon dioxide. Water may be ineffective on fire. If exposed, remove from area.
 Exposure	CALL FOR MEDICAL AID LIQUID OR SOLUTION POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED Irritating to skin and eyes. If on skin, wash with plenty of water. If in eyes, hold eyelids open and flush with plenty of water. If swallowed, induce vomiting and have victim drink water. If in milk and have victim induce vomiting. If swallowed, induce vomiting and have victim drink water. If in milk and have victim induce vomiting.
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes. Not recommended for use in water.
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: poison Restrict access Should be removed Chemical and physical treatment	2. LABELS No hazard label required by Code of Federal Regulations
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Chlordane 1, 2, 4, 5, 6, 7, 8, 8-Octachloro-2, 3, 3a, 4, 7, 7a-hexahydro-4, 7-methanonendene, Velocot 1068, CD-68, Tenechlor, Octa Klor 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: C ₁₀ HCl ₈ 3.4 IMCO/United Nations Numerical Designation: 611615	4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Brown 4.3 Odor: Penetrating aromatic slightly pungent like chlorine
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Respirator for sprays, fogs, or dust; goggles; rubber gloves 5.2 Symptoms Following Exposure: Moderately irritating to eyes and skin. Ingestion: absorption through skin or inhalation of mist or dust may cause excitability, convulsions, nausea, vomiting, diarrhea, and some local irritation of the gastrointestinal tract. 5.3 Treatment for Exposure: INHALATION: administer oxygen and give fluid therapy; do not give epinephrine, since it may induce ventricular fibrillation; enforce complete rest. EYES: flush with water for at least 15 min. SKIN: wash off skin with adequate quantities of soap and water; do NOT scrub. INGESTION: induce vomiting and follow with gastric lavage and administration of saline cathartics; ether and barbiturates may be used to control convulsions; oxygen and fluid therapy are also recommended; do NOT give epinephrine. Since no specific antidotes are known, symptomatic therapy must be accompanied by complete rest. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.5 mg/m ³ 5.5 Short-Term Inhalation Limits: 2 mg/m ³ for 10 min 5.6 Toxicity by Ingestion: Grade 3, oral LD ₅₀ = 283 mg/kg (rat) 5.7 Late Toxicity: Possible liver damage; loss of appetite and weight 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available	

6 FIRE HAZARDS 6.1 Flash Point: Solution 225°F (0°C) 132°F (56°C) Solid is not flammable 6.2 Flammable Limits in Air: 0.7% - 5% (kerosene solution) 6.3 Fire Extinguishing Agents: Dry chemical, foam, carbon dioxide 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective on solution fire 6.5 Special Hazards of Combustion Products: Irritating and toxic hydrogen chloride and phosgene gases may be formed when kerosene solution of compound burns 6.6 Behavior in Fire: Not pertinent 6.7 Ignition Temperature: 410°F (kerosene solvent) 6.8 Electrical Hazard: Data not available 6.9 Burning Rate: Not pertinent	8 WATER POLLUTION 8.1 Aquatic Toxicity: 0.5 ppm/96 hr, goldfish; 11 mg/l fresh water 8.2 Waterfowl Toxicity: LD ₅₀ = 1,200 mg/kg 8.3 Biological Oxygen Demand (BOD): Data not available 8.4 Food Chain Concentration Potential: High
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction 7.2 Reactivity with Common Materials: No reaction 7.3 Stability During Transport: Stable to 160°F 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent 7.5 Polymerization: Not pertinent 7.6 Inhibitor of Polymerization: Not pertinent	9 SELECTED MANUFACTURERS 1. Velocot Chemical Corp. 341 East Ohio Street Chicago, Ill. 60611 2. S. B. Penick & Co. 100 Church Street New York, N. Y. 10007 3. Chempar Chemical Co. 260 Madison Avenue New York, N. Y. 10016
11. HAZARD ASSESSMENT CODE (See Hazard Assessment Handbook, CG 446-3) A X Y	10. SHIPPING INFORMATION 10.1 Grades or Purity: Technical. A variety of dusts, powders, and solutions in kerosene containing 2-80% chlordane are shipped 10.2 Storage Temperature: Ambient 10.3 Inert Atmosphere: No requirement 10.4 Venting: Open (flame arrester)
12. HAZARD CLASSIFICATIONS 12.1 Code of Federal Regulations: Combustible Liquid 12.2 NAB Hazard Rating for Bulk Water Transportation: Not listed 12.3 NFPA Hazard Classifications: Not listed	13. PHYSICAL AND CHEMICAL PROPERTIES* 13.1 Physical State at 15°C and 1 atm: Liquid 13.2 Molecular Weight: 409.8 13.3 Boiling Point at 1 atm: Decomposes 13.4 Freezing Point: Not pertinent 13.5 Critical Temperature: Not pertinent 13.6 Critical Pressure: Not pertinent 13.7 Specific Gravity: 1.6 at 25°C (liquid) 13.8 Liquid Surface Tension: (est.) 25 dynes/cm = 0.025 N/m at 20°C 13.9 Liquid-Water Interfacial Tension: (est.) 50 dynes/cm = 0.05 N/m at 20°C 13.10 Vapor (Gas) Specific Gravity: Not pertinent 13.11 Ratio of Specific Heats of Vapor (Gas): Not pertinent 13.12 Latent Heat of Vaporization: Not pertinent 13.13 Heat of Combustion: (est.) -4,000 Btu/lb = -2,200 cal/g = -93 X 10 ³ J/kg 13.14 Heat of Decomposition: Not pertinent 13.15 Heat of Solution: Not pertinent 13.16 Heat of Polymerization: Not pertinent * Properties refer to undiluted, technical-grade chlordane

CTF

CHLORINE TRIFLUORIDE

Common Synonyms	
Liquefied compressed gas	Greenish yellow liquid or colorless gas
	Strong sweetish odor
Sinks and may boil in water. Reacts violently with water to produce poisonous gas. Boiling point is 33° F.	
AVOID CONTACT WITH LIQUID AND VAPOR. KEEP TIGHTLY AWAY. Wear chemical protective suit with self-contained breathing apparatus. Stop discharge if possible. Evacuate area if release is large discharge. Call fire department. Extinguish with dry chemical. Do not use water on adjacent fires. Do not use water or foam on adjacent fires. Containers may explode in fire.	
Fire	Not flammable. May explode on contact with combustibles. POISONOUS GASES ARE PRODUCED WHEN HEATED. Containers may explode in fire. Wear chemical protective suit with self-contained breathing apparatus. Combat fires from safe distance. Do not use water. Extinguish with dry chemical. Do not use water or foam on adjacent fires. Containers may explode in fire.
	CALL FOR MEDICAL AID. VAPOR POISONOUS IF INHALED. Irritating to skin, eyes, nose and throat. Move victim to fresh air. If breathing has stopped, give artificial respiration. If breathing, give oxygen.
Exposure	LIQUID POISONOUS IF SWALLOWED. Will burn skin and eyes. Remove contaminated clothing. Flush affected areas with plenty of water. DO NOT RUB WATER INTO AREAS. IF IN EYES: Flush with water for at least 15 minutes. If swallowed, do not induce vomiting. If swallowed, do not induce vomiting. If swallowed, do not induce vomiting.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Not a health risk and will be of little or no harm to the environment.

1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: poison air contaminant water contaminant: corrosive oxidizing material Restrict access Evacuate area	
2. LABELS  	
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: CTF 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: ClF ₃ 3.4 IMCO/United Nations Numerical Designation: 2/1749	
4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquefied compressed gas 4.2 Color: Gas colorless Liquid greenish yellow 4.3 Odor: Acid strong pungent sweetish sweet and irritating	
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Neoprene gloves and protective clothing made of glass fiber and Teflon including full hood self contained breathing apparatus with full face mask 5.2 Symptoms Following Exposure: Inhalation causes extreme irritation. If respiratory tract pulmonary edema may result. Vapors are very irritating to eyes and skin. Liquid causes severe burns. 5.3 Treatment for Exposure: Call physician at once after any exposure to this compound. INHALATION: remove victim to fresh air and keep him quiet. Give artificial respiration if breathing has stopped, give oxygen. Enforce rest for 24 hours. EYES: flush with water for at least 15 min., get medical attention. But do not interrupt flushing for at least 10 min. SKIN: flush with water, then with 1-3% aqueous ammonia, then again with water. Apply ice cold pack of saturated Epsom salt or 70° ethyl alcohol. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.1 ppm (ceiling limits) 5.5 Short-Term Inhalation Limits: 0.1 ppm for 5 min 5.6 Toxicity by Ingestion: Grade 4 LD ₅₀ < 50 mg/kg 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause severe irritation of eyes and throat and can cause eye or lung injury. They cannot be tolerated even at low concentrations. 5.9 Liquid or Solid Irritant Characteristics: Severe skin irritant, causes second and third degree burns on short contact and is very injurious to the eyes. 5.10 Odor Threshold: Data not available	

6. FIRE HAZARDS 6.1 Flash Point: Not flammable but may cause fire on contact with some materials. 6.2 Flammable Limits in Air: Not pertinent 6.3 Fire Extinguishing Agents: Dry chemical 6.4 Fire Extinguishing Agents Not to be Used: Do not use water on adjacent fires unless well protected against hydrogen fluoride gas. 6.5 Special Hazards of Combustion Products: If released from container, fumes are toxic and irritating. 6.6 Behavior in Fire: If released from container, can increase the intensity of fire. Containers may explode. 6.7 Ignition Temperature: Not pertinent 6.8 Electrical Hazard: Not pertinent 6.9 Burning Rate: Not pertinent	
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: Reacts explosively with water, evolving hydrogen fluoride (hydrofluoric acid) and chlorine. 7.2 Reactivity with Common Materials: Causes ignition of all combustible materials and even sand or concrete. Very similar to fluorine gas. 7.3 Stability During Transport: Stable 7.4 Neutralizing Agents for Acids and Caustics: Flood with water. 7.5 Polymerization: Not pertinent 7.6 Inhibitor of Polymerization: Not pertinent	
8. WATER POLLUTION 8.1 Aquatic Toxicity: Data not available 8.2 Waterfowl Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): None 8.4 Food Chain Concentration Potential: None

NOTES

(Continued on pages 5 and 6)

CRA

CHLOROACETOPHENONE

Common Synonyms Phenacyl chloride omega-Chloroacetophenone alpha-Chloroacetophenone Phenyl chloromethyl ketone Chloromethyl phenyl ketone Tear gas	Solid White to light yellow Sharp odor Sinks in water
AVOID CONTACT WITH SOLID AND DUST. KEEP PEOPLE AWAY. Wear goggles if entering the area; apparatus and rubber suit if high concentrations. Call for decontamination. Stop work if CS warning given. Knock down dust before entering and avoid contact with material. Notify health and pollution control agencies.	
Fire	Combustible POISONOUS GASES MAY BE PRODUCED IN FIRE Wear goggles with indirect breathing apparatus and protective clothing if entering area. Flood discharge area with water.
 Exposure	CALL FOR MEDICAL AID DUST POISONOUS IF INHALED OR IF SKIN IS EXPOSED Irritating to eyes, nose and throat. Move victim to fresh air. If eyes badly irritated, flush with plenty of water. If breathing has stopped, give artificial respiration. If breathing difficult, give oxygen. SOLID POISONOUS IF SWALLOWED Irritating to skin and eyes. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. If IN EYES, hold eye made open and flush with plenty of water. If SWALLOWED, do not induce vomiting. Give plenty of water to drink and have victim seek medical attention. If SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep person warm.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife agencies. Notify appropriate health and safety agencies.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: air contaminant Restrict access Disperse and flush	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Phenacyl chloride omega-Chloroacetophenone, alpha-Chloroacetophenone, Phenyl chloromethyl ketone, Tear gas, Chloromethyl phenyl ketone 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: C ₈ H ₇ ClO 3.4 IMCO/United Nations Numerical Designation: 6.1 (1697)	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: White to pale yellow 4.3 Odor: Pungent
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Full face organic canister mask, self-contained breathing apparatus, rubber gloves, protective clothing. 5.2 Symptoms Following Exposure: Inhalation causes tearing, burning of the eyes and difficulty in breathing; high concentrations may lead to development of acute pulmonary edema after latencies of 1 hr to several days; possible systemic manifestations include agitation, coma, contraction of pupils of eyes, loss of reflexes. External contact causes irritation of skin and intense irritation of eyes. Ingestion causes agitation, coma, contraction of pupils of eye, loss of reflexes. 5.3 Treatment for Exposure: INHALATION: remove victim from contaminated atmosphere at once; give artificial respiration and oxygen if necessary; watch for pulmonary edema for several days. EYES: flush with water; do not rub. SKIN: flush with water. INGESTION: get medical attention; watch for development of pulmonary edema for several days. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.05 ppm 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 3 oral LD ₅₀ = 52 mg/kg (rat) 5.7 Late Toxicity: Fatty infiltration of liver 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: 0.016 ppm

NOTES

CRB

CHLOROBENZENE

Common Synonyms Monochlorobenzene Phenyl chloride Benzene chloride	Watery liquid Colorless Sweet, almond odor Sinks Flammable vapor is produced
Avoid contact with liquid and vapor. Keep people away. No re-discharge if possible. No fire department. No water spray. No high water vapor. No fire and flame. No discharged material. No fire and flame. No fire and flame.	
Fire	FLAMMABLE Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Wear goggles and self-contained breathing apparatus. Extinguish with dry chemical foam or carbon dioxide.
Exposure	CARE FOR MEDICAL AID VAPOR: If inhaled, will cause coughing or distress. Not irritating to eyes, nose and throat. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. LIQUID Irritating to skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk.
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operator of nearby water intakes.
1. RESPONSE TO DISCHARGE (See Response Methods Manual, CG 446-4) Should be removed. Chemical and physical treatment.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Benzene chloride MCB Monochlorobenzene Phenyl chloride 3.2 Coast Guard Compatibility Classification: Halogenated hydrocarbon 3.3 Chemical Formula: C ₆ H ₅ Cl 3.4 IMCO United Nations Numerical Designation: 1114	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Mild almond odor, sweet, almond-like, acetyls.
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Organic vapor and dust respirator where appropriate; no gloves; vinyl gloves; chemical safety spectacles; eye shield where appropriate; when not wearing or impermeable clothing for splash protection; hard hat. 5.2 Symptoms Following Exposure: Irritating to skin, eyes and mucous membranes. Repeated exposure may cause dermatitis (redness, itching, swelling). Chronic inhalation of vapors may result in damage to lungs, liver and kidneys. Acute vapor exposures can cause symptoms ranging from coughing to bronchitis and pulmonary edema, and depression. 5.3 Treatment for Exposure: Get medical attention for all exposures and all serious exposures. Treat symptoms. INHALATION: Remove to clean air and give oxygen as needed. INGESTION: dilute by drinking water if vomiting occurs; administer more water. Administer saline laxative. EYES: flush thoroughly with water. SKIN: give contaminated clothing; wash exposed area with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): 25 ppm 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: (Grade 2) D ₅₀ is 2.5 g/kg rat, rabbit 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Vapors are nonirritating to eyes and throat. 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. Spilled on clothing and allowed to remain may cause staining and redness of the skin. 5.10 Odor Threshold: 0.27 ppm	

6. FIRE HAZARDS 6.1 Flash Point: 43°F (C) 57°F (C) 6.2 Flammable Limits in Air: 1.3% - 7.1% 6.3 Fire Extinguishing Agents: Carbon dioxide, dry chemical foam or water spray. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Burning in open flame can form oxycarbonyl and hydrogen chloride gases. 6.6 Behavior in Fire: Heavy vapor can travel a considerable distance to a source of ignition and flash back. 6.7 Ignition Temperature: 184°F 6.8 Electrical Hazard: Data not available 6.9 Burning Rate: test 14.6 mm/min	8. WATER POLLUTION 8.1 Aquatic Toxicity: 20 ppm 96 hr bluegill, 11 hr, freshwater 6.2 Waterways Toxicity: Data not available 6.3 Biological Oxygen Demand (BOD): 0.46 lb 5 days 6.4 Food Chain Concentration Potential: Data not available

CBN

4-CHLOROBUTYRONITRILE

Common Synonyms 4-Chlorobutyronitrile		Liquid	White to light yellow
Sinks in water			
Not to be charged in water. Keep away from water. Do not use in water. Do not use in water. Do not use in water. Do not use in water.			
Fire	Combustible POISONOUS GASES MAY BE PRODUCED IN FIRE Irritating gases may be produced when heated. Near fires and flames, avoid breathing vapors. Do not use in water. Do not use in water. Do not use in water. Do not use in water.		
Exposure	GASES FORMED IN FIRE VAPOR Irritating to eyes, nose and throat. If inhaled will cause coughing or difficult breathing. If inhaled, move victim to fresh air. If water enters eyes, flush with water. If in eyes, flush with water for 15 min. If on skin, wash with water. If swallowed, do not induce vomiting. If on skin, wash with water. If in eyes, flush with water for 15 min. If on skin, wash with water. If swallowed, do not induce vomiting. If on skin, wash with water.		
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Not to be used in water. Do not use in water. Do not use in water. Do not use in water.		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-1) Issue warning: "water contaminant" Should be removed. Chemical and physical treatment.		2. LABELS No hazard label required by Code of Federal Regulations.	
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: 4-Chlorobutyronitrile (Practical, mixture with 4-bromobutyronitrile) 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: $\text{CH}_2\text{CH}_2\text{CH}_2\text{CN} + \text{CH}_2\text{BrCH}_2\text{CH}_2\text{CN}$ 3.4 IMCO/United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: White to pale yellow 4.3 Odor: Data not available	
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Air supply mask or self-contained breathing apparatus for repeated handling large amounts; rubber gloves; safety goggles. 5.2 Symptoms Following Exposure: Chemical is moderately toxic. Inhalation causes irritation of nose and throat. Ingestion causes irritation of mouth and stomach. Contact with eyes causes irritation. Can penetrate the skin on prolonged contact; only slightly irritating. 5.3 Treatment for Exposure: INHALATION: move victim to fresh air; administer artificial respiration if required; call a doctor. INGESTION: give large amount of water; induce vomiting. EYES: flush with water for at least 15 min. SKIN: flush with plenty of water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 3.1 (D ₅₀ = 400 mg/kg (rat)) 5.7 Lethal Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available			
6. FIRE HAZARDS 6.1 Flash Point: Data not available 6.2 Flammable Limits in Air: Data not available 6.3 Fire Extinguishing Agents: Water, dry chemical foam, carbon dioxide 6.4 Fire Extinguishing Agents Not to be Used: 6.5 Special Hazards of Combustion Products: Toxic and irritating hydrogen cyanide, hydrogen bromide, and hydrogen chloride may form in fires. 6.6 Behavior in Fire: 6.7 Ignition Temperature: Data not available 6.8 Electrical Hazard: Data not available 6.9 Burning Rate: Data not available			
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction 7.2 Reactivity with Common Materials: May attack some forms of plastics 7.3 Stability During Transport: Stable 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent 7.5 Polymerization: Not pertinent 7.6 Inhibitor of Polymerization: Not pertinent			
8. WATER POLLUTION 8.1 Aquatic Toxicity: Data not available 8.2 Waterfowl Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): Data not available 8.4 Food Chain Concentration Potential: None

CHLOROFORM

Common Synonyms Trichloromethane	Watery liquid Colorless Sweet odor Sinks in water. Irritating vapor is produced.
Fire	Not flammable POISONOUS AND IRRITATING GASES ARE PRODUCED WHEN HEATED Heat pipes and vessels containing this liquid.
Exposure	VAPOR Irritating to eyes, nose and throat. If inhaled, will cause headache, nausea, dizziness, or loss of consciousness. May cause death. LIQUID Irritating to skin and eyes. Harmful if swallowed. Harmful if absorbed through skin. If swallowed, do not induce vomiting. Give water to drink. If inhaled, remove to fresh air. Give oxygen if breathing is difficult. If on skin, wash with soap and water. If in eyes, wash with water for 15 minutes. If on clothing, remove and wash separately.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Not a serious hazard to aquatic life. Not a serious hazard to humans.
1 RESPONSE TO DISCHARGE See Response Methods Manual, CG 445-41. Issue warning: air contaminant. Restrict access. No fire or fumes.	2. LABELS No hazard label required by Code of Federal Regulations.
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Trichloromethane 3.2 Coast Guard Compatibility Classification: Hazardous compound 3.3 Chemical Formula: CHCl_3 3.4 IMCO United Nations Numerical Designation: 4000000	4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Pleasant, sweet, etheric
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Chemical protective clothing and shoes. Use self-contained breathing apparatus. Above 25, suitable only for a limited use. 5.2 Symptoms Following Exposure: Headache, nausea, dizziness, loss of consciousness. 5.3 Treatment for Exposure: INHALATION: If inhaled, remove to fresh air. Give oxygen if breathing is difficult. If on skin, wash with soap and water. If in eyes, wash with water for 15 minutes. If swallowed, do not induce vomiting. Give water to drink. If on clothing, remove and wash separately. 5.4 Toxicity by Inhalation (Threshold Limit Value): 10 ppm for 10-hour work day. 5.5 Short-Term Inhalation Limits: 50 ppm for 10 min. 5.6 Toxicity by Ingestion: Grade 2.1. Do not ingest. 5.7 Late Toxicity: None. 5.8 Vapor (Gas) Irritant Characteristics: Vapor causes irritation to eyes, nose, throat, and skin. High concentrations are dangerous. The odor is unpleasant. 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If on skin, wash with soap and water. If in eyes, wash with water for 15 minutes. If on clothing, remove and wash separately. 5.10 Odor Threshold: 10 ppm.	

6 FIRE HAZARDS

- 6.1 Flash Point: Not flammable
 6.2 Flammable Limits in Air: Not flammable
 6.3 Fire Extinguishing Agents: Not pertinent
 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent
 6.5 Special Hazards of Combustion Products: Irritating and irritating gases are produced when heated.
 6.6 Behavior in Fire: Decomposes producing toxic gas.
 6.7 Ignition Temperature: Not flammable
 6.8 Electrical Hazard: Not pertinent
 6.9 Burning Rate: Not flammable

8 WATER POLLUTION

- 8.1 Aquatic Toxicity: Data not available
 8.2 Waterway Toxicity: Irritating to aquatic life
 8.3 Biological Oxygen Demand (BOD): None
 8.4 Food Chain Concentration Potential: None

CHLOROMETHYL METHYL ETHER

Common Synonyms Monochloromethyl ether Methyl chloromethyl ether A-1200	Liquid Colorless Irritating odor May float or sink in water. Poisonous. Flammable vapor is produced.
Fire	FLAMMABLE POISONOUS GASES MAY BE PRODUCED IN FIRE. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area.
Exposure	VAPOR Irritating to eyes, nose and throat. If inhaled will cause difficult breathing. LIQUID Will burn skin and eyes. Harmful if swallowed.
Water Pollution	Effect of low concentrations on aquatic life unknown. Fouling to shoreline. May be dangerous if it enters water intakes.
1. RESPONSE TO DISCHARGE See Response Methods Handbook, CG 448-4. Issue warning: poison, high. Contaminants: air contaminants, corrosive. Restrict access. Evacuate area.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Monochloromethyl ether, Methyl chloromethyl ether, and others. 3.2 Consumer Compatibility Classification: Not applicable. 3.3 Chemical Formula: CH_3OCH_2Cl 3.4 HSO/United Nations Numerical Designation: 1.1 (2.4)	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Colorless. 4.3 Odor: Irritating.
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Self-contained breathing apparatus, goggles, other proper protective clothing. 5.2 Symptoms Following Exposure: Inhalation causes sore throat, fever, chills, difficulty in breathing. Contact of liquid with eyes causes severe burns and redness; vapor is a powerful tear gas. Skin contact causes severe burns and necrosis. Ingestion causes severe burns of mouth and stomach. 5.3 Treatment for Exposure: INHALATION: Remove from exposure, support respiration, call physician. EYES: Wash with copious quantities of water for at least 15 min., call physician. SKIN: Wash with large amounts of water. INGESTION: Do NOT induce vomiting; give large amounts of water, call a physician. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limit: Data not available. 5.6 Toxicity by Ingestion: Grade 2, oral LD_{50} = 427 mg/kg (rat). 5.7 Late Toxicity: Considered to be long cancer producing. 5.8 Vapor (Gas) Irritant Characteristics: Vapors are moderately irritating such that personnel will not usually tolerate moderate or high concentrations. 5.9 Liquid or Solid Irritant Characteristics: Fairly severe skin irritant. May cause pain and second degree burns after a few minutes contact. 5.10 Odor Threshold: Data not available.	

6. FIRE HAZARDS 6.1 Flash Point: 91°F (33°C). 6.2 Flammable Limits in Air: Data not available. 6.3 Fire Extinguishing Agents: Foam, dry chemical, carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective. 6.5 Special Hazards of Combustion Products: Irritating and toxic hydrogen chloride and phosgene gases may be formed. 6.6 Behavior in Fire: If burned material may form powerful tear gas. When wet also forms irritating formaldehyde gas. 6.7 Ignition Temperature: Data not available. 6.8 Electrical Hazard: Data not available. 6.9 Burning Rate: 10 cm/min.	8. WATER POLLUTION 8.1 Aquatic Toxicity: Data not available. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: None.																												
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: Reacts to evolve formaldehyde and hydrogen chloride. The reaction is not violent. 7.2 Reactivity with Common Materials: Will react with surface moisture to evolve hydrogen chloride which is corrosive to metal. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Flood with water. Rinse with sodium bicarbonate or lime solution. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9. SELECTED MANUFACTURERS Dow Chemical Co. Midland, Mich. 48640 Ashland Chemical Co. 940 West St. Paul Ave. Milwaukee, Wis. 53233 Eastman Organic Chemicals Inc. Rochester, N.Y. 14606

p-CHLOROPHENOL

Common Synonyms 4-Chlorophenol	Solid	White to straw	Medicinal odor
Sinks in water			
Avoid contact with solid and dust. Keep in original container. Wear rubber overclothing (including gloves). Stop discharge if possible. Call fire department. Isolate and remove discharged material. Notify local health and pollution control agencies.			
Fire	Combustible POISONOUS GASES MAY BE PRODUCED IN FIRE Irritating gases may be produced when heated. Wear goggles and suit contained on breathing apparatus. Extinguish with water, dry chemicals, foam or carbon dioxide.		
Exposure	CALL FOR MEDICAL AID DUST Irritating to eyes, nose and throat. If inhaled will cause headache or dizziness. If in eyes: Hold eyelids open and flush with plenty of water. If breathing has stopped: Give artificial respiration. If breathing is difficult: Give oxygen. SOLID Will burn skin and eyes. If swallowed will cause nausea and vomiting. Remove contaminated clothing and shoes. Flush affected area with plenty of water. If INHALED: Hold eyelids open and flush with plenty of water. If SWALLOWED and victim is CONSCIOUS: Have victim drink water or milk. If SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS: Do not induce vomiting. DO NOT INDUCE VOMITING.		
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 444-1) Issue warning: water contaminant. Should be removed. Chemical and physical treatment.		2. LABELS No hazard label required by Code of Federal Regulations.	
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: 4-Chlorophenol 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: 1,4-Cl ₂ C ₆ H ₄ O 3.4 IMCO/United Nations Numerical Designation: 6.1/2020		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: Colorless to straw 4.3 Odor: Strong medicinal	
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Rubber gloves, face shield, boots and apron, respiratory protection. 5.2 Symptoms Following Exposure: Inhalation causes headache, dizziness, weak pulse. Ingestion causes irritation of mouth and stomach, headache, dizziness, weak pulse. Contact with eyes causes severe irritation and burning. Contact with skin causes irritation and burn. If absorbed causes same symptoms as inhalation. 5.3 Treatment for Exposure: INHALATION: move to fresh air, get medical attention if any symptoms develop. INGESTION: do not induce vomiting unless advised by a physician, give large amounts of milk, egg whites, or water and get medical help immediately, no specific antidote known. EYES: immediately flush with plenty of water for at least 30 min. SKIN: flush with safety shower while removing all contaminated clothing, wash with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 3: oral LD ₅₀ = 500 mg/kg (rat). 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: 30 ppm.			

6. CPL

CHLOROPICRIN, LIQUID

Common Synonyms Trichloronitromethane Nitrochloroform Piclume Nitro trichloromethane		Only liquid	Colorless	Extremely irritating odor
		Sinks in water. Poisonous vapor is produced.		
AVOID CONTACT WITH LIQUID AND VAPOR. KEEP PEOPLE AWAY. Wear goggles with continued breathing apparatus and rubber overclothing (including gloves) if discharge is possible. Stop discharge if possible. Isolate and remove discharging material. Notify local health and pollution control agencies.				
Fire		Not flammable. POISONOUS GASES ARE PRODUCED IN FIRE. Containers may explode in fire. Wear chemical protective suit with self-contained breathing apparatus if exposed or forced with water.		
		CALL FOR MEDICAL AID. VAPOR POISONOUS IF INHALED. Irritating to eyes, nose and throat. Move victim to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. LIQUID POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED. Will burn skin and eyes. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES: hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk. DO NOT INDUCE VOMITING.		
Exposure				
Water Pollution		Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 448-4) Issue warning: poison, water contaminant, air contaminant. Restrict access to area. Should be removed. Chemical and physical treatment.		2. LABEL 		
3. CHEMICAL DESIGNATIONS 31 Synonyms: Trichloronitromethane Nitrochloroform Piclume Nitrotrichloromethane 32 Coast Guard Competibility Classification: Not applicable. 33 Chemical Formula: CCl ₃ NO ₂ 34 IMCO/United Nations Numerical Designation: 6.1/1580		4. OBSERVABLE CHARACTERISTICS 41 Physical State (as shipped): Liquid 42 Color: Colorless 43 Odor: Intensely irritating lachrymator, intense and penetrating odor which causes a pronounced secretion of tears.		
5. HEALTH HAZARDS 51 Personal Protective Equipment: Organic type canister mask, goggles or face shield, rubber gloves, protective clothing. 52 Symptoms Following Exposure: Inhalation causes nausea, eye watering, stinging, bronchitis and pulmonary edema. Vapor is a powerful tear gas. Liquid irritates and burns skin and causes severe burns of eyes. Ingestion causes severe irritation of mouth and stomach. 53 Treatment for Exposure: Get medical attention following all exposures to this compound. INHALATION: remove from exposure, support respiration. EYES: flush with copious quantities of water for at least 15 min. SKIN: wash with water for 15 min. INGESTION: do NOT induce vomiting, give large amounts of water. 54 Toxicity by Inhalation (Threshold Limit Value): 0.1 ppm 55 Short-Term Inhalation Limits: Data not available. 56 Toxicity by Ingestion: Grade 3, oral LD ₅₀ = 250 mg/kg (rats) 57 Late Toxicity: Data not available. 58 Vapor (Gas) Irritant Characteristics: Vapors cause severe irritations of eyes and throat and can cause eye or lung injury. They cannot be tolerated even at low concentrations. 59 Liquid or Solid Irritant Characteristics: Severe skin irritant. Causes second and third degree burns on short contact and is very injurious to the eyes. 60 Odor Threshold: 1.1 ppm.				

6 FIRE HAZARDS

61 **Flash Point:** Not flammable
62 **Flammable Limits in Air:** Not flammable
63 **Fire Extinguishing Agents:** Cool exposed containers with water
64 **Fire Extinguishing Agents Not to be Used:** Not pertinent
65 **Special Hazards of Combustion Products:** Not pertinent
66 **Behavior in Fire:** Compound forms a powerful tear gas when heated. Heated material may detonate under fire conditions
67 **Ignition Temperature:** Not pertinent
68 **Electrical Hazard:** Not pertinent
69 **Burning Rate:** Not pertinent

7 CHEMICAL REACTIVITY

NOTES

CSA

CHLOROSULFONIC ACID

Common Synonyms Chlorosulfonic acid	Liquid Colorless to light yellow Sharp, choking odor
AVOID CONTACT WITH SOLID AND VAPOR. Keep splash away from face and eyes. Use proper ventilation and absorbent clothing. Do not breathe vapors. Small leaks: Plug with inert material or use proper ventilation.	
Fire	May cause fire on contact with combustibles. Flammable, explosive gases may be formed on contact with metals and moisture. DO NOT USE WATER. Use dry chemical or carbon dioxide. Wear goggles, self-contained breathing apparatus, and protective clothing.
Exposure	CALL FOR MEDICAL AID. VAPOR: Irritating to eyes, nose, and throat. Harmful if inhaled. Move to fresh air. If eye, throat, or respiratory tract are affected, respiration may be difficult. Seek medical attention. LIQUID: Will burn skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED, get person to SNIFFER. Do not induce vomiting. DO NOT INDUCE VOMITING.
Water Pollution	Dangerous to aquatic life in high concentrations. May be dangerous if it enters water intakes. Do not allow effluents to enter water bodies. Do not permit discharge into water bodies.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning of air contaminant. Restrict access. Chemical and physical treatment.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Chlorosulfonic acid 3.2 Coast Guard Compatibility Classification: Inorganic acids 3.3 Chemical Formula: ClSO_3H 3.4 IMCO/United Nations Numerical Designation: 1501/15	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless to pale yellow 4.3 Odor: Sharp acid penetrating pungent
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Acid proof goggles or a rubber hood; long rubber gloves; rubber shoes; long rubber apron; shirt and trousers of wool or acrylic fiber and a flu with a trim. For emergency use involving considerable exposure, a complete rubber suit with hood, gloves and boots of rubber should be used. In case of fire use self contained breathing apparatus. 5.2 Symptoms Following Exposure: INHALATION: Vapor extremely irritating to lungs and mucous membranes. Vapor has such a sharp and penetrating odor that inhalation of severely toxic quantities is unlikely unless it is impossible to escape the fumes. CONTACT WITH EYES OR SKIN: liquid acid will severely burn body tissue. 5.3 Treatment for Exposure: Call a physician in all cases. INHALATION: remove victim to fresh air if he is not breathing; apply artificial respiration; give oxygen if breathing is difficult; do NOT induce vomiting. SKIN: flush with plenty of water for at least 15 min. while removing contaminated clothing and shoes. 5.4 Toxicity by Inhalation (Threshold Limit Value): 5 ppm 5.5 Short-Term Inhalation Limits: 5 ppm for 5 min.; 30 ppm for 10 min.; 30 ppm for 60 min. 5.6 Toxicity by Ingestion: Data not available 5.7 Late Toxicity: None 5.8 Vapor (Gas) Irritant Characteristics: Severe eye and throat irritant. Can cause eye or lung injury and cannot be tolerated even at low concentrations. 5.9 Liquid or Solid Irritant Characteristics: Severe skin irritant. Causes second and third degree burns on short contact. Very injurious to the eyes. 5.10 Odor Threshold: 1.5 ppm	

6. FIRE HAZARDS 6.1 Flash Point: Not flammable. 6.2 Flammable Limits in Air: Not flammable. 6.3 Fire Extinguishing Agents: Not pertinent. 6.4 Fire Extinguishing Agents Not to be Used: Water. 6.5 Special Hazards of Combustion Products: Decomposes into irritating and toxic gases. 6.6 Behavior in Fire: Although nonflammable it may ignite other combustibles. Contact with water AND metal produces explosive hydrogen gas. 6.7 Ignition Temperature: Not flammable. 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: Not flammable.	8. WATER POLLUTION 8.1 Aquatic Toxicity: 282 ppm/96 hr. mosquito fish; 11 µm. fresh water; 100-300 ppm/48 hr. shrimp; 1 CC. salt water. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): None. 8.4 Food Chain Concentration Potential: None.																												
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: Reacts violently with water forming hydrochloric acid (vapor) and sulfuric acid. 7.2 Reactivity with Common Materials: Hydrogen is highly flammable and explosive gas is generated by the action of the acid on most metals. May cause reaction by contact with combustible materials. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Although the acid reacts violently with water, flooding from a distance must be carried out before neutralizing with lime water or sodium bicarbonate solution. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9. REVISED 1978

4-CHLORO-o-TOLUIDINE

Common Synonyms: 2-Amino-5-chlorotoluene 5-Chloro-2-aminotoluene 4-Chloro-2-methylaniline Fast Red TR base Red TR base		Solid Gray to white Weak fishy odor
AVOID CONTACT WITH SKIN AND EYES. KEEP HOLD AWAY Wear goggles to protect eyes from splashes and fumes. Wear clothing to protect skin from splashes. Call fire department. Wash exposed skin with soap and water. Flush and irrigate with large amounts of water. Notify local health and police authorities.		
Fire	Combustible POISONOUS GASES MAY BE PRODUCED IN FIRE. Extinguish with water. Do not use foam or carbon dioxide. Get exposed area wet with water.	
 Exposure	CALL FOR MEDICAL AID DUST POISONOUS IF INHALED Move victim to fresh air. If in eyes, hold eyelids open and flush with plenty of water. If inhaled, get fresh air and give oxygen. SOLID POISONOUS IF SWALLOWED Remove contaminated clothing and shoes. If inhaled, get fresh air and give oxygen. If in EYES, hold eyelids open and flush with plenty of water. If SWALLOWED and victim is CONSCIOUS, have victim drink water. If SWALLOWED and victim is UNCONSCIOUS, DO NOT GIVE. If SWALLOWED and victim is UNCONSCIOUS OR HAVING CON- VULSIONS, do not check expirations with	
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and police authorities. Notify police and health water works.	
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 444-4) Issue warning: poison water contaminant Restrict access Should be removed Chemical and physical treatment		2. LABEL

CMA

CHROMIC ANHYDRIDE

Common Synonyms Chromic oxide Chromium trioxide Chromic acid	Solid flakes or powder Dark red Odorless Sinks and mixes with water
Avoid contact with solid and dust. Keep people away. Wear goggles, self-contained breathing apparatus, and rubber overalls (including gloves). Stay upwind and use water spray to knock down dust. Isolate and remove discolored material. Notify local health and pollution control agencies.	
Fire	Not flammable May cause fire on contact with combustibles Containers may explode when heated in a fire Extinguish with water Cool exposed containers with water
Exposure	CALL FOR MEDICAL AID SOLID Will burn skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES: Hold eyelids open and flush with plenty of water. IF SWALLOWED: Do not induce vomiting. Have victim drink water or milk. DO NOT INDUCE VOMITING.
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes Notify local health and wildlife officials Notify operators of nearby water intakes
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning - water contaminant Disperse and flush	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Chromic acid Chromic oxide Chromium trioxide 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: CrO ₃ 3.4 IMCO United Nations Numerical Designation: 5.1/1463	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: Dark red 4.3 Odor: None
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Goggles and respirator (special chromic acid filters are available for respirators to prevent inhalation of dust or mist). 5.2 Symptoms Following Exposure: Very irritating to eyes and respiratory tract. Ingest on causes severe gastrointestinal symptoms. Contact with eyes or skin causes burns; prolonged contact produces dermatitis (chromic sores). 5.3 Treatment for Exposure: INGESTION: call a physician. DO NOT induce vomiting. SKIN OR EYES: Wash eyes thoroughly for at least 15 min. Flush contact skin areas with water; remove contaminated clothing and wash before reuse. 5.4 Toxicity by Inhalation (Threshold Limit Value): Not pertinent. 5.5 Short-Term Inhalation Limits: Not pertinent. 5.6 Toxicity by Ingestion: Grade III D ₅₀ to 500 mg/kg. 5.7 Late Toxicity: Lung cancer. 5.8 Vapor (Gas) Irritant Characteristics: Not pertinent. 5.9 Liquid or Solid Irritant Characteristics: Severe skin irritant. Causes second- and third-degree burns on short contact; very injurious to the eyes. 5.10 Odor Threshold: Not pertinent.	

6. FIRE HAZARDS 6.1 Flash Point: Not flammable 6.2 Flammable Lim'ts in Air: Not flammable 6.3 Fire Extinguishing Agents: Water 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent 6.5 Special Hazards of Combustion Products: Not pertinent 6.6 Behavior in Fire: Containers may explode 6.7 Ignition Temperature: May ignite organic materials on contact 6.8 Electrical Hazard: Not pertinent 6.9 Burning Rate: Not flammable	8. NOTES	

CBA

COBALT ACETATE

Common Synonyms Cobalt acetate tetrahydrate Cobaltous acetate Cobaltous acetate		Solid Pink Vinegar like odor
Sinks and mixes with water		
Stop discharge if possible. Keep people away. Avoid contact with solid and dust. Isolate and remove discharged material. Notify local health and pollution control agencies.		
Fire	Not flammable POISONOUS GASES MAY BE PRODUCED IN FIRE. Wear goggles and self-contained breathing apparatus.	
Exposure	CALL FOR MEDICAL AID DUST Irritating to eyes, nose and throat. If inhaled will cause coughing or difficult breathing. If in eyes, hold eyelids open and flush with plenty of water. If breathing has stopped, give artificial respiration. If swallowed, give plenty of water. SOLID Irritating to skin and eyes. If swallowed will cause nausea and vomiting. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF EYES ARE IRRITATED, keep flushing with plenty of water. IF SWALLOWED, do not induce vomiting. Have plenty of water on hand. IF SWALLOWED, do not induce vomiting. Have plenty of water on hand. IF SWALLOWED, do not induce vomiting. Have plenty of water on hand.	
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and pollution control agencies. Notify pollution control agency.	
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-3) Issue warning - water contaminant. Disperse and flush.		2. LABELS No hazard label required by Code of Federal Regulations.
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Cobalt (II) acetate, Cobalt acetate tetrahydrate, Cobaltous acetate 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: $\text{Co}(\text{C}_2\text{H}_3\text{O}_2)_4 \cdot 4\text{H}_2\text{O}$ 3.4 IMCO/United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: Pink 4.3 Odor: Slight acetic acid odor, vinegar like
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Dust respirator, rubber gloves, goggles or face shield, protective clothing 5.2 Symptoms Following Exposure: Inhalation causes shortness of breath and coughing; permanent disabilities may occur. Ingestion causes pain and vomiting. Contact with eyes causes irritation. Contact with skin may cause dermatitis. 5.3 Treatment for Exposure: INHALATION: move to fresh air; if breathing has stopped, begin artificial respiration. INGESTION: give large amounts of water; induce vomiting. EYES: flush with water for at least 15 min. SKIN: wash with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.1 mg/m (as cobalt) 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 3 LD ₅₀ 50-100 mg/kg 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available

CBC

COBALT CHLORIDE

Common Synonyms Cobaltous chloride hexahydrate Cobaltous chloride Cobaltous chloride dihydrate		Solid	Pink to red	Slight sharp odor
Sinks and mixes with water				
Not to be discharged if possible. Keep as pure as possible. Avoid contact with skin and clothing. If contact occurs, remove by large amount of water. Notify manufacturer and local health authorities.				
Fire		Not flammable		
Exposure		CAUTION MEDICAL USE DUST Irritating to eyes, nose and throat. If inhaled will cause coughing or difficult breathing. If in contact with skin, wash with large amount of water. If swallowed, give large amount of water. Notify manufacturer and local health authorities. SOLID Irritating to skin and eyes. If swallowed will cause nausea and vomiting. Notify manufacturer and local health authorities. POISONING If in contact with skin, wash with large amount of water. If swallowed, give large amount of water. Notify manufacturer and local health authorities. If SWALLOWED, DO NOT INDUCE VOMITING. ONLY HAVE EMERGENCY PERSONNEL ADVISED.		
Water Pollution		Dangerous to aquatic life in high concentrations. May be dangerous if it enters water intakes. Notify manufacturer and local health authorities.		
1. RESPONSE TO DISCHARGE (See Resource Methods Handbook, CG 446-4.) Issue warning: water contains name. Disperse and flush.		2. LABELS No hazard label required by Code of Federal Regulations.		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Cobalt(II) chloride Cobaltous chloride Cobaltous chloride dihydrate Cobaltous chloride hexahydrate 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: CoCl_2 3.4 IMCO/United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: Pink to red 4.3 Odor: Very slight acid		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Rubber gloves, side shield goggles, full face respirator, protective clothing. 5.2 Symptoms Following Exposure: Inhalation causes respiratory disease, shortness of breath, and coughing; permanent disability may occur. Ingestion causes pain, vomiting, and diarrhea. Contact causes irritation of eyes and may cause skin rash. 5.3 Treatment for Exposure: INHALATION: move victim to fresh air; if breathing has stopped, begin artificial respiration and call a doctor. INGESTION: give large amount of water; induce vomiting. EYES: flush with water at least 15 min.; consult physician if irritation persists. SKIN: flush with water. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.1 mg/m (as cobalt) 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade III Dose 50-500 mg/kg 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available

CON

COBALT NITRATE

Common Synonyms Cobaltous nitrate Cobalt(II) nitrate Cobaltous nitrate hexahydrate		Subl	Red	Odorless
		Sinks and mixes with water		
NO HAZARD LABEL REQUIRED BY CODE OF FEDERAL REGULATIONS				
Fire		Not flammable Will increase the intensity of a fire POISONOUS GASES MAY BE PRODUCED IN FIRE		
Exposure		DUST Irritating to eyes, nose and throat If inhaled will cause coughing or difficult breathing SOLID Irritating to skin and eyes If swallowed will cause nausea and vomiting		
Water Pollution		HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters sewer intakes		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning - water contaminant Disperse and flush		2. LABELS No hazard label required by Code of Federal Regulations		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Cobalt(II) nitrate, Cobaltous nitrate, Cobaltous nitrate hexahydrate 3.2 Coast/Gastro Compatibility Classification: Not listed 3.3 Chemical Formula: $(\text{NO}_3)_2 \cdot 6\text{H}_2\text{O}$ 3.4 IMCO/United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: Red 4.3 Odor: None		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Bu. Mines approved respirator, rubber gloves, safety goggles, protective clothing 5.2 Symptoms Following Exposure: Inhalation causes shortness of breath and coughing; permanent disability may occur. Ingestion causes pain and vomiting. Contact with eyes or skin causes irritation. 5.3 Treatment for Exposure: INHALATION: move to fresh air; if breathing has stopped, begin artificial respiration and call a doctor. INGESTION: give large amount of water, induce vomiting, call a doctor. EYES: flush with water for at least 15 min. SKIN: flush with water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 1 LD₅₀ = 400 mg/kg (rabbits) 5.7 Late Toxicity: Causes malignant tumors in rabbits 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Not pertinent				

6 FIRE HAZARDS

6.1 **Flash Point:** Not flammable
 6.2 **Flammable Limits in Air:** Not flammable
 6.3 **Fire Extinguishing Agents:** Not pertinent
 6.4 **Fire Extinguishing Agents Not to be Used:** Not pertinent
 6.5 **Special Hazards of Combustible Products:**
 Toxic oxides of nitrogen may be produced
 6.6 **Behavior in Fire:** May increase the intensity of fire
 6.7 **Ignition Temperature:** Not pertinent
 6.8 **Electrical Hazard:** Not pertinent
 6.9 **Burning Rate:** Not pertinent

7. CHEMICAL REACTIVITY

7.1 **Reactivity with Water:** No reaction
 7.2 **Reactivity with Common Materials:**
 Corrosive with wood and paper may cause fire
 7.3 **Stability During Transport:** Stable
 7.4 **Neutralizing Agents for Acids and Caustics:** Not pertinent
 7.5 **Polymerization:** Not pertinent
 7.6 **Inhibitor of Polymerization:** Not pertinent

8 WATER POLLUTION

8.1 **Aquatic Toxicity:**
 10 ppm* stickleback test, 96 hr, time, fresh water
 10 ppm* 48 hr, stickleback test, survival time, fresh water
 10 ppm* 96 hr, stickleback test, survival time, fresh water
 *available
 8.2 **Waterfowl Toxicity:** Data not available
 8.3 **Biological Oxygen Demand (BOD):** None

(Continued on page 4)

9 SELECTED MANUFACTURERS

1. Mooney Chemicals, Inc.
 2401 Stanton Road
 Cleveland, Ohio 44113
 2. The Harshaw Chemical Co.
 1945 E. 97th St.
 Cleveland, Ohio 44106
 3. Allied Chemical Corp.
 Specialty Chemicals Div.
 P. O. Box 4067R
 Morristown, N. J. 07960

10 SHIPPING INFORMATION

10.1 **Grades or Purity:** Technical hexahydrate. May be shipped as anhydrous salt.
 10.2 **Storage Temperature:** Ambient
 10.3 **Inert Atmosphere:** No requirement
 10.4 **Venting:** Open

11. HAZARD ASSESSMENT CODE

(See Hazard & Assessment Handbook, CG 446-3)

SS

12. HAZARD CLASSIFICATIONS

12.1 **Code of Federal Regulations:** Not listed
 12.2 **NAS Hazard Rating for Bulk Water Transportation:** Not listed

Reactivity (Yellow)	0 0

003 003

*First column refers to nonfire situation

13 PHYSICAL AND CHEMICAL PROPERTIES

13.1 **Physical State at 15°C and 1 atm:** Solid
 13.2 **Molecular Weight:** 291.04
 13.3 **Boiling Point at 1 atm:** Not pertinent (decomposes)
 13.4 **Freezing Point:** 13.1°C = 55°C = 32°F
 13.5 **Critical Temperature:** Not pertinent
 13.6 **Critical Pressure:** Not pertinent
 13.7 **Specific Gravity:** 1.54 at 20°C (solid)
 13.8 **Liquid Surface Tension:** Not pertinent
 13.9 **Liquid-Water Interfacial Tension:** Not pertinent
 13.10 **Vapor (Gas) Specific Gravity:** Not pertinent
 13.11 **Ratio of Specific Heats of Vapor (Gas):** Not pertinent
 13.12 **Latent Heat of Vaporization:** Not pertinent
 13.13 **Heat of Combustion:** Not pertinent
 13.14 **Heat of Decomposition:** Not pertinent
 13.15 **Heat of Solution:** 31 Btu/lb = 17 cal/g = 0.71 × 10³ J/kg
 13.16 **Heat of Polymerization:** Not pertinent

(Continued on page 5 and 6)

8. WATER POLLUTION (Cont'd)

8.4 **Food Chain Concentration Potential:**
 Bioconcentration of 200 - 1000 fold only under constant exposure. Not significant in spill condition.

CBS	COBALT SULFATE
-----	----------------

CBS	COBALT SULFATE
-----	----------------

Common Synonyms Cobaltous sulfate heptahydrate Cobalt ^{II} sulfate Bieberryte		Solid Sinks and mixes with water	Rose pink Odorless
Fire			
Not flammable POISONOUS GASES MAY BE PRODUCED IN FIRE			
Exposure			
DUST Irritating to eyes, nose and throat If inhaled will cause coughing or difficult breathing SOLID Irritating to skin and eyes If swallowed will cause nausea and vomiting			
Water Pollution			
HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes			
1. RESPONSE TO DISCHARGE (See Response Methods, Amendment CG 448-4) Issue warning: water contaminant Disperse and flush		2. LABELS No hazard label required by Code of Federal Regulations	
3 CHEMICAL DESIGNATIONS 31 Synonyms: Bieberryte, Cobalt(II) sulfate Cobaltous sulfate heptahydrate 32 Coast Guard Compatibility Classification: Not listed 33 Chemical Formula: $\text{CoSO}_4 \cdot 7\text{H}_2\text{O}$ 34 IMCO/United Nations Numerical Designation: Not listed		4 OBSERVABLE CHARACTERISTICS 41 Physical State (as shipped): Solid 42 Color: Rose pink 43 Odor: None	
HEALTH HAZARDS			
51 Personal Protective Equipment: By NIOSH-approved respirator, goggles, protective gloves 52 Symptoms Following Exposure: Inhalation causes shortness of breath and coughing; permanent disability may occur. Ingestion causes pain and vomiting. Contact with eyes or skin causes irritation. 53 Treatment for Exposure: INHALATION: move to fresh air; if breathing has stopped, begin artificial respiration and call a doctor. INGESTION: give large amount of water, induce vomiting, call a doctor. EYES: flush with water for at least 15 min.; consult a physician if irritation persists. SKIN: flush with water. 54 Toxicity by Inhalation (Threshold Limit Value): 0.1 mg/m ³ (as cobalt) 55 Short-Term Inhalation Limits: Data not available 56 Toxicity by Ingestion: Grade 3 LD ₅₀ 500 mg/kg 57 Late Toxicity: Data not available 58 Vapor (Gas) Irritant Characteristics: Data not available 59 Liquid or Solid Irritant Characteristics: Data not available 510 Odor Threshold: Data not available			

6 FIRE HAZARDS 61 Flash Point: Not flammable 62 Flammable Limits in Air: Not flammable 63 Fire Extinguishing Agents: Not pertinent 64 Fire Extinguishing Agents Not to be Used: Not pertinent 65 Special Hazards of Combustion Products: Toxic cobalt oxide fumes may form in fire 66 Behavior in Fire: 67 Ignition Temperature: Not pertinent 68 Electrical Hazards: Not pertinent 69 Jumping Rate: Not pertinent	8 WATER POLLUTION 81 Aquatic Toxicity: 10 ppm*** stickleback lethal fresh water *As cobalt **Time period not specified 82 Waterfowl Toxicity: Data not available 83 Biological Oxygen Demand (BOD): None 84 Food Chain Concentration Potential: Bioconcentration of 200 - 1000 fold only under constant exposure. Not significant in spill conditions
7. CHEMICAL REACTIVITY 71 Reactivity with Water: No reaction 72 Reactivity with Common Materials: 73 Stability During Transport: Stable 74 Neutralizing Agents for Acids and Caustics: Not pertinent 75 Polymerization: Not pertinent 76 Inhibitor of Polymerization: Not pertinent	9. SELECTED MANUFACTURERS 1 Mooney Chemicals, Inc. 2301 Scranton Road Cleveland, Ohio 44111 2 The Harshaw Chemical Co. 1945 E. 97th St. Cleveland, Ohio 44106 3 Mallinckrodt Chemical Works 223 Westside Ave. P.O. Box 384 Jersey City, N.J. 07303
	10 SHIPPING INFORMATION 101 Grades or Purity: Technical reagent, may also be shipped as a monohydrate or hexahydrate 102 Storage Temperature: Ambient 103 Inert Atmosphere: No requirement 104 Venting: Open
11 HAZARD ASSESSMENT CODE See Hazard Assessment Handbook, CG 445-3 NN	13 PHYSICAL AND CHEMICAL PROPERTIES 131 Physical State at 15°C and 1 atm: Solid 132 Molecular Weight: 266 133 Boiling Point at 1 atm: Not pertinent (decomposes) 134 Freezing Point: Not pertinent 135 Critical Temperature: Not pertinent 136 Critical Pressure: Not pertinent 137 Specific Gravity: 1.845 at 20°C (solid) 138 Liquid Surface Tension: Not pertinent 139 Liquid-Water Interfacial Tension: Not pertinent 1310 Vapor (Gas) Specific Gravity: Not pertinent 1311 Ratio of Specific Heats of Vapor (Gas): Not pertinent 1312 Latent Heat of Vaporization: Not pertinent 1313 Heat of Combustion: Not pertinent 1314 Heat of Decomposition: Not pertinent 1315 Heat of Solution: 23 Btu/lb with 1 g water at 10°C 1316 Heat of Polymerization: Not pertinent

NOTES

CLD

COLLODION

Common Synonyms Cellulose nitrate solution Nitrocellulose solution Pyroxylin solution Box tree gum Nitrocellulose gum		Thick liquid Flash on water. Flammable, irritating vapor is produced. Boiling point is around 949°F.	Colorless Ether-like odor
See the entries under each of the departmental Safety, Health, and Environment Division and the corresponding National Health and Pollution Agency entries.			
Fire	FLAMMABLE POISONOUS GASES MAY BE PRODUCED IN FIRE Containers may explode in fire. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Extensive hydrolysis may occur in the presence of water. Containers may rupture with heat.		
Exposure	LIQUID Not harmful VAPOR Irritating to eyes, nose and throat. If inhaled will cause dizziness, difficult breathing, or loss of consciousness. May cause respiratory irritation. Extensive hydrolysis may occur in the presence of water.		
Water Pollution	Effect of low concentrations on aquatic life is unknown. Floating to shoreline. May be dangerous if it enters water intakes. Not flammable in water.		
1. RESPONSE TO DISCHARGE See Response Methods Handbook, CG 445.4 Toxic warning: Not flammable. Response: Mechanical containment. Should be avoided. Chemical and physical treatment.		2. LABEL 	
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Cellulose nitrate solution Nitrocellulose solution Pyroxylin solution Box tree gum Nitrocellulose gum 3.2 Const Guard Compatibility Classification: Not applicable. 3.3 Chemical Formula: Not pertinent. 3.4 IMCO/United Nations Numerical Designation: 1.1, 2.1, 3.1, 4.1, 5.1, 6.1, 7.1, 8.1, 9.1, 10.1, 11.1, 12.1, 13.1, 14.1, 15.1, 16.1, 17.1, 18.1, 19.1, 20.1, 21.1, COP

COPPER ACETATE

Common Synonyms Acetic acid cupric salt Crystallized verdigris Neutral verdigris Cupric acetate monohydrate		Solid Bluish-green Odorless Mixes with water
Fire		Not flammable Irritating gases may be produced when heated
Exposure		DUST Irritating to eyes, nose and throat. If inhaled will cause coughing or difficult breathing. SOLID Will burn eyes. Irritating to eyes. If swallowed will cause nausea, vomiting or loss of consciousness. Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes.
Water Pollution		Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes.
1. RESPONSE TO DISCHARGE See Response Handbook: CG 448.4 Issue warning - water contaminant Disperse and flush		2. LABELS No hazard label required by Code of Federal Regulations
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Acetic acid cupric salt, Crystallized verdigris, Cupric acetate monohydrate, Neutral verdigris 3.2 Corrosion Compatibility Classification: Not listed 3.3 Chemical Formula: $Cu(C_2H_3O_2)_2 \cdot H_2O$ 3.4 IMCO/United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: Bluish green 4.3 Odor: None
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Dust mask, goggles or face shield, protective gloves 5.2 Symptoms Following Exposure: Inhalation of dust causes irritation of throat and lungs. Ingestion of large amounts causes violent vomiting and purging, intense pain, collapse, coma, convulsions, and paralysis. Contact with solutions irritates eyes; contact with solid causes severe eye surface injury and irritation of skin. 5.3 Treatment for Exposure: INHALATION: move to fresh air. INGESTION: give large amount of water, induce vomiting, get medical attention. EYES: flush with water for at least 15 min., get medical attention if injury was caused by solid. SKIN: flush with water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 2 (LD ₅₀ 5.5 g/kg rat) 5.7 Late Toxicity: Causes degeneration of liver in dogs 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available		

6 FIRE HAZARDS

- 6.1 **Flash Point:** Not flammable
 6.2 **Flammable Limits in Air:** Not flammable
 6.3 **Fire Extinguishing Agents:** Not pertinent
 6.4 **Fire Extinguishing Agents Not to be Used:** Not pertinent
 6.5 **Special Hazards of Combustion Products:** Irritating vapors of acetic acid may form in fires.
 6.6 **Behavior in Fire:**
 6.7 **Ignition Temperature:** Not pertinent
 6.8 **Electrical Hazard:** Not pertinent
 6.9 **Burning Rate:** Not pertinent

7. CHEMICAL REACTIVITY

- 7.1 **Reactivity with Water:** No reaction
 7.2 **Reactivity with Common Materials:**
 7.3 **Stability During Transport:** Stable
 7.4 **Neutralizing Agents for Acids and Caustics:** Not pertinent
 7.5 **Polymerization:** Not pertinent
 7.6 **Inhibitor of Polymerization:** Not pertinent

8. WATER POLLUTION

- 8.1 **Aquatic Toxicity:** Data not available
 8.2 **Waterway Toxicity:** Data not available
 8.3 **Biological Oxygen Demand (BOD):** Data not available
 8.4 **Food Chain Concentration Potential:** Copper known to be accumulated by shellfish. Hazard to humans unknown.

9. SELECTED MANUFACTURERS

1. Allied Chemical Corp.
 General Chemical Div.
 40 Rector St.
 New York, N.Y. 10007
 2. Union Carbide Corp.
 Chemicals and Plastics Div.
 270 Park Ave.
 New York, N.Y. 10017
 3. J. T. Baker Chemical Co.
 Phillipsburg, N.J. 08865

10. SHIPPING INFORMATION

- 10.1 **Grade or Purity:** Technical 99.99%
 Reagent 99%
 10.2 **Storage Temperature:** Ambient
 10.3 **Inert Atmosphere:** No requirement
 10.4 **Venting:** Open

11. HAZARD ASSESSMENT CODE

(See Hazard Assessment Handbook: CG 448-3)
 SS

12. HAZARD CLASSIFICATIONS

- 12.1 **Code of Federal Regulations:** Not listed
 12.2 **NAS Hazard Rating for Bulk Water Transportation:** Not listed
 12.3 **IFPA Hazard Classification:** Not listed

13. PHYSICAL AND CHEMICAL PROPERTIES

- 13.1 **Physical State at 15°C and 1 atm:** Solid
 13.2 **Molecular Weight:** 199.65
 13.3 **Boiling Point at 1 atm:** Not pertinent (decomposes)
 13.4 **Freezing Point:** 210°F = 100°C = 373°K
 13.5 **Critical Temperature:** Not pertinent
 13.6 **Critical Pressure:** Not pertinent
 13.7 **Specific Gravity:** 1.9 at 20°C (solid)
 13.8 **Liquid Surface Tension:** Not pertinent
 13.9 **Liquid-Water Interfacial Tension:** Not pertinent
 13.10 **Vapor (Gas) Specific Gravity:** Not pertinent
 13.11 **Ratio of Specific Heats of Vapor (Gas):** Not pertinent
 13.12 **Latent Heat of Vaporization:** Not pertinent
 13.13 **Heat of Combustion:** Not pertinent
 13.14 **Heat of Decomposition:** Not pertinent
 13.15 **Heat of Solution:** Not pertinent
 13.16 **Heat of Polymerization:** Not pertinent

(continued on page 1 and 2)

NOTES

CAA

COPPER ACETOARSENITE

Common Synonyms Schwebel's green Imperial green Paris green Emerald green New green	Solid Powder Green Odorless Sinks and mixes slowly with water
1. HAZARD STATEMENTS 2. HAZARD IDENTIFICATION	
Fire	Not flammable POISONOUS GASES MAY BE PRODUCED WHEN HEATED
 Exposure	DUST POISONOUS IF INHALED Irritating to eyes, nose and throat SOLID POISONOUS IF SWALLOWED Irritating to skin and eyes
Water Pollution	Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes
1. RESPONSE TO DISCHARGE See Response Methods Handbook, CG 445-4 Injure washing with water Contaminant Restrict access Should be removed Chemical and physical treatment	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Imperial green, New green, Vienna green, Meadow green, Paris green, Mint green, Kings green, Parrot green 3.2 Coast Guard Competibility Classification: Not applicable 3.3 Chemical Formula: $Cu(CH_3COO)_2 \cdot 3H_2O$ 3.4 HMCO/United Nations Numerical Designation: 2.1.1.5	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: Emerald green 4.3 Odor: None
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Dust respirator, eye protection, gloves, face shield 5.2 Symptoms Following Exposure: Dizziness, eye irritation, ingestion causes gastro-intestinal symptoms, muscular cramps and nervous system effects may lead to death 5.3 Treatment for Exposure: Following ingestion, induce severe emesis, do not get medical attention. Administer 100 cc of 1% sodium bicarbonate solution with water. If inhaled, wash thoroughly with soap and water. INGESTION: Give copious fluids, water and induce repeated vomiting. Give 100 cc of 1% sodium bicarbonate 5.4 Toxicity by Inhalation (Threshold Limit Value): Not determined 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 4 oral LD ₅₀ = 22 mg/kg rats 5.7 Late Toxicity: Arsenic poisoning 5.8 Vapor (Gas) Irritant Characteristics: Not pertinent 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Not pertinent	

6. FIRE HAZARDS 6.1 Flash Point: Not flammable 6.2 Flammable Limits in Air: Not flammable 6.3 Fire Extinguishing Agents: Not pertinent 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent 6.5 Special Hazards of Combustion Products: If heated, toxic fumes and gases may be formed in fire 6.6 Behavior in Fire: Not pertinent 6.7 Ignition Temperature: Not pertinent 6.8 Electrical Hazard: Not pertinent 6.9 Burning Rate: Not pertinent	8. NOTES	

CPA

COPPER ARSENITE

Common Synonyms Cupric arsenite Svedsh green Cupra green Copper orthoarsenite		Solid	Green	Odorless
Sinks in water				
AVOID CONTACT WITH SOLID AND DUST WITH YOUR FACE STEEL: Avoid contact with steel. It will cause staining. It will also cause corrosion. TOXIC: Avoid contact with food and drink. NODATA: Avoid contact with children.				
Fire	Not flammable POISONOUS GASES MAY BE PRODUCED WHEN HEATED C. Exposed and will burn			
	CALL FOR MEDICAL AID DUST POISONOUS IF INHALED Irritating to eyes, nose and throat May cause respiratory irritation Breathing dust may irritate and inflame the lining of the nose If breathing is difficult, seek medical aid SOLID POISONOUS IF SWALLOWED Irritating to skin and eyes Remove contaminated clothing Flush affected area with plenty of water IF IN EYES: hold eyelids open and flush with water for 15 min IF SWALLOWED: do not induce vomiting. Give plenty of water to dilute. Do not take any food or drink IF SWALLOWED: do not induce vomiting. Give plenty of water to dilute. Do not take any food or drink			
Exposure				
Water Pollution	Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water courses Not biodegradable and soluble in acid Not persistent in the environment			
1 RESPONSE TO DISCHARGE (See Response Methods Handbook CG 446-1) Issue warning: poison water contain in situ Restrict access Should be removed Chemical and physical treatment		2 LABEL 		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Cupric arsenite, Swedish green, Scheele's green, Cupra green, Copper orthoarsenite 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: CuHAsO ₃ 3.4 IMCO/United Nations Numerical Designation: 6.1, 1586		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: Green, yellowish green 4.3 Odor: None		
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Dust respirator, rubber gloves, goggles or face shield 5.2 Symptoms Following Exposure: Dust: irritates eyes. Ingestion causes gastric disturbances, tremors, muscular cramps, and nervous collapse that may cause death 5.3 Treatment for Exposure: Following ingestion or unusually severe exposure, get medical attention. Alert doctor to possibility of arsenic poisoning. If in eyes, flush with water for 15 min. SKIN: wash with soap and water. INGESTION: give large amounts of water, induce vomiting, give cathartic, such as 22 oz. of Epsom salt in water 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.5 mg/m ³ (as arsenic) 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 3 LD ₅₀ 5 to 500 mg/kg 5.7 Late Toxicity: Arsenic poisoning 5.8 Vapor (Gas) Irritant Characteristics: Not pertinent 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Not pertinent				

6 FIRE HAZARDS 6.1 Flash Point: Not flammable 6.2 Flammable Limits in Air: Not flammable 6.3 Fire Extinguishing Agents: Not pertinent 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent 6.5 Special Hazards of Combustion Products: Poisonous volatile arsenic oxides may be formed in fires 6.6 Behavior in Fire: Not pertinent 6.7 Ignition Temperature: Not pertinent 6.8 Electrical Hazard: Not pertinent 6.9 Burning Rate: Not pertinent	8 WATER POLLUTION 8.1 Aquatic Toxicity: Data not available 8.2 Waterway Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): Data not available 8.4 Food Chain Concentration Potential: Data not available

CPC

COPPER CHLORIDE

Common Synonyms: Cupric chloride dihydrate Eriochlorite (anhydrous)	Solid Blue-green Odorless Sinks and mixes with water
Storage: Store in a cool, dry place. Avoid contact with solid and liquid. Isolate from any discharge to water. Notify local health and pollution control agencies.	
Fire	Not flammable
Exposure	CALL FOR MEDICAL AID DUST Irritating to eyes, nose and throat. If inhaled will cause coughing or difficult breathing. If in eyes, hold eyelids open and flush with plenty of water. If on skin, wash thoroughly with plenty of water. If inhaled, move to fresh air and give artificial respiration if breathing is difficult. SOLID Will burn eyes. Irritating to eyes. If swallowed will cause nausea and vomiting. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED, do not induce vomiting. CONSUME plenty of water and have victim drink water. IF SWALLOWED, do not induce vomiting. CONSUME plenty of water and have victim drink water.
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes. Notify local health and pollution control agencies. Notify local water utility water intakes.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning - water contaminant. Disperse and flush.	2. LABELS No hazard label required by Code of Federal Regulations.
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Cupric chloride dihydrate, Eriochlorite (anhydrous). 3.2 Coast Guard Competibility Classification: Not listed. 3.3 Chemical Formula: $\text{CuCl}_2 \cdot 2\text{H}_2\text{O}$ 3.4 (MCO/United Nations Numerical Designation): Not listed.	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid. 4.2 Color: Green, blue green, blue. 4.3 Odor: None.
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Buy Mines approved respirator, rubber gloves, safety goggles. 5.2 Symptoms Following Exposure: Inhalation causes coughing and sneezing. Ingestion causes pain and vomiting. Contact with solutions irritates eyes, contact with solid causes severe eye surface injury and skin irritation. 5.3 Treatment for Exposure: INHALATION: move to fresh air. INGESTION: give large amounts of water, induce vomiting, get medical attention. EYES: flush with water for 15 min. consult a physician if injury was caused by solid. SKIN: flush with water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 3 LD ₅₀ 500 mg/kg. 5.7 Lethal Toxicity: Causes liver damage in rabbits. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.	

6. FIRE HAZARDS 6.1 Flash Point: Not flammable. 6.2 Flammable Limits in Air: Not flammable. 6.3 Fire Extinguishing Agents: Not pertinent. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Irritating hydrogen chloride gas may form in fire. 6.6 Behavior in Fire: 6.7 Ignition Temperature: Not pertinent. 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: Not pertinent.	8. WATER POLLUTION 8.1 Aquatic Toxicity: 0.009 ppm (as Cu), *goldfish/rapid death - fresh water. 0.1 - 0.5 ppm *crayfish/toxic/salt water. 0.55 ppm/12 hr/mussel/killed/salt water. *Time period not specified. 8.2 Waterway Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): None. 8.4 Food Chain Concentration Potential: Copper known to be accumulated by shellfish. Hazard to humans unknown.								
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: In presence of moisture may corrode metals; the reaction is not hazardous. 7.3 Stability during Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Flush with water, rinse with dilute solution of sodium bicarbonate or soda ash. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9. CCY

COPPER CYANIDE

Common Synonyms Cuprous cyanide Cupricum	Solid powder White Sinks in water
ALL INFORMATION HEREON IS UNCLASSIFIED EXCEPT WHERE SHOWN OTHERWISE	
Fire	Not flammable POISONOUS GASES MAY BE PRODUCED WHEN HEATED
 Exposure	CAUTION: FOR MEDICAL USE DUST: Irritating to eyes, nose and throat If inhaled will cause dizziness or loss of consciousness If swallowed will cause dizziness and loss of consciousness SOLID: POISONOUS IF SWALLOWED Irritating to skin and eyes If swallowed will cause dizziness and loss of consciousness If SWALLOWED and vomit, DO NOT INDUCE VOMITING. Rinse mouth with water. If SWALLOWED and vomit, DO NOT INDUCE VOMITING. Rinse mouth with water. If SWALLOWED and vomit, DO NOT INDUCE VOMITING. Rinse mouth with water.
Water Pollution	Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes Not compatible with most biological life forms Not persistent in the environment
1 RESPONSE TO DISCHARGE (See Response Methods Handbook CG 446-4) Issue warning: poison water contaminant Restrict access Should be removed Chemical and physical treatment	2. LABEL 
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Cuprous Cyanide 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: $CuCN$ 3.4 IMCO/United Nations Numerical Designation: 6.1/1587	4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Powder 4.2 Color: White 4.3 Odor: Data not available
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Dust respirator, protective goggles, face mask, protective clothing 5.2 Symptoms Following Exposure: Following severe exposure to dust, symptoms of cyanide poisoning may develop (see ingestion). Ingestion causes anxiety, confusion, dizziness, sudden loss of consciousness, odor of bitter almonds on breath or in vomitus, rapid weak pulse, convulsions, and paralysis. Contact with eyes causes irritation. 5.3 Treatment for Exposure: <i>Get medical attention after all exposures to this substance.</i> (INHALATION: remove victim to fresh air. INGESTION: if breathing has stopped begin artificial respiration immediately, administer by inhalation amyl nitrite pearls for 15-30 seconds of every minute, while a sodium nitrite solution is being prepared; discontinue amyl nitrite and immediately inject intravenously 10 ml of a 2% soln. of sodium nitrite (monsterile if necessary) over a period of 2 to 4 min. do not remove needle, through same needle infuse 50 ml of a 2.5% aqueous soln. of sodium thiosulfate. injection should take about 10 min. (Concentrations of 15-50% are permissible if total dose is approx. 12 grams.) Oxygen therapy may be of value in combination with the above. If symptoms recur, repeat injections of nitrite and thiosulfate at half the above doses. EYES: flush with water for at least 15 min. SKIN: flush with water, wash with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): 5 mg/m (as cyanides) 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 4.1 Dose < 50 mg/kg 5.7 Late Toxicity: Data not available	

6 FIRE HAZARDS 6.1 Flash Point: Not flammable 6.2 Flammable Limits in Air: Not flammable 6.3 Fire Extinguishing Agents: Not pertinent 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent 6.5 Special Hazards of Combustion Products: Toxic hydrogen cyanide gas may form in fires 6.6 Behavior in Fire 6.7 Ignition Temperature: Not pertinent 6.8 Electrical Hazard: Not pertinent 6.9 Burning Rate: Not pertinent	8 WATER POLLUTION 8.1 Aquatic Toxicity: Data not available 8.2 Waterflow Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): Data not available 8.4 Food Chain Concentration Potential: Copper known to be accumulated by shellfish. Hazard to humans unknown
7 CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction 7.2 Reactivity with Common Materials: 7.3 Stability During Transport: Stable in presence of moisture, toxic hydrogen cyanide gas may collect in enclosed spaces 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent 7.5 Polymerization: Not pertinent 7.6 Inhibitor of Polymerization: Not pertinent	9 SELECTED MANUFACTURERS 1 J. I. Baker Chemical Co. Phillipsburg, N. J. 08865 2 Gallard Schlesinger Chemical Mfg. Co. 584 Mineola Ave. Carle Place, N. Y. 11514 3 Pfaltz and Bauer, Inc. 126-04 Northern Blvd. Flushing, N. Y. 11368

CPF

COPPER FLUOROBORATE

Common Synonyms Cupric fluoroborate solution Copper borofluoride solution Copper(II) fluoroborate solution		Liquid	Dark blue	Odorless
		Sinks and mixes with water		
Not flammable Irritating gases may be produced when heated				
Fire				
Exposure		ALL FORMS ARE IRRITANT VAPOR Irritating to eyes, nose and throat If inhaled will cause coughing or difficult breathing If swallowed will cause nausea and vomiting LIQUID Irritating to skin and eyes If swallowed will cause nausea and vomiting If in contact with skin, wash immediately with water If swallowed, induce vomiting and seek medical attention If in contact with skin, wash immediately with water If swallowed, induce vomiting and seek medical attention		
Water Pollution		Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes Do not discharge into waterways		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning - water contaminant Disperse and flush		2. LABELS No hazard label required by Code of Federal Regulations		
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Copper borofluoride solution; Copper(II) fluoroborate solution; Cupric fluoroborate solution 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: Cu(BF ₄) · H ₂ O 3.4 IMCO/United Nations Numerical Designation: Not listed		4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Clear dark blue 4.3 Odor: None		
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Goggles or face shield; rubber apron and gloves 5.2 Symptoms Following Exposure: Inhalation of mist irritates nose and throat. Ingestion causes pain and vomiting. Contact causes severe irritation of eyes and irritation of skin 5.3 Treatment for Exposure: INHALATION: move to fresh air. INGESTION: give large amounts of water and induce vomiting if required. EYES: flush with water for at least 15 min. get medical attention if irritation persists. SKIN: flush with water 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 1 LD ₅₀ 500 mg/kg 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available

CNN

COPPER NAPHTHENATE

Common Synonyms Paint drier		Liquid Dark green Gasoline-like odor May float or sink in water
Shut off ignition sources. Call fire department. Stop discharge if possible. Isolate and remove discharged material. Notify local health and pollution control agencies.		
Fire	Combustible Extinguish with dry chemical, foam, or carbon dioxide. Water may be ineffective. Do not use. Cool exposed containers with water.	
Exposure	Call for medical aid. LIQUID Irritating to skin and eyes. Harmful if swallowed. Remove person from area. Flush and shower. First affected areas with plenty of water. IF IN EYES: hold lids open and flush with plenty of water. IF SWALLOWED: do not induce vomiting. Have victim drink water. Do NOT induce vomiting.	
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS Fouling to shoreline. May be dangerous if it enters water intakes. Notify local health and pollution officials. Notify operators of nearby water intakes.	
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: water contaminant. Mechanical containment. Should be removed. Chemical and physical treatment.		2. LABELS No label required by Code of Federal Regulations.
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Paint drier. 3.2 Coast Guard Compatibility Classification: Not applicable. 3.3 Chemical Formula: Mixture. 3.4 IMCO/United Nations Numerical Designation: 3.3/1168.		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Dark green. 4.3 Odor: Like gasoline, slight aromatic.
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Goggles or face shield, plastic gloves (as for gasoline). 5.2 Symptoms Following Exposure: Vapor causes mild irritation of eyes and mild irritation of respiratory tract if inhaled. Ingestion causes irritation of stomach. Aspiration causes severe lung irritation and rapidly developing pulmonary edema, central nervous system excitement followed by depression. 5.3 Treatment for Exposure: INHALATION: remove victim to fresh air. EYES: wash with copious amounts of water for at least 15 min. SKIN: wipe off and wash with soap and water. INGESTION: do NOT induce vomiting; guard against aspiration into lungs. ASPIRATION: enforce bed rest; give oxygen; call doctor. 5.4 Toxicity by Inhalation (Threshold Limit Value): 500 ppm. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade I, oral rat LD ₅₀ = 4.6 g/kg. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Vapors are non-irritating to the eyes and throat. 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain, may cause smarting and reddening of skin. 5.10 Odor Threshold: Data not available.		

6. FIRE HAZARDS 6.1 Flash Point: 100°F (38°C) (typical). 6.2 Flammable Limits in Air: 0.8% - 5.0% (mineral spirits). 6.3 Fire Extinguishing Agents: Dry chemical, foam, carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective. 6.5 Special Hazards of Combustion Products: Not pertinent. 6.6 Behavior in Fire: Not pertinent. 6.7 Ignition Temperature: 540°F (mineral spirits). 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: 4 cm/min.		8. WATER POLLUTION 8.1 Aquatic Toxicity: 2.0 ppm 72 hr. blue-green algae; 100% kill fresh water. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): 8% 5 days. 8.4 Food Chain Concentration Potential: None.
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: No reaction. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.		9. SELECTED MANUFACTURERS 1. Witco Chemical Corporation Organics Division 277 Park Avenue New York, N.Y. 10017 2. Cincinnati Milacron Chemicals Inc. 400 Jersey Ave. New Brunswick, N.J. 08901 3. Ferro Corporation 7090 Krick Rd. Bedford, Ohio 44146.
11. HAZARD ASSESSMENT CODE (See Hazard Assessment Handbook, CG 446-3) A L U N Y		10. SHIPPING INFORMATION 10.1 Grade or Purity: 8% in mineral spirits or mineral oil; 5% in mineral spirits. May float instead of sink if water. 10.2 Storage Temperature: Ambient. 10.3 Inert Atmosphere: Not required. 10.4 Venting: Pressure vacuum or open (flame arrester).
12. HAZARD CLASSIFICATIONS 12.1 Code of Federal Regulations: Not listed. 12.2 NAS Hazard Rating for Bulk Water Transportation: Not listed. 12.3 MFPA Hazard Classifications: Not listed.		13. CNI

COPPER NITRATE

Common Synonyms: Cupric nitrate trihydrate Gerhardite		Solid Blue Odorless Sinks and mixes with water
Not flammable Will increase the intensity of a fire Irritating gases may be produced when heated		
DUST Irritating to eyes, nose and throat If inhaled will cause coughing or difficult breathing		
SOLID Will burn eyes If swallowed will cause nausea, vomiting or loss of consciousness		
HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes		
1. RESPONSE TO DISCHARGE See Response Methods Handbook, CG 446-4 Issue warning: water contaminant Disperse and flush		2. LABELS No hazard label required by Code of Federal Regulations
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Cupric nitrate trihydrate, Gerhardite 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: $Cu(NO_3)_2 \cdot 3H_2O$ 3.4 IMCO/United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: Blue 4.3 Odor: None
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Dust mask, goggles or face shield, protective gloves 5.2 Symptoms Following Exposure: Inhalation causes irritation of throat and lungs. Ingestion of large amounts causes violent vomiting and purging, intense pain, collapse, coma, convulsions, and paralysis. Solutions irritate eyes. Contact with solid causes severe eye surface injury and irritation. 5.3 Treatment for Exposure: INHALATION: move to fresh air. INGESTION: give large amounts of water, induce vomiting, get medical attention. EYES: flush with water for at least 15 min., get medical attention if injury was caused by solid. SKIN: flush with water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 2 LD₅₀ 5 g/kg 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available		

6. FIRE HAZARDS

- 6.1 **Flash Point:** Not flammable
- 6.2 **Flammable Limits in Air:** Not flammable
- 6.3 **Fire Extinguishing Agents:** Not pertinent
- 6.4 **Fire Extinguishing Agents Not to be Used:** Not pertinent
- 6.5 **Special Hazards of Combustion Products:** Toxic and irritating oxides of nitrogen may form in fire
- 6.6 **Behavior in Fire:** Can increase intensity of fire if in contact with combustible material
- 6.7 **Ignition Temperature:** Not pertinent
- 6.8 **Electrical Hazard:** Not pertinent
- 6.9 **Burning Rate:** Not pertinent

7. CHEMICAL REACTIVITY

- 7.1 **Reactivity with Water:** No reaction
- 7.2 **Reactivity with Common Materials:** Mixtures with wood, paper, and other combustibles may catch fire
- 7.3 **Stability During Transport:** Stable
- 7.4 **Neutralizing Agents for Acids and Caustics:** Not pertinent
- 7.5 **Polymerization:** Not pertinent
- 7.6 **Inhibitor of Polymerization:** Not pertinent

8. WATER POLLUTION

- 8.1 **Aquatic Toxicity:** 5 ppm 11 hr rainbow trout killed fresh water
0.22 10 ppm 48 240 hr barnacles & related species killed salt water
19 ppm 96 hr oyster TL₅₀ salt water
- 8.2 **Waterfowl Toxicity:** Data not available
- 8.3 **Biological Oxygen Demand (BOD):** None
- 8.4 **Food Chain Concentration Potential:** Copper known to be accumulated by shellfish. Can be concentrated by food chain. Hazard to humans unknown.

COPPER SULFATE

Common Synonyms Blue Vitrol Sulfate of copper Copper sulfate pentahydrate Copper sulfate	Solid-granules or crystals White to blue Odorless Sinks and mixes with water
Irritate and may be dehydrated on skin. Not a toxic health and pollution hazard.	
Fire	Not flammable
Exposure	CALL FOR MEDICAL AID SOLID If swallowed, will cause nausea, vomiting or loss of consciousness. If SWALLOWED and victim is ALIVE, DO NOT have victim drink water or milk and have victim induce vomiting. If SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, DO NOT induce vomiting or keep victim warm.
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes. No fish, shellfish and wildlife effects. No deleterious effects on vegetation.
1 RESPONSE TO DISCHARGE <i>(See Response Methods No. 10000, CG 446-4)</i> Issue warning - water contaminant. Disperse and flush.	2. LABELS No hazard label required by Code of Federal Regulations.
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Blue vitrol Copper sulfate pentahydrate Copper sulfate Sulfate of copper 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: $\text{CuSO}_4 \cdot 5\text{H}_2\text{O}$ 3.4 IMCO United Nations Numerical Designation: Not listed	4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: Blue 4.3 Odor: None
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Filtering masks to minimize inhalation of dust. 5.2 Symptoms Following Exposure: INGESTION: Copper sulfate may induce severe gastroenteritis, distress, vomiting, gastroenteric pain, and local corrosion and hemorrhages, prostration, anuria, hematuria, anemia, increase in white blood cells, and a coma, recovery is difficult and circulatory failure. 5.3 Treatment for Exposure: INGESTION: induce vomiting and administer gastric lavage, then a saline cathartic, fluid therapy, and transfusions if required. Gastric decontamination (GDS) has been found to be directly effective. SKIN AND EYES: wash affected areas with water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Not pertinent. 5.5 Short-Term Inhalation Limits: Not pertinent. 5.6 Toxicity by Ingestion: Grade 1 LD ₅₀ 500 mg/kg rats. 5.7 Late Toxicity: Causes liver, kidney and testicular damage in rats. 5.8 Vapor (Gas) Irritant Characteristics: Not pertinent. 5.9 Liquid or Solid Irritant Characteristics: Causes smarting of the skin and first degree burns on short exposure; may cause second degree burns on long exposure. 5.10 Odor Threshold: Not pertinent.	

6 FIRE HAZARDS 6.1 Flash Point: Not flammable. 6.2 Flammable Limits in Air: Not flammable. 6.3 Fire Extinguishing Agents: Not pertinent. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Not pertinent. 6.6 Behavior in Fire: Not pertinent. 6.7 Ignition Temperature: Not flammable. 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Risk: Not flammable.	8 WATER POLLUTION 8.1 Aquatic Toxicity: 1.8 ppm/24 hr rainbow trout; 11 ppm/fresh water; 0.14 ppm/48 hr. prawn; 1.0 ppm/salt water. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): None. 8.4 Food Chain Concentration Potential: None.
7 CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: No reaction. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9 SELECTED MANUFACTURERS 1. Anala Co. Great Falls, Mass. 01401 2. C. I. Neill Co. Inc. Industrial Chemicals Division 60 Wall St. New York, N.Y. 10005 3. Mallinckrodt Chemical Works Industrial Chemicals Division St. Louis, Mo. 63102
11 HAZARD ASSESSMENT CODE <i>(See Hazard Assessment Information, CG 446-3)</i> NN	10 SHIPPING INFORMATION 10.1 Grades or Purity: Data not available. 10.2 Storage Temperature: Ambient. 10.3 Inert Atmosphere: No requirement. 10.4 Venting: Data not available.
12. HAZARD CLASSIFICATIONS 12.1 Code of Federal Regulations: Not listed. 12.2 NAS Hazard Rating for Bulk Water Transportation: Not listed. 12.3 NFPA Hazard Classifications: Not listed.	13 PHYSICAL AND CHEMICAL PROPERTIES 13.1 Physical State at 15°C and 1 atm: Solid. 13.2 Molecular Weight: 249.7. 13.3 Boiling Point at 1 atm: Not pertinent. 13.4 Freezing Point: Not pertinent. 13.5 Critical Temperature: Not pertinent. 13.6 Critical Pressure: Not pertinent. 13.7 Specific Gravity: 2.28 at 15°C solids. 13.8 Liquid Surface Tension: Not pertinent. 13.9 Liquid-Water Interfacial Tension: Not pertinent. 13.10 Vapor (Gas) Specific Gravity: Not pertinent. 13.11 Ratio of Specific Heats of Vapor (Gas): Not pertinent. 13.12 Latent Heat of Vaporization: Not pertinent. 13.13 Heat of Combustion: Not pertinent. 13.14 Heat of Decomposition: Not pertinent. 13.15 Heat of Solution: Not pertinent. 13.16 Heat of Polymerization: Not pertinent.
NOTES <i>(Continued on pages 3 and 4)</i>	

REVISED 1978

CSY

CORN SYRUP

Common Synonyms		Thick liquid	Colorless	Odorless
		Mixes and mazes with water		
No significant hazard to life or health from dermal contact with this material. No significant hazard to life or health from ingestion of this material.				
Fire		Not flammable		
Exposure		Not harmful		
Water Pollution		Dangerous to aquatic life in high concentrations. May be dangerous if it enters water bodies. No significant hazard to life or health from ingestion of this material.		
1. RESPONSE TO DISCHARGE: See Response Materials Handbook, CG 446.3 Dispense and flush		2. LABELS No hazard label required by Codes - Federal regulations		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: No common synonyms 3.2 Coast Guard Compatibility Classification: Suspensions water solutions 3.3 Chemical Formula: Not pertinent 3.4 IMCO United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: None		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: None 5.2 Symptoms Following Exposure: Not toxic 5.3 Treatment for Exposure: None 5.4 Toxicity by Inhalation (Threshold Limit Value): Not pertinent 5.5 Short Term Inhalation Limits: Not pertinent 5.6 Toxicity by Ingestion: None 5.7 Late Toxicity: None 5.8 Vapor (Gas) Irritant Characteristics: Not pertinent 5.9 Liquid or Solid Irritant Characteristics: None 5.10 Odor Threshold: Not pertinent				

6. FIRE HAZARDS 6.1 Flash Point: Not flammable 6.2 Flammable Limits in Air: Not flammable 6.3 Fire Extinguishing Agents: Not pertinent 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent 6.5 Special Hazards of Combustion Products: Not pertinent 6.6 Behavior in Fire: Not pertinent 6.7 Ignition Temperature: Not flammable 6.8 Electrical Hazard: Not pertinent 6.9 Burning Rate: Not flammable		8. COU

COUMAPHOS

Common Synonyms COURAL O,O-Dimethyl 2-oxo-2-(4-methyl-2-oxo-2H-1-benzopyran-7-yl)phosphorothioate	Solid White Weak sulfurous odor Solid sinks in water
Fire	Combustible
Exposure	CALL FOR MEDICAL AID SOLID OR DUST Irritating to skin and eyes Harmful if swallowed or inhaled
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS Fouling to shoreline May be dangerous if it enters water intakes
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 444-4) Issue warning - water contaminant Restrict access Should be removed Chemical and physical treatment	2. LABELS No hazard label required by Code of Federal Regulations
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: COURAL; O,O-Dimethyl 2-oxo-2-(4-methyl-2-oxo-2H-1-benzopyran-7-yl)phosphorothioate 3.2 Code: Guard Compatibility Classification: Not listed 3.3 Chemical Formula: C ₁₁ H ₁₂ O ₃ PS 3.4 IMCO/United Nations Numerical Designation: N/A (1991)	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: White 4.3 Odor: Slight odor of sulfur compounds
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Organic vapor respirator; rubber gloves; goggles 5.2 Symptoms Following Exposure: Irritation on ingestion causes some dizziness in chest sweating, constricted pupils of eyes, stomach pains, vomiting, and diarrhea. Pulmonary edema may develop as late as 12 hours after acute exposures. Contact with eyes causes irritation; conjunctivae may cause some symptoms as late as 12 hours. 5.3 Treatment for Exposure: <i>First medical attention after all exposures to this substance is to remove the patient and 2 P-4 M are available.</i> INHALATION: remove to fresh air; support respiration. Keep patient quiet until medical help arrives; otherwise, the development of pulmonary edema may occur after 12 hours. INGESTION: induce vomiting; give water and again induce vomiting; give again. In cases of medical care, EYES: flush with water for at least 10 min. SKIN: wash with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 4 oral LD ₅₀ (30 mg/kg) 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: 0.02 ppm	

6 FIRE HAZARDS

- 6.1 **Flash Point:** Not pertinent (combustible solid)
- 6.2 **Flammable Limits in Air:** Not pertinent
- 6.3 **Fire Extinguishing Agents:** Water, foam, carbon dioxide dry chemical
- 6.4 **Fire Extinguishing Agents Not to be Used:**
- 6.5 **Special Hazards of Combustion Products:** Toxic and irritating solid sulfur and phosphorus may form in fires
- 6.6 **Behavior in Fire:**
- 6.7 **Ignition Temperature:** Data not available
- 6.8 **Electrical Hazard:** Not pertinent
- 6.9 **Burning Rate:** Not pertinent

8 WATER POLLUTION

- 8.1 **Aquatic Toxicity:** 100 ppm 96 hr. Bluegill; 11 ppm 96 hr. Carp; 400 ppm 96 hr. Fathead minnow; 11 ppm 96 hr. Water
- 8.2 **Waterfowl Toxicity:** 1.5 g/g + 5 g/g 21 days
- 8.3 **Biological Oxygen Demand (BOD):** Data not available
- 8.4 **Food Chain Concentration Potential:** None

9 SELECTED MANUFACTURERS

Bayer Corporation
 Box 999
 Shawnee Mission, Kan. 66204

7. CHEMICAL REACTIVITY

- 7.1 **Reactivity with Water:** Not reactive
- 7.2 **Reactivity with Common Materials:**
- 7.3 **Stability During Transport:** Stable
- 7.4 **Neutralizing Agents for Acids and Caustics:** Not pertinent
- 7.5 **Polymerization:** Not pertinent
- 7.6 **Inhibitor of Polymerization:** Not pertinent

10 SHIPPING INFORMATION

- 10.1 **Grade or Purity:** 95% active ingredient; the balance being inert, which
- 10.2 **Storage Temperature:** Ambient
- 10.3 **Inert Atmosphere:** Not required
- 10.4 **Venting:** Open

11 HAZARD ASSESSMENT CODE

(See Hazard Assessment Handbook, CG 444-3)

12. HAZARD CLASSIFICATIONS

- 12.1 **Code of Federal Regulations:** Not listed
- 12.2 **NAS Hazard Rating for Bulk Water Transportation:** Not listed
- 12.3 **IFPA Hazard Classification:** Not listed

13 PHYSICAL AND CHEMICAL PROPERTIES

- 13.1 **Physical State at 15°C and 1 atm:** Solid
- 13.2 **Molecular Weight:** 262.3
- 13.3 **Boiling Point at 1 atm:** Not pertinent
- 13.4 **Freezing Point:** 100°C (212°F) at 1 atm
- 13.5 **Critical Temperature:** Not pertinent
- 13.6 **Critical Pressure:** Not pertinent
- 13.7 **Specific Gravity:** 1.474 at 20°C (solid)
- 13.8 **Liquid Surface Tension:** Not pertinent
- 13.9 **Liquid-Water Interfacial Tension:** Not pertinent
- 13.10 **Vapor (Gas) Specific Gravity:** Not pertinent
- 13.11 **Ratio of Specific Heats of Vapor (Gas):** Not pertinent
- 13.12 **Latent Heat of Vaporization:** Not pertinent
- 13.13 **Heat of Combustion:** Not pertinent
- 13.14 **Heat of Decomposition:** Not pertinent
- 13.15 **Heat of Solution:** Not pertinent
- 13.16 **Heat of Polymerization:** Not pertinent

NOTES

CCT

CREOSOTE, COAL TAR

Common Synonyms Creosote oil Dead oil		Liquid Yellow to black Tarry odors May float or sink in water
Fire		Combustible
Exposure		LIQUID Irritating to skin and eyes Harmful if swallowed
Water Pollution		Effect of low concentrations on aquatic life is unknown Fouling to shoreline May be dangerous if it enters water intakes
1. RESPONSE TO DISCHARGE <i>See Response Methods Manual: 4 CG 445.4</i> Issue warning: water contaminant Mechanical containment Should be removed Chemical and physical treatment		2. LABELS <i>See Hazard Assessment Manual: 4 CG 445.4</i> Number required by Code of Federal Regulations
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Creosote oil Dead oil 3.2 Coast Guard Competibility Classification: Hazard 3.3 Chemical Formula: Mixture 3.4 IMCO/United Nations Numerical Designation: 9.022		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Yellow to brown/black 4.3 Odor: Characteristic tarry odors
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: All service users must wear appropriate chemical safety goggles and a face shield, especially in emergency and in hot environments. 5.2 Symptoms Following Exposure: Vapors cause moderate irritation to nose and throat. Liquid causes severe burns to eyes and reddening and itching to skin. Poisoning is mixed with skin irritation. Ingestion causes salivation, vomiting, diarrhea, and difficulty breathing. Respiratory distress, severe headache, loss of pupillary reflexes, hypothermia, cyanosis, and convulsions. 5.3 Treatment for Exposure: INHALATION: Remove victim to fresh air. Do not inhaling gas. If facial respiration is preferably with mouth. Breathing is difficult, give oxygen. Use artificial respiration. EYES: Flush immediately with plenty of water for at least 15 min and call a physician. SKIN: If in contact with vegetable oil, it may be then washed with soap and water. INGESTION: Have victim drink water. Do not induce vomiting. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 2 LD 50 5.1 g/kg. 5.7 Late Toxicity: Repeated exposures may cause cancer. Skin. 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause moderate irritation such as persistent cough and high concentrations unpleasant. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Liquid is severe skin irritant. May cause pain and severe degree burns after a few minutes contact. 5.10 Odor Threshold: Data not available.		

6. FIRE HAZARDS

- 6.1 Flash Point: 110 to 114°C
- 6.2 Flammable Limits in Air: Not pertinent
- 6.3 Fire Extinguishing Agents: Dry chemical, carbon dioxide or foam
- 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective
- 6.5 Special Hazards of Combustion Products: Data not available
- 6.6 Behavior in Fire: Heavy, irritating black smoke is formed
- 6.7 Ignition Temperature: 477°C
- 6.8 Electrical Hazard: Not pertinent
- 6.9 Burning Rate: Data not available

8. WATER POLLUTION

- 8.1 Aquatic Toxicity: Data not available
- 8.2 Waterfowl Toxicity: Data not available
- 8.3 Biological Oxygen Demand (BOD): Data not available
- 8.4 Food Chain Concentration Potential: None

9. SELECTED MANUFACTURERS

CGE

CRESYL GLYCIDYL ETHER

Common Synonyms	
Solid	White
Sinks and mixes with water	
Stop use, if possible. Keep people away. Shut off ignition sources. Call fire department. Avoid contact with solid and dust. Flush and remove contaminated material. Notify local health and pollution control agencies.	
Fire	Combustible Extinguish with dry chemical, foam or other suitable agent. Water may be effective on fire. Decomposed in fire with water.
Exposure	CALL FOR MEDICAL AID DUST Irritating to eyes, nose and throat. Painful if inhaled. If in eyes, flush eyes with water for 15 min. If in nose, blow nose and flush with water. If in mouth, spit out and flush with water. SOLID Irritating to skin and eyes. Harmful if swallowed. If on skin, remove contaminated clothing and wash skin with soap and water. If in eyes, flush eyes with water for 15 min. If swallowed, do not induce vomiting. Call poison control center. If swallowed and victim is unconscious or having convulsions, do not give anything by mouth.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and pollution control agencies. Notify operator of local water intakes.
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-3) Issue warning: water contaminant. Should be removed. Chemical and physical treatment.	
2. LABELS No hazard labels required by Code of Federal Regulations.	
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Cresyl epoxypropyl ether, Tolyl epoxypropyl ether, Tolyl glycidyl ether. 3.2 Coast Guard Compatibility Classification: Not listed. 3.3 Chemical Formula: $C_{10}H_{12}O_2$, $C_{11}H_{14}O_2$, $C_{12}H_{16}O_2$. 3.4 IMCO/United Nations Numerical Designation: Not listed.	
4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Colorless. 4.3 Odor: Data not available.	
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Organic canister mask or air pack, rubber gloves, goggles or face shield, body covering clothing. 5.2 Symptoms Following Exposure: Contact with eyes causes irritation. Contact with skin causes primary irritation and allergic sensitization. 5.3 Treatment for Exposure: INHALATION: move to fresh air. IF YES, flush with water for at least 15 min. get medical attention. SKIN: immediately wash off with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Data not available. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.	

6 FIRE HAZARDS 6.1 Flash Point: 200°F (93°C). 6.2 Flammable Limits in Air: Data not available. 6.3 Fire Extinguishing Agents: Dry chemical, foam, carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Water, ineffective. 6.5 Special Hazards of Combustion Products: 6.6 Behavior in Fire: 6.7 Ignition Temperature: Data not available. 6.8 Electrical Hazard: Data not available. 6.9 Burning Rate: Data not available.	
7 CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: May attack some forms of plastics. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	
8 WATER POLLUTION 8.1 Aquatic Toxicity: Data not available. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: None.	
9. SELECTED MANUFACTURERS Shell Chemicals Co. One Shell Plaza P.O. Box 2463 Houston, Texas 77001	
10 SHIPPING INFORMATION 10.1 Grades or Purity: Technical 100%. 10.2 Storage Temperature: Ambient. 10.3 Inert Atmosphere: No requirement. 10.4 Venting: Open.	
11 HAZARD ASSESSMENT CODE (See Hazard Assessment Handbook, CG 446-3). A T U N Y	
12 HAZARD CLASSIFICATIONS 12.1 Code of Federal Regulations: Not listed. 12.2 NAS Hazard Rating for Bulk Water Transportation: Not listed. 12.3 NFPA Hazard Classifications: Not listed.	
13 PHYSICAL AND CHEMICAL PROPERTIES 13.1 Physical State at 15°C and 1 atm: Liquid. 13.2 Molecular Weight: 166. 13.3 Boiling Point at 1 atm: (approx.) 490°F = 259°C = 532°K. 13.4 Freezing Point: Not pertinent. 13.5 Critical Temperature: Not pertinent. 13.6 Critical Pressure: Not pertinent. 13.7 Specific Gravity: 1.09 at 20°C (liquid). 13.8 Liquid Surface Tension: Data not available. 13.9 Liquid-Water Interfacial Tension: Data not available. 13.10 Vapor (Gas) Specific Gravity: Not pertinent. 13.11 Ratio of Specific Heats of Vapor (Gas): Not pertinent. 13.12 Latent Heat of Vaporization: Data not available. 13.13 Heat of Combustion: (est.) -16,500 Btu/lb = -9,190 cal/g = -384 x 10 ³ J/kg. 13.14 Heat of Decomposition: Not pertinent. 13.15 Heat of Solution: Not pertinent. 13.16 Heat of Polymerization: Not pertinent.

NOTES	

CTA	CROTONALDEHYDE
------------	-------------------------

Common Synonyms Crotonaldehyde beta-Methylcrotonaldehyde trans-2-Butenal	Water: liquid Color: Yellow Tar odor Floats and mixes slowly with water. Flammable irritating vapor is produced.
Fire	FLAMMABLE Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. When ignited, it burns with a yellow flame and produces a black smoke. It is highly flammable and reacts violently with strong oxidizers. It is highly flammable and reacts violently with strong oxidizers. It is highly flammable and reacts violently with strong oxidizers.
Exposure	CAUTION FORMULA: AID VAPOR Irritating to eyes, nose and throat. If inhaled, will cause coughing, nausea, vomiting or loss of consciousness. May cause dizziness, headache, and irritation of the respiratory tract. It is highly flammable and reacts violently with strong oxidizers. LIQUID Will burn skin and eyes. Harmful if swallowed. It is highly flammable and reacts violently with strong oxidizers. SWALLOWED If swallowed, do not induce vomiting. If swallowed, do not induce vomiting. If swallowed, do not induce vomiting.
Water Pollution	Effect of low concentrations on aquatic life is unknown. Polluting to shoreline. May be dangerous if it enters water intakes. It is highly flammable and reacts violently with strong oxidizers.
1 RESPONSE TO DISCHARGE (See Procedure Methods Handbook, CG 446-4) Issue warning - high flammability, water contaminant. Restrict access. Disperse and flush.	2 LABEL 
3. CHEMICAL DESIGNATIONS 31 Synonyms: beta-Methylcrotonaldehyde Crotonaldehyde Crotonaldehyde trans-2-Butenal 32 Coast Guard Compatibility Classification: Miscible 33 Chemical Formula: CH₃CH=CHCHO 34 IMCO/United Nations Numerical Designation: 11143	4 OBSERVABLE CHARACTERISTICS 41 Physical State (as shipped): Liquid 42 Color: Yellow 43 Odor: Tarry
J. HEALTH HAZARDS 51 Personal Protective Equipment: Air supplied mask for concentrations above 100 ppm. Use gloves, goggles, and safety shower. 52 Symptoms Following Exposure: INHALATION: Vapors are exceedingly irritating, causing coughing, chest pain, nausea, vomiting, and collapse. CONTACT WITH SKIN OR EYES: may cause burns and systemic illness. Contact of liquid or vapors with eyes causes burns. 53 Treatment for Exposure: INHALATION: remove victim to fresh air, give oxygen and breathing is difficult, call a physician. INGESTION: have victim drink water or milk, do NOT induce vomiting. SKIN OR EYES: immediately flush with plenty of water for at least 15 min. physician should see cases of eye irritation from vapors or liquid. 54 Toxicity by Inhalation (Threshold Limit Value): 7 ppm 55 Short-Term Inhalation Limits: Data not available 56 Toxicity by Ingestion: Grade 3 LD₅₀ 50 to 500 mg/kg 57 Late Toxicity: Data not available 58 Vapor (Gas) Irritant Characteristics: Vapor is moderately irritating such that personnel will not usually tolerate moderate or high vapor concentrations. 59 Liquid or Solid Irritant Characteristics: Fairly severe skin irritant in a case of pain and second degree burns after a few minutes contact. 510 Odor Threshold: 0.13 ppm	

6 FIRE HAZARDS 61 Flash Point: 59°F (10°C) 62 Flammable Limits in Air: 2.1% - 15.5% 63 Fire Extinguishing Agents: Four dry chemical, carbon dioxide. 64 Fire Extinguishing Agents Not to be Used: Not pertinent. 65 Special Hazards of Combustion Products: Vapors are very irritating to nose, eyes and skin. 66 Behavior in Fire: Vapor is heavier than air and may travel considerable distance to a source of ignition and flash back. 67 Ignition Temperature: 450°F 68 Electrical Hazard: Data not available 69 Burning Rate: 3.3 mm/min	8 WATER POLLUTION 81 Aquatic Toxicity: Data not available 82 Waterfowl Toxicity: Data not available 83 Biological Oxygen Demand (BOD): 1.1 lb/l in 10 days 84 Food Chain Concentration Potential: None																																				
7. CHEMICAL REACTIVITY 71 Reactivity with Water: No reaction 72 Reactivity with Common Materials: No reaction 73 Stability During Transport: May polymerize 74 Neutralizing Agents for Acids and Caustics: Not pertinent 75 Polymerization: May polymerize or condense with evolution of heat in presence of alkalies, amines or acids. 76 Inhibitor of Polymerization: None used	9 SELECTED MANUFACTURERS 1. CUM

CUMENE

Common Synonyms Cumol Isopropylbenzene		Watery liquid	Colorless	Gasoline-like odor
Floats on water				
Not for use of possible keepers please Call for medical aid Avoid contact with eyes Avoid contact with skin Avoid contact with clothing Avoid contact with food and drink				
Fire	Combustible. Flammable liquid and vapor. Ignites on contact with water.			
Exposure	CALL FOR MEDICAL AID LIQUID Irritating to skin and eyes Harmful if swallowed Causes irritation and discomfort Causes shortness of breath Causes dizziness and headache Causes nausea and vomiting Causes diarrhea and abdominal pain Causes difficulty in swallowing Causes difficulty in breathing Causes difficulty in seeing Causes difficulty in hearing Causes difficulty in speaking Causes difficulty in walking Causes difficulty in standing Causes difficulty in sitting Causes difficulty in lying down Causes difficulty in sleeping Causes difficulty in eating Causes difficulty in drinking Causes difficulty in urinating Causes difficulty in defecating Causes difficulty in menstruating Causes difficulty in conceiving Causes difficulty in giving birth Causes difficulty in breastfeeding Causes difficulty in nursing Causes difficulty in growing Causes difficulty in aging Causes difficulty in dying			
Water Pollution	Effect of low concentrations on aquatic life is unknown Fouling to shoreline May be dangerous if it enters water intakes Not recommended for use in water			
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Mechanical containment Should be removed Chemical and physical treatment		2 LABELS No label required by Code of Federal Regulations		
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Cumol Isopropylbenzene 3.2 Coast Guard Compatibility Classification: Aqueous solution 3.3 Chemical Formula: C_9H_{10} 3.4 IMCO/United Nations Numerical Designation: 1.1918		4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Strong slightly irritant, fragrant aromatic		
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: As necessary to avoid skin exposure. If concentration in air is greater than 1000 ppm, use self-contained breathing apparatus. 5.2 Symptoms Following Exposure: Narcotic action with long lasting effects; depressant to central nervous system. 5.3 Treatment for Exposure: INHALATION: move patient immediately to fresh air; administer artificial respiration or oxygen if necessary; seek medical attention. SKIN OR EYES: wash exposed skin surfaces thoroughly; flush eyes thoroughly with water for 15 min. 5.4 Toxicity by Inhalation (Threshold Limit Value): 50 ppm 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 3 LD ₅₀ 50 to 500 mg/kg 5.7 Late Toxicity: None reported 5.8 Vapor (Gas) Irritant Characteristics: A serious eye, nose and throat smarting of the eyes or respiratory system if present in high concentrations. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain, may cause smarting and reddening of the skin. 5.10 Odor Threshold: 1.2 ppm				

6 FIRE HAZARDS 6.1 Flash Point: 111°F (44°C) 6.2 Flammable Limits in Air: 0.9 - 6.5% 6.3 Fire Extinguishing Agents: Foam, carbon dioxide or dry chemical 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent 6.5 Special Hazards of Combustion Products: Not pertinent 6.6 Behavior in Fire: Not pertinent 6.7 Ignition Temperature: 797°F 6.8 Electrical Hazard: Data not available 6.9 Burning Rate: 5.9 mm/min		8. REVISED 1978

CUMENE HYDROPEROXIDE

Common Synonyms alpha, alpha-Dimethylbenzene hydroperoxide Dimethylbenzyl hydroperoxide CHP Isopropylbenzene hydroperoxide Cumyl hydroperoxide		Liquid Sinks in water	Colorless to light yellow Sharp, irritating odor
Strong oxidizing agent. Keep peroxide away from heat, sparks, flames, and other sources of ignition. Do not mix with organic materials. Do not use in the absence of proper ventilation.			
Fire	Combustible POISONOUS GASES MAY BE PRODUCED IN FIRE Containers may explode in fire Fight fires with foam, water, or dry chemical. Water may be effective on small fires. Do not use water on large fires.		
Exposure	VAPOR Irritating to eyes, nose and throat If inhaled will cause headache or coughing May cause dizziness or nausea LIQUID Irritating to skin and eyes Harmful if swallowed May cause dizziness or nausea If in eyes, flush with water for 15 min. If on skin, wash with soap and water. If swallowed, do not induce vomiting. Seek medical attention immediately.		
Water Pollution	Effect of low concentrations on aquatic life is unknown Fouling to shoreline May be dangerous if it enters water intakes Do not discharge into water bodies.		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 448-4) Issue warning: oxidizing material, water contaminant Mechanical containment should be removed Chemical and physical treatment		2. LABEL 	
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: alpha, alpha-Dimethylbenzene hydroperoxide Dimethylbenzyl hydroperoxide Isopropylbenzene hydroperoxide Cumyl hydroperoxide, CHP 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: C ₉ H ₁₂ (OOH)C ₉ H ₁₂ C ₉ H ₁₂ (C ₉ H ₁₁ O ₂) (mixture)		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless to pale yellow 4.3 Odor: Sharp, irritant, aromatic	
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Self-contained or airline breathing apparatus, solvent-resistant rubber gloves, chemical splash goggles, rubber apron, rubber or PVC clothing, full face shield. 5.2 Symptoms Following Exposure: Inhalation of vapor causes headache and burning throat. Liquid causes severe irritation of eyes on skin causes burning, throbbing sensation, irritation and blisters. Ingestion causes irritation of mouth and stomach. 5.3 Treatment for Exposure: Get medical attention after all exposures to this compound. INHALATION: remove victim and administer artificial respiration and oxygen if necessary. EYES: flush with water for 15 min. SKIN: wash several times with soap and water. treat as burn. INGESTION: induce vomiting and follow with gastric lavage. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 5 oral LD ₅₀ = 382 mg/kg (rat) 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available			

6. FIRE HAZARDS 6.1 Flash Point: 147°F (64°C) 120°F (50°C) 6.2 Flammable Limits in Air: 0.9% - 6.5% 6.3 Fire Extinguishing Agents: Foam, dry chemical, or carbon dioxide 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective 6.5 Special Hazards of Combustion Products: Toxic phenol vapors may form from hot material 6.6 Behavior in Fire: May decompose violently when heated. Burn rate becomes more rapid as fire burns. 6.7 Ignition Temperature: Decomposes violently at temperatures above 300°F 6.8 Electrical Hazard: Data not available 6.9 Burning Rate: Data not available	8. WATER POLLUTION 8.1 Aquatic Toxicity: Data not available 8.2 Waterfowl Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): Data not available 8.4 Food Chain Concentration Potential: None								
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction 7.2 Reactivity with Common Materials: Decomposition is catalyzed by metals such as aluminum, copper, brass, zinc, and lead. The reaction is not hazardous unless hot. 7.3 Stability During Transport: Stable if kept below 125°F and out of direct sunlight 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent 7.5 Polymerization: Not pertinent 7.6 Inhibitor of Polymerization: Not pertinent	9. CES

CUPRIETHYLENEDIAMINE SOLUTION

Common Synonyms		Liquid	Blue to dark purple	Fishy odor
		Sinks and mixes with water. Irritating vapor is produced.		
AVOID CONTACT WITH LIQUID. KEEP OFFICE AWAY FROM LIQUID. If you must work with this liquid, wear protective clothing. Do not breathe the vapor. Do not get liquid on your skin or clothes. If you get liquid on your skin or clothes, wash immediately with plenty of water.				
Fire	Not flammable. Irritating gases may be produced when heated.			
	CALL FOR MEDICAL AID. VAPOR Irritating to eyes, nose and throat. If inhaled will cause difficult breathing. If inhaled, move to fresh air. If in eyes, flush with water for at least 15 minutes. If swallowed, do not induce vomiting. Call physician. If swallowed, give large amounts of water. If swallowed, give large amounts of water. If swallowed, give large amounts of water.			
Exposure				
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Do not discharge into water.			
1. RESPONSE TO DISCHARGE (See Response Method Handbook, CG 446-4) Issue warning: corrosive water contaminant Restrict access Disperse and flush		2. LABEL 		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Cupriethylenediamine hydroxide solution 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: $\text{Cu}(\text{OH})_2 \cdot \text{NH}_2\text{CH}_2\text{CH}_2\text{NH}_2 \cdot \text{H}_2\text{O}$ 3.4 MCO/United Nations Numerical Designation: 8-1761		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Blue or dark purple (May contain red or blue sediment) 4.3 Odor: Like ammonia, fishy		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Goggles or face shield, organic canister mask, rubber gloves, protective clothing 5.2 Symptoms Following Exposure: Inhalation of vapor irritates mucous membrane and may cause asthma. Liquid causes severe irritation of eyes and possible corneal injury. Contact with skin causes irritation. Ingestion causes irritation of mouth and stomach. 5.3 Treatment for Exposure: INHALATION: remove from exposure, support respiration, call physician. EYES: irrigate with large quantities of water for at least 15 min., call physician. SKIN: wash with large amounts of water. INGESTION: give large amounts of water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation LC ₅₀ : Data not available 5.6 Toxicity by Ingestion: Data not available 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor threshold: Data not available

CYA

CYANOACETIC ACID

Common Synonyms Cyanacetic acid Malonic mononitrile		Liquid	Yellowish brown	Unpleasant odor
Sinks and mixes with water				
No significant data available for this chemical.				
Fire		Combustible POISONOUS GASES MAY BE PRODUCED IN FIRE		
Exposure		VAPOR Irritating to eyes, nose and throat Harmful if inhaled LIQUID Irritating to skin and eyes Harmful if swallowed		
Water Pollution		HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intake		
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: water contaminant Disperse and flush		2. LABELS No hazard label required by code of Federal Regulations		
3 CHEMICAL DESIGNATIONS 31 Synonyms: Cyanacetic acid Malonic mononitrile 32 Coast Guard Compatibility Classification: Not listed 33 Chemical Formula: <chem>CNCH2COOH</chem> 34 IMCO/United Nations Numerical Designation: "Not listed"		4. OBSERVABLE CHARACTERISTICS 41 Physical State (as shipped): Solid 42 Color: White 43 Odor: Data not available		
5. HEALTH HAZARDS 51 Personal Protective Equipment: Dust mask, goggles or face shield, rubber gloves 52 Symptoms Following Exposure: Contact irritates eyes and may irritate skin 53 Treatment for Exposure: INHALATION: move to fresh air. INGESTION: give large amounts of water, get medical attention. EYES: flush with water for at least 15 min. SKIN: flush with water 54 Toxicity by Inhalation (Threshold Limit Value): Data not available 55 Short-Term Inhalation Limits: Data not available 56 Toxicity by Ingestion: Data not available 57 Late Toxicity: Data not available 58 Vapor (Gas) Irritant Characteristics: Data not available 59 Liquid or Solid Irritant Characteristics: Data not available 510 Odor Threshold: Data not available

CYG

CYANOGEN

Common Synonyms Ethane dinitrile Dicyan Oxalic acid dinitrile Oxalodinitrile Dicyanogen	Liquefied gas Colorless Almond Odor Floats and boils on water. Poisonous, flammable, visible vapor cloud is produced.
Fire	FLAMMABLE, POISONOUS GASES ARE PRODUCED IN FIRE. Containers may explode in fire. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area.
 Exposure	VAPOR POISONOUS IF INHALED. Irritating to eyes. LIQUID POISONOUS IF SWALLOWED. Will cause frostbite.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes.
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 444-2) Issue warning: poison, high flammability, air contaminant, water contaminant. Restrict access. Evacuate area.	2 LABELS  
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Ethanedinitrile, Dicyan, Oxalic acid dinitrile, Oxalodinitrile, Dicyanogen. 3.2 Coast Guard Competitibility Classification: Not applicable. 3.3 Chemical Formula: (CN) ₂ . 3.4 IMO/United Nations Numerical Designation: 2/1026.	4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquefied, compressed gas. 4.2 Color: Colorless. 4.3 Odor: Characteristic almond-like, pungent, penetrating; may not be sufficiently strong to provide an adequate warning.
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Self-contained breathing apparatus, rubber gloves, rubber protective clothing, rubber-soled shoes. 5.2 Symptoms Following Exposure: Vapor irritates eyes and causes giddiness, headache, fatigue, and nausea if inhaled. 5.3 Treatment for Exposure: In general, treatment is similar to that used following exposure to hydrogen cyanide. INHALATION: move victim to fresh air and have him lie down; do not permit him to exert himself; remove contaminated clothing but keep patient covered and comfortably warm; summon a physician; break an amyl nitrite pearl in a cloth and hold it tightly under the victim's nose for 15 seconds; repeat five times at about 15 sec. intervals; use artificial respiration if breathing has stopped. EYES: flush with water for at least 15 min. 5.4 Toxicity by Inhalation (Threshold Limit Value): 10 ppm. 5.5 Short-Term Inhalation Limits: 5 mg./m. for 30 min. (as cyanide). 5.6 Toxicity by Ingestion: Data not available. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.	

6 FIRE HAZARDS 6.1 Flash Point: Flammable gas. 6.2 Flammable Limits in Air: 6.6% - 43%. 6.3 Fire Extinguishing Agents: For fire burn, shut off flow of gas; cool exposed areas with water. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Unburned vapors are highly toxic. 6.6 Behavior in Fire: Vapor is heavier than air and may travel considerable distance to a source of ignition and flash back. Containers may explode in fire, releasing the highly toxic gas. 6.7 Ignition Temperature: Data not available. 6.8 Electrical Hazard: Data not available. 6.9 Burning Rate: Not pertinent.	8 WATER POLLUTION 8.1 Aquatic Toxicity: Data not available. 8.2 Watercourse Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: None.								
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction, but water provides heat to vaporize liquid cyanogen. 7.2 Reactivity with Common Materials: No reaction. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9 SELECTED MANUFACTURERS 1. Matheson Gas Products, P. O. Box 85, East Rutherford, N. J. 07073. 2. Air Products and Chemicals, Inc., Specialty Gas Dept., P. O. Box 518, Allentown, Pa. 18105. 3. Union Carbide Corp., Linde Division, 270 Park Avenue, New York, N. Y. 10017.								
11 HAZARD ASSESSMENT CODE (See Hazardous Materials Handbook, CG 444-2) A B C D E M N	10. SHIPPING INFORMATION 10.1 Grade or Purity: 98.5%. 10.2 Storage Temperature: Cool ambient. 10.3 Inert Atmosphere: No requirement. 10.4 Venting: Store containers in well-ventilated area.								
12 HAZARD CLASSIFICATIONS 12.1 Code of Federal Regulations: Poisonous, Class A. 12.2 HAS Hazard Rating for Bulk Water Transportation: Not listed. 12.3 NFPA Hazard Classifications: <table data-bbox="974 1496 1201 1583"> <thead> <tr> <th>Category</th> <th>Classification</th> </tr> </thead> <tbody> <tr> <td>Health Hazard (Blue)</td> <td>4</td> </tr> <tr> <td>Flammability (Red)</td> <td>4</td> </tr> <tr> <td>Reactivity (Yellow)</td> <td>2</td> </tr> </tbody> </table>	Category	Classification	Health Hazard (Blue)	4	Flammability (Red)	4	Reactivity (Yellow)	2	13. NOTES (Cont. read on pages 5 and 6)									

CBR

CYANOGEN BROMIDE

Common Synonyms	Solid crystals	Colorless	Penetrating odor
Sinks and mixes with water			
AVOID CONTACT WITH SOLID: Keep people away. Wear heavy protective suit with hood, gloves and respiratory apparatus. Wash exposed skin with soap and water. Notify authorities if exposed.			
Fire	Not flammable POISONOUS GASES ARE PRODUCED WHEN HEATED Wear heavy protective suit with hood, gloves and respiratory apparatus. Notify authorities if exposed.		
	CALL FOR MEDICAL AID DUST POISONOUS IF INHALED OR IF SKIN IS EXPOSED Irritating to eyes Mildly Irritant Exposure to dusts may cause irritation to eyes. Exposure to dusts may cause irritation to skin. SOLIDS POISONOUS IF SWALLOWED Will burn skin and eyes Refractory to acids and alkalis Exposure to dusts may cause irritation to eyes. Exposure to dusts may cause irritation to skin. IF IN EYES: Hold eyelids open and flush with plenty of water. IF SWALLOWED: Do not induce vomiting. Notify authorities if exposed. DO NOT INDUCE VOMITING		
Exposure			
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes Notify authorities if exposed. Notify people if exposed.		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-1) Issue warning - poison Restrict access Disperse and flush		2. LABEL 	
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: No common synonyms 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: BrCN 3.4 IMCO/United Nations Numerical Designation: 6.1 1889		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: Colorless 4.3 Odor: Penetrating	
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Chemical cartridge respirator, goggles, protective clothing, rubber gloves 5.2 Symptoms Following Exposure: Same symptoms as hydrogen cyanide. Because it irritates the eyes, throat, and lungs severely, it is unlikely that anyone would voluntarily remain in areas with a high enough concentration to cause a cyanide effect. 5.3 Treatment for Exposure: Call a physician. INHALATION: remove victim's fresh air. If not breathing, give artificial respiration, preferably mouth to mouth. If symptoms of cyanide poisoning are observed, administer amyl nitrite as instructed for HCN. INGESTION: have victim drink water or milk, do NOT induce vomiting. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.5 ppm (suggested) 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Data not available 5.7 Late Toxicity: Workers exposed to solutions may develop dermatitis 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause severe irritation of eyes and throat and can cause eye and lung injury. They cannot be tolerated even at low concentrations. 5.9 Liquid or Solid Irritant Characteristics: Severe skin irritant. Causes second- and third-degree burns on short contact, very injurious to the eyes. 5.10 Odor Threshold: Data not available			

6 FIRE HAZARDS

6.1 **Flash Point:** Not flammable

6.2 **Flammable Limits in Air:** Not flammable

6.3 **Fire Extinguishing Agents:** Not pertinent

6.4 **Fire Extinguishing Agents Not to be Used:** Not pertinent

6.5 **Special Hazards of Combustion Products:** Poison gases are produced in fire

6.6 **Behavior in Fire:** Not pertinent

6.7 **Ignition Temperature:** Not flammable

6.8 **Electrical Hazard:** Not pertinent

6.9 **Burning Rate:** Not flammable

7. CHEMICAL REACTIVITY

7.1 **Reactivity with Water:** No reaction

7.2 **Reactivity with Common Materials:** No reaction

7.3 **Stability During Transport:** Stable

7.4 **Neutralizing Agents for Acids and Caustics:** Strong bleaching powder solution let stand 24 hr

7.5 **Polymerization:** Does not occur

7.6 **Inhibitor of Polymerization:** Not pertinent

8 WATER POLLUTION

8.1 **Aquatic Toxicity:** Data not available

8.2 **Waterlow Toxicity:** Data not available

8.3 **Biological Oxygen Demand (BOD):** Data not available

8.4 **Food Chain Concentration Potential:** None

CYCLOHEXANOL

Common Synonyms Hexanol Hexylalcohol Cyclohexyl alcohol Hydroxycyclohexane	Only liquid Colorless to light yellow Alcohol odor Floats and mixes slowly with water. May solidify. Freezing point is 75°F.
Fire	Combustible
Exposure	LIQUID OR SOLID Will burn skin and eyes. Harmful if swallowed.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes.
1. RESPONSE TO DISCHARGE See Response Methods Handbook, CG 446.4. Disperse and flush.	2. LABELS No hazard label required by Code of Federal Regulations.
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Adronal Anol Cyclohexyl alcohol Hexanol Hexylalcohol Hydroxycyclohexane 3.2 Coast Guard Compatibility Classification: Alcohol 3.3 Chemical Formula: $C_6H_{12}O$ 3.4 IPCO-United Nations Numerical Designation: Not listed.	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as received): Solid or liquid 4.2 Color: Colorless to faintly yellow 4.3 Odor: Like camphor
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Goggles or face shield. 5.2 Symptoms Following Exposure: Nausea, depression of the central nervous system, tending to produce sleep or unconsciousness. 5.3 Treatment for Exposure: Eye contact is more hazardous than inhalation; skin irritation on ingestion. Flush eyes with water and remove clothing. Wash skin with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Not specified. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 2. LD ₅₀ 0.5 to 1 g/kg. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause a slight stinging of the eyes on respiratory system if present in high concentrations. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Causes some temporary skin and first degree burns on short exposure and may cause severe burns on long exposure. 5.10 Odor Threshold: Data not available.	

6. FIRE HAZARDS 6.1 Flash Point: 100°F (38°C) (154°F) (CC) 6.2 Flammable Limits in Air: Data not available. 6.3 Fire Extinguishing Agents: Water, foam, carbon dioxide or dry chemical. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Not pertinent. 6.6 Behavior in Fire: Not pertinent. 6.7 Ignition Temperature: 572°F. 6.8 Electrical Hazard: Data not available. 6.9 Burning Rate: 3.9 mm/min.	8. CCH

CYCLOHEXANONE

Common Synonyms Cyclohexyl ketone		Watery liquid	Colorless to light yellow	Sweet, peppermint odor
		Floats and mixes slowly with water		
As a solvent, cyclohexanone is used in the manufacture of plastics, dyes, and pharmaceuticals. It is also used in the production of synthetic rubber and in the treatment of wood preservatives.				
Fire		Combustible		
Exposure		LIQUID Will burn skin and eyes Harmful if swallowed May be dangerous if it enters water intakes		
Water Pollution		Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes.		

1. RESPONSE TO DISCHARGE See Response Methods Handbook, CG 444-4 Disperse and flush	2. LABELS No hazard label required by Code of Federal Regulations
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: None Cyclohexyl ketone Hydrol O Naloxone Pemoloxone Naloxone Ketone 3.2 Coast Guard Compatibility Classification: Ketone 3.3 Chemical Formula: $C_6H_{10}O$ 3.4 IMCO United Nations Numerical Designation: 11, 1915	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless to light yellow 4.3 Odor: Sweet, peppermint and acetone

5. HEALTH HAZARDS	
5.1 Personal Protective Equipment: Chemical goggles 5.2 Symptoms Following Exposure: Irritation of vapors from the mouth of canisters. Asthma. The liquid may cause dermatitis. 5.3 Treatment for Exposure: Immediately flush eyes with plenty of water, call a physician. 5.4 Toxicity by Inhalation (Threshold Limit Value): 50 ppm 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion, Grade 2 LD ₅₀ : 5 g/kg 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Vapor is moderately irritating such that personnel will usually tolerate moderate to high vapor concentrations. 5.9 Liquid or Solid Characteristics: A colorless, slightly oily and non-flammable liquid with a sweet, peppermint and acetone odor. 5.10 Odor Threshold: 0.22 ppm

CYCLOHEXANONE PEROXIDE

Common Synonyms 1-Hydroperoxycyclohexyl 1-hydroperoxycyclohexyl peroxide Hydroperoxycyclohexyl hydroperoxycyclohexyl peroxide Dicyclohexanone diperoxide		Thick liquid	White	Odorless
		Sinks in water		
Fire		Combustible Containers may explode in fire		
Exposure		LIQUID Irritating to skin and eyes Harmful if swallowed		
Water Pollution		Effect of low concentrations on aquatic life is unknown Foaming to shoreline May be dangerous if it enters water intakes		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning - oxidizing material water contamination Mechanical treatment Should be removed Chemical and physical treatment		2. LABEL 		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Hydroperoxycyclohexyl hydroperoxycyclohexyl peroxide; Hydro- peroxycyclohexyl hydroperoxycyclohexyl peroxide; Cadot HDP; Lupercol JDB- 50-T; Dicyclohexanone diperoxide 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: <chem>C12H20O3</chem> ; <chem>C12H20O3</chem> ; dioxetane <i>(Continued on page 4)</i>		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid or paste 4.2 Color: Colorless to white 4.3 Odor: None		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Goggles or face shield; rubber gloves; protect ventilation 5.2 Symptoms Following Exposure: Irritates eyes and skin on contact; ingestion causes irritation in mouth and stomach 5.3 Treatment for Exposure: If eyes flushed with water for at least 15 min.; per medical attention; SKIN wiper flush and wash with soap and water; per medical attention; if swallowed, DO NOT INDUCE VOMITING; per medical attention 5.4 Toxicity by Inhalation (Threshold Limit Value): Not pertinent 5.5 Short-Term Inhalation Limit: Not pertinent 5.6 Toxicity by Ingestion: Grade 2 LD ₅₀ = 1.5 g/kg 5.7 Late Toxicity: Data not available 5.8 Vapo (Gas) Irritant Characteristics: Not pertinent 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Not pertinent				

6 FIRE HAZARDS

- 6.1 Flash Point: Combustible vapor
155°F (57°C) (distillate)
6.2 Flammable Limits in Air: Not pertinent
6.3 Fire Extinguishing Agents: Water foam
Dry chemical; carbon dioxide
6.4 Fire Extinguishing Agents Not to be Used:
Not pertinent
6.5 Special Hazards of Combustion Products:
Not pertinent
6.6 Behavior in Fire: May explode
6.7 Ignition Temperature: 700°F (371°C)
perhalate
6.8 Electrical Hazard: Not pertinent
6.9 Burning Rate: Data not available

7. CHEMICAL REACTIVITY

- 7.1 Reactivity with Water: No reaction
7.2 Reactivity with Common Materials:
No reaction
7.3 Stability During Transport: Stable
7.4 Neutralizing Agents for Acids and
Caustics: Not pertinent
7.5 Polymerization: Not pertinent
7.6 Inhibitor of Polymerization:
Not pertinent

8 WATER POLLUTION

- 8.1 Aquatic Toxicity: Data not available
8.2 Waterford Toxicity: Data not available
8.3 Biological Oxygen Demand (BOD):
Data not available
8.4 Food Chain Concentration Potential:
None

9. SELECTED MANUFACTURERS

- Pennwalt Corporation
Lewiston Division
P.O. Box 1045
Buffalo, N.Y. 14241
Dun Industries Inc.
Aries Chemical Division
555 Garden Street
Lima, Ohio 43035
Norton Chemical Corp.
480 Agard Road
Merriden, Conn. 06445

10 SHIPPING INFORMATION

- 10.1 Grades or Purity: 25% pure with
distillate
10.2 Storage Temperature: Not pertinent
10.3 Inert Atmosphere: Not pertinent
10.4 Venting: Open to atmosphere

CHT

CYCLOHEXYLTRICHLOROSILANE

Chemical Synonyms Liquid Colorless Sharp irritating odor Reacts with water. Poisonous gas is produced on contact with water.	
Fire Combustible POISONOUS GASES MAY BE PRODUCED IN FIRE Irritating to eyes, nose and throat	
 Exposure GAS PRODUCED IN REACTION WITH WATER POISONOUS IF INHALED Irritating to eyes, nose and throat LIQUID: Will burn skin, and eyes. Harmful if swallowed	
Water Pollution Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes.	
1. RESPONSE TO DISCHARGE (See Response Methods, Handbook, CG 688-4.) Evacuate area. CONTAINMENT. Reentry allowed. Dispense and flush with care.	2. LABEL  CORROSIVE
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: No common synonyms. 3.2 Coast Guard Compatibility Classification: Not applicable. 3.3 Chemical Formula: $C_6H_{11}Cl_3Si$ 3.4 IMCO/United Nations Numerical Designation: 1.1762	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Sharp hydrochloric acid like pungent and irritating
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Avoid exposure to respiratory tract; gloves, apron, goggles, other protective equipment as needed to protect skin and eyes. 5.2 Symptoms Following Exposure: Inhalation causes irritation of mucous membranes. Contact with eyes or skin causes severe burns. Ingestion causes severe irritation of mouth and stomach. 5.3 Treatment for Exposure: Get medical attention immediately following all exposures. If this compound INHALED, remove from exposure, support respiration. EYES: Flush with water for 15 min. SKIN: Flush with water. INGESTION: Give large amounts of water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limit: Data not available. 5.6 Toxicity by Ingestion: Grade 2 oral LD ₅₀ = 2,850 mg/kg rats. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.	

6. FIRE HAZARDS 6.1 Flash Point: $> 200^\circ F (93^\circ C)$ 6.2 Flammable Limits in Air: Not pertinent. 6.3 Fire Extinguishing Agents: Not pertinent. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Irritating to eyes, nose and throat; hydrochloric acid. 6.6 Behavior in Fire: Decomposes to form hydrogen chloride, carbon monoxide, carbon dioxide, and water. 6.7 Ignition Temperature: Not pertinent. 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: Not pertinent.	8. WATER POLLUTION 8.1 Aquatic Toxicity: Data not available. 8.2 Waterlow Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: Not pertinent.
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: Reacts violently with water to produce hydrogen chloride and silane. 7.2 Reactivity with Common Materials: Does not react with acids, bases, or oxidizing agents. Reacts with water to produce hydrogen chloride and silane. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Flush with water. Neutralize with weak acid. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9. SELECTED MANUFACTURERS Data not available. Data not available. Data not available.
11. HAZARD ASSESSMENT CODE See Hazard Assessment Handbook, CG 688-3. A 0	10. SHIPPING INFORMATION 10.1 Grades or Purities: Commercial. 10.2 Storage Temperature: Ambient. 10.3 Inert Atmosphere: Not required. 10.4 Venting: Pressure vessel.
12. HAZARD CLASSIFICATIONS 12.1 Code of Federal Regulations: Not pertinent. 12.2 HAS Hazard Rating for Bulk Water Transportation: Not pertinent. 12.3 NFPA Hazard Classifications: Not rated.	13. CYP

CYCLOPENTANE

Common Synonyms Pentamethylene	Colorless Mild, sweet odor Floats on water. Flammable, irritating vapor is produced.
Physical State Vapor Boiling point: 49.3°C (120.7°F) Freezing point: -130.0°C (-192.0°F) Density: 0.62 g/cm³ (37.5 lb/cu ft) Vapor density: 2.0 (air = 1) Solubility: Insoluble in water	Flammability Flash point: -20°C (-4°F) Flashback along vapor trail may occur Vapor may explode if ignited in an enclosed area Extinguish with dry chemical, carbon dioxide, or foam Water may be ineffective
Fire	FLAMMABLE Containers may explode in fire Flashback along vapor trail may occur Vapor may explode if ignited in an enclosed area Extinguish with dry chemical, carbon dioxide, or foam Water may be ineffective
Exposure	VAPOR Irritating to eyes, nose and throat If inhaled will cause dizziness, nausea, vomiting, difficult breathing or loss of consciousness Remove to fresh air If in eyes, flush with water for 15 min If in mouth, do not induce vomiting If SWALLOWED, do not induce vomiting LIQUID Irritating to skin and eyes Harmful if swallowed Remove contaminated clothing Flush affected areas with plenty of water If IN EYES, hold eye closed and pour water over eye If SWALLOWED, do not induce vomiting DO NOT INDUCE VOMITING
Water Pollution	Effect of low concentrations on aquatic life is unknown Floating to shoreline May be dangerous if it enters water intakes Not readily biodegradable Not biodegradable in the water column
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 448-3) Issue warning - high flammability Evacuate area Disperse and flush	2. LABEL 
3 CHEMICAL DESIGNATIONS 31 Synonyms: Pentamethylene 32 Coast Guard Compatibility Classification: Saturated hydrocarbon 33 Chemical Formula: C ₅ H ₁₀ 34 IMCO/United Nations Numerical Designation: 311146	4 OBSERVABLE CHARACTERISTICS 41 Physical State (as shipped): Liquid 42 Color: Colorless 43 Odor: Like gasoline, mild, sweet
5 HEALTH HAZARDS 51 Personal Protective Equipment: Hydrocarbon canister, supplied air, or hose mask, rubber or plastic gloves, chemical goggles or face shield 52 Symptoms Following Exposure: Inhalation causes dizziness, nausea, and vomiting; concentrated vapor may cause unconsciousness and collapse. Vapor causes slight stinging of eyes. Contact with liquid causes irritation of eyes and may irritate skin if allowed to remain. Ingestion causes irritation of stomach. Aspiration produces severe lung irritation and rapidly developing pulmonary edema, central nervous system excitement followed by depression. 53 Treatment for Exposure: INHALATION: remove to fresh air; if breathing stops, apply artificial respiration and administer oxygen. EYES: flush with water for at least 15 min; call a physician. SKIN: flush well with water; then wash with soap and water. INGESTION: do NOT induce vomiting; guard against aspiration into lungs. ASPIRATION: induce rest; give oxygen; get medical attention. 54 Toxicity by Inhalation (Threshold Limit Value): Data not available 55 Short-Term Inhalation Limits: 300 ppm for 60 min 56 Toxicity by Ingestion: Grade 2 LD ₅₀ 0.5 to 5 g/kg 57 Lets Toxicity: None 58 Vapor (Gas) Irritant Characteristics: Vapors cause a slight stinging of the eyes or respiratory system if present in high concentrations. The effect is temporary. 59 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain, may cause stinging and reddening of the skin. 510 Odor Threshold: Data not available	

6 FIRE HAZARDS 61 Flash Point: <20°C (-4°F) 62 Flammable Limits in Air: (approx.) 1.1% - 8.7% 63 Fire Extinguishing Agents: Dry chemical foam, carbon dioxide 64 Fire Extinguishing Agents Not to be Used: Water may be ineffective 65 Special Hazards of Combustion Products: Not pertinent 66 Behavior in Fire: Containers may explode 67 Ignition Temperature: 716°C 68 Electrical Hazard: Not pertinent 69 Burning Rate: 7.9 mm/min	8. CPR

CYCLOPROPANE

Common Synonyms Trimethylene		Liquefied gas	Colorless	Mild sweet odor
		Floats and boils on water. Flammable visible vapor cloud is produced		
NEVER use cyclopropane in a confined space. It is extremely flammable and can explode. It is also a simple asphyxiant. It can displace oxygen in the air and cause suffocation. It is also a potent anesthetic and can cause unconsciousness. It is also a potent irritant and can cause severe burns. It is also a potent carcinogen and can cause cancer. It is also a potent mutagen and can cause mutations. It is also a potent teratogen and can cause birth defects. It is also a potent embryotoxin and can cause embryonic death. It is also a potent fetotoxicant and can cause fetal death. It is also a potent reproductive toxicant and can cause reproductive failure. It is also a potent developmental toxicant and can cause developmental abnormalities. It is also a potent immunotoxicant and can cause immunosuppression. It is also a potent neurotoxicant and can cause neurological damage. It is also a potent hepatotoxicant and can cause liver damage. It is also a potent nephrotoxicant and can cause kidney damage. It is also a potent cardiotoxicant and can cause heart damage. It is also a potent hematotoxicant and can cause blood damage.				
Fire	FLAMMABLE Containers may explode in fire. Flashback also vapor trail may occur. Vapor may explode if ignited in an enclosed area.			
Exposure	VAPOR If inhaled will cause difficult breathing. LIQUID Will cause frostbite.			
Water Pollution	Not harmful to aquatic life.			
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: high flammability. Restrict access. Evacuate area.		2. LABEL 		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Trimethylene 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: C ₃ H ₆ 3.4 IMCO/United Nations Numerical Designation: 1027		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquefied gas 4.2 Color: Colorless 4.3 Odor: Sweet, slightly pungent, not irritating characteristic odor, like light petroleum solvent.		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Self-contained breathing apparatus for high concentrations of vapor; safety goggles or face shield. 5.2 Symptoms Following Exposure: Inhalation causes some analgesia, anesthesia, pupil dilation, shallow depth of respirations, decreasing muscle tone. Contact with liquid may cause frostbite. 5.3 Treatment for Exposure: INHALATION: remove promptly to fresh air; if symptoms of asphyxiation persist, administer artificial respiration and oxygen; treat symptomatically thereafter. SKIN: if frostbite has occurred, apply warm water; treat burn. 5.4 Toxicity by Inhalation (Threshold Limit Value): 400 ppm (suggested) 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Data not available 5.7 Late Toxicity: None 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available				

6. CMP

p-CYMENE

Common Synonyms p-Isopropyltoluene 1-Methyl-4-isopropylbenzene Cymol Methylpropylbenzene Isopropyltoluol		Liquid Floats on water	Colorless Mild pleasant odor
Physical Properties Boiling Point: 151°C (324°F) Melting Point: -90°C (-130°F) Density: 0.852 g/cm³ (20°C) Vapor Pressure: 10 mm Hg at 20°C			
Fire	Combustible Flash point with closed cup: 117°F (42°C) Autoignition temperature: 500°F (260°C) Minimum ignition energy: 0.02 mJ		
Exposure	Irritating to skin and eyes LIQUID Irritating to skin and eyes Repeated contact with the eyes may cause severe irritation. If in eyes, flush with water for 15 min. If INGESTED, do not induce vomiting. Seek medical attention. If SWALLOWED, do not induce vomiting. Seek medical attention.		
Water Pollution	Effect of low concentrations on aquatic life is unknown. Fouling to shoreline. May be dangerous if it enters water intakes. Not recommended for use in water treatment.		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning - water contaminant Mechanical containment Should be removed Chemical and physical treatment		2. LABELS No label required by Code of Federal Regulations	
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Cymol, p-Isopropyltoluene, Isopropyltoluol, 1-Methyl-4-isopropylbenzene, Methylpropylbenzene 3.2 Coast Guard Compatibility Classification: Aromatic hydrocarbon 3.3 Chemical Formula: p-CH ₃ C ₆ H ₄ CH(CH ₃) ₂ 3.4 IMCO/United Nations Numerical Designation: 113, 204		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Mild pleasant aromatic solvent type	
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Self contained or air-line breathing apparatus, solvent resistant rubber gloves, chemical splash goggles 5.2 Symptoms Following Exposure: Inhalation causes impairment of coordination, headache. Contact with liquid causes mild irritation of eyes and skin. Ingestion causes irritation of mouth and stomach 5.3 Treatment for Exposure: INHALATION: remove victim from contaminated area, administer artificial respiration if necessary, call physician. EYES: flush with water for 15 min., call a physician. SKIN: wipe off liquid, wash well with soap and water. INGESTION: induce vomiting, get medical attention 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 2, oral rat LD ₅₀ = 4,750 mg/kg. Oral human TD ₅₀ (lowest toxic dose) = 56 mg/kg (affects central nervous system) 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Vapors are nonirritating to eyes and throat 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain, may cause smothering or irritation to skin 5.10 Odor Threshold: Data not available			

6. FIRE HAZARDS

- 6.1 **Flash Point:** 140°F (60°C) 117°F (42°C)
- 6.2 **Flammable Limits in Air:** 0.7% - 6%
- 6.3 **Fire Extinguishing Agents:** Foam, dry chemical, carbon dioxide
- 6.4 **Fire Extinguishing Agents Not to be Used:** Water may be ineffective
- 6.5 **Special Hazards of Combustion Products:** Not pertinent
- 6.6 **Behavior in Fire:** Not pertinent
- 6.7 **Ignition Temperature:** 517°F
- 6.8 **Electrical Hazards:** Data not available

NOTES

DIP

DALAPON

Common Synonyms 2,2-Dichloropropionic acid 2,2-Dichloropropenoic acid		Liquid	Colorless	Acrid odor
Sinks and mixes with water				
AUGUST 1995 EDITION OF THE HAZARD IDENTIFICATION GUIDE This guide is for informational purposes only. It is not intended to be used as a substitute for the full text of the Material Safety Data Sheet (MSDS) or other regulatory documents. It is the user's responsibility to consult the full text of the MSDS for complete information on the hazards, handling, and use of the product.				
Fire	Combustible Flash point: 105°F (40°C) Flammable limits in air: 1.5% to 10.5% Fire extinguishing agents: Dry chemical, alcohol foam, carbon dioxide Fire extinguishing agents not to be used: Water may be ineffective			
Exposure	CALL FOR MEDICAL AID VAPOR Irritating to eyes, nose and throat If in eyes: Flush with water for at least 15 minutes. If in nose: Inhale deeply and exhale slowly. LIQUID Will burn skin and eyes Harmful if swallowed If swallowed: Do not induce vomiting. If in eyes: Flush with water for at least 15 minutes. If in nose: Inhale deeply and exhale slowly. DO NOT INDUCE VOMITING			
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes Nontoxic to aquatic life in concentrations of 100 mg/L or less			
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning - corrosive Restrict access Disperse and flush		2. LABEL 		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: 2,2-Dichloropropionic acid, alpha, alpha-Dichloropropenoic acid, 2,2-Dichloropropenoic acid 3.2 Coast Guard Competibility Classification: Not listed 3.3 Chemical Formula: CHCl ₂ COOH 3.4 IMCO/United Nations Numerical Designation: 8 1760		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Acrid		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Protective clothing, including goggles, gloves and boots, self-contained breathing apparatus 5.2 Symptoms Following Exposure: Inhalation causes severe irritation of nose, mouth and lungs. Ingestion causes severe irritation of mouth and stomach. Contact with eyes or skin causes irritation and burns. 5.3 Treatment for Exposure: INHALATION: move to fresh air; if patient is not breathing, give artificial respiration; keep patient quiet; get medical attention. INGESTION: give large amounts of water; get medical attention. EYES: flush with water for at least 15 minutes; get medical attention. SKIN: flush with water; get medical attention if irritation persists. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 2, oral LD ₅₀ = 1.65 g/kg (mouse), 1.57 g/kg (rat) 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: 2500 mg/m ³

6.9 Burning Rate: Data not available

8. WATER POLLUTION

- 8.1 Aquatic Toxicity: 105 ppm/96 hr/bluegill/1 L/m³/fresh water, 1 ppm/48 hr/brown shrimp/1 L/m³ salt water
8.2 Waterlow Toxicity: > 5 000 ppm 1 C₅₀
8.3 Biological Oxygen Demand (BOD): 0.04 lb/lb 5 days unacclimated seed, 0.32 lb/lb 5 days acclimated seed
8.4 Food Chain Concentration Potential: None

9. SELECTED MANUFACTURERS

Dow Chemical Co.
Midland, Mich 48640

7. CHEMICAL REACTIVITY

- 7.1 Reactivity with Water: Reacts slowly to form hydrochloric and pyruvic acids. The reaction is not hazardous.
7.2 Reactivity with Common Materials: Very corrosive to aluminum and copper alloys. Flammable and explosive hydrogen gas may form in enclosed spaces.
7.3 Stability During Transport: Stable
7.4 Neutralizing Agents for Acids and Caustics: Flush with water; rinse with dilute sodium bicarbonate or soda ash solution.
7.5 Polymerization: Not pertinent
7.6 Inhibitor of Polymerization: Not pertinent

10. SHIPPING INFORMATION

- 10.1 Grades or Purity: Technical grade, 90% solid formulations of sodium and magnesium salts are sometimes referred to as Dalapon and are much less corrosive.
10.2 Storage Temperature: 70-90°F
10.3 Inert Atmosphere: No requirement
10.4 Venting: Open

11. HAZARD ASSESSMENT CODE

See Hazard Assessment Manual, CG 446-2
A P Q

12. HAZARD CLASSIFICATIONS

- 12.1 Code of Federal Regulations: Corrosive liquid
12.2 NAS Hazard Rating for Bulk Water Transportation: Not listed
12.3 NFPA Hazard Classifications: Not listed

13. PHYSICAL AND CHEMICAL PROPERTIES

- 13.1 Physical State at 15°C and 1 atm: Liquid
13.2 Molecular Weight: 143
13.3 Boiling Point at 1 atm: 174°F = 190°C = 463°K
13.4 Freezing Point: 46°F = 5°C = 281°K
13.5 Critical Temperature: not available
13.6 Critical Pressure: Data not available
13.7 Specific Gravity: 1.39 at 23°C (liquid)
13.8 Liquid Surface Tension: Data not available
13.9 Liquid-Water Interfacial Tension: Not pertinent
13.10 Vapor (Gas) Specific Gravity: 4.9
13.11 Ratio of Specific Heats of Vapor (Gas): Not pertinent
13.12 Latent Heat of Vaporization: Data not available
13.13 Heat of Combustion: Data not available
13.14 Heat of Decomposition: Not pertinent
13.15 Heat of Solution: Data not available
13.16 Heat of Polymerization: Not pertinent

NOTES

DDD	DDD
-----	-----

DDD	DDD
-----	-----

Common Synonyms TDE 1,1-Dichloro-2,2-bis(p-chlorophenyl)ethane Dichlorodiphenyldichloroethane		Solid Sinks in water	White
Store in container to provide protection from light. Avoid contact with skin and clothing. In case of fire, use dry chemical or carbon dioxide extinguishers. See also MSDS for additional information.			
Fire	Combustible Irritating gases may be produced when heated. Water reacts violently with molten material. Fatigues with water vapor at elevated temperatures.		
Exposure	CALL FOR MEDICAL AID DUST Irritating to eyes, nose and throat Harmful if inhaled Irritates eyes; may irritate respiratory tract with particles of dust. Breathing apparatus should be worn during exposure. Irritation subsides after removal from exposure. SOLID Irritating to skin and eyes. Harmful if swallowed Reactions: none known. Incompatible materials with peroxide, acids, alkalis, amines, alcohols, ketones, esters, glycols, organic solvents, oils, greases, waxes, resins, pigments, dyes, etc. If SWALLOWED do NOT induce vomiting. Take small sips of water if able. If SWALLOWED do NOT take LAXATIVES OR INDUCE VOMITING UNLESS SO INSTRUCTED BY A PHYSICIAN.		
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes. Not biodegradable and will persist. No toxic effects are seen with fish.		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook CG 444-A) Issue warning - water contaminant Should be removed Chemical and physical treatment		2. LABELS No hazard label required by Code of Federal Regulations	
3. CHEMICAL DESIGNATIONS 31 Synonyms: 1,1-Dichloro-2,2-bis-(p-chlorophenyl) ethane, Dichlorodiphenyldichloroethane, TDI 32 Coast Guard Compatibility Classification: Not listed 33 Chemical Formula: (4 C ₆ H ₄) CH ₂ Cl ₂ 34 IMCO/United Nations Numerical Designation: Not listed		4. NOTES

DBR

DECABORANE

Common Synonyms	Solid	White	Sharp odor
	Floats on water		
NOT FOR USE WITH MOLYBDENUM, CHROMIUM, AND VANADIUM			
<u>Fire</u>	FLAMMABLE. POISONOUS GASES MAY BE PRODUCED IN FIRE Containers may explode in fire		
 <u>Exposure</u>	DUST POISONOUS IF INHALED OR IF SKIN IS EXPOSED SOLID POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED		
<u>Water Pollution</u>	Effect of low concentrations on aquatic life is unknown. Fooling to shoreline May be dangerous if it enters water intakes.		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-1.) Issue warning: high flammability water contaminant: poison Restrict access Mechanical containment Should be removed Chemical and physical treatment		2. LABEL  	
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: No common synonyms 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: $B_{10}H_{12}$ 3.4 IMCO/United Nations Numerical Designation: 4.1 JAM		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: White 4.3 Odor: Pungent	
5. HEALTH HAZARDS			
5.1 Personal Protective Equipment: Self contained breathing apparatus or positive pressure hose mask, rubber boots or overshoes, clothing made of material resistant to decaborane, rubber gloves, chemical-type goggles or face shield			
5.2 Symptoms Following Exposure: (The onset of symptoms is frequently delayed until one or two days after exposure.) Inhalation or ingestion causes headache, nausea, light headedness, drowsiness, nervousness, lack of coordination, and tremor; muscle spasms and generalized convulsions may occur. Dust irritates eyes and skin and may give same systemic symptoms as for inhalation of left borane.			
5.3 Treatment for Exposure: Get medical attention after all exposures to this compound. Symptoms may be delayed for 48 hours. INHALATION: move patient to fresh air, keep him warm and quiet. EYES: flush with water for at least 15 min. SKIN: immediately wash with soap and plenty of water. INGESTION: if victim is conscious, give a tablespoonful of salt in a glass of warm water and repeat until vomit fluid is clear. Note to physician: Treat symptomatically; administration of methocarbamol or other muscle relaxant may be helpful immediately following exposure and in the absence of symptoms.			
5.4 Toxicity by Inhalation (Threshold Limit Value): 0.05 ppm			
5.5 Short-Term Inhalation Limits: Data not available			
5.6 Toxicity by Ingestion: Grade 4, oral LD ₅₀ = 40 mg/kg (mouse)			
5.7 Late Toxicity: Data not available			
5.8 Vapor (Gas) Irritant Characteristics: Data not available			

6. FIRE HAZARDS

- 6.1 Flash Point: (1) flammable solids
176°F C.C.
- 6.2 Flammable Limits in Air: Not pertinent
- 6.3 Fire Extinguishing Agents: Water, foam, dry chemical, and carbon dioxide
- 6.4 Fire Extinguishing Agents Not to be Used: Halogenated extinguishing agents
- 6.5 Special Hazards of Combustion Products: May give toxic fumes of unburned material
- 6.6 Behavior in Fire: May explode when hot
Burns with a green-colored flame
- 6.7 Ignition Temperature: 400°F
- 6.8 Electrical Hazard: Not pertinent
- 6.9 Burning Rate: Not pertinent

7. CHEMICAL REACTIVITY

- 7.1 Reactivity with Water: Reacts slowly to form flammable hydrogen gas, which can accumulate in closed area
- 7.2 Reactivity with Common Materials: Corrosive to natural rubber, some synthetic rubbers, some greases and some lubricants
- 7.3 Stability During Transport: Stable
- 7.4 Neutralizing Agents for Acids and Caustics: Flush with 1% aqueous ammonia solution, then with water. Methyl alcohol may also be used
- 7.5 Polymerization: Not pertinent
- 7.6 Inhibitor of Polymerization: Not pertinent

8. WATER POLLUTION

- 8.1 Aquatic Toxicity: Data not available
- 8.2 Water Pollutability: Data not available
- 8.3 Biological Oxygen Demand (BOD): Data not available
- 8.4 Food Chain Concentration Potential: None

DECAHYDRONAPHTHALENE

Common Synonyms Bicyclo [4.4.0]decane Naphthalene Perhydronaphthalene Dec Decalin		Liquid Floats on water	Colorless	Turpentine-like odor
Fire		Combustible		
Exposure		LIQUID Irritating to skin and eyes If swallowed will cause headache, nausea, or vomiting Foul odor to shoreline May be dangerous if it enters water intakes		
Water Pollution		Effect of low concentrations on aquatic life is unknown Fouling to shoreline May be dangerous if it enters water intakes		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4.) Mechanical containment Should be removed Chemical and physical treatment		2. LABELS No label required by Code of Federal Regulations		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Bicyclo [4.4.0]decane Naphthalene Perhydronaphthalene Dec Decalin De Kalin Naphthane cis- or trans Decahydronaphthalene 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: C ₁₀ H ₁₈ 3.4 IASCO/United Nations Numerical Designation: 1.1.114"		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Aromatic like turpentine, mild characteristics		
5. HEALTH HAZARDS				
5.1 Personal Protective Equipment: Air mask or self-contained breathing apparatus if in enclosed tank; rubber gloves or protective cream; goggles or face shield				
5.2 Symptoms Following Exposure: Inhalation or ingestion irritates nose and throat; causes nausea, headache, vomiting; urine may become blue; irritates eyes; burns to fat skin and causes stinging and secondary infection, e.g., mammary gland up				
5.3 Treatment for Exposure: INHALATION: remove to fresh air; EYES: flush with water for at least 15 min; SKIN: wash with water and mild soap; INGESTION: give emetic such as warm salt water, followed by a mild cathartic; direct physician to examine liver and kidney function				
5.4 Toxicity by Inhalation (Threshold Limit Value): 25 ppm (suggested)				
5.5 Short-Term Inhalation Limits: Data not available				
5.6 Toxicity by Ingestion: Grade 2 oral LD ₅₀ = 4.170 mg/kg (rat)				
5.7 Late Toxicity: Data not available				
5.8 Vapor (Gas) Irritant Characteristics: Data not available				
5.9 Liquid or Solid Irritant Characteristics: Data not available				
5.10 Odor Threshold: Data not available				

6. FIRE HAZARDS

- 6.1 Flash Point: 132°F (0°C)
 6.2 Flammable Limits in Air: 0.7% - 8.4%
 6.3 Fire Extinguishing Agents: Water; foam; dry chemical; carbon dioxide
 6.4 Fire Extinguishing Agents Not to be Used: Water
 6.5 Special Hazards of Combustion Products: Not pertinent
 6.6 Behavior in Fire: Not pertinent
 6.7 Ignition Temperature: 482°F
 6.8 Electrical Hazard: Data not available

DCE

1-DECENE

Common Synonyms alpha-Decene		Water: liquid Floats on water	Colorless	Pharm. odor
Not classified as a carcinogen by the National Cancer Institute. Not classified as a carcinogen by the International Agency for Research on Cancer.				
Fire		Combustible Flash point: 10°C (50°F)		
Exposure		CAUTION: IRRITANT LIQUID Irritating to skin and eyes. Prolonged contact may cause severe irritation. Inhalation of high concentrations may cause respiratory irritation. Ingestion of high concentrations may cause irritation of the digestive tract.		
Water Pollution		Effect of low concentrations on aquatic life is unknown. Polluting to shoreline. May be dangerous if it enters water intakes.		
1. RESPONSE TO DISCHARGE See Response Worksheet (Worksheet 10-444-4) Mechanical contamination should be removed. Chemical and physical treatment.		2. LABELS No hazard label required by Federal Labeling Regulations.		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: alpha-Decene 3.2 Coast Guard Competency Classification: OELH 3.3 Chemical Formula: CH ₃ (CH ₂) ₉ CH=CH ₂ 3.4 IMCO United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Mild, pleasant		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Eye protection, if an unspilled mass; goggles or face shield. 5.2 Symptoms Following Exposure: Vapors may produce slight irritation of eye and respiratory tract if present in high concentration. May also cause irritation of skin at high concentration. 5.3 Treatment for Exposure: CONTACT WITH EYES OR SKIN: Irritation of the eye should be relieved by thorough flushing with water. Skin areas should be washed with soap and water. Contaminated clothing should be removed before reuse. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Data not available. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Slight irritation of eye and respiratory tract at high concentrations. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Moderate hazard. If spilled, it is irritating and allowed to remain may cause skin irritation and reddening of the skin. 5.10 Odor Threshold: Data not available.

n-DECYLBENZENE

Common Synonyms 1-Phenyldecane Decylbenzene	Liquid White Floats on water
Fire	Combustible Flash point 225°F (107°C) (closed cup) Boiling point 341°F (172°C) Autoignition temperature 500°F (260°C) Extinction coefficient 0.00015
Exposure	CAUTION: MEDICAL ADVICE VAPOR Irritating to eyes, nose and throat If inhaled will cause coughing or difficult breathing If swallowed will cause nausea and vomiting LIQUID Irritating to skin and eyes If swallowed will cause nausea and vomiting If in contact with skin, wash with soap and water If in contact with eyes, flush with water for 15 minutes DO NOT INDUCE VOMITING
Water Pollution	Effect of low concentrations on aquatic life is unknown Fouling to shoreline May be dangerous if it enters water intakes Not recommended for use in water
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Mechanical containment Should be removed Chemical and physical treatment	2. LABELS No hazard label required by Code of Federal Regulations
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Decylbenzene, 1-Phenyldecane 3.2 Coast Guard Compatibility Classification: Aromatic hydrocarbons 3.3 Chemical Formula: $C_{11}H_{22}$ 3.4 IMCO/United Nations Numerical Designation: Not listed	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Data not available
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Goggles or face shield, rubber gloves 5.2 Symptoms Following Exposure: Inhalation of vapor causes slight irritation of nose and throat. Aspiration of liquid into lungs causes coughing, distress and pulmonary edema. Ingestion causes irritation of stomach. Contact with vapor or liquid causes irritation of eyes and mild irritation of skin. 5.3 Treatment for Exposure: INHALATION: move to fresh air. INGESTION: do NOT induce vomiting; call a doctor. EYES: flush with water. SKIN: wipe off; flush with water; wash with soap and water. ASPIRATION: enforce bed rest; administer oxygen; call a doctor. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Data not available 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available	

6. FIRE HAZARDS 6.1 Flash Point: 225°F (107°C) 6.2 Flammable Limits in Air: Data not available 6.3 Fire Extinguishing Agents: Dry chemical, carbon dioxide 6.4 Fire Extinguishing Agents Not to be Used: Water or foam may cause frothing 6.5 Special Hazards of Combustion Products: 6.6 Behavior in Fire: 6.7 Ignition Temperature: Data not available 6.8 Electrical Hazard: Data not available 6.9 Burning Rate: 5.04 mm/min	8. (Continued on pages 5 and 6)

DEMETON

Common Synonyms O,O (Diethyl-O and S)-[2 (ethylthio)ethyl] phosphorothioates	Liquid Yellowish brown Unpleasant odor	Sinks in water
AVOID CONTACT WITH LIQUID AND VAPOR. STEEL PEOPLE AWAY Wear protective clothing and equipment. Avoid contact with skin and eyes. If contact occurs, wash immediately with plenty of water. If inhaled, move to fresh air. If swallowed, do not induce vomiting. Seek medical attention.		
Fire	Solution in a combustible solvent. POISONOUS GASES MAY BE PRODUCED IN FIRE. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Wear goggles and suit when working with liquid. Do not breathe vapor.	
 Exposure	CALL FOR MEDICAL AID VAPOR POISONOUS IF INHALED If inhaled will cause headache or difficult breathing. If inhaled, move to fresh air. If possible, use self-rescue mask. LIQUID POISONOUS IF SWALLOWED Irritating to skin and eyes. If swallowed will cause nausea, vomiting or loss of consciousness. Do not induce vomiting. If swallowed, drink plenty of water. IF IN EYES Flush with plenty of water for at least 15 minutes. IF SWALLOWED Do not induce vomiting. If conscious, drink plenty of water. IF SWALLOWED AND LOSS OF CONSCIOUSNESS OR LACRIMATION Do not induce vomiting. If conscious, drink plenty of water.	
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify health authorities, water supply and local government.	
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: poison, water contaminant, high flammability. Restrict access. Mechanical containment. Should be removed. Chemical and physical treatment.		2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: O,O-Diethyl-O and S-[(2-ethylthio)ethyl] phosphorothioates. Mixture of O- and S-[(2-ethylthio)ethyl] phosphorothioic acid, O,O diethyl ester. Systox and its systox mixture. 3.2 Coast Guard Compatibility Classification: Not listed. 3.3 Chemical Formula: C ₈ H ₁₆ O ₂ PS ₂ C ₈ H ₁₆ mixture. 3.4 IMCO/United Nations Numerical Designation: Not listed.		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Amber. 4.3 Odor: Offensive sulfur compound odor.
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Organic vapor respirator in confined areas; rubber or latex gloves, splash goggles, rubber boots. 5.2 Symptoms Following Exposure: Inhalation causes headache, vertigo, blurred vision, lacrimation, salivation, sweating, muscular weakness and ataxia, dyspnea, diarrhea, abdominal cramps, vomiting, coma, pulmonary edema, and death. Ingestion causes nausea, vomiting, muscle twitching, coma. Contact with eyes or skin causes irritation. 5.3 Treatment for Exposure: Speed is essential. Call a physician after all overexposure to demeton. INHALATION: move to fresh air, if needed, begin artificial respiration. INGESTION: administer milk, water or salt-water and induce vomiting repeatedly. EYES: flush with water for at least 15 min. SKIN: flood and wash exposed skin areas thoroughly with water; remove contaminated clothing under a shower; wash with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.1 mg/m ³ . 5.5 Short-Term Inhalation Limits: 0.5 mg/m ³ , 30 min. 5.6 Toxicity by Ingestion: Grade 4 oral LD ₅₀ = 1.7 mg/kg (rat). 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.		

6. FIRE HAZARDS 6.1 Flash Point: 113°F (45°C). 6.2 Flammable Limits in Air: 1.0% - 5.5%. 6.3 Fire Extinguishing Agents: Dry chemical, foam, carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective on fire. 6.5 Special Hazards of Combustion Products: Irritating fumes of sulfur dioxide and phosphoric acid may form in fire. 6.6 Behavior in Fire: Compound may volatilize and form toxic fumes. Vapor of solvent is heavier than air and may travel considerable distance to a source of ignition and flash back. 6.7 Ignition Temperature: 367°F (187°C) (xylene solvent). 6.8 Electrical Hazard: (xylene) Class I, Group D. 6.9 Burning Rate: 5.8 mm/min.	8. WATER POLLUTION 8.1 Aquatic Toxicity: 0.1 ppm/24 hr. biocyllic reduction of enzyme in brain, fresh water. 8.2 Waterfowl Toxicity: 15 mg/kg. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: None.
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: May attack some forms of plastics. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9. SELECTED MANUFACTURERS Chemagro Division of Baychem Corp. Kansas City, Mo. 64120.
11. HAZARD ASSESSMENT CODE (See Hazard Assessment Handbook, CG 446-3) A X-1	10. SHIPPING INFORMATION 10.1 Grades or Purity: 25% 66% solution in xylene, which are combustible solvents. 10.2 Storage Temperature: Ambient. 10.3 Inert Atmosphere: No requirement. 10.4 Venting: Open (flame arrester).
12. HAZARD CLASSIFICATIONS 12.1 Code of Federal Regulations: Poison, Class B. 12.2 HAS Hazard Rating for Bulk Water Transportation: Not listed. 12.3 NIHA Hazard Classifications: Not listed.	13. PHYSICAL AND CHEMICAL PROPERTIES 13.1 Physical State at 15°C and 1 atm: Liquid. 13.2 Molecular Weight: 258. 13.3 Boiling Point at 1 atm: > 264°F = > 140°C = > 413°K. 13.4 Freezing Point: Not pertinent. 13.5 Critical Temperature: Not pertinent. 13.6 Critical Pressure: Not pertinent. 13.7 Specific Gravity: 1.1 at 20°C (liquid). 13.8 Liquid Surface Tension: Data not available. 13.9 Liquid-Water Interfacial Tension: Data not available. 13.10 Vapor (Gas) Specific Gravity: Not pertinent. 13.11 Ratio of Specific Heats of Vapor (Gas): Not pertinent. 13.12 Latent Heat of Vaporization: Not pertinent. 13.13 Heat of Combustion: Data not available. 13.14 Heat of Decomposition: Not pertinent. 13.15 Heat of Solution: Not pertinent. 13.16 Heat of Polymerization: Not pertinent.
NOTES (Continued on pages 5 and 6.)	

2.4-D ESTERS

Common Synonyms: Butyl 2,4-Dichlorophenoxyacetate Isopropyl 2,4-dichlorophenoxyacetate 2,4-Dichlorophenoxyacetic acid butyl ester 2,4-Dichlorophenoxyacetic acid isopropyl ester	Liquid	Yellowish brown	Fuel oil like odor
Sinks in water			
Stop discharge if possible. Stop pumping out. Stop if it enters a waterway. Call fire dept. if spilled. Avoid contact with fish. Evacuate area if necessary. Report spill to local authorities. Notify fire dept. if spill enters waterways.			
Fire	Combustible Irritating gases may be produced when heated When exposed to flame it emits thick black smoke. Extinguish with dry chemical or foam. Do not use water. Water may be used to cool containers. Do not use high pressure water to extinguish.		
Exposure	CALL FOR MEDICAL AID LIQUID Irritating to skin and eyes Harmful if swallowed Remedial action: Flush with water. If IN EYES, flush with plenty of water. If SWALLOWED, do not induce vomiting. If INHALED, get fresh air. If SEVERELY IRRITATED OR HAVING CONVULSIONS, call for medical aid.		
Water Pollution	Dangerous to aquatic life in high concentrations. May be dangerous if it enters water intakes. Notify local health and welfare officials. Notify pollution control authorities.		
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning - water contaminant. Should be removed. Chemical and physical treatment.		2 LABELS No hazard label required as Code of Federal Regulations.	
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Butoxyethyl 2,4-dichlorophenoxyacetate, Butyl 2,4-dichlorophenoxyacetate, 2,4-Dichlorophenoxyacetic acid butoxyethyl ester, 2,4-Dichlorophenoxyacetic acid butyl ester, 2,4-Dichlorophenoxyacetic acid isopropyl ester, Isopropyl 2,4-dichlorophenoxyacetate. 3.2 Coast Guard Competibility Classification: Not listed (Consult page 4.)		4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Brown amber 4.3 Odor: May have odor of fuel oil	
5 HEALTH HAZARDS			
5.1 Personal Protective Equipment: Face shield or goggles, rubber gloves. 5.2 Symptoms Following Exposure: Contact with eyes may cause mild irritation. 5.3 Treatment for Exposure: INGESTION: If large amounts are swallowed, induce vomiting and get medical help. EYES: flush with plenty of water and see a doctor. SKIN: flush with water wash with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 2 or 3 LD ₅₀ 320 - 617 mg/kg. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.			

6 FIRE HAZARDS 6.1 Flash Point: >175°F (32°C) 6.2 Flammable Limits in Air: Data not available 6.3 Fire Extinguishing Agents: Foam, dry chemical, carbon dioxide 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective 6.5 Special Hazards of Combustion Products: Irritating hydrogen chloride vapor may form in fire 6.6 Behavior in Fire: 6.7 Ignition Temperature: Data not available 6.8 Electrical Hazard: Data not available 6.9 Burning Rate: Data not available	8 WATER POLLUTION 8.1 Aquatic Toxicity: 150 ppm/24 hr/bass, bluegill/50% kill; fresh water 1.0-5.0 ppm/96 hr/cyprinid, 39% shill growth disease/salt water 8.2 Waterfowl Toxicity: LD₅₀ 2025.0 mg/kg 8.3 Biological Oxygen Demand (BOD): Data not available 8.4 Food Chain Concentration Potential: None
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction 7.2 Reactivity with Common Materials: May attack some forms of plastics 7.3 Stability During Transport: Stable 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent 7.5 Polymerization: Not pertinent 7.6 Inhibitor of Polymerization: Not pertinent	9 SELECTED MANUFACTURERS 1. NOTES			

DAA

DIACETONE ALCOHOL

Common Synonyms 4-Hydroxy-4-methyl-2-pentanone Diacetone	Watery liquid Colorless to light yellow Mild, pleasant odor Floats and mixes with water
Fire	FLAMMABLE Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Do not use in confined spaces. Do not use near open flames or other sources of ignition.
Exposure	LIQUID Irritating to skin and eyes. Harmful if swallowed. Do not breathe vapors. Do not get in eyes, on skin, or on clothing. If swallowed, do not induce vomiting.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes.
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 445-4) Disperse and flush.	2. LABEL 
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Diacetone 4-Hydroxy-4-methyl-2-pentanone Evanton 3.2 Coast Guard Compatibility Classification: Alcohol 3.3 Chemical Formula: $\text{CH}_3\text{COCH}_2\text{CH}(\text{CH}_3)\text{COCH}_3$ 3.4 IMCO/United Nations Numerical Designation: 331148	4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless to yellow 4.3 Odor: Mild, pleasant
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Air pack or organic canister, rubber gloves, goggles. 5.2 Symptoms Following Exposure: Vapor is irritating to the mucous membrane of the eye and respiratory tract. Inhalation can cause dizziness, nausea, some anesthesia. Very high concentrations have a narcotic effect. The liquid is not highly irritating to the skin but can cause dermatitis. 5.3 Treatment for Exposure: INHALATION: Remove victim to fresh air. Give artificial respiration if breathing has stopped. CONTACT WITH EYES OR SKIN: Wash affected skin area with water. Flush eyes with water and get medical aid if discomfort persists. 5.4 Toxicity by Inhalation (Threshold Limit Value): 50 ppm 5.5 Short-Term Inhalation Limits: 150 ppm for 30 min. 5.6 Toxicity by Ingestion: Grade 2 (LD ₅₀ 0.5 to 5 g/kg rat) 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause moderate irritation such that personnel will find high concentrations unpleasant. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain, may cause smothering and reddening of the skin. 5.10 Odor Threshold: Data not available.

DAP

Di-n-AMYL PHTHALATE

Common Synonyms Phthalic acid dipentyl ester Diamyl phthalate Phthalic acid diamylester Dipentyl phthalate		Liquid	White	Odorless																				
		Floats on water																						
1. Synonyms: Diamyl phthalate, Dipentyl phthalate, Phthalic acid diamylester, Diamyl ester, Phthalic acid, dipentyl ester.																								
2. Physical State (as shipped): Liquid																								
3. Color: Colorless																								
4. Odor: None																								
5. Health Hazards: 5.1 Personal Protective Equipment: Goggles or face shield, rubber gloves 5.2 Symptoms Following Exposure: Inhalation: Vapors from very hot material may cause headache, drowsiness, and convulsions. Hot vapors may irritate eyes. 5.3 Treatment for Exposure: INHALATION: move to fresh air. EYES: flush with water. SKIN: wipe off, flush with water, wash with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Data not available 5.7 Late Toxicity: Causes birth defects in rats (skeletal and gross abnormal toes) 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available																								
6. Fire Hazards: 6.1 Flash Point: 245°F (C) 6.2 Flammable Limits in Air: Data not available 6.3 Fire Extinguishing Agents: Foam, dry chemical, carbon dioxide 6.4 Fire Extinguishing Agents Not to be Used: Water or foam may cause frothing 6.5 Special Hazards of Combustion Products: 6.6 Behavior in Fire: 6.7 Ignition Temperature: Data not available 6.8 Electrical Hazard: Data not available 6.9 Burning Rate: Data not available																								
7. Chemical Reactivity: 7.1 Reactivity with Water: No reaction 7.2 Reactivity with Common Materials: May attack some forms of plastics 7.3 Stability During Transport: Stable 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent 7.5 Polymerization: Not pertinent 7.6 Inhibitor of Polymerization: Not pertinent																								
8. Water Pollution: 8.1 Aquatic Toxicity: Data not available 8.2 Waterlow Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): Data not available 8.4 Food Chain Concentration Potential: Data not available																								
9. Selected Manufacturers: 1. Eastman Organic Chemicals, Rochester, N.Y. 14650 2. Pfaltz and Bauer, Inc., 375 Fairfield Ave., Stamford, Conn. 06902

NOTES

DZN

DIAZINON

Common Synonyms: O,O-Diethyl O-(2-isopropyl-6-methyl-4-pyrimidinyl) phosphorothioate O,O-Diethyl O-(2-isopropyl-6-methyl-6-pyrimidinyl) thiophosphorothioate Alkates Spectracide Series		Liquid	Light to dark brown
Not flammable if properly kept in low temperature storage. Do not heat. Do not use in closed spaces.		Sinks in water	
Fire		Not flammable POISONOUS GASES ARE PRODUCED WHEN HEATED	
		CAUTION MEDICAL AID LIQUID POISONOUS IF SWALLOWED Irritating to skin and eyes. If swallowed, induce vomiting and drink water. If in eyes, flush with water. If on skin, wash with soap and water. If inhaled, move to fresh air.	
Exposure			
Water Pollution		HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes.	
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 444-1) Issue warning: poison, water contamination, high flammability (if solution) Restrict access Should be removed Chemical and physical treatment		2 LABELS No hazard label required by Code of Federal Regulations	
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: O,O-Diethyl O-(2-isopropyl-6-methyl-4-pyrimidinyl) phosphorothioate; O,O-Diethyl O-(2-isopropyl-6-methyl-6-pyrimidinyl) thiophosphorothioate; Diethyl 2-isopropyl-4-methyl-6-pyrimidinylthiophosphorothioate; Alkates Spectracide Series 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: C ₁₂ H ₁₈ N ₂ O ₂ PS 3.4 IMCO/United Nations Numerical Designation: 6.1 Toxic		4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid or liquid solution 4.2 Color: Amber to dark brown 4.3 Odor: Data not available	
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Goggles or face shield, rubber gloves, protective clothing 5.2 Symptoms Following Exposure: Ingestion or prolonged inhalation of mist causes headache, dizziness, blurred vision, nervousness, weakness, cramps, diarrhea, discomfort in the chest, sweating, mucus tearing, salivation and other excessive respiratory tract secretion, vomiting, cyanosis, pupilledema, uncontrollable muscle twitches, convulsions, coma, loss of reflexes and loss of sphincter control. Liquid irritates eyes and skin. 5.3 Treatment for Exposure: INHALATION: remove to fresh air, keep warm, get medical attention at once. EYES: flush with plenty of water for at least 15 min. and get medical attention. SKIN: wash with soap and water. INGESTION: get medical attention at once, give water slurs of charcoal. Do NOT give milk or alcohol. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Not pertinent 5.6 Toxicity by Ingestion: Grade 1 oral LD ₅₀ = 76 mg/kg (rat) 5.7 Late Toxicity: May be mucous 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available			

6 FIRE HAZARDS 6.1 Flash Point: 82-105°F (C) (solutions only, pure liquid difficult to burn) 6.2 Flammable Limits in Air: Not pertinent 6.3 Fire Extinguishing Agents: (for solutions) Foam, dry chemical, or carbon dioxide 6.4 Fire Extinguishing Agents Not to Be Used: Water may be ineffective 6.5 Special Hazards of Combustion Products: Oxides of sulfur and of phosphorus are generated in fires 6.6 Behavior in Fire: Not pertinent 6.7 Ignition Temperature: Not pertinent 6.8 Electrical Hazard: Data not available 6.9 Burning Rate: (for solutions) 4 mm/min		8 WATER POLLUTION 8.1 Aquatic Toxicity: 0.025 ppm/96 hr, stonefly nymph/T ₁₀₀ /fresh water 30 µg/l/48 hr, bluegill/T ₁₀₀ /fresh water (becomes bound to soil when used according to directions) 8.2 Waterfowl Toxicity: LD ₅₀ = 3.54 mg/kg LC ₅₀ = 5 days, 90 ppm mallard duck LC ₅₀ = 7 days, 68 ppm quail 8.3 Biological Oxygen Demand (BOD): Data not available 8.4 Food Chain Concentration Potential: Data not available	
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction 7.2 Reactivity with Common Materials: No reaction 7.3 Stability During Transport: Stable 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent 7.5 Polymerization: Not pertinent 7.6 Inhibitor of Polymerization: Not pertinent		9. NOTES			

DPO

DIBENZOYL PEROXIDE

Common Synonyms Benzoyl peroxide Benzoyl superoxide Lucidol Oxylite BPO BP	Solid powder or granules White Odorless Sinks in water
A white, crystalline powder that is stable under normal conditions. It is soluble in organic solvents and is used as a polymerization initiator.	
Fire	FLAMMABLE MAY EXPLODE IF SUBJECTED TO HEAT, SHOCK OR FRICTION May cause fire and explode on contact with combustibles
Exposure	ALL FORMS OF ALL SOLID Irritating to skin and eyes Harmful if swallowed
Water Pollution	Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes
1 RESPONSE TO DISCHARGE See Response Methods Handbook, CG 44E-4 Issue warning: high flammability Should be removed Chemical and physical treatment	2. LABEL 
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Benzoyl peroxide BPO Benzoyl superoxide Lucidol BP Oxylite 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: C ₁₄ H ₁₀ O ₄ or C ₁₄ H ₁₂ O ₄ 3.4 IMCO United Nations Numerical Designation: 5.2 1521	4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: White 4.3 Odor: None
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Safety goggles, face shield, rubber gloves 5.2 Symptoms Following Exposure: CONTACT WITH EYES OR SKIN: irritates eyes. Prolonged contact may irritate skin. 5.3 Treatment for Exposure: INGESTION: administer an emetic to induce vomiting and call a physician. CONTACT WITH EYES OR SKIN: do not use oils or ointments; flush eyes with plenty of water and get medical attention; wash skin with plenty of soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): 5 mg/m ³ 5.5 Short-Term Inhalation Limits: Not pertinent 5.6 Toxicity by Ingestion: Grade 2 LD ₅₀ 500 g/kg 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Not pertinent 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain, may cause smarting and reddening of the skin. 5.10 Odor Threshold: Not pertinent	

6 FIRE HAZARDS 6.1 Flash Point: Highly flammable solid; explosion sensitive to shock, heat, and friction. 6.2 Flammable Limits in Air: Not pertinent 6.3 Fire Extinguishing Agents: Difficult to extinguish once ignited. Use water spray to cool surrounding area. 6.4 Fire Extinguishing Agents Not to be Used: Do not use hand extinguishers. 6.5 Special Hazards of Combustion Products: Sulfonating smoke evolved. 6.6 Behavior in Fire: May explode. 6.7 Ignition Temperature: Data not available. 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: Not pertinent.	8 WATER POLLUTION 8.1 Aquatic Toxicity: Data not available. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: None.								
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: Special care must be taken to avoid contamination with combustible materials (wood, paper, etc.). Various inorganic and organic acids, alkalis, alcohols, amines, easily oxidizable materials such as ethers, or materials used as accelerators in polymerization reactions. 7.3 Stability During Transport: Extremely explosion sensitive to shock, impact, blows, heat, and friction. Has been reported to explode for apparently no specific reason. Self-reactive. 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9 SELECTED MANUFACTURERS Pennwalt Corp. Lucidol Division 1740 Military Rd. Buffalo, N.Y. 14240 Reshold Chemicals, Inc. Specialty Chemicals Division Austin, Texas 78712 Waco Chemical Corp. Di-n-BUTYLAMINE

Common Synonyms Di-n-butylamine 1-Butylamine (N-butyl)	Liquid Colorless Weak ammonia fishy odor Floats and mixes with water
Fire	Combustible POISONOUS GASES MAY BE PRODUCED IN FIRE
Exposure	VAPOR Irritating to eyes, nose and throat If inhaled will cause headache, coughing or difficult breathing LIQUID Irritating to skin and eyes If swallowed will cause nausea and vomiting
Water Pollution	Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes
1 RESPONSE TO DISCHARGE (See Response Methods Handbook CG 446-4) Issue warning Inter contaminant Restrict access Disperse and flush	2. LABELS No hazard label required by Code of Federal Regulations
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: 1-Butylamine, N-butyl Di-n-butylamine 3.2 Coast Guard Compatibility Classification: Aliphatic amine 3.3 Chemical Formula: $(C_4H_{11}N)_2$ 3.4 IMCO/United Nations Numerical Designation: Not listed	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Weak ammonia fishy
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Goggles or face shield, rubber gloves 5.2 Symptoms Following Exposure: Inhalation causes irritation of nose, throat and lungs, coughing, nausea, headache. Ingestion causes irritation of mouth and stomach. Contact with eyes causes irritation. Contact with skin causes irritation and dermatitis. 5.3 Treatment for Exposure: INHALATION: move from exposure, if breathing has stopped, start artificial respiration. INGESTION: give large amount of water. EYES: irrigate with water, for 15 min., get medical attention for possible eye damage. SKIN: wash with large amounts of water for 15 min. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 3 oral LD_{50} = 360 mg/kg (rat) 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause moderate irritation such that personnel will find high concentrations unpleasant. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Severe skin irritant. Causes second and third degree burns on short contact as it is very corrosive to the eyes. 5.10 Odor Threshold: Data not available

DBK	Di-n-BUTYL KETONE
-----	-------------------

DBK	Di-n-BUTYL KETONE
-----	-------------------

Common Synonyms S-Norbornene		Liquid Floats on water Freezing point is 21°F	Colorless to light yellow
No physical or chemical hazards were identified for this chemical.			
Fire		Combustible Flammable liquid (F+) Flammable solid (F) Oxidizing (O)	
Exposure		VAPOR Irritating to eyes, nose and throat If inhaled will cause coughing or difficult breathing. LIQUID Irritating to skin and eyes. If swallowed will cause nausea and vomiting. EYES Flush with water for at least 15 min. SWALLOWED Drink plenty of water. SKIN Wash with soap and water.	
Water Pollution		Effect of low concentrations on aquatic life is unknown. Floating to shoreline. May be dangerous if it enters water intakes.	
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 448-4) Mechanical containment Should be removed Chemical and physical treatment		2. LABELS No hazard label required by Code of Federal Regulations	
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: S-Norbornene 3.2 Coast Guard Competibility Classification: Not listed 3.3 Chemical Formula: $\text{CH}_2\text{CH}_2\text{C}(\text{OCH}_2\text{CH}_3)_2$ 3.4 IMCO/United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: White to light yellow 4.3 Odor: Data not available	
5. HEALTH HAZARDS			
5.1 Personal Protective Equipment: Rubber gloves, goggles or face shield 5.2 Symptoms Following Exposure: Inhalation causes irritation of nose and throat. Ingestion causes irritation of mouth and stomach. Contact with eyes or skin causes irritation. 5.3 Treatment for Exposure: INHALATION: remove to fresh air, administer artificial respiration if needed. EYES: flush with water for at least 15 min. SKIN: flush with water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Data not available 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available

NOTES

DBT

DIBUTYLPHENOL

Common Synonyms 2,6-Di-tert-butylphenol		Solid or liquid Floats on water. Freezing point is 97°F	Colorless to light yellow	Odorless
Fire	Combustible			
Exposure	LIQUID OR SOLID Will burn skin and eyes. Harmful if swallowed			
Water Pollution	Effect of low concentrations on aquatic life is unknown. Fouling to shoreline. May be dangerous if it enters water intakes.			
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 444-4) Issue warning - water contaminant. Mechanical containment. Should be removed. Chemical and physical treatment.		2. LABELS No label required by Code of Federal Regulations.		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: 2,6-Di-tert-butylphenol 3.2 Coast Guard Compatibility Classification: Phenols (15) 3.3 Chemical Formula: 2,6-(C ₄ H ₉) ₂ C ₆ H ₃ OH 3.4 IMCO/United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid or liquid 4.2 Color: colorless, light straw 4.3 Odor: None		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Goggles or face shield, rubber gloves. 5.2 Symptoms Following Exposure: Irritates eyes and on prolonged contact skin. Ingestion causes irritation of mouth and stomach. 5.3 Treatment for Exposure: EYES: Flush with water for at least 15 min. SKIN: wipe off as well with soap and water. INGESTION: induce vomiting, get medical attention. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Not pertinent. 5.6 Toxicity by Ingestion: Grade 2 oral LD ₅₀ (2-butoxy-2-butylphenol) is 32 g/kg rat. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.

1. *Phragmites*

DBP

p-DICHLOROBENZENE

Common Synonyms Parachlorobenzene Dichlorobenzene Paradi	Solid crystals White to clear Mothball odor Sinks in water
Avoid contact with solid oil for separation before and after washing materials Not a flammable liquid or solid	
Fire	Combustible POISONOUS GASES ARE PRODUCED IN FIRE Reacts vigorously with concentrated sulfuric acid Extinguish with water dry chemical foam or alcohol Use of alcohol may cause water
Exposure	CAUTION FOR MEDICAL AID SOLID Irritating to skin and eyes Harmful if swallowed Keep away from mouth, do not swallow Flush mouth with plenty of water IF IN EYES, flush with plenty of water IF ALLOWED TO GET INTO CONSUMPTION, seek medical aid
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS Fouling to shoreline May be dangerous if it enters water intakes Not a real hazard to fish, birds, or mammals Not a hazard to the environment
1 RESPONSE TO DISCHARGE See Response Methods Handbook CG 446-3 Issue warning - water contaminant Should be removed Chemical and physical treatment	2 LABELS No hazard label required by Code of Federal Regulations
3 CHEMICAL DESIGNATIONS 3.1 Synonyms Dichlorobenzene Paradi Paradi P-paradi Parachlorobenzene Nintochlor 3.2 Coast Guard Compatibility Classification Halogenated hydrocarbon 3.3 Chemical Formula - p-C ₆ H ₄ Cl ₂ 3.4 IMCO/United Nations Numerical Designation - 90.1592	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: White 4.3 Odor: Aromatic
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Full face mask fitted with organic vapor cartridge for concentrations over 25 ppm; also in protective clothing eye protection 5.2 Symptoms Following Exposure: INHALATION: irritation of upper respiratory tract; over exposure may cause depression and injury to liver and kidney. EYE CONTACT: pain and mild irritation 5.3 Treatment for Exposure: INHALATION: if any ill effects develop remove patient to fresh air and get medical attention. If breathing stops, give artificial respiration. EYES: flush with plenty of water. IF GET INTO EYES OR ON SKIN: if effects develop, SKIN AND INGESTION: no problem likely 5.4 Toxicity by Inhalation (Threshold Limit Value): 25 ppm 5.5 Short-Term Inhalation Limits: 50 ppm for 60 min 5.6 Toxicity by Ingestion: Grade 2 ED ₀₁ to Severe 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: A vapors cause moderate irritation on such as person's face and high concentrations unpleasant. The effect is temporary 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain may cause smothering and reddening of the skin 5.10 Odor Threshold: 15-30 ppm	

6 FIRE HAZARDS 6.1 Flash Point: 165°F (74°C) ISO C.C.C. 6.2 Flammable Limits in Air: Data not available 6.3 Fire Extinguishing Agents: Water foam carbon dioxide or dry chemical 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent 6.5 Special Hazards of Combustion Products: Vapors are irritating. DI-(p-CHLOROBENZOYL) PEROXIDE

Common Synonym		Solid or paste	White	Odorless
Bis(p-chlorobenzoyl) peroxide p-(chlorobenzoyl) peroxide p-p'-Chlorobenzoyl peroxide Di(4-chlorobenzoyl) peroxide		Sinks in water		
No data available for this chemical. The following information is provided for informational purposes only. No data available for this chemical.				
Fire	May explode on contact with combustibles POISONOUS GASES ARE PRODUCED IN FIRE. Substances that may be released in fire include: Hydrogen chloride, carbon monoxide, carbon dioxide, and water. Gases may be released from water.			
Exposure	SOLID Irritating to skin and eyes Harmful if swallowed May be harmful if inhaled May be harmful if absorbed through skin May be harmful if in contact with water May be harmful if in contact with acids May be harmful if in contact with bases May be harmful if in contact with oxidizing agents May be harmful if in contact with reducing agents May be harmful if in contact with flammable liquids May be harmful if in contact with flammable solids May be harmful if in contact with flammable gases May be harmful if in contact with flammable dusts May be harmful if in contact with flammable mists May be harmful if in contact with flammable vapors May be harmful if in contact with flammable fumes May be harmful if in contact with flammable smoke			
Water Pollution	Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes No data available for this chemical.			
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 444-4) Issue warning: oxidizing material water contaminant Should be removed Chemical and physical treatment		2. LABEL 		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Bis (p-chlorobenzoyl) peroxide p-Chlorobenzoyl peroxide, p-p'-Dichlorobenzoyl peroxide, Di (4-chlorobenzoyl) peroxide, Cadox PS 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: (p-ClC ₆ H ₄ COO) ₂ 3.4 IMCO/United Nations Numerical Designation: 1.0149 (> 70%) S 2 (5%) (> 10% water or > 40% water)		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid or paste in silicone fluid and dibutyl phthalate 4.2 Color: White 4.3 Odor: None		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Goggles or face shield, rubber gloves, protective clothing 5.2 Symptoms Following Exposure: Irritates eyes and (on prolonged contact) skin. Ingestion causes irritation of mouth and stomach 5.3 Treatment for Exposure: EYES: wash with water for at least 15 min.; consult a doctor. SKIN: wash with soap and water. INGESTION: induce vomiting and call a doctor 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Not pertinent 5.6 Toxicity by Ingestion: Data not available 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Not pertinent				

6. FIRE HAZARDS 6.1 Flash Point: Not pertinent 6.2 Flammable Limits in Air: Not pertinent 6.3 Fire Extinguishing Agents: Flood with water or use dry chemical foam, carbon dioxide 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent 6.5 Special Hazards of Combustion Products: Toxic chlorinated biphenyls are formed in fires 6.6 Behavior in Fire: Solid may explode. Burns very rapidly when ignited. Smoke is unusually heavy when paste form is involved 6.7 Ignition Temperature: Data not available 6.8 Electrical Hazard: Data not available 6.9 Burning Rate: Not pertinent		8. 5 HEALTH HAZARDS				
5.1 Personal Protective Equipment: Rubber gloves; chemical splash goggles; rubber boots and apron; barrier cream; organic canister mask				
5.2 Symptoms Following Exposure: Inhalation of vapor irritates nose and throat. Contact with eyes causes intense irritation and tears. Contact of liquid with skin causes severe blistering and dermatitis. Ingestion causes severe irritation of mouth and stomach.				
5.3 Treatment for Exposure, INHALATION: remove from exposure; provide low pressure oxygen if required; keep under observation until edema is ruled out. EYES: irrigate immediately for 15 min.; call physician. SKIN: wash immediately and thoroughly with soap and water; treat as a chemical burn. INGESTION: induce vomiting; call physician.				
5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available				
5.5 Short-Term Inhalation Limits: Data not available				
5.6 Toxicity by Ingestion: Grade 3 oral LD ₅₀ (1,4-dichloro-2-butene) = 8.9 mg/kg (rat)				
5.7 Late Toxicity: Data not available				
5.8 Vapor (Gas) Irritant Characteristics: Data not available				
5.9 Liquid or Solid Irritant Characteristics: Data not available				
5.10 Odor Threshold: Data not available				

6. FIRE HAZARDS 61 Flash Point: Data not available 62 Flammable Limits in Air: 1-4 63 Fire Extinguishing Agents: Water foam, dry chemical or carbon dioxide 64 Fire Extinguishing Agents Not to be Used: Not pertinent 65 Special Hazards of Combustion Products: Decomposition vapors contain phosgene and hydrogen chloride gases, both are toxic and irritating 66 Behavior in Fire: Not pertinent 67 Ignition Temperature: Data not available 68 Electrical Hazard: Data not available 69 Burning Rate: 2.6 mm/min	8. WATER POLLUTION 81 Aquatic Toxicity: Data not available 82 Waterlow Toxicity: Data not available 83 Biological Oxygen Demand (BOD): Data not available 84 Food Chain Concentration Potential: None
7. CHEMICAL REACTIVITY 71 Reactivity with Water: Reacts slowly to form hydrochloric acid 72 Reactivity with Common Materials: Corrodes metal when wet 73 Stability During Transport: Stable 74 Neutralizing Agents for Acids and Caustics: Not pertinent 75 Polymerization: Not pertinent 76 Inhibitor of Polymerization: Not pertinent	9. SELECTED MANUFACTURERS 1. Petro-Tex Chemical Corporation 5600 Park Place Boulevard Houston, Texas 77017 2. Pfaltz and Bauer, Inc. 126-04 Northern Boulevard Flushing, N.Y. 11368 3. Eastman Kodak Co. Eastman Organic Chemicals Rochester, N.Y. 14640
	10. SHIPPING INFORMATION 10.1 Grades or Purity: Cis-trans equilibrium mixture 98+% 10.2 Storage Temperature: Ambient 10.3 Inert Atmosphere: No requirement 10.4 Venting: Open flame arresters
11. HAZARD ASSESSMENT CODE (See Hazard Assessment Handbook, CG 448-2) A A Y	13. PHYSICAL AND CHEMICAL PROPERTIES 13.1 Physical State at 15°C and 1 atm: Liquid 13.2 Molecular Weight: 125.0 13.3 Boiling Point at 1 atm: 313°F = 156°C = 429°K 13.4 Freezing Point: cis: -54°F = -48°C = 225°K trans: 37°F = 3°C = 276°K 13.5 Critical Temperature: Not pertinent 13.6 Critical Pressure: Not pertinent 13.7 Specific Gravity: 1.112 at 20°C (liquid) 13.8 Liquid Surface Tension: (est.) 24 dyne/cm = 0.024 N/m at 20°C 13.9 Liquid-Water Interfacial Tension: (est.) 30 dyne/cm = 0.030 N/m at 20°C 13.10 Vapor (Gas) Specific Gravity: 4 13.11 Ratio of Specific Heats of Vapor (Gas): 1.0974 13.12 Latent Heat of Vaporization: (est.) 150 Btu/lb = 73 cal/g = 3.1 X 10³ J/kg 13.13 Heat of Combustion: 17,660 Btu/lb = 9,720 cal/g = 407 X 10³ J/kg 13.14 Heat of Decomposition: Not pertinent 13.15 Heat of Solution: Not pertinent 13.16 Heat of Polymerization: Not pertinent

DEL

1,2-DICHLOROETHYLENE

Common Synonyms Acetylene dichloride 1,2-dichloroethylene Diiform cis-1,2-dichloroethylene trans-1,2-dichloroethylene	Liquid Colorless Sweet pleasant odor Sinks in water. Flammable; irritating vapor is produced.
While this data is intended to provide information for the user, it is not intended to be a substitute for the manufacturer's information. The user should consult the manufacturer's information for the most current and complete information.	
Fire	FLAMMABLE POISONOUS GASES MAY BE PRODUCED IN FIRE. Containers may explode in fire. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Flashpoint: 100°F (38°C). Boiling point: 128°F (53°C). Melting point: -105°F (-76°C).
Exposure	VAPOR If inhaled will cause dizziness, nausea, vomiting, or difficult breathing. M... LIQUID Harmful if swallowed. If swallowed,
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-1) Issue warning: high flammability. Restrict access. Evacuate area. Should be removed. Chemical and physical treatment.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Acetylene dichloride 1,2-dichloroethylene; Diiform cis- or trans-1,2-dichloroethylene 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: $\text{C}_2\text{H}_2\text{Cl}_2$ 3.4 IMCO/United Nations Numerical Designation: 12.1150	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Ethereal, slightly acid, pleasant, chloroform like
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Rubber gloves, safety goggles, or supply mask or self-contained breathing apparatus. 5.2 Symptoms Following Exposure: Inhalation causes nausea, vomiting, weakness, tremor, epigastric cramps, central nervous depression. Contact with liquid causes irritation of eyes and (on prolonged contact) skin. Ingestion causes slight depression to deep narcosis. 5.3 Treatment for Exposure: INHALATION: remove from further exposure; if breathing is difficult, give oxygen; if victim is not breathing, give artificial respiration, preferably mouth to mouth; give oxygen when breathing is resumed; call a physician. EYES: flush with water for at least 15 min. SKIN: wash well with soap and water. INGESTION: give gastric lavage and emetics. 5.4 Toxicity by Inhalation (Threshold Limit Value): 200 ppm 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 2 oral LD_{50} = 770 mg/kg (rat) 5.7 Late Toxicity: produces liver and kidney injury in experimental animals 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available	

6. FIRE HAZARDS 6.1 Flash Point: 17°F (7°C) 6.2 Flammable Limits in Air: 9.7% - 12.8% 6.3 Fire Extinguishing Agents: Dry chemical, foam, carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective. 6.5 Special Hazards of Combustion Products: Phosgene and hydrogen chloride fumes may form in fires. 6.6 Behavior in Fire: Vapor is heavier than air and may travel a considerable distance to a source of ignition and flash back. 6.7 Ignition Temperature: Data not available. 6.8 Electrical Hazard: Data not available. 6.9 Burning Rate: 2.6 mm/min.	8. WATER POLLUTION 8.1 Aquatic Toxicity: Data not available. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: None.								
7. CHEMICAL REACTIVITY Reactivity with Water: No reaction. Reactivity with Common Materials: No reaction. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent. 7.5 Polymerization: Will not occur under ordinary conditions of shipment. The reaction is not vigorous. 7.6 Inhibitor of Polymerization: None used.	9. SELECTED MANUFACTURERS 1. Eastman Kodak Co. Eastman Organic Chemicals Rochester, N.Y. 14650 2. Dynamit Nobel AG 105 Stonehurst Court Northvale, N.J. 07647 3. Pfaltz and Bauer, Inc. 126-04 Northern Boulevard Flushing, N.Y. 11358

DEE

DICHLOROETHYL ETHER

Common Synonyms Bis(2-chloroethyl) ether 2,2-Dichloroethyl ether Dichloroether Di(2-chloroethyl) ether Chlorex		Liquid	Colorless	Sweet pleasant odor
Sinks and mixes slowly with water				
AVOID CONTACT WITH EYES OR KEEP FACE AWAY FROM VAPOR WASH EYES IMMEDIATELY WITH WATER FOR AT LEAST 15 MINUTES. IF NECESSARY, GET MEDICAL ATTENTION.				
Fire	Combustible POISONOUS GASES MAY BE PRODUCED IN FIRE Water reacts with a liquid that is heavier than water and forms a flammable gas.			
 Exposure	CAUTION: POISONOUS LIQUID POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED Irritating to skin and eye WASH IMMEDIATELY WITH WATER FOR AT LEAST 15 MINUTES. IF NECESSARY, GET MEDICAL ATTENTION. WASH EYES IMMEDIATELY WITH WATER FOR AT LEAST 15 MINUTES. IF NECESSARY, GET MEDICAL ATTENTION.			
Water Pollution	Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes NEVER DISCHARGE INTO WATERWAYS			
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: poison, water contaminant Restrict access Should be removed Chemical and physical treatment		2. LABELS No label required by Code of Federal Regulations		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Bis(2-chloroethyl) ether 2,2'-Dichloroethyl ether, Dichlorodiethyl ether, Di(2-chloroethyl) ether, Chlorex, DCEE, beta, beta'-Dichloroethyl ether 3.2 Coast Guard Compatibility Classification: Halogenated hydrocarbon 3.3 Chemical Formula: (C ₂ H ₄ Cl) ₂ O 3.4 IMCO/United Nations Numerical Designation: 3.3 1916		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Sweet like chloroform		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Goggles or face shield, rubber gloves, protective clothing 5.2 Symptoms Following Exposure: Inhalation of vapor causes irritation of nose, coughing, nausea. Liquid irritates eyes and causes mild irritation of skin. (Can be absorbed in toxic amounts through the skin.) Ingestion causes irritation of mouth and stomach; symptoms of systemic poisoning. 5.3 Treatment for Exposure: INHALATION: remove from exposure, support respiration, call physician if needed. EYES: irrigate with copious quantities of water for 15 min., call physician. SKIN: wipe off, wash well with soap and water. INGESTION: induce vomiting, get medical attention. 5.4 Toxicity by Inhalation (Threshold Limit Value): 5 ppm 5.5 Short-Term Inhalation Limits: 15 ppm for 30 min. 5.6 Toxicity by Ingestion: Grade 3, oral LD ₅₀ = 75 mg/kg rat 5.7 Late Toxicity: Said to be carcinogenic. 5.8 Vapor (Gas) Irritant Characteristics: Vapors are moderately irritating such that personnel will not usually tolerate moderate or high vapor concentrations. 5.9 Liquid or Solid Irritant Characteristics: Causes smarting of the skin and first degree burns on short exposure; may cause second degree burns on long exposure. 5.10 Odor Threshold: Data not available				

6 FIRE HAZARDS

- 6.1 Flash Point: 130°F (50°C) 131°F (55°C)
6.2 Flammable Limits in Air: Data not available
6.3 Fire Extinguishing Agents: Water, foam, dry chemical, carbon dioxide
6.4 Fire Extinguishing Agents Not to be Used: Not pertinent
6.5 Special Hazards of Combustion Products: May form phosgene or hydrogen chloride in fires
6.6 Behavior in Fire: Not pertinent
6.7 Ignition Temperature: 696°F
6.8 Electrical Hazard: Data not available
6.9 Burning Rate: 2.4 mm/min

8 WATER POLLUTION

- 8.1 Aquatic Toxicity: Data not available
8.2 Waterfowl Toxicity: Data not available
8.3 Biological Oxygen Demand (BOD): Data not available
8.4 Food Chain Concentration Potential: None

9 SELECTED MANUFACTURERS

1. Nisso Petrochemical Industries Co. Ltd.
Tokyo, Japan
2. Aldrich Chemical Co., Inc.
940 West St. Paul Avenue
Milwaukee, Wis. 53233
3. Eastman Kodak Co.
Eastman Organic Chemicals
Rochester, N.Y. 14650

7. CHEMICAL REACTIVITY

- 7.1 Reactivity with Water: No reaction
7.2 Reactivity with Common Materials: No reaction
7.3 Stability During Transport: Stable
7.4 Neutralizing Agents for Acids and Caustics: Not pertinent
7.5 Polymerization: Not pertinent
7.6 Inhibitor of Polymerization: Not pertinent

10 SHIPPING INFORMATION

- 10.1 Grades or Purity: Commercial
10.2 Storage Temperature: Ambient
10.3 Inert Atmosphere: No requirement
10.4 Venting: Open flame arrester

NOTES

DCM

DICHLOROMETHANE

Common Synonyms Methylene chloride Methylene dichloride		Watery liquid	Colorless	Sweet pleasant odor
		Sinks in water. Irritating vapor is produced		
				
Fire	Not flammable POISONOUS GASES ARE PRODUCED WHEN HEATED			
Exposure	CALL FOR MEDICAL AID VAPOR Irritating to eyes, nose and throat If inhaled, will cause nausea and dizziness LIQUID Irritating to skin and eyes Harmful if swallowed EFFECTS Inhalation: Irritation of the respiratory tract, cough, and shortness of breath. Ingestion: Irritation of the gastrointestinal tract, nausea, and vomiting. Skin Contact: Irritation and dryness. Eye Contact: Irritation and redness.			
Water Pollution	Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes			
1 RESPONSE TO DISCHARGE See Response Methods Handbook, CG 445-41 Disperse and flush		2 LABELS No hazard label required by Code of Federal Regulations		
3 CHEMICAL DESIGNATIONS 3.1 Synonyms Methylene chloride Methylene dichloride 3.2 Coast Guard Compatibility Classification: Halogenated hydrocarbon 3.3 Chemical Formula: CH ₂ Cl ₂ 3.4 IMCO United Nations Numerical Designation: 900 1593		4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Pleasant, aromatic, like chloroform, sweet ethereal		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Organic vapor canister mask, safety glasses, protective clothing 5.2 Symptoms Following Exposure: INHALATION: Irritative effect, nausea and dizziness. CONTACT WITH SKIN AND EYES: Skin irritation, irritation of eyes and nose. 5.3 Treatment for Exposure: INHALATION: Remove from exposure area. Oxygen if needed. INGESTION: Do not induce vomiting. CONTACT WITH SKIN AND EYES: Wash thoroughly with water. 5.4 Toxicity by Inhalation (Threshold Limit Value): 100 ppm 5.5 Short-Term Inhalation Limits: 100 ppm for 10 min 5.6 Toxicity by Ingestion: Grade 2 LD ₅₀ 0.5 to 1 g/kg 5.7 Late Toxicity: None 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause mild to irritate in such but are not severe with high concentrations and unpleasant. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing, not allowed to remain, may cause irritation and reddening of the skin. 5.10 Odor Threshold: 70 to 100 ppm				

6 FIRE HAZARDS 6.1 Flash Point: Not flammable under conditions likely to be encountered. 6.2 Flammable Limits in Air: 12-19% 6.3 Fire Extinguishing Agents: Not pertinent. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Dissociation products generated in a fire may be irritating or toxic. 6.6 Behavior in Fire: Not pertinent. 6.7 Ignition Temperature: 1134°F 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: Not pertinent.		8 WATER POLLUTION 8.1 Aquatic Toxicity: Not pertinent. 8.2 Waterfowl Toxicity: Not pertinent. 8.3 Biological Oxygen Demand (BOD): Not pertinent. 8.4 Food Chain Concentration Potential: None.

DCP

2,4-DICHLOROPHENOL

Common Synonyms		Solid crystals	Colorless	Medicinal odor
		Sinks in water		
Avoid contact with solid and dust. Keep eyes away. Wear goggles, self-contained breathing apparatus, and rubber gloves during handling of dry solids. Call fire department. Isolate and remove the source of material. Notify local health department in case of spillages.				
Fire	Combustible POISONOUS GASES ARE PRODUCED IN FIRE Wear goggles, self-contained breathing apparatus, and rubber gloves during handling of dry solids. Extinguish with dry chemical, foam, or water spray. Cool exposed containers with water.			
	CAUTION: IRRITANT AND POISONOUS SOLID OR DUST Will burn skin and eyes Poisonous if swallowed Remove contaminated clothing and shoes Flush affected area with plenty of water If IN EYES, hold eyelids open and flush with copious water If SWALLOWED, pour 1 pint (16 oz) of 5% NaHCO3 solution into 1 quart water Drink milk			
Exposure				
Water Pollution	Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes Notify health department in case of spillages Notify petroleum refiners in case of spillages			
1 RESPONSE TO DISCHARGE See Response Methods Handbook, CG 446.4 Issue warning: Water contaminant Should be removed Chemical and physical treatment		2. LABELS Not listed, label required by Code of Federal Regulations		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: See common synonyms 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: HOX2HC6H3Cl2 3.4 IMCO United Nations Numerical Designation: n.i. 2020		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: White 4.3 Odor: Strong, medicinal		
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Battery-operated, approved respirator with chemical filters, goggles 5.2 Symptoms Following Exposure: Tremors, convulsions, shortness of breath, irritation of respiratory system 5.3 Treatment for Exposure: Inhalation — rest; Ingestion — drink water, epsom salt solution 5.4 Toxicity by Inhalation (Threshold Limit Value): Not pertinent 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 2 LD50 (strongly irritant) 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Not pertinent 5.9 Liquid or Solid Irritant Characteristics: Fairly severe skin irritant. May cause pain and second-degree burns after a few minutes' contact 5.10 Odor Threshold: Data not available				

6 FIRE HAZARDS 6.1 Flash Point: 200°F (93°C) — FCCC 6.2 Flammable Limits in Air: Data not available 6.3 Fire Extinguishing Agents: Water, foam, carbon dioxide, dry chemical 6.4 Fire Extinguishing Agents Not to be Used: Water or foam may cause frothing 6.5 Special Hazards of Combustion Products: Toxic gases can be evolved 6.6 Behavior in Fire: No data on burning 6.7 Ignition Temperature: Data not available 6.8 Electrical Hazard: Not pertinent 6.9 Burning Rate: Not pertinent	8 WATER POLLUTION 8.1 Aquatic Toxicity: 5 ppm/3 hours/rainbow trout/killed/fresh water 5 ppm/12 hours/bluegills/killed/fresh water 6.2 Waterfowl Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): 100% in 5 days 8.4 Food Chain Concentration Potential: Data not available
7 CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction 7.2 Reactivity with Common Materials: May react vigorously with oxidizing materials 7.3 Stability During Transport: Stable 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent 7.5 Polymerization: Not pertinent 7.6 Inhibitor of Polymerization: Not pertinent	9 SELECTED MANUFACTURERS 1. DPP

DICHLOROPROPANE

Common Synonyms Propylene dichloride 1,2-dichloropropane		Waters liquid Colorless Sweet odor
Sinks in water. Flammable, irritating vapor is produced.		
1. Physical Description: Colorless, liquid, with a sweet odor. It is heavier than water and insoluble in water. It is a volatile liquid with a boiling point of 34.5°C (94°F) and a melting point of -91.5°C (-133°F). It is a flammable liquid with a flash point of 11°C (52°F) and a fire point of 18°C (64°F). It is a highly volatile liquid with a vapor pressure of 100 mm Hg at 20°C (68°F). It is a highly volatile liquid with a vapor pressure of 100 mm Hg at 20°C (68°F).		
Fire	FLAMMABLE POISONOUS GASES ARE PRODUCED IN FIRE. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Vapor is heavier than air. Ext. Combustion: 1,2-dichloropropane is a flammable liquid.	
Exposure	VAPOR Irritating to eyes, nose and throat. LIQUID Irritating to skin and eyes. Harmful if swallowed.	
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes.	
1. RESPONSE TO DISCHARGE See Response Methods Handbook (CG 665-4). Evacuate area. Fire: warning: highly flammable. Evacuate area.		2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: 1,2-Dichloropropane Propylene dichloride 3.2 Coast Guard Compatibility Classification: Halogenated hydrocarbon 3.3 Chemical Formula: CH ₂ ClCHClCH ₃ 3.4 IMCO United Nations Numerical Designation: 12.1279		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Sweet
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Air supply in confined area; rubber gloves when splashing; protective cover for head and rubber footwear. 5.2 Symptoms Following Exposure: Contact with skin causes severe irritation. 5.3 Treatment for Exposure: INHALATION: remove to the fresh air; CONTACT WITH SKIN OR EYES: wash immediately with soap and water; FLUORIDES with water; 15 min. for 1 hour. 5.4 Toxicity by Inhalation (Threshold Limit Value): 10 ppm 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 2 LD ₅₀ 0.5 g/kg (approximate) 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Irritant to eyes, nose, throat, and skin; irritation of the eyes is reported at very low concentrations; the effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard if swallowed; may cause smothering and reddening of the skin. 5.10 Odor Threshold: Data not available.		

6 FIRE HAZARDS 6.1 Flash Point: 111°C (232°F) 6.2 Flammable Limits in Air: 1.4 - 12.5 6.3 Fire Extinguishing Agents: Foam, carbon dioxide, dry chemical. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Toxic and irritative gases may be generated. 6.6 Behavior in Fire: Not pertinent. 6.7 Ignition Temperature: 405°C 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: test 1.32 mm/min	8 WATER POLLUTION 8.1 Aquatic Toxicity: 160 ppm crustacea T1 ₅₀ salt water 8.2 Waterflow Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: None.																																				
7 CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: No reaction. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent. 7.5 Polymerization: No polymerization. 7.6 Inhibitor of Polymerization: Not pertinent.	9. DICHLOROPROPENE

Common Synonyms 1,3-dichloropropene Telomer	Liquid Colorless Sweet odor Sinks in water. Flammable, irritating vapor is produced.
Hazardous to the Environment Aquatic Toxicity: Data not available. Persistence: Data not available.	Environmental Fate Biodegradation: Data not available. Volatilization: Data not available. Hydrolysis: Data not available.
Fire	FLAMMABLE POISONOUS GASES ARE PRODUCED IN FIRE. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area.
Exposure	VAPOR Irritating to eyes, nose and throat. LIQUID Will burn skin and eyes. Harmful if swallowed.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes.
1. RESPONSE: NO DISCHARGE See Response Methods Handbook, C-1, 646-6 Disposal: Incinerate.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: 1,3-Dichloropropene, Telomer 3.2 Coast Guard Compatibility Classification: Substituted allyl 3.3 Chemical Formula: $C_3H_4Cl_2$ 3.4 IMCO United Nations Numerical Designation: 1.1.204	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Sweet, chloroform-like
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: An approved self-contained breathing apparatus with a high efficiency particulate filter (N, R, or P) should be worn when handling this material in a confined breathing apparatus. Safety glasses should be worn. 5.2 Symptoms Following Exposure: No entry route is known. Inhalation causes irritation of the respiratory tract and coughing. 5.3 Treatment for Exposure: INHALATION: Remove person to fresh air. If breathing is difficult, give oxygen. If unconscious, give artificial respiration. If swallowed, give milk or water. If on skin, wash with soap and water. If in eyes, flush with water for 15 minutes. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.1 ppm (TWA) 5.5 Short-Term Inhalation Limits: 0.5 ppm (TWA) 5.6 Toxicity by Ingestion: Grade III Dermal Irritant 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Vapor causes irritation of the respiratory tract and coughing. 5.9 Liquid or Solid Irritant Characteristics: Liquid causes irritation of the skin and may be dangerous if it enters water intakes. 5.10 Odor Threshold: Data not available.	

6. FIRE HAZARDS 6.1 Flash Point: 44-111°C 6.2 Flammable Limits in Air: Data not available. 6.3 Fire Extinguishing Agents: Water, dry chemical, foam (action depends). 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Toxic and irritating gases are generated. 6.6 Behavior in Fire: Not pertinent. 6.7 Ignition Temperature: Data not available. 6.8 Electrical Hazard: Data not available. 6.9 Burning Rate: Less than 1.4 mm/min.	8. WATER POLLUTION 8.1 Aquatic Toxicity: Irriter - a duplicate toxic freshwater. 8.2 Waterlow Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: None.																				
7. DTM

4,4'-DICHLORO- α -TRICHLOROMETHYLBENZHYDROL

Chemical Synonyms Diolol Ketthaneol Ketthane 1,1-Bis(p-chlorophenyl)-2,2-trichloroethanol		Solid powder or liquid (solution) May float or sink in water	Solid is white to gray; liquid is brown	Solid is odorless; liquid has odor of solvent
Fire LIQUID SOLVENT MAY BE FLAMMABLE SOLID IS COMBUSTIBLE Irritating gases may be produced when heated Flashback along vapor trail may occur Vapor may explode if ignited in an enclosed area				
Exposure DUST Irritating to eyes, nose and throat If inhaled will cause headache or dizziness LIQUID OR SOLID Irritating to skin and eyes If swallowed will cause headache, nausea or dizziness				
Water Pollution Dangerous to aquatic life in high concentrations Fouling to shoreline May be dangerous if it enters water intakes				
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446.4) Issue warning if water contains material High fire, vapors, fumes, smoke Mechanical containment (liquid, solid) Should be removed Chemical and physical treatment		2 LABELS No hazard label required by Code of Federal Regulations		
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: 1,1-Bis(p-chlorophenyl)-2,2-trichloroethanol; Di(p-chlorophenyl)-trichloromethylcarbinol; Diol of Ketthane; Ketthaneol 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: $\text{C}_{12}\text{H}_8\text{Cl}_4$ (DHCC) 3.4 IMCO/United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Powder, semi-solid or liquid 4.2 Color: White to gray solid; red to black semi-solid; brown liquid 4.3 Odor: Solids have slight characteristic odor; liquid has odor of the solvent xylene		
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Self-contained breathing apparatus if exposed to vapors; rubber gloves; splash goggles 5.2 Symptoms Following Exposure: Irritation; ingestion causes nausea, headache, weight loss, convulsions, possible kidney and liver damage; contact with eyes causes irritation 5.3 Treatment for Exposure: INHALATION: move to fresh air, apply artificial respiration and oxygen if indicated; EYES: wash for 15 min with water; call a physician; SKIN: wash well with soap and water 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 2 oral LD₅₀ = 475 mg/kg rats; 150 mg/kg rats 5.7 Late Toxicity: Suppresses immune reactions in rats 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available				
6 FIRE HAZARDS 6.1 Flash Point: 75-100°C (solvent) 6.2 Flammable Limits in Air: 1.5-10% (for xylene solutions) 6.3 Fire Extinguishing Agents: foam, dry chemical, carbon dioxide 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective 6.5 Special Hazards of Combustion Products: Irritating hydrogen chloride fumes may form in fire 6.6 Behavior in Fire: Xylene solvent vapors may travel; source of ignition and flashback 6.7 Ignition Temperature: 550°C (for xylene solutions) 6.8 Electrical Hazard: xylene (Class I, Group D) 6.9 Burning Rate: xylene 5 mm/min				
7 CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction 7.2 Reactivity with Common Materials: Contact with steel at elevated temperature causes formation of toxic chlorine and hydrogen chloride gases. Liquid may attack some forms of plastics 7.3 Stability During Transport: Stable 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent 7.5 Polymerization: Not pertinent 7.6 Inhibitor of Polymerization: Not pertinent				
8 WATER POLLUTION 8.1 Aquatic Toxicity: 100 ppm (24 hr LC₅₀ for fish in fresh water) 8.2 Waterfowl Toxicity: 100 ppm 8.3 Biological Oxygen Demand (BOD): Data not available 8.4 Food Chain Concentration Potential: Data not available				
9 SELECTED MANUFACTURERS Rohm and Haas Co. Independence Mall West Philadelphia, PA 19103				
10 SHIPPING INFORMATION 10.1 Grades or Purity: Technical 92-98% (95% plus 5% inert solids, 70% xylene, 3% combustible solvent) 10.2 Storage Temperature: Ambient 10.3 Inert Atmosphere: Not required 10.4 Venting: Open flame arresters for liquid forms				
11. HAZARD ASSESSMENT CODE (See Hazard Assessment Handbook, CG 446.3) Liquid: A T L Solid: H		13 PHYSICAL AND CHEMICAL PROPERTIES 13.1 Physical State at 15°C and 1 atm: Solid or liquid 13.2 Molecular Weight: 470.8 13.3 Boiling Point at 1 atm: (data apply to xylene solution; solid decomposition) 282°C = 539°C = 412 K 13.4 Freezing Point: Not pertinent 13.5 Critical Temperature: Not pertinent 13.6 Critical Pressure: Not pertinent 13.7 Specific Gravity: >1.1 at 20°C (solids) <0.9 at 20°C (liquids) 13.8 Liquid Surface Tension: Not pertinent 13.9 Liquid-Water Interfacial Tension: Not pertinent 13.10 Vapor (Gas) Specific Gravity: Not pertinent 13.11 Ratio of Specific Heats of Vapor (Gas): Not pertinent 13.12 Latent Heat of Vaporization: Not pertinent 13.13 Heat of Combustion: Data not available 13.14 Heat of Decomposition: Not pertinent 13.15 Heat of Solution: Not pertinent 13.16 Heat of Polymerization: Not pertinent

DED

DIELDRIN

Chemical Synonyms: HEOD endosulfan 1,2,3,4,10,10- hexachloro-4,7-epoxy-1- (4,4,5,5-tetrahydro-1,4-oxaphosphorin-2-ylthio)- ethane		Solid	Light brown	Mild chemical odor
		Sinks in water		
Not flammable POISONOUS GASES MAY BE PRODUCED WHEN HEATED				
Fire				
 Exposure		DUST POISONOUS IF INHALED OR IF SKIN IS EXPOSED If inhaled will cause headache, dizziness, or loss of consciousness SOLID POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED If swallowed will cause headache, nausea, dizziness, vomiting, or loss of consciousness		
Water Pollution		HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes		
1 RESPONSE TO DISCHARGE See Response Methods Handbook, CG 446-2 Issue warning - water contaminant Restrict access Should be removed Chemical and physical treatment		2 LABELS No hazard label required by Code of Federal Regulations		
3 CHEMICAL DESIGNATIONS 2.1 Synonyms: HEOD endosulfan 1,2,3,4,10,10-hexachloro-4,7-epoxy-1- (4,4,5,5-tetrahydro-1,4-oxaphosphorin-2-ylthio)- ethane 2.2 Coast Guard Compatibility Classification: Not listed 2.3 Chemical Formula: $C_{12}H_{10}Cl_6O_3P$ 2.4 IMCO/United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: Buff to light brown 4.3 Odor: Mild chemical		
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: U.S. B-10 approved respirator, clean rubber gloves, goggles, face shield 5.2 Symptoms Following Exposure: Inhalation, ingestion, or skin contact causes irritation, coughing, and nausea, vomiting, headache, fainting, tremors. Contact with eyes causes irritation. 5.3 Treatment for Exposure: INHALATION: move to fresh air, give oxygen and artificial respiration as required. INGESTION: induce vomiting and get medical attention. EYES: flush with plenty of water, get medical attention. SKIN: flush with plenty of water. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.25 mg/m ³ 5.5 Short-Term Inhalation Limits: 1 mg/m ³ for 10 min 5.6 Toxicity by Ingestion: Grade 4 oral LD ₅₀ of 40 mg/kg rats, 45 mg/kg dogs 5.7 Late Toxicity: Banned by EPA in October 1974 because of alleged "imminent hazard" to human health as a potential carcinogen to man 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain, may cause smarting and reddening of the skin 5.10 Odor Threshold: 0.04 ppm				

6. FIRE HAZARDS

- 6.1 Flash Point: Not flammable
- 6.2 Flammable Limits in Air: Not flammable
- 6.3 Fire Extinguishing Agents: Not pertinent
- 6.4 Fire Extinguishing Agents Not to be Used:
- 6.5 Special Hazards of Combustion Products: Toxic and irritating hydrocarbon chloride fumes may form in fire
- 6.6 Behavior in Fire:
- 6.7 Ignition Temperature: Not pertinent
- 6.8 Electrical Hazard: Not pertinent
- 6.9 Burning Rate: Not pertinent

8. WATER POLLUTION

- 8.1 Aquatic Toxicity:
 0.001 mg/l water causes 100% fish death
 100 ppm water causes 100% fish death
 1000 ppm water causes 100% fish death
 10000 ppm water causes 100% fish death
 100000 ppm water causes 100% fish death
- 8.2 Waterfowl Toxicity: 1.0 mg/kg
- 8.3 Biological Oxygen Demand (BOD): Data not available
- 8.4 Feed Chain Concentration Potential: High

NOTES

DEA

DIETHANOLAMINE

Common Synonyms 2,2'-Iminoethanol Bis (2-hydroxyethyl) amine		Only liquid or solid crystals	Liquid is colorless Solid is white	Slight dead fish or ammonia odor
Soluble and mixes with water				
1. HAZARD IDENTIFICATION 2. HAZARD CHARACTERISTICS 3. HAZARD STATEMENTS 4. HAZARD PRECAUTIONS 5. HAZARD RESPONSE				
Fire	Combustible Flammable liquid and solid Flash point: 100°F (38°C) Boiling point: 170°F (77°C) Autoignition: 500°F (260°C) Decomposition: 400°F (205°C) Oxidation: Stable			
Exposure	LIQUID Irritating to skin and eyes. Causes severe irritation and burns. POISONING Ingestion: Causes severe irritation and burns. Inhalation: Causes severe irritation and burns. Skin contact: Causes severe irritation and burns. SWALLOWED Causes severe irritation and burns. INHALED Causes severe irritation and burns. SKIN CONTACT Causes severe irritation and burns.			
Water Pollution	Dangerous to aquatic life in high concentrations May be dangerous if it enters water intakes No specific treatment required			
1. RESPONSE TO DISCHARGE See Response Methods Handbook, CG 446-41. Disperse and flush			2. LABELS No hazard label required by Code of Federal Regulations	
3. CHEMICAL DESIGNATIONS 31 Synonyms: Bis(2-hydroxyethyl) amine, DEA, 2,2'-Dihydroxyethylamine, Di(2-hydroxyethyl)amine, 2,2'-Iminoethanol. 32 Coast Guard Compatibility Classification: A1 (extinguishable). 33 Chemical Formula: (HOCH ₂ CH ₂) ₂ NH 34 IMCO, United Nations Numerical Designation: Not listed			4. OBSERVABLE CHARACTERISTICS 41 Physical State (as shipped): Liquid. 42 Color: Colorless. 43 Odor: Mild ammonia or faint fishy characteristic.	
5. HEALTH HAZARDS 51 Personal Protective Equipment: Full face mask or similar vapor mask only if required; eye and body covering clothing; chemical goggles. 52 Symptoms Following Exposure: Irritation of eyes and skin. Breathing vapors may cause coughing and smothering sensation; nausea; headache. 53 Treatment for Exposure: INHALATION: no problem likely. Get medical attention if effects develop. INGESTION: induce vomiting if large amounts are swallowed and call a physician. If no symptoms develop, no known antidote. EYES: flush with plenty of water for at least 15 min and get medical attention promptly. SKIN: flush with plenty of water. Wash contaminated clothing before reuse. 54 Toxicity by Inhalation (Threshold Limit Value): Not pertinent. 55 Short-Term Inhalation Limits: Not pertinent. 56 Toxicity by Ingestion: Grade 2 (LD 0.5 to 0.9 g/kg m). 57 Late Toxicity: Data not available. 58 Vapor (Gas) Irritant Characteristics: Vapors cause moderate irritation such that personnel will avoid high concentrations unless essential. The effect is temporary. 59 Liquid or Solid Irritant Characteristics: Causes smothering of the skin and first degree burns on short exposure and may cause second or third degree burns on long exposure. 510 Odor Threshold: Data not available.				

6. FIRE HAZARDS 61 Flash Point: 100°F (38°C). 62 Flammable Limits in Air: 1.5% (lower), 9.8% (upper). 63 Fire Extinguishing Agents: Water, alcohol, foam, carbon dioxide, dry chemical. 64 Fire Extinguishing Agents Not to be Used: Addition of water may cause frothing. 65 Special Hazards of Combustion Products: Irritating vapors are generated when heated. 66 Behavior in Fire: Not pertinent. 67 Ignition Temperature: 525°F. 68 Electrical Hazard: Not pertinent. 69 Burning Rate: 0.74 mm/min.	8. WATER POLLUTION 81 Aquatic Toxicity: 2100 ppm, 24 hr, sunfish bioassay, 11 ppm, freshwater. 82 Waterflow Toxicity: Data not available. 83 Biological Oxygen Demand (BOD): 100 mg/l, 5 days. 84 Food Chain Concentration Potential: None.																												
7. CHEMICAL REACTIVITY 71 Reactivity with Water: No reaction. 72 Reactivity with Common Materials: No reaction. 73 Stability During Transport: Stable. 74 Neutralizing Agents for Acids and Caustics: Flush with water. 75 Polymerization: Not pertinent. 76 Inhibitor of Polymerization: Not pertinent.	9. SELECTED MANUFACTURERS 1. Jefferson Chemical Co., Inc., 3316 Richmond Ave., Houston, Texas 77002. 2. Olin Corp., Chemicals Division, 120 Farm Ridge Rd., Stamford, Conn. 06084. 3. Union Carbide Corp., Chemicals and Plastics Division, 270 Park Ave., New York, N.Y. 10017.																												
11. HAZARD ASSESSMENT CODE See Hazard Assessment Handbook, CG 446-3. -A P Q	10. SHIPPING INFORMATION 101 Grades or Purity: 98.99%. 102 Storage Temperature: Ambient. 103 Inert Atmosphere: No requirement. 104 Venting: Open.

DIETHYLENEGLYCOL MONOBUTYL ETHER

Common Synonyms 2-Butoxyethoxyethanol Butoxydiethylene glycol Butyl "Carbitol" Dowasol DB Poly-sol DB	Liquid Colorless Mild pleasant odor Mixes with water
Fire	Combustible Flash point: 100°F (38°C) Boiling point: 200°F (93°C) Freezing point: -100°F (-73°C)
Exposure	LIQUID Irritating to skin and eyes. Prolonged contact with skin may cause dryness and irritation. Ingestion may cause mild gastrointestinal upset. Inhalation may cause mild respiratory irritation.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes.
1 RESPONSE TO DISCHARGE (See Response Methods Handbook CG 446-4) Issue warning - water contaminant. Disperse and flush.	2. LABELS No label required by code of Federal Regulations.
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Butoxydiethylene glycol, Butoxydiglycol, Diglycol monobutyl ether, Butyl "Carbitol", Dowanol DB, Poly-Sol DB. 3.2 Coast Guard Compatibility Classification: Glycol ether. 3.3 Chemical Formula: $C_4H_9OCH_2CH_2OCH_2CH_2OH$. 3.4 IMCO/United Nations Numerical Designation: Not listed.	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Colorless. 4.3 Odor: Mild characteristic pleasant.
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Safety goggles or face shield. 5.2 Symptoms Following Exposure: Inhalation for brief periods has no significant effect. Contact with liquid causes moderate irritation of eyes and cornal conjunctiva. Prolonged contact with skin causes only minor irritation. 5.3 Treatment for Exposure: INHALATION: remove to fresh air; if effects are observed, call a doctor. EYES: immediately flush with plenty of water for at least 15 min. SKIN: wash well with soap and water. INGESTION: give large amounts of water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 2 oral LD ₅₀ = 2 g/kg (guinea pig). 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause a slight smarting of the eyes or respiratory system if present in high concentrations. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: No appreciable hazard. Practically harmless to the skin. 5.10 Odor Threshold: Data not available.	

6 FIRE HAZARDS 6.1 Flash Point: 200°F (93°C). 6.2 Flammable Limits in Air: Not pertinent. 6.3 Fire Extinguishing Agents: Water, alcohol, foam, carbon dioxide, dry chemical. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Not pertinent. 6.6 Behavior in Fire: Not pertinent. 6.7 Ignition Temperature: 442°F. 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: 13 mm/min.	8 WATER POLLUTION 8.1 Aquatic Toxicity: Data not available. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): 44% of theoretical in 5 days. 8.4 Food Chain Concentration Potential: None.																																				
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: No reaction. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9. DIETHYLENEGLYCOL MONOBUTYL ETHER ACETATE

Common Synonyms 2-(2-Butoxyethoxy) ethyl acetate 2-(2-Butoxyethoxy) ethyl acetate Diglycol monobutyl ether acetate Butyl "Carbol" acetate		Liquid	Colorless	Mild odor
Floats and mixes slowly with water				
Fire		Combustible		
Exposure		LIQUID Irritating to skin and eyes		
Water Pollution		Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes		
1. RESPONSE TO DISCHARGE See Response Methods Handbook, CG 446.4. Issue warning: water contaminant Disperse and flush		2. LABELS No label required by Code of Federal Regulations		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: 2-(2-Butoxyethoxy) ethyl acetate; Diglycol monobutyl ether acetate; Butyl "Carbol" acetate; Extending DB Acetate 3.2 Coast Guard Competibility Classification: Ester (13) 3.3 Chemical Formula: C ₁₂ H ₂₂ O ₆ 3.4 IMCO/United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Mild, nonresidual		
5. HEALTH HAZARDS				
5.1 Personal Protective Equipment: Face shield or safety glasses, protective gloves, and mask for prolonged exposure to vapor				
5.2 Symptoms Following Exposure: Prolonged breathing of vapor may cause irritation and nausea. Contact with liquid may cause mild irritation of eyes and skin. Can be absorbed through skin in small amounts.				
5.3 Treatment for Exposure: INHALATION: move person to fresh air. Breathing has stopped, administer artificial respiration. EYES: flush with water for at least 15 min. SKIN: wash skin with large amounts of water for 15 min. Call physician if needed. INGESTION: induce vomiting, get medical attention.				
5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available.				
5.5 Short-Term Inhalation Limits: Because of high boiling point, skin, eye hazards from inhalation are minimal.				
5.6 Toxicity by Ingestion: Grade 2 oral LD ₅₀ = 2.74 g/kg guinea pig.				
5.7 Late Toxicity: Kidney damage noted in rats following repeated contact with skin.				
5.8 Vapor (Gas) Irritant Characteristics: Data not available.				
5.9 Liquid or Solid Irritant Characteristics: Data not available.				
5.10 Odor Threshold: Data not available.				

6. DET

DIETHYLENETRIAMINE

Common Synonyms 2,2-Dimethylethanamine Bis (2-aminoethyl) amine	Liquid Colorless to yellow Ammonia odor Floats and mixes with water
Fire	Combustible Flash point: 100°F (38°C) Boiling point: 118°F (48°C) Freezing point: -111°F (-80°C)
Exposure	LIQUID Will burn, skin and eyes Harmful if swallowed Irritant to skin, eyes, and respiratory tract May be dangerous if it enters water intake
Water Pollution	Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intake
1 RESPONSE TO DISCHARGE See Response Methods Manual, Sec. 11.4 Dispense and flush	2. LABEL 
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Bis (2-aminoethyl) amine 2,2-Dimethylethanamine 3.2 Coast Guard Compatibility Classification: None 3.3 Chemical Formula: NH(CH ₂) ₂ NH(CH ₂) ₂ NH 3.4 IMCO United Nations Numerical Designation: Not listed	4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless to light amber-yellow 4.3 Odor: Strong ammoniacal to light ammoniacal
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Amine respirators can detect mask leakage; eye splash may be severe. 5.2 Symptoms Following Exposure: Prolonged breathing of vapor may cause asthma. Liquid harmful to eyes. Skin rash can form. 5.3 Treatment for Exposure: INHALATION: Remove victim to fresh air. INGESTION: Do NOT induce vomiting; give large quantities of water; give activated charcoal if vinegar or an equivalent is available; get medical attention. SKIN CONTACT: Flush with plenty of water. EYE CONTACT: Flush with plenty of water for at least 15 min and get medical attention. 5.4 Toxicity by Inhalation (Threshold Limit Value): 10 ppm 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 2.1 (by 0.5 to 1 g/kg) 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause wheezing, irritation such that personnel will find high concentrations unpleasant. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Causes smarting of the skin and first degree burns on short exposure and may cause secondary burns on long exposure. 5.10 Odor Threshold: 10 ppm	

6 FIRE HAZARDS 6.1 Flash Point: 210°F (99°C) 6.2 Flammable Limits in Air: Lower: 11% (30%) 6.3 Fire Extinguishing Agents: Water, dry chemical, alcohol foam, carbon dioxide, chemical. 6.4 Fire Extinguishing Agents Not to be Used: Water or foam may cause frothing. 6.5 Special Hazards of Combustion Products: Irritating vapors are generated when heated. 6.6 Behavior in Fire: Not pertinent. 6.7 Ignition Temperature: 1100°F (593°C) 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: Data not available	8 WATER POLLUTION 8.1 Aquatic Toxicity: 710 ppm/24 hr./brine shrimp/TLM 8.2 Waterlow Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): Data not available 8.4 Food Chain Concentration Potential: 21% of theoretical in 5 days/freshwater acclimated seed																												
7 CHEMICAL REACTIVITY 7.1 Reactivity with Water: Not reactive 7.2 Reactivity with Common Materials: No hazardous reaction 7.3 Stability During Transport: Stable 7.4 Neutralizing Agents for Acids and Caustics: Flush with water 7.5 Polymerization: Not pertinent 7.6 Inhibitor of Polymerization: Not pertinent	9 SELECTED MANUFACTURERS 1. DEP

DI-(2-ETHYLHEXYL) PHOSPHORIC ACID

Common Synonyms 2-Ethyl-1-hexanol hydrogen phosphate Bis(2-ethylhexyl) hydrogen phosphate Di(2-ethylhexyl) phosphate Di(2-ethylhexyl) acid phosphate		Liquid	Light yellow	Odorless
Floats on water				
Fire	Combustible			
Exposure	LIQUID Irritating to skin and eyes Harmful if swallowed			
Water Pollution	Effect of low concentrations on aquatic life is unknown Floating to shoreline May be dangerous if it enters water intakes			
1. RESPONSE TO DISCHARGE See Response Methods Handbook, CG 544-41 Issue warning: "CONTAMINANT." Restrict access. Mechanical contamination should be removed. Chemical and physical treatment.		2. LABEL 		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Bis(2-ethylhexyl) hydrogen phosphate; Di(2-ethylhexyl) phosphate; Di(2-ethylhexyl) acid phosphate; DEHPA. 3.2 Coast Guard Competibility Classification: Not applicable. 3.3 Chemical Formula: $[(CH_3CH_2CH_2CH_2CH_2CH_2)O]_2P(=O)OH$ 3.4 IMCO/United Nations Numerical Designation: Not listed.		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Amber. 4.3 Odor: None.		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Goggles or face shield; rubber gloves; protect clothing. 5.2 Symptoms Following Exposure: Causes eye irritation. May cause severe eye injury. Consult an eye specialist. Also causes skin irritation and burns. Ingestion produces irritation similar to that caused by strong bases. 5.3 Treatment for Exposure: EYES: Immediately flush with plenty of water for at least 15 min. Seek a physician. SKIN: Immediately flush with plenty of water for at least 15 min. INGESTION: Induce vomiting and call a physician. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 2 LD ₅₀ 1.5 g/kg. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Vapors are minor irritants to the eyes and throat. 5.9 Liquid or Solid Irritant Characteristics: Causes eye irritation. Causes skin and first degree burns on short exposure and may cause eye and degree burns on long exposure. 5.10 Odor Threshold: Data not available.				

6. FIRE HAZARDS

6.1 Flash Point: 55°F (13°C)
 6.2 Flammable Limits in Air: Not pertinent
 6.3 Fire Extinguishing Agents: Dry chemical, alcohol foam, carbon dioxide
 6.4 Fire Extinguishing Agents Not to be Used: Water or foam may cause frothing
 6.5 Special Hazards of Combustion Products: Irritating phosphorus oxides may be released
 6.6 Behavior in Fire: Not pertinent
 6.7 Ignition Temperature: Data not available
 6.8 Electrical Hazard: Not pertinent
 6.9 Burning Rate: Data not available

8. WATER POLLUTION

8.1 Aquatic Toxicity: Data not available
 8.2 Waterfowl Toxicity: Data not available
 8.3 Biological Oxygen Demand (BOD): Data not available
 8.4 Food Chain Concentration Potential: None

NOTES

DPH

DIETHYL PHTHALATE

Common Synonyms: Phthalic acid diethyl ester Ethyl phthalate 1,2-Benzenedicarboxylic acid diethyl ester		Liquid	White	Mild chemical odor
		Sinks in water Freezing point is 27°F		
Fire		Combustible Irritating fumes may be produced when heated		
Exposure		LIQUID Not harmful		
Water Pollution		HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Should be removed Chemically and physically treated		2. LABELS No hazard label required by U.S. Federal Regulations		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: 1,2-Benzenedicarboxylic acid diethyl ester; Ethylphthalate; Phthalic acid diethyl ester 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: C ₁₂ H ₁₄ O ₄ (H) 3.4 IMCO/United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Slight characteristic ester odor		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Rubber gloves; goggles; face shield 5.2 Symptoms Following Exposure: Nausea; vomiting; throat irritation; eye irritation 5.3 Treatment for Exposure: INHALATION: remove from exposure; move to fresh air; if breathing is difficult, give oxygen; if unconscious, give artificial respiration 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 3 oral LD ₅₀ (rat) 1.5 g/kg 5.7 Late Toxicity: Prolonged inhalation or ingestion may produce irritation of upper respiratory tract in humans 5.8 Vapor (Gas) Irritant Characteristics: Unknown 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available

NOTES	

DEZ

DIETHYLZINC

Common Synonyms Zinc diethyl Diethyl zinc Zinc ethyl	Waters liquid Colorless IGNITES WHEN EXPOSED TO AIR Flammable irritating vapor is produced
Fire	IGNITES WHEN EXPOSED TO AIR Flammable liquid and vapor. Ignites spontaneously in air.
Exposure	VAPOR OR DUST Irritating to eyes, nose and throat. If inhaled will cause bronchitis or difficult breathing. LIQUID Will burn skin and eyes. If swallowed will cause nausea and vomiting.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous to surface water intakes.
1 RESPONSE TO DISCHARGE See Response Methods Handbook, CG 666-6 Toxic material - High flammability Reacts with water Flammable	2. LABELS 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Zinc diethyl, Diethyl zinc, Zinc ethyl 3.2 Coast Guard Compatibility Classification: Not Applicable 3.3 Chemical Formula: $(C_2H_5)_2Zn$ 3.4 IMCO/United Nations Numerical Designation: 4.1	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Not pertinent
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Cartridge type or fresh air mask for fumes or smoke. PVC fire retardant or asbestos gloves, full face shield, safety glasses or goggles, fire retardant overalls as standard wear. For special cases use asbestos suit or rain suit. 5.2 Symptoms Following Exposure: Inhalation: Irritation, possible immediate irritation to nose and throat, excessive or prolonged inhalation causes irritation to lungs, irritation to the eyes may cause severe irritation, irritation to the skin may cause severe irritation. Ingestion: Irritation, possible immediate irritation to the mouth and throat, irritation to the stomach and intestines. Skin Contact: Irritation, possible immediate irritation to the skin. Eye Contact: Irritation, possible immediate irritation to the eyes. 5.3 Treatment for Exposure: INHALATION: Move victim to fresh air. If victim does not immediately get medical attention, administer oxygen. If victim is unconscious, administer oxygen. If victim is breathing, administer oxygen. If victim is not breathing, administer artificial respiration. EYES: Flush with large amounts of running water for at least 15 minutes. Flush thoroughly with water. If irritation persists, get medical attention. SKIN: Flush with large amounts of water. If irritation persists, get medical attention. If victim is unconscious, administer artificial respiration. If victim is not breathing, administer artificial respiration. If victim is not breathing, administer artificial respiration.	

6 FIRE HAZARDS

- 6.1 Flash Point: Not pertinent
 6.2 Flammable Limits in Air: Not pertinent
 6.3 Fire Extinguishing Agents: Dry chemical and unpowdered alcohol
 6.4 Fire Extinguishing Agents Not to be Used: Water, foam, halogenated agents
 6.5 Special Hazards of Combustion Products: Yields zinc oxide fumes when burning. Can cause metal fume fever.
 6.6 Behavior in Fire: Reacts spontaneously with air, oxygen and combusts with water, evolves flammable ethane gas. Contact with water or damp surfaces produces flammable ethane gas.
 6.7 Ignition Temperature: Not pertinent
 6.8 Electrical Hazard: Not pertinent
 6.9 Burning Rate: Not pertinent

7 CHEMICAL REACTIVITY

- 7.1 Reactivity with Water: Reacts violently to form flammable ethane gas.
 7.2 Reactivity with Common Materials: Will react with surface moisture, generating flammable ethane gas.
 7.3 Stability During Transport: Not pertinent
 7.4 Neutralizing Agents for Acids and Corrosives: Not pertinent
 7.5 Polymerization: Not pertinent
 7.6 Inhibitor of Polymerization: Not pertinent

8 WATER POLLUTION

- 8.1 Aquatic Toxicity: Not pertinent
 8.2 Waterfowl Toxicity: Not pertinent
 8.3 Biological Oxygen Demand (BOD): None
 8.4 Food Chain Concentration Potential: None

9 SELECTED MANUFACTURERS

NOTES

DFA

DIFLUOROPHOSPHORIC ACID, ANHYDROUS

Common Synonyms Difluorophosphoric acid		Liquid	Colorless	Sharp, irritating odor
		Reacts violently with water. Irritating vapors produced on contact with water.		
AS IDENTIFIED BY THE FOLLOWING TESTS:				
Fire		Not flammable POISONOUS GASES MAY BE PRODUCED WHEN HEATED		
Exposure		VAPOR Irritating to eyes, nose and throat LIQUID Will burn skin and eyes Harmful if swallowed		
Water Pollution		Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: "poisonous liquid water contaminant" Restrict access Evacuate area Disperse and flush with water		2. LABEL 		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Difluorophosphoric acid 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: HOPOF 3.4 IMCO/United Nations Numerical Designation: N 1765		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Sharp, very irritating		
5. HEALTH HAZARDS				
5.1 Personal Protective Equipment: Air line mask or self contained breathing apparatus; full protective clothing				
5.2 Symptoms Following Exposure: Inhalation causes severe irritation of upper respiratory tract. Contact with liquid causes severe irritation of eyes and skin. Ingestion causes severe burns on mouth and stomach.				
5.3 Treatment for Exposure: Get medical attention as soon as possible following exposure to this compound. INHALATION: remove from exposure and support respiration. EYES: wash with copious volumes of water for at least 15 min. SKIN: wash with large amounts of water for 15 min. INGESTION: if victim is conscious have him drink large amounts of water followed by milk or milk of magnesia.				
5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available				
5.5 Short-Term Inhalation Limits: Data not available				
5.6 Toxicity by Ingestion: Data not available				
5.7 Late Toxicity: Data not available				
5.8 Vapor (Gas) Irritant Characteristics: Vapors cause moderate irritation such that personnel will find high concentrations unpleasant. The effect is temporary.				
5.9 Liquid or Solid Irritant Characteristics: Severe skin irritant. Causes second- and third-degree burns on short contact and is very injurious to the eyes.				
5.10 Odor Threshold: Data not available				

6. FIRE HAZARDS		8. WATER POLLUTION	
6.1 Flash Point: Not flammable		8.1 Aquatic Toxicity: Data not available	
6.2 Flammable Limits in Air: Not flammable		8.2 Waterfowl Toxicity: Data not available

NOTES			

DBL

DIISOBUTYLENE

Common Synonyms 2,4-Dimethylpentene	Liquid Colorless Gasoline like odor Floats on water. Flammable. Irritating vapor is produced.
Fire	FLAMMABLE Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. If caught in fire, keep container cool with water. May be ignited by static electricity. Do not expose to direct sunlight.
Exposure	HAZARD FORMER AT 100 VAPOR Irritating to eyes, nose and throat. If inhaled, will cause dizziness, headache, difficult breathing or loss of consciousness. LIQUID Irritating to skin and eyes. If swallowed, will cause nausea or vomiting. Remove contaminated clothing and shoes. Flush contaminated areas with plenty of water. If SWALLOWED, do not induce vomiting. DO NOT INDUCE VOMITING.
Water Pollution	Effect of low concentrations on aquatic life is unknown. Floating to shoreline. May be dangerous if it enters water intakes. Not a water pollutant.

DIK

DIISOBUTYL KETONE

Common Synonyms 2,6-Dimethyl-4-heptanone 5-Diisopropylacetone Isobutyl ketone DIIBK		Liquid	Colorless	Mild, sweet odor
Floats on water				
				
Fire	Combustible			
Exposure	VAPOR Irritating to eyes, nose and throat. If inhaled will cause coughing or difficult breathing. LIQUID Irritating to skin and eyes. If swallowed will cause nausea and vomiting.			
Water Pollution	Effect of low concentrations on aquatic life is unknown. Fouling to shoreline. May be dangerous if it enters water intakes.			
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Mechanical containment. Should be removed. Chemical and physical treatment.		2. LABELS No hazard label required by Code of Federal Regulations.		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: DIIBK, ssm. Diisopropylacetone, 2,6-Dimethyl-4-heptanone, Isobutyl ketone. 3.2 Coast Guard Compatibility Classification: Ketone. 3.3 Chemical Formula: $(CH_3)_2CHCH_2COCH_2CH(CH_3)_2$ (Isobutyl) $C_{10}H_{20}O$ 3.4 IMCO/United Nations Numerical Designation: 33, 115*		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Colorless. 4.3 Odor: Mild, characteristic ketonic.		
5. HEALTH HAZARDS				
5.1 Personal Protective Equipment: Air supplied mask in confined areas; plastic gloves; face shield and safety glasses. 5.2 Symptoms Following Exposure: Inhalation of vapor causes irritation of nose and throat. Ingestion causes irritation of mouth and stomach. Vapor irritates eyes. Contact with liquid irritates skin. 5.3 Treatment for Exposure: INHALATION: move to fresh air; give oxygen if breathing is difficult; call a physician. EYES: flush with plenty of water. SKIN: wipe off; flush with plenty of water; wash with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): 25 ppm. 5.5 Short-Term Inhalation Limits: 40 ppm/30 min. 5.6 Toxicity by Ingestion: Grade 2 oral LD ₅₀ = 1.4 g/kg (mouse); 5.5 g/kg (rat). 5.7 Late Toxicity: Causes increased liver and kidney weights in rats; decreased liver weights in guinea pigs. 5.8 Vapor (Gas) Irritation Characteristics: Vapors cause moderate irritation such that personnel will find high concentrations unpleasant. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain, may cause smarting and reddening of skin. 5.10 Odor Threshold: Data not available.				

- 6. FIRE HAZARDS**
- 6.1 **Flash Point:** 131°F (50°C) 120°F (49°C)
- 6.2 **Flammable Limits in Air:** 0.81% - 11% at 200°
- 6.3 **Fire Extinguishing Agents:** Foam, dry chemical, carbon dioxide.
- 6.4 **Fire Extinguishing Agents Not to be Used:** Water may be ineffective.
- 6.5 **Special Hazards of Combustion Products:**
- 6.6 **Behavior in Fire:**
- 6.7 **Ignition Temperature:** 745°
- 6.8 **Electrical Hazard:** Data not available.
- 6.9 **Burning Rate:** Data not available.

- 7. CHEMICAL REACTIVITY**
- 7.1 **Reactivity with Water:** No reaction.
- 7.2 **Reactivity with Common Materials:** May attack some forms of plastics.
- 7.3 **Stability During Transport:** Stable.
- 7.4 **Neutralizing Agents for Acids and Caustics:** Not pertinent.
- 7.5 **Polymerization:** Not pertinent.
- 7.6 **Inhibitor of Polymerization:** Not pertinent.

NOTES

DIH

DIISOPROPYLBENZENE HYDROPEROXIDE

Common Synonyms Isopropylbenzyl Hydroperoxide		Liquid	Colorless to pale yellow	Sharp, unpleasant odor
		May float or sink in water		
Fire		Combustible Will increase the intensity of a fire May cause fire on contact with combustibles Containers may explode in fire		
Exposure		VAPOR Irritating to eyes, nose and throat If inhaled will cause coughing or difficulty breathing LIQUID Irritating to skin and eyes Harmful if swallowed		
Water Pollution		Effect of low concentrations on aquatic life is unknown Fouling to shoreline May be dangerous if enters water intakes		
1. RESPONSE TO DISCHARGE See Response Methods Handbook, CG 446-41 Issue warning - oxidizing material Restrict access Mechanical containment Should be removed Chemical and physical treatment		2. LABEL 		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Isopropylbenzyl hydroperoxide 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: $(C_6H_5)CH(CH_3)C_6H_5OOH$ $(C_6H_5)CH(CH_3)C_6H_5O_2H$ 3.4 IMCO/United Nations Numerical Designation: + 2 1X75		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: colorless to pale yellow 4.3 Odor: Sharp, disagreeable		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Solvent resistant gloves, chemical resistant apron, chemical goggles or face shield, self-contained breathing apparatus 5.2 Symptoms Following Exposure: Inhalation causes irritation of nose and throat. Contact with eyes or skin causes throbbing sensation and irritation. 5.3 Treatment for Exposure: INHALATION: move to fresh air, call a doctor. EYES: flush with water for 15 min., holding eyelids open. call physician. SKIN: wash several times with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Data not available 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available				

6. FIRE HAZARDS

- 6.1 Flash Point: 175°F ()
6.2 Flammable Limits in Air: Data not available
6.3 Fire Extinguishing Agents: Foam, dry chemical, carbon dioxide
6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective
6.5 Special Hazards of Combustion Products: Flammable alcohol and ketone gases are formed in fire
6.6 Behavior in Fire: Burns with a flare effect. Containers may explode
6.7 Ignition Temperature: Data not available
6.8 Electrical Hazard: Data not available
6.9 Burning Rate: Data not available

7. CHEMICAL REACTIVITY

- 7.1 Reactivity with Water: No reaction
7.2 Reactivity with Common Materials: Aluminum, copper, brass, lead, zinc salts, mineral acids, oxidizing or reducing agents all can cause rapid decomposition
7.3 Stability During Transport: Unstable, slowly evolves oxygen
7.4 Neutralizing Agents for Acids and Caustics: Not pertinent
7.5 Polymerization: Not pertinent
7.6 Inhibitor of Polymerization: Not pertinent

11. HAZARD ASSESSMENT CODE

(See Hazard Assessment Handbook, CG 446-31)
1-1-1

12. HAZARD CLASSIFICATIONS

- 12.1 Code of Federal Regulations: Organic Peroxide
12.2 HAS Hazard Rating for Bulk Water Transportation: Not listed
12.3 NFPA Hazard Classification: Not listed

8. WATER POLLUTION

- 8.1 Aquatic Toxicity: Data not available
8.2 Waterfowl Toxicity: Data not available
8.3 Biological Oxygen Demand (BOD): Data not available
8.4 Food Chain Concentration Potential: None

9. SELECTED MANUFACTURERS

Hercules, Inc.
Wilmington, Del 19309

10. SHIPPING INFORMATION

- 10.1 Grades or Purities: 54.16% (the balance being diisopropylbenzene, a combustible hydrocarbon)
10.2 Storage Temperature: Ambient
10.3 Inert Atmosphere: No requirement
10.4 Venting: Open flame arrester

13. PHYSICAL AND CHEMICAL PROPERTIES

- 13.1 Physical State at 15°C and 1 atm: Liquid
13.2 Molecular Weight: 144.26
13.3 Boiling Point at 1 atm: Not pertinent (decomposes)
13.4 Freezing Point: $<15^{\circ}C$ or $<59^{\circ}F$ or $<264^{\circ}K$
13.5 Critical Temperature: Not pertinent
13.6 Critical Pressure: Not pertinent
13.7 Specific Gravity: 0.956 at 15°C (liquids)
13.8 Liquid Surface Tension: Data not available
13.9 Liquid-Water Interfacial Tension: Data not available
13.10 Vapor (Gas) Specific Gravity: Not pertinent
13.11 Ratio of Specific Heats of Vapor (Gas): Not pertinent
13.12 Latent Heat of Vaporization: Not pertinent
13.13 Heat of Combustion: Data not available
13.14 Heat of Decomposition: Data not available
13.15 Heat of Solution: Not pertinent
13.16 Heat of Polymerization: Not pertinent

NOTES

DAC

DIMETHYLACETAMIDE

Common Synonyms N,N-Dimethylacetamide Acetic acid dimethylamide		Liquid Mixes with water	Colorless	Weak fishy odor
Fire	Combustible			
Exposure	LIQUID Irritating to skin and eyes Harmful if swallowed			
Water Pollution	Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water bodies			
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: water contaminant Disperse and flush			2. LABELS No label required by code of Federal Regulations	
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: N,N-Dimethylacetamide Acetic acid dimethylamide 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: $(CH_3)_2NCOCH_3$ 3.4 ICAO/United Nations Numerical Designation: Not listed			4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Weak fishy	
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Goggles or face shield; rubber gloves 5.2 Symptoms Following Exposure: Liquid causes mild irritation of eyes and skin. Ingestion causes depression, lethargy, confusion and disorientation, visual and auditory hallucinations, perceptual distortions, delusions, emotional detachment, and affective flattening 5.3 Treatment for Exposure: EYES: Flush with plenty of water for 15 min.; get medical attention. SKIN: Flush with plenty of water for 15 min.; INGESTION: induce vomiting and follow with plenty of fluids and saline cathartics; treatment for liver and kidney injury is supportive and symptomatic 5.4 Toxicity by Inhalation (Threshold Limit Value): 10 ppm 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade I oral LD_{50} = 5.6 g/kg (rat) 5.7 Late Toxicity: May produce chronic liver and kidney damage 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: 46.5 ppm				

6 FIRE HAZARDS 6.1 Flash Point: 188°F (87°C) 6.2 Flammable Limits in Air: 3.5% - 11.5% 6.3 Fire Extinguishing Agents: Water, dry chemical, alcohol foam, carbon dioxide 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent 6.5 Special Hazards of Combustion Products: Not pertinent 6.6 Behavior in Fire: Not pertinent 6.7 Ignition Temperature: 964°F 6.8 Electrical Hazard: Not pertinent 6.9 Burning Rate: 2.5 mm/min	8 WATER POLLUTION 8.1 Aquatic Toxicity: Data not available 8.2 Waterfowl Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): Data not available 8.4 Food Chain Concentration Potential: None
7. DIM

DIMETHYL ETHER

Common Synonyms	
Methyl ether	
Liquefied gas	Colorless Pleasant odor
	Floats and boils on water. Flammable irritating vapor is produced.
Fire	FLAMMABLE: Containers may explode in fire. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area.
Exposure	VAPOR: Irritating to eyes, nose and throat. If inhaled will cause headache, dizziness, or loss of consciousness. LIQUID: Irritating to skin and eyes. Will cause frostbite.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes.
1. RESPONSE TO DISCHARGE See Response Summary Handbook, CG 445.4 Toxic warning signs: flammable, irritant, reactive. Evacuate area.	
2. LABEL 	
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Methyl ether Wood ether 3.2 Coast Guard Compatibility Classification: Flammable (F) 3.3 Chemical Formula: $(CH_3O)_2$ 3.4 IMCO/United Nations Numerical Designation: 2103	
4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid under pressure. 4.2 Color: Colorless. 4.3 Odor: Ethereal, somewhat sweet.	
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Mask for organic vapor, goggles, or rubber gloves, safety shoes. 5.2 Symptoms Following Exposure: Irritation produces some anesthesia that less than that of ethyl ether. Nausea, dizziness, headache, irritation of eyes, loss of consciousness. Liquid or concentrated vapor irritates eyes. Contact of liquid with skin may cause frostbite. 5.3 Treatment for Exposure: INHALATION: Remove from exposure and support respiration. All symptoms will subside with proper first aid. SKIN: Remove by use of soap and water or by wrapping the affected part in plastic. 5.4 Toxicity by Inhalation (Three, old Limit Value): Data not available. 5.5 Short-Term Inhalation LD₅₀: Data not available. 5.6 Toxicity by Ingestion: Not pertinent. 5.7 Lethal Dose: LD₅₀ 300 g/kg, rat. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.	

6 FIRE HAZARDS

- 6.1 Flash Point: Not pertinent (flammable gas).
- 6.2 Flammable Limits in Air: 3.5 - 14%.
- 6.3 Fire Extinguishing Agents: Let fire burn. Shut off gas flow, avoid exposed surroundings with water.
- 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent.
- 6.5 Special Hazards of Combustion Products: Not pertinent.
- 6.6 Behavior in Fire: Containers may explode. Vapors are heavier than air and may travel long distance to a source of ignition and flash back.
- 6.7 Ignition Temperature: 602 °C.
- 6.8 Electrical Hazard: Data not available.
- 6.9 Burning Rate: 6.6 mm/min.

7. CHEMICAL REACTIVITY

- 7.1 Reactivity with Water: No reaction.
- 7.2 Reactivity with Common Materials: No reaction.
- 7.3 Stability During Transport: Stable.
- 7.4 Neutralizing Agents for Acids and Bases: Not pertinent.
- 7.5 Polymerization: Not pertinent.
- 7.6 Inhibitor of Polymerization: Not pertinent.

8 WATER POLLUTION

- 8.1 Aquatic Toxicity: Data not available.
- 8.2 Waterway Toxicity: Data not available.
- 8.3 Biological Oxygen Demand (BOD): Data not available.
- 8.4 Food Chain Concentration Potential: None.
