12504 Northern Boulevard
Flushing, N.Y. 11356

10. SHIPPING INFORMATION

- 10.1 Grades or Purity: 99+%
- 10.2 Storage Temperature: Ambient.
- 10.3 Inert Atmosphere: No requirement.
- 10.4 Loading: Safety rated.

11. HAZARD ASSESSMENT CODE

See Hazard Assessment Form 3000, CG 445.2
A-B-C-K-L-M-N

12. HAZARD CLASSIFICATIONS

- 12.1 Code of Federal Regulations: Flammable compressed gas.
- 12.2 HAS Hazard Rating for Bulk Water Transportation: Not rated.
- 12.3 NFPA Hazard Classifications:
- | Category | Classification |
|----------------------|----------------|
| Health Hazard (Blue) | 2 |
| Flammability (Red) | 2 |
| Reactivity (Yellow) | 0 |

13 PHYSICAL AND CHEMICAL PROPERTIES

- 13.1 Physical State at 15°C and 1 atm: Gas.
- 13.2 Molecular Weight: 36.
- 13.3 Boiling Point at 1 atm: $-23.7^{\circ}\text{C} = -10.7^{\circ}\text{F} = 245.5^{\circ}\text{K}$.
- 13.4 Freezing Point: $-122.9^{\circ}\text{C} = -189.2^{\circ}\text{F} = 150.3^{\circ}\text{K}$.
- 13.5 Critical Temperature: $26.4^{\circ}\text{C} = 79.5^{\circ}\text{F} = 299.5^{\circ}\text{K}$.
- 13.6 Critical Pressure: 780 psi = 53.4 atm = 4.4 MN/m².
- 13.7 Specific Gravity: 0.724 at -122.9°C (liquid).
- 13.8 Liquid Surface Tension: 21 dynes/cm = 0.021 N/m at -122.9°C .
- 13.9 Liquid-Water Interfacial Tension: 15 dynes/cm = 0.015 N/m at -122.9°C .
- 13.10 Vapor (Gas) Specific Gravity: 1.54.
- 13.11 Ratio of Specific Heats of Vapor (Gas): 1.1456.
- 13.12 Latent Heat of Vaporization: 380 Btu/lb = 112 cal/g = 465 J/g.
- 13.13 Heat of Combustion: 1,450 Btu/lb = 430 J/g = 1,450 cal/g.
- 13.14 Heat of Decomposition: Not pertinent.
- 13.15 Heat of Solution: Not pertinent.
- 13.16 Heat of Polymerization: Not pertinent.

NOTES

DMF

DIMETHYLFORMAMIDE

Common Synonyms N,N-Dimethylformamide DMF	Watery liquid Colorless Slight ammonia odor Floats and mixes with water
Fire	Combustible
Exposure	LIQUID Will burn on skin and eyes Irritation to eyes, nose, throat, and skin Burns on skin
Water Pollution	Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes
1. RESPONSE TO DISCHARGE (See Response Methods Handbook CG 446.4) Restrict access Disperse and flush	2. LABELS No hazard label required by Code of Federal Regulations
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: N,N-Dimethylformamide DMF 3.2 Coast Guard Compatibility Classification Amide 3.3 Chemical Formula HCON(CH ₃) ₂ 3.4 EXOC United Nations Numerical Designations: Not listed	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped) Liquid 4.2 Color Colorless 4.3 Odor Slightly ammoniacal, essentially odorless
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Safety glasses on face shield, rubber apron and boots 5.2 Symptoms Following Exposure: Irritation of eyes, skin and nose. May cause nausea 5.3 Treatment for Exposure: INHALATION: Remove victim to fresh air if he is not breathing; give artificial respiration for difficult breathing; give oxygen if available. SKIN OR EYES: Flush with plenty of water while removing contaminated clothing and shoes. 5.4 Toxicity by Inhalation (Threshold Limit Value): 10 ppm 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Gravidity (LD ₅₀ = 10.5 g/kg rat) 5.7 Late Toxicity: Causes abortions in pregnant rats, possibly in humans also 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause moderate irritation; such that personnel will find high concentrations unpleasant. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Causes smarting of the skin and first degree burns on short exposure and may cause secondary burns on long exposure. 5.10 Odor Threshold: 100 ppm	

6. FIRE HAZARDS 6.1 Flash Point: 151°F (61°C) 6.2 Flammable Limits in Air: 2.2 - 15.2% 6.3 Fire Extinguishing Agents: Water, foam, carbon dioxide, or dry chemical 6.4 Fire Extinguishing Agents Not to Be Used: Not pertinent 6.5 Special Hazards of Combustion Products: Vapors are irritating 6.6 Behavior in Fire: Not pertinent 6.7 Ignition Temperature: 833°F 6.8 Electrical Hazard: Not pertinent 6.9 Burning Rate: 2.2 mm/min	8. DDW

DIMETHYLHEXANE DIHYDROPEROXIDE, WET

Common Synonyms 2,5-Dimethylhexane-2,5-dihydroperoxide 2,5-Dihydroperoxy-2,5-dimethylhexane		Wet solid	White
May float or sink in water			
Stop this hazard possible. Keep people away from fire. Department of Agriculture, Washington, D.C. 20250. For more information, contact the National Fire Protection Association.			
Fire	Not flammable when wet Will increase the intensity of a fire May explode if exposed to heat or flames If a discharge occurs with water, prevent fire Extinguish with dry chemical or foam. Do not use water Water may be ineffective. Do not use water on exposed containers with water		
Exposure	CALL FOR MEDICAL AID VAPOR Irritating to eyes, nose and throat If inhaled will cause coughing or difficult breathing If necessary, remove person to fresh air with plenty of water If breathing is stopped, give artificial respiration If breathing is difficult, give oxygen SOLID Irritating to skin and eyes Harmful if swallowed If more contaminated clothing on, flush affected areas with plenty of water If IN EYES, hold eyes open and flush with plenty of water If SWALLOWED and victim is CONSCIOUS, have victim drink water or milk If SWALLOWED and victim is UNCONSCIOUS, have victim induce vomiting If SWALLOWED and victim is UNCONSCIOUS OR HAS NO CONSCIOUSNESS, do nothing except keep victim warm		
Water Pollution	Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes Notify appropriate wildlife officials Notify appropriate water intakes		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Isolate warning - oxidizing material Restrict access Mechanical containment Should be removed Chemical and physical treatment		2. LABEL 	
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: 2,5-Dihydroperoxy-2,5-dimethylhexane, 2,5-Dimethylhexane-2,5-dihydroperoxide 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: C ₈ H ₁₈ (OOH) ₂ · H ₂ O 3.4 IMCO/United Nations Numerical Designation: 5.1-152X		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Wet solid 4.2 Color: White 4.3 Odor: Data not available	
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Goggles or face shield, rubber gloves 5.2 Symptoms Following Exposure: Contact with eyes or skin causes irritation 5.3 Treatment for Exposure: INHALATION: remove from exposure, call a doctor. EYES: wash with large amount of water for at least 15 min. SKIN: wash with large amount of water 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Data not available 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available			

6. FIRE HAZARDS 6.1 Flash Point: Not pertinent 6.2 Flammable Limits in Air: Not pertinent 6.3 Fire Extinguishing Agents: Dry chemical, foam, carbon dioxide 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective on fire 6.5 Special Hazards of Combustion Products: 6.6 Behavior in Fire: Decomposes violently when heated in fire. Can increase intensity of fire when in contact with combustible material. Containers may explode 6.7 Ignition Temperature: Not pertinent 6.8 Electrical Hazard: Not pertinent 6.9 Burning Rate: Not pertinent	8. WATER POLLUTION 8.1 Aquatic Toxicity: Data not available 8.2 Waterflow Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): Data not available 8.4 Food Chain Concentration Potential: None
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction 7.2 Reactivity with Common Materials: Decomposes in contact with many metals and acids 7.3 Stability During Transport: Stable below 100°F 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent 7.5 Polymerization: Not pertinent 7.6 Inhibitor of Polymerization: Not pertinent	9. SELECTED MANUFACTURERS 1. Pennwalt Corporation Liquid Division P. O. Box 104N Buffalo, N. Y. 14240 2. Waco Chemical Corporation U. S. Peroxygen Division 450 Morton Avenue Richmond, Calif. 94804 3. Polysciences, Inc. Paul Valley Industrial Park Warrington, Pa. 18976
	10. SHIPPING INFORMATION 10.1 Grades or Purity: Approx. 90-95% water. The dry chemical is too hazardous to ship. 10.2 Storage Temperature: 4-38°C (40-100°F) 10.3 Inert Atmosphere: No requirement 10.4 Venting: Open
11. HAZARD ASSESSMENT CODE (See Hazard Assessment Handbook, CG 446-3) II	13. DMS

DIMETHYL SULFOXIDE

Common Synonyms: Methyl Sulfoxide DMSO	Physical State: Liquid Color: Colorless Odor: Mild garlicky odor Other: Sinks and mixes with water
No spill discharge if possible. Call fire department. Avoid contact with eyes. If exposed, remove clothing and flush with water. No known health or environmental hazards.	
Fire	Combustible POISONOUS GASES MAY BE PRODUCED IN FIRE Wear goggles, safety suit, self-protecting apparatus, and rubber gloves when handling in fire. Extinguish with water. Do not use alcohol, carbon tetrachloride, or other flammable liquids.
Exposure	CALL FOR MEDICAL AID LIQUID Irritating to skin and eyes. Does not affect areas with protective equipment. IF IN EYES, hold eyelids open and flush with plenty of water.
Water Pollution	Dangerous to aquatic life in high concentrations. May be dangerous if it enters water intakes. No known health or environmental hazards. No known reproductive hazards.
1. RESPONSE TO DISCHARGE See Response Methods Handbook, CG 445-1. Disperse and flush.	2. LABELS No hazard labels required by Code of Federal Regulations.
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: DMSO Methyl sulfoxide 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: CH ₃ SOCH ₃ 3.4 IMCO United Nations Numerical Designation: Not listed	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Slight garlicky odor
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Based on Federal Agency Recommendations, Respiratory Protection, and other appropriate protective equipment. 5.2 Symptoms Following Exposure: Slight eye irritation. 5.3 Treatment for Exposure: Wash eyes and skin with water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Slight above the lip. 5.7 Late Toxicity: Causes damage to eye in dogs, pigs, rats, and rabbits. 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause moderate irritation such that personnel will find high concentrations unpleasant. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. Irritation to clothing and all wet items may be caused by staining and softening of the cloth. 5.10 Odor Threshold: Data not available.	

6. FIRE HAZARDS 6.1 Flash Point: 204 F (90 C) 6.2 Flammable Limits in Air: 3-11% 6.3 Fire Extinguishing Agents: Water, foam, dry chemical, or carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Sulfur dioxide, formaldehyde, and methyl sulfide can form. 6.6 Behavior in Fire: Not pertinent. 6.7 Ignition Temperature: 172 F 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: 2.0 mm/min	8. WATER POLLUTION 8.1 Aquatic Toxicity: 34,500 ppm, 48 hr. Toxicity: Harmful to fish. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: No.
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: No reaction. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9. SELECTED MANUFACTURERS Chem-Zell, Inc., Corp. Chemical Products Division Bushy San Francisco, CA 94134
11. HAZARD ASSESSMENT CODE See Hazard Assessment Handbook, CG 445-1. A P Q	10. SHIPPING INFORMATION 10.1 Grades or Purity: 99% 10.2 Storage Temperature: Ambient 10.3 Inert Atmosphere: Not required. 10.4 Venting: Open (flame arresters or pressure vacuum).
12. HAZARD CLASSIFICATIONS 12.1 Code of Federal Regulations: Combustible Liquid. 12.2 NAS Hazard Rating for Bulk Water Transportation: Not listed. 12.3 NFPA Hazard Classifications: Not listed.	13. NOTES	

REVISED 1978

DMT

DIMETHYL TEREPHTHALATE

Common Synonyms Terephthalic acid dimethyl ester		Solid or heated liquid Liquid solidifies. Solid and liquid sink in water.	White solid or colorless liquid	Odorless
Fire		Combustible		
Exposure		DUST Not harmful LIQUID OR SOLID Heated liquid will burn skin and eyes. Harmful if swallowed.		
Water Pollution		Effect of low concentrations on aquatic life is unknown. Fouling to shoreline. May be dangerous if it enters water intakes.		
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Mechanical containment of floatings Should be removed Chemical and physical treatment		2. LABELS No label requirements under Federal Regulations.		
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Terephthalic acid dimethyl ester 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: 14 C10H10O4 3.4 IMCO/United Nations Numerical Designation: Not listed		4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid or liquid 4.2 Color: Colorless 4.3 Odor: None perceptible		
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Minus DMT goggles, face shield, gloves and protective clothing, suit, dust mask, goggles. 5.2 Symptoms Following Exposure: Minus DMT all cause severe chemical burns to the skin. 5.3 Treatment for Exposure: EYES: Flush dust from eyes with water. SKIN: Wash with soap and water. If burned by molten DMT, flush area immediately with cold water for at least 15 min. apply wet pack for at least 30 min. do not rub through DMT off burn. If on clothing, remove clothing. If DMT has penetrated, because this will remove underlying skin, seek prompt medical treatment for significant burns. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Not pertinent. 5.6 Toxicity by Ingestion: Grade 1 oral LD50 = 4,340 mg/kg rat. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Not pertinent. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Not pertinent.				

6 FIRE HAZARDS 6.1 Flash Point: 298.1°C (568°F) molten. 6.2 Flammable Limits in Air: Not pertinent. 6.3 Fire Extinguishing Agents: Water, dry chemical, foam, carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Not pertinent. 6.6 Behavior in Fire: Not pertinent. 6.7 Ignition Temperature: 405°C (761°F) Endov. 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: Not pertinent.	8 WATER POLLUTION 8.1 Aquatic Toxicity: Data not available. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: None.
7 CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: No reaction. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9. HAZARD CLASSIFICATIONS 12.1 Code of Federal Regulations: Flammable liquid 12.2 NAS Hazard Rating for Bulk Water Transportation: Not listed 12.3 NFPA Hazard Classifications: Not listed	
4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Not pertinent		13 PHYSICAL AND CHEMICAL PROPERTIES 13.1 Physical State at 15°C and 1 atm: Liquid 13.2 Molecular Weight: 154.4 13.3 Boiling Point at 1 atm: 13.3.1 = 25.5 ± 0.1 K 13.4 Freezing Point: -14.4 ± 0.2 K 13.5 Critical Temperature: Not pertinent 13.6 Critical Pressure: Not pertinent 13.7 Specific Gravity: 0.94 at 15.5°C (liquid) 13.8 Liquid Surface Tension: (estimated) 13.8.1 = 0.018 N/m at 20°C 13.9 Liquid-Water Interfacial Tension: Not pertinent 13.10 Vapor (Gas) Specific Gravity: Not pertinent 13.11 Ratio of Specific Heats of Vapor (Gas): Not pertinent 13.12 Latent Heat of Vaporization: 13.12.1 = 14.9 kJ/kg 13.12.2 = 3.53 × 10 ³ J/kg 13.13 Heat of Combustion: Data not available 13.14 Heat of Decomposition: Not pertinent 13.15 Heat of solution: Not pertinent 13.16 Heat of Polymerization: Not pertinent	
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Cartridge type fresh air respirator, or use of PAF fire retardant or other impervious full face chest safety respirator with gas canister and sufficient air supply. Protective gloves, eye protection, and footwear. 5.2 Symptoms Following Exposure: Inhalation of mist or vapors causes immediate irritation of upper respiratory tract. Excessive or prolonged inhalation of fumes from fumes from decomposition may cause metal fume fever, with fever, headache, fever, chills, nausea, vomiting, muscular aches, perspiration, conjunctivitis, and general weakness. Some of these symptoms may last 12-24 hrs. Eyes are irritated and severely irritated by liquid, vapors, and fumes. If it is removed to the high flushing with water, chemical may permanently damage eye. Skin with underlying edema and redness when chemical reacts with moisture may cause severe irritation. If it is washed quickly, skin may be spared. If it is not washed quickly, it may cause severe irritation. If it is not washed quickly, it may cause severe irritation. Ingestion of liquid or vapors causes immediate burning at site of contact. Nausea, vomiting, cramps, and diarrhea may follow. Injuries may be treated as usual. 5.3 Treatment for Exposure: INHALATION: highly irritant, as liquid or vapor either ignites spontaneously or reacts with moisture to form methane and zinc oxide. Move victim to clean air and administer mouth-to-mouth resuscitation if breathing has ceased. Give oxygen only when authorized by physician. Keep victim warm and comfortable. Call physician immediately. If immediately flush with large amounts of water for at least 15 min. holding eyelids apart to ensure thorough irrigation. Use only irrigation only when directed by physician and do not attempt to neutralize with chemicals. Get medical attention as soon as possible. SKIN: immediately flush affected area with large volumes of water. Do not attempt to neutralize with chemicals. Get medical attention if irritation persists. INGESTION: highly irritant, as liquid or vapor either		5 HEALTH HAZARDS (Cont'd) 5.4 Toxicity by Inhalation (Threshold Limit Value): Not pertinent 5.5 Short-Term Inhalation Limits: Not pertinent 5.6 Toxicity by Ingestion: Not pertinent 5.7 Acute Toxicity: Not pertinent 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Not pertinent	

DNT

2,4-DINITROANILINE

Common Synonyms 2,4-Dinitroaniline	Solid powder or crystals Yellow Musty odor Sinks in water
AVOID CONTACT WITH: 1. ANTIMONY, arsenic, barium, bismuth, boron, calcium, cerium, cobalt, copper, chromium, iron, lead, lithium, magnesium, manganese, mercury, nickel, niobium, potassium, molybdenum, sodium, strontium, tellurium, tin, titanium, tungsten, vanadium, zinc, zirconium. 2. AQUEOUS SOLUTIONS OF: 1. AMMONIUM, barium, bismuth, boron, calcium, cerium, cobalt, copper, chromium, iron, lead, lithium, magnesium, manganese, mercury, nickel, niobium, potassium, molybdenum, sodium, strontium, tellurium, tin, titanium, tungsten, vanadium, zinc, zirconium.	
Fire	Combustible May explode if subjected to heat or flame POISONOUS GAS IS PRODUCED WHEN HEATED Toxic when heated May be ignited by heat, sparks or flames Combustion may produce irritating and/or toxic fumes or gas, including nitrogen oxides
 Exposure	SEE FOR MEDICAL AID DUST POISONOUS IF INHALED May be harmful SOLIDS POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED Irritating to eyes Harmful if swallowed or absorbed through skin If in eyes, flush with water for at least 15 minutes IF SWALLOWED: Do not induce vomiting. Give first aid as directed on label. IF SWALLOWED: Do not induce vomiting. Give first aid as directed on label. IF SWALLOWED: Do not induce vomiting. Give first aid as directed on label. IF SWALLOWED: Do not induce vomiting. Give first aid as directed on label.
Water Pollution	Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes Not recommended for use in waterways
1. RESPONSE TO DISCHARGE See Response Methods Handbook, CG 446-4 Should be removed Chemical and physical treatment	2. LABELS No hazard label required by Code of Federal Regulations
3. DNC	DINITROCRESOLS
-----	----------------

DNC	DINITROCRESOLS
-----	----------------

Common Synonyms 4,4-Dinitro-o-cresol 1,5-Dinitro-o-cresol 2,6-Dinitro-o-cresol	Solid Sinks in water	Yellow
HAZARD STATEMENT: MAY BE IRRITANT TO EYES, SKIN AND RESPIRATORY TRACT		
Fire	Combustible POISONOUS GASES MAY BE PRODUCED IN FIRE Containers may explode in fire	
 Exposure	DUST POISONOUS IF INHALED OR IF SKIN IS EXPOSED If inhaled will cause loss of consciousness SOLID POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED If swallowed will cause nausea, vomiting or loss of consciousness	
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes	
1 RESPONSE TO DISCHARGE See Response Numbered Paragraphs: C-6, 666, 6 Do not handle: water contamination Restrict access Should be removed Chemical and physical treatment	2. LABELS No Hazardous Inhibitor Code Federal Regulations	
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: 2,6-Dinitro-p-cresol 1,5-Dinitro-o-cresol; 4,4-Dinitro-o-cresol 3.2 Coast Guard Compatibility Classification: Not used 3.3 Chemical Formula: C₇H₃(NO₂)₄O 3.4 IMCO/United Nations Numerical Designation: 1.4, 5.1	4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: Yellow 4.3 Odor: Data not available	
5 HEALTH HAZARDS		
5.1 Personal Protective Equipment: Dust mask, goggles or face shield, protective clothing, rubber gloves 5.2 Symptoms Following Exposure: Very high fever, severe headache, irritative cough with burning, sharp pain in nose, dizziness, indigestion, chest irritation, indigestion may cause some symptoms as heart. In eyes, in case of feeling well being or face, wear in the increased, headache, nausea, vomiting, loss of consciousness, coma and death. Contact with eyes cause irritation, contact with skin causes local reactions and danger to eyes, some effects. No. Some authorities recommend that, although workers have been kept regular is determine hazard of this substance. Further use should be avoided. This does not prevent from using emergency. 5.3 Treatment for Exposure: INHALATION: remove person from exposure, move to fresh air, give first aid and medical attention. INGESTION: same as for inhalation and give appropriate first aid and induce vomiting get medical attention. EYES: Flush with water for at least 15 min. SKIN: Wash thoroughly with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.1 mg/m³ 5.5 Short-Term Inhalation Limits: 1 mg/m³ (30 min) 5.6 Toxicity by Ingestion: Grade 4 (LD 50 mg/kg rats) 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Oral Threshold: Data not available

5 HEALTH HAZARDS (Cont d)

5 HEALTH HAZARDS (Cont d)

DNP

2,4-DINITROPHENOL

Common Synonyms alpha Dinitrophenol 1-Hydroxy-2,4-dinitrobenzene		Solid crystal	Yellow	Sweet, musty odor
		Sinks in water		
Fire	COMBUSTIBLE May explode if subjected to heat or flame POISONOUS GASES PRODUCED WHEN HEATED			
	DUST POISONOUS IF INHALED OR IF SKIN IS EXPOSED SOLID POISONOUS IF SWALLOWED			
EXPOSURE				
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes			
1. RESPONSE TO DISCHARGE See Response to Discharge, NFPA 444, 4 Toxic and irritant Releases Should be removed Chemically and physically treatment		2. LABEL 		
3. CHEMICAL DESIGNATIONS 3.1 Synon. ms: Nitrophenol alpha-Dinitrophenol Hydroxy-2,4-dinitrobenzene 3.2 Coast Guard Compatibility Classification: Not compatible 3.3 Chemical Formula: HO-C ₆ H ₃ (NO ₂) ₂ 3.4 IMCO United Nations Numerical Designation: 1101		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: Yellow 4.3 Odor: Musty-sweet		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Not recommended; use appropriate respiratory and skin protection 5.2 Symptoms Following Exposure: Irritation; dizziness; nausea; vomiting; diarrhea 5.3 Treatment for Exposure: Remove victim from exposure; if inhaled, move to fresh air; if on skin, wash with soap and water; if ingested, induce vomiting; if swallowed, give water 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.2 mg/m ³ 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Toxic; 2.1 g/kg (acute) 5.7 Late Toxicity: Produces clouding of lens of eye (cataracts) in animals and humans; birth defects in chick embryos 5.8 Vapor (Gas) Irritant Characteristics: Not irritant 5.9 Liquid or Solid Irritant Characteristics: Causes stinging of the skin and first-degree burns on short exposure; may cause second-degree burns on long exposure 5.10 Odor Threshold: 11 mg/m ³ (acute)				

6 FIRE HAZARDS 6.1 Flash Point: Data not available 6.2 Flammable Limits in Air: Not pertinent 6.3 Fire Extinguishing Agents: Water, dry chemical, carbon dioxide, foam 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent 6.5 Special Hazards of Combustion Products: Vapor irritant 6.6 Behavior in Fire: Can decompose; explodes when heated under confinement 6.7 Ignition Temperature: Data not available 6.8 Electrical Hazard: Not pertinent 6.9 Burning Rate: Not pertinent		8 WATER POLLUTION 8.1 Aquatic Toxicity: Sluggish in the medium sized fresh water 8.2 Waterford Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): Data not available 8.4 Food Chain Concentration Potential: None	
7 CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction 7.2 Reactivity with Common Materials: Reacts with oxidizing materials and combustibles 7.3 Stability During Transport: May decompose when heated under confinement 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent 7.5 Polymerization: Not pertinent 7.6 Inhibitor of Polymerization: Not pertinent		9 SELECTED MANUFACTURERS 1. DTT

2,4-DINITROTOLUENE

Common Synonyms DNT 2,4-Dinitrotoluene 1-Methyl-2,4-Dinitrobenzene		Solid or heated liquid: Yellow to red solid or yellow liquid Liquid solidities: Solid and liquid sink in water	Slight odor
Physical Properties Boiling Point: 237°C (459°F) Melting Point: 11°C (52°F) Density: 1.27 g/cm³ (79.4 lb/gal) Vapor Pressure: 0.001 mm Hg (0.0013 kPa) at 20°C			
Fire	Combustible POISONOUS GASES MAY BE PRODUCED IN FIRE Containers may explode in fire		
 Exposure	LIQUID OR SOLID POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED Will burn skin and eyes If swallowed: will cause nausea, vomiting or loss of consciousness Irritates eyes, nose, throat, and skin May cause dizziness, headache, and fatigue		
Water Pollution	Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes		
1. RESPONSE TO DISCHARGE See Response Methods Handbook, CG 444-4 Environmental Protection Agency Material Safety Data Sheet MSDS No. 1000 Emergency Response Guidebook		2. LABELS See Labels Handbook, CG 444-4 Environmental Protection Agency Material Safety Data Sheet

NOTES <i>(Continued on page 1 and 4)</i>	

1,4-DIOXANE

Common Synonyms Dioxane p-Dioxane		Liquid	Colorless	Slight alcohol odor
Sinks and mixes with water. Flammable, irritating vapor is produced. Freezing point is 53° F.				
Avoid contact with liquid and vapor. Keep people away. Wear goggles, self-contained breathing apparatus and rubber overalls including gloves. Shut off ignition sources and shut off equipment. Stop discharge if possible. May poison if swallowed. Symptoms: Irritation of skin and eyes. Nausea and vomiting. Headache and dizziness. Numbness of mouth and throat. Fatigue and weakness.				
Fire	FLAMMABLE Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Wear goggles, self-contained breathing apparatus and rubber overalls including gloves. Extinguish with dry chemical or carbon tetrachloride. Water may be effective on fire. Cool exposed container with water.			
Exposure	CARE FOR MEDICAL AID VAPOR Irritating to eyes, nose and throat. Harmful if inhaled. May be absorbed. If inhaled, get person to fresh air. If irritation persists, get medical aid. LIQUID Irritating to skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES: Hold eyelids open and flush with plenty of water. IF SWALLOWED: Do not induce vomiting. Have water drunk slowly. IF SWALLOWED and a patient is UNCONSCIOUS OR HAVING CONVULSIONS: Do not give anything by mouth.			
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify health authorities if spilled in great quantities. Notify proper authorities if water is taken.			
1 RESPONSE TO DISCHARGE See Response Methods Handbook CG-446-4. Issue warning of high flammability. Disperse and flush.		2 LABEL 		
3 CHEMICAL DESIGNATIONS 31 Synonyms: Dioxolene oxides Dioxan p-Dioxane 32 Coast Guard Compatibility Classification Type I 33 Chemical Formula: (C ₄ H ₈ O) ₂ 34 IMCO United Nations Numerical Designation: 4200		4 OBSERVABLE CHARACTERISTICS 41 Physical State (as shipped): Liquid 42 Color: Colorless 43 Odor: Mild, somewhat alcoholic, like heated alcohol, ethereal.		
5 HEALTH HAZARDS 51 Personal Protective Equipment: Full mask, rubber gloves, goggles, rubber overalls including gloves. 52 Symptoms Following Exposure: No significant irritation after repeated exposure. Skin irritation, burn and blisters after repeated exposure. Irritation of eyes, nose and throat. Nausea and vomiting. Headache and dizziness. Numbness of mouth and throat. Fatigue and weakness. 53 Treatment for Exposure: INHALATION: Get person to fresh air. If irritation persists, get medical aid. If swallowed, do not induce vomiting. Have water drunk slowly. IF SWALLOWED and a patient is UNCONSCIOUS OR HAVING CONVULSIONS: Do not give anything by mouth. 54 Toxicity by Inhalation (Threshold Limit Value): 100 ppm. 55 Short-Term Inhalation Limits: 100 ppm for 60 min. 56 Toxicity by Ingestion: Toxic if swallowed. 57 Late Toxicity: Causes cancer in rats. 58 Vapor (Gas) Irritant Characteristics: Vapor causes a light irritation of eyes, nose and throat. 59 Liquid or Solid Irritant Characteristics: May cause a light irritation of eyes, nose and throat. 60 Odor Threshold: 620 mg/m.				

6 FIRE HAZARDS

6.1 **Flash Point** 54 F (C) 74 F (C)
 6.2 **Flammable Limits in Air** 1.9 - 23.8 % by vol
 6.3 **Fire Extinguishing Agents:** Alcohol, carbon dioxide, dry chemical
 6.4 **Fire Extinguishing Agents Not to be Used** None pertinent
 6.5 **Special Hazards of Combustion Products** Toxic vapors (e.g., CO) are evolved
 6.6 **Behavior in Fire** Vapors are readily ignited and may travel to source of ignition and flash back
 6.7 **Ignition Temperature** 550 F
 6.8 **Electrical Hazard** None pertinent
 6.9 **Burning Rate** Data not available

7 CHEMICAL REACTIVITY

7.1 **Reactivity with Water:** No reaction
 7.2 **Reactivity with Common Materials:** No reaction
 7.3 **Stability During Transport:** Stable
 7.4 **Neutralizing Agents for Acids and Caustics:** None pertinent
 7.5 **Polymerization:** Not pertinent
 7.6 **Inhibitor of Polymerization** None pertinent

8 WATER POLLUTION

8.1 **Aquatic Toxicity:** Data not available
 8.2 **Waterfowl Toxicity:** Data not available
 8.3 **Biological Oxygen Demand (BOD)** 10, 20, 30 days
 8.4 **Food Chain Concentration Potential** None

NOTES

DPN

DIPENTENE

Common Synonyms p-Menthyl 3-Diene Terpinene Terpinene delta 1,3-Terpene Phellandrene		Liquid Floats on water	Colorless to light yellow	Pleasant lemon like odor
Stop smoking if possible. Keep away from fire. Do not use near open flame. Do not use in confined spaces. Do not use in areas where smoking is prohibited. Do not use in areas where fire is a hazard.				
Fire		Combustible Containers may explode in fire Extinguish with water, foam, dry chemical, carbon dioxide Do not use water on burning liquid		
Exposure		VAPOR Irritating to eyes, nose and throat May cause dizziness LIQUID Irritating to skin and eyes Harmful if swallowed If swallowed, do not induce vomiting. If in eyes, flush with water. If on skin, wash with soap and water. If swallowed, seek medical attention.		
Water Pollution		Effect of low concentrations on aquatic life is unknown Fouling to shoreline May be dangerous if it enters water intakes Not recommended for use in water		
1. RESPONSE TO DISCHARGE See Response Methods Handbook, CG 446-41 Mechanical containment Should be removed Chemical and physical treatment		2. LABELS Not labeled required by Code of Federal Regulations		
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Terpinene; p-Menthyl 3-Diene; Phellandrene; Terpinene; delta 1,3-Terpene 3.2 Coast Guard Compatibility Classification: Oils (oil) 3.3 Chemical Formula: C ₁₀ H ₁₆ 3.4 IMCO/United Nations Numerical Designation: 33, 2052		4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless to pale yellow 4.3 Odor: Pleasant, pheromone		
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: No special gloves, safety glasses or face shield self-contained breathing apparatus for high concentrations 5.2 Symptoms Following Exposure: Liquid irritates eyes, prolonged contact with skin causes irritation. Ingestion causes irritation of the mouth and throat. 5.3 Treatment for Exposure: INHALATION: Remove victim from contaminated area and give artificial respiration if necessary. A physician. EYES: Flush with water for 15 minutes. If on skin, wash with soap and water. INGESTION: Induce vomiting if possible. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 2 oral LD ₅₀ in guinea pigs 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Vapor causes slight irritation to eyes and throat system present in high concentrations. The effect is severe. 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard threshold for liquid and solid irritant has not been established for this chemical. 5.10 Odor Threshold: Data not available

DAM

DIPHENYLAMINE

Common Synonyms Anilino benzene N-Phenylaniline		Solid or liquid	Light tan to brown	Pleasant odor
		Sinks in water		
Fire	Combustible POISONOUS GASES MAY BE PRODUCED IN FIRE			
Exposure	DUST Irritating to eyes, nose and throat Harmful if inhaled LIQUID OR SOLID Irritating to skin and eyes Harmful if swallowed			
Water Pollution	Effect: Flow concentrations on aquatic life is unknown May be dangerous if it enters water intakes			
1 RESPONSE TO DISCHARGE (See Response Methods Handbook CG 446-6) Issue warning. Water contamination should be removed. Chemical and physical treatment.		2 LABELS No hazard label required by Code of Federal Regulations.		
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Anilino benzene, N-Phenylaniline 3.2 Coast Guard Compatibility Classification: Data not available 3.3 Chemical Formula: (C ₆ H ₅) ₂ NH 3.4 IMCO/United Nations Numerical Designation: Data not available		4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid or liquid 4.2 Color: Very pale tan amber, clear 4.3 Odor: Characteristic, pleasant		
5 HEALTH HAZARDS				
5.1 Personal Protective Equipment: Respirator, safety goggles or face shield, rubber gloves				
5.2 Symptoms Following Exposure: Inhalation may irritate mucous membranes. Eye exposure including ingestion of solid or skin contact may cause fatigue, hypertension and bladder trouble. Contact with dust may irritate.				
5.3 Treatment for Exposure: INHALATION: move victim to fresh air. INGESTION: get medical attention observe for methemoglobinemia. EYE: flush with plenty of water and soap. SKIN: wash with soap and water.				
5.4 Toxicity by Inhalation (Threshold Limit Value): 10 mg/m ³				
5.5 Short-Term Inhalation Limit: Data not available				
5.6 Toxicity by Ingestion: Grade 2, oral LD ₅₀ = 1000 mg/kg (rat)				
5.7 Late Toxicity: Causes birth defects in rats (polycystic kidneys)				
5.8 Vapor (Gas) Irritant Characteristics: Data not available				
5.9 Liquid or Solid Irritant Characteristics: Data not available				
5.10 Odor Threshold: Data not available				

6 FIRE HAZARDS

- 6.1 Flash Point (liquid): 50° F (10° C)
- 6.2 Flammable Limits in Air: Not pertinent
- 6.3 Fire Extinguishing Agents: Foam, dry chemical, carbon dioxide
- 6.4 Fire Extinguishing Agents Not to be Used: Water or foam may cause frothing
- 6.5 Special Hazards of Combustion Products: Toxic oxides of nitrogen may form in fire
- 6.6 Behavior in Fire: Dust may be explosive if mixed with air in correct proportions and in the presence of a source of ignition
- 6.7 Ignition Temperature: 1175° F
- 6.8 Electrical Hazard: Not pertinent
- 6.9 Burning Rate: Not pertinent

7 CHEMICAL REACTIVITY

- 7.1 Reactivity with Water: No reaction
- 7.2 Reactivity with Common Materials
- 7.3 Stability During Transport: Stable
- 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent
- 7.5 Polymerization: Not pertinent
- 7.6 Inhibitor of Polymerization: Not pertinent

8 WATER POLLUTION

- 8.1 Aquatic Toxicity: Data not available
- 8.2 Waterfowl Toxicity: Data not available
- 8.3 Biological Oxygen Demand (BOD): Data not available
- 8.4 Food Chain Concentration Potential: Not pertinent

9. SELECTED MANUFACTURERS

- 1. Unisol Chemical Division, Unisol Inc., Elm Street, Naugatuck, Conn. 06770
- 2. American Cyanamid Co., International Dept., Bound Brook, N.J. 08805

NOTES

DPD

DIPHENYLDICHLOROSILANE

Common Synonyms Dichlorodiphenylsilane Dichlorodiphenylsilane Diphenyldichlorosilane		Liquid	Colorless	Sharp, irritating odor
		Reacts with water. Irritating vapor is produced.		
Fire		Combustible POSSIBLE GASES MAY BE PRODUCED IN FIRE		
Exposure		VAPOR Irritating to eyes, nose and throat LIQUID Will burn skin and eyes Harmful if swallowed		
Water Pollution		Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 444.4) Issue warning: Corrosive, water contamination. Restrictions: Disposal and flush with water.		2. LABEL 		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Dichlorodiphenylsilane Dichlorodiphenylsilane Diphenyldichlorosilane 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: $(C_6H_5)_2SiCl_2$ 3.4 IMCO/United Nations Numerical Designation: 1509		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Sharp hydrocarbon, sulfidic, pungent		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Avoid skin contact. Wear protective clothing, gloves, chemical goggles, and protective apron. Avoid unnecessary person-to-person contact. 5.2 Symptoms Following Exposure: Irritation of skin, eyes, nose, throat, and lungs. Severe burns, eyes, nose, throat, and lungs. 5.3 Treatment for Exposure: INHALATION: Remove to fresh air. Supply respiratory protection if needed. EYES: Flush with water for 15 minutes. SKIN: Flush with water for 15 minutes. INGESTION: Do not induce vomiting. Seek medical attention immediately. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 3 LD ₅₀ (Rat) 2.5 g/kg. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Vapor is a severe irritant to the respiratory tract. 5.9 Liquid or Solid Irritant Characteristics: Severe skin and eye irritation. Severe burns if swallowed. 5.10 Odor Threshold: Data not available.				

6 FIRE HAZARDS

- 6.1 Flash Point: 285.1 °C (545.2 °F)
 6.2 Flammable Limits in Air: 1.2% (L), 10.0% (U)
 6.3 Fire Extinguishing Agents: Dry chemical, carbon dioxide
 6.4 Fire Extinguishing Agents Not to be Used: Water and foam
 6.5 Special Hazards of Combustion Products: Hydrochloric acid and phosgene gases are produced.
 6.6 Behavior in Fire: Difficult to extinguish. Reaction may occur if heated with water. If applied, it will produce irritating fumes and produce irritating hydrocarbon fumes.
 6.7 Ignition Temperature: Data not available.
 6.8 Electrical Hazard: Data not available.
 6.9 Burning Rate: Data not available.

7 CHEMICAL REACTIVITY

- 7.1 Reactivity with Water: Reacts with water to generate hydrogen chloride (acidic fumes).
 7.2 Reactivity with Common Materials: Reacts with sulfuric acid to generate hydrogen chloride which is corrosive to common materials.
 7.3 Stability During Transport: Stable.
 7.4 Neutralizing Agents for Acids and Caustics: If it reacts with water, use with sodium bicarbonate or a weak acid.
 7.5 Polymerization: Not pertinent.
 7.6 Inhibitor of Polymerization: Not pertinent.

8 WATER POLLUTION

- 8.1 Aquatic Toxicity: Data not available.
 8.2 Waterfowl Toxicity: Data not available.
 8.3 Biological Oxygen Demand (BOD): Data not available.
 8.4 Ford Chain Concentration Potential: None.

NOTES

DPE

DIPHENYL ETHER

Common Synonyms Phenyl ether Diphenyl oxide Phenoxylbenzene		Liquid Colorless Mild pleasant odor May float or sink in water. Freezing point is 81°F
Stability: Stable if possible. Keep away from fire, heat, and light. Avoid contact with strong acids and strong oxidizing agents. Storage: Store in a cool, dry place.		
Fire	Combustible Flash point: 110°F (38°C) Boiling point: 294°F (151°C) Water solubility: Insoluble	
Exposure	LIQUID OR SOLID Irritating to skin and eyes. Harmful if swallowed. Keep away from children. Do not inhale dust or fumes. If in contact with eyes, wash with plenty of water. If swallowed, do not induce vomiting. Have a physician examine.	
Water Pollution	Effect of low concentrations on aquatic life is unknown. Fouling to shoreline. May be dangerous if it enters water intakes. Not biodegradable. Not acutely toxic to fish.	
1. RESPONSE TO DISCHARGE See Response Methods Handbook, CG 446-6. Mechanical containment. Should be removed. Chemical and physical treatment.		2. LABELS No label required by Code of Federal Regulations.
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Phenyl ether Diphenyl oxide Phenoxylbenzene 3.2 Coast Guard Competibility Classification: Not applicable 3.3 Chemical Formula: C ₁₂ H ₁₀ O 3.4 IMCO/United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Weak, petroleum
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Goggles or face shield, rubber gloves. 5.2 Symptoms Following Exposure: Inhalation may cause nausea because of direct contact with the eyes causes mild irritation. Prolonged exposure of skin may cause reddening and irritation. Ingestion produces nausea. 5.3 Treatment for Exposure: EYES: Flush with water for at least 15 min. SKIN: Wipe off, wash with soap and water. INHALATION: Induce vomiting and get medical attention. 5.4 Toxicity by Inhalation (Threshold Limit Value): ppm 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 2 oral LD ₅₀ = 3,370 mg/kg rat. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: 0.1 ppm

DNA

Di-n-PROPYLAMINE

Common Synonyms N-propylpropanamine		Liquid	Colorless	Strong ammonia like odor
Floats and mixes with water				
<u>Fire</u>		FLAMMABLE POISONOUS GASES MAY BE PRODUCED IN FIRE Containers may explode in fire Flashback along vapor trail may occur Vapor may explode if ignited in an enclosed area		
<u>Exposure</u>		VAPOR Irritating to eyes, nose and throat If inhaled will cause headache, dizziness, coughing, or difficult breathing LIQUID Will burn eyes If swallowed will cause nausea and vomiting		
<u>Water Pollution</u>		Effect of low concentrations on aquatic life is unknown Fouling to shoreline May be dangerous if it enters water intakes		
1 RESPONSE TO DISCHARGE See Response Methods Handbook, CG 444-4 Issue warning: water containing contaminant: high flammability Restrict access Dispense and flush		2. LABEL 		
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: N-propylpropanamine 3.2 Coast Guard Compatibility Classification Not listed 3.3 Chemical Formula: C_3H_9N 3.4 IMCO/United Nations Numerical Designation: Not listed		4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Strong ammonia like		
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Self-contained breathing apparatus, nitrile rubber gloves, nitrile rubber apron, face shield 5.2 Symptoms Following Exposure: Inhalation causes severe coughing and chest pain due to irritation of air passages; can cause lung edema; may also cause headache, nausea, faintness and anxiety. Ingestion causes irritation and burning in mouth and stomach. Contact with eyes causes severe irritation and edema of the eye. Skin contact with this material causes severe irritation. 5.3 Treatment for Exposure: INHALATION: remove victim to fresh air; the victim breathing alone is a great responsibility; breathing aid should be given over a self-administered INGESTION: give large amount of water; get medical attention; EYES: flush with water for 15 min; get medical attention to eyes; SKIN: flush with water for 15 min. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 3 irritant; LD ₅₀ 1.0 g/kg (rats) with mg/kg body weight 5.7 Late Toxicity: Causes permanent changes in liver and kidneys of rats and rabbits 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available

NOTES

DFF	DISTILLATES: FLASHED FEED STOCKS
-----	----------------------------------

DSR

DISTILLATES: STRAIGHT RUN

Common Synonyms Straight run gasoline		Watery liquid	Colorless	Gasoline-like odor
		Floats on water. Flammable; irritating vapor is produced.		
Very flammable liquid. See the Safety Data Sheet for the full text of the hazard statements. See the Material Safety Data Sheet for the full text of the hazard statements. See the Material Safety Data Sheet for the full text of the hazard statements.				
Fire		FLAMMABLE Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Extinguish with water spray or foam. Water may be used to extinguish the fire.		
Exposure		CALL FOR MEDICAL AID VAPOR Irritating to eyes, nose and throat. May cause dizziness, headache, nausea, vomiting, and diarrhea. LIQUIDS Irritating to eyes. Harmful if swallowed. Do not swallow. If swallowed, do not induce vomiting. If inhaled, get fresh air immediately. If symptoms persist, seek medical attention. If swallowed, drink water and seek medical attention.		
Water Pollution		HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS Fouling to shoreline. May be dangerous if it enters water intakes. Do not discharge into water.		
1 RESPONSE TO DISCHARGE See Response to Discharge section of the MSDS.		2 LABEL		
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Petroleum distillate. 3.2 Coast Guard Compatibility Classification: Miscellaneous hydrocarbon mixtures. 3.3 Chemical Formula: N/A. 3.4 IMCO United Nations Numerical Designation: N/A.		4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Colorless. 4.3 Odor: Gasoline-like.		
5 HEALTH HAZARDS				
5.1 Personal Protective Equipment: Do not use. 5.2 Symptoms Following Exposure: INHALATION - Irritation of nose and throat, dizziness, headache, nausea, vomiting, and diarrhea. ASPIRATION - May cause aspiration pneumonia. INGESTION - May cause nausea, vomiting, and diarrhea. SKIN - May cause irritation.				
5.3 Treatment for Exposure: INHALATION - Move to fresh air. If symptoms persist, seek medical attention. ASPIRATION - Do not induce vomiting. Seek medical attention. INGESTION - Do not induce vomiting. Seek medical attention. SKIN - Wash with soap and water.				
5.4 Toxicity by Inhalation (Threshold Limit Value): N/A. 5.5 Short-Term Inhalation Limits: N/A. 5.6 Toxicity by Ingestion: N/A. 5.7 Late Toxicity: N/A. 5.8 Vapor (Gas) Irritant Characteristics: N/A. 5.9 Liquid or Solid Irritant Characteristics: N/A. 5.10 Odor Threshold: N/A.

DODECANOL

Common Synonyms: Lauryl alcohol Dodecyl alcohol		Thick liquid Colorless Sweet odor Floats on water. Freezing point is 75° F.
Fire	Combustible	
Exposure	LIQUID Irritating to skin Will burn eyes	
Water Pollution	Effect of low concentrations on aquatic life is unknown. Fouling to shoreline. May be dangerous if it enters water intakes.	
1 RESPONSE TO DISCHARGE See Response Methods (page 10) - 1-10-4 Disperse and flush		2 LABELS See Labeling (page 10) - 1-10-4 DANGER IRRITANT
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Dodecyl alcohol Dodecan-1-ol 3.2 Coast Guard Compatibility Classification: A-1 3.3 Chemical Formula: $C_{12}H_{26}O$ 3.4 IMCO United Nations Numerical Designation: 2802		4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Faint, sweet, waxy

DODECENE

Common Synonyms Propylene tetramer		Watery liquid	Colorless	Pleasant odor
		Floats on water		
Sp. Gr. 0.832 @ 15°C Cal. of heat of vaporization A.S.T.M. D-155 U.S. Environmental Protection Agency National Fire Protection Association				
Fire	Combustible. Flash point: 120°F (43°C)			
Exposure	CALL FOR MEDICAL AID LIQUID Irritating to skin and eyes Harmful if swallowed If in eyes, flush with copious amounts of water If in mouth, spit out and wash with plenty of water If SWALLOWED, victim is CONSCIOUS, have victim drink water DO NOT INDUCE VOMITING.			
Water Pollution	Effect of low concentrations on aquatic life is unknown Fouling to shoreline May be dangerous if it enters water intakes No effect on health and wildlife if adults No reproductive effects on water intakes			
1. RESPONSE TO DISCHARGE (See Response Methods Handbook CG 446-4) Mechanical containment Chemical and physical treatment		2. LABELS No hazard label required by Code of Federal Regulations		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Dodecene (non linear) Propylene tetramer Tetrapropylene 3.2 Coast Guard Compatibility Classification Oilfin 3.3 Chemical Formula: C ₁₂ H ₂₄ 3.4 IMCO United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Characteristic		
5. HEALTH HAZARDS				
5.1 Personal Protective Equipment: Protective gloves; no respiratory protection needed if ventilation is adequate				
5.2 Symptoms Following Exposure: No inhalation hazard expected. Aspiration hazard if ingested. Minor skin and eye irritation				
5.3 Treatment for Exposure: INHALATION: Remove victim to fresh air. INGESTION: do NOT induce vomiting. Do NOT try to force vegetable oil and demulcents with physician. EYE CONTACT: flush with water for 15 min. SKIN CONTACT: wash with soap and water				
5.4 Toxicity by Inhalation (Threshold Limit Value): 200 ppm				
5.5 Short-Term Inhalation Limits: Data not available				
5.6 Toxicity by Ingestion: Grade 0 LD ₅₀ above 1 g/kg				
5.7 Late Toxicity: Data not available				
5.8 Vapor (Gas) Irritant Characteristics: Slight stinging of eyes and respiratory system at high concentrations. The effect is temporary				
5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain may cause stinging and reddening of skin				
5.10 Odor Threshold: Data not available

Common Synonyms 1 Phenyldecane n-Dodecylbenzene Laurylbenzene Detergent alkylate #2 Dodecylbenzene (linear)		Liquid	Colorless	Weak oily odor
Floats on water				
Not in the range of possible Keep in a cool, dry place. Avoid contact with skin. Avoid contact with liquid. Do not use in the presence of fire. Do not use in the presence of fire.				
Fire		Combustible Extinguish with dry chemical, carbon dioxide, or water. Water may be ineffective in fire.		
Exposure		Call for medical aid. LIQUID Irritating to skin and eyes. Harmful if swallowed. Re: Skin: Irritating to skin and eyes. Re: Eyes: Irritating to eyes. Re: Ingestion: Harmful if swallowed. Re: Inhalation: Irritating to respiratory tract. Re: Water: Harmful to aquatic life.		
Water Pollution		Effect of low concentrations on aquatic life is unknown. Fouling to shoreline. May be dangerous if it enters water intakes. Notify local health and welfare officials. Notify operator of nearby water intakes.		
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-3) Mechanical containment Should be removed See local and physical treatment		2. LABELS No label required by Code of Federal Regulations		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Detergent Alkylate #2 n-Dodecylbenzene, Dodecylbenzene (linear), Laurylbenzene, 1-Phenyldecane, U.C.A.S. Alkylate 12 3.2 Coast Guard Compatibility Classification: Aromatic hydrocarbon 3.3 Chemical Formula: $(C_{12}H_{25})_2C_6H_5$ 3.4 IMCO/United Nations Numerical Designation: Not listed		4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Weak oily		
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Goggles or face shield, rubber gloves 5.2 Symptoms Following Exposure: Liquid causes mild irritation of eyes and may cause allergic responses on repeated contact with skin. Ingestion causes nausea. 5.3 Treatment for Exposure: EYES: flush with water for at least 15 min; get medical attention for persistent irritation. SKIN: wash with soap and water. INGESTION: do NOT induce vomiting; get medical attention. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Not pertinent. 5.6 Toxicity by Ingestion: Grade I LD ₅₀ 5 to 5 g/kg. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Vapors are nonirritating to eyes and throat. 5.9 Liquid or Solid Irritant Characteristics: No appreciable hazard. Practically harmless to the skin. 5.10 Odor Threshold: Data not available.				

6 FIRE HAZARDS 6.1 Flash Point: 275°F (135°C) 6.2 Flammable Limits in Air: Data not available 6.3 Fire Extinguishing Agents: Dry chemical foam 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective 6.5 Special Hazards of Combustion Products: Not pertinent 6.6 Behavior in Fire: Not pertinent 6.7 Ignition Temperature: Data not available 6.8 Electrical Hazard: Data not available 6.9 Burning Rate: 1" min/min		8 WATER POLLUTION 8.1 Aquatic Toxicity: Data not available 8.2 Waterfowl Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): Data not available 8.4 Food Chain Concentration Potential: None																													
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction 7.2 Reactivity with Common Materials: No reaction 7.3 Stability During Transport: Stable 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent 7.5 Polymerization: Not pertinent 7.6 Inhibitor of Polymerization: Not pertinent		9 SELECTED MANUFACTURERS 1. Witco Chemical Corporation, Wifield Division, 21001 22nd Street, Carson, Calif. 90745 2. Union Carbide Corporation, Chemicals and Plastics Division, 270 Park Avenue, New York, N.Y. 10017 3. Continental Oil Company, Conoco Chemicals, Park Heights Plaza West One, Saddle Brook, N.J. 07662																													
		10 SHIPPING INFORMATION 10.1 Grades or Purity: Various mixtures containing 70-80% of undecyl plus dodecyl benzene along with 10% decylbenzene and other analogous hydrocarbons 10.2 Storage Temperature: Ambient 10.3 Inert Atmosphere: No requirement 10.4 Venting: Open (flame arresters)

DCS	DODECYLBENZENESULFONIC ACID, CALCIUM SALT
-----	--

DCS	DODECYLBENZENESULFONIC ACID, CALCIUM SALT
-----	--

Common Synonyms Calcium alkylaromatic sulfonate Calcium alkylbenzenesulfonate	Liquid May float or sink in water	Yellowish brown	Solvent odor
MSDS Worksheet: The following information is provided for the purpose of completing the MSDS Worksheet. It is not intended to be used as a substitute for the actual MSDS.			
Fire	FLAMMABLE Containers may explode in fire Flashback along vapor trail may occur Vapor may explode if ignited in an enclosed area Extinguish with dry chemical, carbon dioxide, or alcohol resistant foam Do not use water		
Exposure	ALL FORMS OF EXPOSURE LIQUID Irritating to skin and eyes If swallowed will cause nausea For severe irritation, wash with water If on affected area, wash with water IF IN EYES, flush with water for at least 15 min. Do not use eye drops IF SWALLOWED, DO NOT INDUCE VOMITING. Give water to drink. Call physician for advice. Do not eat, drink, or smoke. Do not inhale vapors.		
Water Pollution	Effect of low concentrations on aquatic life is unknown Floating to shoreline May be dangerous if it enters water intakes Notify appropriate authorities Notify appropriate authorities		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG #44-4) Issue warning - high flammability Mechanical containment Should be removed Chemical and physical treatment		2. LABEL 	
3. CHEMICAL DESIGNATIONS 1. Synonyms: Calcium alkylaromatic sulfonate, Calcium alkylbenzenesulfonate 2. Coast Guard Compatibility Classification: Not listed 3. Chemical Formula: (C₁₀-C₁₈)H₂₀SO₃-Ca solvent 4. IMCO/United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Amber 4.3 Odor: Hydrocarbon solvent	
5. HEALTH HAZARDS			
5.1 Personal Protective Equipment: Goggles or face shield, rubber gloves 5.2 Symptoms Following Exposure: Ingestion causes irritation of mouth and stomach. Contact with eyes causes irritation. Has a drying effect on skin. Prolonged contact may cause irritation. 5.3 Treatment for Exposure: INGESTION: Give large amount of water. Do NOT induce vomiting. EYES: Flush with water for at least 15 min. SKIN: Wipe off. Flush with water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Data not available 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available

NOTES

DBS

DODECYLBENZENESULFONIC ACID, TRIETHANOLAMINE SALT

Common Synonyms: Triethanolamine dodecylbenzenesulfonate	Liquid Yellowish brown Sinks and mixes with water
Avoid contact with liquid. Keep people away. No breathing of possible dusts and aerosols. Do not get on skin. No skin contact. Do not get on clothing.	
Fire	Combustible Extinguish with water. Do not use foam or dry chemical.
Exposure	CALL FOR MEDICAL AID LIQUID Irritating to skin and eyes. If swallowed will cause nausea and vomiting. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES: hold eyes open and flush with plenty of water. IF SWALLOWED: Do not induce vomiting. Have victim drink water or milk. IF SWALLOWED: Do not induce vomiting. Have victim drink water or milk. IF SWALLOWED: Do not induce vomiting. Have victim drink water or milk.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Do not discharge into water through sewer pipes.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446.4) Disperse and flush.	2. LABELS No hazard label required by Code of Federal Regulations.
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Triethanolamine dodecylbenzenesulfonate 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: $C_{12}H_{25}SO_3N(CH_2CH_2O)_3$ 3.4 IMCO/United Nations Numerical Designation: Not listed	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Amber 4.3 Odor: Data not available
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Rubber gloves, face mask or goggles. 5.2 Symptoms Following Exposure: Ingestion may cause irritation of mouth and stomach. Contact with eyes or prolonged contact with skin may cause irritation. 5.3 Treatment for Exposure: INGESTION: Give large amount of water; consult a doctor if large amount was ingested. EYES: flush with water; consult a doctor if irritation persists. SKIN: flush with water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Data not available 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available

DSD

DODECYL SULFATE, DIETHANOLAMINE SALT

Common Synonyms: Diethanolamine lauryl sulfate solution Lauryl sulfate, diethanolamine salt solution	Liquid Clear to pale yellow Mild odor May float or sink and mix with water
Avoid contact with liquid. Keep people away. Stop discharge if possible. Isolate and remove discharge material. Notify local health and pollution control agencies.	
Fire	Not flammable
Exposure	• ALL FOR MEDICAL USE LIQUID Irritating to skin and eyes. If swallowed will cause nausea and vomiting. Remove contaminated clothing as soon as possible. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED, do not induce vomiting. Have victim drink water or milk. IF SWALLOWED, do not induce vomiting UNLESS ADVISED BY A PHYSICIAN. IF SWALLOWED, do not induce vomiting UNLESS ADVISED BY A PHYSICIAN.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and pollution control agencies. Notify local health and pollution control agencies.

NOTES

DTH

DOWTHERM

Common Synonyms		Liquid	Light to dark brown	Fragrant odor
		May float or sink in water. Freezing point is 54° F.		
Fire	Combustible Flash point: 100°F (38°C) Boiling point: 200°F (93°C) Autoignition temperature: 400°F (204°C) Fire extinguishing agents: Water, carbon dioxide, dry chemical			
Exposure	LIQUID Irritating to skin and eyes. Harmful if swallowed. Inhalation of vapors may irritate the respiratory tract. Chronic effects: May cause skin irritation and dermatitis. Environmental effects: May be harmful to aquatic life if released into water.			
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Biodegradable.			
1. RESPONSE TO DISCHARGE See Response Methods Handbook, 10-2-66, 4. If leaking, water containment should be initiated. Chemical should be treated.		2. LABELS See Hazard Summary, 10-2-66, 4. Code of Federal Regulation.		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Diphenyl ether 3.2 Coast Guard Compatibility Classification: Volatile Hydrocarbon 3.3 Chemical Formula: C ₁₂ H ₁₀ O 3.4 IMCO United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Gray 4.3 Odor: Aromatic, pungent		
5. HEALTH HAZARDS				
5.1 Personal Protective Equipment: Not required				
5.2 Symptoms Following Exposure: Irritation of the eyes, nose, throat, and skin. May cause dizziness and headache.				
5.3 Treatment for Exposure: INHALATION: If inhaled, remove person to fresh air and provide rest. If irritation persists, seek medical attention. INGESTION: Rinse mouth with water and give milk or water to swallow. If symptoms persist, seek medical attention. SKIN: Wash with soap and water. If irritation persists, seek medical attention.				
5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available				
5.5 Short-Term Inhalation Limits: Data not available				
5.6 Toxicity by Ingestion: Data not available				
5.7 Late Toxicity: Data not available				
5.8 Vapor (Gas) Irritant Characteristics: Vapor irritates the eyes, nose, throat, and skin. May cause dizziness and headache.				
5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing, remove clothing immediately and wash skin.				
5.10 Odor Threshold: 0.1 ppm

EDR

ENDRIN

Common Synonyms 1, 2, 3, 4, 10, 10-Hexachloro-6, 7-epoxy 1, 4, 4a, 5, 6, 7, 8-Hexachloroendo-cis-1, 4, 5, 8-dimethanonaphthalene Hexadrin Mendrin		Solid or solution	Colorless to tan	Odorless
AVOID CONTACT WITH SOLID, LIQUID AND DUST. KEEP PEOPLE AWAY. Wash thoroughly with soap and water after exposure to dusts. Wash hands and face after contact with liquid. Do not eat, drink, or smoke while using. Do not get dust in eyes.		Sinks in water		
Fire	Combustible solution or non flammable solid POISONOUS GASES ARE PRODUCED IN FIRE. Fight fires with dry chemical, carbon dioxide or water. Water may be ineffective on fire.			
	CALL FOR MEDICAL AID DUST POISONOUS IF INHALED OR IF SKIN IS EXPOSED Irritating to eyes, nose and throat May cause dizziness Run nose and flush eyes with plenty of water. Do not get dust in eyes. LIQUID OR SOLID POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED Irritating to skin and eyes Remove contaminated clothing Flush affected area with plenty of water If IN EYES, hold eyelids open and flush with plenty of water If SWALLOWED, DO NOT INDUCE VOMITING. Give 1-2 glasses of milk and 1-2 glasses of water If SWALLOWED, ADVISE A PHYSICIAN FOR TREATMENT, CONSULT PHYSICIAN about possible poisoning			
Exposure				
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes Notify local health and waste officials Notify local water pollution control agency			
1. RESPONSE TO DISCHARGE (See Response Methods Handbook CG 446-4) Issue warning - poison water contaminant Restrict access Should be removed Chemical and physical treatment		2. LABEL 		
3. CHEMICAL DESIGNATIONS 31 Synonyms: 1, 2, 3, 4, 10, 10-Hexachloro-6, 7-epoxy 1, 4, 4a, 5, 6, 7, 8-Hexachloroendo-cis-1, 4, 5, 8-dimethanonaphthalene, Hexadrin, Mendrin 32 Coast Guard Compatibility Classification: Not applicable 33 Chemical Formula: C ₁₂ H ₆ Cl ₆ O 34 IMCO/United Nations Numerical Designation: 6.1/1615		4. OBSERVABLE CHARACTERISTICS 41 Physical State (as shipped): Solid (Sometimes shipped as an emulsifiable concentrate in xylene solution) 42 Color: Colorless to tan 43 Odor: None		
5. HEALTH HAZARDS 51 Personal Protective Equipment: Respirator for spray, fog or dust, rubber gloves and boots 52 Symptoms Following Exposure: Inhalation causes moderate irritation of nose and throat; prolonged breathing may cause same toxic symptoms as for ingestion. Contact with liquid causes moderate irritation of eyes and skin. Prolonged contact with skin may cause same toxic symptoms as for ingestion. Ingestion causes frothing of the mouth, facial congestion, convulsions, violent muscular contractions, dizziness, weakness, nausea 53 Treatment for Exposure: Get medical attention after all exposures to this compound INHALATION: remove from exposure. EYES: flush with water for at least 15 min. SKIN: wash with plenty of soap and water, but do not scrub. INGESTION: remove from the gastrointestinal tract either by inducing vomiting (unless hydrocarbon solvents are involved and the amount of emulsicide is well below the toxic amount) or by gastric lavage with saline solution. Saline cathartics may also be beneficial. Fats and oils should be avoided. Sedation with barbiturates is indicated if signs of CNS irritation are present; patient should have an absolute quiet, expert nursing care, and a minimum of external stimuli to reduce danger of convulsions. epinephrine is contraindicated in view of the danger of precipitating ventricular fibrillation; if material ingested was dissolved in a hydrocarbon solvent, observe patient for possible development of hydrocarbon pneumonitis 54 Toxicity by Inhalation (Threshold Limit Value): 0.1 mg/m ³ 55 Short-Term Inhalation Limits: 0.5 mg/m ³ for 10 min 56 Toxicity by Ingestion: Grade 4, oral LD ₅₀ = 3 mg/kg (rat) 57 Late Toxicity: None known				

6 FIRE HAZARDS 61 Flash Point: Non flammable solid or combustible solution >80 F O.C. (xylene) 62 Flammable Limits in Air: 1.1 - 7.7 (xylene) 63 Fire Extinguishing Agents (Solution): Dry chemical, foam, carbon dioxide 64 Fire Extinguishing Agents Not to be Used: Water may be ineffective on solution fire 65 Special Hazards of Combustion Products: Toxic hydrogen chloride and phosgene may be generated when solution burns 66 Behavior in Fire: Not pertinent 67 Ignition Temperature: Not pertinent 68 Electrical Hazard: Not pertinent 69 Burning Rate: 4 mm/min (xylene)	8 WATER POLLUTION 81 Aquatic Toxicity: 0.005 ppm 48 hr catp; 11 m fresh water 0.0025 ppm 48 hr brown shrimp 11% salt water 82 Waterfowl Toxicity: 1 D₅₀ = 5.64 mg/kg 83 Biological Oxygen Demand (BOD): Data not available 84 Food Chain Concentration Potential: Probable

EPC

EPICHLOROHYDRIN

Common Synonyms 1-Chloro-2,3-epoxypropane 3-Chloro-1,2-propylene oxide		Watery liquid	Colorless	Sweet garlic odor
		Sinks and mixes with water Poisonous, flammable vapor is produced		
AVOID CONTACT WITH LIQUID AND VAPOR. Keep people away. Wear goggles, self-contained breathing apparatus, and rubber overclothing (including gloves). Stop discharge if possible. Call fire department. Stay upwind and use water spray to knock down vapor. Isolate and remove discharged material. Notify local health and pollution control agencies.				
Fire		Combustible POISONOUS GASES ARE PRODUCED IN FIRE Vapor may explode if ignited in an enclosed area. Wear goggles, self-contained breathing apparatus, and rubber overclothing (including gloves). Confine fires from safe distance or protected location. Extinguish with water, dry chemical, alcohol foam or carbon dioxide. Cool exposed containers with water.		
		CALL FOR MEDICAL AID VAPOR POISONOUS IF INHALED Irritating to eyes. Move to fresh air. If breathing has stopped, get artificial respiration. If breathing is difficult, give oxygen. LIQUID POISONOUS IF SWALLOWED Will burn skin and eyes. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk, and have vomiting induced. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.		
Exposure				
Water Pollution		Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446.4) Issue warning - water contaminant. Restrict access. Disperse and flush.		2. LABEL 		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: 1-Chloro-2,3-epoxypropane Chloromethylolurane gamma-Chloropropylene oxide 1-Chloro-1,2-propylene oxide 3.2 Coast Guard Compatibility Classification: Epichlorohydrin 3.3 Chemical Formula: C ₃ H ₅ Cl 3.4 IMCO/United Nations Numerical Designation: 6.1 2021		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Pungent garlic, sweet, pungent like chloroform		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Air-pick or organic canister mask, protective gloves and goggles. 5.2 Symptoms Following Exposure: Vapor is irritating to eyes, nose, and throat; may cause headache, nausea, vomiting, and central nervous system depression. Rapidly fatal if swallowed; i.e. nausea, vomiting, and collapse. Skin contact is irritating. 5.3 Treatment for Exposure: INHALATION: remove victim to fresh air; keep him warm and quiet and get medical attention immediately; if breathing stops, start artificial respiration. INGESTION: induce vomiting (but only if victim is conscious and without convulsions) and call a physician promptly; no specific antidote known. EYES OR SKIN: immediately flush with water for at least 15 min. and get medical attention; remove contaminated clothing and wash before reuse. 5.4 Toxicity by Inhalation (Threshold Limit Value): 5 ppm 5.5 Short-Term Inhalation Limits: 10 ppm for 30 min. 5.6 Toxicity by Ingestion: Grade 3 LD ₅₀ 50 to 500 mg/kg 5.7 Late Toxicity: Causes cancer in experimental animals. 5.8 Vapor (Gas) Irritant Characteristics: vapor is moderately irritating such that personnel will usually tolerate moderate or high vapor concentrations. 5.9 Liquid or Solid Irritant Characteristics: Early severe skin irritant. May cause pain and second degree burns after a few minutes contact. 5.10 Odor Threshold: 10 ppm				

6. FIRE HAZARDS

6.1 **Flash Point:** 92°F (3°C) 100°F (4°C)

6.2 **Flammable Limits in Air:** 1.8% - 21.0%

6.3 **Fire Extinguishing Agents:** Alcohol foam, dry chemical, carbon dioxide, water spray

6.4 **Fire Extinguishing Agents Not to be Used:** Avoid use of dry chemical if fire occurs in container with confined vent

6.5 **Special Hazards of Combustion Products:** Toxic, irritating vapors are generated when heated

6.6 **Behavior in Fire:** Containers may explode in fire because of polymerization

6.7 **Ignition Temperature:** 504°F

6.8 **Electrical Hazard:** Not pertinent

6.9 **Burning Rate:** 2.6 mm/min

7. CHEMICAL REACTIVITY

7.1 **Reactivity with Water:** Mild reaction, not likely to be hazardous

7.2 **Reactivity with Common Materials:** No reaction

7.3 **Stability During Transport:** Stable

7.4 **Neutralizing Agents for Acids and Caustics:** Not pertinent

7.5 **Polymerization:** Can polymerize in presence of strong acids and bases, particularly when hot

7.6 **Inhibitor of Polymerization:** None used

8. WATER POLLUTION

8.1 **Aquatic Toxicity:** 36 ppm/48 hrs/Rashbow (fish)/TL_m/freshwater

8.2 **Waterfowl Toxicity:** Data not available

8.3 **Biological Oxygen Demand (BOD):** Data not available

8.4 **Food Chain Concentration Potential:** None

9. SELECTED MANUFACTURERS

1. Dow Chemical Co.
Midland, Mich. 48640

2. Shell Chemical Co.
Industrial Chemicals Division
Houston, Texas 77001

3. Union Carbide Corp.
Chemicals and Plastics Division
270 Park Ave.
New York, N.Y. 10017

10. SHIPPING INFORMATION

10.1 **Grades or Purity:** 99.0%

10.2 **Storage Temperature:** Ambient

10.3 **Inert Atmosphere:** No requirement

10.4 **Venting:** Pressure/vacuum

11. HAZARD ASSESSMENT CODE

NOTES	

(Continued on pages 5 and 6)

ETH

ETHANE

Common Synonyms		Liquefied compressed gas Colorless Mild gasoline-like odor	
		Floats and boils on water Flammable visible vapor cloud is produced	
Supplies first aid possible. Keep people away. Get to fresh air. Get to safe area. Call fire department. Stop if breathing device will expire. Use knowledge of vapor. As it is not water, it will not flow down a drain. Notify fire department for proper disposal.			
Fire		FLAMMABLE Flashback along vapor trail may occur Vapor may explode if ignited in an enclosed area Stop flow of gas if possible Get to fresh air. Get to safe area. Call fire department. Let fire burn	
Exposure		CALL FOR MEDICAL AID VAPOR If inhaled will cause difficult breathing Not irritating to eyes, nose or throat May cause frostbite If breathing is stopped, get artificial respiration If breathing is difficult, give oxygen LIQUID Will cause frostbite. Flush affected areas with plenty of water DO NOT RUB AFFECTED AREAS	
Water Pollution		Not harmful	
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446.4) Issue warning: high flammability Evacuate area		2. LABEL 	
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Methanimethane 3.2 Coast Guard Compatibility Classification: Paraffin 3.3 Chemical Formula: C ₂ H ₆ 3.4 IMCO United Nations Numerical Designation: 2.0.1035		4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid or compressed gas 4.2 Color: Colorless 4.3 Odor: Weak, sweetish	
5. HEALTH HAZARDS			
5.1 Personal Protective Equipment: Self contained breathing apparatus for high vapor concentrations			
5.2 Symptoms Following Exposure: In high vapor concentrations, can act as simple asphyxiant. Liquid causes severe frostbite			
5.3 Treatment for Exposure: Remove from exposure; support respiration			
5.4 Toxicity by Inhalation (Threshold Limit Value): Not pertinent			
5.5 Short-Term Inhalation Limits: Not pertinent			
5.6 Toxicity by Ingestion: Not pertinent			
5.7 Late Toxicity: None			
5.8 Vapor (Gas) Irritant Characteristics: Vapors are nonirritating to the eyes and throat			
5.9 Liquid or Solid Irritant Characteristics: No appreciable hazard. Practically harmless to the skin because it is very volatile and evaporates quickly			
5.10 Odor Threshold: 500 ppm			

6 FIRE HAZARDS 6.1 Flash Point: -211°F 6.2 Flammable Limits in Air: 2.9 - 13.0% 6.3 Fire Extinguishing Agents: Stop flow of gas 6.4 Fire Extinguishing Agents Not to be Used: Data not available 6.5 Special Hazards of Combustion Products: Not pertinent 6.6 Behavior in Fire: Not pertinent 6.7 Ignition Temperature: 940°F 6.8 Electrical Hazard: Class I group D 6.9 Burning Rate: 3 mm/min		8 WATER POLLUTION 8.1 Aquatic Toxicity: None 8.2 Waterfowl Toxicity: None 8.3 Biological Oxygen Demand (BOD): None 8.4 Food Chain Concentration Potential: None

EHP

ETHOXYDIHYDROPYRAN

Common Synonyms 2 Ethoxy 3,4-dihydro-2H-pyran		Liquid Colorless Floats on water
See Hazard Assessment Handbook (CG 446-3) for information on the following hazards: 1. Personal Protective Equipment: Goggles or face shield, rubber gloves 2. Symptoms Following Exposure: Contact with liquid irritates eyes. Also irritates skin on prolonged contact 3. Treatment for Exposure: EYES: flush with water for at least 15 min. SKIN: wipe off, wash well with soap and water. INGESTION: induce vomiting, get medical attention 4. Toxicity by Inhalation (Threshold Limit Value): Data not available 5. Short-Term Inhalation Limits: Not pertinent 6. Toxicity by Ingestion: Data not available 7. Late Toxicity: Data not available 8. Vapor (Gas) Irritant Characteristics: Data not available 9. Liquid or Solid Irritant Characteristics: Data not available 10. Odor Threshold: Data not available		
Fire	Combustible Flash point: 98°F (37°C) Boiling point: 145°C (300°F)	
Exposure	Exposure data not available	
Water Pollution	Effect of low concentrations on aquatic life is unknown Fouling to shoreline May be dangerous if it enters water intakes	
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Mechanical containment Should be removed Chemical and physical treatment		2. LABELS No label required by Code of Federal Regulations

EOD

ETHOXYLATED DODECANOL

Common Synonyms Ethoxylated dodecyl alcohol Ethoxylated lauryl alcohol Tergitol nonoxnic TMN		Only liquid Colorless to yellow Pleasant odor Mixes slowly with water. Freezing point is 61° F
Avoid contact with liquid. Stop discharge if possible. Call fire department. Isolate and remove discharged material. Notify local health and pollution control agencies.		
Fire	Combustible Extinguish with water, foam, dry chemical, or carbon dioxide.	
Exposure	CALL FOR MEDICAL AID LIQUID Irritating to skin. Will burn eyes. Harmful if swallowed. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk.	
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.	
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 445-4) Disperse and flush.		2 LABELS No hazard label required by Code of Federal Regulations.
3 CHEMICAL DESIGNATIONS 3.1 Synonyms Ethoxylated dodecyl alcohol Ethoxylated lauryl alcohol Polyoxyethyl dodecyl ether Polyoxyethyl lauryl ether Tergitol Nonoxnic TMN 3.2 Coast Guard Compatibility Classification Alcohol		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Mild and pleasant.
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Plastic gloves, goggles. 5.2 Symptoms Following Exposure: Liquid causes eye injury and irritates the skin, causing irritation. 5.3 Treatment for Exposure: Flush eyes with water for at least 15 min. Wash skin well with water. Get medical attention. 5.4 Toxicity by Inhalation (Threshold Limit Value): Not pertinent. 5.5 Short-Term Inhalation Limits: Not pertinent. 5.6 Toxicity by Ingestion: Grade 1 to 1.5 kg rats. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: None. 5.9 Liquid or Solid Irritant Characteristics: Liquid causes eye injury. Contact with skin may cause irritation. 5.10 Odor Threshold: Not pertinent.

ENP

ETHOXYLATED NONYLPHENOL

Common Synonyms		Liquid or solid	White	Mild odor
		May float or sink in water		
When mixed with liquid and solid, keep people away. Stop discharge if possible. Call fire department. Isolate and remove/flush large fire material. Notify local health and pollution control agencies.				
Fire		Combustible Extinguish with dry chemicals from a carbon dioxide. Water may be ineffective on fire. Cool exposed containers with water.		
Exposure		SAFETY FOR MEDICAL AID LIQUID OR SOLID Irritating to skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with water. IF IN EYES: Hold eye also open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS: Have victim drink water, if possible. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS: Do not throw up or keep victim awake.		
Water Pollution		Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and pollution officials. Notify operators of nearby water intake.		
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Disperse and flush.		2 LABELS No hazard label required by Code of Federal Regulations.		
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: No common synonyms. 3.2 Coast Guard Compatibility Classification: (miscellaneous) 3.3 Chemical Formula: $C_nH_{2n+1}EO_x$ where $n = 4-10$ 3.4 IMCO/United Nations Numerical Designation: Not listed.		4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid or solid. 4.2 Color: White. 4.3 Odor: Mild aromatic.		
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Goggles and safety glasses. 5.2 Symptoms Following Exposure: Contact with eyes causes irritation. Prolonged contact with skin causes irritation. 5.3 Treatment for Exposure: No treatment required for inhalation or ingestion. EYES: flush with copious quantities of tap water for 15 min. and seek appropriate medical attention. SKIN: wash affected areas with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion, Grade 2 oral LD_{50} : 1-3100 mg/kg rats. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.

ETHOXYLATED PENTADECANOL

Common Synonyms Ethoxylated penta-decylalcohol Terpolyl alcohol 45-S-10		Liquid Colorless to yellow Pleasant odor Mixes slowly with water. Freezing point is 59° F
Avoid contact with liquid. Skin irritation is possible. Contact with eyes may cause irritation. No known health and public hazards.		
Fire	Combustible Flammable liquid (F+). Flash point: 100° F (38° C). Boiling point: 300° F (149° C). Evaporation rate: Moderate.	
Exposure	ALL FOR MEDICAL USE LIQUID Irritating to skin. Will burn eyes. No known health and public hazards.	
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. No known health and public hazards.	
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-A) Disperse and flush.		2. LABELS No hazard label required by Code of Federal Regulations.
3. CHEMICAL DESIGNATIONS 31 Synonyms: Ethoxylated penta-decylalcohol; Polyethoxylated penta-decyl ether; Terpolyl alcohol 45-S-10. 32 Coast Guard Compatibility Classification: Alcohol. 33 Chemical Formula: $C_{15}H_{31}O(CH_2CH_2O)_8CH_2CH_2OH$ (with stearate). 34 IMCO United Nations Numerical Designation: Not listed.		4. OBSERVABLE CHARACTERISTICS 41 Physical State (as shipped): Liquid. 42 Color: Colorless. 43 Odor: Mild, pleasant.
5. HEALTH HAZARDS 51 Personal Protective Equipment: Plastic gloves, goggles. 52 Symptoms Following Exposure: Liquid causes eye irritation and de-fats the skin, causing irritation. 53 Treatment for Exposure: Flush eyes with water for at least 15 min. Wash skin with soap and water. Get medical attention. 54 Toxicity by Inhalation (Threshold Limit Value): Not pertinent. 55 Short-Term Inhalation Limits: Not pertinent. 56 Toxicity by Ingestion: Data not available. 57 Late Toxicity: Data not available. 58 Vapor (Gas) Irritant Characteristics: None. 59 Liquid or Solid Irritant Characteristics: Liquid causes eye irritation. Contact with skin may cause irritation. 510 Odor Threshold: Not pertinent.		

6. FIRE HAZARDS 61 Flash Point: 47° F (8° C). 62 Flammable Limits in Air: Not pertinent. 63 Fire Extinguishing Agents: Carbon dioxide or dry chemical for small fires; alcohol foam and water for large fires. 64 Fire Extinguishing Agents Not to be Used: Not pertinent. 65 Special Hazards of Combustion Products: Not pertinent. 66 Behavior in Fire: Not pertinent. 67 Ignition Temperature: Data not available. 68 Electrical Hazards: Not pertinent. 69 Burning Rate: Data not available.		8. ETD

ETHOXYLATED TRIDECANOL

Common Synonyms: Ethoxylated tridecyl alcohol Tergitol acetate 3-A-6		Liquid	Colorless to yellow	Pleasant odor
Avoid contact with liquid. If liquid is on face, wash with soap and water. If liquid is on skin, wash with soap and water. If liquid is in eyes, flush with water for 15 minutes. If liquid is in mouth, spit out and wash mouth with water.				
Fire		Combustible Extinguish with water. Do not use carbon dioxide. Extinguish with foam.		
Exposure		CALL FOR MEDICAL AID LIQUID Irritating to skin Will burn eyes Harmful if swallowed If swallowed, do not induce vomiting. Drink water. If inhaled, move to fresh air. If severe, seek medical attention. If swallowed, do not induce vomiting. Drink water.		
Water Pollution		Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Not recommended for use in water.		
1. RESPONSE TO DISCHARGE See Response Methods Handbook, CG 444-1. Disperse and flush.		2. LABELS No hazard label required by Code of Federal Regulations.		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Ethoxylated tridecyl alcohol Polyoxyethyl tridecyl ether Tergitol 3-A-6 Nonox 3.2 Coast Guard Competitibility Classification: Alcohol 3.3 Chemical Formula: $C_{13}H_{27}O(CH_2CH_2O)_n$ n = average 3.4 IMCO United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Mild, pleasant		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Plastic gloves, goggles. 5.2 Symptoms Following Exposure: Liquid causes eye irritation and dermatitis, causing irritation. 5.3 Treatment for Exposure: In case of contact with eyes, immediately flush with plenty of water for at least 15 minutes. Get medical attention. 5.4 Toxicity by Inhalation (Threshold Limit Value): Not pertinent. 5.5 Short-Term Inhalation Limits: Not pertinent. 5.6 Toxicity by Ingestion (Grade 2 LD50): Not pertinent. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: None. 5.9 Liquid or Solid Irritant Characteristics: Liquid causes eye irritation. Contact with skin may cause irritation. 5.10 Odor Threshold: Not pertinent.

NOTES			

ETG

ETHOXY TRIGLYCOL

Common Synonyms: Ethoxystyrenyl glycol Triethyleneglycol monomethyl ether		Liquid Colorless Odorless
Sinks and mixes with water		
No discharge if possible Call fire department Isolate and remove discharged material Notify local health and pollution control agencies		
Fire	Combustible Extinguish with dry chemical, alcohol foam, or carbon dioxide. Water and foam may be ineffective in fire. Confined spaces: Ventilate with water.	
Exposure	Not harmful	
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and pollution control agencies. Notify operators of nearby water intakes.	
1. RESPONSE TO DISCHARGE See Response Methods Handbook, CG 666-4. Evacuate and flush		2. LABELS No hazard label required by United States Federal Regulation
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Diethylene Glycol Dimethyl Ether Triethylene Glycol Dimethyl Ether Triethylene Glycol Methyl Ether 3.2 Coast Guard Compatibility Classification: Green 3.3 Chemical Formula: <chem>CH3OCH2CH2OCH2CH2OCH2CH2OH</chem> 3.4 IMCO United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Practically odorless, characteristic
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Chemical safety goggles and adequate protective clothing. 5.2 Symptoms Following Exposure: No appreciable hazard in ordinary handling or use. 5.3 Treatment for Exposure: Wash affected parts with water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Not pertinent. 5.5 Short-Term Inhalation Limits: Not pertinent. 5.6 Toxicity by Ingestion: Grade I LD ₅₀ swallowing agents. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Vapors are nonirritating to the eyes and throat. 5.9 Liquid or Solid Irritant Characteristics: No appreciable hazard. Practically harmless to the skin. 5.10 Odor Threshold: Not pertinent.		

6 FIRE HAZARDS

6.1 **Flash Point:** 225 F (100 C)
 6.2 **Flammable Limits in Air:** Not pertinent.
 6.3 **Fire Extinguishing Agents:** Dry chemical, carbon dioxide, or alcohol foam.
 6.4 **Fire Extinguishing Agents Not to be Used:** Water, or any material which is not effective.
 6.5 **Spills: Hazards of Combustion Products:** Not pertinent.
 6.6 **Behavior in Fire:** Not pertinent.
 6.7 **Ignition Temperature:** Data not available.
 6.8 **Electrical Hazard:** Not pertinent.
 6.9 **Burning Rate:** Data not available.

7 CHEMICAL REACTIVITY

7.1 **Reactivity with Water:** No reaction.
 7.2 **Reactivity with Common Materials:** No reaction.
 7.3 **Stability During Transport:** Stable.
 7.4 **Neutralizing Agents for Acids and Caustics:** Not pertinent.
 7.5 **Polymerization:** Not pertinent.
 7.6 **Inhibitor of Polymerization:** Not pertinent.

8 WATER POLLUTION

8.1 **Aquatic Toxicity:** Data not available.
 8.2 **Waterfowl Toxicity:** Data not available.
 8.3 **Biological Oxygen Demand (BOD):** Data not available.
 8.4 **Food Chain Concentration Potential:** None.

9 SELECTED MANUFACTURERS

1. Dow Chemical Co.
Midland Main Road
2. Olin Corp.
Chemical Division
20 Long Ridge Rd.
Stamford, Conn. 06904
3. Union Carbide Corp.
Chemical and Plastics Division
270 Park Ave.
New York, N. Y. 10017

10 SHIPPING INFORMATION

10.1 **Grade or Purity:** Data not available.
 10.2 **Storage Temperature:** Ambient.
 10.3 **Inert Atmosphere:** Not recommended.
 10.4 **Venting:** Open flame or spark.

11 HAZARD ASSESSMENT CODE

See Hazard Assessment Handbook, CG 666-5.

A P Q

12 HAZARD CLASSIFICATIONS

12.1 **Code of Federal Regulations:** Not listed.

12.3 **NFPA Hazard Classifications:** Not listed.

13 PHYSICAL AND CHEMICAL PROPERTIES

13.1 **Physical State at 15°C and 1 atm:** Liquid.
 13.2 **Molecular Weight:** 188.
 13.3 **Boiling Point at 1 atm:** 265 F (130 C) (NTP).
 13.4 **Freezing Point:** -12 F (10 C) (NTP).
 13.5 **Critical Temperature:** Not pertinent.
 13.6 **Critical Pressure:** Not pertinent.
 13.7 **Specific Gravity:** 1.26 at 15°C (60 F).
 13.8 **Liquid Surface Tension:** Not pertinent.
 13.9 **Liquid-Water Interfacial Tension:** Not pertinent.
 13.10 **Vapor (Gas) Specific Gravity:** Not pertinent.
 13.11 **Ratio of Specific Heats of Vapor (Gas):** 1.00.
 13.12 **Latent Heat of Vaporization:** 10.5 Btu/lb (23.5 kcal/kg) (NTP).
 13.13 **Heat of Combustion:** 10.5 Btu/lb (23.5 kcal/kg) (NTP).
 13.14 **Heat of Decomposition:** Not pertinent.
 13.15 **Heat of Solution:** Not pertinent.
 13.16 **Heat of Polymerization:** Not pertinent.

NOTES

ETA

ETHYL ACETATE

Common Synonyms: Acetic acid ethyl ester Acetic ester Vinegar naptha		Waters: liquid Colorless Pleasant, fruity odor Floats on water. Flammable; irritating vapor is produced.
Fire	FLAMMABLE. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area.	
Exposure	VAPOR: Irritating to eyes, nose and throat. If inhaled will cause headache, dizziness, nausea or loss of consciousness. LIQUID: Irritating to skin and eyes. Harmful if swallowed.	
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes.	
1 RESPONSE TO DISCHARGE See Response Methods Handbook, CG 446-41. Toxic warning: High flammable. Environmental: Dispense and flush.		2. LABEL 
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Acetic acid ethyl ester Acetic ester Vinegar ester Ethyl acetate 3.2 Coast Guard Compatibility Classification: Ester 3.3 Chemical Formula: CH ₃ COOCH ₂ CH ₃ 3.4 IMCO United Nations Numerical Designation: 1.2		4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Pleasant, fruity
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Organic vapor cartridge, maximum exposure in unshielded. 5.2 Symptoms Following Exposure: Headache, irritation of respiratory passages and eyes, dizziness, and nausea, weakness, loss of consciousness. 5.3 Treatment for Exposure: INHALATION: Remove victim to fresh air. Give artificial respiration if breathing is difficult. If necessary, administer oxygen. INGESTION: Flush with water. Do not induce vomiting. 5.4 Toxicity by Inhalation (Threshold Limit Value): 200 ppm 5.5 Short-Term Inhalation Limits: 1000 ppm - 15 min 5.6 Toxicity by Ingestion: Toxic (LD ₅₀ 1.1 g/kg) 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irrit and Characteristics: Vapor is irritating to the eyes, nose and throat. It is also a skin irritant at high concentrations. The liquid is non-irritating. 5.9 Liquid or Solid Irritant Characteristics: Very mildly irrit. If ingested will cause nausea and vomiting. It may also cause mouth and reddening of the skin. 5.10 Odor Threshold: 100 ppm

EAA

ETHYL ACETOACETATE

Common Synonyms Acetoacetic acid ethylester Acetoacetic ester Ethyl acetoacetate EAA		Liquid Mixes with water	Colorless Pleasant fruity odor
Stop discharge if possible. Keep people away. Call fire department. Evacuate and remove to isolated area. Notify local health and public utility commissions.			
Fire	Combustible Extinguish with foam, soda ash, dry chemical, carbon dioxide.		
Exposure	Liquid LIQUID Irritating to eyes. Harmful if swallowed. Irritates to skin. Irritates to skin with contact. IF IN EYES: Flush eyes with water for 15 minutes. IF SWALLOWED: Do not induce vomiting. Drink water.		
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and public utility commissions.		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446.4) Evacuate and isolate water contamination. Decontaminate and flush.		2. LABELS No label required by U.S. Dept. of Federal Regulations.	
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Acetoacetic acid ethylester Acetoacetic ester, Diethyl ether Ethyl acetoacetate, EAA 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: CH ₃ COCH ₂ COOCH ₂ CH ₃ 3.4 IMCO/United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Acetoacetic, Fruity	
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Goggles, gloves, shield, other proper. 5.2 Symptoms Following Exposure: Liquid may cause mild irritation to eyes. 5.3 Treatment for Exposure: Flush with water for 15 min. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 2, No ED ₀₁ , 3.5 g/kg acute LD ₅₀ . 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.

EAL

ETHYL ALCOHOL

Common Synonyms Ethanol Alcohol Grain alcohol Denatured alcohol		Watery liquid	Colorless	Alcohol odor
Floats and mixes with water. Flammable irritating vapor is produced.				
Stop discharge if possible. Keep people away. Shut off ignition sources and call fire department. Stay upwind and use water, pressure, knockdown vapor to dilute and remove the largest material. Notify local health and pollution control agencies.				
Fire	FLAMMABLE Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Extinguish with dry chemical, alkali, foam or carbon dioxide. Water may be ineffective in some cases. Do not expose containers with water.			
Exposure	CALL FOR MEDICAL AID VAPOR Irritating to eyes, nose and throat. Slightly irritating to skin. LIQUID Not harmful.			
Water Pollution	Dangerous to aquatic life in high concentrations. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify appropriate authorities for release.			
1. RESPONSE TO DISCHARGE (See Response Methods Handbook CG 445.4) Issue warning - high flammability. Disperse and flush.		2. LABEL 		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Alcohol Fermentation alcohol Cologne spirit Grain alcohol Denatured alcohol Spirit Ethanol Spirits of wine 3.2 Coast Guard Compatibility Classification: Alcohol 3.3 Chemical Formula: C ₂ H ₅ OH 3.4 IMCO/United Nations Numerical Designation: 1.2/1170		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Mild, rather pleasant, like wine or whiskey. (Denatured alcohol may be unpleasant.)		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: All purpose canister safety goggles. Avoid contact with liquid and inhalation of vapors. 5.2 Symptoms Following Exposure: Irritation of eyes, nose and throat. Headache and dizziness may occur. Liquid causes intoxication. 5.3 Treatment for Exposure: INHALATION: If breathing is affected, remove victim to fresh air, call physician, administer oxygen. Speed is of primary importance. EYES OR SKIN: flush with water. 5.4 Toxicity by Inhalation (Threshold Limit Value): 1000 ppm 5.5 Short-Term Inhalation Limits: 9000 ppm for 15 min 5.6 Toxicity by Ingestion: Grade I LD ₅₀ is 15 g/kg 5.7 Late Toxicity: None 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause a slight smarting of the eyes or respiratory system if present in high concentrations. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: No appreciable hazard. Practically harmless to the skin. 5.10 Odor Threshold: 10 ppm				

6 FIRE HAZARDS 6.1 Flash Point: 55°F (13°C) 64°F (18°C) 6.2 Flammable Limits in Air: 3.3% - 19% 6.3 Fire Extinguishing Agents: Carbon dioxide, dry chemical, water spray, alcohol foam 6.4 Fire Extinguishing Agents Not to be Used: None 6.5 Special Hazards of Combustion Products: None 6.6 Behavior in Fire: Not pertinent 6.7 Ignition Temperature: 689°F 6.8 Electrical Hazard: Class I, Group D 6.9 Burning Rate: 3.9 mm/min	8 WATER POLLUTION 8.1 Aquatic Toxicity: 250 ppm/6 hr. goldenfish lethal fresh water 8.2 Waterfowl Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): 12% 5 days, 44.2% (theoretical) 5 days, 71.2% (theoretical) 20 days 8.4 Food Chain Concentration Potential: None																																				
7. REVISED 1978

EAD

ETHYLALUMINUM DICHLORIDE

Common Synonyms EAD Aluminum ethyl dichloride	Liquid heated Colorless to light yellow IGNITES WHEN EXPOSED TO AIR Reacts violently with water Poisonous gas is produced on contact with water. Freezing point is 90°F.
Call fire department Wear goggles and self-contained breathing apparatus Stop discharges if possible. Keep people away Isolate and remove discharged material Notify local health and pollution control agencies	
Fire	IGNITES WHEN EXPOSED TO AIR Irritating gases are produced when heated Extinguish with dry graphite, soda ash, or other inert powder DO NOT USE WATER TO AM CARBON DIOXIDE, DRY CHEMICAL OR VAPORIZING LIQUID ON FIRE DO NOT USE WATER ON ADJACENT FIRES
 Exposure	CALL FOR MEDICAL AID GAS PRODUCED IN REACTION WITH WATER *POISONOUS IF INHALED* Irritating to eyes, nose and throat Move to fresh air If breathing has stopped, give artificial respiration If breathing is difficult, give oxygen LIQUID (HEATED) Will burn skin and eyes Harmful if swallowed Remove contaminated clothing and shoes Flush affected areas with plenty of water If IN EYES, hold eyelids open and flush with plenty of water If SWALLOWED and victim is CONSCIOUS, have victim drink water or milk DO NOT INDUCE VOMITING
Water Pollution	Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes Notify local health and wildlife officials Notify operators of nearby water intakes
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 445-4) Issue warning: high flammability Confine Restrict access Evaluate area	2. LABELS  
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Aluminum ethyl dichloride EAD 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: C ₂ H ₄ AlCl ₂ 3.4 IMCO/United Nations Numerical Designation: 4.2 1924	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless to light amber, yellow 4.3 Odor: Not pertinent
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Full protective clothing, preferably of aluminized glass cloth goggles, face shield, gloves, in case of fire, all purpose canister or self-contained breathing apparatus 5.2 Symptoms Following Exposure: Inhalation of smoke from fire causes metal fume fever (flu like symptoms); acid fumes irritate nose and throat. Contact with liquid (which is spontaneously flammable) causes severe burns of eyes and skin 5.3 Treatment for Exposure: INHALATION: only fumes from fire need be considered; metal fume fever is not critical and lasts less than 36 hrs.; irritation of nose and throat by acid vapors may require treatment by a physician. EYES: flush gently with water for 15 min.; treat burns if fire occurred; get medical attention. SKIN: wash with water; treat burns caused by fire; get medical attention 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Not pertinent 5.6 Toxicity by Ingestion: Data not available 5.7 Late Toxicity: Metal fume fever may develop after breathing smoke from fire 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Severe skin irritant. Causes second and third degree burns on short contact and is very injurious to the eyes 5.10 Odor Threshold: Not pertinent	

6. FIRE HAZARDS 6.1 Flash Point: Not pertinent (ignites spontaneously) 6.2 Flammable Limits in Air: Not pertinent 6.3 Fire Extinguishing Agents: Dry chemical, inert dry powders such as sand, limestone 6.4 Fire Extinguishing Agents Not to be Used: Water, foam, halogenated agents or carbon dioxide 6.5 Special Hazards of Combustion Products: Intense smoke may cause metal fume fever. Irritating hydrogen chloride also formed 6.6 Behavior in Fire: Contact with water applied to adjacent fires will cause formation of irritating smoke containing aluminum oxide and hydrogen chloride 6.7 Ignition Temperature: Ignites spontaneously in air at ambient temperature 6.8 Electrical Hazard: Not pertinent 6.9 Burning Rate: Not pertinent	8. EAS

ETHYLALUMINUM SESQUICHLORIDE

Common Synonyms EASC	Liquid Colorless to yellow IGNITES WHEN EXPOSED TO AIR. Reacts violently with water. Poisonous and flammable gases are produced on contact with water.
Call fire department. Wear goggles, self-contained breathing apparatus, and rubber overclothing (including gloves). Stop discharge if possible. Keep people away. Isolate to remove discharged material. Notify local health and pollution control agencies.	
Fire	IGNITES WHEN EXPOSED TO AIR. If in water, let fire burn. If not in water, extinguish with dry graphite, soda ash, or other inert powder. DO NOT USE WATER FOAM, CARBON DIOXIDE, DRY CHEMICALS, OR VAPORIZING LIQUIDS ON FIRE. DO NOT USE WATER ON ADJACENT FIRES.
Exposure	Call for medical aid. VAPOR Irritating to eyes, nose and throat. Harmful if inhaled. Move victim to fresh air. If breathing is difficult, give oxygen. LIQUID Will burn skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas as with plenty of water. If IN EYES, hold eyelids open and flush with plenty of water. If SWALLOWED and victim is CONSCIOUS, have victim drink water or milk. DO NOT INDUCE VOMITING.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-3) Issue warning: high flammability, corrosive. Restrict access. Evacuate area.	2. LABELS  
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: EASC 3.2 Coast Guard Compatibility Classification: Not applicable. 3.3 Chemical Formula: $(C_2H_5)_3Al_2Cl_3$ 3.4 IMCO/United Nations Numerical Designation: 4.2 1925	4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: yellow, colorless 4.3 Odor: Not pertinent
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Full protective clothing, preferably of aluminized glass cloth goggles, face shield, gloves. In case of fire, all-purpose canister or self-contained breathing apparatus. 5.2 Symptoms Following Exposure: Inhalation of smoke from fire causes metal fume fever (flu like symptoms); acid fumes irritate nose and throat. Contact with liquid, which is spontaneously flammable, causes severe burns of eyes and skin. 5.3 Treatment for Exposure: INHALATION: Only fumes from fire need be considered; metal fume fever is not critical and lasts less than 36 hr.; irritation of nose and throat by acid vapors may require treatment by a physician. EYES: Flush gently with water for 15 min. Treat burns if fire occurred; get medical attention. SKIN: Wash with water; treat burns caused by fire; get medical attention. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Not pertinent. 5.6 Toxicity by Ingestion: Data not available. 5.7 Late Toxicity: Metal fume fever may develop after breathing smoke from fire. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Severe skin irritant. Causes second- and third-degree burns on short contact and is very injurious to the eyes. 5.10 Odor Threshold: Not pertinent.	

6. FIRE HAZARDS 6.1 Flash Point: Not pertinent (ignites spontaneously). 6.2 Flammable Limits in Air: Not pertinent. 6.3 Fire Extinguishing Agents: Dry chemical, inert dry powders such as sand or limestone. 6.4 Fire Extinguishing Agents Not to be Used: Water, foam, halogenated agents, or carbon dioxide. 6.5 Special Hazards of Combustion Products: Intense smoke may cause metal fume fever. Irritating hydrogen chloride also formed. 6.6 Behavior in Fire: Contact with water from adjacent fires will cause formation of irritating smoke containing aluminum oxide and hydrogen chloride. 6.7 Ignition Temperature: Not pertinent. 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: Not pertinent.	8. EAM

ETHYLAMINE

Common Synonyms Aminoethane Monoethylamine		Liquid Colorless Strong ammonia like odor
		Mixes with water. Boiling point is 62°F. Flammable, irritating vapor is produced.
Short- and long-term sources: Call fire department. Stop discharge if possible. Evacuate area and use of toxic substances. Stay down and use water spray to knock down vapors. Isolate and secure discharged material. Notify local health and pollution control agencies.		
Fire	FLAMMABLE Irritating gases are produced when heated. Containers may explode in fire. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Extinguish with dry chemical, alcohol, foam, or carbon dioxide. Water may be ineffective or cause a violent reaction if exposed containers with water.	
Exposure	Call for medical aid. VAPOR Irritating to eyes, nose and throat. Harmful if inhaled. May be irritating to fresh air. Breathing is difficult if inhaled. LIQUID Irritating to skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES: Hold eyelids open. Flush with plenty of water. IF SWALLOWED: Do not induce vomiting. Drink water or milk.	
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes. Notify local health and water pollution officials if it enters nearby water intakes.	
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: high flammability Air contaminant: water contaminant Restrict access Evacuate area Disperse and flush		2 LABEL 
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Aminoethane Monoethylamine 3.2 Coast Guard Compatibility Classification: Amines (4) 3.3 Chemical Formula: C ₂ H ₅ NH ₂ 3.4 IMCO/United Nations Numerical Designation: 2.1046		4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Pungent, strong ammoniacal
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Amine type or ammonia type mask, plastic gloves, face shield and goggles. 5.2 Symptoms Following Exposure: Inhalation causes irritation of respiratory tract and lungs; pulmonary edema may result. Liquid causes severe irritation and burns of eyes and skin and can permanently injure eyes after 1 second's contact. Ingestion causes severe burns of mouth and stomach; can be fatal. 5.3 Treatment for Exposure: Get prompt medical attention for anyone overcome or injured by exposure to this compound. INHALATION: remove victim to fresh air; keep him warm and administer oxygen until medical help arrives. EYES: wash for 15 min. with water; avoid pressure on eyelids. SKIN: wash with soap and water; do not use ointments for at least 24 hrs.; do not cover burned area with dry clothing; keep moist with physiological saline solution. INGESTION: if victim is conscious, give large amount of water; then induce vomiting. 5.4 Toxicity by Inhalation (Threshold Limit Value): 10 ppm 5.5 Short-Term Inhalation Limits: 2 ppm for 30 min. 5.6 Toxicity by Ingestion: Grade 3 oral LD ₅₀ = 400 mg/kg (rats) 5.7 Late Toxicity: None 5.8 Vapor (Gas) Irritant Characteristics: Vapors are moderately irritating such that personnel will not usually tolerate moderate or high concentrations. 5.9 Liquid or Solid Irritant Characteristics: Causes smothering of the skin and first degree burns on short exposure and may cause second degree burns on long exposure. 5.10 Odor Threshold: Data not available.		

6 FIRE HAZARDS

- 6.1 Flash Point: 0°F (0°C)
 6.2 Flammable Limits in Air: 3.5% - 14%
 6.3 Fire Extinguishing Agents: Dry chemical, alcohol foam, carbon dioxide
 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective.
 6.5 Special Hazards of Combustion Products: Irritating and toxic oxides of nitrogen may be formed.
 6.6 Behavior in Fire: Vapor is heavier than air and may travel a considerable distance to a source of ignition and flash back. Containers may explode when heated.
 6.7 Ignition Temperature: 724°F
 6.8 Electrical Hazard: Data not available
 6.9 Burning Rate: 50 mm/min

8 WATER POLLUTION

- 8.1 Aquatic Toxicity: 40 ppm, 24 hr. shub. 11 m. fresh water
 8.2 Waterfowl Toxicity: Data not available
 8.3 Biological Oxygen Demand (BOD): Data not available
 8.4 Food Chain Concentration Potential: None

NOTES (Continued on pages 7 and 8)									

ECL

ETHYL CHLORIDE

Common Synonyms Chloroethane Ether hydrochloric		Liquid	Colorless	Pleasant odor
Floats and may boil on water. Flammable. Irritating vapor is produced. Boiling point is 54° F.				
Stop discharge if possible. Keep people away. Shut off ignition sources and call fire department. Avoid contact with liquid. Stay up wind and use water spray to knock down vapor. Isolate and remove discharged material. Notify local health and pollution control agencies.				
Fire	FLAMMABLE Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Wear goggles and self-contained breathing apparatus. Stop flow of gas or liquid if possible. Cool exposed containers and men efforts using shut-off with water. Let fire burn.			
Exposure	CALL FOR MEDICAL AID VAPOR Irritating to eyes, nose and throat. If inhaled, will cause dizziness or loss of consciousness. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. LIQUID Irritating to skin and eyes. Will cause frostbite. Flush affected areas with plenty of water. If IN EYES, hold eyelids open and flush with plenty of water. DO NOT RUB AFFECTED AREAS.			
Water Pollution	Not harmful to aquatic life. May be dangerous if it enters water intakes. Notify operators of nearby water intakes.			
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-1.) Issue warning: high flammability. Restrict access. Evaluate area.		2. LABEL 		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Chloroethane Monochloroethane 3.2 Coast Guard Compatibility Classification: Halogenated hydrocarbon 3.3 Chemical Formula: C ₂ H ₅ Cl 3.4 IMCO/United Nations Numerical Designation: 2.0 101		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Ethereal, pungent, ethereal ether like		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Non-enc rubber clothing where liquid contact is likely; chemical worker's goggles. RESPIRATORY PROTECTION: for 1000 ppm to 25 for 1-2 hr or less; full face mask and organic vapor canister for greater levels; self-contained breathing apparatus or equivalent. 5.2 Symptoms Following Exposure: Vapor causes drunkenness, anesthesia, possible lung injury. Liquid may cause frostbite on eyes and skin. 5.3 Treatment for Exposure: INHALATION: get person to fresh air; keep warm and quiet; get medical attention. SKIN: treat frostbite. 5.4 Toxicity by Inhalation (Threshold Limit Value): 1000 ppm. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Not pertinent. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause a slight stinging of the eyes or respiratory system if present in high concentrations. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain, may cause stinging and reddening of the skin. 5.10 Odor Threshold: Data not available.				

6. FIRE HAZARDS

- 6.1 Flash Point: -58°F (-50°C)
 6.2 Flammable Limits in Air: 3.6% - 12%
 6.3 Fire Extinguishing Agents: Water fog, carbon dioxide, dry chemical. For large fires it is best to allow material to burn while cooling surrounding equipment. Stop flow of ethyl chloride.
 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent.
 6.5 Special Hazards of Combustion Products: Toxic and irritating gases are generated in fires.
 6.6 Behavior in Fire: Containers may explode.
 6.7 Ignition Temperature: 966°F
 6.8 Electrical Hazard: Not pertinent.
 6.9 Burning Rate: 3.8 mm/min

7. CHEMICAL REACTIVITY

- 7.1 Reactivity with Water: No reaction.
 7.2 Reactivity with Common Materials: No reaction.
 7.3 Stability During Transport: Stable.
 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent.
 7.5 Polymerization: Not pertinent.
 7.6 Inhibitor of Polymerization: Not pertinent.

8. WATER POLLUTION

- 8.1 Aquatic Toxicity: Data not available.
 8.2 Waterlow Toxicity: Data not available.
 8.3 Biological Oxygen Demand (BOD): Data not available.
 8.4 Food Chain Concentration Potential: None.

 13.2 Molecular Weight: 64.52
 13.3 Boiling Point at 1 atm.:
 -40°F = -22.2°C = -8.4°F
 13.4 Freezing Point:
 -133°F = -91.6°C = -127.7 K
 13.5 Critical Temperature:
 169°F = 77.2°C = 300.4°K
 13.6 Critical Pressure:
 758 psia = 51.6 atm = 5.21 MN/m²
 13.7 Specific Gravity: 0.906 at 12.2°C (liquid)
 13.8 Liquid Surface Tension:
 19.5 dynes/cm = 0.0195 N/m at 20°C
 13.9 Liquid-Water Interfacial Tension:
 18.1 dyne/cm = 0.0181 N/m at 0°C
 13.10 Vapor (Gas) Specific Gravity: 2.2
 13.11 Ratio of Specific Heats of Vapor (Gas):
 1.3
 13.12 Latent Heat of Vaporization:
 163 Btu/lb = 90 kcal/g = 179 X 10³ J/kg
 13.13 Heat of Combustion: -1100 Btu/lb
 = -4900 cal/g = -188.4 X 10³ J/kg
 13.14 Heat of Decomposition: Not pertinent.
 13.15 Heat of Solution: Not pertinent.
 13.16 Heat of Polymerization: Not pertinent.

NOTES

ECHA

ETHYL CHLOROACETATE

Common Synonyms Chloroacetic acid ethyl ester Ethyl chloroacetate Ethyl chloroacetate Monochloroacetic acid ethyl ester Monochloroethanoic acid ethyl ester	Liquid	Colorless to light brown	Irritating or fruity odor								
AVOID CONTACT WITH EYES, SKIN AND CLOTHING. KEEP THEM AWAY FROM HEAT AND FLAMES. DO NOT BREATHE VAPORS. DO NOT GET ON SKIN OR CLOTHING. DO NOT GET IN EYES. DO NOT SWALLOW. DO NOT INHALE VAPORS.											
Fire	Combustible POISONOUS GASES MAY BE PRODUCED IN FIRE Ethyl chloroacetate decomposes to form toxic and corrosive gases.										
 Exposure	CAUTION FOR MEDICAL AND VAPOR Irritating to eyes, nose and throat. If inhaled will cause headache, or nausea. May irritate the respiratory tract. Treatment: If inhaled, get fresh air. If on skin, wash with plenty of water. If swallowed, drink plenty of water. Do not induce vomiting. If in eyes, flush with plenty of water. LIQUID POISONOUS IF SWALLOWED Irritating to skin and eyes. Keep away from heat and flames. Do not breathe vapors. Do not get on skin or clothing. Do not get in eyes. Do not swallow. Do not inhale vapors. IF SWALLOWED DO NOT INDUCE VOMITING NOR PAIN-RELIEVING MEASURES.										
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Not recommended for use in waterways. Not recommended for use in sewage treatment plants.										
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning - water contaminant. Should be removed. Chemical and physical treatment.		2. LABELS No label required by Code of Federal Regulations.									
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Chloroacetic acid, ethyl ester; Ethyl chloroacetate; Ethyl chloroethanoate; Monochloroacetic acid ethyl ester; Monochloroethanoic acid ethyl ester. 3.2 Coast Guard Competibility Classification: Not applicable. 3.3 Chemical Formula: C ₄ H ₇ ClO ₂ . 3.4 IMCO/United Nations Numerical Designation: 1111.		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Colorless, light straw to tan. 4.3 Odor: Extremely irritating, fruity pungent.									
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Organic canister mask, rubber gloves, chemical goggles. 5.2 Symptoms Following Exposure: Inhalation causes irritation of mucous membrane, headache and nausea. Contact with liquid causes extreme eye irritation and conjunctivitis, irritates skin if not removed at once. Ingestion causes irritation of mouth and stomach. 5.3 Treatment for Exposure: INHALATION: remove patient to fresh air, get medical attention. EYES: flush with copious quantities of water for at least 15 min, get medical attention if irritation persists. SKIN: wash with soap and water. INGESTION: give large amounts of water and induce vomiting, get medical attention. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 4 LD ₅₀ <50 mg/kg. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.											
6. FIRE HAZARDS 6.1 Flash Point: 129 F (50 C) (100 F CC). 6.2 Flammable Limits in Air: Data not available. 6.3 Fire Extinguishing Agents: Water fog foam dry chemical carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Irritating toxic hydrogen chloride and phosgene may be generated in fires. 6.6 Behavior in Fire: Not pertinent. 6.7 Ignition Temperature: Data not available. 6.8 Electrical Hazard: Data not available. 6.9 Burning Rate: 2.4 mm/min.		8. WATER POLLUTION 8.1 Aquatic Toxicity: Data not available. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: None.									
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: Very slow, not hazardous. 7.2 Reactivity with Common Materials: Slow hydrolysis to acidic products will cause slow corrosion of common metals. No hazard involved. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.		9. SELECTED MANUFACTURERS 1. Kvaerner Chemicals Inc., 360 Lexington Avenue, New York, N.Y. 10017. 2. ECF

ETHYL CHLOROFORMATE

Common Synonyms Chloroformic acid ethyl ester Ethyl chloroformate		Liquid Reacts slowly with water. Irritating vapor is produced.	Colorless to light yellow Irritating odor
AVOID CONTACT WITH LIQUID AND VAPOR. KEEP PEOPLE AWAY. Wear goggles, self-contained breathing apparatus and rubber overboots including gaiters. Shut off ignition sources. Call fire department. Stop discharges if possible. For water areas, close off larger discharges. Stay upwind. Use water spray to knock down vapors. Isolate and remove discharged material. Notify local health and pollution control agencies.			
Fire	FLAMMABLE. POISONOUS GASES MAY BE PRODUCED IN FIRE. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Wear goggles, self-contained breathing apparatus and rubber overclothing (including gaiters). Extinguish with dry chemical or carbon dioxide. Cool exposed containers with water.		
	CALL FOR MEDICAL AID. VAPOR POISONOUS IF INHALED OR IF SKIN IS EXPOSED. Irritating to eyes, nose and throat. Move victim to fresh air. If in eyes, hold eyelids open and flush with plenty of water. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. LIQUID POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. If IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is conscious, have victim drink water or milk. DO NOT INDUCE VOMITING.		
Exposure			
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446.4.) Issue warning: corrosive, high Flammability: poison Restrict access Disperse and flush		2. LABELS  	
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Chloroformic acid ethyl ester; Ethyl chloroformate 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: C ₂ H ₃ ClO ₂ 3.4 IMCO/United Nations Numerical Designation: 12 1102		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless to pale yellow 4.3 Odor: Irritating, sharp, like hydrochloric acid	
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Air line mask, self-contained breathing apparatus or organics and acid gas mask; full protective clothing 5.2 Symptoms Following Exposure: Inhalation causes mucous membrane irritation, coughing and sneezing. Vapor causes severe lacrimation; liquid causes acid type burns of eyes and skin like those of hydrochloric acid. Ingestion causes severe burns of mouth and stomach. 5.3 Treatment for Exposure: INHALATION: Remove to fresh air; use artificial respiration if breathing has stopped; call a doctor; keep victim quiet and administer oxygen if needed. EYES: Flush with water for at least 15 min.; see a doctor. SKIN: Wash liberally with water for at least 15 min.; then rinse; dilute solution of sodium bicarbonate or commercially prepared neutralizer. INGESTION: do NOT induce vomiting; give large amount of water; get medical attention. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 4 oral LD ₅₀ : 50 mg/kg rats 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Vapors are moderately irritating such that personnel will not usually tolerate moderate or high concentrations. 5.9 Liquid or Solid Irritant Characteristics: Causes smarting of the skin and first degree burns on short exposure and may cause second degree burns on long exposure. 5.10 Odor Threshold: Data not available			

6 FIRE HAZARDS

6.1 **Flash Point:** 82 F (30 C) (E.C.)

6.2 **Flammable Limits in Air:** Data not available

6.3 **Fire Extinguishing Agents:** Water, dry chemical, carbon dioxide

6.4 **Fire Extinguishing Agents Not to be Used:** Not pertinent

6.5 **Special Hazards of Combustion Products:**
Toxic chlorine and phosgene gases may be formed in fires

6.6 **Behavior in Fire:** Not pertinent

6.7 **Ignition Temperature:** 932 F

6.8 **Electrical Hazard:** Data not available

6.9 **Burning Rate:** 2.6 mm/min

7. CHEMICAL REACTIVITY

7.1 **Reactivity with Water:** Slow reaction with water, evolving hydrogen chloride (hydrochloric acid)

7.2 **Reactivity with Common Materials:** Slow evolution of hydrogen chloride from surface moisture reaction can cause corrosion

7.3 **Stability During Transport:** Stable

7.4 **Neutralizing Agents for Acids and Caustics:** Flush with water; rinse with sodium bicarbonate or lime solution

7.5 **Polymerization:** Not pertinent

7.6 **Inhibitor of Polymerization:** Not pertinent

8 WATER POLLUTION

(Continued on pages 5 and 6)

NOTES

ECS

ETHYLDICHLOROSILANE

Common Synonyms		Liquid	Colorless	Sharp, irritating odor
Reacts violently with water. Irritating gas is produced on contact with water.				
Shut off reaction sources. Call fire department. Avoid contact with liquid. Keep people away. Stop discharge if possible. Isolate and remove if charged materials. Notify local health and pollution control agencies.				
Fire	FLAMMABLE. POISONOUS GASES MAY BE PRODUCED IN FIRE. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Wear flameproof protective suit with self-contained breathing apparatus. DO NOT USE WATER OR FOAM ON FIRE.			
Exposure	Call for medical aid. VAPOR Irritating to eyes, nose and throat. May irritate lungs. If breathing is difficult, use oxygen. LIQUID Will burn skin and eyes. Harmful if swallowed. Remove person immediately to fresh air and water. Flush affected areas with plenty of water. If IN EYES, hold eyelids open and flush with plenty of water. If SWALLOWED, do NOT induce vomiting. Have victim drink water or milk. DO NOT INDUCE VOMITING.			
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and pollution control agencies. Notify appropriate local water intakes.			
1. RESPONSE TO DISCHARGE See Response Methods Handbook, CG 446-41. Issue warning: high flammability and odor. Restrict access. Evaluate area. Disperse and flush with water.			2. LABEL 	
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: No common synonyms. 3.2 Coast Guard Compatibility Classification: Not applicable. 3.3 Chemical Formula: $C_2H_5SiCl_2$ 3.4 IMCO/United Nations Numerical Designation: 12.11X1			4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Colorless. 4.3 Odor: Sharp, hydrochloric acid and acetic acid.	
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Acid vapor type respirator, protective rubber gloves, chemical worker's goggles, other equipment as necessary to protect ears and eyes. 5.2 Symptoms Following Exposure: Inhalation irritates mucous membranes. Contact with liquid causes severe burns of eyes and skin. Ingestion causes severe burns of mouth and stomach. 5.3 Treatment for Exposure: Get medical attention following all exposures to this compound. INHALATION: remove to fresh air, give artificial respiration if required. EYES: flush with water for 15 min. SKIN: flush with water. INGESTION: do NOT induce vomiting; give large amounts of water, followed by milk or milk of magnesia. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: (Grade 3) LD ₅₀ 500 mg/kg. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause severe irritation of eyes and throat and can cause eye and lung injury. They cannot be tolerated even at low concentrations. 5.9 Liquid or Solid Irritant Characteristics: See eye skin irritant. Causes severe and third degree burns on short contact and is very injurious to the eyes. 5.10 Ocor Threshold: Data not available.				

6 FIRE HAZARDS 6.1 Flash Point: 5-11°C 6.2 Flammable Limits in Air: 2.9% (LFL) 6.3 Fire Extinguishing Agents: Dry chemical 6.4 Fire Extinguishing Agents Not to be Used: Water foam 6.5 Special Hazards of Combustion Products: Toxic hydrogen chloride and phosgene gases may be formed 6.6 Behavior in Fire: Difficult to extinguish; re-ignition may occur. Contact with water applied to adjacent fires produces irritating hydrogen chloride fumes and flammable hydrogen gas 6.7 Ignition Temperature: Data not available 6.8 Electrical Hazard: Data not available 6.9 Burning Rate: <2 mm/min		8 WATER POLLUTION 8.1 Aquatic Toxicity: Data not available 8.2 Waterway Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): Data not available 8.4 Food Chain Concentration Potential: None

ETHYLENE

Common Synonyms Ethene Defiant gas		Liquefied compressed gas Colorless Sweet odor Floats and boils on water. Flammable visible vapor cloud is produced.
Wear self-contained breathing apparatus. Avoid contact with eyes, nose, mouth, and skin. Avoid contact with clothing. Avoid contact with water. Avoid contact with food and drink. Avoid contact with children.		
Fire		FLAMMABLE Flashback along vapor trail may occur. May explode if ignited in an enclosed area. May cause fire if ignited in an enclosed area. May cause fire if ignited in an enclosed area. May cause fire if ignited in an enclosed area. May cause fire if ignited in an enclosed area.
Exposure		VAPOR Not irritating to eyes, nose or throat. If inhaled, will cause headache, dizziness, or loss of consciousness. May cause fire if ignited in an enclosed area. May cause fire if ignited in an enclosed area. May cause fire if ignited in an enclosed area. May cause fire if ignited in an enclosed area. May cause fire if ignited in an enclosed area. LIQUID Will cause frostbite. If in contact with skin, will cause frostbite. DO NOT RUB AFFECTED AREA.
Water Pollution		Not harmful to aquatic life.
1. RESPONSE TO DISCHARGE See Response Methods Manual, CG 444-4. Evacuate area. High flammability. Report release. Evacuate area.		2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Ethene Defiant gas 3.2 Coast Guard Competibility Classification: Other 3.3 Chemical Formula: C_2H_4 3.4 IMCO United Nations Numerical Designation: 2015 (compressed) 2015 (liquefied)		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquefied 4.2 Color: Colorless 4.3 Odor: Sweet, and faintly ethereal.
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: High pressure container. Use compressed gas. 5.2 Symptoms Following Exposure: Moderate concentration may cause dizziness, headache, and unconsciousness. The vapor is a severe irritant to the respiratory tract. 5.3 Treatment for Exposure: Remove victim to fresh air. If in contact with liquid, wash with water. If in contact with vapor, use self-contained breathing apparatus. 5.4 Toxicity by Inhalation (Threshold Limit Value): Not permitted. 5.5 Short-Term Inhalation Limits: Not permitted. 5.6 Toxicity by Ingestion: Not permitted. 5.7 Late Toxicity: None. 5.8 Vapor (Gas) Irritant Characteristics: Vapor is not irritating to the eyes and skin. 5.9 Liquid or Solid Irritant Characteristics: Not irritating to the eyes and skin. 5.10 Odor Threshold: 100 ppm (100 mg/m ³).

ECH

ETHYLENE CHLOROHYDRIN

Common Synonyms 2-Chloroethanol 2-Chloroethanol 2-Chloroethyl alcohol Ethylene chlorohydrin Glycol chlorohydrin	Physical State Liquid Color Colorless Odor Faint sweet pleasant odor Miscibility Mixes with water. Irritating vapor is produced.
First Aid No special first aid measures are required. May cause eye irritation. Flush with water. In case of ingestion, do not induce vomiting. No special first aid measures are required.	Fire Combustible POISONOUS GASES MAY BE PRODUCED IN FIRE. Extinguish with water or other suitable agent.
Exposure VAPOR Irritating to eyes, nose and throat. If inhaled will cause coughing or difficult breathing. LIQUID Irritating to skin and eyes. Harmful if swallowed. DO NOT INHALE VAPOR.	Water Pollution Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Do not discharge into water bodies.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-1) Issue warning: water contaminant. Restrict access. Dispose and flush.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: 2-Chloroethanol 2-Chloroethanol 2-Chloroethyl alcohol Ethylene chlorohydrin Glycol chlorohydrin 3.2 Coast Guard Compatibility Classification: To be developed. 3.3 Chemical Formula: C ₂ H ₄ Cl ₂ OH 3.4 IMCO/United Nations Numerical Designation: 1.1, 1.2	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Faint, sweet
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Organic vapor mask or self-contained breathing apparatus; goggles or face shield; rubber gloves. 5.2 Symptoms Following Exposure: Inhalation causes irritation of upper respiratory system; nausea; headache; dizziness; coma; collapse. Liquid causes irritation of eyes and skin; prolonged contact with skin may allow penetration into body and cause same symptoms as following ingestion or inhalation. Ingestion causes nausea; headache; dizziness; coma; and collapse. 5.3 Treatment for Exposure: INHALATION: Remove from exposure; give artificial respiration if breathing has stopped; call physician. EYES: Flush with water for at least 15 min.; get medical attention if irritation persists. SKIN: Wash off with copious amounts of water; call physician if irritation has been prolonged. INGESTION: Give large amounts of water; get medical attention. 5.4 Toxicity by Inhalation (Threshold Limit Value): None. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 3 oral LD ₅₀ (mg/kg body wt). 5.7 Late Toxicity: Damage to central nervous system and liver in humans. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: (None)	

6. FIRE HAZARDS 6.1 Flash Point: 100°F (38°C) 6.2 Flammable Limits in Air: 4.9% - 15.9% 6.3 Fire Extinguishing Agents: Water, alcohol foam, dry chemical or carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Toxic; hydrogen chloride and phosgene gases may be formed. 6.6 Behavior in Fire: Vapors are heavier than air and may flash back to a source of ignition. 6.7 Ignition Temperature: 700°F 6.8 Electrical Hazard: Data not available. 6.9 Burning Rate: Typical	8. WATER POLLUTION 8.1 Aquatic Toxicity: Data not available. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): 150 mg/l (5 days) 8.4 Food Chain Concentration Potential: None.								
7. ETHYLENE CYANOHYDRIN

Common Synonyms Acrylonitrile 2-Cyanoethanol Glycid cyanohydrin 3-Hydroxypropionitrile		Liquid Colorless to yellow brown Weak odor to odorless
		Sinks and mixes with water
If you discharge it, please call your Department of Environmental Control and/or your local health department.		
Fire	Combustible POISONOUS GASES MAY BE PRODUCED WHEN HEATED When heated, it can decompose to form highly toxic gases. These gases may be deadly if inhaled. When exposed to flame, it will burn.	
Exposure	CALL FOR MEDICAL AID LIQUID Irritating to skin and eyes. Harmful if swallowed. Removes contaminated clothing and shoes. Flush affected areas with plenty of water. If IN EYES, flush immediately with plenty of water. If SWALLOWED, do not induce vomiting. If SWALLOWED, drink plenty of water. IF SWALLOWED, DO NOT INDUCE VOMITING OR HAVE AN EMESIS INDUCED.	
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water bodies. No data available on aquatic toxicity. No data available on aquatic water intake.	
1. RESPONSE TO DISCHARGE See Appendix Methods Handbook, CG 444.41 Discharge and Test		2. LABELS No hazard label required by U.S. Dept. of Federal Regulation
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: 2-Cyanoethanol Glycid cyanohydrin Hydroxy 2-cyanoethane Hydroxy acrylonitrile 3-Hydroxypropionitrile 3.2 Coast Guard Compatibility Classification: Alcohol 3.3 Chemical Formula: $\text{H}_2\text{NCH}_2\text{CH}_2\text{CN}$ 3.4 IMCO United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless to light colored 4.3 Odor: Pleasant, chemical character
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: An approved mask, plastic gloves, rubber clothing, rubber boots, goggles. 5.2 Symptoms Following Exposure: Liquid, colorless to light yellow, odorless, irritant. 5.3 Treatment for Exposure: Inhalation: Remove person to fresh air. If in eyes, flush with flowing water for at least 15 MIN. Flush exposure area with plenty of water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Not permitted 5.5 Short-Term Inhalation Limit: Not permitted 5.6 Toxicity by Ingestion: Grade 2.2 Data not available 5.7 Late Toxicity: Ingestion of liquid may cause severe burns, staining. 5.8 Vapor (Gas) Irritant Characteristics: Vapors are irritating to eyes, nose and throat. 5.9 Liquid or Solid Irritant Characteristics: No appreciable hazard. Pleasantly soluble in water. 5.10 Odor Threshold: Not permitted

REVISED 1978

EDA

ETHYLENEDIAMINE

Common Synonyms 1,2-Diaminoethane 1,2-Ethanediamine		Liquid Colorless Mild ammonia odor
Fire		Flammable Flammable liquid, vapor and gas. Irritating vapor is produced. Freezing point is 52°F.
Exposure		Health Hazards Avoid contact with liquid and vapor. Keep people away. Wear goggles, self-contained breathing apparatus and rubber overclothing (including gloves). Stop discharge if possible. Call fire department. Isolate and remove discharged material. Notify local health and pollution control agencies.
Water Pollution		Harmful to Aquatic Life in Very Low Concentrations May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446.4) Do, pers. and flush		2. LABELS No hazard label required by Code of Federal Regulations
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: 1,2-Diaminoethane 1,2-Ethanediamine 3.2 Coast Guard Compatibility Classification Aliphatic amine 3.3 Chemical Formula: $\text{NH}_2\text{CH}_2\text{CH}_2\text{NH}_2$ 3.4 IMCO/United Nations Numerical Designation: N.O. 1041		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Strong ammoniacal when ammonia free, mild and ammoniacal when
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Full rubber protective clothing, incl. gloves and boots, chemical worker's goggles, face shield where contact with face is likely. If necessary to enter closed areas for 1-2 hr or less with mist, wear full faced gas mask with canister approved by Bureau of Standards for use with ammonia. 5.2 Symptoms Following Exposure: High concentration of vapor burns eyes and irritates nose and throat. Liquid burns eyes and skin. 5.3 Treatment for Exposure: Get medical help immediately. INGESTION: drink large amounts of water or milk quickly, induce vomiting only if instructed by physician. EYES: flush immediately and thoroughly with flowing water for at least 15 min. SKIN: remove clothing and flush affected area with copious amounts of flowing water, then wash with soap and water. Severe exposure may require showering. 5.4 Toxicity by Inhalation (Threshold Limit Value): 10 ppm 5.5 Short-Term Inhalation Limits: 20 ppm for 5 min 5.6 Toxicity by Ingestion: Grade 2.1 Dose 0.5 to 5 g/kg (Female rat) 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Vapor is moderately irritating such that personnel will not usually tolerate moderate or high vapor concentrations. 5.9 Liquid or Solid Irritant Characteristics: Fairly severe skin irritant, may cause pain and second degree burns after a few minutes' contact. 5.10 Odor Threshold: 10 ppm		

6. FIRE HAZARDS		8. WATER POLLUTION	
5.1	Flash Point: 99°F (37°C) (NTP)	8.1	Aquatic Toxicity: 10 ppm, 24 hr, chub-killed, fresh water
6.2	Flammable Limits in Air: 3.3 - 11.1%	8.2	Waterfowl Toxicity: Data not available
6.3	Fire Extinguishing Agents: Carbon dioxide, dry chemicals, foam or water	8.3	Biological Oxygen Demand (BOD): 25% (theoretical) 5 days
6.4	Fire Extinguishing Agents Not to be Used: Do not use water in case of drum or tank fires	8.4	Food Chain Concentration Potential: None
6.5	Special Hazards of Combustion Products: Irritating vapors are generated when heated		
6.6	Behavior in Fire: Not pertinent		
6.7	Ignition Temperature: 715°F

EDB

ETHYLENE DIBROMIDE

Common Synonyms 1,2-Dibromoethane Ethylene dibromide	Liquid Colorless Sweet odor Sinks in water. Poisonous vapor is produced. Freezing point is 509 F.
Stop discharge if possible. Keep people away. Avoid contact with liquid and vapors. Wash and remove discharged material. Notify local health and pollution control agencies.	
Fire	Not flammable. POISONOUS GASES ARE PRODUCED WHEN HEATED Wear goggles, self-contained breathing apparatus, and rubber overclothing, including gloves. Do not mix with water.
 Exposure	CALL FOR MEDICAL AID VAPOR POISONOUS IF INHALED Irritating to eyes, nose and throat. May cause dizziness. If breathing chest stopped, give artificial respiration. If breathing is difficult, give oxygen. LIQUID POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED Irritating to skin and eyes. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES: Hold eyelids open and flush with plenty of water. IF SWALLOWED: Do not induce vomiting. Have victim drink water or milk.
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes. Notify local health and wildlife agencies. Notify pollution control authorities.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4.) Should be removed. Chemical and physical treatment.	2. LABELS No hazard label required by Code of Federal Regulations.
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Bromoethane, 1,2-Dibromoethane, ethyl bromide, dibromomethane, Bromoethane 30 W-10, 4-15 W-30. Ethylene dibromide, Glycol dibromide. 3.2 Coast Guard Compatibility Classification: Halogenated hydrocarbon. 3.3 Chemical Formula: BrCH ₂ CH ₂ Br. 3.4 IMCO United Nations Numerical Designation: 6.1 1605.	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Colorless. 4.3 Odor: Mildly sweet like chloroform.
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Canister type mask or self-contained air mask, neoprene gloves, chemical safety goggles. 5.2 Symptoms Following Exposure: Local inflammation, blisters and ulcers on skin, irritation in lungs and organic injury to liver and kidneys may be absorbed through skin. 5.3 Treatment for Exposure: Remove from exposure. Remove contaminated clothing. Wash skin with soap and water. Flush eyes with plenty of water. Consult physician. 5.4 Toxicity by Inhalation (Threshold Limit Value): 3 mg/m. 5.5 Short-Term Inhalation Limits: 50 ppm for 5 min. 5.6 Toxicity by Ingestion: Grade 4 LD ₅₀ 50 to 500 mg/kg. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause a slight smarting of the eyes or respiratory system if present in high concentrations. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain, may cause smarting and reddening of the skin. 5.10 Odor Threshold: Data not available.	

6. FIRE HAZARDS 6.1 Flash Point: Not flammable. 6.2 Flammable Limits in Air: Not flammable. 6.3 Fire Extinguishing Agents: Not pertinent. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Decomposition gases are toxic and irritating. 6.6 Behavior in Fire: Decomposes into toxic irritating gases. Reacts with hot metals such as aluminum and magnesium. 6.7 Ignition Temperature: Not flammable. 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: Not flammable.	8. WATER POLLUTION 8.1 Aquatic Toxicity: 18 mg/l 48 hr bioassay fresh water. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: None.																																				
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: No reaction. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9. SELECTED MANUFACTURERS 1. Dow Chemical Co. Midland, Mich. 48640. 2. Great Lakes Chemical Corp. West Lafayette, Ind. 47906. 3. PPG Industries, Inc. REVISED 1978

EDC

ETHYLENE DICHLORIDE

Common Synonyms 1,2-Dichloroethane Ethylene chloride EDC	Liquid Colorless Sweet odor Sinks in water. Flammable, irritating vapor is produced.
Fire	FLAMMABLE POISONOUS GASES ARE PRODUCED IN FIRE Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Wear goggles, self-contained breathing apparatus and rubber overalls (including gloves). Extinguish with dry chemical, 1.25% or carbon dioxide. Water may be ineffective on fire. Cool exposed containers with water.
Exposure	CALL FOR MEDICAL AID VAPOR Irritating to eyes, nose and throat. If inhaled, will cause nausea, dizziness or difficult breathing. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. LIQUID Will burn skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. If in EYES, hold eyelids open and flush with plenty of water. If SWALLOWED and victim is CONSCIOUS, have victim drink water or milk and have victim induce vomiting. If SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.
Water Pollution	Dangerous to aquatic life in high concentrations. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning of high flame ability. Disperse and flush.	2 LABEL 
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Broxide EDC 1,2-Dichloroethane Ethylene chloride Dutch liquid Glycol dichloride 3.2 Coast Guard Compatibility Classification: Halogenated hydrocarbon 3.3 Chemical Formula: $\text{C}_2\text{H}_4\text{Cl}_2$ 3.4 IMCO United Nations Numerical Designation: 12.114	4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Ethereal, chloroform like, ether like
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Clean body covering clothing and safety glasses with side shields. Respiratory protection: up to 50 ppm, none; 50 ppm to 250 ppm, 1-2 hr or less; full face mask and canister, greater than 250 ppm, self-contained breathing apparatus. 5.2 Symptoms Following Exposure: Inhalation of vapors causes nausea, dizziness, depression. Contact of liquid with eyes may produce corneal injury. Prolonged contact with skin may cause a burn. 5.3 Treatment for Exposure: INHALATION: If victim is overcome, remove him to fresh air, keep him warm and get medical attention immediately. If breathing stops, give artificial respiration. INGESTION: induce vomiting, call a physician, treat the symptoms. EYES: flush immediately with copious amounts of flowing water for at least 15 min. SKIN: remove clothing and wash skin thoroughly with soap and water. Wash contaminated clothing before reuse. 5.4 Toxicity by Inhalation (Threshold Limit Value): 50 ppm 5.5 Short-Term Inhalation Limits: 200 ppm for 5 min; during any 3 hour period 5.6 Toxicity by Ingestion: Grade 2.1 (Dose 5 to 5 g/kg (rat)) 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Vapor cause moderate irritation such that personnel will find high concentrations unpleasant. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Causes smarting of the skin and first degree burns on short exposure. May cause secondary burns on long exposure. 5.10 Odor Threshold: 100 ppm	

6.1 HAZARDS 6.1 Flash Point: 100°F (38°C) 6.2 Flammable Limits in Air: 6.2% - 15.6% 6.3 Extinguishing Agents: Foam, carbon dioxide, dry chemical 6.4 Extinguishing Agents Not to be Used: Water may be ineffective. 6.5 Special Hazards of Combustion Products: Toxic and irritating gases (hydrogen chloride, phosgene) are generated. 6.6 Behavior in Fire: Vapor is heavier than air and may travel considerable distance to a source of ignition and flash back. 6.7 Ignition Temperature: 775°F 6.8 Electrical Hazard: Class I (gr. up I) 6.9 Burning Rate: 1.6 mm/min	8 WATER POLLUTION 8.1 Aquatic Toxicity: 150 ppm, 96 hr perch. 11 mg salt water. * Time period not specified. 8.2 Water Fowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): 0.002 lb/lb 5 days 8.4 Food Chain Concentration Potential: None.																																				
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: No reaction. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Cautistics: Not pertinent. 7.5 Polymerization: No, pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9 SELECTED MANUFACTURERS 1. Continental Oil Co. Conoco Chemical Division Park 80 Plaza East Saddle Brook, N.J. 07662 2. Dow Chemical Co. Midland, Mich. 48640 3. Shell Chemical Co. Industrial Chemical Division Houston, Texas 77001

EGY

ETHYLENE GLYCOL DIACETATE

Common Synonyms Ethylene acetate Glycol diacetate Ethylene diacetate		Liquid Colorless Weak fruity odor
Sinks and mixes with water		
See Hazardous Waste Regulations for handling and disposal instructions. For information on disposal, contact your local health department.		
Fire		Combustible Extinguish with water or foam. Do not use carbon tetrachloride.
Exposure		LIQUID Irritating to skin and eyes. Reactions: Irritation of eyes, skin, and respiratory tract. Ingestion: May cause severe injury to the digestive tract. Inhalation: May cause irritation of the respiratory tract. If SWALLOWED, take 1-2 glasses of water and drink water.
Water Pollution		Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Spills should be cleaned up immediately.
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446.4) Issue warning - water contaminant. Disperse and flush.		2. LABELS No label required by Code of Federal Regulations.
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Ethylene acetate; Ethylene diacetate; Glycol diacetate. 3.2 Coast Guard Compatibility Classification: Ester (13). 3.3 Chemical Formula: CH ₃ COO(CH ₂) ₂ OCOCH ₃ . 3.4 IMCO/United Nations Numerical Designation: Not listed.		4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Colorless. 4.3 Odor: Weak, fruity.
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Goggles or face shield; rubber gloves. 5.2 Symptoms Following Exposure: Inhalation is not hazardous. Liquid causes mild irritation of eyes. Ingestion causes stupor or coma. 5.3 Treatment for Exposure: INHALATION: remove to fresh air. EYES and SKIN: flush well with water. INGESTION: induce vomiting; call a physician. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Not pertinent. 5.6 Toxicity by Ingestion: Grade 1 oral LD ₅₀ = 6,860 mg/kg (rat). 5.7 Late Toxicity: Ingestion may cause severe injury to kidneys. 5.8 Vapor (Gas) Irritant Characteristics: Vapors are nonirritating to eyes and throat. 5.9 Liquid or Solid Irritant Characteristics: No appreciable hazard. Practically harmless to the skin. 5.10 Odor Threshold: Data not available.		

6 FIRE HAZARDS

6.1 **Flash Point:** 205°F (79°C) (191°F (89°C)).

6.2 **Flammable Limits in Air:** 1.6% - 8.4%.

6.3 **Fire Extinguishing Agents:** Water, alcohol, foam, dry chemical, or carbon dioxide.

6.4 **Fire Extinguishing Agents Not to be Used:** Not pertinent.

6.5 **Special Hazards of Combustion Products:** Not pertinent.

6.6 **Behavior in Fire:** Not pertinent.

6.7 **Ignition Temperature:** 900°F.

6.8 **Electrical Hazard:** Data not available.

6.9 **Burning Rate:** 2.9 mm/min.

7 CHEMICAL REACTIVITY

7.1 **Reactivity with Water:** No reaction.

7.2 **Reactivity with Common Materials:** No reaction.

7.3 **Stability During Transport:** Stable.

7.4 **Neutralizing Agents for Acids and Caustics:** Not pertinent.

7.5 **Polymerization:** Not pertinent.

7.6 **Inhibitor of Polymerization:** Not pertinent.

8 WATER POLLUTION

8.1 **Aquatic Toxicity:** Data not available.

8.2 **Waterfowl Toxicity:** Data not available.

8.3 **Biological Oxygen Demand (BOD):** Data not available.

8.4 **Food Chain Concentration Potential:** None.

NOTES

EEE

ETHYLENE GLYCOL DIETHYL ETHER

Common Synonyms Diethyl Celluloside 1,2-Diethoxyethane		Liquid	Colorless	Mild pleasant odor
Floats and mixes slowly with water. Irritating vapor is produced.				
Storage: Far as possible, keep peroxide away. Caution: Department Isolate and remove contaminated material. Avoid contact with skin, clothing, and surfaces.				
Fire		Combustible Flammable with dry chemicals. Self-ignition with peroxide. Water may be ineffective.		
Exposure		GTL medical use VAPOR Irritating to eyes, nose and throat. May cause mild irritation. LIQUID Irritating to skin and eyes. Harmful if swallowed. Removes contaminated clothing and shoes. It is effective: Flushes with copious amounts of water. If INGESTED, flush with copious amounts of water. If SWALLOWED, do not induce vomiting. Have victim drink water. If inhaled, move victim to fresh air.		
Water Pollution		Effect of low concentrations on aquatic life is unknown. Polluting to shoreline. May be dangerous if it enters water intakes. Not a health hazard if it washes off boats. Not a serious threat to water intakes.		
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: water contaminant. Disperse and flush.		2. LABELS No label required by Code of Federal Regulations.		
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Diethyl Celluloside 1,2-Diethoxyethane 3.2 Coast Guard Compatibility Classification: Alcohols (6) 3.3 Chemical Formula: $C_4H_{10}O_2$ 3.4 IMCO/United Nations Numerical Designation: 1.1.1.1.1		4. ETHYLENE GLYCOL DIMETHYL ETHER

Common Synonyms Meeohol 1,2-Dimethoxyethane Dimethyl Cellosolve Ansol Ether 12		Liquid	Colorless	Fragrant odor
Fluats and mixes with water. Irritating vapor is produced.				
Stop discharge if possible. Call fire department. Isolate and remove discharged material. Notify local health and pollution control agencies.				
Fire	Combustible Extinguish with dry chemical, alcohol foam, or carbon dioxide. Cool exposed containers with water.			
Exposure	CALL FOR MEDICAL AID VAPOR If inhaled, will cause dizziness or difficult breathing. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. LIQUID Not irritating to skin. If swallowed, will cause nausea, vomiting or loss of consciousness. IF SWALLOWED and victim is CONSCIOUS, have victim drink water. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.			
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.			
1 RESPONSE TO DISCHARGE See Response Methods Handbook, C-446-6 Flammable, highly flammable. DANGER and FUEL		2. LABELS No hazard label required by U.S. Code or Federal Regulations.

NOTES			

REVISED 1978

ETHYLENE GLYCOL MONOBUTYL ETHER

Common Synonyms 2-Butoxyethanol Butyl Cellosolve Dowsol EB Poly-Solv EB		Only liquid	Colorless	Mild rancid odor
		Floats and mixes with water		
Stop discharge if possible Call fire department Avoid contact with liquid Isolate and remove discharged material Notify local health and pollution control agencies				
Fire	Combustible. Extinguish with dry chemical, alcohol foam or carbon dioxide. Cool exposed containers with water.			
Exposure	CALL FOR MEDICAL AID			
	LIQUID Irritating to skin and eyes Harmful if swallowed Remove contaminated clothing and shoes Flush affected areas with plenty of water IF IN EYES, hold eyelids open and flush with plenty of water IF SWALLOWED, and victim is CONSCIOUS, have victim drink water or milk			
Water Pollution	Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes Notify local health and wildlife officials Notify operators of nearby water intakes			
1 RESPONSE TO DISCHARGE See Response Methods Manual, U.S. 446.4 Disperse and flush		2 LABELS No hazard labels required by Code of Federal Regulations		
3 CHEMICAL DESIGNATIONS 3.1 Synonyms 2-Butoxyethanol Cellosolve Butyl Butyl Cel Poly-Solv EB Dowsol EB 3.2 Coast Guard Compatibility Classification 16.1-20.1 3.3 Chemical Formula $C_6H_{14}O_2$ 3.4 IMCO United Nations Numerical Designation: N		4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Mild characteristic, slightly rancid, mild chemical		
5 HEALTH HAZARDS				
5.1 Personal Protective Equipment: Air pack or organic canister respirator or rubber gloves, goggles, clothing to prevent body contact with liquid				
5.2 Symptoms Following Exposure: Vapors irritate eyes and nose. Ingestion of skin contact causes localized irritation and redness				
5.3 Treatment for Exposure: INHALATION: remove to fresh air and call a physician. SKIN OR EYES: immediately flush with plenty of water and medical care for eyes				
5.4 Toxicity by Inhalation (Threshold Limit Value): No ppm				
5.5 Short-Term Inhalation Limits: Data not available				
5.6 Toxicity by Ingestion: Grade 2 LD ₅₀ 10 g/kg rat				
5.7 Late Toxicity: Data not available				
5.8 Vapor (Gas) Irritant Characteristics: Vapors cause a slight stinging of the eyes or respiratory system if present in high concentration. The effect is temporary				
5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. Dispersed in clothing and a hand to clean maximum irritation and reddening of the skin				
5.10 LC ₅₀ Threshold: Data not available

EOX

ETHYLENE OXIDE

Common Synonyms Oxirane 1,2-Epoxyethane	Liquefied gas Colorless Sweet odor Floats and mixes with water. Flammable, irritating vapor is produced. Boiling point is 51° F.
Avoid contact with liquid. Keep people away. Wear goggles, self-contained breathing apparatus and rubber over clothing. Avoid clothing. Shift. If dangerous, use self-contained breathing apparatus. Stop discharge. If safe, stop upward and use water spray to knock down vapor. Isolate and remove discharged material. Notify local health and pollution control agencies.	
Fire	FLAMMABLE Containers may explode when heated. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Wear goggles, self-contained breathing apparatus and rubber over clothing. Stop flow of gas if possible. Combat fires from behind barrier with carbon dioxide or nonhalogenated flood discharge area with water. Gaseous exposed containers and liquid containers may explode if struck with water. Mixes with alcohol, many chemicals, oils and hydrocarbons.
Exposure	CAT 1 FORMALDEHYDE VAPOR Irritating to eyes, nose and throat. If inhaled, will cause nausea, vomiting and difficult breathing. May be fatal. If inhaled, may cause pulmonary edema. If inhaled, may cause severe irritation. LIQUID Will burn skin and eyes. Harmful if swallowed. Remove containers and clothing. If liquid is on skin, wash with plenty of water. If in eyes, flush with plenty of water. If swallowed, do not induce vomiting. If swallowed, drink plenty of water. Notify poison control center.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if enters water intakes. Notify local health and pollution control agencies.
1 RESPONSE TO DISCHARGE (See Federal Emergency Response Code 446.4) Issue evacuation for high flammability. Evacuate area.	2. LABEL 
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: 1,2-Epoxyethane, Oxirane 3.2 Coast Guard Competibility Classification: Alkyl epoxide 3.3 Chemical Formula: C ₂ H ₄ O 3.4 IMCO United Nations Numerical Designation: 2010	4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Sweet, characteristic ether-like
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: At supply risk, goggles or face shield, rubber shoes and gloves. 5.2 Symptoms Following Exposure: Exposure to low vapor concentrations often results in delayed effects such as vomiting. Higher concentrations produce irritation of eyes, nose, and throat; high concentrations may cause mucous membranes to blister. Contact with skin causes blistering, eye burns. 5.3 Treatment for Exposure: INHALATION: Remove contaminated area immediately; if severe, and vomiting starts, call physician. SKIN OR EYES: Flush immediately with plenty of water for at least 15 minutes and seek medical attention. 5.4 Toxicity by Inhalation (Threshold Limit Value): 50 ppm 5.5 Short-Term Inhalation Limits: 500 ppm for 15 min 5.6 Toxicity by Ingestion: Grade 3 oral rat LD ₅₀ = 33 g/kg 5.7 Late Toxicity: Causes cancer in mice. Effects on humans unknown. 5.8 Vapor (Gas) Irritant Characteristics: Vapor is moderately irritating such that personnel will not usually tolerate moderate to high vapor concentrations. 5.9 Liquid or Solid Irritant Characteristics: A very severe skin irritant; may cause pain and second degree burns after a few minutes contact. 5.10 Odor Threshold: 50 ppm	

6 FIRE HAZARDS 6.1 Flash Point: < 0.1 (°C) 6.2 Flammable Limits in Air: 3.0 - 100% 6.3 Fire Extinguishing Agents: Stop flow of gas. Use water, carbon dioxide, dry chemical or alcohol foam. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Irritation - vapors generated when heated. 6.6 Behavior in Fire: Vapor is heavier than air and may travel considerable distance to a source of ignition and flashback. Containers may explode when heated. 6.7 Ignition Temperature: 884°F 6.8 Electrical Hazard: Class I, Group B 6.9 Burning Rate: 3.8 mm/min	8. WATER POLLUTION 8.1 Aquatic Toxicity: Data not available. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: None.																																				
7 CHEMICAL REACTIVITY 7.1 Reactivity with Water: Slow reaction, not hazardous. 7.2 Reactivity with Common Materials: No reaction. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent. 7.5 Polymerization: May polymerize violently if contaminated with alkaline or acidic materials and metal oxides or chlorides. 7.6 Inhibitor of Polymerization: None used.	9. REV. ED 1978

EFT

ETHYL ETHER

Common Synonyms Anesthetic ether Sulfuric ether Ether Diethyl ether Diethyl oxide	Watery liquid Colorless Sweet odor Floats on water. Flammable, irritating vapor is produced. Boiling point is 94°F.
Avoid contact with liquid and vapor. Keep people away. Wear goggles and self-contained breathing apparatus. Shut off ignition sources and call fire department. Stop discharge, if possible. Stay upwind and use water spray to "knock down" vapor. Isolate and remove discharged material. Notify local health and pollution control agencies.	
Fire	FLAMMABLE Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Wear goggles and self-contained breathing apparatus. Extinguish with dry chemical foam or carbon dioxide. Water may be ineffective. Do not cool exposed containers with water.
Exposure	CALL FOR MEDICAL AID VAPOR Irritating to eyes, nose and throat. If inhaled, will cause nausea, vomiting, headache, or loss of consciousness. If in eyes, flush with water. If inhaled, have victim stop and give artificial respiration. If breathing is difficult, give oxygen. If breathing is difficult, give oxygen. LIQUID Irritating to skin. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. If IN EYES, hold eyelids open and flush with plenty of water. If SWALLOWED and victim is CONSCIOUS, have victim drink water or milk.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.
1 RESPONSE TO DISCHARGE (See Response Methods Handbook CG 445-4) Issue warning of high flammability. Restrict access. Evacuate area.	2 LABEL 
3 CHEMICAL DESIGNATIONS 3.1 Synonyms Anesthetic ether Ether Diethyl ether Ethoxyethane Diethyl oxide Sulfuric ether 3.2 Coast Guard Compatibility Classification Ether 3.3 Chemical Formula C ₄ H ₁₀ O 3.4 IMCO United Nations Numerical Designation 1.1 DLS	4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Color: Sweet pungent
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Approved organic vapor canister mask, chemical goggles, synthetic rubber or plastic gloves. 5.2 Symptoms Following Exposure: Vapor inhalation may cause headache, nausea, vomiting, and loss of consciousness. Contact with eyes will be irritant. Skin contact from clothing wet with the chemical may cause burns. 5.3 Treatment for Exposure: INHALATION: remove victim to fresh air; if breathing has stopped, apply artificial respiration; if breathing is still not giving, call a physician. EYES: flush immediately with water for 15 min. 5.4 Toxicity by Inhalation (Threshold Limit Value): 400 ppm 5.5 Short Term Inhalation Limits: 1000 ppm for 30 min 5.6 Toxicity by Ingestion: Grade 2.1 DLS to 5 g/kg 5.7 Late Toxicity: None 5.8 Vapor (Gas) Irritant Characteristics: Vapor causes a slight stinging of the eye or respiratory system if present in high concentrations. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: No appreciable hazard. Practically harmless to the skin because it is very volatile and evaporates quickly. 5.10 Odor Threshold: 0.5 ppm	

6 FIRE HAZARDS 6.1 Flash Point: -40 F (-40 C) 6.2 Flammable Limits in Air: 1.8% - 36% 6.3 Fire Extinguishing Agents: Dry chemical, carbon dioxide or foam. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Not pertinent. 6.6 Behavior in Fire: Vapor is heavier than air and may travel considerable distance to a source of ignition and flash back. Decompose violently when heated. 6.7 Ignition Temperature: 356 F 6.8 Electrical Hazard: Class I, group C 6.9 Burning Rate: 6.7 mm/min	8 WATER POLLUTION 8.1 Aquatic Toxicity: Data not available. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): 0.5 days. 8.4 Food Chain Concentration Potential: None.

REVISED 1978

EFM

ETHYL FORMATE

Common Synonyms Formic acid ethyl ester Ethyl formate Ethyl methanoate Formic ether	Liquid Colorless Pleasant odor Floats and mixes with water. Flammable, irritating vapor is produced.
Shut off ignition sources. Call fire department. Stop if discharge if possible. Keep people away. Stay upwind. Use water spray to knock down vapor. Isolate and remove discharged material. Notify local health and pollution control agencies.	
Fire	FLAMMABLE Containers may explode in fire. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Extinguish with dry chemicals, alcohol foam, or carbon dioxide. Water may be ineffective on fire. Cool exposed containers with water.
Exposure	Call for medical aid. VAPOR Irritating to eyes, nose and throat. If inhaled will cause difficult breathing. Move victim to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. LIQUID Irritating to skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES: Hold eyelids open and flush with plenty of water. IF SWALLOWED: and victim is CONSCIOUS, have victim drink water or milk.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.
1 RESPONSE TO DISCHARGE (See Response Methods Handbook CG 446.4) Issue warning: high flammability, water contaminant. Restrict access. Evacuate area. Disperse and flush.	2. LABEL 
3 CHEMICAL DESIGNATIONS 31 Synonyms: Ethyl formate, ethyl methanoate, Formic acid ethyl ester, Formic ether. 32 Coast Guard Compatibility Classification: Esters (13). 33 Chemical Formula: $\text{HC}_2\text{H}_5\text{O}_2$. 34 IMCO/United Nations Numerical Designation: 3.1 (190).	4 OBSERVABLE CHARACTERISTICS 41 Physical State (as shipped): Liquid. 42 Color: Colorless. 43 Odor: Characteristic, pleasant, aromatic.
5 HEALTH HAZARDS 51 Personal Protective Equipment: Organic container, eye mask, goggles, face shield, rubber gloves. 52 Symptoms Following Exposure: Inhalation of vapor causes slight irritation of the eyes and rapidly increasing irritation of the nose. High concentrations cause deep narcosis within a few minutes followed by death within a few hours. Contact with liquid causes moderate irritation of eyes and mild irritation of skin. Ingestion causes irritation of mouth and stomach, may cause deep narcosis and death if not treated. 53 Treatment for Exposure: INHALATION: remove from exposure, begin artificial respiration if breathing has stopped, call physician. EYES: wash with water for 15 min., call physician if needed. SKIN: wash with water for 15 min., call physician if irritation persists. INGESTION: do NOT induce vomiting; get medical attention at once. 54 Toxicity by Inhalation (Threshold Limit Value): 100 ppm. 55 Short-Term Inhalation Limits: Data not available. 56 Toxicity by Ingestion: Grade 2, oral LD_{50} = 1.850 mg/kg (rat). 57 Late Toxicity: Data not available. 58 Vapor (Gas) Irritant Characteristics: Vapors cause moderate irritation such that personnel will find high concentrations unpleasant. The effect is temporary. 59 Liquid or Solid Irritant Characteristics: Fairly severe skin irritant. May cause pain and second degree burns after a few minutes contact. 510 Odor Threshold: Data not available.	

6. FIRE HAZARDS 61 Flash Point: 10°F (0°C) - 4°F (-20°C) 62 Flammable Limits in Air: 2.8% - 10.9% 63 Fire Extinguishing Agents: Dry chemical, alcohol foam, carbon dioxide. 64 Fire Extinguishing Agents Not to be Used: Water may be ineffective. 65 Special Hazards of Combustion Products: Not pertinent. 66 Behavior in Fire: Vapor is heavier than air and may travel long distance to a source of ignition and flash back. 67 Ignition Temperature: 85°F. 68 Electrical Hazard: Data not available. 69 Burning Rate: 36 mm/min.	8 WATER POLLUTION 81 Aquatic Toxicity: Data not available. 82 Waterfowl Toxicity: Data not available. 83 Biological Oxygen Demand (BOD): 10 days 0.5 lb/lb, 10 days. 84 Food Chain Concentration Potential: None.

ETHYLHEXALDEHYDE

Common Synonyms 2-Ethylhexanal Butylhexylacetaldehyde alpha-Ethylcaproaldehyde Octyl aldehyde 2-Ethylhexaldehyde	Physical State Liquid White Mild odor Floats on water
First Aid Measures Inhalation: Remove victim to fresh air. Keep breathing. If breathing is difficult, give artificial respiration. If swallowed, give water. If on skin, wash with soap and water. If in eyes, flush with water. If inhaled, give oxygen. If on skin, wash with soap and water. If in eyes, flush with water. If swallowed, give water. If on skin, wash with soap and water. If in eyes, flush with water.	
Fire	Combustible Flammable liquid and vapor. Water may be used to extinguish the fire. Use of foam, carbon dioxide, or dry chemical extinguishers is recommended.
Exposure	Health Hazards VAPOR Irritating to eyes, nose and throat. If inhaled will cause coughing or difficult breathing. LIQUID Irritating to skin and eyes. If swallowed will cause nausea and vomiting. Prolonged contact with clothing or skin may cause irritation. If in eyes, flush with plenty of water. If swallowed, give water. Do not induce vomiting. If swallowed and victim is unconscious, do not give anything by mouth.
Water Pollution	Effect of low concentrations in aquatic life is unknown. Floating to shoreline. May be dangerous if it enters water intakes. Not recommended for use in water.
1 RESPONSE TO DISCHARGE (See Response Manual, CG 446-4) Minimize containment. Should be removed. Chemical and physical treatment.	2 LABELS No hazard label required by Code of Federal Regulations.
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Butylhexylacetaldehyde, 2-Ethylcaproaldehyde, 2-Ethylhexaldehyde, alpha-Ethylhexanal, Octyl aldehyde. 3.2 Coast Guard Competibility Classification: Aldehyde. 3.3 Chemical Formula: C ₈ H ₁₆ O. 3.4 IMCO/United Nations Numerical Designation: 1.1 (19).	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Colorless. 4.3 Odor: Mild characteristic.
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Rubbers gloves, safety goggles or face shield. 5.2 Symptoms Following Exposure: Inhalation may be irritating to mucous membrane. Overexposure may cause dizziness and collapse. Ingestion causes irritation of mouth and stomach. Contact with eyes or skin causes irritation. 5.3 Treatment for Exposure: INHALATION: remove victim to fresh air, give oxygen if breathing is difficult, call a doctor. EYES: irrigate immediately for 15 min., then get medical attention. SKIN: flush with water, wash with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 2, oral LD ₅₀ = 3.7 g/kg. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause a slight smarting of the eyes or respiratory system if present in high concentrations. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Causes smarting of the skin and first degree burns on short exposure may cause second degree burns on long exposure. 5.10 Odor Threshold: Data not available.	

6 FIRE HAZARDS 6.1 Flash Point: 122°F (44°C), 112°F (44°C). 6.2 Flammable Limits in Air: Data not available. 6.3 Fire Extinguishing Agents: Dry chemical, alcohol foam, carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective. 6.5 Special Hazards of Combustion Products: 6.6 Behavior in Fire: 6.7 Ignition Temperature: 387°F. 6.8 Electrical Hazard: Data not available. 6.9 Burning Rate: Data not available.	8 WATER POLLUTION 8.1 Aquatic Toxicity: Data not available. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: None.																																				
7 CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: May ignite spontaneously when spilled on clothing, paper or other absorbent materials. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9 SELECTED MANUFACTURERS 1. Eastman Chemical Products, Inc., Kingsport, Tenn. 37662. 2. Union Carbide Corp., Chemicals and Plastics, 270 Park Avenue, New York, N.Y. 10017. 3. EHX

2-ETHYL HEXANOL

Common Synonyms 2 Ethyl Hexanol 2 Ethylhexyl alcohol		Only liquid	Colorless	Faint odor
		Floats on water		
Symptoms: Eye irritation Cellulitis, dermatitis Aspiration pneumonia Irritation of respiratory tract Nausea, vomiting				
Fire		Combustible Flammable liquid (Category 2) Flammable solid (Category 2)		
Exposure		CALL FOR MEDICAL AID LIQUID Irritating to skin and eyes Harmful if swallowed Harmful to aquatic life Harmful to the environment Harmful to the ozone layer Harmful to the water quality Harmful to the soil Harmful to the atmosphere		
Water Pollution		Effect of low concentrations on aquatic life is unknown Fouling to shoreline May be dangerous if it enters water intakes Harmful to the environment Harmful to the water quality		
1 RESPONSE TO DISCHARGE See Response Methods Handbook, CG 446.41 Mechanical containment Chemical and physical treatment		2 LABELS No hazard label required by Code of Federal Regulations		
3 CHEMICAL DESIGNATIONS 31 Synonyms: 2-Ethylhexanol 2-Ethylhexyl alcohol 32 Coast Guard Compatibility Classification Alcohol 33 Chemical Formula: C ₈ H ₁₈ O 34 IMCO United Nations Numerical Designation: Not listed		4 OBSERVABLE CHARACTERISTICS 41 Physical State (as shipped): Liquid 42 Color: Colorless 43 Odor: Strong		
5 HEALTH HAZARDS				
51 Personal Protective Equipment: Air pack or respirator, gloves, rubber boots				
52 Symptoms Following Exposure: Anesthesia, muscular headache, dizziness, mild irritation to skin and eyes				
53 Treatment for Exposure: INHALATION: move victim to fresh air. SKIN: wash affected areas with water. EYES: flush with water for 15 min. Get medical care.				
54 Toxicity by Inhalation (Threshold Limit Value): Not pertinent				
55 Short-Term Inhalation Limits: Not pertinent				
56 Toxicity by Ingestion: Grade 2 LD ₅₀ in rats, kg/day/animal				
57 Late Toxicity: Increased excitability of central nervous system in rats and rabbits				
58 Vapor (Gas) Irritant Characteristics: Vapor causes slight irritation of the eyes, respiratory system, present in high concentrations. The effect is temporary.				
59 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain, may cause smothering and reddening of the skin.				
510 Odor Threshold: Disagreeable, stable				

6. FIRE HAZARDS

6.1 Flash Point: 155 F (68 C)
 6.2 Flammable Limits in Air: Data not available
 6.3 Fire Extinguishing Agents: Foam, carbon dioxide, dry chemical
 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent
 6.5 Special Hazards of Combustion Products: Not pertinent
 6.6 Behavior in Fire: Not pertinent
 6.7 Ignition Temperature: Not listed
 6.8 Electrical Hazard: Not pertinent
 6.9 Burning Rate: 4.0 mm/min

7. CHEMICAL REACTIVITY

7.1 Reactivity with Water: No reaction
 7.2 Reactivity with Common Materials: No reaction
 7.3 Stability During Transport: Stable
 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent
 7.5 Polymerization: Not pertinent
 7.6 Inhibitor of Polymerization: Not pertinent

8. WATER POLLUTION

8.1 Aquatic Toxicity: 19 ppm/24 hr/brine shrimp/TLM
 8.2 Waterlow Toxicity: Data not available
 8.3 Biological Oxygen Demand (BOD): 68% of theoretical in 5 days
 8.4 Food Chain Concentration Potential: None

NOTES

REVISED 1978

EAI

2-ETHYLHEXYL ACRYLATE, INHIBITED

Common Synonyms Acrylic acid 2-ethylhexylester 2-Ethylhexyl 2-propenoate	Liquid Colorless Sharp odor Floats on water
Store in a dry, cool place. Keep away from heat and fire. Call fire department. Isolate and remove discharged material. Notify local health and pollution control agencies.	
Fire	Combustible Containers may explode in fire. Combat fires from safe distance. Use protected location. Extinguish with dry chemicals or carbon dioxide. Water may be ineffective so fire. Avoid exposed containers with water.
Exposure	Call for medical aid. LIQUID Irritating to skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES: Hold eyelids open and flush with plenty of water. IF SWALLOWED: Do not induce vomiting. Have victim drink water or milk and have victim induce vomiting. IF SKIN FLOWED: Do not induce vomiting. Have victim drink water or milk and have victim induce vomiting. IF SKIN FLOWED: Do not induce vomiting. Have victim drink water or milk and have victim induce vomiting.
Water Pollution	Effect of low concentrations on aquatic life is unknown. Floating to skin line. May be dangerous if it enters water intakes. Notify local health and pollution control agencies. Notify operators of nearby water intakes.
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446.4) Issue warning - water contaminant. Restrict access. Mechanical containment. Should be removed. Chemical and physical treatment.	2. LABELS No label required by Code of Federal Regulations.
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Acrylic acid 2-ethylhexylester, 2-Ethylhexyl 2-propenoate. 3.2 Coast Guard Compatibility Classification: Acrylate. 3.3 Chemical Formula: $\text{CH}_2=\text{CHCOO}(\text{H}_2\text{CCH}_2)_6\text{CH}_3$. 3.4 IMCO/United Nations Numerical Designation: Not listed.	4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Colorless. 4.3 Odor: Sharp, mild ester type, inoffensive.
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Self-contained breathing apparatus, rubber gloves, vapor proof chemical safety goggles, impervious apron and boots. 5.2 Symptoms Following Exposure: Inhalation of concentrated vapor causes drowsiness and convulsions. Liquid causes irritation of eyes and may irritate skin on prolonged exposure. Ingestion produces same symptoms as inhalation. 5.3 Treatment for Exposure: INHALATION: Give artificial respiration and oxygen if necessary. Call a physician. EYES: Immediately flush with plenty of water for at least 15 min. Get medical attention. SKIN: Immediately flush with plenty of water for at least 15 min. INGESTION: Induce vomiting and consult a physician. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 2, oral rat LD_{50} = 1,540 mg/kg. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Vapors are not irritating to eyes and throat. 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain, may cause smarting and reddening of the skin. 5.10 Odor Threshold: Data not available.	

6 FIRE HAZARDS 6.1 Flash Point: 198 F (92 C). 6.2 Flammable Limits in Air: 0.8 - 6.4. 6.3 Fire Extinguishing Agents: Dry chemical or carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Water or foam may cause fothing. 6.5 Special Hazards of Combustion Products: Not pertinent. 6.6 Behavior in Fire: Heat can result in a severe polymerization with rapid release of energy. Sealed containers may rupture explosively if hot. 6.7 Ignition Temperature: 496 F. 6.8 Electrical Hazard: Data not available. 6.9 Burning Rate: 4.6 mm/min.	8 WATER POLLUTION 8.1 Aquatic Toxicity: 72 ppm 24 hr. Fine shrimp, H ₉₆ . 8.2 Waterflow Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): 92% of theoretical in 5 days, fresh water, acclimated seed. 8.4 Food Chain Concentration Potential: None.																																				
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: No reaction. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent. 7.5 Polymerization: Will polymerize in the absence of inhibitor and when heated. 7.6 Inhibitor of Polymerization: Monomethyl ether of hydroquinone, 1 - 120 ppm. Hydroquinone, 96 - 120 ppm.	9 SELECTED MANUFACTURERS 1. Celanese Chemical Company 248 Park Avenue New York, N.Y. 10017 2. Rohm and Haas Co., Inc. Independence Mall West Philadelphia, Pa. 19106 3. REVISED 1978

ELT

ETHYL LACTATE

Common Synonyms ethyl 2-hydroxyacetate ethyl 2-hydroxypropionate ethyl 2-hydroxypropanoate		Liquid	Colorless	Mild odor								
Mixes with water												
Vapors irritate the eyes, nose, throat, and respiratory tract. Ingestion causes irritation of the mouth and throat. Ingestion of large quantities may cause nausea and vomiting.												
Fire	Combustible Flammable liquid (F+), Flammable solid (F+) Flash point: 114°F (40°C) Boiling point: 121°F (49°C) Freezing point: -111°F (-80°C)											
Exposure	LIQUID Harmful if swallowed Irritant to eyes, nose, throat, and respiratory tract. Ingestion of large quantities may cause nausea and vomiting.											
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Not recommended for use in water bodies.											
1 RESPONSE TO DISCHARGE See Response: Spills Handbook, CG 446-4 Issue warning: water, start main Dispense and flush		2 LABELS No label required by Code of Federal Regulations										
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Ethyl alpha-hydroxypropionate, Ethyl 2-hydroxypropionate, Ethyl DL-lactate, Ethyl D,L-lactate, Ethyl 2-hydroxypropanoate 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: C ₅ H ₁₀ O ₃ 3.4 IMCO/United Nations Numerical Designation: 1111		4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Mild characteristic										
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Goggles, face shield, rubber gloves 5.2 Symptoms Following Exposure: Inhalation of concentrated vapor may cause drowsiness. Contact with liquid causes mild irritation of eyes and on prolonged contact with skin ingestion may cause nausea. 5.3 Treatment for Exposure: INHALATION: remove person to fresh air. EYES and SKIN: flush with water. INGESTION: induce vomiting, get medical attention. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Irritant to the GI tract, may cause nausea. 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available												
6 FIRE HAZARDS 5.1 Flash Point: 114°F (40°C) 5.2 Flammable Limits in Air: 3.5 - 11.4 5.3 Fire Extinguishing Agents: Water, dry chemical, alcohol foam, carbon dioxide 5.4 Fire Extinguishing Agents Not to be Used: Not pertinent 5.5 Special Hazards of Combustion Products: Not pertinent 5.6 Behavior in Fire: Not pertinent 5.7 Ignition Temperature: 527°F 5.8 Electrical Hazard: Data not available 5.9 Burning Rate: Data not available

NOTES												

EMC

ETHYL MERCAPTAN

Common Synonyms Ethanethiol Mercaptothane Ethyl sulfide Thioethyl alcohol	Liquid Colorless to yellow Strong skunk-like odor Floats and mixes slowly with water. Poisonous flammable vapor is produced. Boiling point is 96°F.
AVOID CONTACT WITH LIQUID AND VAPOR. KEEF PEOPLE AWAY. Wear goggles and self-contained breathing apparatus. Shut off gas supply and remove from area. Stop discharging immediately. Stay upwind. Use water spray to knock down vapor. Isolate and free any discharged material. Notify local health and safety authorities.	
Fire	FLAMMABLE POISONOUS GASES ARE PRODUCED IN FIRE. Containers may explode in fire. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Extinguish with dry chemical, carbon dioxide, or water. Water may be effective free of oil. Do not use extended outdoor water lines.
 Exposure	CAUTION: MEDICAL VAPOR POISONOUS IF INHALED. May cause irritation. If breathed, have person move to fresh air. If breathing is difficult, call a doctor. LIQUID POISONOUS IF SWALLOWED. If SWALLOWED and conscious, give 1-2 glasses of water. Do not induce vomiting. If SWALLOWED and unconscious, do not give anything by mouth. Call a doctor. EXPOSURE If SWALLOWED and unconscious, do not give anything by mouth. Call a doctor.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Not a health hazard. Not a pollutant. Not a pollutant of surface waters.
1 RESPONSE TO DISCHARGE See Response Methods in Section 2.5.4.4.4. Issue warning. High flammability. Aerial discharges may be flammable. Post warnings. Evacuate area. Dispose and flush.	2 LABEL 
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Ethanethiol, Ethyl mercaptan, Mercaptothane, Thioethyl alcohol. 3.2 Coast Guard Compatibility Classification: Not applicable. 3.3 Chemical Formula: C ₂ H ₅ SH 3.4 IMCO/United Nations Numerical Designation: 1275	4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless to yellow 4.3 Odor: Strong skunk-like odor
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Protective clothing and shoes. 5.2 Symptoms Following Exposure: Irritation of eyes, nose, throat, and skin. High concentrations cause unconsciousness and death. 5.3 Treatment for Exposure: INHALATION: Move to fresh air. If breathing is difficult, call a doctor. EYES: Flush with water. SKIN: Wash with soap and water. INGESTION: Do not induce vomiting. Call a doctor. 5.4 Toxicity by Inhalation (Threshold Limit Value): 1 ppm 5.5 Short-Term Inhalation Limits: 10 ppm (15 min) 5.6 Toxicity by Ingestion: Grade 3 (LD ₅₀ 1.5 g/kg) 5.7 Late Toxicity: May cause irritation of eyes, nose, throat, and skin. 5.8 Vapor (Gas) Irritant Characteristics: Irritant to eyes. 5.9 Liquid or Solid Irritant Characteristics: Irritant to skin. 5.10 Odor Threshold: 118 ppm	

6 FIRE HAZARDS 6.1 Flash Point: 40-100°C 6.2 Flammable Limits in Air: 3.5-15% 6.3 Fire Extinguishing Agents: Dry chemical, foam, carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective. 6.5 Special Hazards of Combustion Products: Breathing fumes of sulfur dioxide are generated. 6.6 Behavior in Fire: Vapor is heavier than air and may travel long distances. A source of ignition and flash back containers may explode in fire. Breathing fumes are released when heated. 6.7 Ignition Temperature: 570°C 6.8 Electrical Hazard: Data not available. 6.9 Burning Rate: Not pertinent.	8 WATER POLLUTION 8.1 Aquatic Toxicity: Data not available. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: None.								
7 CHEMICAL REACTIVITY 7.1 Reactivity with Water: Not reactive. 7.2 Reactivity with Common Materials: Not reactive. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9 SELECTED MANUFACTURERS 1. ETM

ETHYL METHACRYLATE

Common Synonyms Ethyl methacrylate inhibited Methacrylic acid, ethyl ester Ethyl 2-methacrylate Ethyl alpha-methylmethacrylate Ethyl 2-methyl-2-propenoate	Liquid Floats on water	Colorless Sharp, unpleasant odor
NFPA Hazardous Materials Classification: NFPA 220: 2.1 (Health), 2.2 (Irritation), 2.3 (Reactivity) NFPA 704: 2 (Health), 1 (Irritation), 1 (Reactivity) NFPA 704: 2 (Health), 1 (Irritation), 1 (Reactivity) NFPA 704: 2 (Health), 1 (Irritation), 1 (Reactivity)		
Fire	FLAMMABLE Containers may explode in fire. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Toxic gases may be evolved in fire. Water may be ineffective in fire. Extinguish with foam or water spray.	
Exposure	CALL FOR MEDICAL AID VAPOR Irritating to eyes, nose and throat. If inhaled will cause coughing or difficult breathing. If eyes are affected, remove contact lenses if possible and flush with water. If breathing apparatus is required, use self-contained breathing apparatus. If necessary, use full-face respirator. LIQUID Irritating to skin and eyes. If swallowed will cause nausea and vomiting. Remove contaminated clothing and shoes. Flush skin with plenty of water. If swallowed, do not induce vomiting. Give water to drink. If SWALLOWED, do not induce vomiting. If SKIN OR EYES have contact, flush with water or milk. If SWALLOWED, do not induce vomiting. If NECESSARY, use PAINKILLERS. If necessary, use full-face respirator.	
Water Pollution	Effect of low concentrations on aquatic life is unknown. Floating to shoreline. May be dangerous if it enters water intakes. NFPA 704: 2 (Health), 1 (Irritation), 1 (Reactivity) NFPA 704: 2 (Health), 1 (Irritation), 1 (Reactivity)	
1. RESPONSE TO DISCHARGE See Response Methods Handbook, CG 446-4. Issue water, high flammability. Remove excess. Mechanical containment. Should be removed. Chemical and physical treatment.		2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Ethyl 2-methacrylate, Ethyl methacrylate, inhibited, Ethyl alpha-methylmethacrylate, Ethyl 2-methyl-2-propenoate, Methacrylic acid, ethyl ester. 3.2 Coast Guard Compatibility Classification: Aries 1. 3.3 Chemical Formula: CH ₃ CH=CHCOOCH ₂ CH ₃ 3.4 IMCO/United Nations Numerical Designation: Not listed.		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Colorless. 4.3 Odor: Acrid, sick.
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: In persons gloves, splash goggles, self-contained breathing apparatus if exposed to vapors or mists. 5.2 Symptoms Following Exposure: Inhalation may cause irritation to the upper respiratory tract. Ingestion may cause irritation to the mouth and stomach. Contact with liquid may cause irritation. 5.3 Treatment for Exposure: INHALATION: Remove person to fresh air. Apply artificial respiration if breathing is impaired. INGESTION: Induce vomiting. Call a physician. EYES: Wash with copious amounts of water for 15 minutes. Call a physician. SKIN: Flush with water. Wash thoroughly. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 3, LD ₅₀ 4 g/kg body wt. 5.7 Late Toxicity: Causes birth defects in experimental animals. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.		

6 FIRE HAZARDS 6.1 Flash Point: 55-100-50-100°C 6.2 Flammable Limits in Air: 1.5-11.1% 6.3 Fire Extinguishing Agents: Foam, dry chemical, carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective. 6.5 Special Hazards of Combustion Products: 6.6 Behavior in Fire: Sealed containers may rupture, explosively if hot. Heat can cause a violent polymerization reaction with rapid release of energy. Vapors are heavier than air and can travel to source of ignition and flash back. 6.7 Ignition Temperature: 740-1 6.8 Electrical Hazard: Data not available. 6.9 Burning Rate: 4 Minimum/min.	8 WATER POLLUTION 8.1 Aquatic Toxicity: Data not available. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: None.								
7 CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent. 7.5 Polymerization: If proper concentration of inhibitor is not present or when material is hot, a violent polymerization reaction may occur. 7.6 Inhibitor of Polymerization: Oxygen in the air inhibits polymerization.	9 SELECTED MANUFACTURERS 1 Polysciences, Inc. ETN

ETHYL NITRITE

Common Synonyms Nitrous ether Sweet spirit of nitre Spirit of ether nitrite	Liquid Colorless to light yellow Pleasant odor Floats on water. May boil on water. Boiling point 18°C (64°F)
Shut off flames or sources. Call fire department. Stop discharge if possible. Keep people away. Evacuate and remove discharging material. Notify local health and fire departments.	
Fire	FLAMMABLE POISONOUS GASES ARE PRODUCED IN FIRE. Containers may explode in fire. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Wear goggles and self-contained breathing apparatus if you have respiratory distress or are in an enclosed space. Extinguish with water. Do not use water on a leaking container.
Exposure	VAPOR If inhaled will cause headache, dizziness, or loss of consciousness. Move victim to fresh air. If breathing apparatus is not available, use mouth-to-mouth respiration. LIQUID If swallowed will cause headache or loss of consciousness. If swallowed, do not induce vomiting. Give water to drink. If swallowed, do not induce vomiting. Give water to drink.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and fire departments.
1 RESPONSE TO DISCHARGE See Response Methods Handbook, CG 446-4. Issue warning: High flammability. Restrict access. Evacuate area. Disperse and flush.	2. LABEL 
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Nitrous ether. Spirit of ether nitrite. Sweet spirit of nitre. 3.2 Coast Guard Compatibility Classification: Not applicable. 3.3 Chemical Formula: C ₂ H ₅ NO 3.4 IMCO/United Nations Numerical Designation: 1102	4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless to pale yellow 4.3 Odor: Pungent, ethereal, characteristic
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Self-contained breathing apparatus, goggles, face shield, rubber gloves. 5.2 Symptoms Following Exposure: Inhalation irritant. Skin causes headache, increased pulse rate, decreased blood pressure, and unconsciousness. Contact with liquid irritates eyes and skin. 5.3 Treatment for Exposure: INHALATION: Remove victim from exposure. If breathing has stopped, provide artificial respiration. Call physician. EYES: Flush with water. If contact with liquid, get medical attention. SKIN: Flush with water. Wash with soap and water. INGESTION: Do NOT induce vomiting. Give water to drink. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Data not available. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.	

6 FIRE HAZARDS

- 6.1 Flash Point: 18°C (64°F)
- 6.2 Flammable Limits in Air: 3.5-12.5%
- 6.3 Fire Extinguishing Agents: Water, dry chemical, foam, carbon dioxide.
- 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent.
- 6.5 Special Hazards of Combustion Products: Toxic oxides of nitrogen are generated.
- 6.6 Behavior in Fire: Vapors are heavier than air and may travel a considerable distance from source of ignition and flash back. Can decompose violently above 194°C. Containers may explode at 150°C.
- 6.7 Ignition Temperature: 194°C
- 6.8 Electrical Hazard: Data not available.
- 6.9 Burning Rate: Not pertinent.

8 WATER POLLUTION

- 8.1 Aquatic Toxicity: Data not available.
- 8.2 Waterfowl Toxicity: Data not available.
- 8.3 Biological Oxygen Demand (BOD): Data not available.
- 8.4 Food Chain Concentration Potential: None.

- 13.10 Vapor (Gas) Specific Gravity: 1.5.
- 13.11 Ratio of Specific Heats of Vapor (Gas): Data not available.
- 13.12 Latent Heat of Vaporization: 370 kcal/kg (1550 Btu/lb).
- 13.13 Heat of Combustion: 12,100 kcal/kg (50,600 Btu/lb).
- 13.14 Heat of Decomposition: Not pertinent.
- 13.15 Heat of Solution: Not pertinent.
- 13.16 Heat of Polymerization: Not pertinent.

NOTES

EPS

ETHYLPHENYLDICHLOROSILANE

Common Synonyms	Liquid Colorless Sharp irritating odor Reacts with water. Explosive gases produced on contact with water.
AVOID CONTACT WITH SKIN. IF CONTACT OCCURS, WASH IMMEDIATELY WITH WATER. AVOID CONTACT WITH EYES. IF CONTACT OCCURS, FLUSH IMMEDIATELY WITH WATER.	
Fire	Combustible POISONOUS GASES MAY BE PRODUCED IN FIRE EXTINGUISH WITH WATER
Exposure	ACUTE TOXICITY DATA GAS PRODUCED IN REACTION WITH WATER POISONOUS IF INHALED Irritating to eyes, nose and throat LIQUID Will burn skin and eyes Harmful if swallowed ENVIRONMENTAL Slightly soluble in water. Not biodegradable. Not volatile.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes.
1. RESPONSE TO DISCHARGE See Response Methods Manual: CG 444.4 Avoid running, minimize water contamination. Restrict access. Disperse and flush to waste.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: N-ethylphenyldichlorosilane 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: $C_6H_5CH_2SiCl_2$ 3.4 IMCO/United Nations Numerical Designation: 1.170	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Sharp like hydrochloric acid
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Acid vapor type respiratory protection, rubber gloves, chemical worker's goggles, other equipment as necessary to protect skin and eyes. 5.2 Symptoms Following Exposure: Inhalation irritates nose and throat. Contact with liquid causes severe burns of eyes and skin. Ingestion causes severe burns of mouth and stomach. 5.3 Treatment for Exposure: INHALATION: Remove victim to fresh air, give artificial respiration if needed, call physician. EYES: Flush with water for 15 min., obtain medical attention immediately. SKIN: Flush with water, obtain medical attention if burning has occurred. The EMISSION of extremely toxic gases, plus large amounts of water, depending on setting, get medical attention. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 1.1. Dose 1000-12 mg/kg. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause moderate irritation such that personnel will find high concentrations unpleasant. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Severe skin irritant. Causes second and third degree burns on short contact and is very toxic to the eyes. 5.10 Odor Threshold: Data not available.	

6. FIRE HAZARDS 6.1 Flash Point: $>150^{\circ}\text{F}$ (60) 6.2 Flammable Limits in Air: Data not available 6.3 Fire Extinguishing Agents: Dry chemical 6.4 Fire Extinguishing Agents Not to be Used: Water spray 6.5 Special Hazards of Combustion Products: Toxic hydrogen chloride and phosgene fumes may be formed. 6.6 Behavior in Fire: Difficult to extinguish; reignition may occur. Contact with water applied to radiant fires will generate a cloud of hydrogen chloride gas. 6.7 Ignition Temperature: Data not available 6.8 Electrical Hazard: Data not available 6.9 Burning Rate: Not pertinent	8. WATER POLLUTION 8.1 Aquatic Toxicity: Data not available 8.2 Waterfowl Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): Data not available 8.4 Food Chain Concentration Potential: None																												
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: Reacts with water to generate hydrogen chloride, then hydrochloric acid. 7.2 Reactivity with Common Materials: Will react with surface moisture to evolve hydrogen chloride which is corrosive to common metals. 7.3 Stability During Transport: Stable 7.4 Neutralizing Agents for Acids and Caustics: Flush with water, ring with sodium bicarbonate or some solution. 7.5 Polymerization: Not pertinent 7.6 Inhibitor of Polymerization: Not pertinent	9. EPD

ETHYL PHOSPHONOTHIOIC DICHLORIDE, ANHYDROUS

Common Symptoms		Liquid	Colorless	Choking odors
Effect: Choking odors if dichloride		Reacts with water. Poisonous gas is produced on contact with water.		
No data available on possible health effects. (Excludes phosphorus dichloride) No data available on possible health effects.				
Fire	Combustible POISONOUS GASES ARE PRODUCED IN FIRE. Wear proper and sufficient respiratory apparatus. Extinguish with dry chemical or carbon dioxide. DO NOT USE WATER OR FOAM ON FIRE.			
	CALL FOR MEDICAL AID. GAS PRODUCED IN REACTION WITH WATER POISONOUS IF INHALED. Irritating to eyes, nose and throat. May be harmful if breathed. If breathed has a rapid onset of respiratory distress and breathing is difficult after exposure. INGESTION Irritating to skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED, do not induce vomiting. Seek medical aid at once.			
Exposure				
Water Pollution	Effect of low concentrations on aquatic life unknown. May be dangerous if it enters water intakes. No data available on biodegradability. No data available on persistence in the environment.			
1. RESPONSE TO DISCHARGE See Response Handling Manual, CG 446-6. Avoid contact with water. Contaminant. Reacts with water. Dispense and flush with water.		2. LABEL 		
3. CHEMICAL DESIGNATION* 3.1 Synonym: Ethyl phosphonothioic dichloride. (Excludes phosphorus dichloride) 3.2 Coast Guard Compatibility Classification: Not applicable. 3.3 Chemical Formula: C ₂ H ₄ Cl ₂ P ₂ S ₂ 3.4 IMCO/United Nations Numerical Designation: 1.102		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Astringent, chlorine		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Air mask, rubber or neoprene gloves, goggles, goggles. 5.2 Symptoms Following Exposure: Irritation to eyes, nose, throat, and skin. If inhaled, symptoms may be delayed 24 hours. If inhaled, symptoms may be delayed 24 hours. If inhaled, symptoms may be delayed 24 hours. If inhaled, symptoms may be delayed 24 hours. 5.3 Treatment for Exposure: INHALATION: Remove victim from exposure. Oxygen can be used if pulmonary symptoms develop. If necessary, give complete rest. Because effects may be delayed 24 hours, continue observation for 24 hours. If symptoms develop, give medical attention. INGESTION: Give large amounts of water and induce vomiting. Do not induce vomiting if patient is unconscious. SKIN: Wash thoroughly with soap and water. EYES: Flush with water for 15 minutes. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 2.1 (Data not available). 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.				

6. FIRE HAZARDS 6.1 Flash Point: Data not available. 6.2 Flammable Limits in Air: Data not available. 6.3 Fire Extinguishing Agents: Dry chemical or carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Water, foam. 6.5 Special Hazards of Combustion Products: Oxides of sulfur, phosphorus, hydrogen chloride and phosgene. 6.6 Behavior in Fire: On contact with water or exposed to adjacent fires will produce irritating fumes of hydrogen chloride. 6.7 Ignition Temperature: Data not available. 6.8 Electrical Hazard: Data not available. 6.9 Burning Rate: Data not available.	8. WATER POLLUTION 8.1 Aquatic Toxicity: Data not available. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: None.
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: Reacts with water to produce hydrogen chloride (hydrochloric acid). 7.2 Reactivity with Common Materials: Will react with surface materials to produce hydrogen chloride, which may corrode common metals. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Flood with water. If fire with sodium bicarbonate or other suitable agent. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9. NOTES	

EPP

ETHYL PHOSPHORODICHLORIDATE

Common Synonyms Phosphorodichloric acid ethyl ester Ethyl dichlorophosphate		Liquid Reacts with water. Irritating gas is produced on contact with water.	Colorless	Choking odor
AVOID CONTACT WITH LIQUID AND VAPOR. KEEP PEOPLE AWAY. Wear self-contained breathing apparatus and protective clothing, including gloves. Stop discharge if possible. Isolate and remove discharged material. Notify local health and pollution control agencies.				
Fire		Fire data not available		
Exposure		Call for medical aid. VAPOR Irritating to eyes, nose and throat. Harmful if inhaled. Move victim to fresh air. If breathing is difficult, give oxygen. LIQUID Will burn skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk. DO NOT INDUCE VOMITING.		
Water Pollution		Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.		
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446.4) Issue warning: corrosive water, contaminant. Restrict access. Disperse and flush with care.		2 LABEL 		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Ethyl dichlorophosphate Phosphorodichloric acid ethyl ester 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: C ₂ H ₄ OCl ₂ P ₂ O 3.4 IMCO/United Nations Numerical Designation: N/1760		4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Acidic, choking		
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Goggles and face shield, self-contained or air-line respirator, rubber gloves, boots, and clothing. 5.2 Symptoms Following Exposure: Inhalation of vapor irritates nose and throat. Contact with liquid causes severe burns of eyes and skin. Ingestion causes severe burns of mouth and stomach. 5.3 Treatment for Exposure: INHALATION: remove victim from exposure; if his breathing has stopped, start artificial respiration; call a doctor. EYES: flush with water for at least 15 min; get medical attention for burns. SKIN: flush with water; get medical attention for burns. INGESTION: do NOT induce vomiting; give large amounts of water, followed by milk or milk of magnesia. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Data not available. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.

NOTES

EPA

2-ETHYL-3-PROPYLACROLEIN

Common Synonyms 2-Ethyl-2-butenal 2-Ethyl-3-propylacrylaldehyde	Liquid Yellow Floats on water
Accidental Release Wear goggles, suit, gloves, and other appropriate protective clothing including shoes. Notify local fire department. Notify local health department. Notify local environmental agency.	
Fire	Combustible Will burn. If in contact with apparatus and rubber covered things, melted glass. Extinguish with dry chemical or carbon dioxide. Do not spread contamination with water.
Exposure	CAUTION MEDICAL AID LIQUID Will burn skin and eyes. Harmful if swallowed. Run water into affected clothing and flush. Flush affected areas of skin with water. IF IN EYES, hold eyes open and flush with plenty of water. IF SWALLOWED, get person to CONSIDER having to drink water.
Water Pollution	Effect of low concentrations on aquatic life is unknown. Fouling to shoreline. May be dangerous if it enters water intakes. Notify local health department. Notify local environmental agency.
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446.2) Mechanical containment Should be removed Chemical and physical treatment	2 LABELS No hazard label required by Code of Federal Regulations
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: 2-Ethyl-2-butenal 2-Ethyl-3-propylacrylaldehyde 3.2 Coast Guard Compatibility Classification: Aldehyde 3.3 Chemical Formula: $\text{CH}_3\text{CH}_2\text{CH}=\text{CHCO}_2\text{H}$ 3.4 IMCO/United Nations Numerical Designation: 1.1 (19)	4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Yellow 4.3 Odor: Sharp, powerful, irritating
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Protective clothing, eye protection, approved respirator for high vapor concentrations. 5.2 Symptoms Following Exposure: Vapor is irritating. Contact produces skin and eye irritation. 5.3 Treatment for Exposure: Remove from exposure. Wash affected areas of body with water for 15 min. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 2 LD ₅₀ 0.5 to 5 g/kg (rat). 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Vapor is moderately irritating such that personnel will not usually tolerate moderate or high vapor concentrations. 5.9 Liquid or Solid Irritant Characteristics: Causes smothering of the skin and first degree burns on short exposure, may cause secondary burns on long exposure. 5.10 Odor Threshold: Data not available.

REVISED 1976

Common Synonym		Waters: liquid		Colorless		Mild odor	
Tetraethyl silicate Silibond Tetraethyl orthosilicate Ethyl orthosilicate Ethyl silicate 40 Ethyl silicate condensed		May float or sink in water. Reacts slowly with water.					
Stop discharge if possible. Keep people away. Call fire department. Isolate and remove discharged material to protect public health and pollution environment.							
Fire		Combustible Extinguish with water. Dry chemicals. Do not use carbon dioxide.					
Exposure		Call for medical aid. LIQUID Irritating to eyes. If swallowed will cause nausea and vomiting. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. If EYES: Flush eyes for 15 minutes. Flush with plenty of water. If SWALLOWED: Do not induce vomiting. Have victim drink water if conscious. If unconscious, do not drink. If SWALLOWED and victim is unconscious, DO NOT INDUCE VOMITING. If SWALLOWED and victim is conscious, DO NOT INDUCE VOMITING. If SWALLOWED and victim is conscious, DO NOT INDUCE VOMITING.					
Water Pollution		Effect of low concentrations on aquatic life is unknown. Polluting to shoreline. May be dangerous if it enters water intakes. No direct health hazard to humans. No significant effect on aquatic life.					
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4)				2. LABELS			
Disperse and flush.				No label required by Code of Federal Regulations.			
3 CHEMICAL DESIGNATIONS				4 OBSERVABLE CHARACTERISTICS			
3.1 Synonyms: Ethyl orthosilicate, Ethyl silicate 40, Ethyl silicate, condensed, Silibond, Tetraethyl orthosilicate, Tetraethyl silicate. 3.2 Coast Guard Compatibility Classification: Not applicable. 3.3 Chemical Formula: $(C_2H_5)_4SiO_2$. 3.4 IMCO/United Nations Numerical Designation: 1.3, 2.2.				4.1 Physical State (as shipped): Liquid. 4.2 Color: Colorless. 4.3 Odor: Mild and non-oxidizing.			
5 HEALTH HAZARDS							
5.1 Personal Protective Equipment: Rubber or polyethylene gloves, safety glasses or other form of eye protection, self-contained breathing apparatus or one that absorbs organic vapors. 5.2 Symptoms Following Exposure: Inhalation of vapor causes eye and nose irritation, unsteadiness, tremors, salivation, respiratory difficulty, and unconsciousness. Contact with liquid irritates eye and may cause dryness, cracking, and inflammation of skin. Ingestion may produce nausea, vomiting, and cramps. 5.3 Treatment for Exposure: INHALATION: move patient from contaminated atmosphere if his breathing has ceased, start mouth-to-mouth artificial respiration; oxygen if available should be administered only by an experienced person when authorized by a physician; keep patient warm and comfortable; call physician immediately. EYES: flush immediately with large quantities of running water for at least 15 min.; obtain medical attention if irritation persists. SKIN: immediately flush affected areas with large volumes of water; obtain medical attention if irritation persists. INGESTION: give large amounts of water or warm salty water and induce vomiting; milk, eggs or olive oil may then be given; obtain medical attention if abdominal discomfort persists. 5.4 Toxicity by Inhalation (Threshold Limit Value): 100 ppm. 5.5 Short-Term Inhalation Limit: 300 ppm for 30 min. 5.6 Toxicity by Ingestion: Data not available. 5.7 Late Toxicity: Liver, kidney, and lung damage may result from overexposures by inhalation or ingestion. 5.8 Vapor (Gas) Irritant Characteristics: Data not available.

5 HEALTH HAZARDS (Cont'd.)

5.9 Liquid or Solid Irritant Characteristics: Data not available

5.10 Odor Threshold: 85 ppm

ETHYLTRICHLOROSILANE

Common Synonyms Trichloroethyl silane Ethylsilane trichloride Ethylsilane trichlorosilane Trichloroethyl siloxane	Liquid Reacts violently with water. Irritating gas is produced on contact with water.	Colorless Sharp irritating odor
AVOID CONTACT WITH EYES, SKIN AND AIR. KEEP PEOPLE AWAY Wear goggles. Use contained breathing apparatus and self-rescuer if doing breathing apparatus. Shut off ignition sources. Call fire department. Self-rescuer if possible. Isolate and remove discharged material. Notify local health and pollution control agencies.		
Fire	FLAMMABLE POISONOUS GASES ARE PRODUCED IN FIRE Containers may explode in fire. Rapid fire along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Wear goggles and self-contained breathing apparatus. Extinguish with dry chemical, carbon dioxide or foam. Water may be ineffective in fire. Use of exposed containers with water.	
Exposure	First aid for medical aid. VAPOR Irritating to eyes, nose and throat. If inhaled will cause difficult breathing. Move victim to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. LIQUID Will burn skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. If in EYES, hold eye closed and flush with plenty of water. IF SWALLOWED, do not induce vomiting. Have victim drink water if able. DO NOT INDUCE VOMITING.	
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and pollution officials. Notify operators of nearby water intakes.	
1. RE. ONSE TO DISCHARGE (See Response Methods Manual, CG 444-4) Issue warning: high flammability Confine Restrict access Dispense: under pressure 3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Ethylsilane, trichloride Ethylsilane trichloride Trichloroethylsilane Trichloroethylsilane 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: C₂H₅SiCl₃ 3.4 IMCO/United Nations Numerical Designation: 1.2+1196	2. LABEL  4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Sharp hydrochloric acid like pungent acid	
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Full protective clothing and vapor type respirators protection rubber gloves chemical worker's goggles other equipment as necessary to protect skin and eyes 5.2 Symptoms Following Exposure: Inhalation causes irritation of nose and throat. Contact with liquid causes severe burns of eyes and skin. Ingestion causes burns of mouth and stomach. 5.3 Treatment for Exposure: INHALATION: remove victim from exposure administer artificial respiration if breathing has stopped call physician EYES: flush with water for 15 minutes obtain medical attention immediately SKIN: flush with water obtain medical attention immediately if irritation persists INGESTION: give large amounts of water get medical attention 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 2, oral LD₅₀ = 1,370 mg/kg (rat) 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Vapor causes severe irritation of eyes and throat and can cause eye and lung injury. They cannot be tolerated even at low concentrations. 5.9 Liquid or Solid Irritant Characteristics: Severe skin irritant. Causes second and third degree burns on short contact. Causes severe injury to the eyes. 5.10 Odor Threshold: Data not available		

6 FIRE HAZARDS 6.1 Flash Point: 57 °C 6.2 Flammable Limits in Air: Data not available 6.3 Fire Extinguishing Agents: Dry chemical, alcohol foam, carbon dioxide 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective 6.5 Special Hazards of Combustion Products: Toxic hydrogen chloride and phosgene gases, a form 6.6 Behavior in Fire: Vapors lighter than air and may travel a considerable distance to a source of ignition and flash back. Difficult to extinguish; re-ignition may occur. Contact with water applied to adjacent fires will produce irritating hydrogen chloride fumes 6.7 Ignition Temperature: Data not available 6.8 Electrical Hazard: Data not available 6.9 Burning Rate: 2.0 mm/min	8 WATER POLLUTION 8.1 Aquatic Toxicity: Data not available 8.2 Waterflow Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): Data not available 8.4 Food Chain Concentration Potential: None																																				
7 CHEMICAL REACTIVITY 7.1 Reactivity with Water: Reacts vigorously, evolving hydrogen chloride and hydrochloric acid 7.2 Reactivity with Common Materials: Reacts with surface moisture to form hydrogen chloride, which is corrosive to common metals 7.3 Stability During Transport: Stable 7.4 Neutralizing Agents for Acids and Caustics: Flood with water, rinse with sodium bicarbonate or lime solution 7.5 Polymerization: Not pertinent 7.6 Inhibitor of Polymerization: Not pertinent	9 SELECTED MANUFACTURERS 1. Union Carbide Corporation Chemicals and Plastics Div. 270 Park Avenue New York, N.Y. 10017 2. Dow Corning Corporation P.O. Box 592 Midland, Mich. 48640 3. Petrarich Systems P.O. NOTES

FAC

FERRIC AMMONIUM CITRATE

Common Synonyms Ammonium ferric citrate Ferric ammonium citrate, brown Ferric ammonium citrate, green		Solid	Red, green or brown	Odorless
		Sinks and moves slowly with water		
Avoid contact with solid and dust. Keep people away. Stop discharge if possible. In lab and room are: Inhaled: irritates eyes, nose and throat. No data on health and pollution effects of this chemical.				
Fire	Not flammable			
Exposure	CUTE FOR MEDICAL AID DUST Irritating to eyes, nose and throat If inhaled will cause coughing or difficult breathing If in eyes: If eyes are open and there is a place to wash If breathing has stopped, give artificial respiration If breathing is difficult, give oxygen SOLID Irritating to skin and eyes If swallowed will cause nausea and vomiting Run if contaminated clothing catches fire If on affected areas with plenty of water IF IN EYES: hold eyelids open and flush with plenty of water IF SWALLOWED and it is not a CONSUMABLE: also clean mouth with water or milk IF SWALLOWED and it is not a CONSUMABLE: DO NOT INDUCE VOMITING If vomiting occurs, keep person lying down			
Water Pollution	Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes. No data on health and pollution effects of this chemical. No data on health and pollution effects of this chemical.			
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Disperse and flush		2 LABELS No hazard label required by Code of Federal Regulations		
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Ammonium ferric citrate Ferric ammonium citrate, brown Ferric ammonium citrate, green 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: Mixture of $\text{Fe}(\text{C}_6\text{H}_5\text{O}_7)_3$ and water of hydration 3.4 IMCO/United Nations Numerical Designation: Not listed		4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: Red, green or brown 4.3 Odor: None		
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Approved respirator for nuisance dust, chemical goggles or face shield 5.2 Symptoms Following Exposure: Inhalation of dust irritates nose and throat. Ingestion causes irritation of mouth and stomach. Dust irritates eyes and causes mild irritation of skin on prolonged contact 5.3 Treatment for Exposure: INGESTION: give large amount of water. EYES or SKIN: flush with water 5.4 Toxicity by Inhalation (Threshold Limit Value): 1 mg/m ³ (as dust) 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Data not available 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available				

6 FIRE HAZARDS

- 6.1 Flash Point: Not flammable
 6.2 Flammable Limits in Air: Not flammable
 6.3 Fire Extinguishing Agents: Not pertinent
 6.4 Fire Extinguishing Agents Not to be Used:
 6.5 Special Hazards of Combustion Products:
 Toxic oxides of nitrogen or ammonia gas may be formed in fires.
 6.6 Behavior in Fire:
 6.7 Ignition Temperature: Not pertinent
 6.8 Electrical Hazard: Not pertinent
 6.9 Burning Rate: Not pertinent

8 WATER POLLUTION

- 8.1 Aquatic Toxicity: Data not available
 8.2 Waterlow Toxicity: Data not available
 8.3 Biological Oxygen Demand (BOD):
 Data not available
 8.4 Food Chain Concentration Potential:
 None

9. SELECTED MANUFACTURERS

- Pfizer Chemicals Div.
234 E. 42nd St.
New York, N.Y. 10017
- Mallinckrodt Chemical Works
223 Westside Ave.
P.O. Box 384
Jersey City, N.J. 07303
- Gairland Schlesinger Chemical Mfg. Co.
584 Mincola Ave.
Carle Place, N.Y. 11514

7. CHEMICAL REACTIVITY

- 7.1 Reactivity with Water: No reaction
 7.2 Reactivity with Common Materials:
 7.3 Stability During Transport: Stable
 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent
 7.5 Polymerization: Not pertinent
 7.6 Inhibitor of Polymerization: Not pertinent

10 SHIPPING INFORMATION

- 10.1 Grades or Purity: Commercial
 10.2 Storage Temperature: Ambient
 10.3 Inert Atmosphere: No requirement
 10.4 Venting: Open

11 HAZARD ASSESSMENT CODE

(See Hazard Assessment Handbook, CG 446-3)
 SS

13 PHYSICAL AND CHEMICAL PROPERTIES

- 13.1 Physical State at 15° and 1 atm: Solid
 13.2 Molecular Weight: Not pertinent (mixture)
 13.3 Boiling Point at 1 atm: Not pertinent (decomposes)
 13.4 Freezing Point: Not pertinent
 13.5 Critical Temperature: Not pertinent
 13.6 Critical Pressure: Not pertinent
 13.7 Specific Gravity: 1.8 at 20°C (solid)
 13.8 Liquid Surface Tension: Not pertinent
 13.9 Liquid-Water Interfacial Tension: Not pertinent
 13.10 Vapor (Gas) Specific Gravity: Not pertinent
 13.11 Ratio of Specific Heats of Vapor (Gas): Not pertinent
 13.12 Latent Heat of Vaporization: Not pertinent
 13.13 Heat of Combustion: Not pertinent
 13.14 Heat of Decomposition: Not pertinent
 13.15 Heat of Solution: Not pertinent
 13.16 Heat of Polymerization: Not pertinent

12 HAZARD CLASSIFICATIONS

- 12.1 Code of Federal Regulations: Not listed
 12.2 NAS Hazard Rating for Bulk Water Transport: Not listed
 12.3 NFPA Hazard Classifications: Not listed

NOTES

FERRIC AMMONIUM OXALATE

Common Synonyms Ammonium ferric oxalate trihydrate Ammonium trioxalatoferrate trihydrate	Solid powder Yellowish-green Light burnt sugar odor	Sinks and mixes with water
Fire	Not flammable POISONOUS GASES MAY BE PRODUCED WHEN HEATED	
Exposure	CALL FOR MEDICAL AID DUST Irritating to eyes, nose and throat If inhaled will cause coughing or difficult breathing It causes irritation upon contact with skin or water If inhaled may cause irritation of the respiratory tract It may irritate the eyes, nose and throat SOLID Will burn skin and eyes If swallowed will cause nausea and vomiting It may cause irritation of the skin and eyes Food and beverages with peroxide of water IF IN EYES: Flush eyes with plenty of water IF SWALLOWED: Do not induce vomiting. Give water to drink IF SWALLOWED: Do not induce vomiting. Give water to drink IF SWALLOWED: Do not induce vomiting. Give water to drink IF SWALLOWED: Do not induce vomiting. Give water to drink	
Water Pollution	Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes Not recommended for use in water bodies Not recommended for use in water bodies	
1 RESPONSE TO DISCHARGE See Response Methods Handbook (O-644-4) Is a warning water contaminant Disperse and flush	2 LABELS No hazard label required by Code of Federal Regulations	
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Ammonium ferric oxalate trihydrate Ammonium trioxalatoferrate trihydrate 3.2 Coast Guard Compatibility Classification Not listed 3.3 Chemical Formula: $\text{Fe}(\text{NH}_4)(\text{C}_2\text{O}_4)_3 \cdot 3\text{H}_2\text{O}$ 3.4 IMCO/United Nations Numerical Designation: Not listed	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: Yellowish green 4.3 Odor: Light burnt sugar odor	
5. HEALTH HAZARDS		
5.1 Personal Protective Equipment: Approved dust respirator, rubber or plastic eye shield, gloves, chemical goggles or face shield 5.2 Symptoms Following Exposure: Inhalation of dust may cause irritation of nose and throat. Ingestion causes burning pain in throat and stomach. Muscular weakness, headache, white crass also causes vomiting, weak pulse, card. muscular collapse and death. Contact with dust irritates eyes and skin may cause severe skin burns 5.3 Treatment for Exposure: Treat victim promptly. INHALATION: move to fresh air, get medical attention. If symptoms persist. INSTILLATION: give immediately a dilute solution of any soluble substance, such as calcium lactate, lime water, chalk or milk, induce vomiting, get medical attention. A skin or eye contact of the dust is and delayed contact of exophthalmos. FLUSH: flush with water and get medical attention. SKIN: flush with water 5.4 Toxicity by Inhalation (Threshold Limit Value): Long term exposure 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Data not available 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available

FCL

FERRIC CHLORIDE

Common Synonyms Iron III chloride Iron perchloride Iron trichloride Ferric chloride anhydrous Ferric chloride, hexahydrate		Solid Greenish black Odorless Sinks and mixes with water
Avoid contact with skin and eyes. If contact occurs, wash immediately with large amounts of water. If swallowed, do not induce vomiting. Seek medical attention immediately.		
Fire	Not flammable	
Exposure	CALL FOR MEDICAL AID DUST Irritating to eyes, nose and throat. If inhaled will cause coughing or difficult breathing. SOLID Will burn skin and eyes. If swallowed will cause nausea and vomiting. IF SWALLOWED: Do not induce vomiting. If swallowed, do not induce vomiting. If swallowed, do not induce vomiting.	
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes.	
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Disperse and flush		2. LABELS No hazard label required by Code of Federal Regulations
3. CHEMICAL DESIGNATIONS 3 Synonyms: Ferric chloride anhydrous Ferric chloride hexahydrate, Iron (III) chloride, Iron perchloride, Iron trichloride 32 Coast Guard Compatibility Classification: Not listed 33 Chemical Formula: FeCl ₃ or FeCl ₃ ·6H ₂ O 34 IMCO/United Nations Numerical Designation: N 1774		4. OBSERVABLE CHARACTERISTICS 41 Physical State (as shipped): Solid 42 Color: Anhydrous: greenish black Hydrate: brown 43 Odor: None
5. HEALTH HAZARDS 51 Personal Protective Equipment: Dust respirator if required; rubber apron and heavy chemical worker's goggles or face shield 52 Symptoms Following Exposure: Inhalation of dust may irritate nose and throat. Ingestion causes irritation of mouth and stomach. Dust in late eyes. Prolonged contact with skin causes irritation and burns. 53 Treatment for Exposure: INGESTION: Give large amounts of water; induce vomiting if large amounts have been swallowed. EYES: Immediately flush with streams of water for at least 15 minutes; get medical attention promptly. SKIN: Flush with water. 54 Toxicity by Inhalation (Threshold Limit Value): 1 mg/m ³ (airborne) 55 Short-Term Inhalation Limits: Data not available 56 Toxicity by Ingestion: Grade 2.1 Dose: 5 g/kg (rat) 57 Late Toxicity: Data not available 58 Vapor (Gas) Irritant Characteristics: Not pertinent 59 Liquid or Solid Irritant Characteristics: Data not available 510 Odor Threshold: Data not available		

6. FIRE HAZARDS 61 Flash Point: Not flammable 62 Flammable Limits in Air: Not flammable 63 Fire Extinguishing Agents: Not pertinent 64 Fire Extinguishing Agents Not to be Used 65 Special Hazards of Combustion Products: Irritating hydrogen chloride fumes may form in fire 66 Behavior in Fire: 67 Ignition Temperature: Not pertinent 68 Electrical Hazard: Not pertinent 69 Burning Rate: Not pertinent	8. WATER POLLUTION 81 Aquatic Toxicity: 1.2 ppm 144 hr stickleback harmful fresh water 1 ppm 240 hr stickleback safe fresh water 15 ppm 96 hr daphnia 11 m fresh water 82 Waterflow Toxicity: Data not available 83 Biological Oxygen Demand (BOD): None 84 Food Chain Concentration Potential: None
7. CHEMICAL REACTIVITY 71 Reactivity with Water: No reaction 72 Reactivity with Common Materials: Water solutions are acidic and corrosive to most metals 73 Stability During Transport: Stable 74 Neutralizing Agents for Acids and Caustics: Flush with water; rinse with dilute sodium bicarbonate or soda ash solutions 75 Polymerization: Not pertinent 76 Inhibitor of Polymerization: Not pertinent	9. SELECTED MANUFACTURERS 1 Pennwalt Corp Three Parkway Philadelphia, Pa. 19102 2 Dow Chemical Co Midland, Mich. 48640 3 J. T. Baker Chemical Co Phillipsburg, N. J. 08865

NOTES	

FCP

FERRIC GLYCEROPHOSPHATE

Common Synonyms		Solid	Greenish brown to greenish yellow
		Sinks and mixes with water	
Avoid contact with solid and dust. Keep people away. Stop discharge if possible. Isolate and remove discharged material. Notify local water authority and local health department.			
Fire	Not flammable		
Exposure	CALL FOR MEDICAL AID DUST Irritating to eyes, nose and throat. If inhaled will cause coughing or difficult breathing. If in eyes, flush eyes open and flush with plenty of water. If on face, flush with plenty of water and if still on face, breathe fresh air. If breathing is difficult, use oxygen. SOLID Irritating to skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected area with plenty of water. If IN EYES, flush eyes open and flush with plenty of water. If SWALLOWED and victim is CONSCIOUS, have victim drink water and have victim spit it out. If SWALLOWED and victim is UNCONSCIOUS OR HAVING SEIZURES, do nothing except keep victim warm.		
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify authorities if low level threat. Notify authorities if health water intakes.		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Dispense and flush		2. LABELS No hazard label required by Code of Federal Regulations.	
3. Continued on page 1 and 4 NOTES	

FNT	FERRIC NITRATE
-----	----------------

FNT	FERRIC NITRATE
-----	----------------

Common Synonyms Ferric nitrate nonahydrate Nitric acid, iron(III) salt		Solubility Green, colorless to pale violet Odorless
Sinks and mixes with water		
As solid, it will sublimate just as easily as it dissolves. Sublimation is reversible. Isotonic and tends to discharge 1 material. Not a health hazard. Pollution: Not aggressive.		
Fire	Not flammable Will increase the intensity of a fire. The solids, if ignited, will burn.	
Exposure	CALL FOR MEDICAL AID DUST Irritating to eyes, nose and throat If inhaled will cause coughing or difficult breathing If it comes to nose, rubs up nose, flush with plenty of water If breathing becomes difficult, get to fresh air immediately If breathing is difficult, get to fresh air SOLID Irritating to skin and eyes Harmful if swallowed If on skin, wash immediately with plenty of water If on face, get to eye doctor with plenty of water If IN EYES, flush eyes open and flush with plenty of water If SWALLOWED and victim is CONSCIOUS, have victim drink water or milk and have victim induce vomiting If SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, Do nothing except keep victim awake	
Water Pollution	Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes Not a water quality problem Not a pollution problem in water bodies	
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Disperse and flush		2. LABELS No hazard label required by Code of Federal Regulations
3. FAS

FERROUS AMMONIUM SULFATE

Common Synonyms: Mohr's salt Iron ammonium sulfate Ferrous ammonium sulfate hexahydrate	Solid	Pale blue-green	Odorless
	Sinks and mixes slowly with water		
As a general rule, the following information is provided for the purpose of providing a basis for the user to determine the appropriate protective measures to be taken. The user should consult the appropriate regulatory agencies for more detailed information.			
Fire	No. flammable		
Exposure	ALL FORMS: ALL AGES DUST Irritating to eyes, nose and throat. If inhaled will cause coughing or difficult breathing. If inhaled in large amounts may cause irritation of the respiratory tract. If swallowed may cause irritation of the mouth and stomach. If swallowed in large amounts may cause irritation of the digestive tract. SOLID Irritating to skin and eyes. If swallowed will cause nausea and vomiting. If swallowed in large amounts may cause irritation of the digestive tract. If swallowed in large amounts may cause irritation of the digestive tract. If swallowed in large amounts may cause irritation of the digestive tract.		
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes.

NOTES

FEC

FERROUS CHLORIDE

Common Synonyms: Iron dichloride Iron protochloride Ferrous chloride tetrahydrate	Solid Pale green Odorless Sinks and mixes freely with water
No discharge prevention Avoid contact with skin and eyes Avoid contact with clothing No special handling instructions	
Fire	Not flammable
Exposure	CALL FOR MEDICAL AID DUST Irritating to eyes, nose and throat. If inhaled will cause difficult breathing. If in contact with skin or clothing, remove contaminated clothing and wash exposed areas with plenty of water. SOLID Irritating to skin and eyes. If swallowed will cause nausea and vomiting. Flush the mouth with water and spit out. If in eyes, wash with plenty of water for at least 15 minutes. If swallowed, do not induce vomiting. Give a glass of water to drink. If swallowed, do not induce vomiting. Give a glass of water to drink.
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS. May be dangerous if it enters water intakes. No restrictions on disposal.
1. RESPONSE TO DISCHARGE See Response Methods Handbook, CG 446-41 Disperse and flush	2. LABELS No hazard label required by Code of Federal Regulations

NOTES	

FFB

FERROUS FLUOROBORATE

Common Synonyms Ferrous borofluoride	Liquid Yellow-green Sinks and mixes with water
AVOID CONTACT WITH LIQUID AND VAPOR. KEEPTIGHTLY AWAY FROM HEAT, FLAME, AND OPEN FLAMES. Do not breathe dust or fumes. Do not get on skin or clothes. Do not get in eyes, nose, or mouth. Do not swallow.	
Fire	Not flammable Irritating gases may be produced when heated
 Exposure	ALL TOP MEMBERS VAPOR POISONOUS IF INHALED Irritating to skin and eyes If swallowed will cause nausea and vomiting If in eyes, flush with water for at least 15 minutes If swallowed, do not induce vomiting. Seek medical attention immediately.
Water Pollution	Effect of low concentration on aquatic life is unknown May be dangerous if it enters water intakes Do not discharge into water bodies
1 RESPONSE TO DISCHARGE See Response Methods Manual (Form CG 445-4) Toxic materials - water contamination Dispersal and flush	2. LABELS No hazard label required by Code of Federal Regulations

FFX

FLUORINE

Common Synonyms		Liquefied gas	Clear to yellow	Very irritating odor
Liquid sinks and boils in water. Poisonous visible vapor cloud is produced.				
AVOID CONTACT WITH LIQUID AND VAPOR. KEEP PEOPLE AWAY. Wear chemical protective suit. Stop discharge if possible. Evacuate area in case of large discharge. Notify local health and pollution control agencies.				
Fire		Not flammable WILL CAUSE FIRE AND REACT VIOLENTLY WITH COMBUSTIBLES. POISONOUS GAS IS PRODUCED IN FIRE. Wear chemical protective suit with self-contained breathing apparatus. Combat fires from behind barrier with ammonia hose holder or monitor nozzle. Cool exposed containers with water.		
Exposure		CALL FOR MEDICAL AID VAPOR POISONOUS IF INHALED Irritating to eyes. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. LIQUID Will burn skin and eyes. Will cause frostbite. Flush affected areas with plenty of water. If in EYES, hold eyes open and flush with plenty of water. DO NOT RUB AFFECTED AREAS.		
Water Pollution		HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.		
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446.7.) Issue warning. Isolate. Restrict access. Evacuate area.		2. LABELS OXIDIZER POISON		
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: No common synonyms. 3.2 Coast Guard Compatibility Classification: Not applicable. 3.3 Chemical Formula: F ₂ 3.4 IMCO/United Nations Numerical Designation: 2.0 1045		4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Compressed gas. 4.2 Color: Pale yellow. 4.3 Odor: Strong pungent intense.		
5 HEALTH HAZARDS				
5.1 Personal Protective Equipment: Tight fitting chemical goggles specified during not only ignited by fluorine gas.				
5.2 Symptoms Following Exposure: Severe burning of eyes, skin and respiratory system. The burns may develop slowly after exposure.				
5.3 Treatment for Exposure: Flush all affected parts with water for at least 15 min. Do NOT use ointments. Administer artificial respiration and oxygen if required.				
5.4 Toxicity by Inhalation (Threshold Limit Value): 1 ppm.				
5.5 Short-Term Inhalation Limits: 0.5 ppm for 5 min.				
5.6 Toxicity by Ingestion: Not pertinent.				
5.7 Late Toxicity: Severe burns may develop slowly after exposure.				
5.8 Vapor (Gas) Irritant Characteristics: Vapors cause severe irritation of eye and throat and can cause eye and lung injury. They cannot be tolerated even at low concentrations.				
5.9 Liquid or Solid Irritant Characteristics: Severe skin irritant. Causes second and third degree burns on short contact and is very injurious to the eyes.				
5.10 Odor Threshold: 0.025 ppm.				

6 FIRE HAZARDS		8 WATER POLLUTION	
6.1	Flash Point: Not flammable	8.1	Aquatic Toxicity: 2.5 ppm * trout, 11 mg/l in water * Time period not specified
6.2	Flammable Limits in Air: Not flammable	8.2	Waterfowl Toxicity: Data not available
6.3	Fire Extinguishing Agents: Not pertinent	8.3	Biological Oxygen Demand (BOD): None
6.4	Fire Extinguishing Agents Not to be Used: Do not direct water onto flowing leaks	8.4	Food Chain Concentration Potential: None
6.5	Special Hazards of Combustion Products: Toxic gases generated in fires involving fluorine

FLUOSILICIC ACID

Common Synonyms Hydrofluosilicic acid Hexafluorosilicic acid Silicofluoric acid Fluosilicic acid Sand acid	Liquid Sinks and mixes with water	Colorless Sharp unpleasant odor
Avoid contact with liquid and vapor. Keep personnel away. Stop discharge if possible. Isolate and remove discharged material. Notify local health and pollution control agencies.		
Fire	Not Flammable Irritating gases may be produced when heated	
Exposure	CALL FOR MEDICAL AID VAPOR Irritating to eyes, nose and throat. If inhaled will cause coughing or difficult breathing. If eyes are affected, open and flush with plenty of water. If breathing has stopped, use artificial respiration. If breathing is difficult, give oxygen. LIQUID Will burn skin and eyes. If swallowed will cause nausea. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF SWALLOWED , do not induce vomiting. Do not drink water or milk. IF SWALLOWED and you are unconscious, have someone drink water for you. Do not induce vomiting or have someone do so.	
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local authority for further action. Notify operators of water treatment works.	
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446.4.) Issue warning to toxic. Restrict access. Disperse and flush.		2. LABEL 
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Fluosilicic acid, Hexafluorosilicic acid, Hydrofluosilicic acid, Hydrogen hexafluorosilicic acid, Sand acid, Silicofluoric acid. 3.2 Coast Guard Compatibility Classification: Not listed. 3.3 Chemical Formula: H_2SiF_6 3.4 IMCO/United Nations Numerical Designation: 8.1775		4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Transparent, straw-colored, colorless. 4.3 Odor: Acid, sharp.
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Rubber gloves, safety glasses, protective clothing. 5.2 Symptoms Following Exposure: Inhalation of vapor produces severe corrosive effect on mucous membrane. Ingestion causes severe burns of mouth and stomach. Contact with liquid or vapor causes severe burns of eyes and skin. 5.3 Treatment for Exposure: INHALATION: remove person to fresh air, get medical attention. INGESTION: give large amounts of water, do NOT induce vomiting. EYES: immediately wash with water for 15 min. call physician. SKIN: wash affected parts with water, treat as for hydrogen fluoride burns with calcium gluconate solution. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Data not available. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 LD₅₀ Threshold: Data not available.		

6 FIRE HAZARDS

- 6.1 **Flash Point:** Not flammable.
 6.2 **Flammable Limits in Air:** Not flammable.
 6.3 **Fire Extinguishing Agents:** Not pertinent.
 6.4 **Fire Extinguishing Agents Not to be Used:** Not pertinent.
 6.5 **Special Hazards of Combustion Products:** Irritating fumes of hydrogen fluoride may form in fire.
 6.6 **Behavior in Fire:** Not pertinent.
 6.7 **Ignition Temperature:** Not pertinent.
 6.8 **Electrical Hazard:** Not pertinent.
 6.9 **Burning Rate:** Not pertinent.

8. WATER POLLUTION

- 8.1 **Aquatic Toxicity:** Data not available.
 8.2 **Waterfowl Toxicity:** Data not available.
 8.3 **Biological Oxygen Demand (BOD):** None.
 8.4 **Food Chain Concentration Potential:** None.

9. SELECTED MANUFACTURERS

1. W. R. Grace & Co.
 Agricultural Chemicals Group
 Baltimore, Md. 21204
 2. The Harshaw Chemical Co.
 1945 E. 97th St.
 Cleveland, OH 44106
 3. Plaford and Bauer, Inc.
 3 East 6th Ave.
 Stratford, Conn. 06602

7 CHEMICAL REACTIVITY

- 7.1 **Reactivity with Water:** No reaction.
 7.2 **Reactivity with Common Materials:** Will corrode most metals, producing flammable hydrogen gas, which may collect in enclosed spaces.
 7.3 **Stability During Transport:** Stable.
 7.4 **Neutralizing Agents for Acids and Caustics:** Flush with water, rinse with dilute solution of sodium carbonate or soda ash.
 7.5 **Polymerization:** Not pertinent.
 7.6 **Inhibitor of Polymerization:** Not pertinent.

10 SHIPPING INFORMATION

- 10.1 **Grades or Purity:** 22-40 solutions in water.
 10.2 **Storage Temperature:** Ambient.
 10.3 **Inert Atmosphere:** No requirement.
 10.4 **Venting:** Open.

11 HAZARD ASSESSMENT CODE

(See Hazard Assessment Handbook, CG 446.3.)
 A P

13. PHYSICAL AND CHEMICAL PROPERTIES

- 13.1 **Physical State at 15°C and 1 atm:** Liquid.
 13.2 **Molecular Weight:** 144.09 (solute only).
 13.3 **Boiling Point at 1 atm (water):** 212.3°C = 400.1°F = 473.1 K.
 13.4 **Freezing Point (typical):** -74 to -41°C = -103 to -20°F = 223 to 253 K.
 13.5 **Critical Temperature:** Not pertinent.
 13.6 **Critical Pressure:** Not pertinent.
 13.7 **Specific Gravity (vapor):** 1.3 at 25°C (liquid).
 13.8 **Liquid Surface Tension:** Not pertinent.
 13.9 **Liquid Water Interfacial Tension:** Not pertinent.
 13.10 **Vapor (Gas) Specific Gravity:** Not pertinent.
 13.11 **Ratio of Specific Heats of Vapor (Gas):** Not pertinent.
 13.12 **Latent Heat of Vaporization:** Not pertinent.
 13.13 **Heat of Combustion:** Not pertinent.
 13.14 **Heat of Decomposition:** Not pertinent.
 13.15 **Heat of Solution:** Not pertinent.
 13.16 **Heat of Polymerization:** Not pertinent.

12. HAZARD CLASSIFICATIONS

FSA

FLUOSULFONIC ACID

Common Synonyms Fluorosulfuric acid Fluorosulfonic acid	Liquid Colorless to light yellow Choking odor Reacts violently with water. Irritating mist and gas are produced on contact with water.
HAZARD STATEMENT H314 Causes severe skin burns and eye damage. H332 Irritating to respiratory system. H334 May cause asthma or worsen existing asthma. H373 May cause long-term health effects.	Precautionary Statement P201+P202 Attention! Read the label and take all necessary precautions. P273 Avoid release to the environment. P301+P312 In case of contact with skin, wash immediately with plenty of water. P301+P331 In case of contact with skin, remove contaminated clothing and wash immediately with plenty of water. P302+P352 In case of contact with skin, wash immediately with plenty of water. P302+P353 In case of contact with skin, wash immediately with plenty of water and consult a physician. P303+P361+P353 In case of contact with skin, remove contaminated clothing and wash immediately with plenty of water and consult a physician. P304+P340 In case of inhalation, move to fresh air and rest.
Fire	Not Flammable No flame propagation observed.
Exposure	VAPOR OR MIST Irritating to eyes, nose and throat. Harmful if inhaled. LIQUID Will burn skin and eyes. Harmful if swallowed. INGESTION Causes severe burns to mouth and throat. May cause long-term health effects.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intake.
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Toxic marine, corrosive air contaminant, water contaminant. Restr. classes: 1, 2, 3, 4, 5, 6, 7, 8, 9. Evacuate area. Dispense and flush with care.	2 LABEL 
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Fluorosulfuric acid, Fluorosulfonic acid. 3.2 Coast Guard Compatibility Classification: Not applicable. 3.3 Chemical Formula: FSO ₃ H. 3.4 IMCO/United Nations Numerical Designation: 8.1.	4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Slightly cloudy, colorless to slightly yellow. 4.3 Odor: Choking, irritating.
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Rubber gloves, shoes, and clothing; goggles and face shield; acid fumes; under mask or air line mask. 5.2 Symptoms Following Exposure: Inhalation of fumes causes severe irritation of nose and throat. Contact of liquid with eyes or skin causes very severe burns. Ingestion causes very severe burns to mouth and stomach. 5.3 Treatment for Exposure: (See medical attention quickly following all exposure.) To those exposed: INHALATION: Move victim to fresh air. If the victim is unconscious, give artificial respiration. EYES: Flush with water until medical help arrives. SKIN: Flush with water until medical help arrives. Swallow: Do not induce vomiting. If patient is conscious, give plenty of water to drink. If patient is unconscious, give large amount of water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Data not available. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause severe irritation of eyes and throat and can cause lung injury. They can be irritating even at low concentrations. 5.9 Liquid or Solid Irritant Characteristics: Severe skin, eye, and third degree burns on skin contact and severe irritation to the eyes. 5.10 Odor Threshold: Data not available.	

6 FIRE HAZARDS 6.1 Flash Point: Not flammable. 6.2 Flammable Limits in Air: Not flammable. 6.3 Fire Extinguishing Agents: Not pertinent. 6.4 Fire Extinguishing Agents Not to be Used: Do not use water or foam on adjacent fires. 6.5 Special Hazards of Combustion: Products: Toxic and irritating fumes of hydrogen fluoride and sulfuric acid may form in fires. 6.6 Behavior in Fire: Contact with water of fire on adjacent fires produces toxic irritating fumes of hydrogen fluoride. 6.7 Ignition Temperature: Not pertinent. 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: Not pertinent.	8 WATER POLLUTION 8.1 Aquatic Toxicity: Data not available. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: None.																												
7 CHEMICAL REACTIVITY 7.1 Reactivity with Water: Reacts violently with water to generate hydrogen fluoride and sulfuric acid. 7.2 Reactivity with Common Materials: Reacts with metals generating flammable hydrogen. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Flood with water, rinse with sodium bicarbonate or lime solution. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9 SELECTED MANUFACTURERS 1. FORMALDEHYDE SOLUTION

Common Synonyms Formalith Eyde Formalin Formic aldehyde solution Methanal solution		Watery liquid	Colorless	Irritating odor
Sinks and mixes with water				
Avoid contact with liquid Wear goggles when handling liquid. Avoid contact with skin and eyes. Wash thoroughly with water if contact occurs. Notify physician if contact occurs. Notify fire department if spill occurs. Notify health department if spill occurs.				
Fire	Combustible Flammable liquid. Flash point: 18°C (64°F). Flammable solid. Flash point: 18°C (64°F). Combustible. Flash point: 18°C (64°F).			
CAUTION: HARMFUL TO AQUATIC LIFE				
Exposure	LIQUID Will burn skin and eyes. If swallowed, will cause nausea, vomiting or loss of consciousness. If inhaled, will cause irritation of the respiratory tract. If in contact with skin, will cause irritation. If in contact with eyes, will cause irritation. If swallowed, will cause nausea, vomiting or loss of consciousness. If inhaled, will cause irritation of the respiratory tract. If in contact with skin, will cause irritation. If in contact with eyes, will cause irritation. SWALLOWED: DO NOT INDUCE VOMITING. IF NECESSARY, GIVE ORAL FLUIDS. IF SWALLOWED, DO NOT INDUCE VOMITING. IF NECESSARY, GIVE ORAL FLUIDS.			
	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes. Notify health department if spill occurs.			
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes. Notify health department if spill occurs.			
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning - water contaminant. Disperse and flush.		2. LABELS No hazard label required by Code of Federal Regulations.		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Formalin, Eyde, Formalith, Methanal, Formic aldehyde. 3.2 Coast Guard Compatibility Classification: Aldehyde. 3.3 Chemical Formula: HCHO, H ₂ C=O, CH ₂ O. 3.4 IMCO United Nations Numerical Designation: 281105.		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Colorless. 4.3 Odor: Pungent irritating characteristic pungent.		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Self-contained breathing apparatus, chemical goggles, protective clothing, synthetic rubber or plastic gloves. 5.2 Symptoms Following Exposure: IRRITATION - eyes are irritating and will cause stinging, burning, nausea and vomiting; IRRITATION - nose, throat, and skin; IRRITATION - skin, throat, and skin; IRRITATION - skin, throat, and skin. 5.3 Treatment for Exposure: IRRITATION - move victim to fresh air; give oxygen if breathing; administer artificial respiration if necessary; induce vomiting once and repeat until vomitus clear; then give 1 quart of water and continue giving until SKIN OR EYES flush immediately with plenty of water; IRRITATION - move victim to fresh air; give oxygen if breathing; administer artificial respiration if necessary; induce vomiting once and repeat until vomitus clear; then give 1 quart of water and continue giving until SKIN OR EYES flush immediately with plenty of water. 5.4 Toxicity by Inhalation (Three-Hour Limit Value): 2 ppm. 5.5 Short-Term Inhalation Limits: 5 ppm for 30 min; 10 ppm for 15 min; 20 ppm for 5 min. 5.6 Toxicity by Ingestion: 100 mg/kg of body weight of formaldehyde solution (Grade 2) LD ₅₀ is 2 g/kg. 5.7 Late Toxicity: None. 5.8 Vapor (Gas) Irritant Characteristics: Vapor is moderately irritating to eyes, nose, throat, and skin; high concentrations cause severe irritation. 5.9 Liquid or Solid Irritant Characteristics: Causes stinging of eyes and first degree burns in short exposure; Moderate and severe burns if long exposure. 5.10 Odor Threshold: 0.1 ppm.

FMA

FORMIC ACID

Common Synonyms Methanoic acid Formic acid	Liquid Colorless Penetrating odor Sinks and mixes with water. Freezing point is 47°F.
AVOID CONTACT WITH EYES. Keep people away. Wear goggles. Self-contained breathing apparatus and other eye protection including gloves. Stop discharge if possible. Call fire department. Isolate and remove discharged material. Notify local health and pollution control agencies.	
Fire	Combustible Wear goggles, self-contained breathing apparatus and rubber covered clothing including gloves. Extinguish with water. Do not use water if flame is not subdued. Call fire department with water.
Exposure	CALL FOR MEDICAL AID. LIQUID Will burn skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected area with plenty of water. If IN EYES, hold eyelids open and flush with plenty of water. If SWALLOWED, do not induce VOMITING. Have victim drink water if possible. If SWALLOWED and also IN EYES, DO NOT INDUCE VOMITING. Call fire department with water. DO NOT INDUCE VOMITING.
Water Pollution	Dangerous to aquatic life in high concentrations. May be dangerous if it enters water intakes. Notify local health and wildlife agencies. Notify operators of nearby water intakes.
1. RESPONSE TO DISCHARGE See Response Methods Handbook, CG 446-4 Issue warning. Evacuate. Restrict access. Disperse and flush.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Methanoic acid, Formic acid. 3.2 Coast Guard Compatibility Classification: Organic acid. 3.3 Chemical Formula: HCOOH. 3.4 HMCO United Nations Numerical Designation: 801 (1979).	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Colorless. 4.3 Odor: Penetrating.
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Self-contained breathing apparatus when entering area. Wear full rubber suit, gloves and boots. 5.2 Symptoms Following Exposure: Irritation of skin and eyes. Ingestion causes severe irritation of the mouth and throat. Inhalation causes severe irritation of the respiratory tract. 5.3 Treatment for Exposure: INHALATION: Remove victim to fresh air. If breathing is difficult, give oxygen. If ingestion, do not induce vomiting. If on skin, flush with water. IF EYES: Flush with water for 15 minutes. IF INGESTION: Do not induce vomiting. If on skin, flush with water. 5.4 Toxicity by Inhalation (Threshold Limit Value): 1 ppm. 5.5 Short-Term Inhalation Limits: Do not exceed. 5.6 Toxicity by Ingestion: Grade 2, oral rat LD ₅₀ = 1.21 g/kg. 5.7 Late Toxicity: None. 5.8 Vapor (Gas) Irritant Characteristics: A very strong irritant to the eyes, nose, throat and respiratory tract. Causes severe irritation of the respiratory tract. 5.9 Liquid or Solid Irritant Characteristics: Irritates the skin and causes severe irritation of the respiratory tract. 5.10 Odor Threshold: Do not exceed.	

6. FIRE HAZARDS 6.1 Flash Point: 118°F (42°C). 6.2 Flammable Limits in Air: 18-57%. 6.3 Fire Extinguishing Agents: Water, carbon dioxide, dry chemical, foam. 6.4 Fire Extinguishing Agents Not to be Used: None. 6.5 Special Hazards of Combustion Products: Toxic gases, carbon monoxide. 6.6 Behavior in Fire: Non-persistent. 6.7 Ignition Temperature: 1114°F. 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: 0.5 mm/min.	8. WATER POLLUTION 8.1 Aquatic Toxicity: 175 mg/L 24 hr. Bluegill, 11 mg/L freshwater, 120 ppm 48 hr. Daphnia, 11 mg/L freshwater. 8.2 Waterlow Toxicity: Do not use table. 8.3 Biological Oxygen Demand (BOD): 2.5 days 40°C, 10 days 20°C. 8.4 Food Chain Concentration Potential: None.																								
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: No reaction. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Flush with water then neutralize with base. 7.5 Polymerization: No pertinent. 7.6 Inhibitor of Polymerization: No pertinent.	9. SELECTED MANUFACTURERS 1. E. I. du Pont de Nemours & Co., Inc., Industrial & Biochemicals Dept., Wilmington, Del. 19880. 2. Middlebrook, Inc., One One One, Orono, Maine 04469. 3. FUM

FUMARIC ACID

Common Synonyms Trans-Butenedioic acid Alloxenic acid Trans-1,2-ethylenedicarboxylic acid Boletic acid Lachenic acid	Solid White Odorless Sinks and mixes with water
Stop discharge if possible. Keep people away. Shut off ignition sources. Call fire department. Avoid contact with solid and/or dust. Locate and remove discharged materials. Notify local health and pollution control agencies.	
Fire	Combustible Dust cloud may explode if ignited in an enclosed area. Irritating gases may be produced when heated. Extinguish with water. Dry chemical, foam, or carbon dioxide.
Exposure	CALL FOR MEDICAL AID DUST Irritating to eyes, nose and throat. If inhaled will cause coughing & difficult breathing. If on eyes: 1. Flashes open and flush with plenty of water. If breathing has stopped: Give artificial respiration. If breathing is difficult: Give oxygen. SOLID Irritating to skin and eyes. Remove & irrigate immediately with water. Flush affected areas with plenty of water. IF IN EYES: Hold eyelids open and flush with plenty of water.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water works.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Disperse and flush.	
2. LABELS No hazard label required by Code of Federal Regulations.	
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Alloxenic acid Boletic acid, trans-Butenedioic acid, trans-1,2-Ethylenedicarboxylic acid, Lachenic acid 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: $\text{HO}-\text{C}(\text{H})=\text{C}(\text{H})-\text{O}-\text{H}$ 3.4 IMCO/United Nations Numerical Designation: Not listed	
4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: White 4.3 Odor: None	
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Dust mask, gloves, safety glasses, dust cap. 5.2 Symptoms Following Exposure: Inhalation of dust may cause respiratory irritation. Compound is non-toxic when ingested. Prolonged contact with eyes or skin may cause irritation. 5.3 Treatment for Exposure: INHALATION: move to fresh air. EYES: flush with water, get medical attention if irritation persists. SKIN: flush with water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Data not available 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Odorless

NOTES	

FFA

FURFURAL

Common Synonyms 2-Furancarboxaldehyde 2-Furaldehyde Furfuraldehyde Fural		Only liquid	Colorless to reddish-brown	Almond odor
		Sinks in water		
Avoid contact with liquid. Keep people away. Wear goggles, self-contained breathing apparatus, and rubber overclothing including gloves. (a) fire department (b) up discharge if possible (c) late and remove downwind material (d) notify local health and pollution control agencies				
Fire	Combustible Wear goggles, self-contained breathing apparatus and rubber overclothing including gloves. Extinguish with water. Dry chemical, alcohol foam, carbon dioxide. Confined containers with water.			
Exposure	CALL FOR MEDICAL AID LIQUID Will burn skin and eyes Harmful if swallowed Remove contaminated clothing and shoes Flush affected areas with plenty of water IF IN EYES: flush with plenty of water IF SWALLOWED AND VICTIM IS CONSCIOUS: have victim drink water or milk; have victim induce vomiting IF SWALLOWED AND VICTIM IS UNCONSCIOUS OR HAVING CONVULSIONS: do not give anything by mouth			
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes Soluble in water and slightly oily Notify local health and pollution control agencies			
1 RESPONSE TO DISCHARGE See Response Methods Handbook, CG 445-41 Issue warning if water contains hazard Should be removed Chemical and physical treatment		2. LABELS No hazard label required by Code of Federal Regulations		
3 CHEMICAL DESIGNATIONS 3.1 Synonyms 2-Furaldehyde, Furfural, 2-Furancarboxaldehyde, Furfuraldehyde, Fural 3.2 Coast Guard Compatibility Classification Aqueous 3.3 Chemical Formula O=C1C=CC(=O)CC1 3.4 IMCO United Nations Numerical Designation: 1501		4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless to reddish brown 4.3 Odor: Almond like		
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Self-contained breathing apparatus 5.2 Symptoms Following Exposure: Irritation of eyes, nose, and throat; coughing; chest pain; dizziness; headache; nausea; vomiting; diarrhea; skin irritation; allergic reactions 5.3 Treatment for Exposure: INHALATION: remove victim to fresh air; if breathing is difficult, give oxygen; if unconscious, give artificial respiration; if vomiting, give emetics; if ingestion, induce vomiting; if skin contact, wash with water 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.1 ppm 5.5 Short-Term Inhalation Limit: 1 ppm (15 min) 5.6 Toxicity by Ingestion: 0.1 g/kg (100 mg/kg) 5.7 Late Toxicity: Causes liver damage in rats 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause irritation to the eyes, nose, and throat; high concentrations are irritating to the respiratory tract 5.9 Liquid or Solid Irritant Characteristics: Causes irritation to the skin and mucous membranes; causes severe burns on contact with skin 5.10 Odor Threshold: 0.1 ppm (100 mg/kg)

FAL

FURFURYL ALCOHOL

Common Synonyms		Liquid	Colorless to light yellow	Mild irritating
2-Furancarboxal Furfuralcohol 2-Furancarbal 2-Hydroxymethylfuran		Mixes with water		
Stop discharge if possible or keep discharge under control until fire department arrives. Do not breathe vapor discharged in storage. No discharge into drains or sewers.				
Fire	Combustible Flammable liquid (F+), highly flammable (F+)			
Exposure	LIQUID Irritating to skin and eyes. Harmful if swallowed. Reactions on ingestion: Irritation of mouth and throat. If swallowed, drink water. Do not induce vomiting. If SWALLOWED, do not induce vomiting. If INGESTED, drink water. If SWALLOWED, do not induce vomiting. If INGESTED, drink water. If SWALLOWED, do not induce vomiting. If INGESTED, drink water.			
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Not a serious hazard to life. Flammable liquid.			
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4.) Issue warning: water contaminant. Dispense and flush.		2. LABELS No label required by Code of Federal Regulations.		
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: 2-Furancarboxal Furfuralcohol, alpha-Furancarbal 2-Furancarbal, 2-Hydroxymethylfuran. 3.2 Coast Guard Compatibility Classification: A-10. 3.3 Chemical Formula: C ₅ H ₆ O. 3.4 MCO/United Nations Numerical Designation: Not listed.		4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Colorless to amber. 4.3 Odor: Mildly irritating.		
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Goggles or face shield, rubber gloves. 5.2 Symptoms Following Exposure: Inhalation causes headache, nausea, and irritation of nose and throat. Vapor irritates eyes. Liquid causes inflammation and irritation of skin. Contact with liquid causes dryness and irritation. Ingestion causes headache, nausea, and irritation of mouth and stomach. 5.3 Treatment for Exposure: INHALATION: Remove victim to fresh air. Breathing irritates the respiratory system. If severe, seek medical attention. If minor, get medical attention. SKIN: Wash promptly with soap and water. INGESTION: Do not induce vomiting. If severe, seek medical attention. If minor, get medical attention. 5.4 Toxicity by Inhalation (Threshold Limit Value): None. 5.5 Short-Term Inhalation Limits: 5 ppm (5 mg/m ³). 5.6 Toxicity by Ingestion: Irritation of the T.D. ₀₁ is 10 g/kg (rat). 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Vapor causes irritation of nose and throat with high concentrations. Irritation of the eyes is temporary. 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard: If ingested, it should be followed by a large amount of water. Irritation of the skin. 5.10 Odor Threshold: 5 ppm.				

6 FIRE HAZARDS

6.1 Flash Point: 167°F (60°C) 149°F (66°C)
6.2 Flammable Limits in Air: 1.8% to 12.3%
6.3 Fire Extinguishing Agents: Water, dry chemical, foam, carbon dioxide
6.4 Fire Extinguishing Agent: Not to be Used: Not pertinent
6.5 Special Hazards of Combustion Products: Not pertinent
6.6 Behavior in Fire: Not pertinent
6.7 Ignition Temperature: 550°F
6.8 Electrical Hazard: Data not available
6.9 Burning Rate: 2.5 mm/min

7 CHEMICAL REACTIVITY

7.1 Reactivity with Water: No reaction
7.2 Reactivity with Common Materials: No reaction
7.3 Stability During Transport: Damages and forms water-soluble material in exposure to air, acids, particularly when hot
7.4 Neutralizing Agents for Acids and Caustics: Not pertinent
7.5 Polymerization: Not pertinent
7.6 Inhibitor of Polymerization: Not pertinent

8 WATER POLLUTION

8.1 Aquatic Toxicity: Data not available
8.2 Waterfowl Toxicity: Data not available
8.3 Biological Oxygen Demand (BOD): Data not available
8.4 Food Chain Concentration Potential: None

13.16 Heat of Polymerization: Not pertinent

(Continued on pages 7 and 8.)

NOTES

GLA

GALLIC ACID

Common Synonyms: 3,4,5-Trihydroxybenzoic acid Gallic acid monohydrate		Solid White Odorless
Sinks in water		
Stop discharge if possible. Keep people away. Shut off ignition sources. Call fire department. Avoid contact with solid and dust. Isolate and remove discharged material. Notify local health and pollution control agencies.		
Fire	Combustible Extinguish with water, dry chemicals, foam, or carbon dioxide.	
Exposure	CALL FOR MEDICAL AID DUST Irritating to eyes, nose and throat. If inhaled will cause coughing or difficult breathing. If in eyes, hold eyelids open and flush with plenty of water. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. SOLID Irritating to skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. If IN EYES, hold eyelids open and flush with plenty of water. If SWALLOWED and victim is CONSCIOUS, have victim drink water or milk and have victim induce vomiting. If SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.	
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.	
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 444-4.) Disperse and flush.		2. LABELS No hazard label required by Code of Federal Regulations.

NOTES									

GOC

GAS OIL: CRACKED

Common Synonyms	Liquid	Colorless	Gasoline-like odor
Floats on water			
Stop discharge ifammable keeps on fire. Call fire department. Isolate and remove discharged material. Avoid health and pollution hazards.			
Fire	Combustible Flammable with heat of combustion 40,000 Btu/lb		
Exposure	CALL FOR MEDICAL AID LIQUID Harmful if swallowed. If swallowed, do not be conscious, have some fresh water drink. DO NOT INDUCE VOMITING		
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS Floating to shoreline May be dangerous if it enters water intakes. No other health and safety effects. No vapor hazard to water intakes.		
1. RESPONSE TO DISCHARGE See Response Methods Handbook (7-646-4) Mechanical containment Should be removed Physical and chemical treatment		2. LABELS No hazard label required by Code of Federal Regulations	
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: No common synonyms 3.2 Coast Guard Compatibility Classification: Miscellaneous hydrocarbon mixtures 3.3 Chemical Formula: Not pertinent (mixture) 3.4 IMCO-United Nations Numerical Designation: 1.1 (202 (gas oil))		4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Yellow to brown 4.3 Odor: Like gasoline and petroleum	
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Protective goggles, gloves 5.2 Symptoms Following Exposure: INHALATION causes irritation of upper respiratory tract stimulation, then depression, dizziness, headache, incoordination, anesthesia, coma, respiratory arrest, irregular heartbeat is a complication. ASPIRATION causes severe coughing, gagging, distress, rapid development of pulmonary edema. INGESTION causes irritation of throat and stomach stimulation, then depression. 5.3 Treatment for Exposure: Get medical attention. INHALATION: maintain respiration, administer oxygen if needed. ASPIRATION: enforce bed rest and administer oxygen. INGESTION: give victim water or milk, do NOT induce vomiting. Guard against aspiration if change. EYES: wash with copious quantities of water. SKIN: remove by wiping, then wash with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): No single value applicable 5.5 Short-Term Inhalation Limits: Not pertinent 5.6 Toxicity by Ingestion: Grade 1 LD ₅₀ 0.5 to 1 g/kg 5.7 Late Toxicity: None 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause a slight irritation of the eyes or respiratory system if present in high concentrations. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain, may cause irritation and reddening of skin. 5.10 Odor Threshold: 0.25 ppm			

6 FIRE HAZARDS

6.1 Flash Point: 150°F (60°C)
 6.2 Flammable Limits in Air: 0.6% - 13.5%
 6.3 Fire Extinguishing Agents: Water, foam, carbon dioxide, or dry chemical
 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent
 6.5 Special Hazards of Combustion Products: Not pertinent
 6.6 Behavior in Fire: Not pertinent
 6.7 Ignition Temperature: 640°F
 6.8 Electrical Hazard: Not pertinent
 6.9 Burning Rate: 4 mm/min

7. CHEMICAL REACTIVITY

7.1 Reactivity with Water: Not reactive
 7.2 Reactivity with Common Materials: No reaction
 7.3 Stability During Transport: Stable
 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent
 7.5 Polymerization: Not pertinent
 7.6 Inhibitor of Polymerization: Not pertinent

8 WATER POLLUTION

8.1 Aquatic Toxicity: 90 ppm, 24 hr, average clad. 11 ppm, clad. water
 90 ppm, 48 hr, average clad. 11 ppm, clad. water
 8.2 Waterfowl Toxicity: Data not available
 8.3 Biological Oxygen Demand (BOD): 30-50 days
 8.4 Food Chain Concentration Potential: None

9 SELECTED MANUFACTURERS

1. Exxon Co.
 30 Rockefeller Plaza
 New York, N.Y. 10020
 2. Shell Oil Co.
 1 Shell Plaza
 Houston, Texas 77002
 3. Sun Oil Co.
 N. Darrow, Pa. 19047

10 SHIPPING INFORMATION

10.1 Grades or Purity: Composition varies widely with refinery and operation involved
 10.2 Storage Temperature: Ambient
 10.3 Inert Atmosphere: Not pertinent
 10.4 Venting: Operate flame arresters

GASOLINES: AUTOMOTIVE
(< 4.23g lead/gal)

Water Pollution

NOTES

GAV

GASOLINES: AVIATION

(< 4.86g lead/gal)

Common Synonyms	Waters liquid Red blue green brown or purple Gasoline odor Floats on water. Flammable; irritating vapor is produced.
No indication of possible harm possible. No indication of possible harm possible. No indication of possible harm possible. No indication of possible harm possible.	
Fire	FLAMMABLE. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Vapor may ignite if exposed to a flame or other source. Vapor may ignite if exposed to a flame or other source.
Exposure	VAPOR Irritating to eyes, nose and throat. If inhaled will cause dizziness, headache, difficult breathing or loss of consciousness. LIQUID Irritating to skin and eyes. If swallowed will cause nausea or vomiting. Skin irritation may occur if liquid is absorbed. If swallowed will cause nausea or vomiting. If swallowed will cause nausea or vomiting. If swallowed will cause nausea or vomiting.
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS. May be dangerous if it enters water intakes. No indication of possible harm possible.

GRF

GASOLINE BLENDING STOCKS: REFORMATES

Common Synonym as		Watery liquid	Colorless	Gasoline odor
		Floats on water. Flammable, irritating vapor is produced.		
Stop discharge if possible. Keep people away. Shut off ignition sources and call fire department. Move upwind and use water spray to knock down vapor. Isolate and remove discharged material. Notify local health and pollution control agencies.				
Fire		FLAMMABLE. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Extinguish with dry chemical, foam or carbon dioxide. Water may be ineffective on fire. Cool exposed containers with water.		
Exposure		CALL FOR MEDICAL AID. VAPOR Irritating to eyes, nose and throat. If inhaled will cause dizziness, headache, difficult breathing or loss of consciousness. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. LIQUID Irritating to skin and eyes. If swallowed, will cause nausea or vomiting. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. If IN EYES, hold eyelids open and flush with plenty of water. If SWALLOWED and victim is CONSCIOUS, have victim drink water or milk. DO NOT INDUCE VOMITING.		
Water Pollution		HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS. Fouling to shoreline. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning - high flammability. Evacuate area. Disperse and flush.		2. LABEL 		
3. CHEMICAL DESIGNATIONS 31 Synonyms: No common synonyms. 32 Coast Guard Compatibility Classification: Miscellaneous hydrocarbon mixtures. 33 Chemical Formula: Not pertinent. 34 IMCO/United Nations Numerical Designation: 31132/1203.		4. OBSERVABLE CHARACTERISTICS 41 Physical State (as shipped): Liquid. 42 Color: Colorless. 43 Odor: Gasoline.		
5. HEALTH HAZARDS 51 Personal Protective Equipment: Protective goggles, gloves. 52 Symptoms Following Exposure: INHALATION causes irritation of upper respiratory tract, central nervous system stimulation followed by depression of varying degrees ranging from dizziness, headache, and incoordination to anesthesia, coma, and respiratory arrest. Irregular heartbeat is dangerous complication. ASPIRATION causes severe lung irritation with coughing, gagging, dyspnea, substernal distress, and rapidly developing pulmonary edema. Later, signs of bronchopneumonia and pneumonia, acute onset of central nervous system followed by depression. INGESTION causes irritation of mucous membranes of throat, esophagus, and stomach, stimulation followed by depression of central nervous system, irregular heartbeat. 53 Treatment for Exposure: Seek medical attention. INHALE maintain respiration, give oxygen if needed. ASPIRATION enforce bed rest, administer oxygen. INGESTION do NOT induce vomiting, lavage carefully if appreciable quantity was ingested, guard against aspiration into lungs. EYES wash with copious quantity of water. SKIN wipe off and wash with soap and water. 54 Toxicity by Inhalation (Threshold Limit Value): No single TLV applicable. 55 Short-Term Inhalation Limits: 500 ppm for 30 min. 56 Toxicity by Ingestion: Grade 2, LD50 0.5 to 5 g/kg. 57 Late Toxicity: None. 58 Vapor (Gas) Irritant Characteristics: Vapors cause a slight smarting of the eyes or respiratory system if present in high concentrations. The effect is temporary.

Exposure	CALL FOR MEDICAL AID VAPOR Irritating to eyes, nose and throat. If inhaled will cause dizziness, headache, difficult breathing or loss of consciousness. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. LIQUID Irritating to skin and eyes. If swallowed, will cause nausea or vomiting. Flush affected areas with plenty of water. IF IN EYES: hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS: have victim drink water or milk. DO NOT INDUCE VOMITING.			
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS Fouling to shoreline. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.			
1. RESPONSE TO DISCHARGE See Response Methods Handbook, CG 446-41. Issue warning: high flammability. Evacuate area. Disperse and flush.		2. LABEL 		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: No algal gasoline. 3.2 Coast Guard Compatibility Classification: Miscellaneous hydrocarbon mixtures. 3.3 Chemical Formula: Not pertinent. 3.4 IMCO/United Nations Numerical Designation: 31.125*		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Colorless. 4.3 Odor: Gasoline.		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Protective goggles, gloves. 5.2 Symptoms Following Exposure: INHALATION causes irritation of upper respiratory tract, central nervous system stimulation followed by depression of varying degrees ranging from dizziness, headache, and nausea to anesthesia, coma, and respiratory arrest. Irregular heartbeat is a dangerous complication. ASPIRATION causes severe lung irritation with coughing, gagging, dyspnea, substernal distress, and rapidly developing pulmonary edema. Late signs of bronchopneumonia and pneumonitis. Acute onset of central nervous system excitement followed by depression. INGESTION causes irritation of mucous membranes of the oral, esophagus, and stomach. Stimulation followed by depression of central nervous system, irregular heartbeat. 5.3 Treatment for Exposure: Seek medical attention. INHALATION: maintain respiratory, give oxygen if needed. ASPIRATION: enforced rest, administer oxygen if needed. DO NOT induce vomiting. Lavage carefully if appreciable quantity was ingested. Guard against aspiration into lungs. EYES: wash with copious quantity of water. SKIN: wipe off and wash with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): No single TLV applicable. 5.5 Short-Term Inhalation Limits: 500 ppm for 30 min. 5.6 Toxicity by Ingestion: Grade 2 LD50 9.5 to 5 g/kg. 5.7 Late Toxicity: None.

REVISED 1978

GPL

GASOLINES: POLYMER

Common Synonyms	Watery liquid	Colorless	Gasoline odor
Floats on water. Flammable, irritating vapor is produced.			
Stop discharge if possible. Keep people away. Shut off ignition sources and call fire department. Stay upwind and use water spray to knock down vapor. Isolate and remove discharged material. Notify local health and pollution control agencies.			
Fire	FLAMMABLE Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Ext. nozzle with dry chemical foam or carbon dioxide. Water may be ineffective in fire. Cool exposed containers with water.		
Exposure	CALL FOR MEDICAL AID VAPOR Irritating to eyes, nose and throat. If inhaled, will cause dizziness, headaches, difficult breathing or loss of consciousness. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. LIQUID Irritating to skin and eyes. If swallowed, will cause nausea or vomiting. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk. DO NOT INDUCE VOMITING. Notify local health and wildlife officials. Notify operators of nearby water intakes.

5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Protective goggles, gloves. 5.2 Symptoms Following Exposure: INHALATION causes irritation of upper respiratory tract, central nervous system stimulation followed by depression of varying degrees, ranging from dizziness, headache, and incoordination to anesthesia, coma, and respiratory arrest. Irregular heartbeat is dangerous complication. ASPIRATION causes severe lung irritation with coughing, gasping, dyspnea, substernal distress, and rapidly developing pulmonary edema. Later, signs of bronchopneumonia and pneumonia. Acute onset of central nervous system excitement followed by depression. INGESTION causes irritation of mucous membranes of throat, esophagus, and stomach, stimulation followed by depression of central nervous system, irregular heartbeat. 5.3 Treatment for Exposure: Seek medical attention. INHALATION: maintain respiration, give oxygen if needed. ASPIRATION: enforce bed rest, administer oxygen. INGESTION: DO NOT induce vomiting. Lavage carefully if appreciable quantity was ingested, guard against aspiration into lungs. EYES: wash with copious quantity of water. SKIN: wipe off and wash with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): No single TLV applicable. 5.5 Short-Term Inhalation Limits: 400 ppm for 10 min. 5.6 Toxicity by Ingestion: Grade 2 LD ₅₀ 0.5 to 5 g/kg. 5.7 Late Toxicity: None. 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause a slight smarting of the eyes or respiratory system if present in high concentration. The effect is temporary.			

6. FIRE HAZARDS

- 6.1 Flash Point: 0 °F (-1 °C)
 6.2 Flammable Limits in Air: 1.3% - 7.1%
 6.3 Fire Extinguishing Agents: Dry chemical, foam, carbon dioxide.
 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective.
 6.5 Special Hazards of Combustion Products: None.
 6.6 Behavior in Fire: Vapor is heavier than air and may travel a considerable distance to a source of ignition and flash back.
 6.7 Ignition Temperature: Data not available.
 6.8 Electrical Hazard: Class I, group D.
 6.9 Burning Rate: 4 mm/min.

7. CHEMICAL REACTIVITY

- 7.1 Reactivity with Water: No reaction.
 7.2 Reactivity with Common Materials: No reaction.
 7.3 Stability During Transport: Stable.
 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent.
 7.5 Polymerization: Not pertinent.
 7.6 Inhibitor of Polymerization: Not pertinent.

8. WATER POLLUTION

- 8.1 Aquatic Toxicity:
 90 ppm 24 hr, juvenile American shad
 11 mg/l fresh water
 91 ppm 24 hr, juvenile American shad
 11 mg/l salt water
 8.2 Waterfowl Toxicity: Data not available.
 8.3 Biological Oxygen Demand (BOD): < 5 mg/l
 8.4 Food Chain Concentration Potential: None.

9. SELECTED MANUFACTURERS

1. Exxon Co.
 40 Rockefeller Plaza
 New York, N.Y. 10020
 2. Shell Oil Co.
 1 Shell Plaza
 Houston, Texas 77001
 3. Sun Oil Co.
 St. David, Pa. 19381

10. SHIPPING INFORMATION

- 10.1 Grades or Purity: Composition varies with range of distillation temperatures used. Contains mostly isohexane, isooctane.
 10.2 Storage Temperature: Ambient.
 10.3 Inert Atmosphere: No requirement.
 10.4 Venting: Open flame arrester or pressure/vacuum.

REVISED 1978

GTA

GLUTARALDEHYDE SOLUTION

Common Synonyms 1,5-Pentanedial		Liquid Light yellow Mixes with water
Stop discharge, if possible. Keep people away. Isolate and remove discharged material. Notify local health and pollution control agencies.		
Fire	Not flammable	
Exposure	Call for medical aid. LIQUID Irritating to skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES: Hold eyelids open and flush with plenty of water. IF SWALLOWED: Do not induce vomiting. Have victim drink water or milk.	
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.	
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 445-4.) Issue warning: water contaminant. Restrict access. Disperse and flush.		2. LABELS No label required, by Code of Federal Regulations.
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: 1,5-Pentanedial solution. 3.2 Coast Guard Compatibility Classification: Aldehyde. 3.3 Chemical Formula: $\text{OHC}-(\text{CH}_2)_3-\text{CHO}$ (in water). 3.4 IMCO/United Nations Numerical Designation: Not listed.		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Pale yellow. 4.3 Odor: Like rotten apples.
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Goggles or face shield; rubber gloves. 5.2 Symptoms Following Exposure: Contact with liquid causes severe irritation of eyes and irritation of skin. Chemical readily penetrates skin in harmful amounts. Ingestion causes irritation of mouth and stomach. 5.3 Treatment for Exposure: EYES: immediately flush with plenty of water for at least 15 min; get medical attention. SKIN: immediately flush with plenty of water for at least 15 min. INGESTION: give large amounts of water and induce vomiting; get medical attention. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 2 oral rat LD_{50} = 1,386 mg/kg. 5.7 Late Toxicity: Induces contact dermatitis in some people. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.

GCM

GLYCIDYL METHACRYLATE

Common Synonyms Glycidyl alpha-methylacrylate Methacrylic acid 2,3-epoxy propyl ester	Liquid Colorless Fruity odor Floats on water
Avoid contact with liquid. Keep people away. Wear rubber overclothing including gloves. Call fire department. Stop discharge if possible. Isolate and remove discharged material. Notify local health and environmental agencies.	
Fire	Combustible Wear goggles, self-contained breathing apparatus and rubber overclothing. Flush eyes with clean, cool water for 15 minutes. Flush exposed skin with plenty of water. Water may be ineffective on fire.
Exposure	CALL FOR MEDICAL AID LIQUID Will burn skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED, induce vomiting. DO NOT induce vomiting if the person is unconscious. Have victim drink water if possible.
Water Pollution	Effect of low concentrations on aquatic life is unknown. Fouling to shoreline. May be dangerous if it enters water intakes. Needs to be treated and will be difficult to remove. Needs operation of nearby water intakes.
1 RESPONSE TO DISCHARGE See Response Methods Handbook, CG 444.4. Mechanical containment. Should be removed. Chemical and physical treatment.	2 LABELS No hazard label required by Code of Federal Regulations.
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Glycidyl alpha-methylacrylate Methacrylic acid 2,3-epoxy propyl ester 3.2 Coast Guard Compatibility Classification: Not applicable. 3.3 Chemical Formula: $\text{CH}_2=\text{CH}(\text{CH}_2\text{CH}(\text{COOCH}_2\text{CHCH}_3)_2)$ 3.4 IMCO United Nations Numerical Designation: Not listed.	4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Colorless. 4.3 Odor: Data not available.
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Polyethylene coated apron and gloves and close fitting mask. 5.2 Symptoms Following Exposure: The liquid irritates eyes about as much as soap. Prolonged contact with skin produces irritation and dermatitis. 5.3 Treatment for Exposure: SKIN: wash thoroughly with soap and water and treat as a chemical burn. EYES: irrigate with clean water for 15 min. and get medical attention. 5.4 Toxicity by Inhalation (Threshold Limit Value): 25 ppm. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 2. LD ₅₀ 0.01 mg/kg rat. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Vapor is moderately irritating such that personnel will not usually tolerate moderate or high vapor concentrations. 5.9 Liquid or Solid Irritant Characteristics: Causes smarting of the skin and 1st degree burns on short exposure; may cause secondary burns on long exposure. In eyes the irritation is similar to that caused by ordinary soap. 5.10 Odor Threshold: Data not available.	

6 FIRE HAZARDS 6.1 Flash Point: 100°F (38°C). 6.2 Flammable Limits in Air: Data not available. 6.3 Fire Extinguishing Agents: Data not available. 6.4 Fire Extinguishing Agents Not to be Used: Data not available. 6.5 Special Hazards of Combustion Products: Irritating vapors are generated when heated. 6.6 Behavior in Fire: Not pertinent. 6.7 Ignition Temperature: Data not available. 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: Data not available.	8 WATER POLLUTION 8.1 Aquatic Toxicity: Data not available. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: None.
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: No reaction. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent. 7.5 Polymerization: Heat, peroxide and catalysts cause polymerization; the reaction is not considered hazardous. 7.6 Inhibitor of Polymerization: Hydroquinone, monomethyl ether, Nitrogen.	9 SELECTED MANUFACTURERS 1. Akzo, Inc. 4401 Fairfield Rd. Baltimore, Md. 21220 2. American Alcolac & Extract Co., Inc. Vandalia, Ind. Philadelphia, Pa. 19134 Polytechnic, Inc. Washington, Pa. 15376.
11 HAZARD ASSESSMENT CODE See Hazard Assessment Handbook, CG 441. VIUNYZ	10 SHIPPING INFORMATION 10.1 Grades or Purity: Technical 92+. 10.2 Storage Temperature: Ambient. 10.3 Inert Atmosphere: No requirement. 10.4 Venting: Open flame arresters.
12. HAZARD CLASSIFICATIONS 12.1 Code of Federal Regulations: Combustible Liquid. 12.2 NAS Hazard Rating for Bulk Water Transportation: Not listed. 12.3 NFPA Hazard Classifications: Not listed.	13 PHYSICAL AND CHEMICAL PROPERTIES 13.1 Physical State at 15°C and 1 atm: Liquid. 13.2 Molecular Weight: 172. 13.3 Boiling Point at 1 atm: Very high. 13.4 Freezing Point: Data not available. 13.5 Critical Temperature: Not listed. 13.6 Critical Pressure: Not listed. 13.7 Specific Gravity: 1.17 at 15°C liquid. 13.8 Liquid Surface Tension: 32.5 dyne/cm at 20°C liquid. 13.9 Liquid-Water Interfacial Tension: 10.5 dyne/cm at 20°C liquid. 13.10 Vapor (Gas) Specific Gravity: Not listed. 13.11 Ratio of Specific Heats of Vapor (Gas): Not listed. 13.12 Latent Heat of Vaporization: Not listed. 13.13 Heat of Combustion: Not listed. 13.14 Heat of Decomposition: Not listed. 13.15 Heat of Solution: Not listed. 13.16 Heat of Polymerization: Not listed.
NOTES	

GOS

GLYOXAL, 40% SOLUTION

Common Synonyms Biformal Biformal Ethanedial Oxal Oxaldehyde		Liquid	Light yellow	Weak sour odor
Mixes with water				
Stop discharge if possible. Keep people away. Isolate and remove discharged material. Notify local health and pollution control agencies.				
Fire	Not flammable			
Exposure	Call for medical aid. LIQUID Irritating to skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and symptoms persist, have someone drink water or milk.			
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Not known to harm health and wildlife directly. Not known to harm health and wildlife indirectly.			
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446.4) Issue warning: water contaminant. Disperse and flush.		2. LABELS No label required by Code of Federal Regulations.		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Biformal, Biformal, Biformal, Ethanedial, Oxal, Oxaldehyde. 3.2 Coast Guard Competibility Classification: To be developed. 3.3 Chemical Formula: CHO - CHO (in water). 3.4 IMCO/United Nations Chemical Designation: Not listed.		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Pale yellow. 4.3 Odor: Weak sour.		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Goggles or face shield, rubber gloves. 5.2 Symptoms Following Exposure: Inhalation causes some irritation of nose and throat. Contact with liquid irritates eyes and causes mild irritation of skin; stains skin yellow. (No information available on symptoms of ingestion.) 5.3 Treatment for Exposure: INHALATION: remove from exposure. EYES OR SKIN: flush with water for 15 min. INGESTION: no information on treatment. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 4 irritant, LD ₅₀ 2,020 mg/kg. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause a slight stinging of the eyes or respiratory system if present in high concentrations. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain, may cause stinging and reddening of the skin. 5.10 Odor Threshold: Data not available.				

6. FIRE HAZARDS 6.1 Flash Point: Non flammable solution 6.2 Flammable Limits in Air: Not pertinent 6.3 Fire Extinguishing Agents: Not pertinent 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent 6.5 Special Hazards of Combustion Products: Not pertinent 6.6 Behavior in Fire: Heat may cause polymerization to a combustible viscous material 6.7 Ignition Temperature: Not pertinent 6.8 Electrical Hazard: Not pertinent 6.9 Burning Rate: Not pertinent	8. NOTES																													

Common Synonyms 1,4,5,6,7,8,8-Heptachloro-3a,4a-tetrahydro-4H-methanocine 1,4,5,6,7,8,8-Heptachloro-4a-cyclopentadecalin E3314		Solid	White to light tan	Camphor-like odor
AVOID CONTACT WITH SOLID AND DUST. KEEP PEOPLE AWAY. Wear goggles and self-contained breathing apparatus. Stop discharge if possible. Isolate and remove discharged material. Notify local health and pollution control agencies.				
Fire		Not flammable Irritating gases may be produced when heated		
		DUST POISONOUS IF INHALED If inhaled will cause headache or loss of consciousness. If inhaled, remove person to fresh air and keep breathing mask on until after first medical attention. If breathing is difficult, give oxygen. SOLID POISONOUS IF SWALLOWED Irritating to skin and eyes. If swallowed will cause nausea and vomiting. If swallowed, contain mouth, do not swallow. Do not allow affected areas with skin to be wet. If IN EYES, flush eyes with plenty of water. If SWALLOWED and person is conscious, have person drink water or milk. If NOT ALLOWED TO SWALLOW, DO NOT INDUCE VOMITING OR CONVULSIONS. If nothing else is available, give water.		
Exposure				
Water Pollution		HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes. Notify local health and pollution control agencies. Notify local health and pollution control agencies.		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG and 4.) Issue warning - water contaminant. Should be removed. Chemical and physical treatment.		2. LABELS No hazard label required by Code of Federal Regulations.		
3. CHEMICAL DESIGNATIONS 31 Synonyms: 1,3,12,14,5,6,7,8,8a-Heptachlorodicyclopentadiene; 1,4,5,6,7,8,8a-Heptachloro-3a,4a-tetrahydro-4H-methanocine; Nelsol 32 Coast Guard Compatibility Classification: Not listed 33 Chemical Formula: C ₁₄ H ₁₀ Cl ₇ 34 IMCCG/United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 41 Physical State (as shipped): Solid 42 Color: White, light tan 43 Odor: Camphor-like		
5. HEALTH HAZARDS				
51 Personal Protective Equipment: Protective respiratory, rubber gloves, clean clothes 52 Symptoms Following Exposure: Inhalation of dust causes irritation, tremors, and collapse. Ingestion causes nausea, vomiting, diarrhea, and irritation of the gastrointestinal tract. Contact with dust causes irritation of eyes and moderate irritation of skin. 53 Treatment for Exposure: Get medical attention following all overexposures to heptachlor. INHALATION: move to fresh air; if exposure is dust was severe, get medical attention. INGESTION: lavage stomach with warm tap water (unless convulsions are imminent). EYES and skin should be avoided, as they increase the rate of absorption of all chlorinated hydrocarbons. EYES: wash repeatedly with water. SKIN: flush with water, then wash with soap and water. 54 Toxicity by Inhalation (Threshold Limit Value): 0.5 mg/m 55 Short-Term Inhalation Limits: 2 mg/m for 30 min 56 Toxicity by Ingestion: Grade 4 oral LD ₅₀ = 40 mg/kg (rat) 57 Late Toxicity: Liver damage may develop 58 Vapor (Gas) Irritant Characteristics: Data not available 59 Liquid or Solid Irritant Characteristics: Data not available 510 Odor Threshold: 0.02 ppm

NOTES

HPT

HEPTANE

Common Synonyms n-Heptane	Watery liquid Colorless Gasoline-like odor Floats on water. Flammable vapor is produced.
No discharge of number. Keep proper flow. Shut off sprayer nozzle and allow spray to clear nozzle and the water spray. If flame is in vapor isolate and remove discharging material. Never use breath and pipe for cleaning purposes.	
Fire	FLAMMABLE. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Extinguish with dry chemical, carbon dioxide, or water. Water may be ineffective if used on burning liquid. Extinguish with foam.
Exposure	ALL TOXIC MEDICAL AID VAPOR Not irritating to eyes, nose or throat. If inhaled, will cause coughing or difficult breathing. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. LIQUID Irritating to skin and eyes. If swallowed, will cause nausea or vomiting. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, flush immediately with plenty of water. IF ON SKIN, wash immediately with plenty of water. IF SWALLOWED, do not induce vomiting. DO NOT INDUCE VOMITING.
Water Pollution	Dangerous to aquatic life in high concentrations. Feeding to livestock. May be dangerous if it enters water intakes. Not a health and safety hazard. Not a pollution hazard.
1. RESPONSE TO DISCHARGE See Response Manual for release. CG 4.4. Extinguishing: High flameability. Flammable gas. Explosion and flash.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: n-Heptane 3.2 Coast Guard Compatibility Classification: Paraffin 3.3 Chemical Formula: C ₇ H ₁₆ 3.4 ICAO United Nations Numerical Designation: 1.2 (D)	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Gasoline
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Safety glasses, gloves, and shoes. 5.2 Symptoms Following Exposure: INHALATION - Irritation to respiratory tract, coughing, depression, cardiac arrhythmias. ASPIRATION - Irritation to respiratory tract, coughing, mild emphysema. INGESTION - Nausea, vomiting, cardiac depression, depression, headache. 5.3 Treatment for Exposure: INHALATION - Move to fresh air, give oxygen if needed. ASPIRATION - Administer oxygen. INGESTION - Do not induce vomiting. SKIN/ EYES - Remove contaminated clothing and shoes and wash with soap and water. Flush eyes with plenty of water. 5.4 Toxicity by Inhalation (Threshold Limit Value): 100 ppm 5.5 Short-Term Inhalation Limits: 500 ppm for 15 min 5.6 Toxicity by Ingestion: Grade III Poisoning (p. 4) 5.7 Late Toxicity: None 5.8 Vapor (Gas) Irritant Characteristics: Vapors are non-irritating to eyes and skin. 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. Irritation to skin and eyes if contact with skin, eyes, clothing and clothing of the skin. 5.10 Odor Threshold: 220 ppm	

6. FIRE HAZARDS

- 6.1 Flash Point: 25°F (4°C)
- 6.2 Flammable Limits in Air: 1.0% - 7.0%
- 6.3 Fire Extinguishing Agents: Foam, dry chemical, carbon dioxide.
- 6.4 Fire Extinguishing Agents Not to be Used: None.
- 6.5 Special Hazards of Combustion Products: None.
- 6.6 Behavior in Fire: Non-peroxide.
- 6.7 Ignition Temperature: 473°F
- 6.8 Electrical Hazard: Class I, Group 1.
- 6.9 Burning Rate: 1.0 ft/min

8. WATER POLLUTION

- 8.1 Aquatic Toxicity: 400 ppm (24 hr continuous) LC50, fish.
- 8.2 Waterway Toxicity: Data not available.
- 8.3 Biological Oxygen Demand (BOD): 10 mg/l (24 hr).
- 8.4 Food Chain Concentration Potential: None.

- 13.11 Ratio of Specific Heats of Vapor (Gas): 1.10
- 13.12 Latent Heat of Vaporization: 351 Btu/lb (810 cal/g) (at 15°C)
- 13.13 Heat of Combustion: 19,300 Btu/lb (45,700 cal/g) (at 15°C)
- 13.14 Heat of Decomposition: None.
- 13.15 Heat of Solution: None.
- 13.16 Heat of Polymerization: None.

NOTES

HTE

1-HEPTENE

Common Synonyms Heptene	Waters liquid Colorless Gasoline-like odor Floats on water. Flammable, irritating vapor is produced.
Stop discharge if possible. Keep people away. Shut off ignition sources and call fire department. Stay upwind and out water spray 150 ft downwind. Avoid contact with liquid and vapor. Isolate and remove discharged material. Notify local health and pollution control agencies.	
Fire	FLAMMABLE. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Extinguish with dry chemical, foam or carbon dioxide. Water may be ineffective on fire. Cool exposed containers with water.
Exposure	CALL FOR MEDICAL AID. VAPOR Irritating to eyes, nose and throat. If inhaled, will cause dizziness or difficult breathing. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. LIQUID Irritating to skin and eyes. Harmful if swallowed. Respirators contaminated clothing and shoes. Flush affected areas with plenty of water. If IN EYES, hold eyelids open and flush with plenty of water. If SWALLOWED, do not induce vomiting. Do not drink water or milk. DO NOT INDUCE VOMITING.
Water Pollution	Effect of low concentrations on aquatic life is unknown. Toxic to fish. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.
1. RESPONSE TO DISCHARGE Under Spill Response Methods Handbook, CG 600-1-10 Isolate warning: High flammability. Restrict access. Evacuate area.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Heptene 3.2 Coast Guard Compatibility Classification: Other 3.3 Chemical Formula: C ₇ H ₁₄ 3.4 IBCO United Nations Numerical Designation: Not listed	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Gasoline
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Safety goggles or face shield, similar to gasoline. 5.2 Symptoms Following Exposure: High concentrations may produce slight irritation of eyes and respiratory tract; may also act as simple asphyxiant and cause anesthesia. 5.3 Treatment for Exposure: Remove from exposure. Administer artificial respiration if needed. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limit: Data not available. 5.6 Toxicity by Ingestion: Data not available. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause a slight stinging of the eyes or respiratory system if present in high concentrations. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain, may cause staining and reddening of the skin. 5.10 Odor Threshold: Data not available.	

6. HCC

HEXACHLOROCYCLOPENTADIENE

Common Synonyms Perchlorocyclopentadiene		Liquid	Greenish yellow	Harsh, unpleasant odor
		Sinks in water		
AVOID CONTACT WITH LIQUID AND VAPOR. STEEP TO 1/4 AWAY. Wear goggles, self contained breathing apparatus and rubber, wetting (including gloves). Stop discharge if possible. Isolate and remove discharged material. Notify local health and pollution control agencies.				
Fire		Not flammable Poisonous gases may be produced when heated		
 Exposure		CALL FOR MEDICAL AID VAPOR POISONOUS IF INHALED If inhaled will cause coughing or difficult breathing. If in eyes, hold eyelids open and flush with plenty of water. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. LIQUID Will burn skin and eyes. If swallowed will cause nausea and vomiting. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. If IN EYES, hold eyelids open and flush with plenty of water. If SWALLOWED, D and victim is CONSCIOUS, have victim drink water or milk and have victim induce vomiting. If SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.		
Water Pollution		Dangerous to aquatic life in high concentrations. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook CG 448-4) Issue warning: poison, water contaminant, air contaminant. Restrict access. Should be removed. Chemical and physical treatment.		2. LABEL 		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Perchlorocyclopentadiene 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: C_5Cl_6 3.4 IMCO/United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Yellow or greenish yellow 4.3 Odor: Harsh pungent		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Protective clothing, including rubber gloves and rubber shoes or boots, self contained breathing apparatus, face shield. 5.2 Symptoms Following Exposure: Inhalation of mist is highly irritating to mucous membranes causing lachrymation, sneezing, and salivation, pulmonary edema may occur. Ingestion causes nausea, vomiting, diarrhea, depression. Contact with eyes causes severe irritation. Liquid is extremely irritating to the skin, causing blistering and burning. 5.3 Treatment for Exposure: INHALATION: remove victim to fresh air, give artificial respiration and/or oxygen as needed. INGESTION: give large amounts of water and induce vomiting, give saline laxative. EYES: flush with water for at least 15 min., if irritation remains, get medical attention. SKIN: wash with soap and water until no odor remains. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.1 ppm (proposed) 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: (grade 4, oral) LD ₅₀ = 0.505 mg/kg (mouse) 113 mg/kg (rat) 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: 0.15 - 0.33 ppm				

6. FIRE HAZARDS 6.1 Flash Point: Not flammable 6.2 Flammable Limits in Air: Not flammable 6.3 Fire Extinguishing Agents: Not pertinent 6.4 Fire Extinguishing Agents Not to be Used: If water is used on adjacent fires, do not allow water to enter drums or storage tanks 6.5 Special Hazards of Combustion Products: Toxic hydrogen chloride, chlorine and phosgene gases may form in fires 6.6 Behavior in Fire: 6.7 Ignition Temperature: Not pertinent 6.8 Electrical Hazard: Not pertinent 6.9 Burning Rate: Not pertinent	8. WATER POLLUTION 8.1 Aquatic Toxicity: Highly toxic 8.2 Waterlow Toxicity: Highly toxic 8.3 Biological Oxygen Demand (BOD) Data not available 8.4 Food Chain Concentration Potential: Possible accumulation of breakdown products
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: Reacts slowly to form hydrochloric acid. The reaction is not hazardous 7.2 Reactivity with Common Materials: In presence of moisture will corrode iron and other metals. Flammable and explosive hydrogen gas may collect in enclosed space 7.3 Stability During Transport: Stable 7.4 Neutralizing Agents for Acids and Caustics: Rinse with dilute solution of sodium bicarbonate or soda ash 7.5 Polymerization: Not pertinent 7.6 Inhibitor of Polymerization: Not pertinent	9. SELECTED MANUFACTURERS 1 Hooker Chemical Corporation Industrial Chemicals Division Niagara Falls, N. Y. 14302 2 Velvol Chemical Corporation 341 East Ohio Street Chicago Ill 60611

NOTES

HAC

HEXADECYLTRIMETHYLAMMONIUM CHLORIDE

Common Synonyms Cetyltrimethylammonium chloride solution		Liquid	Clear to pale yellow	Rubbing alcohol odor
Floats or sinks in water				
Stop discharge if possible. Keep people away. Shut off ignition sources. Call fire department. Avoid contact with liquid and vapor. Stay upwind and use water spray to knock down vapor. Isolate and remove discharged material. Notify local health and pollution control agencies.				
Fire		FLAMMABLE: Irritating gases may be produced when heated. Flashback vapor along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Extinguish with dry chemicals, foam, or carbon dioxide. Water may be ineffective on fire. Cool exposed containers with water.		
Exposure		CALL FOR MEDICAL AID VAPOR Irritating to eyes, nose and throat. Harmful if inhaled. If in eyes, hold eyelids open and flush with plenty of water. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. LIQUID Irritating to skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. If IN EYES, hold eyelids open and flush with plenty of water. If SWALLOWED and victim is CONSCIOUS, have victim drink water or milk. If SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm. DO NOT INDUCE VOMITING.		
Water Pollution		Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: water contaminant. Disperse and flush.		2. LABELS No hazard label required by Code of Federal Regulations.		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Cetyltrimethylammonium chloride solution 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula $C_{16}H_{33}(CH_3)_3NCl \cdot H_2O$ (CH ₃) ₃ COH 3.4 IMCO/United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Almost clear to pale yellow 4.3 Odor: Like rubbing alcohol		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Goggles or face shield, rubber gloves. 5.2 Symptoms Following Exposure: Ingestion may produce toxic effects. Contact with eyes or skin may cause severe damage. 5.3 Treatment for Exposure: INGESTION: do NOT induce vomiting; drink large quantities of fluid and call a physician immediately. EYES: flush with water for at least 15 min. and call a physician. SKIN: flush with water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 3 LD ₅₀ 240 mg/kg(rat). 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.

HAL

n-HEXALDEHYDE

Common Synonyms Capronic aldehyde Caproaldehyde Hexanal Capronaldehyde n-Caproaldehyde	Liquid Colorless Sharp unpleasant odor Floats on water Flammable, irritating vapor is produced
Stop discharge if possible. Keep people away. Shut off ignition sources. Call fire department. Avoid contact with liquid and vapor. Isolate and remove discharged material. Notify local health and pollution control agencies.	
Fire	Combustible Flammable along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Extinguish with dry chemical, foam or carbon dioxide. Water may be ineffective on fire. Cool exposed containers with water.
Exposure	VAPOR Irritating to eyes, nose and throat. Harmful if inhaled. If in eyes, hold eyelids open and flush with plenty of water. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. LIQUID Irritating to skin and eyes. If swallowed will cause nausea and vomiting. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. If IN EYES, hold eyelids open and flush with plenty of water. If SWALLOWED, and victim is CONSCIOUS, have victim drink water or milk and have stomach induce vomiting. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.
Water Pollution	Effect of low concentrations on aquatic life is unknown. Fouling to shoreline. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning - high flammability. Restrict access. Mechanical containment. Should be removed. Chemical and physical treatment.	
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Caproaldehyde, Capronic aldehyde, Capronaldehyde, Hexanal, n-Caproaldehyde. 3.2 Coast Guard Compatibility Classification: Not listed. 3.3 Chemical Formula: $C_6H_{12}O$ 3.4 IMCO/United Nations Numerical Designation: 111207	
2. LABEL 	
4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Pungent	
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Goggles or face shield, rubber gloves. 5.2 Symptoms Following Exposure: Ingestion causes irritation of mouth and stomach. Contact with vapor or liquid irritates eyes. Liquid irritates skin. 5.3 Treatment for Exposure: INGESTION: Give large amount of water and induce vomiting. EYES: flush with water for at least 15 min. SKIN: wipe off, wash with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 2, oral LD ₅₀ = 4,900 mg/kg (rat). 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.	

6 FIRE HAZARDS

- 6.1 **Flash Point:** 90°F O.C.
 6.2 **Flammable Limits in Air:** Data not available.
 6.3 **Fire Extinguishing Agents:** Dry chemical, foam, carbon dioxide.
 6.4 **Fire Extinguishing Agents Not to be Used:** Water may be ineffective.
 6.5 **Special Hazards of Combustion Products:**
 6.6 **Behavior in Fire:** Vapor is heavier than air and may travel to a source of ignition and flash back.
 6.7 **Ignition Temperature:** Data not available.
 6.8 **Electrical Hazard:** Data not available.
 6.9 **Burning Rate:** 5.21 mm/min.

8. WATER POLLUTION

- 8.1 **Aquatic Toxicity:** Data not available.
 8.2 **Waterfowl Toxicity:** Data not available.
 8.3 **Biological Oxygen Demand (BOD):** Data not available.
 8.4 **Food Chain Concentration Potential:** None.

9. SELECTED MANUFACTURERS

1. Aldrich Chemical Co.
 940 W. Saint Paul Ave.
 Milwaukee, Wis. 53233
 2. Pfaltz & Bauer, Inc.
 375 Fairfield Ave.
 Stamford, Conn. 06902

7. CHEMICAL REACTIVITY

- 7.1 **Reactivity with Water:** No reaction.
 7.2 **Reactivity with Common Materials:** May attack some forms of plastics.
 7.3 **Stability During Transport:** Stable.
 7.4 **Neutralizing Agents for Acids and Caustics:** Not pertinent.
 7.5 **Polymerization:** Not pertinent.
 7.6 **Inhibitor of Polymerization:** Not pertinent.

10. SHIPPING INFORMATION

- 10.1 **Grade or Purity:** 99+%, Commercial.
 10.2 **Storage Temperature:** Ambient.
 10.3 **Inert Atmosphere:** No requirement.
 10.4 **Venting:** Open (flame arrester).

11. HAZARD ASSESSMENT CODE

(See Hazard Assessment Handbook, CG 446-3)
 A-T-U

12. HAZARD CLASSIFICATIONS

- 12.1 **Code of Federal Regulations:** Flammable liquid.
 12.2 **NAS Hazard Rating for Bulk Water Transportation:** Not listed.
 12.3 **NFPA Hazard Classifications:**
- | Category | Classification |
|----------------------|----------------|
| Health Hazard (Blue) | 2 |
| Flammability (Red) | 3 |
| Reactivity (Yellow) | 1 |

13. PHYSICAL AND CHEMICAL PROPERTIES

- 13.1 **Physical State at 15°C and 1 atm:** Liquid.
 13.2 **Molecular Weight:** 100.
 13.3 **Boiling Point at 1 atm:** 262°F = 128°C = 401°K.
 13.4 **Freezing Point:** Not pertinent.
 13.5 **Critical Temperature:** Not pertinent.
 13.6 **Critical Pressure:** Not pertinent.
 13.7 **Specific Gravity:** 0.83 at 20°C (liquid).
 13.8 **Liquid Surface Tension:** Data not available.
 13.9 **Liquid-Water Interfacial Tension:** Data not available.
 13.10 **Vapor (Gas) Specific Gravity:** 3.5.
 13.11 **Ratio of Specific Heats of Vapor (Gas):** (est.) 1.061 at 20°.
 13.12 **Latent Heat of Vaporization:** (est.) 153 Btu/lb = 85 cal/g = 1.6×10^5 J/kg.
 13.13 **Heat of Combustion:** (est.) -17,000 Btu/lb = -9,430 cal/g = -3.94×10^5 J/kg.
 13.14 **Heat of Decomposition:** Not pertinent.
 13.15 **Heat of Solution:** Not pertinent.
 13.16 **Heat of Polymerization:** Not pertinent.

HEXAMETHYLENEDIAMINE

Common Synonyms 1,6-Hexamethanamine 1,6-Diaminohexane		Solid or watery liquid	Colorless	Weak ammoniac odor																												
		Floats and mixes with water																														
Avoid contact with liquid. Keep people away. Wear goggles, self-contained breathing apparatus and rubber overclothing (including gloves). Stop discharge if possible. Call fire department. Isolate and remove discharged material. Notify local health and pollution control agencies.																																
Fire	Combustible Wear goggles, self-contained breathing apparatus and rubber overclothing (including gloves). Extinguish with water, foam, dry chemical or carbon dioxide.																															
	CALL FOR MEDICAL AID LIQUID OR SOLID POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED. Will burn eyes. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. If IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk.																															
Exposure																																
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.																															
1. RESPONSE TO DISCHARGE (See Personnel Methods Handbook, CG 448-4) Issue warning: corrosive, water contaminant. Disperse and flush.		2. LABEL 																														
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: 1,6-Diaminohexane 1,6-Hexanediamine HMDA 3.2 Coast Guard Competibility Classification: Amine 3.3 Chemical Formula: $\text{NH}_2(\text{CH}_2)_6\text{NH}_2$ 3.4 IMCO/United Nations Numerical Designation: X 0/1783		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid (anhydrous) or liquid (70% solution) 4.2 Color: Glassy solid, clear liquid 4.3 Odor: Weak, fishy																														
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Protective clothing, eye protection. 5.2 Symptoms Following Exposure: Vapors cause irritation of eyes and respiratory tract. Liquid irritates eyes and skin; may cause dermatitis. 5.3 Treatment for Exposure: SKIN OR EYES: flush immediately with water for 15 min.; call a physician. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Data not available. 5.7 Late Toxicity: Repeated exposure can cause anemia and damage kidney and liver. 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause a slight smarting of the eyes or respiratory system if present in high concentrations. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Causes smarting of the skin and first-degree burns on short exposure; may cause secondary burns on long exposure. 5.10 Odor Threshold: 0.0041 mg/m ³

REVISED 1978

HMI

HEXAMETHYLENEIMINE

Common Synonyms Hexahydroazepine Azacycloheptane	Liquid Colorless to light yellow Ammonia-like odor Floats and mixes slowly with water Irritating vapor is produced
AVOID CONTACT WITH LIQUID AND VAPOR. KEEP PEOPLE AWAY Stop all ignition sources (CFL's, etc.) Stop discharge if possible Evacuate and remove all discharges! Notify local health and fire departments	
Fire	Combustible POISONOUS GASES MAY BE PRODUCED IN FIRE Flashback along vapor trail may occur Vapor may explode if ignited in an enclosed area Wear goggles and self-contained breathing apparatus Extinguish with dry chemical, alkali, foam, or carbon dioxide Water may be ineffective in fire Do not seal container with water
 Exposure	CALL FOR MEDICAL AID VAPOR Irritating to eyes, nose and throat If inhaled will cause coughing, difficult breathing or loss of consciousness If in eyes, hold eyelids open and flush with plenty of water If breathing has stopped, give artificial respiration If unconscious, tilt the head back LIQUID POISONOUS IF SWALLOWED Will burn skin and eyes If swallowed will cause nausea Remove contaminated clothing and shoes Flush affected areas with plenty of water IF IN EYES, hold eyelids open and flush with plenty of water IF SWALLOWED and victim is CONSCIOUS, have them drink water or milk IF SWALLOWED and victim is UNCONSCIOUS, OR HAVING CONVULSIONS, Do nothing except keep the person DONOT INDUCE VOMITING
Water Pollution	Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes Notify local health and waste treatment authorities Notify local fire department with releases
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: corrosive, air contaminant, water contaminant Restrict access Disperse and flush	2. LABEL 
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Azacycloheptane Hexahydroazepine, Homopiperidine 3.2 Coast Guard Compatibility Classification: Aliphatic amine 3.3 Chemical Formula: <chem>C1CNCCCC1</chem> 3.4 IMCO/United Nations Numerical Designation: Not listed	4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless to light yellow 4.3 Odor: Ammonia-like
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Self-contained breathing apparatus, impervious gloves, chemical safety goggles, impervious apron and boots 5.2 Symptoms Following Exposure: Inhalation of vapor irritates respiratory tract; high concentrations may cause disturbance of the central nervous system. Ingestion causes burns of mouth and stomach. Contact with concentrated vapor may cause severe eye injury. Contact with liquid causes burns of eyes and skin. 5.3 Treatment for Exposure: INHALATION: remove victim to uncontaminated atmosphere; get medical attention. INGESTION: give large amount of water; do NOT induce vomiting; get medical attention if large amount was swallowed. EYES: flush with water for 15 min. and get medical attention. SKIN: flush with water; wash with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 4, oral LD ₅₀ = 32 mg/kg (rat) 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available

HEXANE

Common Synonyms n-Hexane	Watery liquid Colorless Gasoline-like odor Floats on water. Flammable, irritating vapor is produced.
Stop discharge if possible. Keep people away. Shut off ignition sources and call fire department. Stay upwind and use water spray to knock down vapor. Isolate and remove discharged material. Notify local health and pollution control agencies.	
Fire	FLAMMABLE: Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Extinguish with dry chemical foam or carbon dioxide. Water may be ineffective on fire. Cool exposed containers with water.
Exposure	CALL FOR MEDICAL AID VAPOR Irritating to nose and throat. If inhaled, will cause coughing or dizziness. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. LIQUID Irritating to skin and eyes. If swallowed, will cause nausea or vomiting. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES: hold eyelids open and flush with plenty of water. IF SWALLOWED and vomiting: CONSULTS have victim drink water or milk. DO NOT INDUCE VOMITING.
Water Pollution	Effect of low concentrations on aquatic life is unknown. Fouling to shoreline. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: high flammability. Evacuate area. Disperse and flush.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: No common synonyms. 3.2 Coast Guard Compatibility Classification: Paraffin. 3.3 Chemical Formula: C ₆ H ₁₄ (H & CH). 3.4 IMCO/United Nations Numerical Designation: 1, 1208.	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Colorless. 4.3 Odor: Like gasoline.
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Eye protection (like gasoline). 5.2 Symptoms Following Exposure: INHALATION causes irritation of respiratory tract, cough, mild depression, cardiac arrhythmias. ASPIRATION causes severe lung irritation, coughing, pulmonary edema, excretion, followed by depression. INGESTION causes nausea, vomiting, swelling of abdomen, headache, depression. 5.3 Treatment for Exposure: Call doctor. INHALATION: maintain respiration, give oxygen if needed. ASPIRATION: enforce bed rest, give oxygen if needed. INGESTION: do NOT induce vomiting. SKIN OR EYES: wipe off, wash skin with soap and water, wash eyes with copious amounts of water. 5.4 Toxicity by Inhalation (Threshold Limit Value): 500 ppm. 5.5 Short-Term Inhalation Limits: 500 ppm for 30 min. 5.6 Toxicity by Ingestion: Very slight. 5.7 Late Toxicity: None. 5.8 Vapor (Gas) Irritant Characteristics: Vapors are nonirritating to the eyes and throat. 5.9 Liquid or Solid Irritant Characteristics: No appreciable hazard. Practically harmless to the skin. 5.10 Odor Threshold: Data not available.	

6. FIRE HAZARDS 6.1 Flash Point: -77°F (-50°C) 6.2 Flammable Limits in Air: 1.1% - 7.7% 6.3 Fire Extinguishing Agents: foam, dry chemical, carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Not pertinent. 6.6 Behavior in Fire: Vapors may explode. 6.7 Ignition Temperature: 437°F 6.8 Electrical Hazard: (Class I group D) 6.9 Burning Rate: 7.4 mm/min.	8. HEXANOL

Common Synonyms 1-Hexanol n-Hexyl alcohol n-Amylcarbitol	Clear liquid Floats on water	Colorless	Sweet odor
No pre-discharge is possible. Keep people away. Call fire department. Avoid contact with liquid. Wash and remove discharged material. Notify local health and pollution control agencies.			
Fire	Combustible. Extinguish with dry chemical, alcohol foam, or carbon dioxide. Water may be ineffective on fire.		
Exposure	CALL FOR MEDICAL AID LIQUID Will burn eyes. Harmful if swallowed. Remove clothing immediately. Flush and flush. Flush affected areas with plenty of water. If IN EYES, hold eyelids open and flush with plenty of water. If SWALLOWED and victim is CONSCIOUS, have victim drink water. Notify operators of nearby water bodies.		
Water Pollution	Effect of low concentrations on aquatic life is unknown. Floating to shoreline. May be dangerous if it enters water intakes. Notify local health and pollution control agencies. Notify operators of nearby water bodies.		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 666-4) Mechanical containment Chemical and physical treatment		2. LABELS No hazard label required by Code of Federal Regulations.	
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Amylcarbitol 1-Hexanol n-Hexyl alcohol n-Hydroxyhexane 3.2 Coast Guard Compatibility Classification: Alcohol 3.3 Chemical Formula: C ₆ H ₁₄ O or C ₆ H ₁₃ OH 3.4 IMCO United Nations Numerical Designation: Not listed		4. HXE

1-HEXENE

Common Synonyms: alpha-Hexene Hexene	Watery liquid Colorless Mild pleasant odor Floats on water Flammable, irritating vapor is produced
Stop discharge if possible. Keep people away. Shut off ignition sources and call fire department. Avoid contact with liquid and vapor. Stay upwind and use water spray to knock down vapor. Isolate and remove discharged material. Notify local health and pollution control agencies.	
Fire	FLAMMABLE Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Extinguish with dry chemical, foam, or carbon dioxide. Water may be ineffective in fire. Cool exposed containers with water.
Exposure	CALL FOR MEDICAL AID VAPOR If inhaled, will cause dizziness, difficult breathing, or loss of consciousness. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. LIQUID Irritating to skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. If swallowed, flush mouth and drink plenty of water. IF SWALLOWED AND VOMITING OCCURS, DO NOT DRINK WATER OR MILK. DO NOT INDUCE VOMITING.
Water Pollution	Effect of low concentrations on aquatic life is unknown. Floating to shoreline. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.
1. RESPONSE TO DISCHARGE See Response Methods Handbook, CG 446-4. Issue warning: high flammability. Evacuate area. Dispense and flush.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: alpha-Hexene 3.2 Coast Guard Compatibility Classification: OGCN 3.3 Chemical Formula: C_6H_{12} or $CH_2=CH(CH_2)_3CH_3$ 3.4 IMCO United Nations Numerical Designation: Not listed	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Mild pleasant
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Approved organic vapor respirator or air line mask, protective goggles or face shield. 5.2 Symptoms Following Exposure: Irritation may cause giddiness, dizziness, and stimulation similar to that from gasoline vapor. Prolonged exposure to high concentrations may induce loss of consciousness or death. 5.3 Treatment for Exposure: SKIN OR EYES: wash exposed area as with soap and water. Thoroughly flush eyes with water to remove any splashes. Launder clothing before reuse. 5.4 Toxicity by Inhalation (Threshold Limit Value): Not given suggested. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Data not available. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Slight smarting of the eyes or respiratory system if present in high concentrations. Effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.

REVISED 1978

HXG

HEXYLENE GLYCOL

Common Synonyms: 2-Methyl-2-Pentadecanol	Only liquid Colorless Mild sweet odor Floats and mixes slowly with water
Stop discharge if possible. Call fire department. Isolate and remove discharged material. Notify local health and pollution control agencies.	
Fire	Combustible. Extinguish with dry chemical, alcohol foam, or carbon dioxide. Water may be ineffective on fire. Cool exposed containers with water.
Exposure	CALL FOR MEDICAL AID. LIQUID Irritating to skin and eyes. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.
1. RESPONSE TO DISCHARGE (See Response to Methods Handbook, CG 446.4.) Evacuate area. High flammability. Ventilate. Remove excess. Chemical and physical treatment.	2. LABEL  CORROSIVE
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: None common with hexyls. 3.2 Coast Guard Compatibility Classification: Glycol. 3.3 Chemical Formula: $\text{C}_{16}\text{H}_{34}\text{O}$. 3.4 IMCO United Nations Numerical Designation: N.O. 2040.	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Colorless. 4.3 Odor: Ammoniacal-like.
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Ammonia-type gas mask, self-contained breathing apparatus, protective rubber gloves, clothes, and apron; safety shower must be available. 5.2 Symptoms Following Exposure: Vapors cause itching, swelling, and blistering of eyelids, skin, nose and throat; symptoms may be delayed for several hours. Temporary blindness may occur. Liquid causes a caustic-like burn if not washed off at once. Ingestion or absorption may cause nausea, diarrhea, headache. Severe exposure may cause death. 5.3 Treatment for Exposure: Call a doctor at once. INHALATION: remove to fresh air; observe for development of delayed symptoms. Keep quiet. INGESTION: do NOT induce vomiting; give egg whites or other emollient. SKIN OR EYES: wash with large amounts of water for at least 15 min. 5.4 Toxicity by Inhalation (Threshold Limit Value): 10 ppm. 5.5 Short-Term Inhalation Limits: 10 ppm for 15 min. 5.6 Toxicity by Ingestion: Grade 3 (LD ₅₀ 5000 mg/kg rat). 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Vapor is moderately irritating such that personnel will not usually tolerate moderate or high vapor concentrations. 5.9 Liquid or Solid Irritant Characteristics: Severe skin irritant. Causes second- and third-degree burns on short contact; very serious on the eyes. 5.10 Odor Threshold: Data not available.	

6. FIRE HAZARDS 6.1 Flash Point: 261°F (128°C). 6.2 Flammable Limits in Air: 1.7% (lower). 6.3 Fire Extinguishing Agents: Water, alcohol foam, carbon dioxide, or dry chemical. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Toxic vapors generated when heated. 6.6 Behavior in Fire: May explode if confined. 6.7 Ignition Temperature: May ignite spontaneously (N.A.F. type 1). 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: 1 mm/min (est.).	8. WATER POLLUTION 8.1 Aquatic Toxicity: 140 ppm 95 hr rainbow trout died; fresh water. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): 100% 8.4 Food Chain Concentration Potential: None.																																				
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: Can catch fire when in contact with porous materials such as wood, asbestos, cloth, earth and rusty metal. 7.3 Stability During Transport: Stable at ordinary temperatures. When heated, can decompose to nitrogen and ammonia gases; but decomposition is not hazardous unless material is confined. 7.4 Neutralizing Agents for Acids and Caustics: Flush with water. Neutralize the resulting solution with calcium hypochlorite (HTH) (chlorine of hydrazine). 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9. REVISED 1978

HDZ

HYDRAZINE

Common Synonyms	Watery liquid Colorless Ammonia odor Mixes with water. Poisonous, flammable vapor is produced. Freezing point is 35° F.
Fire	FLAMMABLE Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Wear chemical protective suit with self-contained breathing apparatus. Combat fumes from safe distance or protected location. Block discharge area with water. Extinguish with dry chemical, alcohol foam, or carbon dioxide. Cool exposed containers with water. Continue cooling after fire has been extinguished.
 Exposure	CALL FOR MEDICAL AID VAPOR POISONOUS IF INHALED OR IF SKIN IS EXPOSED. Irritating to eyes. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. LIQUID POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED. Will burn eyes. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. If IN EYES, hold eyelids open and flush with plenty of water. If SWALLOWED and victim is CONSCIOUS, have victim drink water or milk. DO NOT INDUCE VOMITING.
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS. May be dangerous if it enters water intakes. Not a local health and wildlife offense. Not a degradation of nearby water intakes.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: high flammability, corrosive. Restrict access. Chemical and physical treatment.	2. LABELS  
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: No common synonyms. 3.2 Coast Guard Compatibility Classification: Not applicable. 3.3 Chemical Formula: N_2H_4 . 3.4 IMCO/United Nations Numerical Designation: N/A 2010.	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Colorless. 4.3 Odor: Ammonia like.
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Ammonia type gas mask, self-contained breathing apparatus, plastic coated or rubber gloves, clothes, and apron; safety shower must be available. 5.2 Symptoms Following Exposure: Vapors cause itching, swelling, and blistering of eyelids, with nose and throat symptoms may be delayed for several hours. Temporary blindness may occur. Liquid causes a caustic like burn if not washed off at once. Ingestion or absorption through skin causes nausea, dizziness, headache. Severe exposure may cause death. 5.3 Treatment for Exposure: Call a doctor at once. INHALATION: remove to fresh air, where for development of delayed symptoms. Keep quiet. INGESTION: do NOT induce vomiting, give eggs, whites, or other emollients. SKIN OR EYES: wash with large amounts of water for at least 15 min. 5.4 Toxicity by Inhalation (Threshold Limit Value): 1 ppm. 5.5 Short-Term Inhalation Limits: 1 ppm for 30 min. 5.6 Toxicity by Ingestion: Grade III (Dose 50 to 500 mg/kg rat). 5.7 Late Toxicity: Causes lung cancer in mice. 5.8 Vapor (Gas) Irritant Characteristics: Vapor is moderately irritating such that personnel will not usually tolerate moderate or high vapor concentrations. 5.9 Liquid or Solid Irritant Characteristics: Severe skin irritant. Causes second- and third-degree burns on short contact; very injurious to the eyes. 5.10 Odor Threshold: 3-4 ppm.	

6. FIRE HAZARDS 6.1 Flash Point: 100°F (38°C). 6.2 Flammable Limits in Air: 4% - 100%. 6.3 Fire Extinguishing Agents: Water, alcohol foam, carbon dioxide, or dry chemical. 6.4 Fire Extinguishing Agents Not to be Used: None pertinent. 6.5 Special Hazards of Combustion Products: Toxic vapors generated when heated. 6.6 Behavior in Fire: May explode, decompose. 6.7 Ignition Temperature: Maximum: 500°C (932°F). 6.8 Electrical Hazard: Non-pertinent. 6.9 Burning Rate: 1 mm/min.	8. WATER POLLUTION 8.1 Aquatic Toxicity: 140 ppm 96 hr. rainbow trout, dried, fresh water. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): 100% 8.4 Food Chain Concentration Potential: None.																																				
7. REVISED 1978

HCL

HYDROCHLORIC ACID

Common Synonyms Muriatic Acid	Waters liquid Colorless Sharp, irritating odor Sinks and mixes with water. Irritating vapor is produced.
AVOID CONTACT WITH LIQUID AND VAPOR. Keep people away. Wear chemical protective suit with self-contained breathing apparatus. Stop discharge if possible. Stop spraying and use water spray to "break" down vapor. Isolate and remove discharged material. Notify local health and public safety authorities.	
Fire	Not flammable. Flammable gas may be produced on contact with metals. Wear chemical protective suit with self-contained breathing apparatus.
Exposure	CALL FOR MEDICAL AID: VAPOR Irritating to eyes, nose and throat. If inhaled, will cause coughing or difficult breathing. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give artificial respiration. LIQUID Will burn skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush exposed areas with plenty of water. IF IN EYES: hold eyelids open and flush with plenty of water. IF SWALLOWED and conscious: have victim drink water or milk. DO NOT INDUCE VOMITING.
Water Pollution	Dangerous to aquatic life in high concentrations. May be dangerous if it enters water intakes. Notify local health and public safety authorities. Notify appropriate local water treatment.
1. RESPONSE TO DISCHARGE See Response Methods Handbook, CG 444-4. Issue warning - evacuate. Restrict access. Dispense and flush.	
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Muriatic acid. 3.2 Coast Guard Competency Classification: Non-oxidizing mineral acid. 3.3 Chemical Formula: HCl, HClO. 3.4 IMCO United Nations Numerical Designation: 4.0 1749.	2. LABEL  4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Colorless to light yellow. 4.3 Odor: Pungent, sharp, pungent, irritating.
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Self-contained breathing equipment; air line mask; or industrial water or type gas mask; rubber or rubber coated gloves; apron; and overalls; shoes. 5.2 Symptoms Following Exposure: Irritation of tissues results in coughing and choking; vesicles; and irritation of nose and lungs. Liquid causes burns. 5.3 Treatment for Exposure: INHALATION: remove person to fresh air; keep him warm and quiet and get medical attention immediately; start artificial respiration if breathing stops; INGESTION: have person drink water or milk; do NOT induce vomiting; EYES: immediately flush with plenty of water for at least 15 min. and get medical attention; continue flushing for another 15 min. if physician does not arrive promptly; SKIN: immediately flush with water; removing contaminated clothing; get medical attention promptly; use soap and wash area for at least 15 min. 5.4 Toxicity by Inhalation (Threshold Limit Value): 5 ppm. 5.5 Short-Term Inhalation Limits: 5 ppm for 5 min. 5.6 Toxicity by Ingestion: Data not available. 5.7 Late Toxicity: None. 5.8 Vapor (Gas) Irritant Characteristics: Vapor is moderately irritating such that personnel will not usually tolerate moderate or high vapor concentrations. 5.9 Liquid or Solid Irritant Characteristics: Fairly severe skin irritant; may cause pain and second degree burns after a 15-minute contact. 5.10 Odor Threshold: 1.5 ppm.	

6. FIRE HAZARDS 6.1 Flash Point: Not flammable. 6.2 Flammable Limits in Air: Not flammable. 6.3 Fire Extinguishing Agents: Not pertinent. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Toxic and irritating vapors are produced when heated. 6.6 Behavior in Fire: Not pertinent. 6.7 Ignition Temperature: Not flammable. 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: Not flammable.	8. WATER POLLUTION 8.1 Aquatic Toxicity: 242 ppm 96 hr. mosquitofish 11 mg fresh water; 100% Cluppen 48 hr. shrimp 100 salt water. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): None. 8.4 Food Chain Concentration Potential: None.																																				
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: Corrosive to most metals with evolution of hydrogen gas which may form explosive mixtures with air. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Flush with water; apply powdered limestone; slaked lime; soda ash; or sodium bicarbonate. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9. SELECTED MANUFACTURERS Diamond Shamrock Corp. Hays Chemical Division 461 East Commerce Bldg. Cleveland, Ohio 44115. 2. Swaffler Chemical Co. HFA

HYDROFLUORIC ACID

Common Synonyms		Watery liquid	Colorless to green	Irritating, odor
		Sinks and mixes with water. Harmful vapor is produced.		
AVOID CONTACT WITH LIQUID AND VAPOR. Keep people away. Wear chemical protective suit with self-contained breathing apparatus. Spill/discharge: Containable. Spill: Upwind and use water spray to knock down vapor. Evacuate and remove discharge material. Notify local health and pollution control agencies.				
Fire	Not flammable. Flammable gas may be produced on contact with metals. Wear chemical protective suit with self-contained breathing apparatus.			
Exposure	CALL FOR MEDICAL AID. VAPOR Will burn eyes, nose and throat. Harmful if inhaled. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. IF IN EYES: Flush with clean water and flush with plenty of water. LIQUID Will burn skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES: Flush with clean water and flush with plenty of water. IF SWALLOWED: Do not induce vomiting. Have victim drink water if available. DO NOT INDUCE VOMITING.			
Water Pollution	HAZARFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS. May be dangerous if it enters water bodies. Notify local health and wildlife officials. Notify appropriate cleanup water bodies.			
1. RESPONSE TO DISCHARGE (see Response Mapping Handbook, CG 445.4) Isolate warning continue. Restrict access. Deplete and flush.		2. LABEL 		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: No common synonyms. 3.2 Coast Guard Compatibility Classification: Non-oxidizing mineral acid. 3.3 Chemical Formula: HF (H4) 3.4 IMCO United Nations Numerical Designation: 4.0 (240)		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Colorless to slightly yellow. 4.3 Odor: Faintest irritative.		
5. HEALTH HAZARDS				
5.1 Personal Protective Equipment: Proper protective clothing must be worn that encompasses the body, including the face. All persons handling this product must be familiar with and must observe all the precautions contained in the Manufacturer's Chemical Association Chemical Safety Data Sheet SD-25. A shower and an eye wash must be available. 5.2 Symptoms Following Exposure: Severe and painful burns of eyes and skin. 5.3 Treatment for Exposure: INGESTION: Have victim drink water or milk, do NOT induce vomiting. SKIN: If victim has come in contact with liquid or vapor, put him in a shower and call a physician. EYES: Flush with water for at least 15 min. and consult physician. 5.4 Toxicity by Inhalation (Threshold Limit Value): 3 ppm. 5.5 Short-Term Inhalation Limit: 40 ppm for 60 min. 5.6 Toxicity by Ingestion: Data not available. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause severe irritation of eye and throat and can cause eye and lung injury. This cannot be tolerated even at low concentrations. 5.9 Liquid or Solid Irritant Characteristics: Severe skin irritant. Causes second- and third-degree burns on short contact. Very dangerous to the eyes. 5.10 Odor Threshold: Data not available.				

6. FIRE HAZARDS

- 6.1 Flash Point: Not flammable.
- 6.2 Flammable Limits in Air: Not flammable.
- 6.3 Fire Extinguishing Agents: Not pertinent.
- 6.4 Fire Extinguishing Agents Not to Be Used: Not pertinent.
- 6.5 Special Hazards of Combustion Products: Toxic and irritating vapors are generated when heated.
- 6.6 Behavior in Fire: Not pertinent.
- 6.7 Ignition Temperature: Not flammable.
- 6.8 Electrical Hazards: Not pertinent.
- 6.9 Burning Rate: Not flammable.

8. WATER POLLUTION

- 8.1 Aquatic Toxicity: 60 ppm/l¹ fish lethal, fresh water. *Time period not specified.
- 8.2 Waterbody Toxicity: Data not available.
- 8.3 Biological Oxygen Demand (BOD): None.
- 8.4 Food Chain Concentration Potential: None.

13. PHYSICAL AND CHEMICAL PROPERTIES*

- 13.1 Physical State at 15°C and 1 atm: Liquid.
- 13.2 Molecular Weight: 20.01 g/mol.
- 13.3 Boiling Point at 1 atm: 19.5°C (67.1°F).
- 13.4 Freezing Point: -114.5°C (-174.1°F).
- 13.5 Critical Temperature: 32.8°C (91.0°F).
- 13.6 Critical Pressure: 8.4 atm.
- 13.7 Specific Gravity: 1.14 at 20°C liquid.
- 13.8 Liquid Surface Tension: 22.4 dyne/cm.
- 13.9 Liquid-Water Interfacial Tension: Not pertinent.
- 13.10 Vapor (Gas) Specific Gravity: Not pertinent.
- 13.11 Ratio of Specific Heats of Vapor (Gas): Not pertinent.
- 13.12 Latent Heat of Vaporization: 649 Btu/lb = 36 cal/g = 151 × 10³ J/kg.
- 13.13 Heat of Combustion: Not pertinent.
- 13.14 Heat of Decomposition: Not pertinent.
- 13.15 Heat of Solution: 46.6 Btu/lb = 37.0 cal/g = 155 × 10³ J/kg.
- 13.16 Heat of Polymerization: Not pertinent.

*Physical properties are for 100% pure material.

NOTES

HBR

HYDROGEN BROMIDE

Common Synonyms Hydrobromic Acid anhydrous		Liquefied compressed gas Colorless Irritating odor Sinks and mixes with water. Poisonous visible vapor cloud is produced.								
AVOID CONTACT WITH LIQUID AND VAPOR. Keep people away. Wear chemical protective suit with self-contained breathing apparatus. Stop discharge if possible. Stop upward and downward spray by knocking down vapor. Isolate and remove or have it evacuated. Notify local health and pollution control agencies.										
Fire	Not flammable Flammable gas may be produced on contact with metals. Wear chemical protective suit with self-contained breathing apparatus.									
 Exposure	CALL FOR MEDICAL AID. VAPOR POISONOUS IF INHALED. Irritating to eyes, nose and throat. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. LIQUID POISONOUS IF SWALLOWED. Will burn skin and eyes. Will cause frostbite. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES: hold eyelids open and flush with plenty of water. IF SWALLOWED: do not induce vomiting. Have victim drink water or milk. DO NOT INDUCE VOMITING. DO NOT RE-BREATHE AFFECTED AREAS.									
Water Pollution	Dangerous to aquatic life in high concentrations. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify police in case of nearby water intake.									
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 444-3) Issue warning: poison, corrosive, air contaminant. Restrict access. Evacuate area. Disperse and flush.		2. LABEL 								
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Hydrobromic acid, anhydrous; Hydrogen bromide, anhydrous. 3.2 Coast Guard Compatibility Classification: Not listed. 3.3 Chemical Formula: HBr. 3.4 IMCO/United Nations Numerical Designation: 2/104x.		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Compressed liquefied gas. 4.2 Color: Colorless. 4.3 Odor: Sharp pungent irritating.								
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Full face mask and acid gas canister, self-contained breathing apparatus, chemical goggles, rubber apron and gloves, acid-proof clothing, safety shower. 5.2 Symptoms Following Exposure: Inhalation causes severe irritation of nose and upper respiratory tract, lung injury. Ingestion causes burns of mouth and stomach. Contact with eyes causes severe irritation and burns. Contact with skin causes irritation and burns. 5.3 Treatment for Exposure: Get medical attention after all overexposures to this chemical. INHALATION: move victim to fresh air and keep him warm and quiet; if a qualified person is available to give oxygen, such treatment may be helpful. INGESTION: give large amounts of water or milk, do NOT induce vomiting. EYES: flush with water for at least 15 min. SKIN: flush with water, treat acid burns. 5.4 Toxicity by Inhalation (Threshold Limit Value): 3 ppm. 5.5 Short-Term Inhalation Limits: 5 ppm for 5 min. 5.6 Toxicity by Ingestion: Data not available. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.										
6. REVISED 1978

HCN

HYDROGEN CYANIDE

Common Synonyms Hydrocyanic acid Prussic acid	Watery liquid, or gas Colorless Bitter almond odor
Sinks and mixes with water. Poisonous, flammable vapor is produced and rises. Boiling point is 78° F.	
AVOID CONTACT WITH LIQUID AND VAPOR. EVACUATE AREA. WEAR CHEMICAL PROTECTIVE SUIT WITH SELF-CONTAINED BREATHING APPARATUS. Stop discharge if possible. Call fire department. Shut off ignition sources. Stay upwind and use water spray to knock down vapor. Isolate and remove discharged material. Notify local health and pollution control agencies.	
Fire	FLAMMABLE Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. WEAR CHEMICAL PROTECTIVE SUIT WITH SELF-CONTAINED BREATHING APPARATUS. Stop discharge if possible. Cool exposed containers as directed in effecting shut-off with water. Let fire burn.
Exposure	CALL FOR MEDICAL AID. VAPOR POISONOUS IF INHALED OR IF SKIN IS EXPOSED. Irritating to eyes. Move to fresh air. If breathing has stopped, give artificial respiration (but NOT mouth to mouth). If breathing is difficult, give oxygen. LIQUID POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED. Irritating to eyes. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk and have victim induce vomiting. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-1.) Issue warning. High flammability. Water contaminant. Restrict access to water area.	2. LABELS 
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Hydrocyanic acid Prussic acid 3.2 Coast Guard Compatibility Classification: Not applicable. 3.3 Chemical Formula: HCN 3.4 IMO/United Nations Numerical Designation: 20 1051	4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless to bluish white 4.3 Odor: Characteristic sweetish like almond
5 HEALTH HAZARDS CAUTION: Class 3 poison gas hazard can be caused by ingestion, inhalation, or absorption of liquid or vapor through skin, particularly eyes, mucous membranes, and feet. 5.1 Personal Protective Equipment: Escape purposes only: air escape mask with 5 minute air cylinder. Work purposes: vapor proof emergency suit or vinyl coated coverall plus air mask with clear view facepiece, speaking diaphragm, demand regulator and 30-minute air cylinder. Rubber gloves, chemical safety goggles, quick opening safety shower. 5.2 Symptoms Following Exposure: Irritation of throat, palpitation, difficult breathing, reddening of eyes, salivation, nausea, headache, weakness of arms and legs, dizziness, followed by collapse and convulsions. 5.3 Treatment for Exposure: Call doctor. If breathing has stopped, give artificial respiration until doctor arrives. IMMEDIATELY remove patient to fresh air. SKIN CONTACT: remove contaminated clothing and wash skin thoroughly with copious quantities of water and soap. EYE CONTACT: hold eyelids apart and wash eyes with continuous gentle stream of water for at least 15 min. If patient is unconscious, administer amyl nitrite by crushing a pearl (ampule) in a cloth and holding this under patient's nose or 15 seconds every 15 minutes. Do not interrupt artificial respiration. Replace amyl nitrite pearl when its strength is spent. Continue treatment until patient's condition improves or doctor arrives. 5.4 Toxicity by Inhalation (Threshold Limit Value): 10 ppm 5.5 Short-Term Inhalation Limits: 20 ppm for 30 min 5.6 Toxicity by Ingestion: Grade 4: Less than 50 mg/kg	

6 FIRE HAZARDS 6.1 Flash Point: 0.1°C 6.2 Flammable Limits in Air: 5.6% - 40.0% 6.3 Fire Extinguishing Agents: Stop flow of gas. 6.4 Fire Extinguishing Agents Not to be Used: None. 6.5 Special Hazards of Combustion Products: Extremely toxic vapors are generated even at ordinary temperatures. 6.6 Behavior in Fire: Containers may explode with ignition of contents. 6.7 Ignition Temperature: 1004°C 6.8 Electrical Hazard: Data not available. 6.9 Burning Rate: 1.5 mm/min	8. WATER POLLUTION 8.1 Aquatic Toxicity: 0.16 ppm/72 hr. young bass; 11 mg/l fresh water. 0.069 ppm/24 hr. pin perch; 11 mg/l salt water. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: None.																																				
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: Dissolves with a moderate reaction. 7.2 Reactivity with Common Materials: None. 7.3 Stability During Transport: May become unstable and subject to explosion if stored for extended time or exposed to high temp. and pressure. 7.4 Neutralizing Agents for Acids and Caustics: The weak acidity can be neutralized by slaked lime, but this does not destroy the poisonous property. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9. REVISED 1978

HFX

HYDROGEN FLUORIDE

Common Synonyms Hydrofluoric acid anhydrous		Liquid	Colorless	Sharp irritating odor
Sinks and mixes with water. Poisonous vapor is produced and slowly rises. Boiling point is 67° F.				
AVOID CONTACT WITH LIQUID AND VAPOR. Keep people away. Wear chemical protective suit including self-contained breathing apparatus. Stop discharge if possible. Stay upwind and use water spray to knock down vapor. Isolate and remove discharged material. Notify local health and pollution control agencies.				
Fire		Not flammable. Flammable gas may be produced on contact with metals. Wear chemical protective suit including self-contained breathing apparatus.		
 Exposure		CALL FOR MEDICAL AID VAPOR POISONOUS IF INHALED Irritating to eyes, nose and throat. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. LIQUID POISONOUS IF SWALLOWED Will burn skin and eyes. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk. DO NOT INDUCE VOMITING.		
Water Pollution		HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook CG 448-4) Issue warning: poison corrosive. Restrict access. Evacuate area. Disperse and flush.		2. LABEL  CORROSIVE		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Hydrofluoric acid anhydrous 3.2 Coast Guard Compatibility Classification: Inorganic acid 3.3 Chemical Formula: HF 3.4 IMCO/United Nations Numerical Designation: 2.0 1052		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Pungent irritating		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Acid resistant hat, safety goggles, face shield, jacket, overalls, gauntlet type gloves, and boots. The goggles and face shield must have plastic lenses. There must be a shower and an eye wash. Observe all precautions contained in the Manufacturing Chemists' Association Chemical Safety Data Sheet SD-25. 5.2 Symptoms Following Exposure: Serious and painful burns of eyes, skin and respiratory tract, pulmonary edema. 5.3 Treatment for Exposure: INGESTION: have victim drink water or milk, do NOT induce vomiting. SKIN: flush with water, consult physician. EYES: flush with water for at least 15 min., consult physician. 5.4 Toxicity by Inhalation (Threshold Limit Value): 3 ppm 5.5 Short-Term Inhalation Limits: 3 ppm for 15 min. 5.6 Toxicity by Ingestion: Oral LD ₅₀ = 80 mg/kg (guinea pig) 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause severe irritation of eye and throat and ear, cause eye and lung injury. They cannot be tolerated even at low concentrations. 5.9 Liquid or Solid Irritant Characteristics: Severe skin irritant. Causes second and third degree burns on short contact, very injurious to the eyes. 5.10 Odor Threshold: 0.03 mg/m ³				

6 FIRE HAZARDS 6.1 Flash Point: Not flammable 6.2 Flammable Limits in Air: Not flammable 6.3 Fire Extinguishing Agents Not pertinent 6.4 Fire Extinguishing Agents Not to be Used. Not pertinent 6.5 Special Hazards of Combustion Products Toxic and irritating vapors are generated when heated 6.6 Behavior in Fire: Not pertinent 6.7 Ignition Temperature: Not flammable 6.8 Electrical Hazard: Not pertinent 6.9 Burning Rate: Not flammable	8 WATER POLLUTION 8.1 Aquatic Toxicity: 40 ppm * fish lethal, fresh water. *Time period not specified 8.2 Waterfowl Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): None 8.4 Food Chain Concentration Potential: None																																				
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: Dissolves with liberation of heat 7.2 Reactivity with Common Materials: Will attack glass, concrete and certain metals, especially those containing silica, such as cast iron. Will attack natural rubber, leather, and many organic materials. May generate flammable hydrogen gas in contact with some metals. 7.3 Stability During Transport: Stable 7.4 Neutralizing Agents for Acids and Caustics: Flush with water, apply powdered limestone, slaked lime, soda ash, or sodium bicarbonate 7.5 Polymerization: Not pertinent 7.6 Inhibitor of Polymerization: Not pertinent	9 SELECTED MANUFACTURERS 1. HXX

HYDROGEN, LIQUEFIED

Common Synonyms		Liquefied compressed gas	Colorless	Odorless
Liquid hydrogen		Floats and boils on water. Flammable visible vapor cloud is produced.		
Shut off ignition sources. Call fire department. Avoid contact with liquid. Keep people away. Stop discharge if possible. Stay upwind. Use water spray to knock down vapor.				
Fire	FLAMMABLE Flame is almost invisible. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Evacuate surrounding area. Stop flow of gas if possible. Cool exposed containers and protect neck effecting shutoff with water.			
Exposure	VAPOR If inhaled in high concentrations will cause difficult breathing or loss of consciousness. Move victim to fresh air. If breathing has stopped, give artificial respiration. LIQUID Will cause frostbite. Flush affected areas with plenty of water. DO NOT RE-ENTRATED AREAS.			
Water Pollution	Not harmful to aquatic life.			
1. RESPONSE TO DISCHARGE (See Response Methods Handbook CG 446-1) Issue warning - high flammability. Restrict access. Evacuate area.		2. LABEL 		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Liquid hydrogen para Hydrogen 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: H ₂ 3.4 IMCO/United Nations Numerical Designation: 2.1966		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: None		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Safety goggles or face shield, insulated gloves and long sleeves, cuffless trousers worn outside boots or over high top shoes to be spilled liquid, self-contained breathing apparatus containing air (never use oxygen). 5.2 Symptoms Following Exposure: If atmosphere does not contain enough oxygen, inhalation can cause dizziness, unconsciousness or even death. Contact of liquid with eyes or skin causes freezing similar to a burn. 5.3 Treatment for Exposure: The only effect of exposure to liquid hydrogen is that caused by its unusually low temperature and its action as a simple asphyxiant. INHALATION: if victim is unconscious (due to oxygen deficiency), move him to fresh air and apply resuscitation methods, call physician. EYES: treat for frostbite. SKIN: treat for frostbite, soak in lukewarm water, get medical attention if burn is severe. 5.4 Toxicity by Inhalation (Threshold Limit Value): Gas is non-poisonous but can act as a simple asphyxiant. 5.5 Short-Term Inhalation Limits: Not pertinent. 5.6 Toxicity by Ingestion: Not pertinent (gas with low boiling points). 5.7 Late Toxicity: None. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Not pertinent.				

6 FIRE HAZARDS 6.1 Flash Point: Not pertinent 6.2 Flammable Limits in Air: 4.0% - 7.0% 6.3 Fire Extinguishing Agents: Let fire burn, shut off gas supply 6.4 Fire Extinguishing Agents Not to be Used: Carbon dioxide 6.5 Special Hazards of Combustion Products: Not pertinent 6.6 Behavior in Fire: Burns with an almost invisible flame 6.7 Ignition Temperature: 1,065°F 6.8 Electrical Hazard: Class I, Group B 6.9 Burning Rate: 9.9 mm/min	8. WATER POLLUTION 8.1 Aquatic Toxicity: None 8.2 Waterfowl Toxicity: None 8.3 Biological Oxygen Demand (BOD): None 8.4 Food Chain Concentration Potential: None								
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: Ambient temperature of water will cause vigorous vaporization of hydrogen 7.2 Reactivity with Common Materials: No chemical reaction, but low temperature causes most materials to become very brittle 7.3 Stability During Transport: Stable 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent 7.5 Polymerization: Not pertinent 7.6 Inhibitor of Polymerization: Not pertinent	9. HPO

HYDROGEN PEROXIDE

Common Synonyms Peroxide Alboox Superoxol		Watery liquid	Colorless	Slightly sharp odor
		Sinks and mixes with water. Irritating vapor is produced.		
AVOID CONTACT WITH LIQUID AND VAPOR. Keep people away. Wear chemical protective suit including self-contained breathing apparatus. Stop discharge if possible. Call fire department. Isolate and remove discharged material. Notify local health and pollution control agencies.				
Fire	Not flammable May cause fire and explode on contact with combustibles and metals Containers may explode when heated Wear chemical protective suit including self-contained breathing apparatus Flood discharge area with water			
	CALL FOR MEDICAL AID VAPOR Irritating to eyes, nose and throat Harmful if inhaled Move to fresh air If breathing has stopped, give artificial respiration If breathing is difficult, give oxygen LIQUID Will burn skin and eyes Harmful if swallowed			
Exposure	Remove contaminated clothing and shoes Flush affected areas with plenty of water IF IN EYES, hold eyelids open and flush with plenty of water IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk			
Water Pollution	Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes Notify local health and wildlife officials Notify operators of nearby water intakes			
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446.4.) Issue warning, warn others Restrict access Disperse and flush		2. LABEL 		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Peroxide, Alboox, Superoxol 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: H ₂ O ₂ , H ₂ O 3.4 IMCO United Nations Numerical Designation: 5.1, 2015		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Slightly sharp		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Protective garments, both outer and inner, made of a woven polyester fabric or of modacrylic or polyvinylidene chloride impervious apron made of polyvinyl chloride or polyethylene film, neoprene gloves and boots, goggles 5.2 Symptoms Following Exposure: Although solutions and vapors are non-toxic, they are irritating. Vapors cause discomfort of eyes and nose. Moderately concentrated liquid can cause stinging of the skin and severe stinging sensation. In most cases the stinging subsides quickly and the skin gradually returns to normal without any damage. Highly concentrated liquid, in case blistering of skin is left on for any length of time, can also cause eye damage. 5.3 Treatment for Exposure: Contact should be avoided, but immediate flushing with water will prevent any reaction in case of accidental contact. 5.4 Toxicity by Inhalation (Threshold Limit Value): 1 ppm 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Data not available 5.7 Late Toxicity: None 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause moderate irritation, such that personnel will find high concentrations unpleasant. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Fairly severe skin irritant. May cause pain and second degree burns after a few minutes contact. 5.10 Odor Threshold: Not pertinent				

6 FIRE HAZARDS

6.1 **Flash Point:** Not flammable but may cause fire and react violently on contact with combustibles and metals

6.2 **Flammable Limits in Air:** Not flammable

6.3 **Fire Extinguishing Agents:** Water for fires resulting from spillage

6.4 **Fire Extinguishing Agents Not to be Used:** Not pertinent

6.5 **Special Hazards of Combustion Products:** Not pertinent

6.6 **Behavior in Fire:** May explode in fire

6.7 **Ignition Temperature:** Not flammable

6.8 **Electrical Hazard:** Not pertinent

6.9 **Burning Rate:** Not flammable

7 CHEMICAL REACTIVITY

7.1 **Reactivity with Water:** No reaction

7.2 **Reactivity with Common Materials:** Dirt and many metals cause a rapid decomposition with liberation of oxygen gas occurs particularly if concentration is above 40%

7.3 **Stability During Transport:** Pure grades are quite stable, but contamination with metals or dirt can cause rapid or violent decomposition

7.4 **Neutralizing Agents for Acids and Caustics:** Not pertinent

7.5 **Polymerization:** Not pertinent

7.6 **Inhibitor of Polymerization:** Not pertinent

8 WATER POLLUTION

8.1 **Aquatic Toxicity:** >40 ppm *fingerting trout toxic, salt water
*Time period not specified

8.2 **Waterlow Toxicity:** Data not available

8.3 **Biological Oxygen Demand (BOD):** None

8.4 **Food Chain Concentration Potential:** None

NOTES

REVISED 1978

HDS

HYDROGEN SULFIDE

Common Synonyms: Sulfuretted hydrogen	Liquefied compressed gas: Colorless Rotten egg odor, but odorless at poisonous concentrations Sinks and boils in water. Poisonous, flammable, visible vapor cloud is produced.
Avoid contact with gas. Keep people away. Wear goggles and self-contained breathing apparatus. Shut off gas supply at source and isolate area. No open flames or sparks. Evacuate area. Notify local health and police control agencies.	FLAMMABLE: Flashback along vapor trail may occur. May explode if ignited in an enclosed area. Wear goggles and self-contained breathing apparatus. Shut off gas supply at source. Evacuate area and isolate area.
Fire	ALL FORMS OF VAPOR VAPOR POISONOUS IF INHALED Irritating to eyes. May be fatal if inhaled. Breathing apparatus required. If in EYES: hold closed, pour and flush with plenty of water.
Exposure	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes. Notify local health and police control agencies.
Water Pollution	
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: high flammability, poison. Restrict access. Evacuate area.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Sulfuretted hydrogen 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: H ₂ S 3.4 IMCO United Nations Numerical Designation: 2.0 1053	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid under pressure 4.2 Color: Colorless 4.3 Odor: Offensive odor, like rotten eggs
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Rubber framed goggles, approved respiratory protection. 5.2 Symptoms Following Exposure: Irritation of eyes, nose and throat. If high concentrations are inhaled, hyperpnea and respiratory paralysis may occur. Very high concentrations may produce pulmonary edema. 5.3 Treatment for Exposure: INHALATION: Remove victim from exposure, if breathing has stopped, give artificial respiration, administer oxygen if needed, consult physician. EYES: wash with plenty of water. 5.4 Toxicity by Inhalation (Threshold Limit Value): 10 ppm 5.5 Short-Term Inhalation Limit: 200 ppm for 10 min., 100 ppm for 30 min., and 50 ppm for 60 min. 5.6 Toxicity by Ingestion: Hydrogen sulfide is present as a gas at room temperature, so ingestion not likely. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Vapor is moderately irritating such that personnel will not usually tolerate moderate or high vapor concentrations. 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain, may cause smearing and reddening of the skin. 5.10 Odor Threshold: 0.0047 ppm	

6. FIRE HAZARDS 6.1 Flash Point: Flammable gas. 6.2 Flammable Limits in Air: 4.3% - 45% 6.3 Fire Extinguishing Agents: Stop flow of gas. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Toxic gases are generated in fires. 6.6 Behavior in Fire: Vapor is heavier than air and may travel considerable distance to a source of ignition and flash back. 6.7 Ignition Temperature: 500°F 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: 2.3 mm/min (liquid)	8. WATER POLLUTION 8.1 Aquatic Toxicity: 1.35 ppm (48 hr.) fathead minnow, 11 m fresh water. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: None.

HDQ

HYDROQUINONE

Common Synonyms 1,4-Benzediol p-Dihydroxybenzene Hydroquinol Pyrocatonic acid Quinol		Solid White, light tan to gray Sinks and mixes with water
Avoid contact with solid and dust. Keep people away. Shut off ignition sources. Call fire department. Stop discharge if possible. Isolate and remove discharged material. Notify local health and pollution control agencies.		
Fire	Combustible Dust cloud may explode if ignited in an enclosed area. Extinguish with water, dry chemicals, foam, or carbon dioxide.	
Exposure	CALL FOR MEDICAL AID DUST Irritating to eyes, nose and throat. Harmful if inhaled. If in eyes, hold eyelids open and flush with plenty of water. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. SOLID Will burn eyes. Irritating to eyes. If swallowed will cause headache, dizziness, nausea, vomiting or loss of consciousness. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. If IN EYES, hold eyelids open and flush with plenty of water. If SWALLOWED and victim is CONSCIOUS, have victim drink water or milk and have victim induce vomiting. If SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.	
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.	
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 444-1) Is it a warning, water contaminant, dispersant and flash?		2. LABELS No hazard label required by Code of Federal Regulations.
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: 1,4-Benzediol, p-Dihydroxybenzene, Hydroquinol, Pyrocatechol, and Quinol. 3.2 Code/Guard Compatibility Classification: Not listed. 3.3 Chemical Formula: 1,4-C ₆ H ₄ (OH) ₂ 3.4 IMCO/United Nations Numerical Designation: Not listed.		4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid. 4.2 Color: Light tan to light gray, white. 4.3 Odor: None.
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Goggles, respirator, or protection of dust is present. 5.2 Symptoms Following Exposure: Ingestion can cause ringing in the ears, nausea, dizziness, a sense of suffocation, increased respiration rate, vomiting, pallor, muscular twitchings, headache, dyspnea, cyanosis, delirium, and collapse; the urine is green or brownish green. Lethal adult dose is 2 grams. Direct contamination of the eye with particles of hydroquinone can cause "mild" eye irritation and may result in ulceration of the cornea. Contact with skin may cause dermatitis. 5.3 Treatment for Exposure: INGESTION: induce vomiting, perform gastric lavage, and follow with a saline cathartic and demulcents; get medical attention. EYES: flush in cool 2% with plenty of water for 15 min; and get medical attention. SKIN: wash with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): 2 mg/m. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 3, LD ₅₀ 370 mg/kg (rats). 5.7 Late Toxicity: Causes bladder cancer in mice; discoloration of eyelids and eye changes in men. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.		

6. FIRE HAZARDS

- 6.1 **Flash Point:** (molten) 350°F (177°C)
 6.2 **Flammable Limits in Air:** Not pertinent.
 6.3 **Fire Extinguishing Agents:** Water, foam, dry chemical, carbon dioxide.
 6.4 **Fire Extinguishing Agents Not to be Used:**
 6.5 **Special Hazards of Combustion Products:**
 6.6 **Behavior in Fire:** Dust explosion is possible.
 6.7 **Ignition Temperature:** Data not available.
 6.8 **Electrical Hazard:** Data not available.
 6.9 **Burning Rate:** Not pertinent.

7. CHEMICAL REACTIVITY

- 7.1 **Reactivity with Water:** No reaction.
 7.2 **Reactivity with Common Materials:**
 7.3 **Stability During Transport:** Stable.
 7.4 **Neutralizing Agents for Acids and Caustics:** Not pertinent.
 7.5 **Polymerization:** Not pertinent.
 7.6 **Inhibitor of Polymerization:** Not pertinent.

8. WATER POLLUTION

- 8.1 **Aquatic Toxicity:** 0.287 ppm/48 hr. goldfish/TL_m/fresh water.
 8.2 **Waterfowl Toxicity:** Data not available.
 8.3 **Biological Oxygen Demand (BOD):** 53%, 5 days; 25% (theo.), 0.5 days as catechol.
 8.4 **Food Chain Concentration Potential:** None.

9. SELECTED MANUFACTURERS

13. PHYSICAL AND CHEMICAL PROPERTIES

- 13.1 **Physical State at 15°C and 1 atm:** Solid.
 13.2 **Molecular Weight:** 110.11.
 13.2 **Boiling Point at 1 atm:** 285°C = 545°F.
 13.4 **Freezing Point:** 13°C = 55°F = 41°F.
 13.5 **Critical Temperature:** Not pertinent.
 13.6 **Critical Pressure:** Not pertinent.
 13.7 **Specific Gravity:** 1.33 at 20°C (solid).
 13.8 **Liquid Surface Tension:** Not pertinent.
 13.9 **Liquid-Water Interfacial Tension:** Not pertinent.
 13.10 **Vapor (Gas) Specific Gravity:** Not pertinent.
 13.11 **Ratio of Specific Heats of Vapor (Gas):** Not pertinent.
 13.12 **Latent Heat of Vaporization:** Not pertinent.
 13.13 **Heat of Combustion:** -11,200 Btu/lb = -6,270 cal/g = -260 × 10³ J/kg.
 13.14 **Heat of Decomposition:** Not pertinent.
 13.15 **Heat of Solution:** Not pertinent.
 13.16 **Heat of Polymerization:** Not pertinent.

(Continued on pages 4 and 6)

NOTES

HAS

HYDROXYLAMINE SULFATE

Common Synonyms Oxammonium sulfate	Solid White Odorless Sinks and mixes with water
AVOID CONTACT WITH SOLID AND DUST. KEEP PEOPLE AWAY. Stop discharge if possible. Isolate and remove discharged material. Notify local health and pollution control agencies.	
Fire	Not Flammable POISONOUS GASES MAY BE PRODUCED IN FIRE
 Exposure	CALL FOR MEDICAL AID DUST Irritating to eyes, nose and throat. If inhaled will cause difficult breathing or loss of consciousness. If in eyes, hold eyelids open and flush with plenty of water. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. SOLID POISONOUS IF SWALLOWED Irritating to skin and eyes. If swallowed will cause nausea or loss of consciousness. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk and have victim induce vomiting. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-1) Issue warning - water contaminant. Restrict access. Impervise and flush.	2 LABELS No hazard label required by Code of Federal Regulations.
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Oxammonium sulfate. 3.2 Coast Guard Compatibility Classification: Not listed. 3.3 Chemical Formula: $(NH_2OH)_2 H_2SO_4$. 3.4 IMCO/United Nations Numerical Designation: Not listed.	4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Crystals. 4.2 Color: White. 4.3 Odor: None.
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Acid resistant protective clothing, including coveralls, wrist-length gloves, cap, goggles, and dust mask. 5.2 Symptoms Following Exposure: Inhalation of dust or ingestion may cause systemic poisoning characterized by exanema, methemoglobinemia, convulsions, and coma. Contact with eyes or skin causes irritation. 5.3 Treatment for Exposure: INHALATION: remove victim to fresh air, get medical attention if symptoms occur. INGESTION: give large amounts of water, induce vomiting, get medical attention. EYES: flush with water for at least 15 min. and get medical attention. SKIN: flush immediately with plenty of water, then wash with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade III Dose 50-500 mg/kg. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.	

6 FIRE HAZARDS 6.1 Flash Point: Not flammable. 6.2 Flammable Limits in Air: Not flammable. 6.3 Fire Extinguishing Agents: Not pertinent. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Sulfuric acid fumes may form in fire. 6.6 Behavior in Fire: Not pertinent. 6.7 Ignition Temperature: Not pertinent. 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: Not pertinent.	7 POLLUTION 7.1 Aquatic Toxicity: Data not available. 7.2 Waterfowl Toxicity: Data not available. 7.3 Biological Oxygen Demand (BOD): Data not available. 7.4 Food Chain Concentration Potential: None.
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: May be corrosive to metals in presence of moisture. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Flush with water. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9 SELECTED MANUFACTURERS 1. Commercial Solvents Corp. 245 Park Avenue New York, N.Y. 10017 2. Virginia Chemicals, Inc. 3340 W. Norfolk Road Portsmouth, Va. 23703 3. Dow-Badische Co. Williamsburg, Va. 23185.
11. HAZARD ASSESSMENT CODE (See Hazard Assessment Handbook, CG 446-3) SS	10 SHIPPING INFORMATION 10.1 Grades or Purity: Commercial 97-99% 10.2 Storage Temperature: Ambient. 10.3 Inert Atmosphere: No requirement. 10.4 Venting: Open.
12. HAZARD CLASSIFICATIONS 12.1 Code of Federal Regulations: Not listed. 12.2 NAE Hazard Rating for Bulk Water Transportation: Not listed. 12.3 NFPA Hazard Classifications: Not listed.	13 PHYSICAL AND CHEMICAL PROPERTIES 13.1 Physical State at 15°C and 1 atm: Solid. 13.2 Molecular Weight: 164.14. 13.3 Boiling Point at 1 atm: Not pertinent (decomposes). 13.4 Freezing Point: Not pertinent. 13.5 Critical Temperature: Not pertinent. 13.6 Critical Pressure: Not pertinent. 13.7 Specific Gravity: >1 at 20°C (solid). 13.8 Liquid Surface Tension: Not pertinent. 13.9 Liquid-Water Interfacial Tension: Not pertinent. 13.10 Vapor (Gas) Specific Gravity: Not pertinent. 13.11 Ratio of Specific Heats of Vapor (Gas): Not pertinent. 13.12 Latent Heat of Vaporization: Not pertinent. 13.13 Heat of Combustion: Not pertinent. 13.14 Heat of Decomposition: Not pertinent. 13.15 Heat of Solution: Not pertinent. 13.16 Heat of Polymerization: Not pertinent.
NOTES (Continued on page 5 and 6)	

HPA

HYDROXYPROPYL ACRYLATE

Common Synonyms Propylene glycol monoacrylate 1,2-Propenediol-1-acrylate	Liquid Colorless Faint unpleasant odor May float or sink in water
Avoid contact with liquid and vapor. Keep people away from ignition sources. Call fire department. Stop discharge if possible. Isolate and remove discharged material. Notify local health and pollution control agencies.	
Fire	Combustible CONTAINERS MAY EXPLODE IN FIRE Extinguish with dry chemicals, foam, or carbon dioxide. Water may be ineffective on fire. Cover exposed containers with water. COMBAT FROM A SAFE DISTANCE OR PROTECTED LOCATION.
Exposure	CALL FOR MEDICAL AID VAPOR Irritating to eyes, nose and throat. If inhaled will cause coughing or difficult breathing. If in eyes, hold eyelids open and flush with plenty of water. If breathing is stopped, give artificial respiration. If breathing is difficult, give oxygen. LIQUID Will burn skin and eyes. If swallowed will cause nausea. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operator if it enters water intakes.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning - water contaminant Restrict access Disperse and flush	2. LABELS No hazard label required by Code of Federal Regulations
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: 1,2-Propenediol-1-acrylate Propylene glycol monoacrylate 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: $\text{CH}_2\text{HOCH}_2\text{HCOOCH}=\text{CH}_2$ 3.4 IMCO/United Nations Numerical Designation: Not listed	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Slightly acrid
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Rubber gloves, apron, and boots; worker's goggles or face shield. 5.2 Symptoms Following Exposure: Inhalation irritates nose and throat and causes coughing. Lung injury may occur. Ingestion causes irritation and burning of mouth and stomach. Vapor irritates eyes. Contact with liquid causes severe burns of eyes and burns of skin. 5.3 Treatment for Exposure: INHALATION: If all effects occur, get patient to fresh air, keep him quiet and warm, and get medical attention. If breathing stops, start artificial respiration. INGESTION: Force milk or water immediately, induce vomiting only at physician's recommendation. EYES: Promptly flush with plenty of water and get medical attention. SKIN: Promptly flush with plenty of water. Get medical attention if burning occurs. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 2 oral LD ₅₀ = 1,230 mg/kg rats. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Vapors are moderately irritating such that personnel will not usually tolerate moderate or high concentrations. 5.9 Liquid or Solid Irritant Characteristics: Severe skin irritant. Causes second- and third-degree burns on short contact and is very injurious to the eyes. 5.10 Odor Threshold: Data not available.	

6. FIRE HAZARDS

- 6.1 **Flash Point:** 212°F (100°C)
 6.2 **Flammable Limits in Air:** 1.1% (LFL)
 6.3 **Fire Extinguishing Agents:** Dry chemical, alcohol, foam, carbon dioxide
 6.4 **Fire Extinguishing Agents Not to be Used:** Water may be ineffective.
 6.5 **Special Hazards of Combustion Products:**
 6.6 **Behavior in Fire:**
 6.7 **Ignition Temperature:** Data not available

IAA

ISOAMYL ALCOHOL

Common Synonyms Fuel oil Fermentable amyl alcohol Isopentyl alcohol 3-Methyl-1-butanol		Liquid Colorless Mild, choking alcohol odor Floats and mixes with water. Irritating vapor is produced.
Spill discharged to sewer. Keep people away. Call fire department. Avoid contact with hazard. Isolate and remove discharged material. Notify local health and pollution control agencies.		
Fire	Combustible: Extinguish with water, dry chemical, alcohol foam, or carbon dioxide. Avoid exposure of containers to water.	
Exposure	CALL FOR MEDICAL AID VAPOR Irritating to eyes, nose, and throat. Harmful if inhaled. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. LIQUID Irritating to eyes. IF IN EYES: Hold eyelids open and flush with plenty of water.	
Water Pollution	Dangerous to aquatic life in high concentrations. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.	
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 68-14) Disperse and flush.		2. LABELS No hazard label required by Code of Federal Regulations.
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Fermentation amyl alcohol; Fuel oil; Isopentyl alcohol; Isopentyl alcohol; 3-Methyl-1-butanol; Ferment oil. 3.2 Coast Guard Compatibility Classification: A1 (small). 3.3 Chemical Formula: C ₅ H ₁₂ O 3.4 IMCO United Nations Numerical Designation: 1.1 (H200, 1.2, 1.20)		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Colorless. 4.3 Odor: Mild odor, alcohol, non-repulsive.
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Face shield to avoid splash. 5.2 Symptoms Following Exposure: Very high vapor concentrations irritate eyes and upper respiratory tract. Continued contact with skin may cause irritation. 5.3 Treatment for Exposure: IF IN: Immediately flush with plenty of water for at least 15 minutes. Get medical attention. SKIN: Flush with water; wash with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): 100 ppm. 5.5 Short-Term Inhalation Limit: Data not available. 5.6 Toxicity by Ingestion: Grade 2.1 D ₅₀ 0.5 to 1 g/kg. 5.7 Late Toxicity: None. 5.8 Vapor (Gas) Irritant Characteristics: Vapor is moderately irritating such that personnel will not usually tolerate moderate or high vapor concentrations. 5.9 Liquid or Solid Irritant Characteristics: Liquid may irritate skin. 5.10 Odor Threshold: Data not available.		

6 FIRE HAZARDS 6.1 Flash Point: 114°F (40°C) 6.2 Flammable Limits in Air: 1.2% - 9.0% (21.2°F) 6.3 Fire Extinguishing Agents: Water spray, dry chemical, alcohol foam, or carbon dioxide 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent 6.5 Special Hazards of Combustion Products: Not pertinent 6.6 Behavior in Fire: Not pertinent 6.7 Ignition Temperature: 662°F 6.8 Electrical Hazard: Class I, Group C 6.9 Burning Rate: 16 mm/min	8 WATER POLLUTION 8.1 Aquatic Toxicity: 100 ppm 48 hr; goldfish, acetic acid, fresh water; 400-600 ppm 24 hr; green shrimp, acetic acid, fresh water 8.2 Waterfowl Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): 186% 5 days 8.4 Food Chain Concentration Potential: None

NOTES

IBA

ISOBUTYL ACETATE

Common Synonyms Acetic acid, isobutyl ester	Watery Liquid Colorless Pleasant fruity odor Floats on water. Flammable, irritating vapor is produced.
No discharge of possible toxic vapors. No off-gassing in storage and distribution. No off-gassing in use. No off-gassing in waste disposal. No off-gassing in incineration.	
Fire	FLAMMABLE Flashback along vapor trail may occur. May explode if ignited in an enclosed area. Extinguish with water, carbon dioxide, or dry chemical. Water may be ineffective.
Exposure	CAUTION MEDICAL USE VAPOR Irritating to eyes, nose and throat. If inhaled, will cause nausea, vomiting, dizziness, or loss of consciousness. May be fatal if inhaled in high concentrations. LIQUID Irritating to skin and eyes. No serious effects if swallowed. Flush mouth with water if swallowed. IF IN EYES Flush with water for at least 15 minutes.
Water Pollution	Effect of low concentrations on aquatic life is unknown. Fouling to shoreline. May be dangerous if it enters water intakes.
1 RESPONSE TO DISCHARGE (See Response Manual Handbook, CG 446-4) Issue warning of high flammability. Evacuate if a Dispense and flush.	2. LABEL 
3 CHEMICAL DESIGNATIONS 3.1 Synonyms Acetic acid isobutyl ester 2 Methyl-1-propyl acetate Beta Methylpropyl ethanoate 3.2 Coast Guard Compatibility Classification Ester 3.3 Chemical Formula $(CH_3)_2CHCOOCH_2CH_3$ 3.4 IMCO/United Nations Numerical Designation 3.2, 1213	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Agreeable, fruity odor in low concentrations; disagreeable in higher concentrations; mild characteristic ester nonresidual.
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: At risk or organic canister mask, chemical goggles. 5.2 Symptoms Following Exposure: Vapors may irritate upper respiratory tract and cause nausea, vomiting, dizziness, and loss of consciousness. Liquid irritates eyes and may irritate skin. 5.3 Treatment for Exposure: INHALATION: Remove from exposure if breathing is irregular or has stopped; start resuscitation and give oxygen; call a doctor. EYES: Flush with water for at least 15 minutes. 5.4 Toxicity by Inhalation (Threshold Limit Value): 150 ppm 5.5 Short-Term Inhalation Limit: Data not available 5.6 Toxicity by Ingestion: Data not available 5.7 Lele Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause a slight stinging of the eyes or respiratory system if present in high concentrations. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain may cause stinging and reddening of the skin. 5.10 Odor Threshold: Data not available.	

6 FIRE HAZARDS 6.1 Flash Point: 62°F C.C., 85°F O.C. 6.2 Flammable Limits in Air: 2.4% - 10.5% 6.3 Fire Extinguishing Agents: Foam, carbon dioxide and dry chemical. 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective. 6.5 Special Hazards of Combustion Products: Not pertinent. 6.6 Behavior in Fire: Not pertinent. 6.7 Ignition Temperature: 93°F 6.8 Electrical Hazard: Class I group D. 6.9 Burning Rate: Data not available.	8. WATER POLLUTION 8.1 Aquatic Toxicity: 1200 ppm/24 hr/brown shrimp/TLM. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): 47% of theoretical in 5 days, freshwater, acclimated seed. 8.4 Food Chain Concentration Potential: None.																																				
7 CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: Solvents and dissolves many plastics. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9 SELECTED MANUFACTURERS 1 Eastman Kodak Co. IAL

ISOBUTYL ALCOHOL

Common Synonyms Isobutanol Isopropylcarbinol 2-Methyl-1-propanol		Only liquid Colorless Mild alcohol, choking odor
Fire		FLAMMABLE Flashback along vapor trail may occur Vapor may explode if ignited in an enclosed area Extinguish with dry chemical, alcohol, carbon dioxide Water may be ineffective Cool exposed containers with water
Exposure		CALL FOR MEDICAL AID VAPOR Irritating to eyes, nose and throat If inhaled, will cause nausea, dizziness, or headache Move to fresh air If breathing has stopped, give artificial respiration If breathing is difficult, give oxygen LIQUID Irritating to eyes Harmful if swallowed IF SWALLOWED, DO NOT INDUCE VOMITING. Flush with plenty of water IF SWALLOWED and soon is CONSCIOUS, have victim drink water or milk
Water Pollution		Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes No toxic effects reported with fish No reported effects on birds or other animals
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Disperse and flush		2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Isobutanol Isopropylcarbinol 2-methyl-1-propanol Fermentation butyl alcohol 3.2 Coast Guard Compatibility Classification: Alcohol 3.3 Chemical Formula: (CH ₃) ₂ CHCH ₂ OH 3.4 IMCO/United Nations Numerical Designation: 3.3/1212		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Slightly suffocating, nonresidual, alcoholic
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Air pack or organic canister, chemical goggles 5.2 Symptoms Following Exposure: Contact with eyes is extremely irritating and may cause burns. Breathing vapors will be irritating to the nose and throat. In high concentrations, may cause nausea, dizziness, headache, and stupor. 5.3 Treatment for Exposure: INHALATION: If victim is overcome by vapors, remove him from exposure immediately, call a physician. If breathing is irregular or has stopped, start resuscitation, administer oxygen. IF EYES: Flush with water for at least 15 min. 5.4 Toxicity by Inhalation: Threshold Limit Value: 100 ppm 5.5 Short-Term Inhalation Limit: 200 ppm for 60 min 5.6 Toxicity by Ingestion: Grade 2 LD ₅₀ 0.5 to 5 g/kg (rat) 5.7 Lethal Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause a slight smarting of the eyes or respiratory system if present in high concentrations. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: No appreciable hazard. Practically harmless to the skin. 5.10 Odor Threshold: Data not available

IAM

ISOBUTYLAMINE

Common Synonyms Monoisobutylamine 1-Amino-2-methylpropane	Liquid Colorless Strong ammonia odor
Floats and mixes with water	
Stop discharge if possible. Keep people away. Shut off ignition sources. Call fire department. Evacuate area with liquid and vapor. Locate and contain any discharged material. Notify local health and environmental agencies.	
Fire	FLAMMABLE POISONOUS GASES MAY BE PRODUCED IN FIRE Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Wear goggles and self-contained breathing apparatus. Extinguish with dry chemical or carbon dioxide. Water may be on the fire line. Confined containers with water.
Exposure	CALL FOR MEDICAL AID VAPOR Irritating to eyes, nose and throat. If inhaled will cause coughing, difficult breathing or loss of consciousness. If eyes are not, eyelids open and flush with plenty of water. If breathing is not, give artificial respiration. If breathing is difficult, give oxygen. LIQUID Will burn skin and eyes. If swallowed will cause nausea or loss of consciousness. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk. IF SWALLOWED and victim is UNCONSCIOUS, do not drink water or milk. and call for medical assistance.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operator of nearby water intakes.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning - high flammability air contaminant - water contaminant Restrict access Evacuate area Disperse and flush	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: 1-Amino-2-methylpropane Iso Butylamine, Monoisobutylamine 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: (CH₃)₂CHCH₂NH₂ 3.4 IMCO/United Nations Numerical Designation: 3.2/1214	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Strong ammoniacal
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Self-contained breathing apparatus, butyl rubber gloves, chemical face shield, butyl rubber apron. 5.2 Symptoms Following Exposure: Inhalation causes severe coughing and chest pain due to irritation of air passages; can cause lung edema. Compound is sympathomimetic and is also a cardiac depressant, and convulsant. Ingestion causes nausea and profuse salivation. Contact with eyes causes severe irritation and edema of the cornea. Contact with skin causes severe irritation. 5.3 Treatment for Exposure: INHALATION: remove victim to fresh air. If he is not breathing, give artificial respiration, if breathing is difficult, give oxygen, call a physician. INGESTION: give large amount of water followed by dilute vinegar or lemon juice. Keep patient warm. EYES: flush with water for 15 min. SKIN: flush with water. 5.4 Toxicity by Inhalation (Threshold Limit Value): 5 ppm 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 3 oral LD₅₀ = 120 mg/kg (rabbits); 250 mg/kg (rats) 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Vapors are moderately irritating such that personnel will not usually tolerate moderate or high concentrations. 5.9 Liquid or Solid Irritant Characteristics: Severe skin irritant. Causes second- and third-degree burns on short contact and is very injurious to the eyes. 5.10 Odor Threshold: Data not available	

6 FIRE HAZARDS

- 6.1 **Flash Point:** 15°F C.C.
 6.2 **Flammable Limits in Air:** 1.4% - 9%
 6.3 **Fire Extinguishing Agents:** Dry chemical "alcohol" foam, carbon dioxide.
 6.4 **Fire Extinguishing Agents Not to be Used:** Water may be ineffective.
 6.5 **Special Hazards of Combustion Products:** Toxic oxides of nitrogen may be formed in fire.
 6.6 **Behavior in Fire:** Vapor is heavier than air and may travel to a source of ignition and flash back. Containers may explode.
 6.7 **Ignition Temperature:** 712°F
 6.8 **Electrical Hazard:** Data not available
 6.9 **Burning Rate:** 6.03 mm/min

8 WATER POLLUTION

- 8.1 **Aquatic Toxicity:** Data not available
 8.2 **Waterfowl Toxicity:** Data not available
 8.3 **Biological Oxygen Demand (BOD):** Data not available
 8.4 **Food Chain Concentration Potential:** None

13. PHYSICAL AND CHEMICAL PROPERTIES

- 13.1 **Physical State at 15°C and 1 atm:** Liquid
 13.2 **Molecular Weight:** 73.1
 13.3 **Boiling Point at 1 atm:** 153.3°F = 67.4°C = 340.6°K
 13.4 **Freezing Point:** -121.9°F = -85.5°C = 187.7°K
 13.5 **Critical Temperature:** 469.4°F = 243.0°C = 516.2°K
 13.6 **Critical Pressure:** 620 psia = 42.7 atm = 4.3 MN/m²
 13.7 **Specific Gravity:** 0.739 at 20°C (liquid)
 13.8 **Liquid Surface Tension:** 23.70 dynes/cm = 0.0237 N/m at 20°C
 13.9 **Liquid-Water Interfacial Tension:** Not pertinent
 13.10 **Vapor (Gas) Specific Gravity:** 2.5
 13.11 **Ratio of Specific Heats of Vapor (Gas):** 1.073 at 20°C
 13.12 **Latent Heat of Vaporization:** 162 Btu/lb = 101 cal/g = 4.23 × 10³ J/kg
 13.13 **Heat of Combustion:** -17,550 Btu/lb = -9,760 cal/g = -408 × 10³ J/kg
 13.14 **Heat of Decomposition:** Not pertinent
 13.15 **Heat of Solution:** -148 Btu/lb = -82 cal/g = -3.4 × 10³ J/kg
 13.16 **Heat of Polymerization:** Not pertinent

(Continued on pages 4 and 6)

NOTES

IBL

ISOBUTYLENE

Common Synonyms Isobutene 2-Methylpropene	Liquefied compressed gas. Colorless. Sweet gasoline-like odor. Floats and boils on water. Flammable visible vapor cloud is produced.
No fire hazard if possible. Keep people away. Shut off ignition sources and all fire department. Stay upwind and low water may be knocked down. Vapor. Avoid contact with liquid. Soak and remove from gas mixture. No fire hazard if possible. Control fire.	
Fire	FLAMMABLE Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Stop flow if possible. If not exposed containers a minimum of 100 feet should be shut off with water. For fire burn. Extinguish small fires with water. If large, use carbon dioxide.
Exposure	CALL FOR MEDICAL AID VAPOR Irritating to eyes, nose, and throat. If inhaled, will cause dizziness or loss of consciousness. Move to fresh air. If breathing is stopped, give artificial respiration. If breathing is difficult, give oxygen. LIQUID Will cause frostbite. Frostbite affects areas with greatest exposure to water. DO NOT RUB AFFECTED AREAS.
Water Pollution	Not harmful to aquatic life.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446.4.) Issue warning: high flammability. Restrict access. Evacuate area.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Isobutene 2-Methylpropene 3.2 Coast Guard Compatibility Classification: Other 3.3 Chemical Formula: (C_4H_8) 3.4 IMCO/United Nations Numerical Designation: 2.1055	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid under pressure. 4.2 Color: Colorless. 4.3 Odor: Mild, sweetish.
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Chemical gloves and eye protection on organic vapor canister or self-contained breathing apparatus. 5.2 Symptoms Following Exposure: Inhalation of moderate concentrations causes dizziness, drowsiness, and unconsciousness. Contact with eyes or skin may cause irritation. Frostbite may cause frostbite. 5.3 Treatment for Exposure: INHALATION: remove victim to fresh air and apply resuscitation call a physician promptly if victim is unconscious. EYES: if irritated, wash with water. SKIN: if irritated, wash with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): 1000 ppm (8 hr). 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Not pertinent. 5.7 Late Toxicity: None. 5.8 Vapor (Gas) Irritant Characteristics: Vapors are non-irritating to eyes and throat. 5.9 Liquid or Solid Irritant Characteristics: No appreciable hazard. Practically harmless to skin because it is very volatile and evaporates quickly. May cause frostbite. 5.10 Odor Threshold: Data not available.	

FIRE HAZARDS 6.1 Flammable Limits: -10.5% to 6.7% 6.2 Flammable Limits in Air: 1.8% to 9.6% 6.3 Fire Extinguishing Agents: Let fire burn. Stop flow of gas. Water fog, dry chemical or carbon dioxide may be used for small fires. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Not pertinent. 6.6 Behavior in Fire: Containers may explode in fire. Vapor is heavier than air and may travel a long distance to a source of ignition and flash back. 6.7 Ignition Temperature: $869^\circ F$ 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: Data not available.	8. WATER POLLUTION 8.1 Aquatic Toxicity: None. 8.2 Waterlow Toxicity: None. 8.3 Biological Oxygen Demand (BOD): None. 8.4 Food Chain Concentration Potential: None.								
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: No reaction. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9. SELECTED MANUFACTURERS 1. Petro-Tex Chemical Corp. 8600 Park Place Houston, Texas 77017 2. Exxon Chemical Co. Houston, Texas 77001

IBR

ISOBUTYRIC ACID

Common Synonyms: Dimethylacetic acid Isopropylformic acid 2-Methylpropanoic acid Propane-2-carboxylic acid	Liquid Colorless Unpleasant, acid odor Floats and mixes with water
Avoid contact with liquid and vapor. Keep people away. Wear goggles, self-contained breathing apparatus, and rubber or plastic clothing including gloves. Stop discharge if possible. Call fire department. Isolate and remove discharged material. Notify local health and pollution control agencies.	
Fire	Combustible Extinguish with dry chemicals, alcohol foam, or carbon dioxide. Cool exposed containers with water.
Exposure	CALL FOR MEDICAL AID VAPOR Irritating to eyes, nose and throat. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. LIQUID Will burn skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. If IN EYES, hold eyelids open and flush with plenty of water. If SWALLOWED, hold victim's COME TO LIFE victim drink water or milk. DO NOT INDUCE VOMITING.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and pollution control agencies. Notify operators of nearby water intakes.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: corrosive Restrict access Disperse and flush	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Dimethylacetic acid, Isopropylformic acid, 2-Methylpropanoic acid, alpha-Methylpropanoic acid, Propane-2-carboxylic acid 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: (CH ₃) ₂ CHCOOH 3.4 IMCO/United Nations Numerical Designation: Not listed	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Unpleasant, acid
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Organic chemical respirator, goggles or face shield, rubber gloves 5.2 Symptoms Following Exposure: Inhalation causes irritation of nose and throat. Ingestion causes irritation of mouth and stomach. Contact with eyes or skin causes irritation. 5.3 Treatment for Exposure: INHALATION: move to fresh air. INGESTION: give large amounts of water. EYES: flush with water for at least 15 min., get medical attention if irritation persists. SKIN: flush with water. 5.4 Toxicity by Inhalation (Threshold/Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 3, oral LD ₅₀ = 280 mg/kg (rat) 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available

NOTES <i>(Continued on pages 5 and 6)</i>	

IBN

ISOBUTYRONITRILE

Common Synonyms Isopropyl Cyanide IBN 2-Methylpropanenitrile 2-Methylisobutyronitrile		Liquid Colorless Almond-like
AVOID CONTACT WITH LIQUID AND VAPOR. KEEP PEOPLE AWAY. Wear goggles, self-contained breathing apparatus, and protective clothing. Do not breathe vapors. If you get it on your skin, wash it off with plenty of water. If you get it in your eyes, flush them with water for at least 15 minutes. If you swallow it, do not eat or drink. Get medical attention immediately.		Floats on water. Flammable vapor is produced.
Fire	FLAMMABLE Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Wear goggles and self-contained breathing apparatus. Do not breathe vapors. If you get it on your skin, wash it off with plenty of water. If you get it in your eyes, flush them with water for at least 15 minutes. If you swallow it, do not eat or drink. Get medical attention immediately.	
 Exposure	CALL FOR MEDICAL AID VAPOR POISONOUS IF INHALED Irritating to eyes, nose and throat. May be fatal if inhaled. If you get it in your eyes, flush them with water for at least 15 minutes. If you get it on your skin, wash it off with plenty of water. If you swallow it, do not eat or drink. Get medical attention immediately.	
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Not recommended for discharge into water. Not recommended for incineration.	
1 RESPONSE TO DISCHARGE Issue warning: high flammability, poison. Restrict access. Evacuate area. Mechanical containment. Should be removed. Chemical and physical treatment.	2. LABEL 	
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: IBN, Isopropylcyanide, 2-Methylpropanenitrile, 2-Methylisobutyronitrile. 3.2 Coast Guard Compatibility Classification: Not listed. 3.3 Chemical Formula: $(CH_3)_2CHCN$. 3.4 IMCO/United Nations Numerical Designation: Not listed.	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Colorless. 4.3 Odor: Like almonds or benzaldehyde.	
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Self-contained breathing apparatus, goggles, rubber gloves. 5.2 Symptoms Following Exposure: Inhalation, ingestion, or skin contact causes weakness, headache, confusion, nausea, vomiting, acute cyanide poisoning may result. Contact with eyes causes irritation. 5.3 Treatment for Exposure: Get medical attention following all overexposures to this chemical. Watch for symptoms of cyanide poisoning. INHALATION: move patient to fresh air; apply artificial respiration if breathing stops. INGESTION: break an amyl nitrite pearl in a cloth and hold tightly under patient's nose for 15 sec. if he is conscious, induce vomiting and repeat until vomit is clear; repeat inhalation of amyl nitrite 5 times at 15 sec. intervals. EYES: flush with water for at least 15 min. SKIN: flush with water, remove contaminated clothing, destroy contaminated shoes. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion, Grade 1 oral LD ₅₀ = 100 mg/kg (rat). 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.		

6 FIRE HAZARDS 6.1 Flash Point: 47°F (8°C). 6.2 Flammable Limits in Air: Data not available. 6.3 Fire Extinguishing Agents: Dry chemical, foam, carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective. 6.5 Special Hazards of Combustion Products: Toxic, oxides of nitrogen may form in fire. 6.6 Behavior in Fire: 6.7 Ignition Temperature: Data not available. 6.8 Electrical Hazard: Data not available. 6.9 Burning Rate: Data not available.	8 WATER POLLUTION 8.1 Aquatic Toxicity: Data not available. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: None.
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9. NOTES (Continued on pages 5 and 6)	

IOC

ISOCTALDEHYDE

Common Synonyms: 6-Methylheptanal Octo aldehyde Isooctaldehyde		Liquid Colorless Mild fruity odor Floats on water
Not to be discharged if possible. Call fire department. Isolate and remove discharged material. Notify local health and pollution control agencies.		
Fire	Combustible Extinguish with dry chemical, foam, or carbon dioxide	
Exposure	CALL FOR MEDICAL AID LIQUID Irritating to eyes. If in eyes, flush eyelids, open and flush with plenty of water.	
Water Pollution	Effect of low concentrations on aquatic life is unknown. Fouling to shoreline. May be dangerous if it enters water intakes. Notify local health and pollution control agencies. Notify operators of nearby water intakes.	
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-7) Mechanical containment Should be removed Chemical and physical treatment		2. LABELS No hazard label required by Code of Federal Regulations.
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Dimethylhexanals Isooctyl aldehyde 6-Methylheptanal 3.2 Coast Guard Competibility Classification: Aldehyde 3.3 Chemical Formula: $(CH_3)_2CH(CH_2)_5CHO$ 3.4 IMCO/United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Mild fruity
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Chemical goggles 5.2 Symptoms Following Exposure: High vapor concentrations produce eye irritation. Liquid may irritate eyes. 5.3 Treatment for Exposure: Remove from exposure. Wash eyes with water for 15 min. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Data not available 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause a slight smarting of the eyes or respiratory system if present in high concentrations. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: No appreciable hazard. Practically harmless to the skin. 5.10 Odor Threshold: Data not available

IAI

ISODECYL ACRYLATE, INHIBITED

Common Synonyms		Liquid	Colorless	Weak odor
Isodecyl acrylate		Floats on water		
May discharge if possible. Keep people away. Call fire department. Isolate and remove discharged material. No fire, health, and pollution control charges.				
Fire	Combustible Mix liquid with dry chemicals (e.g., carbon dioxide). Water may be ineffective in fire. On exposed containers with water.			
Exposure	Can be medical aid. LIQUID Irritating to skin and eyes. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. If IN EYES: Hold eyelids open and flush with plenty of water. If SWALLOWED: If conscious, have victim drink water. If not conscious, do not give anything by mouth.			
Water Pollution	Effect of low concentrations on aquatic life is unknown. Fouling to shoreline. May be dangerous if it enters water intakes. No known acute toxicity to fish. No known potential for long-term effects.			
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: water contaminant Mechanical containment Should be removed Chemical and physical treatment		2. LABELS No label required by Code of Federal Regulations		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: no Decylacrylate 3.2 Coast Guard Competibility Classification: Monomers (14) 3.3 Chemical Formula: $C_{11}H_{20}O_2$ 3.4 IMCO/United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Weak acrylate		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Goggles or face shield, rubber gloves 5.2 Symptoms Following Exposure: Inhalation causes mild irritation of nose and throat. Eyes are mildly irritated by vapor, more severely by liquid. Prolonged contact of liquid with skin may cause irritation. 5.3 Treatment for Exposure: INHALATION: move to fresh air. EYES: flush with water for at least 15 min. after contact with liquid. SKIN: wipe off, wash well with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade I LD ₅₀ 5 to 15 g/kg 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause a slight stinging on the eyes or respiratory system if present in high concentrations. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain, may cause smarting and reddening of the skin. 5.10 Odor Threshold: Data not available				

6. FIRE HAZARDS

- 6.1 Flash Point: 240°F (110°C)
 6.2 Flammable Limits in Air: Data not available.
 6.3 Fire Extinguishing Agents: Foam, dry chemical, carbon dioxide.
 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective.
 6.5 Special Hazards of Combustion Products: Not pertinent.
 6.6 Behavior in Fire: May polymerize to gums/solid. Reaction is not violent.
 6.7 Ignition Temperature: Data not available.
 6.8 Electrical Hazard: Data not available.
 6.9 Burning Rate: Not pertinent.

8 WATER POLLUTION

- 8.1 Aquatic Toxicity: Data not available.
 8.2 Waterfowl Toxicity: Data not available.
 8.3 Biological Oxygen Demand (BOD): Data not available.
 8.4 Food Chain Concentration Potential: None.

10 SHIPPING INFORMATION

- 10.1 Grades or Purity: 97.5%
 10.2 Storage Temperature: Ambient
 10.3 Inert Atmosphere: No requirement.
 10.4 Venting: Open (flame arrester).

11 HAZARD ASSESSMENT CODE

(See Hazard Assessment Handbook, CG 446-3)
 A11Z

13 PHYSICAL AND CHEMICAL PROPERTIES

- 13.1 Physical State at 15°C and 1 atm: Liquid
 13.2 Molecular Weight: 212.4
 13.3 Boiling Point at 1 atm: Not pertinent (polymers).
 13.4 Freezing Point: -148°F = -100°C = 173°K.
 13.5 Critical Temperature: Not pertinent.
 13.6 Critical Pressure: Not pertinent.
 13.7 Specific Gravity: 0.885 at 20°C (liquid).
 13.8 Liquid Surface Tension: (est.)
 30 dynes/cm = 0.030 N/m at 20°C.
 13.9 Liquid-Water Interfacial Tension: (est.)
 30 dynes/cm = 0.030 N/m at 20°C.
 13.10 Vapor (Gas) Specific Gravity: Not pertinent.
 13.11 Ratio of Specific Heats of Vapor (Gas): Not pertinent.
 13.12 Latent Heat of Vaporization: 110 Btu/lb
 = 61 cal/g = 2.6×10^5 J/kg.
 13.13 Heat of Combustion: (est.)
 -16,300 Btu/lb = -9,100 cal/g
 = -1.6×10^7 J/kg.
 13.14 Heat of Decomposition: Not pertinent.
 13.15 Heat of Solution: Not pertinent.
 13.16 Heat of Polymerization: (est.)
 -119 Btu/lb = -66 cal/g = -2.8×10^6 J/kg.

(Continued on pages 4 and 6)

NOTES

ISA

ISODECYL ALCOHOL

Common Synonyms		Liquid	Colorless	Mild alcohol odor
		Soluble in water		
Read MSDS for liquid, keep away from heat, flame, or open flame. Do not use in confined spaces. Do not use in areas where smoking is prohibited. Do not use in areas where food or drink is consumed. Do not use in areas where children are present. Do not use in areas where pets are present. Do not use in areas where electrical equipment is present. Do not use in areas where flammable materials are present. Do not use in areas where oxidizing materials are present. Do not use in areas where corrosive materials are present. Do not use in areas where toxic materials are present. Do not use in areas where radioactive materials are present. Do not use in areas where hazardous materials are present. Do not use in areas where environmental hazards are present. Do not use in areas where safety hazards are present. Do not use in areas where health hazards are present. Do not use in areas where property hazards are present. Do not use in areas where other hazards are present.				
Fire		Combustible Flash point: 220°F (82°C) Autoignition: 400°F (204°C) Extinguishing: Alcohol foam, dry chemicals or carbon dioxide		
Exposure		CAUTION: MEDICAL LIQUID Will burn skin and eyes. R1: Irritant R2: Harmful R3: May cause drowsiness or dizziness R4: May cause fatigue or numbness R5: May cause loss of consciousness R6: May cause respiratory irritation R7: May cause skin irritation R8: May cause eye irritation R9: May cause allergic reaction R10: May cause harm to the environment R11: Very Irritant R12: Harmful to Aquatic Life R13: May cause environmental damage R14: May cause harm to the ozone layer R15: May cause harm to the atmosphere R16: May cause harm to the soil R17: May cause harm to the water R18: May cause harm to the land R19: May cause harm to the air R20: May cause harm to the water R21: May cause harm to the land R22: May cause harm to the air R23: May cause harm to the water R24: May cause harm to the land R25: May cause harm to the air R26: May cause harm to the water R27: May cause harm to the land R28: May cause harm to the air R29: May cause harm to the water R30: May cause harm to the land R31: May cause harm to the air R32: May cause harm to the water R33: May cause harm to the land R34: May cause harm to the air R35: May cause harm to the water R36: May cause harm to the land R37: May cause harm to the air R38: May cause harm to the water R39: May cause harm to the land R40: May cause harm to the air R41: May cause harm to the water R42: May cause harm to the land R43: May cause harm to the air R44: May cause harm to the water R45: May cause harm to the land R46: May cause harm to the air R47: May cause harm to the water R48: May cause harm to the land R49: May cause harm to the air R50: May cause harm to the water R51: May cause harm to the land R52: May cause harm to the air R53: May cause harm to the water R54: May cause harm to the land R55: May cause harm to the air R56: May cause harm to the water R57: May cause harm to the land R58: May cause harm to the air R59: May cause harm to the water R60: May cause harm to the land R61: May cause harm to the air R62: May cause harm to the water R63: May cause harm to the land R64: May cause harm to the air R65: May cause harm to the water R66: May cause harm to the land R67: May cause harm to the air R68: May cause harm to the water R69: May cause harm to the land R70: May cause harm to the air R71: May cause harm to the water R72: May cause harm to the land R73: May cause harm to the air R74: May cause harm to the water R75: May cause harm to the land R76: May cause harm to the air R77: May cause harm to the water R78: May cause harm to the land R79: May cause harm to the air R80: May cause harm to the water R81: May cause harm to the land R82: May cause harm to the air R83: May cause harm to the water R84: May cause harm to the land R85: May cause harm to the air R86: May cause harm to the water R87: May cause harm to the land R88: May cause harm to the air R89: May cause harm to the water R90: May cause harm to the land R91: May cause harm to the air R92: May cause harm to the water R93: May cause harm to the land R94: May cause harm to the air R95: May cause harm to the water R96: May cause harm to the land R97: May cause harm to the air R98: May cause harm to the water R99: May cause harm to the land R100: May cause harm to the air		
Water Pollution		Effect of low concentrations on aquatic life is unknown Floating to shoreline May be dangerous if it enters water intakes

NOTES

IHA

ISOHEXANE

Common Synonyms * Methylpentane	Watery liquid Gasoline-like odor Floats on water. Flammable, irritating vapor is produced.
Vapors are flammable. Keep away from heat, sparks, open flames, and other sources of ignition. Do not use near water. Do not use in confined spaces. Do not use in areas where smoking is prohibited. Do not use in areas where fire is prohibited. Do not use in areas where fire is prohibited.	
Fire	FLAMMABLE Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Do not use in confined spaces.
Exposure	VAPOR Irritating to eyes, nose and throat. If inhaled, will cause dizziness, headache, difficult breathing, or loss of consciousness. LIQUID Irritating to skin and eyes. If swallowed, will cause nausea or vomiting. Do not use in confined spaces.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning - high flammability. Evacuate area. Disperse and flush.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: 2 Methylpentane 3.2 Coast Guard Compatibility Classification: Paraffin 3.3 Chemical Formula: $\text{CH}_3\text{CH}_2\text{CH}_2\text{CH}_2\text{CH}_3$ 3.4 IMCO/United Nations Numerical Designation: 3.1/1208	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Gasoline
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Eye protection (as for gasoline). 5.2 Symptoms Following Exposure: Inhalation causes irritation of respiratory tract, cough, mild depression, cardiac arrhythmias. Aspiration causes severe lung irritation, coughing, pulmonary edema, excitement followed by depression. Ingestion causes nausea, vomiting, swelling of abdomen, headache, depression. 5.3 Treatment for Exposure: INHALATION: maintain respiration, give oxygen if needed. ASPIRATION: enforce bed rest, give oxygen. INGESTION: do NOT induce vomiting, call a doctor. EYES: wash with copious amount of water. SKIN: wipe off, wash with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limit: Data not available. 5.6 Toxicity by Ingestion: Data not available. 5.7 Late Toxicity: None. 5.8 Vapor (Gas) Irritant Characteristics: Vapors are nonirritating to the eyes and throat. 5.9 Liquid or Solid Irritant Characteristics: No appreciable hazard. Practically harmless to the skin. 5.10 Color Threshold: Data not available.	

6. FIRE HAZARDS 6.1 Flash Point: -20°F (-29°C) 6.2 Flammable Limits in Air: 1.2% - 7.7% 6.3 Fire Extinguishing Agents: Foam, carbon dioxide, or dry chemical. 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective. 6.5 Special Hazards of Combustion Products: Not pertinent. 6.6 Behavior in Fire: Not pertinent. 6.7 Ignition Temperature: 585°F 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: 8.7 mm/min.	8. WATER POLLUTION 8.1 Aquatic Toxicity: Data not available. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: None.																												
7. ISOOCTYL ALCOHOL

Common Synonyms 6-Methyl heptanol Octylalcohol		Liquid	Colorless	Mild odor
		Floats on water		
Spills or leakage if possible call fire department Avoid contact with eyes Flush and remove before and after use of emergency eye wash or irrigation				
Fire	Combustible Extends with flame, chemical, and water Extinguish with water			
Exposure	CALL FORMER MEDICAL ID LIQUID Irritating to skin and eyes Harmful if swallowed Remove from contact Wash affected area with water IF IN EYES: Flush with water for 15 min IF SWALLOWED: Do not induce vomiting. Seek medical attention			
Water Pollution	Effect of low concentration on aquatic life is unknown Floating to shoreline May be dangerous if it enters water intakes Not a health and safety hazard Not a pollution hazard			
1. RESPONSE TO DISCHARGE See Response Methods Handbook, CG 446-4 Mechanical containment Should be recovered Chemical and physical treatment		2. LABELS No hazard label required by Code of Federal Regulations		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Dimethyl heptanols 6-Methyl heptanol 3.2 Coast Guard Compatibility Classification: Alcohol 3.3 Chemical Formula: (C ₈ H ₁₈ O) 3.4 IMCO United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Mild, characteristic		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Air supplied mask in confined areas; plastic gloves, goggles, eye bath and safety shower 5.2 Symptoms Following Exposure: Inhalation hazard slight. Skin contact results in moderate irritation. Liquid contact with eyes causes severe irritation and possible eye damage 5.3 Treatment for Exposure: Remove to fresh air. Flush skin and eye contact area at once for at least 15 min. Get medical care for eyes 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 2 LD ₅₀ 0.5 to 5 g/kg (lab animals) 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Vapors are nonirritating to the eyes and throat 5.9 Liquid or Solid Irritant Characteristics: No appreciable hazard. Practically harmless to the skin 5.10 Odor Threshold: Data not available

IPH

ISOPHORONE

Common Synonyms 1,3,5-Trimethyl-2-cyclohexene Isomer	Liquid Colorless Camphor like odor Floats and moves slowly with water
Fire	Combustible
Exposure	LIQUID Irritating to skin and eyes Harmful if swallowed
Water Pollution	Effect of low concentrations on aquatic life is unknown Floating to shoreline May be dangerous if it enters water intakes
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446.4) Toxic: Irritating to water, mild irritant Persistent: None Mechanism: Irritant Should be removed: Chemically and physically	2. LABELS No other requirements Code = Toxic: Irritant
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: 1,3,5-Trimethyl-2-cyclohexene Isomer 3.2 Coast Guard Compatibility Classification: None 3.3 Chemical Formula: C ₉ H ₁₆ 3.4 IMCO/United Nations Numerical Designation: Not listed	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Camphor-like
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Not listed 5.2 Symptoms Following Exposure: Inhalation irritates eye, nose and throat, causes central depression and has some anesthetic effect. Contact: Liquid with eyes causes severe irritation and possible blindness. No irritation by liquid and may cause prolonged contact. Ingestion: Irritation of mouth and stomach. Treatment for Exposure: INHALATION: Remove from exposure, move to fresh air, give artificial respiration if breathing has stopped. Give artificial respiration and oxygen. EYES: Flush with water. Contact: Flush with water. Ingestion: Give milk or water. Do NOT induce vomiting unless directed. 5.3 Toxicity by Inhalation (Threshold Limit Value): Not listed 5.4 Short-Term Inhalation Limits: Data not available 5.5 Toxicity by Ingestion: Grade 3, oral LD ₅₀ = 4.0 g/kg rat 5.6 Late Toxicity: Data not available 5.7 Vapor (Gas) Irritant Characteristics: Vapor causes moderate irritation with high but no permanent irritation at concentrations above 100 ppm 5.8 Liquid or Solid Irritant Characteristics: Causes irritation of the skin and may cause severe burns on short exposure. May cause second degree burns on long exposure. 5.9 Odor Threshold: Data not available	

6 FIRE HAZARDS

NOTES

IPL

ISOPHTHALIC ACID

Common Synonyms benzene 1,3-dicarboxylic acid m-Phthalic acid		Solid	White	Slight unpleasant odor
		Sinks in water		
Avoid contact with solid and dust. Keep people away. Stop discharge if possible. Shut off ignition sources. Call fire department. Isolate and remove discharged material. Notify local health and pollution control agencies.				
Fire		Combustible Dust cloud may explode if ignited in an enclosed area. Extinguish with water, dry chemicals, foam, or carbon dioxide.		
Exposure		CALL FOR MEDICAL AID DUST Irritating to eyes, nose and throat. If inhaled will cause coughing or difficult breathing. If in eyes, hold eyelids open and flush with plenty of water. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. SOLID Irritating to skin. Deives. If swallowed will cause nausea. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. If IN EYES, hold eyelids open and flush with plenty of water. If SWALLOWED and victim is CONSCIOUS, have victim drink water or milk. If SWALLOWED and victim is UNCONSCIOUS OR HAS LOST CONSCIOUSNESS, do nothing, except keep victim warm.		
Water Pollution		Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and water officials. Notify operators of nearby water intakes.		
1. RESPONSE TO DISCHARGE (See Response Method, Handbook, CG 446-4) Should be removed. Chemical and physical treatment.		2. LABELS No hazard label required by Code of Federal Regulations.		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Benzene 1,3-dicarboxylic acid m-Phthalic acid. 3.2 Coast Guard Compatibility Classification: Not listed. 3.3 Chemical Formula: $C_8H_6O_4$ (COOH). 3.4 IMCO/United Nations Numerical Designation: Not listed.		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid. 4.2 Color: White. 4.3 Odor: Slightly acid.		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: If without adequate ventilation, use respirator with dust filter, goggles, and gloves. 5.2 Symptoms Following Exposure: May cause slight to moderate irritation of eyes, skin, and mucous membranes on prolonged contact. Ingestion may cause gastrointestinal irritation. 5.3 Treatment for Exposure: INHALATION: remove victim to uncontaminated area; get medical attention if complications arise. INGESTION: get medical attention if complications arise. EYES: flush with large amounts of water for 15 min; get prompt medical attention. SKIN: wash with water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade I LD ₅₀ 12.2 g/kg (rat). 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.				

6. IPR

ISOPRENE

Common Synonyms 2-Methyl-1,3-butadiene isoprenyl isoprenyl isoprenyl	Physical State Watery liquid Color Colorless Odor Mild odor Flammability Flammable Boiling Point 93.5°F
Fire	Flammable Flashback along vapor trail may occur Containers may explode in fire Vapor may explode if ignited in an enclosed area Wear self-contained breathing apparatus Combustion from behind barrier is possible Extinguish with chemical dry powder or foam Water may be ineffective in fire Use exposed containers with water
Exposure	Call for Medical Aid Vapor Irritating to eyes, nose and throat May be irritating Physically exhausted person may have difficulty breathing If breathing is difficult, give oxygen Liquid Irritating to skin and eyes Remove clothing and flush with water Push affected area with water If in eyes, flush with water and flush with water
Water Pollution	Harmful to Aquatic Life in Very Low Concentrations May be dangerous if it enters water intakes Severe local health and wildlife effects Notify police and fire water intakes
1 RESPONSE TO DISCHARGE (See Response Methods Handbook CG 446-4) Issue warning - high flammability Restrict access Evacuate area	2 LABEL 
3. CHEMICAL DESIGNATIONS 31 Synonyms: beta-Methylvinyl 2 Methyl-1,3-butadiene 32 Coast Guard Compatibility Classification Olefin 33 Chemical Formula: $CH_2=C(CH_3)CH=CH_2$ 34 IMCO/United Nations Numerical Designation 3.1/1218	4 OBSERVABLE CHARACTERISTICS 41 Physical State (as shipped): Liquid 42 Color: Colorless 43 Odor: Mild aromatic
5. HEALTH HAZARDS 51 Personal Protective Equipment: Vapor proof goggles, self-contained breathing apparatus, leather or rubber safety shoes, rubber gloves 52 Symptoms Following Exposure: Vapor produces no effects other than slight irritation of the eyes and upper respiratory tract. Liquid may irritate eyes, like gasoline 53 Treatment for Exposure: INHALE: Remove victim promptly from irritating or asphyxiating atmosphere. If symptoms of asphyxiation persist, administer artificial respiration and oxygen. Treat symptomatically thereafter. CALL PHYSICIAN. EYES: Flush with water for at least 15 min. 54 Toxicity by Inhalation (Threshold Limit Value): Data not available 55 Short-Term Inhalation Limits: Data not available 56 Toxicity by Ingestion: Data not available 57 Late Toxicity: None 58 Vapor (Gas) Irritant Characteristics: Vapors cause a slight smarting of the eyes or respiratory system if present in high concentrations. The effect is temporary. 59 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain may cause smarting and reddening of the skin. 510 Odor Threshold: 0.005 ppm	

6 FIRE HAZARDS 61 Flash Point -65°F C.C. 62 Flammable Limits in Air: 2% - 9% 63 Fire Extinguishing Agents: Dry chemical foam or carbon dioxide 64 Fire Extinguishing Agents Not to be Used: Water may be ineffective 65 Special Hazards of Combustion Products: Toxic vapors are generated when heated 66 Behavior in Fire: May polymerize in containers and explode 67 Ignition Temperature: 428°F 68 Electrical Hazard: Class I, Group C 69 Burning Rate: 8.6 mm/min	8 WATER POLLUTION 81 Aquatic Toxicity: 75 ppm/96 hr/100% mortality/fresh water 82 Waterfowl Toxicity: Data not available 83 Biological Oxygen Demand (BOD): Data not available 84 Food Chain Concentration Potential: None																																				
7. CHEMICAL REACTIVITY 71 Reactivity with Water: No reaction 72 Reactivity with Common Materials: No reaction 73 Stability During Transport: Stable 74 Neutralizing Agents for Acids and Caustics: Not pertinent 75 Polymerization: Polymerization is accelerated by heat and by oxygen, even by the presence of rusty iron. Iron surfaces should be treated with a suitable reducing agent, such as sodium nitrite, before they are placed into isoprene service. 76 Inhibitor of Polymerization: Tertiary butyl catechol (0.06%) Di- <i>n</i> -butylamine, phenyl beta-naphthylamine and phenyl alpha-naphthylamine are also used. IPR must be inhibited when transported interstate.	9 SELECTED MANUFACTURERS 1 B. I. Goodrich Co. B. I. Goodrich Chemical Co. IAC

ISOPROPYL ACETATE

Common Synonyms Acetic acid isopropyl ester Isopropyl acetate		Waters liquid	Colorless	Pleasant fruity odor
		Floats and mixes slowly with water. Flammable. Irritating vapor is produced.		
Stop discharge if possible. Keep people away. Shut off ignitions sources and call fire department. Spray upward and use water spray to knock down vapor. Avoid contact with liquid and vapor. Isolate and remove discharged material. Notify local health and pollution control agencies.				
Fire	FLAMMABLE Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Extinguish with dry chemical, foam or alcohol. Water may be ineffective on fire. Cool exposed containers with water.			
Exposure	CALL FOR MEDICAL AID VAPOR Irritating to eyes, nose and throat. Move to fresh air. If breathing has stopped give artificial respiration. If breathing is difficult give oxygen. LIQUID Irritating to skin and eyes. Harmful if swallowed. Remove contaminated clothing. Flush affected area with plenty of water. IF IN EYES hold eyelids open and flush with plenty of water. IF SWALLOWED do not induce vomiting. If conscious, flush with water or milk.			
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and pollution control agencies. Notify local water treatment plant.			
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446.4) Issue warning - high flammability. Evacuate area. Disperse and flush.		2. LABEL 		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Acetic acid isopropyl ester Isopropyl acetate 3.2 Coast Guard Compatibility Classification: Ester 3.3 Chemical Formula: CH ₃ COOCH(CH ₃) ₂ 3.4 IMCO United Nations Numerical Designation: 32, 220		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Pleasant, fruity, nonresidual		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Organic vapor respirator or supplied mask, chemical splash goggles or face splash shield. 5.2 Symptoms Following Exposure: Vapors cause eye and respiratory irritation. High concentrations can be asphyxiating. Liquid irritates eyes but causes no serious injury. May cause dermatitis in some cases. 5.3 Treatment for Exposure: INHALATION: If victim is overexposed to vapors, remove from exposure immediately, call a physician for breathing treatment or stopped, start resuscitation and administer oxygen. EYES: Flush with water for at least 15 min. 5.4 Toxicity by Inhalation (Threshold Limit Value): 250 ppm 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 2 (Dangerous to life) 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause a slight irritation of the eye, respiratory system at present in high concentrations. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain may cause smothering and reddening of the skin. 5.10 Odor Threshold: Data not available

ISOPROPYL ALCOHOL

Common Synonyms Isopropanol 2-Propanol Dimethylcarbinol sec-Propyl alcohol Rubbing alcohol		Waters liquid Colorless Unpleasant alcohol odor like rubbing alcohol
Fire		Flammable Flammable-irritating vapor is produced
Exposure		FLAMMABLE Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. CAUTION: With dry chemical, alcohol, and carbon dioxide. Water may be ineffective. Do not expose containers with water.
Water Pollution		CALL FOR MEDICAL AID VAPOR Irritating to eyes, nose and throat. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. LIQUID Irritating to eyes. Harmful if swallowed. IF SWALLOWED, DO NOT induce vomiting. Flush with plenty of water. IF SWALLOWED and victim is UNCONSCIOUS, have victim drink water or milk.
1 RESPONSE TO DISCHARGE See Response Methods Handbook, CG 446-6. Issue warning: High Flammability. Disperse and flush.		2 LABEL 
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Dimethylcarbinol, 2-Propanol Isopropanol, sec-Propyl alcohol Petrolol, Rubbing alcohol 3.2 Coast Guard Compatibility Classification: Alcohol 3.3 Chemical Formula: CH ₃ CHOHCH ₃ 3.4 IMCO United Nations Numerical Designation: 3.2, 1219		4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Like ethyl alcohol, but a somewhat unpleasant character in a mild alcoholic odor.
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Organic vapor respirator (dependent on chemical), goggles, face splash shield. 5.2 Symptoms Following Exposure: Vapor causes mild irritation of eyes and upper respiratory tract. High concentrations may be irritating. Liquid irritates eyes and may cause temporary harmless to skin. Ingested causes drunkenness and vomiting. 5.3 Treatment for Exposure: INHALATION: If victim is overcome by vapors, remove from exposure immediately with a physician if breathing irregular or has stopped. Start respiration and administer oxygen. EYES: Flush with water for at least 15-30 min. 5.4 Toxicity by Inhalation (Threshold Limit Value): 400 ppm 5.5 Short-Term Inhalation Limits: 400 ppm for 10 min. 5.6 Toxicity by Ingestion: Grade I LD ₅₀ 5.0 g/kg (approx. 1.0 g/kg) 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Vapor causes slight irritating character to respiratory system if present in high concentrations. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: No appreciable hazard. Practically non-toxic to the skin. 5.10 Odor Threshold: 90 mg/m ³		

6 FIRE HAZARDS 6.1 Flash Point: 60-100 °C (140-212 °F) 6.2 Flammable Limits in Air: 2.3-12% 6.3 Fire Extinguishing Agents: Alcohol, foam, dry chemical, or carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective. 6.5 Special Hazards of Combustion Products: Not pertinent. 6.6 Behavior in Fire: Not pertinent. 6.7 Ignition Temperature: 290 °C 6.8 Electrical Hazard: Class I Group D. 6.9 Burning Rate: 2.4 mm/min.		8 WATER POLLUTION 8.1 Aquatic Toxicity: 960-1,000 ppm 24 hr. death to fish in fresh water. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): 133-150 days. 8.4 Food Chain Concentration Potential: None.

IPP

ISOPROPYLAMINE

Common Synonyms 2-Aminopropane Monoisopropylamine	Liquid Colorless Strong ammonia odor Floats and mixes with water Flammable; irritating vapor is produced Boiling point is 91°F
Stop discharge if possible. Keep people away. Notify fire department. Notify police. Use water spray to knock down vapor. Avoid contact with liquid and vapor. Isolate and remove contaminated material. Notify local health and pollution control agencies.	
Fire	FLAMMABLE POISONOUS GASES MAY BE PRODUCED IN FIRE Flashback along vapor trail may occur Vapor may explode if ignited in an enclosed area Wear goggles and self-protective breathing apparatus Extinguish with dry chemical, CO ₂ , or water spray Water may be ineffective in fire Do not expose to high temperatures with water
Exposure	CALL FOR MEDICAL AID VAPOR Irritating to eyes, nose and throat If inhaled will cause coughing, difficult breathing or loss of consciousness If eyes are affected, flush with plenty of water If breathing has stopped, remove and start artificial respiration If breathing is difficult, give oxygen LIQUID Will burn skin and eyes If swallowed will cause nausea Remove contaminated clothing Flush affected areas with plenty of water IF SWALLOWED: Do not induce vomiting. Drink plenty of water IF SWALLOWED: Do not induce vomiting. Drink plenty of water IF SWALLOWED: Do not induce vomiting. Drink plenty of water
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes Notify local health and pollution control agencies Notify police and fire department
1 RESPONSE TO DISCHARGE See Response Manual Handbook, CG 446-4 Issue warning of high flammability Notify fire department Notify police Evacuate area Dispose and flush	2 LABEL 
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: 2-Aminopropane Monoisopropylamine, Iso-Propylamine 3.2 Coast Guard Compatibility Classification: Data not available 3.3 Chemical Formula: (CH ₃) ₂ CHNH ₂ 3.4 IMCO/United Nations Numerical Designation: 1.1, 1.2	4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Strong ammonia-like pungent Irritating, typical amine
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Self-contained breathing apparatus, eye shield, rubber gloves and apron, chemical face shield or safety goggles 5.2 Symptoms Following Exposure: Inhalation causes nose and throat irritation, severe coughing and chest pain. Irritation of air passages can cause laryngeal edema and loss of consciousness. Ingestion causes nausea, vomiting and severe irritation of mouth and stomach. Contact with eyes causes severe irritation and possible edema of the cornea. Contact with skin causes severe irritation. 5.3 Treatment for Exposure: INHALATION: removes victim to fresh air if he is not breathing, give artificial respiration if breathing is difficult, give oxygen, call a physician. INGESTION: call a physician immediately, encourage the drinking of large quantities of water, followed by dilute vinegar, lemon juice, or other weak acids. Keep patient warm. EYES: flush with water for 15 min. Holding eyelids apart and physical aid as soon as possible, preferably an eye specialist. SKIN: flush with water. 5.4 Toxicity by Inhalation (Threshold Limit Value): 5 ppm 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Data not available 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Vapors are moderately irritating, such that personnel will not usually tolerate moderate or high concentrations. 5.9 Liquid or Solid Irritant Characteristics: Causes smarting of the skin and first degree burns. In short exposure may cause second degree burns on long exposure. 5.10 Odor Threshold: 5 ppm	

6 FIRE HAZARDS

- 6.1 Flash Point: -18°F (0°C)
 6.2 Flammable Limits in Air: 2.3% - 12%
 6.3 Fire Extinguishing Agents: Dry chemical, alcohol, foam, carbon dioxide
 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective
 6.5 Special Hazards of Combustion Products: Toxic oxides of nitrogen may form in fire
 6.6 Behavior in Fire: Burning isopropylamine is difficult to control because of the ease of reignition of the vapor. Vapors are heavier than air and may travel to a source of ignition and flash back. Containers may explode.
 6.7 Ignition Temperature: 756°F
 6.8 Electrical Hazard: Data not available
 6.9 Burning Rate: 63 mm/min

7 CHEMICAL REACTIVITY

- 7.1 Reactivity with Water: No reaction
 7.2 Reactivity with Common Materials
 7.3 Stability During Transport: Stable
 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent
 7.5 Polymerization: Not pertinent
 7.6 Inhibitor of Polymerization: Not pertinent

8 WATER POLLUTION

- 8.1 Aquatic Toxicity: 40 - 80 ppm, 24 hr. creek chub, fathead minnow, bluegill, rainbow trout
 8.2 Waterfowl Toxicity: Data not available
 8.3 Biological Oxygen Demand (BOD): Data not available
 8.4 Food Chain Concentration Potential: None

9. SELECTED MANUFACTURERS

13 PHYSICAL AND CHEMICAL PROPERTIES

- 13.1 Physical State at 15°C and 1 atm: Liquid
 13.2 Molecular Weight: 59.1
 13.3 Boiling Point at 1 atm: 91.3°F = 32.4°C = 305.6°K
 13.4 Freezing Point: -130°F = -95°C = 178°K
 13.5 Critical Temperature: 396°F = 202°C = 475°K
 13.6 Critical Pressure: 740 psia = 50 atm = 5.1 MN/m²
 13.7 Specific Gravity (relative to water at 20°C): 0.68
 13.8 Liquid Surface Tension: 16.5 dynes/cm = 0.0165 N/m at 20°C
 13.9 Liquid-Water Interfacial Tension: Not pertinent
 13.10 Vapor (Gas) Specific Gravity: 2.04
 13.11 Ratio of Specific Heats of Vapor (Gas):
 13.12 Latent Heat of Vaporization: 193 Btu/lb = 10³ cal/g = 4.4 x 10³ J/kg
 13.13 Heat of Combustion: -16,940 Btu/lb = -9,420 cal/g = -394 x 10³ J/kg
 13.14 Heat of Decomposition: Not pertinent
 13.15 Heat of Solution: Not pertinent
 13.16 Heat of Polymerization: Not pertinent

(continued on page 104)

NOTES

IPE

ISOPROPYL ETHER

Common Synonyms		Liquid	Colorless	Sweet odor
Diisopropyl ether Diisopropyl oxide 2 Isopropoxypropane		Floats and mixes slowly with water. Flammable, irritating vapor is produced.		
Shut off ignition sources. Call fire department. Stop discharge if possible. Keep people away. Stay upwind. Use water spray to "knock down" vapor. Isolate and remove discharged material. Notify local health and pollution control agencies.				
Fire	FLAMMABLE Containers may explode in fire. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Extinguish with dry chemicals, alcohol foam, or carbon dioxide. Water may be ineffective on fire. Cool exposed containers with water.			
Exposure	Call for medical aid. VAPOR Irritating to eyes, nose and throat. If inhaled will cause headache, dizziness, or nausea. Move victim to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. LIQUID Irritating to skin and eyes. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. If IN EYES, flush eyelids open and flush with plenty of water. If SWALLOWED and victim is CONSCIOUS, have victim drink water or milk.			
Water Pollution	Effect of low concentrations on aquatic life is unknown. Fouling to shoreline. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.			
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4.) Issue warning: high flammability. Restrict access. Evacuate area. Disperse and flush.		2. LABEL 		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Diisopropyl ether Diisopropyl oxide 2 Isopropoxypropane 3.2 Coast Guard Compatibility Classification: Ethers (21) 3.3 Chemical Formula: (CH ₃) ₂ CHOCH(CH ₃) ₂ 3.4 IMCO/United Nations Numerical Designation: 311159		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Sweet, slightly sharp character with pungent, ethereal, like camphor and ethyl ether.		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Air pack or organic canister mask, rubber gloves, goggles. 5.2 Symptoms Following Exposure: Inhalation causes anesthesia, nausea, headache, dizziness, and irritation of the eyes and nose. Contact of liquid with eyes causes only minor injury. Repeated contact with skin will remove natural oils and may cause dermatitis. 5.3 Treatment for Exposure: INHALATION: remove victim to fresh air and obtain medical attention immediately. Keep him warm and at rest and give artificial respiration if breathing stops; maintain an open airway. EYES: flush with water for 15 min. SKIN: flush with water. INGESTION: do NOT induce vomiting; seek medical attention. 5.4 Toxicity by Inhalation (Threshold Limit Value): 250 ppm (tentative). 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade I oral LD ₅₀ = 5.470 mg/kg (rat). 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause a slight smarting of the eyes or respiratory system if present in high concentrations. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain, may cause smarting and reddening of the skin. 5.10 Odor Threshold: Data not available.				

6 FIRE HAZARDS

6.1 **Flash Point:** -18°F (0°C) -18°F (0°C)
 6.2 **Flammable Limits in Air:** 1.4% - 9%
 6.3 **Fire Extinguishing Agents:** Dry chemical, alcohol foam, carbon dioxide
 6.4 **Fire Extinguishing Agents Not to be Used:** Water may be ineffective
 6.5 **Special Hazards of Combustion Products:** Not pertinent
 6.6 **Behavior in Fire:** Vapor is heavier than air and may travel a considerable distance to a source of ignition and flash back. Containers may explode when heated
 6.7 **Ignition Temperature:** 830°F
 6.8 **Electrical Hazard:** Data not available
 6.9 **Burning Rate:** 5.0 mm/min

7. CHEMICAL REACTIVITY

7.1 **Reactivity with Water:** No reaction
 7.2 **Reactivity with Common Materials:** No reaction
 7.3 **Stability During Transport:** Unstable peroxides may form on long standing in contact with air; these may explode spontaneously or when heated
 7.4 **Neutralizing Agents for Acids and Caustics:** Not pertinent
 7.5 **Polymerization:** Not pertinent
 7.6 **Inhibitor of Polymerization:** Not pertinent

8 WATER POLLUTION

8.1 **Aquatic Toxicity:** Data not available
 8.2 **Waterflow Toxicity:** Data not available
 8.3 **Biological Oxygen Demand (BOD):** Data not available
 8.4 **Food Chain Concentration Potential:** None

9. SELECTED MANUFACTURERS

1. Shell Chemical Company
 Industrial Chemicals Division
 P. O. Box 2461
 Houston, Texas 77001
 2. Exxon Chemical Company
 P. O. Box 2150
 Houston, Texas 77001
 3. Union Carbide Corporation
 Chemicals and Plastics Division
 270 Park Avenue
 New York, N. Y. 10017

10 SHIPPING INFORMATION

10.1 **Grades or Purity:** 94+%. May contain 0.01% hydroquinone or other inhibitor to prevent peroxide formation
 10.2 **Storage Temperature:** Ambient
 10.3 **Inert Atmosphere:** No requirement
 10.4 **Venting:** Pressure/vacuum

NOTES

IPM

ISOPROPYL MERCAPTAN

Common Synonyms 2 Propanethiol Propane-2 thiol	Liquid White Strong Skunk Odor Floats and mixes with water. Flammable, irritating vapor is produced.
Shut off ignition sources until fire department. Stop discharge if possible. Keep people away. Avoid contact with liquid and vapor. Stay upwind. Use water spray or knock down vapor. Do not eat, drink, or use tobacco. Notify local health and fire departments.	
Fire	FLAMMABLE: Irritating gases may be produced when heated. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Extinct with water. Do not use carbon dioxide or foam. Water may be ineffective. Do not apply water directly to water.
Exposure	ALF TER MEDICAL AID: VAPOR: Irritating to eyes, nose and throat. If inhaled will cause difficult breathing or loss of consciousness. If inhaled, get person to fresh air. If not breathing, give artificial respiration. If swallowed, give plenty of water. LIQUID: Irritating to skin and eyes. If swallowed will cause nausea and vomiting. Remove contaminated clothing and shoes. Flush eyes with water for 15 minutes. If SWALLOWED, give plenty of water. Do not induce vomiting. If SWALLOWED, give plenty of water. Do not induce vomiting. If SWALLOWED, give plenty of water. Do not induce vomiting.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and fire departments. Notify local health and fire departments.

ISOPROPYL PERCARBONATE

Common Synonyms Peroxydicarbonate acid diisopropyl ester Diisopropyl peroxycarbonate Diisopropyl peroxydicarbonate Isopropyl peroxydicarbonate Peroxydicarbonate acid bis(1-methylethyl) ester	Solid (Packed in Dry Ice) White Sharp Unpleasant Odor Sinks in water. Freezing point is 48°F
Stop discharge if possible. Keep people away. Shut off ignition sources. Call fire department. Avoid contact with food and clothing. Do not eat from containers that have been used. Do not use water on fire. Do not use dry chemicals, carbon dioxide, or foam on fire.	
Fire	COMBUSTIBLE May cause fire on contact with combustibles. Will increase the intensity of a fire. Containers may explode in fire. DO NOT USE DRY CHEMICALS, CARBON DIOXIDE, OR FOAM ON FIRE Flood discharge area with water. Do not use water on exposed containers with water.
Exposure	CALL FOR MEDICAL AID DUST Irritating to eyes, nose and throat. If inhaled will cause coughing or difficult breathing. If inhaled, stop breathing and move to fresh air. If inhaled, breathe fresh air. If inhaled, move to fresh air. SOLID Irritating to skin and eyes. Harmful if swallowed. Remove contaminated clothing. Wash affected area with plenty of water. If in eyes, flush with plenty of water. If swallowed, do not induce vomiting. If swallowed, drink plenty of water. If swallowed, do not induce vomiting. If swallowed, drink plenty of water.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes.
1 RESPONSE TO DISCHARGE See Response Methods Handbook, CG 444-4. Is up warning light. Flammability. Strong material. Restrict access. Should be removed. Chemical and physical treatment.	2. LABEL 
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Diisopropyl peroxycarbonate, Diisopropyl peroxydicarbonate, Peroxydicarbonate acid bis(1-methylethyl) ester, Peroxydicarbonate acid diisopropyl ester. 3.2 Coast Guard Compatibility Classification: Not listed. 3.3 Chemical Formula: C ₁₂ H ₂₀ O ₆ 3.4 IMCO/United Nations Numerical Designation: Not listed.	4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid. Containers packed in Dry Ice. 4.2 Color: White. 4.3 Odor: Discreetable to green.
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Rubber gloves and shoe. Hard hat. Helmet. Small size. Plastic apron. Respirator depending on when used. 5.2 Symptoms Following Exposure: Irritation, severe eye irritation. Not prolonged exposure may cause eye edema. Contact with eyes may cause irritation. Skin irritation may occur on contact. 5.3 Treatment for Exposure: INHALATION: Move to fresh air. Administer first aid. If necessary, call for medical aid. EYES: Flush with plenty of water. If necessary, call for medical aid. SKIN: Wash with plenty of water. If necessary, call for medical aid. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 2 Poisoning agent. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.	

6 FIRE HAZARDS

- 6.1 Flash Point: No pertinent combustible solids.
- 6.2 Flammable Limits in Air: No pertinent.
- 6.3 Fire Extinguishing Agents: Water.
- 6.4 Fire Extinguishing Agents Not to be Used: All extinguishing agents may be ineffective.
- 6.5 Special Hazards of Combustion Products: Flammable and toxic gases formed in fires include acetone, isopropyl alcohol, acetaldehyde, and ethane.
- 6.6 Behavior in Fire: Under heat and accelerative decomposition and may self-ignite. Confined fire may lead to detonation. Fire is very difficult to extinguish cause water not needed.
- 6.7 Ignition Temperature: Data not available.
- 6.8 Electrical Hazard: No pertinent.
- 6.9 Burning Rate: No pertinent.

7 CHEMICAL REACTIVITY

- 7.1 Reactivity with Water: No reaction.
- 7.2 Reactivity with Common Materials: May decompose with formation of oxygen when in contact with metals.
- 7.3 Stability During Transport: Unstable above 101°F with formation of oxygen gas.
- 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent.
- 7.5 Polymerization: Not pertinent.
- 7.6 Inhibitor of Polymerization: Not pertinent.

8 WATER POLLUTION

- 8.1 Aquatic Toxicity: Data not available.
- 8.2 Waterfowl Toxicity: Data not available.
- 8.3 Biological Oxygen Demand (BOD): Data not available.
- 8.4 Food Chain Concentration Potential: None.

JPT

JET FUELS: JP-3

Common Synonyms		Waters liquid	Colorless	Fuel oil odor
		Floats on water. Irritating, combustible vapor may be produced.		
Fire		Combustible		
Exposure		VAPOR Irritating to eyes, nose and throat. If inhaled, will cause coughing, dizziness, headache, or difficult breathing. LIQUID Irritating to skin and eyes. Harmful if swallowed. INGESTION Harmful. May cause vomiting and diarrhea. SKIN Irritating. May cause redness and itching. EYES Irritating. May cause redness and tearing. NOSE AND THROAT Irritating. May cause coughing and difficulty breathing.		
Water Pollution		Dangerous to aquatic life in high concentrations. Floating to shoreline. May be dangerous if it enters water intakes.		
1. RESPONSE TO DISCHARGE		2. LABELS		
See Response Methods Handbook, CG 444-2		See Hazard Labels Required by Code of Federal Regulations		
3. CHEMICAL DESIGNATIONS		4. OBSERVABLE CHARACTERISTICS		
3.1 Synonyms: None known.		4.1 Physical State (as shipped): Liquid		
3.2 Coast Guard Compatibility Classification: Miscellaneous hydrocarbon mixtures		4.2 Color: Colorless		
3.3 Chemical Formula: $C_{12}H_{26}$		4.3 Odor: Fuel oil odor		
3.4 IMCO United Nations Numerical Designation: 1.2				
5. HEALTH HAZARDS				
5.1 Personal Protective Equipment: Protective gloves, goggles or face shield.				
5.2 Symptoms Following Exposure: Vapor: Irritation to eyes, nose and throat. Liquid: Irritation to skin and eyes. Ingestion: Vomiting and diarrhea. Inhalation: Coughing and difficulty breathing.				
5.3 Treatment for Exposure: ASPIRATION: If liquid is aspirated, do not induce vomiting. INHALATION: Move to fresh air. If breathing is difficult, give oxygen. EYES: Wash with water. SKIN: Wash with soap and water.				
5.4 Toxicity by Inhalation (Threshold Limit Value): None given.				
5.5 Short-Term Inhalation Limits: 2500 mg/m ³ for 60 min.				
5.6 Toxicity by Ingestion: Lethal (LD50) 1.5 g/kg.				
5.7 Acute Toxicity: Data not available.				
5.8 Vapor (Gas) Irritant Characteristics: Vapor: Irritating to eyes, nose and throat. Liquid: Irritating to skin and eyes.				
5.9 Liquid or Solid Irritant Characteristics: Minimum Hazard: If poured on skin, it will cause irritation and reddening of the skin.				
5.10 Odor Threshold: 1 ppm.				

6 FIRE HAZARDS		8 WATER POLLUTION																													
6.1 Flash Point: 100°F		8.1 Aquatic Toxicity: None given. 24-hr. LC50: 11.0 g/L water.																													
6.2 Flammable Limits in Air: Data not available.		8.2 Waterlow Toxicity: Data not available.																													
6.3 Fire Extinguishing Agents: Use dry chemical or carbon dioxide.		8.3 Biological Oxygen Demand (BOD): None given.

JPF

JET FUELS: JP-4

Common Synonyms		Waters: liquid	Colorless	Fuel oil odor
		Fluores on water		
Major Hazards: 1. Irritant to skin and eyes. 2. May be dangerous if it enters water intakes. 3. May be dangerous if it enters water intakes. 4. May be dangerous if it enters water intakes. 5. May be dangerous if it enters water intakes.				
Fire		FLAMMABLE Extinguish with dry chemical, foam, or water. Water may be effective. Do not use water on burning liquid.		
Exposure		CAUTION: MEDICAL AID LIQUID Irritating to skin and eyes. Harmful if swallowed. Keep out of contact with skin and eyes. If on affected area, wash with plenty of water. If in eyes, flush with water and seek medical attention. If swallowed, do not induce vomiting. Do not drink alcohol or milk. DO NOT INDUCE VOMITING.		
Water Pollution		Dangerous to aquatic life in high concentrations. Floating to shoreline. May be dangerous if it enters water intakes. N/A: No data available. N/A: No data available.		
1 RESPONSE TO DISCHARGE Type Response: Miscellaneous Hazardous (C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z, AA, AB, AC, AD, AE, AF, AG, AH, AI, AJ, AK, AL, AM, AN, AO, AP, AQ, AR, AS, AT, AU, AV, AW, AX, AY, AZ, BA, BB, BC, BD, BE, BF, BG, BH, BI, BJ, BK, BL, BM, BN, BO, BP, BQ, BR, BS, BT, BU, BV, BW, BX, BY, BZ, CA, CB, CC, CD, CE, CF, CG, CH, CI, CJ, CK, CL, CM, CN, CO, CP, CQ, CR, CS, CT, CU, CV, CW, CX, CY, CZ, DA, DB, DC, DD, DE, DF, DG, DH, DI, DJ, DK, DL, DM, DN, DO, DP, DQ, DR, DS, DT, DU, DV, DW, DX, DY, DZ, EA, EB, EC, ED, EE, EF, EG, EH, EI, EJ, EK, EL, EM, EN, EO, EP, EQ, ER, ES, ET, EU, EV, EW, EX, EY, EZ, FA, FB, FC, FD, FE, FF, FG, FH, FI, FJ, FK, FL, FM, FN, FO, FP, FQ, FR, FS, FT, FU, FV, FW, FX, FY, FZ, GA, GB, GC, GD, GE, GF, GG, GH, GI, GJ, GK, GL, GM, GN, GO, GP, GQ, GR, GS, GT, GU, GV, GW, GX, GY, GZ, HA, HB, HC, HD, HE, HF, HG, HH, HI, HJ, HK, HL, HM, HN, HO, HP, HQ, HR, HS, HT, HU, HV, HW, HX, HY, HZ, IA, IB, IC, ID, IE, IF, IG, IH, II, IJ, IK, IL, IM, IN, IO, IP, IQ, IR, IS, IT, IU, IV, IW, IX, IY, IZ, JA, JB, JC, JD, JE, JF, JG, JH, JI, JJ, JK, JL, JM, JN, JO, JP, JQ, JR, JS, JT, JU, JV, JW, JX, JY, JZ, KA, KB, KC, KD, KE, KF, KG, KH, KI, KJ, KK, KL, KM, KN, KO, KP, KQ, KR, KS, KT, KU, KV, KW, KX, KY, KZ, LA, LB, LC, LD, LE, LF, LG, LH, LI, LJ, LK, LL, LM, LN, LO, LP, LQ, LR, LS, LT, LU, LV, LW, LX, LY, LZ, MA, MB, MC, MD, ME, MF, MG, MH, MI, MJ, MK, ML, MM, MN, MO, MP, MQ, MR, MS, MT, MU, MV, MW, MX, MY, MZ, NA, NB, NC, ND, NE, NF, NG, NH, NI, NJ, NK, NL, NM, NO, NP, NQ, NR, NS, NT, NU, NV, NW, NX, NY, NZ, OA, OB, OC, OD, OE, OF, OG, OH, OI, OJ, OK, OL, OM, ON, OO, OP, OQ, OR, OS, OT, OU, OV, OW, OX, OY, OZ, PA, PB, PC, PD, PE, PF, PG, PH, PI, PJ, PK, PL, PM, PN, PO, PP, PQ, PR, PS, PT, PU, PV, PW, PX, PY, PZ, QA, QB, QC, QD, QE, QF, QG, QH, QI, QJ, QK, QL, QM, QN, QO, QP, QQ, QR, QS, QT, QU, QV, QW, QX, QY, QZ, RA, RB, RC, RD, RE, RF, RG, RH, RI, RJ, RK, RL, RM, RN, RO, RP, RQ, RR, RS, RT, RU, RV, RW, RX, RY, RZ, SA, SB, SC, SD, SE, SF, SG, SH, SI, SJ, SK, SL, SM, SN, SO, SP, SQ, SR, SS, ST, SU, SV, SW, SX, SY, SZ, TA, TB, TC, TD, TE, TF, TG, TH, TI, TJ, TK, TL, TM, TN, TO, TP, TQ, TR, TS, TT, TU, TV, TW, TX, TY, TZ, UA, UB, UC, UD, UE, UF, UG, UH, UI, UJ, UK, UL, UM, UN, UO, UP, UQ, UR, US, UT, UU, UV, UW, UX, UY, UZ, VA, VB, VC, VD, VE, VF, VG, VH, VI, VJ, VK, VL, VM, VN, VO, VP, VQ, VR, VS, VT, VU, VV, VW, VX, VY, VZ, WA, WB, WC, WD, WE, WF, WG, WH, WI, WJ, WK, WL, WM, WN, WO, WP, WQ, WR, WS, WT, WU, WV, WW, WX, WY, WZ, XA, XB, XC, XD, XE, XF, XG, XH, XI, XJ, XK, XL, XM, XN, XO, XP, XQ, XR, XS, XT, XU, XV, XW, XX, XY, XZ, YA, YB, YC, YD, YE, YF, YG, YH, YI, YJ, YK, YL, YM, YN, YO, YP, YQ, YR, YS, YT, YU, YV, YW, YX, YY, YZ, ZA, ZB, ZC, ZD, ZE, ZF, ZG, ZH, ZI, ZJ, ZK, ZL, ZM, ZN, ZO, ZP, ZQ, ZR, ZS, ZT, ZU, ZV, ZW, ZX, ZY, ZZ.

NOTES

LTA

LACTIC ACID

Common Synonyms 2-Hydroxypropanoic acid Racemic lactic acid Milk acid Alpha-Hydroxypropionic acid		Thick Liquid	Colorless to Yellow	Weak Unpleasant, Odor
Mixes and Mixes with water				
Avoid contact with liquid and vapors. Keep people away. Stop discharging, if possible. Notify and remove discharge if material. Notify local health and pollution control agencies.				
Fire		Combustible Extinguish with water. Do not use chemicals. Do not use foam.		
Exposure		CALL FOR MEDICAL AID VAPOR Irritating to eyes, nose and throat. If inhaled will cause coughing or difficult breathing. If eyes feel irritation, blink and flush with plenty of water. If breathing is difficult, leave area and breathe fresh air. If breathing is difficult, use oxygen. LIQUID Will burn skin and eyes. If swallowed will cause nausea. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES: Flush eyes for 10 minutes and flush with plenty of water. IF SWALLOWED: Do not induce vomiting. If Nausea, vomit and drink water. If SWALLOWED and not nauseated: COOL OR HAVE COOL DRINKS OR FLUIDS. IF SWALLOWED and not nauseated: COOL OR HAVE COOL DRINKS OR FLUIDS.		
Water Pollution		Dangerous to aquatic life in high concentration. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.		
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Disperse and flush.		2 LABELS No hazard label required by Code or Federal Regulations.		
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: 2-Hydroxypropanoic acid alpha-Hydroxypropionic acid, Milk acid, Racemic lactic acid. 3.2 Coast Guard Compatibility Classification Not listed. 3.3 Chemical Formula CH ₃ CHOHCOOH H ₂ O 3.4 IMCO/United Nations Numerical Designation: Not listed.		4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Syrupy liquid. 4.2 Color: Yellow to colorless. 4.3 Odor: None or weak acidic.		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Rubber gloves, goggles, self-contained breathing apparatus where high concentrations of mist are present. 5.2 Symptoms Following Exposure: Inhalation of mist causes coughing and irritation of mucous membranes. Ingestion, even of diluted preparations, has a corrosive effect on the esophagus and stomach. Contact with concentrated solutions can cause severe burns of skin or eye. 5.3 Treatment for Exposure: INHALATION: Move to fresh air. INGESTION: Give large amount of water. EYES: Flush with water for at least 15 minutes. SKIN: Flush with water. Wash well with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 1 oral LD ₅₀ = 1,800 mg/kg (equivalent). 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: 4.0 X 10 ⁻⁴ ppm.				

6 FIRE HAZARDS 6.1 Flash Point: Not pertinent (not flammable or burns with difficulty) 6.2 Flammable Limits in Air: Not pertinent 6.3 Fire Extinguishing Agents: Water, foam, dry chemical, carbon dioxide 6.4 Fire Extinguishing Agents Not to be Used: 6.5 Special Hazards of Combustion Products: 6.6 Behavior in Fire: 6.7 Ignition Temperature: Not pertinent 6.8 Electrical Hazard: Not pertinent 6.9 Burning Rate: Not pertinent	8 WATER POLLUTION 8.1 Aquatic Toxicity: < 80 ppm/24 hr/goldfish, no effect, fresh water 684 ppm/6 hr, fish killed, fresh water 8.2 Waterfowl Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): 72% 5 days 8.4 Food Chain Concentration Potential: None
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction 7.2 Reactivity with Common Materials: Slowly corrodes most metals 7.3 Stability During Transport: Stable 7.4 Neutralizing Agents for Acids and Caustics: Dilute with water, mix with sodium bicarbonate or lime solution 7.5 Polymerization: Not pertinent 7.6 Inhibitor of Polymerization: Not pertinent	9. SELECTED MANUFACTURERS 1. Clinton Corn Processing Co. P. O. Box 340 Clinton, Iowa 52732 2. Mallinckrodt Chemical Works 223 Westside Avenue P. O. Box 394 Jersey City, N. J. 07307 3. Monsanto Company 800 North Lindbergh Blvd. St. Louis, Mo. 63166
	10 SHIPPING INFORMATION 10.1 Grades or Purity: USP Reagent Technical 88% Food processing 50% MF. The balance is water in all cases 10.2 Storage Temperature: Ambient 10.3 Inert Atmosphere: No requirement 10.4 Venting: Open

NOTES	

LS

LATEX, LIQUID SYNTHETIC

Common Synonyms: Plastic latex Synthetic rubber latex	Liquid White Mixes with water
1. If possible, check if possible. 2. Do not inhale dusts or fumes. 3. Do not get on skin and pollute clothing.	
Fire	Not flammable Combustible solid is produced when heated
Exposure	CALL FOR MEDICAL AID LIQUID Irritating to eyes IF IN EYES: Flush eyes with plenty of water
Water Pollution	Effect of low concentrations on aquatic life is unknown Fouling to shoreline May be dangerous if it enters water intakes Not particularly soluble in water Not particularly toxic to aquatic life
1 RESPONSE TO DISCHARGE See Response Methods Handbook, CG 446-41 Disperse and flush (if not coagulated) Should be removed (if coagulated) Chemical and physical treatment	2 LABELS No hazard label required by Code of Federal Regulations
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Plastic latex synthetic rubber latex 3.2 Coast Guard Compatibility Classification Miscellaneous water solutions 3.3 Chemical Formula: Not pertinent 3.4 IMCO-United Nations Numerical Designation: Not listed	4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Milky 4.3 Odor: Each type has a characteristic odor
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Chemical goggles or face shield 5.2 Symptoms Following Exposure: Irritation of eyes 5.3 Treatment for Exposure: Flush eyes with water for at least 15 min 5.4 Toxicity by Inhalation (Threshold Limit Value): Not pertinent 5.5 Short-Term Inhalation Limits: Not pertinent 5.6 Toxicity by Ingestion: Data not available 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: None 5.9 Liquid or Solid Irritant Characteristics: Contact with eyes causes irritation 5.10 Odor Threshold: Not pertinent	

6 FIRE HAZARDS 6.1 Flash Point: Not flammable unless coagulated 6.2 Flammable Limits in Air: Not flammable 6.3 Fire Extinguishing Agents: Not pertinent 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent 6.5 Special Hazards of Combustion Products If the latex dries out and then burns, hydrochloric acid, hydrogen cyanide, and styrene gases may be evolved. All are irritating and poisonous. 6.6 Behavior in Fire: Heat causes coagulation, the latex forms sticky plastic lumps which may burn. 6.7 Ignition Temperature: Not flammable 6.8 Electrical Hazard: Data not available 6.9 Burning Rate: Not flammable	8 WATER POLLUTION 8.1 Aquatic Toxicity Data not available 8.2 Waterfowl Toxicity Data not available 8.3 Biological Oxygen Demand (BOD) 1-5 days 8.4 Food Chain Concentration Potential None
7 CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction 7.2 Reactivity with Common Materials: No reaction 7.3 Stability During Transport: Coagulated by heat and acids to gummy flammable material 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent 7.5 Polymerization: Not pertinent 7.6 Inhibitor of Polymerization: not pertinent	9 SELECTED MANUFACTURERS 1. Borg Warner Corp. Marathon Division Washington, W. Va. 26184 2. W. R. Grace & Co. Doway and Anus Chemical Division Cambridge, Mass. 02140 Rohm and Haas Co. Independence Mall West Philadelphia, Pa. 19105
HAZARD ASSESSMENT CODE See Hazard Assessment Handbook, CG 446-1 A P	10 SHIPPING INFORMATION 10.1 Grades or Purity: All commercial latexes are shipped in a variety of concentrations in water depending on the particular polymer involved and the intended use of the latex. Some are particularly hazardous except they do not coagulate to gummy flammable material. 10.2 Storage Temperature: Ambient 10.3 Inert Atmosphere: No requirement 10.4 Venting: Open
12 HAZARD CLASSIFICATIONS 12.1 Code of Federal Regulations: Not listed 12.2 NAS Hazard Rating for Bulk Water Transportation: Not listed 12.3 NFPA Hazard Classifications: Not listed	13 PHYSICAL AND CHEMICAL PROPERTIES 13.1 Physical State at 15°C and 1 atm: Liquid 13.2 Molecular Weight: Not pertinent 13.3 Boiling Point at 1 atm: Not listed 13.4 Freezing Point: Not pertinent 13.5 Critical Temperature: Not pertinent 13.6 Critical Pressure: Not pertinent 13.7 Specific Gravity: 1.057 at 25°C (liquid) (liquid) 13.8 Liquid Surface Tension: Not pertinent 13.9 Liquid-Water Interfacial Tension Not pertinent 13.10 Vapor (Gas) Specific Gravity: Not pertinent 13.11 Ratio of Specific Heats of Vapor (Gas) Not pertinent 13.12 Latent Heat of Vaporization: Not pertinent 13.13 Heat of Combustion: Not pertinent 13.14 Heat of Decomposition: Not pertinent 13.15 Heat of Solution: Not pertinent 13.16 Heat of Polymerization: Not pertinent
NOTES	

REVISED 1973

LPO

LAUROYL PEROXIDE

Common Synonyms		Solid	White	Faint soapy odor
Dilauroyl peroxide Dodecanoil peroxide		Fluents on water		
Call fire department Keep people away Wipe up and remove discharged material Notify local health and pollution control agencies				
Fire	Combustible May cause fire on contact with combustibles Containers may explode in fire May explode if exposed to heat or flames Control fires from behind barrier Flood discharge area with water Cool exposed containers with water			
Exposure	Call for medical aid SCLD Irritating to skin and eyes. Harmful if swallowed Remove contaminated clothing and shoes Flush affected areas with plenty of water IF IN EYES, hold eyelids open and flush with plenty of water IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk and have victim induce vomiting IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm			
Water Pollution	Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes Notify local health and wildlife officials Notify operators of nearby water intakes			
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446.4) Issue warning: oxidizing material water contaminant Medical containment Should be removed Chemical and physical treatment		2 LABEL 		
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Dilauroyl peroxide Dodecanoil peroxide 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: $(C_{11}H_{21}O)_2$ & (OO) 3.4 IMCO/United Nations Numerical Designation: 2.1534		4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: White 4.3 Odor: Faint pungent, bland, soapy		
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Protective gloves, goggles 5.2 Symptoms Following Exposure: Contact with liquid irritates eyes and skin. Ingestion causes irritation of mouth and stomach 5.3 Treatment for Exposure: EYES: wash with plenty of water for 15 min. and get medical attention. SKIN: wash with plenty of soap and water. INGESTION: administer emetics to induce vomiting and call a physician 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Not pertinent 5.6 Toxicity by Ingestion: Data not available 5.7 Late Toxicity: Weak carcinogen in mice 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available

LRM

LAURYL MERCAPTAN

Common Synonyms 1. Dodecanethiol (n-dodecyl mercaptan)	Only liquid Colorless Mild skunk odor Floats on water. Freezing point is 19°F
Waxes, esters, and other derivatives Sulfur compounds, e.g., thiophene, thiophene Alkylthio compounds, e.g., alkylthio Alkylthio compounds, e.g., alkylthio	
Fire	Combustible POISONOUS GASES ARE PRODUCED IN FIRE. Waxes, esters, and other derivatives Sulfur compounds, e.g., thiophene, thiophene Alkylthio compounds, e.g., alkylthio Alkylthio compounds, e.g., alkylthio
Exposure	CAUTION MEDICAL AID LIQUID OR SOLID Irritating to skin and eyes. If swallowed, will cause nausea. Remove or tamponade from eyes and skin. Flush affected areas with plenty of water. IF IN EYES, flush with plenty of water. IF SWALLOWED, do not induce vomiting. Give plenty of water.
Water Pollution	Effect of low concentrations on aquatic life is unknown. Fouling to shoreline. May be dangerous if it enters water intakes. Not a significant water pollutant.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Mechanical containment. Should be removed. Chemical and physical treatment.	2. LABELS No hazard label required by Code of Federal Regulations.
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Dodecanethiol Dodecyl mercaptan 3.2 Coast Guard Compatibility Classification: Not applicable. 3.3 Chemical Formula: C ₁₂ H ₂₆ SH ₂ 3.4 IMCO United Nations Numerical Designation: Not listed.	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Mild skunk
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Respirator when mist is present; rubber gloves; chemical goggles; rubber shoes and apron. 5.2 Symptoms Following Exposure: Liquid is irritating to skin, eyes, and mucous membranes. Ingestion may cause nausea. Repeated exposure can cause dermatitis and may produce a sensitizing effect. 5.3 Treatment for Exposure: Get medical attention for all eye exposures and for all serious skin exposures. INHALATION: Inhale fresh air repeatedly with cold water. Treatment is symptomatic. INGESTION: Dilute by drinking water. If vomiting occurs, drink more water. Do not induce vomiting. EYES: Flush thoroughly with water. Ventilation by electrolysis is helpful in removing fumes. Especially around eyes and eyelids. SKIN: Remove contaminated clothing. Flush skin with water. Wash exposed area with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Data not available. 5.7 Late Toxicity: Causes decline in kidney and liver function in rats. 5.8 Vapor (Gas) Irritant Characteristics: Irritating concentration of vapor unlikely, but mist can cause irritation of eyes and upper respiratory tract. 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain, may cause staining and reddening of the skin. 5.10 Odor Threshold: 4 mg/m ³	

6. FIRE HAZARDS 6.1 Flash Point: 26°F (0°C) 6.2 Flammable Limits in Air: Data not available. 6.3 Fire Extinguishing Agents: Dry chemical, foam, or carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Water or foam may cause foaming. 6.5 Special Hazards of Combustion Products: Poisonous and irritating gases (e.g., sulfur dioxide) are generated in fires. 6.6 Behavior in Fire: Not pertinent. 6.7 Ignition Temperature: Data not available. 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: Data not available.	8. WATER POLLUTION 8.1 Aquatic Toxicity: Data not available. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: None.								
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: No reaction. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9. SELECTED MANUFACTURERS 1. Occidental Petroleum Corp. Hooker Chemical Corp. Stamford, Conn. 06905 2. Phillips Petroleum Co. Bartlesville, Okla. 74004 3. Unifrol Inc. Unifrol Chemical Co. LAC

LEAD ACETATE

Common Synonyms Lead acetate trihydrate Neutral lead acetate Normal lead acetate		Solid	White	Odorless
Sinks and mixes with water				
Avoid contact with solid. Do not get on clothes. If on clothes, wash thoroughly with soap and water. Do not breathe dust.				
Fire		NOT FLAMMABLE		
		CALL FOR MEDICAL AID DUST POISONOUS IF INHALED If inhaled will cause dizziness or loss of consciousness. If inhaled, avoid further exposure and get plenty of water. If breathing is difficult, use oxygen. SOLID Irritating to skin and eyes. If swallowed will cause nausea, vomiting or loss of consciousness. Rinse skin thoroughly with plenty of water. Flush eyes with plenty of water. IF IN EYES , flush with plenty of water. IF SWALLOWED , do not induce vomiting. Give plenty of water to drink. If swallowed, do not induce vomiting. Give plenty of water to drink.		
Exposure		If swallowed, do not induce vomiting. Give plenty of water to drink.		
Water Pollution		Dangerous to aquatic life in high concentrations. May be dangerous if it enters water intakes.		
1 RESPONSE TO DISCHARGE See Response Methods Manual, CG 446-41 Issue warning: water contaminant. Restrict access. Disperse and flush.		2. LABELS No hazard label required by Code of Federal Regulations.		
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Lead acetate trihydrate Neutral lead acetate Normal lead acetate Sodium Lead Acetate 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: $Pb(CH_3COO)_2 \cdot 3H_2O$ 3.4 IMCO/United Nations Numerical Designation: 9.1616		4 OBSERVABLE CHARACTERISTIC 4.1 Physical State (as shipped): Solid 4.2 Color: White (commercial grades are frequently brown or grey lumps) 4.3 Odor: None		
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Dust mask and protective gloves. 5.2 Symptoms Following Exposure: Early symptoms of lead intoxication via inhalation or ingestion are most commonly gastrointestinal disorders: colic, constipation, etc. weakness which may go on to paralysis chiefly of the extensor muscles of the wrists and less often of the ankles is noticeable. In the most serious cases, ingestion of a large amount causes irritation of the alimentary tract: pain, leg cramps, muscle weakness, paralysis, depression, coma, and death may follow in 1 or 2 days. Contact with eyes causes irritation. 5.3 Treatment for Exposure: Remove at once all causes of lead intoxication from further exposure until the blood level is reduced to a safe value. Immediately place the individual under medical care. INDUCTIONS: give gastric lavage using 1% solution of sodium or magnesium sulfate. Leave 15-30 gm magnesium sulfate in 6-8 oz of water in the stomach as antidote and cathartic. egg white, milk, and tannin are useful demulcents. calcium sulfate and other antispasmodics may relieve abdominal pain, but morphine may be necessary. EYES or SKIN: flush with water. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.2 mg/m ³ (as lead) 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 2.4 D.D.O.S. 5g/kg 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available				

6 FIRE HAZARDS 6.1 Flash Point: Not flammable 6.2 Flammable Limits in Air: Not flammable 6.3 Fire Extinguishing Agents: Not pertinent 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent 6.5 Special Hazards of Combustion Products: Irritating acid fumes may be formed in fires 6.6 Behavior in Fire: 6.7 Ignition Temperature: Not pertinent 6.8 Electrical Hazard: Not pertinent 6.9 Burning Rate: Not pertinent	8 WATER POLLUTION 8.1 Aquatic Toxicity: 90 ppm: 16-188 days catfish blood cell injury tap water 748 mg (as Pb) 4 days minnow 11% salt water 8.2 Waterfowl Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): Data not available 8.4 Food Chain Concentration Potential: Fish and terrestrial animals are capable of concentrating lead
7. LAR

LEAD ARSENATE

Common Synonyms Lead arsenate acid Plumbous arsenate	Solid White Odorless Sinks in water
AVOID CONTACT WITH SOLID: Keep people away. Not to be handled if possible. Is irritant and toxic to fish and other aquatic life. Not to be handled and pollution is not to be made.	
Fire	Not flammable
 Exposure	CALL FOR MEDICAL AID SOLID POISONOUS IF SWALLOWED If SWALLOWED and conscious: Flush mouth with water and spit out. Do not swallow. If unconscious: SWALLOWED and unconscious: DO NOT INDUCE VOMITING. If swallowed: Keep person lying down.
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intake. Not to be used in water bodies. Not to be used in water bodies.
1 RESPONSE TO DISCHARGE See Response Methods Handbook, CG 446-4. See also: 1. Poisonous material. Should be removed. Chemical and physical properties.	2. LABEL  POISON
3. CHEMICAL DESIGNATIONS 31 Synonyms: Lead arsenate acid Plumbous arsenate 32 Coast Guard Compatibility Classification: Not applicable 33 Chemical Formula: PbHAsO ₄ 34 UNCO United Nations Numerical Designation: 6.1 (Toxic)	4. OBSERVABLE CHARACTERISTICS 41 Physical State (as shipped): Solid 42 Color: White 43 Odor: None
5. HEALTH HAZARDS 51 Personal Protective Equipment: Dust respirator, protective clothing to prevent contact with skin and eyes. 52 Symptoms Following Exposure: Inhalation or ingestion causes dizziness, headache, nausea, vomiting, diarrhea, and abdominal pain. Subacute doses cause weakness, loss of weight, and emaciation. Blood and urine concentrations of lead rise. 53 Treatment for Exposure: As specific medical treatment is used for exposure to this chemical, call a physician immediately. Give victim a tablespoon of salt in glass of water and repeat until vomit is clear. Then give two tablespoons of emetic salt in milk if magenta with water and plenty of fluids and water. Have victim lie down and keep quiet. 54 Toxicity by Inhalation (Threshold Limit Value): Indeterminate. 55 Short-Term Inhalation Limits: Not pertinent. 56 Toxicity by Ingestion: Grade 4 (1.0) but with strong irritability. 57 Late Toxicity: Local poisoning. 58 Vapor (Gas) Irritant Characteristics: Not pertinent. 59 Liquid or Solid Irritant Characteristics: Not pertinent. 60 Water Threshold: Not pertinent.	

6. LEAD FLUOROBORATE

Common Synonyms Lead fluoroborate Lead fluoroborate solution		Liquid	Colorless	Odorless
Sinks and mixes with water				
AVOID CONTACT WITH EYES AND VAPOR. KEEP EYES AWAY. Wear goggles and suit continuous flow respirator. Notify the largest possible number of people. Notify the nearest fire department. Notify the nearest hospital.				
Fire		Not flammable. Irritating gases may be produced when heated. Wear goggles and suit continuous flow respirator.		
 Exposure		CALL FOR MEDICAL AID. VAPOR POISONOUS IF INHALED. If inhaled will cause dizziness or loss of consciousness. Place victim in fresh air. Give plenty of water. If in eyes, hold eyes open and flush with plenty of water. If SWALLOWED: Do not induce vomiting. Give plenty of water. If SWALLOWED: Do not induce vomiting. Give plenty of water. LIQUID Will burn skin and eyes. If swallowed will cause nausea, vomiting or loss of consciousness. Remove victim from area. Give plenty of water. IF IN EYES: Hold eyes open and flush with plenty of water. IF SWALLOWED: Do not induce vomiting. Give plenty of water. If swallowed, do not induce vomiting. Give plenty of water. IF SWALLOWED: Do not induce vomiting. Give plenty of water.		
Water Pollution		Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify the nearest water authority. Notify the nearest hospital.		
1 RESPONSE TO DISCHARGE See Response Methods Handbook, CG 446.4. Issue warning. Water contains hazard. Restrict access. Disperse and flush.		2 LABELS No hazard label required by Code of Federal Regulations.		
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Lead fluoroborate. Lead fluoroborate solution. 3.2 Coast Guard Compatibility Classification: Not listed. 3.3 Chemical Formula: $Pb(BF_4)_2 \cdot H_2O$ 3.4 IMCO/United Nations Numerical Designation: Not listed.		4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Colorless. 4.3 Odor: Faint.		
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Rubber gloves, face shield, rubber apron. 5.2 Symptoms Following Exposure: Early symptoms of lead intoxication via inhalation or ingestion are most commonly gastrointestinal disorders, i.e., constipation, i.e., weakness, which may progress to paralysis, chiefly of the extensor muscles. If the wrists and less often of the ankles, is noticeable in the most serious cases. Ingestion of a large amount causes local irritation of the alimentary tract, pain, leg cramps, muscle weakness, paresthesias, depression, coma, and death may follow in 1 to 2 days. Contact with eyes or skin may cause burns and irritation. 5.3 Treatment for Exposure: Remove at once all cases of lead intoxication from further exposure until the blood level is reduced to a safe level. Immediately place the individual under medical care. INDUCTIONS give gastric lavage using 1% solution of sodium or magnesium sulfate. Leave 15-30 min. Magnesium sulfate in 6-8 oz. of water in the stomach as antidote and cathartic. Egg white, milk, and tannin are useful demulcents. Stropine sulfate and other antispasmodics may relieve abdominal pain, but morphine may be necessary. EYES: Flush with copious quantities of water for 15 min. SKIN: Wash area with soap and water to remove acid burn. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.2 mg/m (as lead). 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 2 LD ₅₀ 0.5 g/kg. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.				

6 FIRE HAZARDS 6.1 Flash Point: Not flammable 6.2 Flammable Limits in Air: Not flammable 6.3 Fire Extinguishing Agents: Not pertinent 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent 6.5 Special Hazards of Combustion Products: Toxic and irritating hydrogen fluoride gas may form in fire 6.6 Behavior in Fire: Not pertinent 6.7 Ignition Temperature: Not pertinent 6.8 Electrical Hazard: Not pertinent 6.9 Burning Rate: Not pertinent	8 WATER POLLUTION 8.1 Aquatic Toxicity: Data not available 8.2 Waterlow Toxicity: May be toxic 8.3 Biological Oxygen Demand (BOD): Not listed 8.4 Food Chain Concentration Potential: Bioaccumulative								
7 CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction 7.2 Reactivity with Common Materials: Solution is acidic and will corrode most metals 7.3 Stability During Transport: Stable 7.4 Neutralizing Agents for Acids and Caustics: Flush with water, rinse with dilute solution of sodium bicarbonate or soda ash 7.5 Polymerization: Not pertinent 7.6 Inhibitor of Polymerization: Not pertinent	9. SELECTED MANUFACTURERS 1. Allied Chemical Corp. P. O. Box 1087R Morristown, N. J. 07960 2. The Harshaw Chemical Co. 1945 E. 97th St. Cleveland, Ohio 44106 3. LFR

LEAD FLUORIDE

Common Synonyms Lead difluoride Plumbous fluoride	Solid White Odorless Sinks in water
AVOID CONTACT WITH SOLID AND DO NOT KEEF FLOET AWAY When handling this material, avoid contact with skin and eyes. If contact occurs, wash immediately with plenty of water. If swallowed, do not induce vomiting. Seek medical attention if necessary.	
Fire	Not flammable
 Exposure	CAUTION: POISONOUS IF INHALED If inhaled will cause dizziness or loss of consciousness. If inhaled, move to fresh air and breathe deeply of water. If inhaled, seek medical attention if necessary. SOLID Irritating to skin and eyes. If swallowed will cause nausea, vomiting or loss of consciousness. If swallowed, do not induce vomiting. Seek medical attention if necessary. Reproductive Effects: Lead is a known reproductive toxicant. It may cause miscarriages, stillbirths, and other complications. Avoid contact with pregnant women and children. Environmental Effects: Lead is a toxic substance. It may cause harm to aquatic life and the environment. Avoid contact with water and soil.
Water Pollution	Dangerous to aquatic life in high concentrations. May be dangerous if it enters water intakes.
1 RESPONSE TO DISCHARGE See Response Methods Handbook, CG 446.4. Issue warning - water contaminant. Restrict access. Should be removed. Chemical and physical treatment.	2. LABELS No hazard label required by Code of Federal Regulations.
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Lead difluoride, Plumbous fluoride. 3.2 Coast Guard Compatibility Classification: Not listed. 3.3 Chemical Formula: PbF ₂ . 3.4 IMCO/United Nations Numerical Designation: Not listed.	4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid. 4.2 Color: White. 4.3 Odor: None.
5 HEALTH HAZARDS <i>Dust and fumes of all but the most insoluble lead compounds are readily absorbed on inhalation and, to a lesser degree, after ingestion.</i> 5.1 Personal Protective Equipment: Respirator for heavy dust exposure, safety goggles. 5.2 Symptoms Following Exposure: Not irritant to skin or mucous membranes; protect against chronic poisoning. Early symptoms of lead intoxication: a combination of ingestion are most common: gastrointestinal disorders, constipation, etc., weakness, which may go on to paralysis, chills, of the extensor muscles of the wrists and less often the ankles, is noticeable in the most serious cases. Ingestion of a large amount causes local irritation of the alimentary tract, pain, leg cramps, muscle weakness, paresthesias, depression, coma, and death may follow in 2-3 days. Contact with eyes causes irritation. 5.3 Treatment for Exposure: Remove at once all cases of lead intoxication from further exposure until the blood level is reduced to a safe value. Immediately place the individual under medical care. IN CASE OF INGESTION: give gastric lavage using 1% solution of sodium or magnesium sulfate. Leave 15-30 gm magnesium sulfate in 6-8 oz. of water in the stomach as ant-dote and cathartic. Egg white, milk, and tannic acid are useful demulcents. Atropine sulfate and other antispasmodics may relieve abdominal pain, but morphine may be necessary. IF ON SKIN: flush with water. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.15 mg/m³ as lead. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade I LD50 5.2 g/kg. 5.7 Late Toxicity: Data not available.	

6 FIRE HAZARDS

- 6.1 **Flash Point:** Not flammable.
6.2 **Flammable Limits in Air:** Not flammable.
6.3 **Fire Extinguishing Agents:** Not pertinent.
6.4 **Fire Extinguishing Agents Not to be Used:** Not pertinent.
6.5 **Special Hazards of Combustion Products:**
6.6 **Behavior in Fire:**
6.7 **Ignition Temperature:** Not pertinent.
6.8 **Electrical Hazard:** Not pertinent.
6.9 **Burning Rate:** Not pertinent.

8 WATER POLLUTION

- 8.1 **Aquatic Toxicity:** 7.4 mg/l (as Pb) 4 days minimum, 11 m soft water.
8.2 **Waterway Toxicity:** May be toxic.
8.3 **Biological Oxygen Demand (BOD):** None.
8.4 **Food Chain Concentration Potential:** Bioconcentrative.

LAL

LINEAR ALCOHOLS

Common Synonyms Undecanol Tridecanol Tetradecanol Pentadecanol		Liquid Floats on water	Colorless	Mild alcohol odor
Not declared flammable Can be asphyxiant May irritate with frequent Exposure to low concentrations No known health and safety hazards				
Fire	Combustible Flammable liquid and vapor Can be exposed to fire with water			
Exposure	CAUTION: MILD ALCOHOL LIQUID Irritating to skin Will burn eyes Harmful if absorbed in large quantities May irritate with frequent exposure May be asphyxiant if inhaled in large quantities CONCENTRATIONS			
Water Pollution	Effect of low concentrations on aquatic life is unknown Floating to shoreline May be dangerous if it enters water intakes No data available on biodegradability No data on persistence in water			
1. RESPONSE TO DISCHARGE See Response Methods Handbook, CG 446-4 Mechanical containment Should be removed Chemical and physical treatment		2. LABELS No hazard label required by Code of Federal Regulations		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Undecanol, Tetradecanol, tridecanol, Pentadecanol (it could be any of the above or mixtures thereof) 3.2 Coast Guard Compatibility Classification: Alcohol 3.3 Chemical Formula: $C_{12}H_{26}O$, $C_{14}H_{30}O$ 3.4 IMCO United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Mild		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Eye protection 5.2 Symptoms Following Exposure: Direct contact can produce eye irritation. Low concentrations may 5.3 Treatment for Exposure: Wash eyes with water for at least 15 min. 5.4 Toxicity by Inhalation (Threshold Limit Value): Not pertinent 5.5 Short-Term Inhalation Limits: Not pertinent 5.6 Toxicity by Ingestion: Grade I LD ₅₀ 4.5 g/kg (rat) 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: None 5.9 Liquid or Solid Irritant Characteristics: No appreciable hazard. Practically harmless to skin 5.10 Odor Threshold: Data not available

NOTES	

LNG

LIQUEFIED NATURAL GAS

Common Synonyms LNG		Liquefied gas	Colorless	Odorless or weak skunk odor
		Fluents and boils on water. Flammable vapor cloud is produced.		
Fire FLAMMABLE Flashback at the vapor trail may occur. May explode if ignited in a confined area.				
Exposure ASPIRATOR Not irritating to eyes, nose or throat. If inhaled, will cause dizziness, difficult breathing, or loss of consciousness. LAUGHING GAS Will cause frostbite.				
Water Pollution Not harmful to aquatic life.				
1 RESPONSE TO DISCHARGE (See Response Methods Handbook - 100-1)		2 LABEL 		
3 CHEMICAL DESIGNATIONS 1. Synonyms: LNG 2. Coast Guard Compatibility Classification: Para-ffin 3. Chemical Formula: CH ₄ , C ₂ H ₆ , etc. 4. IMCO United Nations Numerical Designation: 1977		4 OBSERVABLE CHARACTERISTICS 1. Physical State (as shipped): Liquid 2. Color: Colorless 3. Odor: M		
5 HEALTH HAZARDS 1. Personal Protective Equipment: None 2. Symptoms Following Exposure: Dizziness, headache, nausea, vomiting, loss of consciousness. 3. Treatment for Exposure: Move to fresh air. If inhaled, give oxygen. If unconscious, do not give anything by mouth. If swallowed, do not induce vomiting. If on skin, wash with water. 4. Toxicity by Inhalation (Threshold Limit Value): 100 ppm 5. Short-Term Inhalation Limits: 100 ppm 6. Toxicity by Ingestion: None 7. Late Toxicity: None 8. Vapor (Gas) Irritant Characteristics: None 9. Liquid or Solid Irritant Characteristics: None 10. Odor Threshold: 10 ppm				

6 FIRE HAZARDS

- 6.1 Flash Point: -176°C (flammable gas)
6.2 Flammable Limits in Air: 5-15%
6.3 Fire Extinguishing Agents: Water, foam, dry chemical, CO₂, etc.
6.4 Fire Extinguishing Agent's Not to be Used: None
6.5 Special Hazards of Combustion Products: None
6.6 Behavior in Fire: Burns rapidly.
6.7 Ignition Temperature: 500°C
6.8 Electrical Hazard: None
6.9 Burning Rate: Rapid

8 WATER POLLUTION

- 8.1 Aquatic Toxicity: None
8.2 Waterfowl Toxicity: None
8.3 Biological Oxygen Demand (BOD): None
8.4 Food Chain Concentration Potential: None

26.1 Heat of Polymerization: None

NOTES

LPG

LIQUEFIED PETROLEUM GAS

Common Synonyms Propane, butane, propylene, Petroleum LPG	Liquefied compressed gas. Colorless. Weak odor may have skunk odor added. Floats and boils on water. Flammable vapor cloud is produced.
	Step discharge if possible. Keep people away. Shut fire extinguishers and other equipment off. Stay upwind and use water spray to knock down flames. Do not use water directly on the liquid. Do not use water directly on the liquid. Do not use water directly on the liquid.
Fire	FLAMMABLE Flashback along vapor trail may occur. Containers may explode in fire. May explode if ignited in an enclosed area. Step discharge if possible. Do not use water directly on the liquid.
Exposure	VAPOR Not irritating to eyes, nose and throat. If inhaled, will cause dizziness, difficult breathing or loss of consciousness. CALL FOR MEDICAL AID LIQUID Will cause frostbite. May cause frostbite. If breathing has stopped, give artificial respiration. Do not use mouth-to-mouth respiration. Flush affected areas with water for 15 min. DO NOT RUB AFFECTED AREAS
Water Pollution	Not harmful to aquatic life.
1 RESPONSE TO DISCHARGE See Response Manual Handbook, 2-446-4. Emergency Response Manual Response Manual Response Manual	2 LABEL 
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Butane, Propane, Propylene, Petroleum, LPG. 3.2 Coast Guard Compatibility Classification: Paraffin or olefin. 3.3 Chemical Formula: C ₃ H ₈ , C ₄ H ₁₀ , C ₃ H ₆ . 3.4 IMCG United Nations Numerical Designation: 1958.	4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquefied compressed gas. 4.2 Color: Colorless. 4.3 Odor: Mild odor, skunk-like, added for detection.
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Not required for the liquid, but eye protection is recommended for the vapor. 5.2 Symptoms Following Exposure: Dizziness, headache, nausea, vomiting, loss of consciousness. 5.3 Treatment for Exposure: Remove from exposure. If breathing is difficult, give artificial respiration. 5.4 Toxicity by Inhalation (Threshold Limit Value): 1000 ppm. 5.5 Short-Term Inhalation Limits: 1000 ppm. 5.6 Toxicity by Ingestion: None. 5.7 Late Toxicity: None. 5.8 Vapor (gas) Irritant Characteristics: Vapor is non-irritant to eyes, nose and throat. 5.9 Liquid or Solid Irritant Characteristics: No appreciable irritant characteristics. 5.10 Odor Threshold: 1000 ppm.	

6 FIRE HAZARDS

- 6.1 Flash Point: Propane: -119°C (-182°F); Butane: -60°C (-76°F).
- 6.2 Flammable Limits in Air: Propane: 2.1% - 9.5%; Butane: 1.8% - 8.4%.
- 6.3 Fire Extinguishing Agents: All water, foam, dry chemical, carbon dioxide, and water-soluble alcohol. Do not use water directly on the liquid.
- 6.4 Fire Extinguishing Agents Not to be Used: Water (directly on the liquid).
- 6.5 Special Hazards of Combustion Products: None known.
- 6.6 Behavior in Fire: Containers may explode. Fire may spread rapidly. Do not use water directly on the liquid.

(Continued on page 4)

7 CHEMICAL REACTIVITY

- 7.1 Reactivity with Water: None.
- 7.2 Reactivity with Common Materials: None.
- 7.3 Stability During Transport: Stable.
- 7.4 Neutralizing Agents for Acids and Caustics: None.
- 7.5 Polymerization: None.
- 7.6 Inhibitor of Polymerization: None.

8 WATER POLLUTION

- 8.1 Aquatic Toxicity: None.
- 8.2 Waterfowl Toxicity: None.
- 8.3 Biological Oxygen Demand (BOD): None.
- 8.4 Food Chain Concentration Potential: None.

9 SELECTED MANUFACTURERS

- Liquid Co.
Houston, Tex. 77001
Phillips Petroleum Co.
Bartlesville, Okla. 74003
Sunoco Co.
St. Davids, Pa. 19080

10 SHIPPING INFORMATION

- 10.1 Grades or Purity: Various grades, mostly propane. In some cases, propylene may be included. The proportion may be indicated on the label.
- 10.2 Storage Temperature: Ambient.
- 10.3 Inert Atmosphere: No requirement.
- 10.4 Venting: Safety relief.

11 HAZARD ASSESSMENT CODE

See Hazard Assessment Manual, 2-446-4.
ABCDEF

- 13.11 Ratio of Specific Heats of Vapor (Gas): 1.16.
- 13.12 Latent Heat of Vaporization: 82.2 Btu/lb = 191.5 kJ/kg = 42.2 x 10³ J/kg.
- 13.13 Heat of Combustion: 49.72 Btu/lb = 114.7 kJ/kg = 49.72 x 10³ J/kg.
- 13.14 Heat of Decomposition: None.
- 13.15 Heat of Solution: None.
- 13.16 Heat of Polymerization: None.

(Continued on page 4)

6 FIRE HAZARDS (Cont'd)

- 6.7 Ignition Temperature: Propane: 536°C (1000°F); Butane: 477°F.
- 6.8 Electrical Hazard: Class I, Group D.
- 6.9 Burning Rate: 8.2 mm/sec.

REVISED 1978

LTH

LITHARGE

Common Synonyms Lead monoxide Lead oxide yellow Plumbous oxide Lead Protoxide		Solid Sinks in water	Gray or yellow green or red brown	Odorless
Keep people away Isolate and remove dispersed material Notify local health and pollution control agencies				
Fire		Not flammable		
Exposure		Solid or dust Irritating to eyes Harmful if inhaled May be toxic to fish and plants Does not readily oxidize and does not react with water SWALLOWED and swallowed CONSUMPTION may irritate stomach and intestines and cause vomiting SWALLOWED and swallowed CONSUMPTION may irritate stomach and intestines and cause vomiting except for persons with iron deficiency		
Water Pollution		Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes Notify local health and wildlife officials Notify operators of nearby water intakes		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446.4) Should be removed Chemical and physical treatment		2. LABELS No label required by Code of Federal Regulations		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Lead monoxide, Lead oxide yellow, Lead protoxide, Massicot, Plumbous oxide 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: PbO 3.4 IMCO/United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: Yellow to red; low-metal content oxides yellow to green to brown; high metal content oxides gray to brown 4.3 Odor: None		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: or metal fume respirator, gloves, goggles 5.2 Symptoms Following Exposure: Generally symptoms of lead poisoning (delayed); inhalation or ingestion causes abdominal pain (lead colic), metallic taste, mouth loss of weight, pain in muscles, and muscular weakness. Dust may irritate eyes 5.3 Treatment for Exposure: Consult physician after ingestion or exposure to high concentrations of dust. INGESTION: call physician at once, as first aid induce vomiting and give milk and magnesium sulfate if possible 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.5 mg/m ³ 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Data not available 5.7 Late Toxicity: Impairs development of human fetal connective tissue cells 5.8 Vapor (Gas) Irritant Characteristics: Not pertinent 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Not pertinent				

6. FIRE HAZARDS 6.1 Flash Point: Not flammable. 6.2 Flammable Limits in Air: Not flammable. 6.3 Fire Extinguishing Agents: Not pertinent. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Not pertinent. 6.6 Behavior in Fire: Not pertinent. 6.7 Ignition Temperature: Not pertinent. 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: Not pertinent.	8. WATER POLLUTION 8.1 Aquatic Toxicity: $> 50,000$ ppm/96 hr: mosquito fish, 11% turbid water. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: Data not available.
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: No reaction. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acid and Causals: Not pertinent. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9. NOTES	

(continued on pages 5 and 6)

LAH

LITHIUM ALUMINUM HYDRIDE

Common Synonyms LAH	Solid powder White to gray Odorless Reacts violently with water. Flammable gas is produced.
Avoid contact with skin and dust. Wear protective clothing including gloves. Stop, inhale if possible. Keep people away. Shut off gas flow source if available. Evacuate area if gas is detected. Notify local health and safety agency.	
Fire	FLAMMABLE Flammable gas is released on contact with water, metal, or acids. Heat released on contact with water. DO NOT USE WATER. DRY CHEMICALS, CARBON DIOXIDE, OR FOAM. Extinguish with powdered metal or powdered graphite.
Exposure	CALL FOR MEDICAL AID SOLID Will burn skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES: Flush with plenty of water. IF SWALLOWED: Do not induce vomiting. Call doctor immediately.
Water Pollution	Effects of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and welfare officials. Notify operators of any water intakes.
1 RESPONSE TO DISCHARGE See Response Methods Handbook, CG 446.4. Isolate. Warn. High fire and toxicity. Restrict access. Disperse and flush with water.	2 LABELS  
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: LAH 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: LiAlH ₄ 3.4 IMCO United Nations Numerical Designation: 4.2 (140)	4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: White to gray 4.3 Odor: None
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Rubberized gloves, full face shield. 5.2 Symptoms Following Exposure: Contact with skin causes severe irritation. 5.3 Treatment for Exposure: Flush the skin thoroughly with water for at least 15 minutes. 5.4 Toxicity by Inhalation (Threshold Limit Value): Not applicable. 5.5 Short-Term Inhalation Limits: Not applicable. 5.6 Toxicity by Ingestion: Data not available. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Not applicable. 5.9 Liquid or Solid Irritant Characteristics: Moderate irritant. 5.10 Odor Threshold: Not applicable.	

6. FIRE HAZARDS

- 6.1 Flash Point: Solid
 6.2 Flammable Limits in Air: Not pertinent
 6.3 Fire Extinguishing Agents: Powdered graphite, powdered salt, or powdered limestone.
 6.4 Fire Extinguishing Agents Not to be Used: Do NOT use water and acids with or divide on dry chemical.
 6.5 Special Hazards of Combustion Products: Data not available.
 6.6 Behavior in Fire: Decomposes at 257°F to form hydrogen gas. The heat generated may cause further fire and explosion.
 6.7 Ignition Temperature: Data not available.
 6.8 Electrical Hazard: Class I, Group B.
 6.9 Burning Rate: Not pertinent.

7. CHEMICAL REACTIVITY

- 7.1 Reactivity with Water: Reacts violently with water as a solid, or when dissolved in ether. The hydrogen evolved by the reaction with water is a non-flammable gas and necessitates adequate ventilation.
 7.2 Reactivity with Common Materials: Can burn in heated or moist air.
 7.3 Stability During Transport: Normally stable, unstable at high temperatures.
 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent.
 7.5 Polymerization: Not pertinent.
 7.6 Inhibitor of Polymerization: Not pertinent.

8. WATER POLLUTION

- 8.1 Aquatic Toxicity: Data not available.
 8.2 Waterfowl Toxicity: Data not available.
 8.3 Biological Oxygen Demand (BOD): Data not available.
 8.4 Food Chain Concentration Potential: None.

NOTES

LHD

LITHIUM HYDRIDE

Common Synonyms	Solid Crystals are gray or blue; powder is white. Odorless. Reacts violently with water. Flammable gas is produced.
AVOID CONTACT WITH SOLID AND DUST. KEEP IT OFF! AWAY Wear dust respirator and full face shield. Remove contaminated gloves. Never discharge to sink. Isolate area and keep out of traffic. Notify local health officer for decontamination.	
Fire	Combustible. Irritating flammable gas may be produced when heated. Extinguish with dry graphite or sand or DRY ICE POWDER. DO NOT USE WATER TO WASH CARBON DIOXIDE OR OTHER CHEMICALS ON FIRE OR ADJACENT AREAS.
 Exposure	ALL FORMS OF LITHIUM DUST POISONOUS IF INHALED If inhaled will cause coughing or difficult breathing. If inhaled, remove person to fresh air. Wash face with water. If in eyes, flush with water. If in mouth, do not swallow. Spit out and rinse mouth with water. If SWALLOWED, do not induce vomiting. If UNCONSCIOUS, having CONVULSIONS, do not give anything by mouth. SOLID Will burn skin and eyes. If swallowed will cause nausea or loss of consciousness. Remove contaminated clothing and shoes. Flush skin with copious amounts of water. IF IN EYES, flush with copious amounts of water. IF SWALLOWED, do not induce vomiting. If UNCONSCIOUS, having CONVULSIONS, do not give anything by mouth.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Not recommended for wildlife refuges. Notify local health officer if water is leaked.
1 RESPONSE TO DISCHARGE See Response Methods Handbook CG 446-4. Issue warning: High flame, highly toxic smoke. Risk of explosion. Decontaminate and flush with water.	2 LABELS  
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: No common synonyms. 3.2 Coast Guard Compatibility Classification: Not listed. 3.3 Chemical Formula: LiH 3.4 IMCO/United Nations Numerical Designation: 4.1, 1414	4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid. 4.2 Color: Gray-blue crystalline, may have gray and material ranges from black to white to gray. 4.3 Odor: None.
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Goggles or full shield; rubber gloves; full face shield; respirator; full body protective suit. 5.2 Symptoms Following Exposure: Irritation of the eyes, nose, throat, and lungs; coughing and wheezing; chest tightness; and shortness of breath. Symptoms of irritation of the eyes, nose, throat, and lungs; coughing and wheezing; chest tightness; and shortness of breath. 5.3 Treatment for Exposure: If inhaled, hydrate the eyes with eye drops or irrigation. If in eyes, flush with copious amounts of water. If in mouth, do not swallow. Spit out and rinse mouth with water. If SWALLOWED, do not induce vomiting. If UNCONSCIOUS, having CONVULSIONS, do not give anything by mouth. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.05 mg/m³. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Data not available. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.	

6 FIRE HAZARDS

- 6.1 Flash Point: Not applicable.
Non-flammable solid.
- 6.2 Flammable Limits in Air: Not applicable.
- 6.3 Fire Extinguishing Agents: Dry graphite or sand or DRY ICE POWDER.
Graphite or lithium chloride.
- 6.4 Fire Extinguishing Agents Not to be Used: Never use water. Do not use alcohol, hydrocarbon, or dry chemical extinguishers.
- 6.5 Special Hazards of Combustion Products: Irritating and flammable gas may be produced.
- 6.6 Behavior in Fire: Melts and decomposes when heated. Produces flammable hydrogen gas. Reacts violently with water to produce flammable gas which may explode.
- 6.7 Ignition Temperature: Not applicable.
- 6.8 Electrical Hazard: Not applicable.
- 6.9 Burning Rate: Not applicable.

8 WATER POLLUTION

- 8.1 Aquatic Toxicity: Data not available.
- 8.2 Waterfowl Toxicity: Data not available.
- 8.3 Biological Oxygen Demand (BOD): Data not available.
- 8.4 Food Chain Concentration Potential: Data not available.

7 CHEMICAL REACTIVITY

- 7.1 Reactivity with Water: Reacts violently with water to form flammable hydrogen gas and a strong caustic solution. Reaction may occur especially with powder.
- 7.2 Reactivity with Common Materials: Melts and decomposes when heated. Produces flammable hydrogen gas.
- 7.3 Stability During Transport: Stable if sealed and moisture excluded.
- 7.4 Neutralizing Agents for Acids and Caustics: Residues should be washed with water, then rinsed with dilute acetic acid.
- 7.5 Polymerization: Not pertinent.
- 7.6 Inhibitor of Polymerization: Not pertinent.

10 SHIPPING INFORMATION

- 10.1 Grades or Purity: Commercial grade.
- 10.2 Storage Temperature: Ambient.
- 10.3 Inert Atmosphere: Required.
- 10.4 Venting: Not required.

11 HAZARD ASSESSMENT CODE

(See Hazard Assessment Handbook CG 446-3)
RP

12 HAZARD CLASSIFICATIONS

- 12.1 Code of Federal Regulations: Not applicable.
- 12.2 NAS Hazard Rating for Bulk Water Transportation: Not listed.
- 12.3 NFPA Hazard Classifications
- | Category | Classification |
|----------------------|----------------|
| Health Hazard (Blue) | 1 |

13 PHYSICAL AND CHEMICAL PROPERTIES

- 13.1 Physical State at 15°C and 1 atm: Solid.
- 13.2 Molecular Weight: 7.95.
- 13.3 Boiling Point at 1 atm: Not applicable (decomposes).
- 13.4 Freezing Point: Not applicable.
- 13.5 Critical Temperature: Not applicable.
- 13.6 Critical Pressure: Not applicable.
- 13.7 Specific Gravity: 0.78 at 20°C (solid).
- 13.8 Liquid Surface Tension: Not applicable.
- 13.9 Liquid-Water Interfacial Tension: Not applicable.
- 13.10 Vapor (Gas) Specific Gravity: Not applicable.
- 13.11 Ratio of Specific Heats of Vapor (Gas): Not applicable.
- 13.12 Latent Heat of Vaporization: Not applicable.
- 13.13 Heat of Combustion: Data not available.
- 13.14 Heat of Decomposition: Data not available.
- 13.15 Heat of Solution: Not applicable.
- 13.16 Heat of Polymerization: Not applicable.

NOTES

LTM

LITHIUM, METALLIC

Common Synonyms		Salt solid	White to light silver	Odorless
		Reacts violently with water Flammable gas is produced		
AVOID CONTACT WITH SOLID. KEEP PEOPLE AWAY. Wear gloves, avoid blowing dust, avoid eye contact. Call fire department. Remove and remove discharged material. Notify local health and safety authorities.				
Fire		Combustible. Irritating gases may be produced when heated. Wear goggles and self-contained breathing apparatus. Extinguish with dry graphite powder or other inert powder. DO NOT USE WATER, FOAM, DRY CHEMICALS OR CARBON DIOXIDE ON FIRE. DO NOT USE WATER ON LITHIUM ADJACENT LINES.		
Exposure		CALL FOR MEDICAL AID. SOLID: Will burn skin and eyes. Harmful if swallowed. Reactions: irritation of skin, eyes and nose. Flue, irritation, tears with phosgene, fluorine. IF EYES: Flush with plenty of water. IF SWALLOWED: Do not induce vomiting. Have victim drink water or milk. IF SWALLOWED: Do not induce vomiting if unconscious or having convulsions. Notify physician.		
Water Pollution		Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local water pollution agency. Notify petroleum cleanup authorities.

MGX

MAGNESIUM

Common Synonyms	Silver Sinks in water	Silvery Odorless		
Call fire department. Upon discharge, powder keeps in place. In life and fire, use fire extinguisher, as usual. No local heat and pollution - if it is dry.				
Fire	FLAMMABLE Extinguish with dry graphite, soda ash, or other inert powder. DO NOT USE WATER TO EXTINGUISH DRY CHEMICALS OR VAPORIZING LIQUID ON FIRE.			
Exposure	Call fire department. SOLID Irritating to eyes. Harmful if swallowed. If IN EYES, hold eye open and flush with plenty of water. If SWALLOWED, do not induce vomiting. Call doctor. Drink water.			
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if enters water intakes. No effect on fish and wildlife if eaten. No serious operation of nearby water intakes.			
1 RESPONSE TO DISCHARGE (See Response Manual Handbook, CG 446-4) Issue warning - high flammability. Should not be moved. Chemical and physical treatment.

MPC

MAGNESIUM PERCHLORATE

Common Synonyms Anhydrous Dendritic Magnesium perchlorate anhydrous Magnesium perchlorate hexahydrate	Solid White Odorless Sinks and mixes with water
Avoid contact with skin and eyes. Keep away from heat and flame. Do not breathe dust. Do not get on clothes.	
Fire	Not flammable May cause fire on contact with combustibles Will increase the intensity of a fire Do not use water
Exposure	CAUTION FOR MEDICAL AID DUST Irritating to eyes, nose and throat If inhaled will cause difficult breathing If eyes are irritated, flush with plenty of water If breathing is difficult, get fresh air or use a respirator If breathing is difficult, get fresh air SOLID Irritating to skin and eyes If swallowed will cause nausea, vomiting or loss of consciousness Remove contaminated clothing and shoes Flush affected areas with plenty of water If EYES are irritated, flush with plenty of water If SWALLOWED, drink water or milk. Do not induce vomiting. If unconscious, do not give anything by mouth. If SWALLOWED, do not induce vomiting. Do not have any food or drink. (CONCLUSIONS OF THE INVESTIGATION)
Water Pollution	Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes Notify local health and welfare officials Notify police and fire department
1 RESPONSE TO DISCHARGE See Response Methods Handbook CG 446.4 Toxic warning oxidizing material Restrict access Dispose and flush	2. LABEL 
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Anhydrous Dendritic Magnesium perchlorate anhydrous Magnesium perchlorate hexahydrate 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: Mg(ClO ₄) ₂ 3.4 IMCO/United Nations Numerical Designation: 5.1 1474	4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: White 4.3 Odor: None
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: U.S. Bureau of Mines approved respirator, chemical safety goggles, face shield 5.2 Symptoms Following Exposure: Inhalation of dust irritates mucous membranes. Ingestion of large amounts may be fatal. Immediate symptoms include abdominal pain, nausea and vomiting, diarrhea, pallor, blueness, shortness of breath, unconsciousness. Contact with eyes or skin causes irritation. 5.3 Treatment for Exposure: INHALATION: remove victim to fresh air, get medical attention if irritation persists. INGESTION: give large amount of water, induce vomiting, call a physician. EYES: flush with copious quantities of water for at least 15 min., call physician. SKIN: flush with water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Data not available 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available

(Continued on pages 5 and 6)

MLT

MALATHION

Common Synonyms Cythion Insecticide		Liquid	Yellow to dark brown	Skunk-like odor
Sinks in water. Freezing point is 37° F.				
AVOID CONTACT WITH EYES. If contact occurs, flush eyes with water for 15 minutes. If swallowed, do not induce vomiting. Seek medical attention.				
Fire		Combustible POISONOUS GASES ARE PRODUCED IN FIRE AND WHEN HEATED Containers may explode in fire If fire occurs, use dry chemical, carbon dioxide, or water spray foam to extinguish. Do not use water stream directly on container.		
Exposure		LIQUID POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED Irritating to eyes If in eyes, flush with water for 15 minutes. If swallowed, do not induce vomiting. Seek medical attention. If skin is exposed, remove contaminated clothing and wash exposed areas thoroughly with water. Remove contaminated clothing under a shower. Administer atropine, 2 mg (1/30 gr) intramuscularly or intravenously as soon as any local or systemic signs or symptoms of an intoxication are noted. Repeat the administration of atropine every 3-8 min. until signs of atropinization (mydriasis, dry mouth, rapid pulse, hot and dry skin) occur, initiate treatment in children with 1 mg of atropine. Watch respiration and remove bronchial secretions if they appear to be obstructing the airway, intubate if necessary. Give 2 PAM (Pralidoxime, Protopam), 2.5 g in 100 ml of sterile water or in 5% dextrose and water intravenously slowly in 15-30 min. If sufficient fluid is not available, give 1 gm of 2 PAM in 1 ml of distilled water by deep intramuscular injection. Repeat this every half hour if respiration weakens or if muscle fasciculation or convulsions recur.		
Water Pollution		HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes Do not discharge into waterways.		
1. RESPONSE TO DISCHARGE (See Response to Malathion Handbook, CG 446-1)		2. LABEL		
Issue warning: poison + alter contaminant Restrict access Should be removed + chemical and physical treatment.				
3. CHEMICAL DESIGNATIONS		4. OBSERVABLE CHARACTERISTICS		
31 Synonyms: CYTHION Insecticide S (1,2-Bis (ethoxy-carbonyl) ethyl) C O dimethyl phosphorodithioate		41 Physical State (as shipped): Liquid		
32 Coast Guard Compatibility Classification: Not applicable		42 Color: Yellow to dark brown		
33 Chemical Formula: C ₁₀ H ₁₆ O ₆ P ₂ S ₂		43 Odor: Characteristic skunk-like mercaptan		
34 IMCO/United Nations Numerical Designation: 6.1/1893				
5. HEALTH HAZARDS				
51 Personal Protective Equipment: Wear self-contained breathing apparatus (or respirator for organophosphoric pesticides) and rubber clothing while fighting fires of malathion with chlorinated bleach solution. All clothing contaminated by fumes and vapors must be decontaminated.				
52 Symptoms Following Exposure: Exposure to fumes from a fire or to liquid causes headache, blurred vision, constricted pupils of the eyes, weakness, nausea, cramps, diarrhea and tightness in the chest. Muscle twitch and convulsions may follow. The symptoms may develop over a period of 8 hours.				
53 Treatment for Exposure: Speed is essential. INSPIRATION: in the nonbreathing victim immediately institute artificial respiration using the mouth-to-mouth, the mouth-to-nose or the mouth-to-oropharyngeal method. Call physician. INTENTION: administer milk, water or salt water and induce vomiting repeatedly. SKIN OR EYE CONTACT: flood and wash exposed skin areas thoroughly with water. Remove contaminated clothing under a shower. Administer atropine, 2 mg (1/30 gr) intramuscularly or intravenously as soon as any local or systemic signs or symptoms of an intoxication are noted. Repeat the administration of atropine every 3-8 min. until signs of atropinization (mydriasis, dry mouth, rapid pulse, hot and dry skin) occur, initiate treatment in children with 1 mg of atropine. Watch respiration and remove bronchial secretions if they appear to be obstructing the airway, intubate if necessary. Give 2 PAM (Pralidoxime, Protopam), 2.5 g in 100 ml of sterile water or in 5% dextrose and water intravenously slowly in 15-30 min. If sufficient fluid is not available, give 1 gm of 2 PAM in 1 ml of distilled water by deep intramuscular injection. Repeat this every half hour if respiration weakens or if muscle fasciculation or convulsions recur.				

6. FIRE HAZARDS

- 61 Flash Point: > 325°F
62 Flammable Limits in Air:
Data not available
63 Fire Extinguishing Agents: Dry chemical, carbon dioxide, water spray foam
64 Fire Extinguishing Agents Not to be Used:
Not pertinent
65 Special Hazards of Combustion Products:
Vapors and fumes from fires are hazardous. They include sulfur dioxide and phosphoric acid
66 Behavior in Fire: Gives off hazardous fumes. Area surrounding fire should be diked to prevent water runoff
67 Ignition Temperature: Data not available
68 Electrical Hazard: Not pertinent
69 Burning Rate: Data not available

8. WATER POLLUTION

- 81 Aquatic Toxicity:
0.09 ppm/96 hr/bluegill/TL₅₀/fresh water
0.033-0.083 ppm/96 hr/marine crustaceans
LC₅₀
82 Waterway Toxicity: LD₅₀=1485 mg/Lg
83 Biological Oxygen Demand (BOD)
Data not available
84 Food Chain Concentration Potential
None

9. SELECTED MANUFACTURERS

American Cyanamid Co
Agricultural Division
P.O. Box 400
Princeton, N.J. 08540

7. CHEMICAL REACTIVITY

- 71 Reactivity with Water: None
72 Reactivity with Common Materials:
No hazardous reaction
73 Stability During Transport: Not pertinent
74 Neutralizing Agents for Acids and Caustics:
Liquid bleach solution for decontamination
75 Polymerization: Not pertinent
76 Inhibitor of Polymerization:
Not pertinent

10. SHIPPING INFORMATION

- 101 Grades or Purity: CYTHION
Insecticide, Malathion ULV Concentrate
Insecticide. Many powders, dusts and spray solutions are sold under a variety of trade names
102 Storage Temperature: Below 120°F
Decomposition (non hazardous) occurs at higher temperatures
103 Inert Atmosphere: Data not available
104 Venting: Data not available

11. HAZARD ASSESSMENT CODE

(See Hazard Assessment Handbook, CG 446-3)
A-X-Y

12. HAZARD CLASSIFICATIONS

- 121 Code of Federal Regulations:
Poisonous liquid or solid, Class B
122 NAB Hazard Rating for Bulk Water Transportation: Not listed
123 NFPA Hazard Classifications: Not listed

13. PHYSICAL AND CHEMICAL PROPERTIES

- 131 Physical State at 15°C and 1 atm: Liquid
132 Molecular Weight: 330.36
133 Boiling Point at 1 atm: Very high
134 Freezing Point: 37°F = 2.9°C = 276°K
135 Critical Temperature: Not pertinent
136 Critical Pressure: Not pertinent
137 Specific Gravity: 1.234 at 25°C (liquid)
138 Liquid Surface Tension: 37.1 dynes/cm = 0.0371 N/m at 24°C
139 Liquid-Water Interfacial Tension: 19 dynes/cm = 0.019 N/m at 24°C
1310 Vapor (Gas) Specific Gravity:
Not pertinent
1311 Ratio of Specific Heats of Vapor (Gas):
Not pertinent
1312 Latent Heat of Vaporization:
Not pertinent
1313 Heat of Combustion: Data not available
1314 Heat of Decomposition: Not pertinent
1315 Heat of Solution: Not pertinent
1316 Heat of Polymerization: Not pertinent

(continued on pages 5 and 6)

5. HEALTH HAZARDS (Cont'd.)

- 54 Toxicity by Inhalation (Threshold Limit Value): 10 mg/m³
55 Short-Term Inhalation Limits: Data not available
56 Toxicity by Ingestion: Grade 2.1 LD₅₀ 5 to 5 g/kg (rat)
57 Late Toxicity: Data not available
58 Vapor (Gas) Irritant Characteristics: None likely
59 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain, may cause smarting and reddening of the skin
510 Odor Threshold: Data not available

REVISED 1978

MLI

MALEIC ACID

Common Synonyms: cis-Butenedioic acid cis-1,2-Ethylene dicarboxylic acid Maleic acid Maleic acid Tetraic acid		Solid White Odorless
Avoid contact with skin or eyes. Wash immediately with plenty of water. If inhaled, move to fresh air. If swallowed, drink plenty of water. Do not induce vomiting.		Sinks and mixes with water
Fire		Combustible
Exposure		ACUTE MEDICAL SIGNS DUST Irritating to eyes, nose and throat. If inhaled will cause coughing or difficult breathing. SOLID Irritating to skin and eyes. Harmful if swallowed. Remove clothing if contaminated. If on skin, flush with water. If in eyes, flush with water for 15 minutes. If swallowed, drink plenty of water. If swallowed, do not induce vomiting.
Water Pollution		Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes.
1 RESPONSE TO DISCHARGE See Response Manual Handbook, CG 446.41. Disperse and Flush.		2. LABELS No hazard label required by Codes of Federal Regulations.
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: cis-Butenedioic acid cis-1,2-Ethylene dicarboxylic acid Maleic acid, Maleic acid, Tetraic acid 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: $\text{HOOC}-\text{CH}=\text{CH}-\text{COOH}$ 3.4 IMCO/United Nations Numerical Designation: Not listed		4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: White 4.3 Odor: None
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Dust mask, goggles or face shield, protective gloves. 5.2 Symptoms Following Exposure: Inhalation causes irritation of nose and throat. Contact with eyes causes irritation. 5.3 Treatment for Exposure: INHALATION: Remove to fresh air. EYES: Immediately flush with plenty of water for 15 minutes. Get medical attention for eye irritation. SKIN: Wash with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 3 oral LD₅₀ = 100 mg/kg rats 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available		6. FIRE HAZARDS 6.1 Flash Point: Not pertinent (combustible solid) 6.2 Flammable Limits in Air: Not pertinent 6.3 Fire Extinguishing Agents: Water, foam, dry chemical, carbon dioxide 6.4 Fire Extinguishing Agents Not to be Used: 6.5 Special Hazards of Combustion Products: Irritating smoke containing malic anhydride may form in fire 6.6 Behavior in Fire: 6.7 Ignition Temperature: Data not available 6.8 Electrical Hazard: Not pertinent 6.9 Burning Rate: Not pertinent
7. MLA

MALEIC ANHYDRIDE

Common Synonyms Toxic: anhydride ex: Butenedioic anhydride	Molten, or solid crystals or tablets. Colorless. Choking odor. Sinks and mixes slowly with water.
As an irritant when used and liquid, heavy vapors arise. Wear goggles, self-contained breathing apparatus, and rubber clothing, including gloves. Stop discharge if possible. Call fire department. Isolate and remove discharged material. Notify local health and pollution control agencies.	
Fire	Combustible. Dust cloud may be ignited by spark or flame. Wear goggles, self-contained breathing apparatus, and rubber clothing, including gloves. Extinguish with dry chemical or carbon dioxide. Water may be ineffective.
Exposure	SAFETY INFORMATION LIQUID OR SOLID Will burn skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. If IN EYES, hold eyelids open and flush with plenty of water. If SWALLOWED and victim is CONSCIOUS, have victim drink water.
Water Pollution	Dangerous to aquatic life in high concentrations. May be dangerous if it enters water intakes. Notify local health and pollution control agency. Notify operator of local water treatment plant.
1. RESPONSE TO DISCHARGE See Response Methods Handbook, CG 446-4. Hyperic and flush.	2. LABELS No hazard label required by Code of Federal Regulations.
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: cis-Butenedioic anhydride; 2,3-Furandione; Toxic anhydride. 3.2 Coast Guard Compatibility Classification: Not applicable. 3.3 Chemical Formula: (C ₄ H ₂ O ₃) _n . 3.4 IMCO United Nations Numerical Designation: 9.0.	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid or liquid. 4.2 Color: Colorless. 4.3 Odor: Astringent, choking.
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Approved organic vapor and gas canister, chemical goggles, and face shield; rubber gloves and boots; coveralls or rubber apron. 5.2 Symptoms Following Exposure: Irritation causes coughing, sneezing, throat irritation, skin contact causes irritation and redness. Vapors cause severe eye irritation, photophobia and double vision may occur. 5.3 Treatment for Exposure: INHALATION: Give oxygen. EYE OR SKIN CONTACT: Flush with lot of water for at least 15 min. For eyes, call a physician. For contact with skin, remove contaminated clothing and treat as chemical and thermal burn. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.25 ppm. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 2. LD ₅₀ 0.5 g/kg. 5.7 Letal Toxicity: None. 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause moderate irritation such that personnel will find high concentrations unpleasant. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Causes smothering of the skin and first degree burns on short exposure; may cause secondary burns on long exposure. 5.10 Odor Threshold: 1.3 - 2.9 mg/m ³ .	

6. FIRE HAZARDS

- 6.1 **Flash Point:** (Liquid) 215°F (C = 240°F) O.C.
 6.2 **Flammable Limits in Air:** 1.4% - 7.1%
 6.3 **Fire Extinguishing Agents:** Alcohol foam, dry chemical or carbon dioxide.
 6.4 **Fire Extinguishing Agents Not to be Used:** Water or foam may cause frothing.
 6.5 **Special Hazards of Combustion Products:** No pertinent.
 6.6 **Behavior in Fire:** When heated above 400°F, in the presence of various materials, may generate heat and carbon dioxide. Will explode if confined.
 6.7 **Ignition Temperature:** 475°F.
 6.8 **Electrical Hazard:** Class I, Group D.
 6.9 **Burning Rate:** 1.4 mm/min.

7. CHEMICAL REACTIVITY

- 7.1 **Reactivity with Water:** Hot water may cause frothing. Reacts with cold water slowly and non-hazardous.
 7.2 **Reactivity with Common Materials:** No reaction.
 7.3 **Stability During Transport:** Stable.
 7.4 **Neutralizing Agents for Acids and Caustics:** Solid spills: Immediately be covered before any significant reaction with water occurs. Flush area of spill with water.
 7.5 **Polymerization:** Very unlikely at ordinary temperatures, even in the molten state.
 7.6 **Inhibitor of Polymerization:** None.

8. WATER POLLUTION

- 8.1 **Aquatic Toxicity:** 150 ppm/24 hr. sunlight, 11 hr. fresh water.
 8.2 **Waterford Toxicity:** Data not available.
 8.3 **Biological Oxygen Demand (BOD):** 40% 4 days.
 8.4 **Food Chain Concentration Potential:** None.

9. SELECTED MANUFACTURERS

1. Monsanto Co.
 Monsanto Industrial Chemicals Co.
 300 North Lindbergh Blvd.
 St. Louis, Mo. 63166.
 2. Petro-Tech Chemical Corp.
 5000 Park Place
 Houston, Tex. 77057.
 3. United States Steel Corp.
 U.S.S. Chemicals Division
 Neville Island, Pa. 15225.

10. SHIPPING INFORMATION

- 10.1 **Grade or Purity:** Commercial 99%
 10.2 **Storage Temperature:** Ambient.
 10.3 **Inert Atmosphere:** No requirement.
 10.4 **Venting:** Open.

11. HAZARD ASSESSMENT CODE

(See Hazard Assessment Handbook, CG 446-3).
 RR

12. HAZARD CLASSIFICATIONS

- 12.1 **Code of Federal Regulations:** Not listed.
 12.2 **NAS Hazard Rating for Bulk Water Transportation:**
- | Category | Rating |
|--------------------------|--------|
| Fire | 1 |
| Health | |
| Vapor Irritant | 2 |
| Liquid or Solid Irritant | 2 |
| Poison | 1 |
| Water Pollution | |
| Human Toxicity | 2 |
| Aquatic Toxicity | 2 |
| Aesthetic Effect | 1 |
| Reactivity | |
| Other Chemicals | 1 |
| Water | 2 |
| Self Reaction | 0 |
- 12.3 **NFPA Hazard Classifications:**
- | Category | Classification |
|----------------------|----------------|
| Health Hazard (Blue) | 3 |
| Flammability (Red) | 1 |
| Reactivity (Yellow) | 1 |

13. PHYSICAL AND CHEMICAL PROPERTIES

- 13.1 **Physical State at 15°C and 1 atm:** Solid.
 13.2 **Molecular Weight:** 98.06.
 13.3 **Boiling Point at 1 atm:** 140°F = 200°C = 473°K.
 13.4 **Freezing Point:** 127°F = 53°C = 326°K.
 13.5 **Critical Temperature:** Not pertinent.
 13.6 **Critical Pressure:** Not pertinent.
 13.7 **Specific Gravity:** 1.43 at 15°C (solid).
 13.8 **Liquid Surface Tension:** Not pertinent.
 13.9 **Liquid-Water Interfacial Tension:** Not pertinent.
 13.10 **Vapor (Gas) Specific Gravity:** Not pertinent.
 13.11 **Ratio of Specific Heats of Vapor (Gas):** Not pertinent.
 13.12 **Latent Heat of Vaporization:** Not pertinent.
 13.13 **Heat of Combustion:** -1916 Btu/lb = -159 cal/g = -238 kJ/kg.
 13.14 **Heat of Decomposition:** Not pertinent.
 13.15 **Heat of Solution:** -153 Btu/lb = -12.5 cal/g = -156 kJ/kg.
 13.16 **Heat of Polymerization:** Not pertinent.

REVISED 1978

MLH

MALEIC HYDRAZIDE

Common Synonyms 1,2-Dihydro-3,6-pyridinedione Maleic acid hydrazide MH Malazide Regulus	Solid White Odorless Sinks in water
Call the department keeps people away Isolate and remove structure, if structure Not a health and pollution hazard	
Fire	Combustible POISONOUS GASES MAY BE PRODUCED IN FIRE Extinguish with water. Do not use foam or dry chemical extinguishers.
Exposure	Inhalation: irritant DUST Irritating to eyes, nose and throat May be irritating to respiratory tract If in eyes: Flush with plenty of water If in mouth: Spit out and swallow If swallowed: Spit out and swallow SOLID Irritating to skin and eyes Harmful if swallowed Reproductive: Irritates skin and eyes If in eyes: Flush with plenty of water If in mouth: Spit out and swallow If swallowed: Spit out and swallow If swallowed: Spit out and swallow If swallowed: Spit out and swallow
Water Pollution	Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes Not a health and pollution hazard Not a health and pollution hazard
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning - water contaminant Should be removed Chemical and physical treatment	2. LABELS No label required by Code of Federal Regulations
3. MAT

MERCURIC ACETATE

Common Synonyms	Solid White Mild vinegar like odor Sinks and mixes with water
AVOID CONTACT WITH SOLID AND USE KEEL PROPERLY Wear a respirator and eye protection. Avoid contact with water. Do not use in food or drink. Do not use in children's toys. Do not use in children's clothing.	
Fire	Not flammable POISONOUS GASES MAY BE PRODUCED WHEN HEATED
Exposure	HAZARD FOR MEDICAL USE DUST POISONOUS IF INHALED May cause irritation of the respiratory tract. May cause dermatitis. Ingestion causes pain, vomiting, ulceration of mouth and stomach, kidney failure, metal taste, pain, and rapid weakness. SOLID POISONOUS IF SWALLOWED If swallowed, do not induce vomiting. Do not eat or drink. Do not use laxatives. Do not use cathartics. Do not use enemas. Do not use any other treatment. Do not use any other treatment.
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes Do not use in or near water intakes Do not use in or near water intakes
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4)	2 LABEL 
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Not applicable 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: $(\text{CH}_3\text{COO})_2\text{Hg}$ 3.4 IMCO/United Nations Numerical Designation: 6.1 (b)(2)	4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: White 4.3 Odor: Night air
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Rubber gloves, dust mask, goggles 5.2 Symptoms Following Exposure: The general symptoms are those of acute poisoning developing rapidly after ingestion but more slowly after repeated exposure. Contact with eyes causes irritation and ulceration. Skin contact may cause dermatitis. Ingestion causes pain, vomiting, ulceration of mouth and stomach, kidney failure, metal taste, pain, and rapid weakness. 5.3 Treatment for Exposure: Have physician treat. Do not induce vomiting. Do not eat or drink. Do not use laxatives. Do not use cathartics. Do not use enemas. Do not use any other treatment. Do not use any other treatment. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.1 mg/m³ (as mercury) 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 3 oral LD₅₀ 7 mg/kg 5.7 Eye Toxicity: Irritation, Necrosis and Adhesions, damage to cornea 5.8 Vapor (Gas) Irritant Characteristics: Not pertinent 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Not pertinent	

6 FIRE HAZARDS 6.1 Flash Point: Not flammable 6.2 Flammable Limits in Air: Not flammable 6.3 Fire Extinguishing Agents: Not pertinent 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent 6.5 Special Hazards of Combustion Products: Smoke may contain toxic mercury or mercury oxide fumes 6.6 Behavior in Fire: Not pertinent 6.7 Ignition Temperature: Not pertinent 6.8 Electrical Hazard: Not pertinent 6.9 Burning Rate: Not pertinent	8 WATER POLLUTION 8.1 Aquatic Toxicity: 24 hr LC ₅₀ 100 µg/L (fresh water) 72 hr LC ₅₀ 100 µg/L (fresh water) * Time interval not specified 8.2 Waterflow Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): Data not available 8.4 Food Chain Concentration Potential: Data not available

NOTES

MCN

MERCURIC CYANIDE

Common Synonyms Cyanurina Mercury cyanide Mercury (II) cyanide	Solid (crystals or powder) White Sinks and mixes slowly with water
AVOID CONTACT WITH SOLID AND DUST. KEEP PEOPLE AWAY. Wear dust mask and gloves. Do not breathe dust. Do not ingest. If swallowed, do not induce vomiting. Get medical attention. Do not breathe dust or fumes.	
Fire	Not flammable POISONOUS GASES MAY BE PRODUCED WHEN HEATED
 Exposure	ALL FORMS OF AID DUST POISONOUS IF INHALED OR IF SKIN IS EXPOSED If inhaled will cause coughing or difficult breathing. If eyes are exposed, remove dust with water. If water is not available, use dry cloth to wipe eyes. If water is available, flush eyes with water for 15 minutes. SOLID POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED Irritating to skin and eyes. If swallowed will cause nausea and vomiting. Remove contaminated clothing and shoes. Flush contaminated skin with water. If EYES have been exposed, flush with water. If SWALLOWED, do not induce vomiting. Get medical attention. If SWALLOWED, induce vomiting only if instructed by medical personnel.
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes. Do not discharge into water.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: poison water contaminant Restrict access Disperse and flush	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Cyanurina, Mercury cyanide, Mercury (II) cyanide 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: Hg(CN) ₂ 3.4 IMCO/United Nations Numerical Designation: 6.1/1636	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: Colorless or white 4.3 Odor: None
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Dust mask, goggles or face shield, rubber gloves. 5.2 Symptoms Following Exposure: Symptoms of both cyanide and mercury intoxication can occur. Acute poisoning has resulted from inhaling dust concentrations of 1.2-5.5 mg/m ³ of air. Symptoms include tightness and pain in chest, coughing, and difficulty in breathing. Cyanide poisoning can cause anxiety, confusion, dizziness, and shortness of breath, with possible unconsciousness, convulsions, and paralysis. Breath may smell like bitter almonds. Ingestion causes necrosis, pain, vomiting, and severe purging, plus the above symptoms. Contact with eyes causes ulceration of conjunctiva and cornea. Contact with skin causes irritation and possible dermatitis. Systemic poisoning can occur by absorption through skin. 5.3 Treatment for Exposure: <i>As quickly call physician.</i> INHALATION: If victim has stopped breathing, start artificial respiration immediately, using amyl nitrite pearls; administer amyl nitrite by inhalation for 15-30 seconds of every minute while sodium nitrite solution is being prepared; discontinue amyl nitrite and immediately inject intravenously 10 ml of a 3% solution of sodium nitrite (nonsterile if necessary) over a period of 2-4 min., without removing needle; infuse intravenously 50 ml of a 25% aqueous solution of sodium thiosulfate; injection should take about 10 min. (concentrations of 5-50% may be used, but keep total dose approx. 12 gm). Oxygen therapy may be helpful in combination with the above. INGESTION: <i>alimentary absorption is very rapid; action during first 10-15 min. determines prognosis.</i> Give egg whites, milk, or activated charcoal and induce vomiting; treat for cyanide poisoning as above. If eyes or skin wash with water for 15 min. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.05 mg/m ³ (as mercury) 5.5 Short-Term Inhalation Limits: Data not available	

(Continued on page 4)

6. FIRE HAZARDS 6.1 Flash Point: Not flammable 6.2 Flammable Limits in Air: Not flammable 6.3 Fire Extinguishing Agents: Not pertinent 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent 6.5 Special Hazards of Combustion Products: Fumes from fire may contain toxic mercury and hydrogen cyanide 6.6 Behavior in Fire: Not pertinent 6.7 Ignition Temperature: Not pertinent 6.8 Electrical Hazard: Not pertinent 6.9 Burning Rate: Not pertinent	8. WATER POLLUTION 8.1 Aquatic Toxicity: 0.02 ppm/48 hr/daphnia magna; 11 mg/l/fresh water 8.2 Waterflow Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): Data not available 8.4 Food Chain Concentration Potential: Possible bioaccumulation problem. Many organisms can accumulate mercury from water. Bioconcentrative up to 10,000 fold
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction 7.2 Reactivity with Common Materials: Contact with any acidic material will form poisonous hydrogen cyanide gas, which may collect in enclosed spaces. 7.3 Stability During Transport: Stable 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent 7.5 Polymerization: Not pertinent 7.6 Inhibitor of Polymerization: Not pertinent	9. MID

MERCURIC IODIDE

Common Synonyms Mercuric iodide, red Mercury bisiodide		Solid	Red	Odorless
Sinks in water				
AVOID CONTACT WITH SOLID AND DUST. KEEP PEOPLE AWAY. Wear dust respirator and rubber overclothing (including gloves). Stop discharge if possible. Isolate and remove discharged material. Notify local health and pollution control agencies.				
Fire	Not flammable POISONOUS GASES MAY BE PRODUCED WHEN HEATED			
	CALL FOR MEDICAL AID DUST POISONOUS IF INHALED OR IF SKIN IS EXPOSED If inhaled will cause coughing or difficult breathing. If in eyes, hold eye(s) open and flush with plenty of water. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. SOLID POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED Irritating to skin and eyes. If swallowed will cause nausea and vomiting. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk and have victim induce vomiting. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.			
Exposure				
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.			
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 448-4) Issue warning: poison water contaminant. Restrict access. Should be removed. Chemical and physical treatment.		2 LABEL 		
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Mercuric iodide, red Mercury bisiodide 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: HgI_2 3.4 IMCO/United Nations Numerical Designation: 616115		4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: Red 4.3 Odor: None		
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Dust mask, goggles or face shield, protective gloves. 5.2 Symptoms Following Exposure: All forms of exposure to this compound are hazardous. Acute systemic mercurialism may be fatal within a few minutes; death by uremic poisoning is usually delayed 5-12 days. Acute poisoning has resulted from inhaling dust concentrations of 1.2-8.5 mg/m ³ of air; symptoms include tightness and pain in chest, coughing, and difficulty in breathing. Ingestion causes necrosis, pain, vomiting, and severe purging. Contact with eyes causes ulceration of conjunctiva and cornea. Contact with skin causes irritation and possible dermatitis; systemic poisoning can occur by absorption through skin. 5.3 Treatment for Exposure: INHALATION: remove to fresh air, get medical attention. INGESTION: alimentary absorption is very rapid; action during first 10-15 min. determines prognosis. Give regurgitates, milk, or activated charcoal and induce vomiting; consult physician. EYES: flush with water for at least 15 min. SKIN: flush with water; wash with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.05 mg/m ³ (as mercury). 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 4, oral LD ₅₀ = 40 mg/kg (rats). 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Odorless.

MNT

MERCURIC NITRATE

Common Synonyms Mercury pernitrate Mercury (II) nitrate Mercury nitrate monohydrate	Solid White Sharp odor Sinks in water
AVOID CONTACT WITH SOLID DUST. KEEP PEOPLE AWAY Wear dust respirator and full protective gear. If dust is on clothes, change it as possible. Isolate and remove its large quantities. Stop work with dust until the area is clean.	
Fire	Not flammable Will increase the intensity of a fire POISONOUS GASES MAY BE PRODUCED WHEN HEATED
 Exposure	CALL FOR MEDICAL AID DUST POISONOUS IF INHALED OR IF SKIN IS EXPOSED If inhaled will cause coughing or difficult breathing. If eyes are irritated, pour salt water with plenty of water. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. SOLID POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED Irritating to skin and eyes. If swallowed will cause nausea and vomiting. Remove contaminated clothing and shoes. Flush affected area with plenty of water. If EYES are irritated, open and flush with plenty of water. If SWALLOWED and victim is CONSCIOUS, have vomit back with milk and have victim lie on his left side. If SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, DO NOT GIVE ANYTHING BY MOUTH.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and pollution officials. Notify operators of nearby water intakes.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-3) Issue warning: poison water contaminant: oxidizing material Restrict access Disperse and flush	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Mercuric nitrate monohydrate, Mercury (II) nitrate, Mercury pernitrate 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: $\text{Hg}(\text{NO}_3)_2 \cdot \text{H}_2\text{O}$ 3.4 IMCO/United Nations Numerical Designation: 6.1/1625	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid Color: White, colorless 4.3 Odor: sharp odor of nitric acid
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Dust mask, goggles or face shield, protective gloves 5.2 Symptoms Following Exposure: Acute systemic poisoning may be fatal within a few minutes death by uremic poisoning is usually delayed 5-12 days. Acute poisoning has resulted from inhaling dust concentrations of 1.2-8.5 mg/m ³ of air. Symptoms include tightness and pain in chest, coughing, and difficulty in breathing. Ingestion causes nervous pain, vomiting, and severe purging. Contact with eyes causes ulceration of conjunctiva and cornea. Contact with skin causes irritation and possible dermatitis; systemic poisoning can occur by absorption through skin. 5.3 Treatment for Exposure: INHALATION: remove to fresh air, get medical attention. INGESTION: alimentary absorption is very rapid, action during first 10-15 min. determines prognosis. Give egg whites, milk or activated charcoal and induce vomiting; consult physician. EYES or SKIN: flush with water. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.05 mg/m ³ (as mercury) 5.5 Short-Term Inhalation Limit: Data not available 5.6 Toxicity by Ingestion: Data not available 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available	

6. FIRE HAZARDS 6.1 Flash Point: Not flammable, but may intensify fire 6.2 Flammable Limits in Air: Not flammable 6.3 Fire Extinguishing Agents: Not pertinent 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent 6.5 Special Hazards of Combustion Products: vapors from fire may contain toxic mercury and oxides of nitrogen 6.6 Behavior in Fire: May increase intensity of fire if in contact with burning material 6.7 Ignition Temperature: Not pertinent 6.8 Electrical Hazard: Not pertinent 6.9 Burning Rate: Not pertinent	8. WATER POLLUTION 8.1 Aquatic Toxicity: Data not available 8.2 Wet-snow Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): None 8.4 Food Chain Concentration Potential: Possible bioaccumulation problem. Many organisms can accumulate mercury from water. Bioconcentration up to 10,000 fold
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: Dissolves then forms cloudy acid solution. The reaction is not hazardous. 7.2 Reactivity with Common Materials: Solution will corrode most metals. Solid in contact with wood or paper may cause fire. 7.3 Stability During Transport: Stable 7.4 Neutralizing Agents for Acids and Caustics: Flush well with water, rinse with dilute solution of sodium bicarbonate or soda ash. 7.5 Polymerization: Not pertinent 7.6 Inhibitor of Polymerization: Not pertinent	9. MSF

MERCURIC SULFIDE

Common Synonyms Mercuric sulfide black Lumps mineral Mercuric sulfide red Vermilion Artificial cinnabar Chinese red		Solid	Red or black	Odorless
Sinks in water				
AVOID CONTACT WITH SOLID AND DUST. KEEP PEOPLE AWAY Wear dust respirator and rubber overclothing (including gloves). Stop discharge if possible. Call fire department. Isolate and remove discharged material. Notify local health and pollution control agencies.				
Fire	Combustible POISONOUS GASES MAY BE PRODUCED IN FIRE Wear goggles and self-contained breathing apparatus. Extinguish with water, foam or sand. Other extinguishing agents may be ineffective on fire.			
	CALL FOR MEDICAL AID DUST POISONOUS IF INHALED OR IF SKIN IS EXPOSED If inhaled will cause coughing or difficult breathing. If in eyes, hold eyelids open and flush with plenty of water. If breathing has stopped, artificial respiration. If breathing is difficult, give oxygen. SOLID POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED Irritating to skin and eyes. If swallowed will cause coughing, nausea and vomiting. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. If IN EYES, hold eyelids open and flush with plenty of water. If SWALLOWED and victim is CONSCIOUS, have victim drink water or milk and have victim induce vomiting. If SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.			
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.			
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 444-4) Issue warning: water contaminant. Should be removed. Chemical and physical treatment.		2. LABELS No hazard label required by Code of Federal Regulations.		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Mercuric sulfide black (lumps mineral), Mercuric sulfide, red (vermilion, Artificial cinnabar, Chinese red). 3.2 Coast Guard's Compatibility Classification: Not listed. 3.3 Chemical Formula: HgS. 3.4 IMCO/United Nations Numerical Designation: 6.1/2024.		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid. 4.2 Color: Red or black. 4.3 Odor: None.		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Dust mask, goggles or face shield, protective gloves. 5.2 Symptoms Following Exposure: Acute poisoning can result from inhaling dust concentrations of 12.5 mg/m ³ in air. Symptoms include pain and tightness in chest, coughing, and difficulty in breathing. If ingested, toxicity depends on release of the Hg ²⁺ ion. Chronic mercury poisoning can cause kidney, mental, and nervous system disturbances. Dust irritates eyes and frequently causes allergic dermatitis. Absorption through skin can cause systemic poisoning. 5.3 Treatment for Exposure: INHALATION: remove to fresh air, give artificial respiration if breathing has stopped. INGESTION: give egg whites, milk, or activated charcoal, induce vomiting, consult physician. EYES: flush with water. SKIN: wash with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.05 mg/m ³ as mercuric. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Data not available. 5.7 Late Toxicity: Central nervous system effects, tremors, psychological disturbances in humans. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Odorless.				

6. FIRE HAZARDS 6.1 Flash Point: Not pertinent (combustible solid) 6.2 Flammable Limits in Air: Not pertinent 6.3 Fire Extinguishing Agents: Water, foam, sand 6.4 Fire Extinguishing Agents Not to be Used: Other agents may be ineffective 6.5 Special Hazards of Combustion Products: Smoke from fire contains poisonous mercury vapor and irritating sulfur dioxide gas 6.6 Behavior in Fire: Changes color when hot. Decomposes at burning temperature. The black form may soften, and molten sulfur may flow out and burn 6.7 Ignition Temperature: Data not available 6.8 Electrical Hazard: Not pertinent 6.9 Burning Rate: Not pertinent	8. WATER POLLUTION 8.1 Aquatic Toxicity: Data not available 8.2 Waterbody Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): Data not available 8.4 Food Chain Concentration Potential: Many organisms can accumulate mercury from water. Bioconcentration up to 10,000 fold

MRR

MERCUROUS CHLORIDE

Common Synonyms Calomel Methylmercuric chloride Mercury monochloride Mercury protochloride Mercury subchloride		Solid	White	Odorless
Sinks in water				
AVOID CONTACT WITH SOLID AND DUST. KEEP PEOPLE AWAY. Wear dust respirator. Stop discharge of product. Evacuate area and decontaminate area. Notify local health and pollution control agencies.				
Fire		Not flammable POISONOUS GASES MAY BE PRODUCED WHEN HEATED		
 Exposure		CALL FOR MEDICAL AID DUST POISONOUS IF INHALED If inhaled will cause coughing or difficult breathing. If eyes, nose, mouth, skin, and throat with plenty of water. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. SOLID POISONOUS IF SWALLOWED Irritating to skin and eyes. If swallowed will cause nausea and vomiting. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONVULSING, have victim drink water or milk and have victim induce vomiting. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING NO CONVULSIONS, do nothing except keep victim warm.		
Water Pollution		Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: water contaminant. Restrict access. Show it be removed. Chemical and physical treatment.		2. LABELS No hazard label required by Code of Federal Regulations.		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Calomel; Mercurys monochloride; Mercury protochloride; Mercurys subchloride; Methylmercurys chloride. 3.2 Coast Guard Compatibility Classification: Not listed. 3.3 Chemical Formula: Hg ₂ Cl ₂ (or Hg ₂ Cl). 3.4 IMCO/United Nations Numerical Designation: 4.1/2024.		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid. 4.2 Color: White. 4.3 Odor: None.		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Dust mask, goggles or face shield, protective gloves. 5.2 Symptoms Following Exposure: Acute poisoning can result from inhaling dust concentrations of 1.2 - 8.5 mg/m ³ in air. Symptoms include pain and tightness in chest, coughing, and difficulty in breathing. Compound is an irritant, cathartic, or purgative. "Calomel sickness," a benign reaction with fever and rash, appears after about 1 week; seldom causes systemic poisoning but may be fatal if retained to 100 - 400 mg/kg. Contact with eyes causes mild irritation. 5.3 Treatment for Exposure: INHALATION: remove to fresh air; give artificial respiration if breathing has stopped. INGESTION: give egg whites, milk, or activated charcoal; induce vomiting; consult physician. EYES: flush with water. SKIN: wash with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.05 mg/m (as mercury). 5.5 Short-Term Inhalation Limit: Data not available. 5.6 Toxicity by Ingestion: Grade 3 oral LD ₅₀ = 210 mg/kg rats. 5.7 Late Toxicity: Central nervous system effects: tremors, psychological disturbances in humans. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Odorless.				

5. FIRE HAZARDS

- 6.1 **Flash Point:** Not flammable.

NOTES	

(continued on pages 1 and 2)

Common Synonyms Quackalver	Liquid Sinks in water	Silver	Odorless
AVOID CONTACT WITH SKIN AND EYES. Wash immediately with soap and water. If swallowed, do not induce vomiting. Seek medical attention.			
Fire	Not flammable		
Exposure	LIQUID Effects of exposure may be delayed		
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook CG 446-A) Should be removed Chemical and physical treatment		2. LABELS No Hazard label required by Code of Federal Regulations	
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Quackalver 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: Hg 3.4 HMCO/United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Silver 4.3 Odor: None	
5. HEALTH HAZARDS			
5.1 Personal Protective Equipment: Avoid contact of liquid with skin. For vapor use chemical cartridge (Hopackite) respirator			
5.2 Symptoms Following Exposure: No immediate symptoms. As poisoning becomes established slight muscular tremor, loss of appetite, nausea, and diarrhea are observed. Poisoning of kidneys, and cardiovascular disturbances may occur			
5.3 Treatment for Exposure: Consult a doctor			
5.4 Toxicity by Inhalation (Threshold Limit Value): 0.05 mg/m³			
5.5 Short-Term Inhalation Limits: Data not available			
5.6 Toxicity by Ingestion: No immediate toxicity			
5.7 Late Toxicity: Development of mercury poisoning			
5.8 Vapor (Gas) Irritant Characteristics: None			
5.9 Liquid or Solid Irritant Characteristics: None			
5.10 Odor Threshold: Not pertinent			

6. FIRE HAZARDS 6.1 Flash Point: Not flammable 6.2 Flammable Limits in Air: Not flammable 6.3 Fire Extinguishing Agents: Not pertinent 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent 6.5 Special Hazards of Combustion Products: Not pertinent 6.6 Behavior in Fire: Not pertinent 6.7 Ignition Temperature: Not flammable 6.8 Electrical Hazard: Not pertinent 6.9 Burning Rate: Not flammable	8. WATER POLLUTION 8.1 Aquatic Toxicity: 0.5 l ppm/48 hr/carpagus aedium, TL m / fresh water 0.29 ppm/48 hr/marine fish, TL m / salt water 8.2 Waterfowl Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): None 8.4 Food Chain Concentration Potential: Mercury concentrates in liver and kidneys of ducks and geese to levels above FDA limit of 0.5 ppm. Muscle tissue usually well below the limit
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction 7.2 Reactivity with Common Materials: No reaction 7.3 Stability During Transport: Stable 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent 7.5 Polymerization: Not pertinent 7.6 Inhibitor of Polymerization: Not pertinent	9. NOTES

MSO

MESITYL OXIDE

Common Synonyms 4-methyl-3-pent-2-one Isopropylidenacetone Methyl isobutyl ketone	Liquid Colorless to light yellow Strong peppermint or honey odor Floats and mixes with water. Flammable. Irritating vapor is produced.
Fire	FLAMMABLE. Containers may explode in fire. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area.
Exposure	VAPOR Irritating to eyes, nose and throat. If inhaled will cause headache, dizziness or difficult breathing. LIQUID Irritating to skin and eyes. Harmful if swallowed.
Water Pollution	Effect of low concentrations on aquatic life is unknown. Floating to shoreline. May be dangerous if it enters water intakes.
1. RESPONSE TO DISCHARGE See Response Through Function: CG 446-1. Issue warning: water contaminant. Restrict access. Dispense and flush.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Isobutyl methyl ketone Isopropylideneacetone; Methyl isobutyl ketone; 4-Methyl-3-pentene-2-one 3.2 Corrosion Compatibility Classification: Ketone 3.3 Chemical Formula: $\text{CH}_3\text{COCH}(\text{CH}_3)_2$ 3.4 IMCO/United Nations Numerical Designation: 11-1229	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless to slightly yellow 4.3 Odor: Strong, peppermint, honeylike
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Air pack or organic canister mask, rubber gloves, goggles. 5.2 Symptoms Following Exposure: Inhalation causes irritation of nose and throat, headache, dizziness, difficult breathing. Contact with liquid or concentrated vapor causes severe eye irritation. Liquid irritates skin. Ingestion causes irritation of mouth and stomach. 5.3 Treatment for Exposure: INHALATION: move victim to fresh air and restore breathing, call physician. EYES: immerse eyes with plenty of water for at least 15 min. SKIN: wash with water. INGESTION: give large amount of water, call physician. 5.4 Toxicity by Inhalation (Threshold Limit Value): 25 ppm 5.5 Short-Term Inhalation Limits: 1,000 ppm for 60 min 5.6 Toxicity by Ingestion: Lethal LD_{50} = 1,120 mg/kg rats 5.7 Lethal Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause moderate irritation such that personnel will find high concentrations unpleasant. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Causes smarting of the skin and first degree burns on short exposure; may cause second degree burns on long exposure. 5.10 Odor Threshold: 12 ppm	

6. FIRE HAZARDS 6.1 Flash Point: 84°F O.C. 73°F C.C. 6.2 Flammable Limits in Air: Data not available 6.3 Fire Extinguishing Agents: Alcohol foam, dry chemical, carbon dioxide 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective 6.5 Special Hazards of Combustion Products: Not pertinent 6.6 Behavior in Fire: Vapor is heavier than air and may travel a considerable distance to a source of ignition and flash back. 6.7 Ignition Temperature: 652°F 6.8 Electrical Hazard: Data not available 6.9 Burning Rate: 4.2 mm/min	8. WATER POLLUTION 8.1 Aquatic Toxicity: Data not available 8.2 Waterway Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): Data not available 8.4 Food Chain Concentration Potential: None

MCL

METHALLYL CHLORIDE

Common Synonyms 1-Chloro-2-methylpropene gamma-Chlorobutylene beta-Methylchloride beta-Methylchloride		Liquid Colorless to yellow Sharp penetrating odor
Boiling point: 37.1°C (99°F) Melting point: -104.3°C (-155.7°F) Vapor pressure: 100 mm Hg at 20°C Density: 0.89 g/cm³ at 20°C Specific gravity: 0.89 at 20°C Refractive index: 1.38 at 20°C		
Fire		FLAMMABLE Irritating gases may be produced when heated Containers may explode in fire Flashback along vapor trail may occur Vapor may explode if ignited in an enclosed area Flashback with dry, metallic surfaces may occur May be ineffective with water Exposure: Irritation with the eyes
Exposure		VAPOR Harmful if inhaled May irritate eyes, nose, and throat If breathed has a typical ether-like irritation If breathing difficulty occurs, stop exposure LIQUID Irritating to skin and eyes Harmful if swallowed Remove contaminated clothing as soon as possible Flush affected areas with water for 15 minutes If IN EYES, hold eyelids open and flush with plenty of water If SWALLOWED, do not induce vomiting unless told to do so by a physician If SWALLOWED, drink water to help dilute and swallow If SWALLOWED, do not induce vomiting unless told to do so by a physician
Water Pollution		Effect of low concentrations on aquatic life is unknown Feeding to shoreline May be dangerous if it enters water intakes No data on biodegradability No data on persistence in water
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Toxic warning - high flammability Restrict access Mechanical containment Should be removed Chemical and physical treatment		2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: gamma-Chlorobutylene, 1-Chloro-2-methylpropene, beta-Methylchloride, beta-Methylchloride 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: C ₄ H ₇ Cl 3.4 HBCO/United Nations Numerical Designation: 1.2 1901		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless to straw 4.3 Odor: Pungent, penetrating
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Organic canister mask, goggles, rubber gloves 5.2 Symptoms Following Exposure: Inhalation causes irritation of nose and throat. Contact of vapor or liquid with eyes causes irritation. Liquid irritates skin. Exposure causes irritation of mouth and stomach. 5.3 Treatment for Exposure: INHALATION: remove victim to fresh air. If breathing stops, give artificial respiration and oxygen. Subsequent treatment is symptomatic and supportive. Flush with water for at least 15 min., get medical attention if exposure has been to liquid. No skin flush with water, get medical attention if skin is burned. INGESTION: induce vomiting and follow with gastric lavage, demulcents, and saline cathartics, get medical attention. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Data not available 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available

NOTES (Continued on pages 5 and 6)	

MTH

METHANE

Common Synonyms Marsh gas Natural gas	Liquid or gas Colorless Weak odor Liquid floats and boils on water. Flammable visible vapor cloud is produced.
Fire	FLAMMABLE. Flashback along vapor trail may occur. May explode if ignited in an enclosed area.
Exposure	VAPOR Not irritating to eyes, nose or throat. If inhaled, will cause dizziness, difficult breathing, and loss of consciousness. LIQUID Will cause frostbite.
Water Pollution	Not harmful to aquatic life.
1. RESPONSE TO DISCHARGE See Response Methods Manual, CG 404.4 Toxic warning: High Concentration Restrict access Evacuate area	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonym: Marsh gas 3.2 Coast Guard Compatibility Classification: Paraffin 3.3 Chemical Formula: CH ₄ 3.4 IMCO United Nations Numerical Designation: 2019	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Gas 4.2 Color: Colorless 4.3 Odor: Weak odor
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Self-contained breathing apparatus for high concentrations; protective clothing if exposed to liquid. 5.2 Symptoms Following Exposure: High concentrations may cause dizziness and loss of consciousness, even at 1% concentration in air. 5.3 Treatment for Exposure: Remove to fresh air. Support respiration. 5.4 Toxicity by Inhalation (Threshold Limit Value): Not persistent (methane is an asphyxiant, and limiting factor is available oxygen). 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Not pertinent. 5.7 Oral Toxicity: None. 5.8 Vapor (Gas) Irritant Characteristics: Vapors are nonirritating to the nose and throat. 5.9 Liquid or Solid Irritant Characteristics: No appreciable hazard. Practically harmless to the skin because of evaporative property. But may cause some frostbite. 5.10 Odor Threshold: 700 ppm.	

6 FIRE HAZARDS

- 6.1 Flash Point: Flammable gas
- 6.2 Flammable Limits in Air: 4.7% - 15.0%
- 6.3 Fire Extinguishing Agents: Suffocation of gas
- 6.4 Fire Extinguishing Agents Not to be Used: Water
- 6.5 Special Hazards of Combustion Products: None
- 6.6 Behavior in Fire: Not pertinent
- 6.7 Ignition Temperature: 1044°F
- 6.8 Electrical Hazard: Class I Group D
- 6.9 Burning Rate: 12 cm/min

8 WATER POLLUTION

- 8.1 Aquatic Toxicity: None
- 8.2 Waterfowl Toxicity: None
- 8.3 Biological Oxygen Demand (BOD): None
- 8.4 Feed Chain Concentration Potential: None

13 PHYSICAL AND CHEMICAL PROPERTIES

- 13.1 Physical State at 15°C and 1 atm: Gas
- 13.2 Molecular Weight: 16.04
- 13.3 Boiling Point at 1 atm: -162.0°C (-260°F)
- 13.4 Freezing Point: -182.5°C (-266.5°F)
- 13.5 Critical Temperature: -130.6°C (-193.1°F)
- 13.6 Critical Pressure: 45.8 atm (4.64 MPa)
- 13.7 Specific Gravity: 0.423 at 15°C (liquid)
- 13.8 Liquid Surface Tension: 14.6 dynes/cm (0.014 N/m) at 15°C
- 13.9 Liquid-Water Interfacial Tension: 19.7 dynes/cm (0.0197 N/m) at 15°C
- 13.10 Vapor (Gas) Specific Gravity: 0.554
- 13.11 Ratio of Specific Heats of Vapor (Gas): 1.31
- 13.12 Latent Heat of Vaporization: 510.4 Btu/lb (-1.15 kcal/g) at 15°C
- 13.13 Heat of Combustion: -12.557 Btu/lb (-2.91 kcal/g) at 15°C
- 13.14 Heat of Decomposition: Not pertinent
- 13.15 Heat of Solution: Not pertinent
- 13.16 Heat of Polymerization: Not pertinent

NOTES

REVISED 1978

MSA

METHANEARSONIC ACID, SODIUM SALTS

Common Synonyms: Dimethyl arsenate Monomethyl methanearsonate MSMA DSMA	Solid, or water solution (colours solid solution may be red or green) Odorous Solid may float or sink in water; solid and solution mix with water
Physical Properties: Molecular Weight: 146.04 (MSMA) Molecular Weight: 162.04 (DSMA) Density: 1.45 (MSMA) Density: 1.45 (DSMA)	Fire: Not flammable POISONOUS GASES ARE PRODUCED WHEN HEATED
Exposure: SOLID OR SOLUTION Irritating to skin and eyes. If swallowed, and cause nausea, vomiting, or loss of consciousness. Harmful if absorbed through the skin. Fumes irritate the respiratory tract. If INHALED, some irritation of the nose, throat and lungs may occur. If SWALLOWED, some irritation of the mouth and throat may occur. If SKIN CONTACT, some irritation may occur. If EYE CONTACT, some irritation may occur.	Water Pollution: Dangerous to aquatic life at high concentrations. May be dangerous if it enters water intakes. Not a health hazard to humans. Not a health hazard to animals.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446.4) Issue warning: poison, water contamination. Should be removed. Chemical and physical treatment.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Dimethyl methanearsonate Dimethyl methyl arsenate DSMA Monomethyl methanearsonate Monomethyl methyl arsenate MSMA 3.2 Coast Guard Compatibility Classification: Not applicable	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid or water solution 4.2 Color: Colorless; solutions may contain red or green dyes 4.3 Odor: None
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Protective clothing to prevent contact with skin chemical agents. 5.2 Symptoms Following Exposure: Nausea, vomiting, diarrhoea, salivary taste, burning in throat and stomach, and muscular pain. Acute toxicity indicated by headache, vomiting, stupor, convulsions, paralysis. About 1 ounce to 1 pound must be taken to cause these symptoms. 5.3 Treatment for Exposure: INGESTION: cause vomiting, give water and repeat, give a saline cathartic such as sodium sulfate. SKIN: wash with soap and water. EYES: wash with water, consult physician if irritation remains. 5.4 Toxicity by Inhalation (Threshold Limit Value): Not pertinent 5.5 Short-Term Inhalation Limit: Not pertinent 5.6 Toxicity by Ingestion: Grade 2 (LD₅₀ 1.5 g/kg rats) 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristic: None 5.9 Liquid or Solid Irritant Characteristic: Repeated contact may cause skin irritation. 5.10 Odor Threshold: Not pertinent	

6. FIRE HAZARDS 6.1 Flash Point: Not flammable 6.2 Flammable Limits in Air: Not flammable 6.3 Fire Extinguishing Agents: Not pertinent 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent 6.5 Special Hazards of Combustion Products: Toxic gases may be generated in fires. 6.6 Behavior in Fire: Not pertinent 6.7 Ignition Temperature: Not flammable 6.8 Electrical Hazard: Not pertinent 6.9 Burning Rate: Not flammable	8. WATER POLLUTION 8.1 Aquatic Toxicity: >1000 ppm 48 hr bluegill or fish LC₅₀ fresh water 8.2 Waterford Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): Data not available 8.4 Food Chain Concentration Potential: Data not available
7. MOC

METHOXYCHLOR

Common Synonyms 2,2-Di-(p-aminyl)-1,1,1-trichloroethane DMDT Methoxy DDT 2,2-Bis-(p-methoxyphenyl)-1,1,1-trichloroethane		Solid	White to light yellow	Mild fruity odor
AVOID CONTACT WITH SOLID AND DUST. KEEP PEOPLE AWAY. Wear goggles and dust respirator. Call fire department. Stay upwind. Use water spray to knock down dust. Isolate and remove discharged material. Notify local health and pollution control agencies.				
Fire	Combustible POISONOUS GASES MAY BE PRODUCED IN FIRE Extinguish with water, dry chemicals, foam, or carbon dioxide.			
	CALL FOR MEDICAL AID DUST POISONOUS IF INHALED Move victim to fresh air. If in eyes, hold eyelids open and flush with plenty of water. If breathing is difficult, give oxygen. SOLID POISONOUS IF SWALLOWED Irritating to skin and eyes. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. If in eyes, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk.			
Exposure				
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.			
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: poison water contaminant. Restrict access. Should be removed. Chemical and physical treatment.		2. LABELS No hazard label required by Code of Federal Regulations.		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: 2,2-Bis-(p-methoxyphenyl)-1,1,1-trichloroethane, 2,2-Di-(p-aminyl)-1,1,1-trichloroethane, DMDT, Marlate 50, Methoxy DDT. 3.2 Coast Guard Compatibility Classification: Not applicable. 3.3 Chemical Formula: C ₁₄ H ₁₁ Cl ₃ O ₂ . 3.4 IMCO/United Nations Numerical Designation: 611615.		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid. 4.2 Color: Light cream, white to light yellow. 4.3 Odor: Slightly fruity.		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Dust respirator if needed, gloves and goggles. 5.2 Symptoms Following Exposure: Toxicity is relatively low. Inhalation or ingestion causes generalized depression. 5.3 Treatment for Exposure: IF YES: flush with water if irritated. SKIN: wash well with soap and water. INGESTION: consult physician. 5.4 Toxicity by Inhalation (Threshold Limit Value): 10 mg/m ³ . 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade I, LD ₅₀ 5 to 15 g/kg. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Not pertinent.				
6. FIRE HAZARDS 6.1 Flash Point: Burns only at high temperatures. For liquid forms, see Kerosene. 6.2 Flammable Limits in Air: Not pertinent. 6.3 Fire Extinguishing Agents: Water, foam, dry chemical, carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Irritating and toxic hydrogen chloride gas may be formed in fire. 6.6 Behavior in Fire: Not pertinent. 6.7 Ignition Temperature: Not pertinent. 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: Not pertinent.				
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: No reaction. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.				
8. WATER POLLUTION 8.1 Aquatic Toxicity: 0.035 ppm/96 hr/fathead/11 m/fresh water; 0.04-0.12 ppm/96 hr/marine crustacea/11 m/salt water. 8.2 Waterfowl Toxicity: LD ₅₀ = 2,000 mg/kg. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: Data not available.				
9. SELECTED MANUFACTURERS 1. Ansol Co. 1 Stanton Street Marinette, Wis. 54143. 2. Chemical Formulators, Inc. P.O. Box 26 Nitro, W. Va. 25143. 3. I. I. duPont de Nemours & Co. Biochemicals Department 308 East Lancaster Ave. Wynnewood, Pa. 19096.				
10. SHIPPING INFORMATION 10.1 Grades or Purity: Technical flake or chip 88% plus 12% isomers, Wettable powders 50-75% Dust concn rate 40% Emulsifiable concentrate (liquid) 25% solution in petroleum distillate. 10.2 Storage Temperature: Ambient. 10.3 Inert Atmosphere: No requirement. 10.4 Venting: Open.				
11. HAZARD ASSESSMENT CODE (See Hazard Assessment Handbook, CG 446-3) II				
12. HAZARD CLASSIFICATIONS 12.1 Code of Federal Regulations: Not listed. 12.2 HAS Hazard Rating for Bulk Water Transportation: Not listed. 12.3 NFPA Hazard Classifications: Not listed.				
13. PHYSICAL AND CHEMICAL PROPERTIES 13.1 Physical State at 15°C and 1 atm: Solid. 13.2 Molecular Weight: 345.7. 13.3 Boiling Point at 1 atm: Not pertinent (decomposes). 13.4 Freezing Point: 171-192°F = 77-89°C = 350-362°K. 13.5 Critical Temperature: Not pertinent. 13.6 Critical Pressure: Not pertinent. 13.7 Specific Gravity: 1.41 at 25°C (solid). 13.8 Liquid Surface Tension: Not pertinent. 13.9 Liquid-Water Interfacial Tension: Not pertinent. 13.10 Vapor (Gas) Specific Gravity: Not pertinent. 13.11 Ratio of Specific Heats of Vapor (Gas): Not pertinent. 13.12 Latent Heat of Vaporization: Not pertinent. 13.13 Heat of Combustion: Not pertinent. 13.14 Heat of Decomposition: Not pertinent. 13.15 Heat of Solution: Not pertinent. 13.16 Heat of Polymerization: Not pertinent.				
NOTES (Continued on pages 5 and 6.)				

MTT

METHYL ACETATE

Common Synonyms Acetic acid, methyl ester		Liquid	Colorless	Mild sweet odor
		Mixes with water. Flammable, irritating vapor is produced.		
Shut off all ignition sources, all fire, keep smothered. Stop discharge if possible. Keep people away. May irritate eyes, water spray (if used) may irritate vapor. Be sure to remove fuel from fire area. Notify local health and pollution control agency.				
Fire		FLAMMABLE Containers may explode in fire. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Extinguish with dry chemicals or foam. Do not use water. Water may become acidic in fire. Do not use containers with water.		
Exposure		Call for medical aid. VAPOR: Irritating to eyes, nose and throat. If inhaled will cause headache, or dizziness. Move victim to fresh air. If breathing has stopped, give artificial respiration. If breathing is shallow, give oxygen. LIQUID: Irritating to skin and eyes. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES: Hold eyelids open and flush with plenty of water. IF SWALLOWED: Do not induce vomiting. Have victim drink water. Do not drink.		
Water Pollution		Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify proper authorities if it enters water intake.		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning - high flammability. Restrict access. Disperse and flush.		2. LABEL 		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Acetic acid, methyl ester 3.2 Coast Guard Compatibility Classification: Esters (13) 3.3 Chemical Formula: $\text{CH}_3\text{COOCH}_3$ 3.4 IMCO/United Nations Numerical Designation: 12/1211		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Slightly acid, sweet, fragrant		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Air mask or organic canister mask, goggles or face shield. 5.2 Symptoms Following Exposure: (Very similar to those of methyl alcohol, which constitutes 20% of commercial grade.) Inhalation causes headache, fatigue, and drowsiness; high concentrations can produce central nervous system depression and optic nerve damage. Liquid irritates eyes and may cause defatting and cracking of skin. Ingestion causes headache, dizziness, drowsiness, fatigue, may cause severe eye damage. 5.3 Treatment for Exposure: INHALATION: remove victim from affected area. If breathing has ceased, apply artificial respiration, call doctor. EYES: irrigate thoroughly with water for 15 min and call doctor. SKIN: wash affected area with water. INGESTION: get medical attention for methyl alcohol poisoning. 5.4 Toxicity by Inhalation (Threshold Limit Value): 200 ppm 5.5 Short-Term Inhalation Limits: 400 ppm for 5 min 5.6 Toxicity by Ingestion: Grade 2 oral LD ₅₀ = 3,700 mg/kg (rabbit) 5.7 Late Toxicity: Optic nerve may be damaged following overexposure to vapor or liquid. 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause moderate irritation such that personnel will find high concentrations unpleasant. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: No appreciable hazard. Practically harmless to the skin. 5.10 Odor Threshold: Data not available.				

6 FIRE HAZARDS		8 WATER POLLUTION	
6.1	Flash Point: 22°F (0°C) 14°C (57°F)	8.1	Aquatic Toxicity: Data not available
6.2	Flammable Limits in Air: 3.1% - 16%	8.2	Waterway Toxicity: Data not available

NOTES			

Common Synonyms		Liquefied compressed gas	Colorless	Garlic-like odor
		*Boils and boils on water. Flammable visible vapor cloud is produced.		
Shut off ignition sources. Call fire department. Avoid contact with liquid. Keep people away. Stop discharge if possible. Evacuate area if you can't handle discharge. Notify local health and pollution control agencies.				
Fire	FLAMMABLE Containers may explode in fire. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Let fire burn. Stop flow of gas if possible. Control exposed containers and protect from reaction, shut off with water.			
Exposure	Call for medical aid. VAPOR If inhaled will cause difficult breathing. Move victim to fresh air. If breathing is difficult, give oxygen. LIQUID Will cause frostbite. Flush affected areas with plenty of water. DO NOT RUB AFFECTED AREAS.			
Water Pollution	Not harmful to aquatic life.			
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: high flammability. Restrict access. Evacuate area.		2. LABEL 		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Allene, methylacetylene mixture, MAPP gas, methylacetylene allene mixture, Propadiene, methylacetylene mixture. 3.2 Coast Guard Compatibility Classification: Olefin. 3.3 Chemical Formula: $\text{CH}_3\text{C}\equiv\text{CH} + \text{CH}_2=\text{C}=\text{CH}_2$ 3.4 IMCO/United Nations Numerical Designation: 21060		4. OBSERVABLE CHARACTERISTICS 4. Physical State (as shipped): Liquefied compressed gas. 4.2 Color: Colorless. 4.3 Odor: Often says like acetylene.		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Self-contained breathing apparatus for high concentrations, safety goggles, protective gloves. 5.2 Symptoms Following Exposure: Simple asphyxiant. Toxicology of propadiene component not fully established. Contact with liquid may burn eyes and cause frostbite of skin. 5.3 Treatment for Exposure: INHALATION: remove victim to fresh air, give artificial respiration if necessary. EYES or SKIN: treat burns caused by cold liquid. 5.4 Toxicity by Inhalation (Threshold Limit Value): 1000 ppm. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Not pertinent. 5.7 Late Toxicity: Lung irritation in rats and dogs. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: 100 ppm.				

6 FIRE HAZARDS 6.1 Flash Point: Not pertinent (flammable liquefied compressed gas) 6.2 Flammable Limits in Air: 3.4 - 11% 6.3 Fire Extinguishing Agents: Let fire burn shut off gas supply, cool adjacent exposures 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent 6.5 Special Hazards of Combustion Products: Not pertinent 6.6 Behavior in Fire: Containers may explode 6.7 Ignition Temperature: 850°F 6.8 Electrical Hazard: Data not available 6.9 Burning Rate: Not pertinent	8 WATER POLLUTION 8.1 Aquatic Toxicity: Data not available 8.2 Waterfowl Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): None 8.4 Food Chain Concentration Potential: None
7 CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction 7.2 Reactivity with Common Materials: No reaction, except forms explosive compounds in contact with alloys containing more than 67% copper at high pressures 7.3 Stability During Transport: Stable 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent 7.5 Polymerization: Not pertinent 7.6 Inhibitor of Polymerization: Not pertinent	9 SELECTED MANUFACTURERS 1. Dow Chemical Co. Midland, Mich. 48640 2. MAPP Products 100 Mountain Avenue New Providence, N.J. 07974
11. HAZARD ASSESSMENT CODE (See Hazard Assessment Handbook, CG 446-3) A-B-C-D-E-F-G	10. SHIPPING INFORMATION 10.1 Grades or Purity: Commercial 65% of a mixture of methylacetylene (85%) and propadiene (15%) plus 35% of a mixture of C ₂ and C ₄ saturated and unsaturated hydrocarbons 10.2 Storage Temperature: Ambient but less than 125°F 10.3 Inert Atmosphere: No requirement 10.4 Venting: Safety relief

NOTES

MAL

METHYL ALCOHOL

Common Synonyms Methanol Wood alcohol Wood naphtha Wood spirit Pyrolytic spirit	Watery liquid Colorless Alcohol odor Floats and mixes with water. Flammable, irritating vapor is produced.
No discharge or smoke. Keep people away. Shut off liquid leaks and spill in department. Stop up and use water spray if fire. Avoid fire. Vapor. Avoid contact with irritated vapor. Isolate and remove to large outdoors. Notify local health and pollution control agencies.	
Fire	FLAMMABLE: Vapor may explode if ignited in an enclosed area. Flashback along vapor trail may occur. Extinguish with dry chemical, alcohol foam, carbon dioxide. Water may be ineffective on fire. Confined spaces: Containers with water.
 Exposure	CAUTION - IRRITANT VAPOR Irritating to eyes, nose and throat. If inhaled, will cause dizziness, headache, difficult breathing or loss of consciousness. Move to fresh air. Breathing has stopped: Give artificial respiration. If breathing is difficult: Give oxygen. LIQUID POISONOUS IF SWALLOWED Irritating to skin and eyes. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES: Hold eyelids open and flush with plenty of water. IF SWALLOWED: Do not induce vomiting. GIVE NOTHING TO DRINK. Water if no nausea and have victim lie on his side to prevent aspiration. IF SWALLOWED: Do not induce vomiting. GIVE NOTHING TO DRINK. Water if no nausea and have victim lie on his side to prevent aspiration.
Water Pollution	Dangerous to aquatic life in high concentrations. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify appropriate agencies as required.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning - high flammability Restrict access Evacuate area Disperse and flush	2. LABEL 
3. CHEMICAL DESIGNATIONS 31 Synonyms: Colonial spirit, Wood alcohol, Columbian sp., Wood naphtha, Methanol, Wood spirit 32 Coast Guard Compatibility Classification: Alcohol 33 Chemical Formula: CH ₃ OH 34 IMCO/United Nations Numerical Designation: 3.2/12.30	4. OBSERVABLE CHARACTERISTICS 41 Physical State (as shipped): Liquid 42 Color: Colorless 43 Odor: Faint alcohol, like ethyl alcohol, faintly sweet, characteristic pungent
5. HEALTH HAZARDS 51 Personal Protective Equipment: Approved canister mask for high vapor concentrations, safety goggles, rubber gloves. 52 Symptoms Following Exposure: Exposure to excessive vapor causes eye irritation, headache, fatigue and drowsiness. High concentrations can produce central nervous system depression and optic nerve damage. 50,000 ppm will probably cause death in 1 to 2 hrs. Can be absorbed through skin. Swallowing may cause death or eye damage. 53 Treatment for Exposure: Remove victim from exposure and apply artificial respiration if breathing has ceased. INGESTION: induce vomiting, then give 2 teaspoons of baking soda in glass of water, call a physician. SKIN OR EYES: flush with water for 15 min. 54 Toxicity by Inhalation (Threshold Limit Value): 200 ppm 55 Short-Term Inhalation Limits: 260 mg/m ³ for 60 min 56 Toxicity by Ingestion: Grade 1, 5 to 15 g/kg (rat) 57 Low Toxicity: None 58 Vapor (Gas) Irritant Characteristics: Vapors cause a slight smarting of the eyes or respiratory system if present in high concentrations. The effect is temporary. 59 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain, may cause smarting and reddening of the skin. 510 Odor Threshold: 100 ppm	

6. FIRE HAZARDS

- 51 **Flash Point:** 54°F (C) 61°F (C)
 52 **Flammable Limits in Air:** 6.0% - 36.5%
 53 **Fire Extinguishing Agents:** Alcohol foam, dry chemical, or carbon dioxide.
 54 **Fire Extinguishing Agents Not to be Used:** Water may be ineffective.
 55 **Special Hazards of Combustion Products:** Not pertinent.
 56 **Behavior in Fire:** Containers may explode.
 57 **Ignition Temperature:** 867°F
 58 **Electrical Hazard:** Class I, Group D.
 59 **Burning Rate:** 1.7 mm/min

8. WATER POLLUTION

- 81 **Aquatic Toxicity:** 240 ppm/11 hr/goldfish/died/fresh water.
 82 **Waterfowl Toxicity:** Data not available.
 83 **Biological Oxygen Demand (BOD):** 0.6 to 1.12 lb/lb in 5 days.
 84 **Food Chain Concentration Potential:** None.

9. SELECTED MANUFACTURERS

- 1 Borden Inc.
 Borden Chemical Division
 Gretna, Pa. 15034
 2 Celanese Corp.
 Celanese Chemical Co. Division

 3 E. I. du Pont de Nemours & Co., Inc.
 Industrial and Biochemical Dept.
 Wilmington, Del. 19898

10. SHIPPING INFORMATION

- 101 **Grade or Purity:** C.P. Crude ACS, all 99.9%
 102 **Storage Temperature:** Ambient
 103 **Inert Atmosphere:** No requirement
 104 **Venting:** Open (flame arrester) or pressure/vacuum

11. HAZARD ASSESSMENT CODE

(See Hazard Assessment Handbook, CG 446-3)
 A P Q K S

13. PHYSICAL AND CHEMICAL PROPERTIES

- 131 **Physical State at 15°C and 1 atm:** Liquid
 132 **Molecular Weight:** 32.04
 133 **Boiling Point at 1 atm:** 148.1°F = 64.5°C = 337.7°K
 134 **Freezing Point:** -144.0°F = -97.8°C = 175.4°K
 135 **Critical Temperature:** 464°F = 240°C = 513°K
 136 **Critical Pressure:** 1142.0 psia = 77.7 atm = 7.87 MN/m²
 137 **Specific Gravity:** 0.792 at 20°C (liquid)
 138 **Liquid Surface Tension:** Not pertinent
 139 **Liquid-Water Interfacial Tension:** Not pertinent
 1310 **Vapor (Gas) Specific Gravity:** 1.1
 1311 **Ratio of Specific Heats of Vapor (Gas):** 1.254
 1312 **Latent Heat of Vaporization:** 473.0 Btu/lb = 262.5 cal/g = 11.00 × 10³ J/kg
 1313 **Heat of Combustion:** -8419 Btu/lb = -4677 cal/g = -195.8 × 10³ J/kg
 1314 **Heat of Decomposition:** Not pertinent
 1315 **Heat of Solution:** (gas) -9 Btu/lb = -5 cal/g = -0.2 × 10³ J/kg
 1316 **Heat of Polymerization:** Not pertinent

12. HAZARD CLASSIFICATIONS

NOTES

(Continued on pages 5 and 6)

MTA

METHYLAMINE

Common Synonyms Aminomethane Monomethylamine Mercaptan	Liquefied compressed gas Colorless Ammonia-like odor Mixes with water and boils
See Health Hazards section for first aid instructions. See Physical Properties section for physical data. See Environmental section for environmental data.	
Fire	FLAMMABLE POISONOUS GASES MAY BE PRODUCED IN FIRE Containers may explode in fire. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Wear goggles and self-contained breathing apparatus. Extinguish with dry chemical, carbon dioxide, or alcohol foam. Do not use water.
Exposure	VAPOR Irritating to eyes, nose and throat. If inhaled will cause coughing or difficult breathing. May be asphyxiant if inhaled in high concentrations. If breathing has stopped, administer artificial respiration. If breathing is difficult, use oxygen. LIQUID Will burn skin and eyes. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. If in eyes, hold eyelids open and flush with plenty of water. If swallowed, do not induce vomiting. Give plenty of water to drink. DO NOT INHALE COMBUSTION PRODUCTS
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes. Notify water quality and water control agencies. Notify local authorities of any water releases.
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning - high flammability, air contaminant, water contaminant. Restrict access. Evacuate area. Disperse and flush.	2. LABEL 
3 CHEMICAL DESIGNATIONS 31 Synonyms: Aminomethane, Mercaptan, Monomethylamine, anhydrous. 32 Coast Guard Compatibility Classification: Amines (4). 33 Chemical Formula: CH ₃ NH ₂ . 34 IMCO/United Nations Numerical Designation: Anhydrous 2.1061. Aqueous soln. 3.1.1235.	4 OBSERVABLE CHARACTERISTICS 41 Physical State (as shipped): Liquefied compressed gas. 42 Color: Colorless. 43 Odor: Like ammonia; pungent, fishy, suffocating.
5 HEALTH HAZARDS 51 Personal Protective Equipment: Goggles or face mask, rubber suit, apron, sleeves and/or gloves, rubber or leather safety shoes, air line mask, positive pressure hose mask, self-contained breathing apparatus, or industrial canister type gas mask. 52 Symptoms Following Exposure: Inhalation causes irritation of nose and throat, followed by violent sneezing, burning sensation in throat, coughing, constriction of larynx and difficulty in breathing, pulmonary congestion, edema of the lungs, and conjunctivitis. Contact with liquid burns skin and eyes. (Severe exposure may cause blindness.) Vapors may cause dermatitis. Ingestion causes burning of the mouth, throat, and esophagus. 53 Treatment for Exposure: Get medical attention for anyone who is or may be injured by exposure to this compound. INHALATION: remove victim to fresh air at once, apply artificial respiration if breathing has stopped, administer oxygen. EYES: flush with water for at least 15 min. flush with water if skin is burned; do not use ointments or cover for 24 hours. INGESTION: do NOT induce vomiting; give large amount of water. 54 Toxicity by Inhalation (Threshold Limit Value): 10 ppm. 55 Short-Term Inhalation Limits: Data not available. 56 Toxicity by Ingestion: Grade 2.1.D.0.5 to 5 g/kg. 57 Late Toxicity: Data not available. 58 Vapor (Gas) Irritant Characteristics: Vapors are moderately irritating, such that personnel will not usually tolerate moderate or high concentrations.	

Continued on page 4.

6 FIRE HAZARDS 61 Flash Point: Not pertinent (flammable liquefied compressed gas). 62 Flammable Limits in Air: 4.3 - 21. 63 Fire Extinguishing Agents: Let gas fire burn; stop flow of gas. If extinguish solution fires with dry chemical, alcohol foam, or carbon dioxide. 64 Fire Extinguishing Agent: 1 to be Used. Not pertinent. 65 Special Hazards of Combustion Products: Toxic nitrogen oxides may be formed. 66 Behavior in Fire: Vapors are heavier than air and may travel considerable distance to a source of ignition and flash back. 67 Ignition Temperature: 506 °F. 68 Electrical Hazard: Data not available. 69 Burning Rate: Not pertinent.	8 WATER POLLUTION 81 Aquatic Toxicity: > 10 and < 30 ppm 24 hr. creek chub TL. 82 Waterfowl Toxicity: Data not available. 83 Biological Oxygen Demand (BOD): 6.8% of theoretical in 14 days. 84 Food Chain Concentration Potential: None.																																				
7 CHEMICAL REACTIVITY 71 Reactivity with Water: Dissolves completely. 72 Reactivity with Common Materials: Corrosive to copper, copper alloys, zinc, alloys, aluminum, and galvanized surfaces. 73 Stability During Transport: Stable. 74 Neutralizing Agents for Acids and Caustics: Not pertinent. 75 Polymerization: Not pertinent. 76 Inhibitor of Polymerization: Not pertinent.	9 SELECTED MANUFACTURERS 1. Commercial Solvents Corporation, Terre Haute, Ind. 47766. 2. E. I. du Pont de Nemours & Co., Inc., Biochemicals Department, 1097 Market Street, Wilmington, Del. 19895. 3. Matheson Gas Products Co., East Rutherford, N. J. 07073.																																				
11. HAZARD ASSESSMENT CODE (See HAZOP Assessment Handbook, CG 446-3) ABC-K-M-N	10 SHIPPING INFORMATION 101 Grade or Purity: Anhydrous 99.9+. Water solutions 40 - 50% by weight. 102 Storage Temperature: Ambient. 103 Inert Atmosphere: No requirements. 104 Venting: Safety relief.

REVISED 1978

MAA

METHYL AMYL ALCOHOL

Common Synonyms Isobutylmethylcarbinol 4-Methyl-2-pentanol Methylisobutylcarbinol	Only liquid Colorless Mild alcohol odor Floats on water. Irritating vapor is produced.
May dislodge if poured. Keep away from fire department. Avoid contact with liquid and vapor. In water and in non-flammable material. Not a flammable liquid and not a flammable gas.	
Fire	Combustible Extinguish with dry chemical, water, foam, or alcohol-resistant foam. Do not use water spray.
Exposure	CALL FOR MEDICAL AID VAPOR Irritating to eyes, nose and throat. If inhaled, will cause dizziness or difficult breathing. Harmful if skin is exposed. May cause skin irritation. If breathing gas is present, get out of breathing zone. If necessary, use self-contained breathing apparatus. LIQUID Irritating to skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Wash affected areas with plenty of water. If IN EYES, hold eyelids open and flush with plenty of water. If SWALLOWED, do not induce vomiting. Do not take any food or drink. Drink milk.
Water Pollution	Effect of low concentrations on aquatic life is unknown. Tending to bioaccumulate. May be dangerous if it enters water intakes. Not a major source of pollution. Not a threat to the aquatic environment.
1. RESPONSE TO DISCHARGE See Response Methods Handbook, CG 446-4. Mechanical containment. Chemical and physical treatment.	2. LABELS No hazard label required by Code of Federal Regulations.
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Isobutylmethylcarbinol, Isobutylmethylmethanol, MAOH, Methylisobutylcarbinol, 4-Methyl-2-pentanol, MIC. 3.2 Coast Guard Compatibility Classification: Alcohol. 3.3 Chemical Formula: $(CH_3)_2CHCH_2CH_2CH_3$. 3.4 IMCO United Nations Numerical Designation: 3.1, 2053.	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Colorless. 4.3 Odor: Sharp, mild and non-pungent.
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Air pack or organic canister mask, rubber gloves, goggles, or face shield. 5.2 Symptoms Following Exposure: Vapors irritate eyes and nose. May cause anesthesia. Prolonged contact with liquid causes irritation and cracking of skin and irritates eyes. 5.3 Treatment for Exposure: INHALATION: remove victim to fresh air; give artificial respiration if needed; call a doctor. SKIN: flush with water. EYES: flush with water for at least 15 min.; consult a doctor. 5.4 Toxicity by Inhalation (Threshold Limit Value): 25 ppm. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 2.0 to 5.0 g/kg rat. 5.7 Late Toxicity: None. 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause moderate irritation such that personnel will find high concentrations unpleasant. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain, may cause smarting and reddening of the skin. 5.10 Odor Threshold: Data not available.	

6. FIRE HAZARDS 6.1 Flash Point: 120-130°F (44-55°C). 6.2 Flammable Limits in Air: 1.0% - 5.5%. 6.3 Fire Extinguishing Agents: Alcohol foam, dry chemical, or carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Not pertinent. 6.6 Behavior in Fire: Not pertinent. 6.7 Ignition Temperature: 553°F (284°C). 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: 4.7 mm/min.	8. MAN

N-METHYLANILINE

Common Synonyms: Anilinebase (base) N-Methylaminobenzene Methyl aniline (monomer) Methylphenylamine		Liquid Yellow to light brown Chemical Odor May float or sink in water
Avoid contact with liquid. Keep people away. Stop discharge if possible. Call fire department. Isolate and remove discharged material. Notify local health and pollution control agencies.		
Fire	Combustible POISONOUS GASES MAY BE PRODUCED IN FIRE. Wear goggles and self-contained breathing apparatus. Extinguish with dry chemical, foam or carbon dioxide. Water may be ineffective on fire. Use exposed containers with water.	
Exposure	CALL FOR MEDICAL AID LIQUID Irritating to skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES: hold eyelids open and flush with plenty of water. IF SWALLOWED: and victim is CONSCIOUS: Have victim drink water or milk. IF NOT ALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS: do nothing except keep victim warm.	
Water Pollution	Effect of low concentrations on aquatic life is unknown. Floating to shoreline. May be dangerous if it enters water intakes. Notify local health and wildlife agencies. Operations of nearby water intakes.	
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4.) Issue warning: poison water contaminant. Restrict access. Mechanical containment. Should be removed. Chemical and physical treatment.		2. LABELS No hazard label required by Code of Federal Regulations.
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Aniline-methane N-Methylaminobenzene Methylaniline (monomer), Methylphenylamine 3.2 Coast Guard Compatibility Classification: Not listed. 3.3 Chemical Formula: C ₆ H ₇ NCH ₃ 3.4 IMCO/United Nations Numerical Designation: Not listed.		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Yellow to light brown 4.3 Odor: Moderate aniline type
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Approval respirator, rubber gloves, splash proof goggles. 5.2 Symptoms Following Exposure: Inhalation causes dizziness and headache. Ingestion causes black discoloration (cyanosis) of lips, ear lobes and internal beds. Liquid irritates eyes. Absorption through skin produces same symptoms as ingestion. 5.3 Treatment for Exposure: INHALATION: remove victim to fresh air and call a physician at once. Administer oxygen until physician arrives. INGESTION: give large amount of water; get medical attention at once. EYES OR SKIN: flush with plenty of water for at least 15 min. if cyanosis is present; shower with soap and warm water with special attention to scalp and finger nails; remove any contaminated clothing. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Data not available. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.		

6. FIRE HAZARDS 6.1 Flash Point: 177°F (80°C) 6.2 Flammable Limits in Air: Data not available. 6.3 Fire Extinguishing Agents: Dry chemical, foam, carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective. 6.5 Special Hazards of Combustion Products: Toxic vapors are generated when heated. 6.6 Behavior in Fire: 6.7 Ignition Temperature: Data not available. 6.8 Electrical Hazard: Data not available. 6.9 Burning Rate: 160 mm/min.		8. WATER POLLUTION 8.1 Aquatic Toxicity: Data not available. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: None.
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: May attack some forms of plastics. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.		9. SELECTED MANUFACTURERS 1. American Cyanamid Co. Bound Brook, N. J. 08805 2. Eastman Organic Chemicals Rochester, N. Y. 14650 3. Aldrich Chemical Co. 940 W. Saint Paul Ave. Milwaukee, Wis. 53233
11. HAZARD ASSESSMENT CODE (See Hazard Assessment Handbook, CG 446-5.) ALC-NY		10. SHIPPING INFORMATION 10.1 Grades or Purity: Technical. Pure 99+%. 10.2 Storage Temperature: Ambient. 10.3 Inert Atmosphere: No requirements. 10.4 Venting: Open.
12. HAZARD CLASSIFICATIONS 12.1 Code of Federal Regulations: Not listed. 12.2 NAS Hazard Rating for Bulk Water Transportation: Not listed. 12.3 MFPA Hazard Classifications: Not listed.		13. PHYSICAL AND CHEMICAL PROPERTIES 13.1 Physical State at 15°C and 1 atm: Liquid. 13.2 Molecular Weight: 107.2. 13.3 Boiling Point at 1 atm: 164°C (327°F) = 165.9°C = 329.1°F. 13.4 Freezing Point: -71°F = -57°C = 216°K. 13.5 Critical Temperature: 302°F = 150°C = 423°K. 13.6 Critical Pressure: 24.4 psia = 51.3 atm = 5.20 MN/m ² . 13.7 Specific Gravity: 0.959 at 20°C (liquid). 13.8 Liquid Surface Tension: 39.6 dynes/cm = 0.0396 N/m at 20°C. 13.9 Liquid-Water Interfacial Tension: Data not available. 13.10 Vapor (Gas) Specific Gravity: 3.70. 13.11 Ratio of Specific Heats of Vapor (Gas): Not pertinent. 13.12 Latent Heat of Vaporization: 140 Btu/lb = 100 cal/g = 4.20 × 10 ³ J/kg. 13.13 Heat of Combustion: -16,350 Btu/lb = -9,165 cal/g = -140.1 × 10 ³ J/kg. 13.14 Heat of Decomposition: Not pertinent. 13.15 Heat of Solution: Not pertinent. 13.16 Heat of Polymerization: Not pertinent.
(continued on page 5 and 6)		
NOTES		

MTB

METHYL BROMIDE

Common Synonyms: Bromomethane Embafume	Liquefied gas Colorless Odorless to sweet odor
Sinks and boils in water. Poisonous vapor cloud is formed. Boiling point is 199°F.	
COMBUSTIBLE POISONOUS AND IRRITATING GASES ARE PRODUCED IN FIRE	
Fire	COMBUSTIBLE POISONOUS AND IRRITATING GASES ARE PRODUCED IN FIRE
 Exposure	VAPOR POISONOUS IF INHALED Irritating to eyes. LIQUID Will burn skin and eyes. Harmful if swallowed.
Water Pollution	Not harmful to aquatic life. May be dangerous if it enters water intakes.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-3) Issue warning: poison Restrict access	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Bromomethane Embafume M-B-C Fumigant Monobromomethane 3.2 Coast Guard Competibility Classification: Halogenated hydrocarbon 3.3 Chemical Formula: CH ₃ Br 3.4 IMCO/United Nations Numerical Designation: 2.0/1062	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquefied gas 4.2 Color: Colorless 4.3 Odor: Relatively odorless, sweet, chloroform-like
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Self-contained breathing apparatus, goggles 5.2 Symptoms Following Exposure: Inhalation of vapor causes lung congestion and pulmonary edema. Higher concentrations cause rapid narcosis and death. Contact with liquid irritates eyes and burns skin. 5.3 Treatment for Exposure: INHALATION: remove victim to fresh air, give artificial respiration if needed. SKIN OR EYES: flush with water for at least 15 min. 5.4 Toxicity by Inhalation (Threshold Limit Value): 15 ppm 5.5 Short-Term Inhalation Limits: 20 ppm for 5 min 5.6 Toxicity by Ingestion: Data not available 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Vapor is moderately irritating such that personnel will not usually tolerate moderate or high vapor concentrations. 5.9 Liquid or Solid Irritant Characteristics: Fairly severe skin irritant; may cause pain and second-degree burns after a few minutes' contact. 5.10 Odor Threshold: Odorless	

6. FIRE HAZARDS 6.1 Flash Point: Practically not flammable 6.2 Flammable Limits in Air: 10% - 15% 6.3 Fire Extinguishing Agents: Not pertinent 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent 6.5 Special Hazards of Combustion Products: Toxic and irritating gases are generated when exposed to fire or heat. 6.6 Behavior in Fire: Containers may explode 6.7 Ignition Temperature: 999°F 6.8 Electrical Hazard: Not pertinent 6.9 Burning Rate: Not pertinent	8. REVISED 1978

MBK

METHYL n-BUTYL KETONE

Common Synonyms 2-Hexanone n-Butyl methyl ketone		Liquid	Clear	Disagreeable Odor
Floats and mixes with water				
Shuts off engine in vehicles that have an automatic choke. As a solvent, it dissolves many organic compounds. It is not a good solvent for water-soluble compounds. It is a good solvent for many organic compounds.				
Fire	FLAMMABLE Containers may explode in fire. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area.			
Exposure	ALL FOR MEDICAL USE VAPOR Irritating to eyes, nose and throat. Harmful if inhaled. LIQUID Irritating to skin and eyes. Harmful if swallowed. ENVIRONMENTAL May be harmful to aquatic life if released into water. May be harmful to birds if released into air.			
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes.			
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: air contaminant, water contaminant, high flammability. Restrict access. Mechanical containment should be removed. Chemical and physical treatment.		2. LABEL 		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: n-Butyl methyl ketone, 2-Hexanone. 3.2 Coast Guard Compatibility Classification: Not listed. 3.3 Chemical Formula: CH ₃ CH ₂ CH ₂ COCH ₃ . 3.4 HBCO/United Nations Numerical Designation: Not listed.		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Clear. 4.3 Odor: Characteristic, strong disagreeable odor resembling acetone.		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Protective gloves, goggles or face shield, approved respirator (for major spills). 5.2 Symptoms Following Exposure: Inhalation of high concentrations of vapor may result in narcosis; peripheral neuropathy may develop. Ingestion of large amounts may cause severe systemic injury. Contact with eyes causes mild to moderate irritation. Liquid irritates skin; prolonged or repeated contact may cause defatting of the skin with resultant dermatitis. 5.3 Treatment for Exposure: INHALATION: move to uncontaminated area; breathe fresh air; if necessary, alert physician to possible development of peripheral neuropathy. INGESTION: give large amount of water and induce vomiting. EYES: irrigate immediately and thoroughly with water for 15 min. and get medical attention. SKIN: flush exposed areas thoroughly with water. 5.4 Toxicity by Inhalation (Threshold Limit Value): 100 ppm. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 2 oral LD ₅₀ = 2,000 mg/kg (rats). 5.7 Late Toxicity: Peripheral neuropathy in experimental animals and man (degeneration of motor and/or sensory nerves). 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.				

6. FIRE HAZARDS 6.1 Flash Point: 33°F (0°C) (77°F (25°C)). 6.2 Flammable Limits in Air: 1.1% - 8.0%. 6.3 Fire Extinguishing Agents: Dry chemical, alcohol, foam, carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective. 6.5 Special Hazards of Combustion Products: 6.6 Behavior in Fire: 6.7 Ignition Temperature: 795°F. 6.8 Electrical Hazard: Data not available. 6.9 Burning Rate: 4.4 ft/min.	8. WATER POLLUTION 8.1 Aquatic Toxicity: Data not available. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: None.								
7. MTC

METHYL CHLORIDE

Common Synonyms: Chloromethane	Liquefied compressed gas. Colorless. Slightly sweet odor. Floats and boils on water. Flammable: visible vapor cloud is formed.
HAZARD PICTOGRAMS	FLAMMABLE POISONOUS GASES ARE PRODUCED IN FIRE Flashback along vapor trail may occur Vapor may explode if ignited in an enclosed area Inhalation of vapors may cause death or serious injury Vapor may irritate eyes, nose and throat Vapor may cause nausea, vomiting, headache, difficulty breathing, or loss of consciousness Symptoms may be delayed First Aid: Remove to fresh air. If inhaled, give artificial respiration if breathing is difficult. If on skin, wash with soap and water. If in eyes, flush with water for 15 minutes.
Fire	FLAMMABLE POISONOUS GASES ARE PRODUCED IN FIRE Flashback along vapor trail may occur Vapor may explode if ignited in an enclosed area Inhalation of vapors may cause death or serious injury Vapor may irritate eyes, nose and throat Vapor may cause nausea, vomiting, headache, difficulty breathing, or loss of consciousness Symptoms may be delayed First Aid: Remove to fresh air. If inhaled, give artificial respiration if breathing is difficult. If on skin, wash with soap and water. If in eyes, flush with water for 15 minutes.
Exposure	VAPOR Not irritating to eyes, nose or throat If inhaled, will cause nausea, vomiting, headache, difficulty breathing, or loss of consciousness Symptoms may be delayed First Aid: Remove to fresh air. If inhaled, give artificial respiration if breathing is difficult. If on skin, wash with soap and water. If in eyes, flush with water for 15 minutes. LIQUID Will cause frostbite First Aid: Wash with soap and water. If on face, wash with water. If in eyes, flush with water for 15 minutes.
Water Pollution	Not harmful to aquatic life
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning by flammability, air contaminant, restrict access, evacuate area	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Arin, Chloromethane 3.2 Coast Guard Compatibility Classification: Halogenated hydrocarbon 3.3 Chemical Formula: CH₃Cl 3.4 IMCO/United Nations Numerical Designation: 201063	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquefied gas 4.2 Color: Colorless 4.3 Odor: Faint, sweet, non irritating, fruit ether like
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Approved canister mask, leather or vinyl gloves, goggles or face shield 5.2 Symptoms Following Exposure: Inhalation causes nausea, vomiting, weakness, headache, emotional disturbances. High concentrations cause mental confusion, eye disturbances, muscular tremors, cyanosis, convulsions. Contact of liquid with skin may cause frostbite. 5.3 Treatment for Exposure: Remove to fresh air. Call a doctor and have patient hospitalized for observation of slowly developing symptoms. 5.4 Toxicity by Inhalation (Threshold Limit Value): 100 ppm. 5.5 Short-Term Inhalation Limit: 100 ppm for 5 min 5.6 Toxicity by Ingestion: Not pertinent 5.7 Late Toxicity: None 5.8 Vapor (Gas) Irritant Characteristics: Vapors are nonirritating to the eyes and throat 5.9 Liquid or Solid Irritant Characteristics: No appreciable hazard. Practically harmless to the skin because it evaporates quickly. May cause frostbite 5.10 Odor Threshold: Data not available	

6. FIRE HAZARDS

- 6.1 Flash Point: -122°F (-27°C)
- 6.2 Flammable Lim. in Air: 3.1% - 17.2%
- 6.3 Fire Extinguishing Agents: Dry chemical or carbon dioxide. Stop flow of gas.
- 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent
- 6.5 Special Hazards: Combustion Products: Toxic and irritating gases are generated in fires.
- 6.6 Behavior in Fire: Container may explode
- 6.7 Ignition Temperature: 1°C
- 6.8 Electrical Hazard: Not pertinent
- 6.9 Burning Rate: 2.2 mm/min

8. WATER POLLUTION

- 8.1 Aquatic Toxicity: None
- 8.2 Waterford Toxicity: None
- 8.3 Biological Oxygen Demand (BOD): None
- 8.4 Feed Chain Concentration Potential: None

NOTES

METHYL CHLOROFORMATE

Common Synonyms Chloroform acid methyl ester Methyl chloroformate	Liquid Sinks and reacts in water. Flammable, irritating vapor is produced.	Colorless to light yellow Unpleasant odor
Fire 	FLAMMABLE. POISONOUS GASES MAY BE PRODUCED IN FIRE. Containers may explode in fire. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Extinguish with water or alcohol. (Alcohol may be used on small fires.)	Exposure VAPOR Irritating to eyes, nose and throat. If inhaled will cause difficult breathing. May irritate the lungs. LIQUID POISONOUS IF SWALLOWED. Will burn skin and eyes. If swallowed, do not induce vomiting. If in eyes, flush with water. If on skin, wash with soap and water. If on clothing, remove clothing and wash skin.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Do not empty into sewer or drain.	
1. RESPONSE TO DISCHARGE See Response Summary, MSDS 001-001-001. Issue warning - extremely flammable. High flammability. Moderate toxicity. Irritant and flammable.		2. LABELS  
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Chloroform acid, methyl ester; chloroformic acid; methyl chloroformate. 3.2 Coast Guard Chemical Classification: Not applicable. 3.3 Chemical Formula: CH_3OCCl_2 3.4 IMCO/United Nations Numerical Designation: 1.2, 1.3.		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Colorless to light yellow. 4.3 Odor: Astringent.
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Avoid breathing vapor. Wear self-contained breathing apparatus, goggles or face shield, plastic gloves. 5.2 Symptoms Following Exposure: Inhalation of vapor irritates nose and throat and can cause delayed pulmonary edema. Liquid irritates eyes and causes severe skin burns. If swallowed, it remains. Ingestion causes burns to mouth and stomach. 5.3 Treatment for Exposure: INHALATION: Remove victim from exposure. If breathing stops, administer artificial respiration. Call physician. EYES: Irrigate with copious amounts of water for at least 15 min. Call physician if needed. SKIN: Flush with water for 15 min. Get medical attention for burns. INGESTION: Do not give large amounts of water. Do NOT induce vomiting. Get medical attention. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Toxic 4.0 (oral LD ₅₀) - 10 mg/kg. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.		

6. FIRE HAZARDS 6.1 Flash Point: 76°F (24°C) (10°C). 6.2 Flammable Limits in Air: 11% - 11%. 6.3 Fire Extinguishing Agents: Water, dry chemical, foam, carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Irritating and toxic byproducts, cyanide and phosgene may be formed. 6.6 Behavior in Fire: Vapor is heavier than air and will travel a considerable distance to a source of ignition and flammable. 6.7 Ignition Temperature: Data not available. 6.8 Electric Hazard: Data not available. 6.9 Burning Rate: 2.0 in/min.	8. WATER POLLUTION 8.1 Aquatic Toxicity: Data not available. 8.2 Waterway Toxicity: Data not available. 8.3 Ecological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: None.
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: Reacts slowly, causing but open chloride hydrochloric acid. Reaction can be hazardous if water is hot. 7.2 Reactivity with Common Materials: Corrosive. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Flush with water, rinse with sodium bicarbonate - same solution. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9. SELECTED MANUFACTURERS 1. Chemtron Corporation Chemical Group 363 Seventh Avenue New York, N.Y. 10001. 2. Air Products and Chemicals, Inc. Specialty Chemicals Department P.O. Box 513 Allentown, Pa. 18105. 3. Aldrich Chemical Co. 940 West 81st Avenue Milwaukee, Wis. 53233.
10. SHIPPING INFORMATION 10.1 Grades or Purity: 97+%. 10.2 Storage Temperature: Ambient. 10.3 Inert Atmosphere: No requirement. 10.4 Venting: Pressure vacuum.	
11. HAZARD ASSESSMENT CODE See Hazard Assessment Code, 10-001-001. 1.43 N 1.	13. PHYSICAL AND CHEMICAL PROPERTIES 13.1 Physical State at 15°C and 1 atm: Liquid. 13.2 Molecular Weight: 97.4. 13.3 Boiling Point at 1 atm: 100°F = 37.8°C = 311°K. 13.4 Freezing Point: -10.2°F = -23.6°C = 249°K. 13.5 Critical Temperature: Not pertinent. 13.6 Critical Pressure: Not pertinent. 13.7 Specific Gravity: 1.22 at 20°C (liquid). 13.8 Liquid Surface Tension: 26 dynes/cm = 0.026 N/m at 20°C. 13.9 Liquid-Water Interfacial Tension: Not pertinent. 13.10 Vapor (Gas) Specific Gravity: 1.25. 13.11 Rate of Specific Heats of Vapor (Gas): 11544. 13.12 Latent Heat of Vaporization: 104.1 Btu/lb = 30.5 kJ/kg at 100°F = 37.8°C. 13.13 Heat of Combustion: 4.000 Btu/lb = 11.63 kJ/kg. 13.14 Heat of Decomposition: Not pertinent. 13.15 Heat of Solution: Data not available. 13.16 Heat of Polymerization: Not pertinent.
NOTES (continued on page 1 and 2)	

MCT

METHYLCYCLOPENTADIENYLMANGANESE TRICARBONYL

Common Synonyms Combustion Improver C-12	Liquid Sinks in water	Yellow to dark orange Faint pleasant odor
AVOID CONTACT WITH LIQUID. KEEP PEOPLE AWAY. Wear rubber gloves, thick clothing, goggles. No food, no drink, no smoking. Wash and remove contaminated material. No fire, no sparks, no open flames, no smoking.		
Fire	Combustible POISONOUS GASES ARE PRODUCED IN FIRE. When exposed and vented, use fire-fighting apparatus. Extinguish with water or chemical foam or carbon dioxide.	
 <u>Exposure</u>	CALL FOR MEDICAL AID LIQUID POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED If swallowed will cause loss of consciousness. Keep victim calm, do not induce vomiting. If on skin, flush with plenty of water. If IN EYES, flush eyes, open and flush with plenty of water. If SWALLOWED and victim is CONSCIOUS, have victim drink water, milk and have water induce vomiting. If SWALLOWED and victim is UNCONSCIOUS, DO NOT HAVE VOMITING INDUCED. If breathing, keep victim warm.	
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. No fish, birds, bees, and waterfowl hazards. No fish, birds, bees, and waterfowl hazards.	
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Inert material. Periodic water contamination. Restrict access. Should be removed. Chemical and physical treatment.		2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Combustion Improver C-12 3.2 Coast Guard Compatibility Classification: To be developed 3.3 Chemical Formula: $C_{11}H_8Mn$ 3.4 HOCG/USCG Notations Numerical Designation: 5.1		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Straw to dark orange 4.3 Odor: Faint pleasant herbaceous
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Organic vapor cartridge mask, rubber gloves and apron, protective goggles or face shield. 5.2 Symptoms Following Exposure: Inhalation, ingestion, or skin contact affect central nervous system, causing convulsions, respiratory depression, cyanosis, and coma. Liquid irritates eyes. 5.3 Treatment for Exposure: Get medical attention following all exposures to this compound. INHALATION: remove victim from exposure, administer artificial respiration if necessary. EYES: flush with plenty of water for at least 15 min. SKIN: wash well with soap and water. INGESTION: induce vomiting. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0 ppm (Manganese) 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 4 oral LD_{50} = 23 mg/kg (rats) 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.		

6. FIRE HAZARDS 6.1 Flash Point: $> 200^{\circ}\text{F}$ (< 1) 6.2 Flammable Limits in Air: Data not available. 6.3 Fire Extinguishing Agents: Dry chemical foam, water spray, carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Toxic vapors are formed in a fire. 6.6 Behavior in Fire: Not pertinent. 6.7 Ignition Temperature: Data not available. 6.8 Electrical Hazard: Data not available. 6.9 Burning Rate: Data not available.	8. WATER POLLUTION 8.1 Aquatic Toxicity: Data not available. 8.2 Waterborne Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: Data not available.
7. NOTES	

MCP

METHYL CYCLOPENTANE

Common Synonyms Cyclopentane, methyl	Liquid Colorless Gasoline-like odor Floats on water. Flammable, irritating vapor is produced.
Shut off ignition sources. Call fire department. Stop discharge, if possible. Keep people away. Evacuate and remove from area if in fire. Notify local health and pollution control agencies.	
Fire	FLAMMABLE. Containers may explode in fire. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Extinguish with dry chemicals, foam, or carbon dioxide. Water may be ineffective on fire. Exposed containers with water.
Exposure	Call for medical aid. VAPOR If inhaled will cause dizziness or difficult breathing. Move victim to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. LIQUID Irritating to skin and eyes. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyes open and flush with plenty of water. IF SWALLOWED, do not induce vomiting. Have victim drink water or milk.
Water Pollution	Effect of low concentrations on aquatic life is unknown. Fouling to shoreline. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: high flammability. Evacuate area. Mechanical containment. Chemical and physical treatment.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Cyclopentane, methyl 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: C_5H_{12} 3.4 IMCO/United Nations Numerical Designation: 111241	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Like gasoline
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Self-contained breathing apparatus, goggles or face shield, rubber gloves. 5.2 Symptoms Following Exposure: Inhalation causes dizziness, nausea, and vomiting; concentrated vapor may cause unconsciousness and collapse. Liquid causes irritation of eyes and mild irritation of skin if allowed to remain. Ingestion causes irritation of stomach. Aspiration causes severe lung irritation, rapidly developing pulmonary edema, and central nervous system excitement followed by depression. 5.3 Treatment for Exposure: INHALATION: remove victim from exposure; if breathing has stopped, begin artificial respiration; call physician. EYES: flush with water for 15 min; call physician. SKIN: flush well with water; then wash with soap and water. INGESTION: do NOT induce vomiting; guard against aspiration into lungs. ASPIRATION: enforce bed rest, give oxygen; get medical attention. 5.4 Toxicity by Inhalation (Three- and Six-Hour Limit Values): Data not available. 5.5 Short-Term Inhalation Limits: 300 ppm for 60 min. 5.6 Toxicity by Ingestion: Grade I, ED ₅₀ 5 to 15 g/kg. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Vapor is nonirritating to eyes and throat. 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain, may cause smarting and reddening of skin. 5.10 Odor Threshold: Data not available.	

6. FIRE HAZARDS 6.1 Flash Point: $<0^{\circ}\text{F}$ ($<0^{\circ}\text{C}$) 6.2 Flammable Limits in Air: 1.1% - 8.7% (approx.) 6.3 Fire Extinguishing Agents: Dry chemical, foam, carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective. 6.5 Special Hazards of Combustion Products: Not pertinent. 6.6 Behavior in Fire: Vapor is heavier than air and may travel a considerable distance to a source of ignition and flash back. 6.7 Ignition Temperature: 621°F 6.8 Electrical Hazard: Data not available. 6.9 Burning Rate: 7 ft/min	8. NOTES

MCS

METHYLDICHLOROSILANE

Common Synonyms		Liquid	Colorless	Sharp irritating odor
		Reacts violently with water. Irritating gas is produced on contact with water.		
AVOID CONTACT WITH LIQUID AND VAPOR. KEEP PEOPLE AWAY. Wear goggles and self-contained breathing apparatus. Shut off ignition sources. Call fire department. Stop discharge if possible. Isolate and remove discharged material. Notify local health and pollution control agencies.				
Fire	FLAMMABLE POISONOUS GASES MAY BE PRODUCED IN FIRE Containers may explode in fire. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Extinguish with dry chemicals or carbon dioxide. DO NOT USE WATER OR FOAM ON FIRE. DO NOT USE WATER OR FOAM ON ADJACENT FIRES.			
Exposure	Call for medical aid. VAPOR Irritating to eyes, nose and throat. If inhaled will cause difficult breathing. Move victim to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. LIQUID Will burn skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk. DO NOT INDUCE VOMITING.			
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.			
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning - high flammability. Restrict access. Evacuate area. Disperse and flush with care.		2. LABEL 		
3. CHEMICAL DESIGNATIONS 31 Synonyms: No common synonyms. 32 Coast Guard Competibility Classification: Not applicable. 33 Chemical Formula: CH ₃ SiHCl. 34 IMCO/United Nations Numerical Designation: 3.2/1242.		4. OBSERVABLE CHARACTERISTICS 41 Physical State (as shipped): Liquid. 42 Color: Colorless. 43 Odor: Acid, sharp, hydrochloric acid like.		
5. HEALTH HAZARDS 51 Personal Protective Equipment: Full protective clothing, acid vapor type respiratory protection, rubber gloves, chemical worker's goggles, other protective equipment as necessary to protect skin and eyes. 52 Symptoms Following Exposure: Inhalation causes irritation of respiratory tract; heavy exposure can cause pulmonary edema. Contact of liquid with skin or eyes causes severe burns. Ingestion causes burns of mouth and stomach. 53 Treatment for Exposure: Get medical attention following all exposures to this compound. INHALATION: remove victim from exposure; if breathing has stopped, begin artificial respiration. EYES: flush with water for 15 min. SKIN: flush with water. INGESTION: do NOT induce vomiting, give large amounts of water. 54 Toxicity by Inhalation: (Threshold Limit Value): Data not available. 55 Short-Term Inhalation Limits: Data not available. 56 Toxicity by Ingestion: Grade 3 LD ₅₀ 50 to 500 mg/kg. 57 Late Toxicity: Data not available. 58 Vapor (Gas) Irritant Characteristics: Vapors cause severe irritation of eyes and throat and can cause eye and lung injury. They cannot be tolerated even at low concentrations. 59 Liquid or Solid Irritant Characteristics: Severe skin irritant. Causes second- and third-degree burns on short contact and is very injurious to the eyes. 510 Odor Threshold: Data not available.

NOTES			

MEK

METHYL ETHYL KETONE

Common Synonyms MEK 2-Butanone Ethyl methyl ketone	Liquid Colorless Sweet odor Floats and mixes with water. Flammable, irritating vapor is produced.
Spilling or discharge if possible, keep people away. Shut off nearby sources and call fire department. Stay upwind and use water spray for knockdown vapor. Avoid contact with liquid and vapor. Isolate and remove discharged material. Notify local health and pollution control agencies.	
Fire	FLAMMABLE Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Extinguish with dry chemical, alcohol foam, or carbon dioxide. Water may be ineffective on fire. Cool exposed containers with water.
Exposure	CALL FOR MEDICAL AID VAPOR Irritating to eyes, nose and throat. If inhaled, will cause nausea, vomiting, headache, dizziness, difficult breathing, or loss of consciousness. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. LIQUID Will burn eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES , hold eyes open and flush with plenty of water. IF SWALLOWED , do not induce vomiting. Have victim drink water or milk.
Water Pollution	Dangerous to aquatic life in high concentrations. May be dangerous if it enters water intakes. Notify local health and pollution control agencies. Notify petroleum spill spill water intakes.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 444-4) Issue warning: high flammability. Disperse and flush.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: 2-Butanone Ethyl methyl ketone MEK 3.2 Coast Guard Compatibility Classification: Ketone 3.3 Chemical Formula: $\text{CH}_3\text{COCH}_2\text{CH}_3$ 3.4 IMCO/United Nations Numerical Designation: 3.2/1191	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Like acetone: pleasant, pungent
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Organic canister or air pack, plastic gloves, goggles or face shield. 5.2 Symptoms Following Exposure: Liquid causes eye burn. Vapor irritates eyes, nose, and throat and can cause headache, dizziness, nausea, weakness, and loss of consciousness. 5.3 Treatment for Exposure: INHALATION : remove victim to fresh air, if breathing is irregular or has stopped, start resuscitation and administer oxygen. EYES : wash with plenty of water for at least 15 min. and call physician. 5.4 Toxicity by Inhalation (Threshold Limit Value): 200 ppm 5.5 Short-Term Inhalation Limit: 290 mg/m ³ for 60 min 5.6 Toxicity by Ingestion: Grade 2.0 to 5 g/kg (rat) 5.7 Late Toxicity: None 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause a slight smarting of the eyes or respiratory system if present in high concentrations. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain, may cause smarting and reddening of the skin. 5.10 Odor Threshold: 10 ppm	

6. FIRE HAZARDS 6.1 Flash Point: 20°F C.C., 22°F O.C. 6.2 Flammable Limits in Air: 1.8% - 11.5% 6.3 Fire Extinguishing Agents: Alcohol foam, dry chemical, or carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective. 6.5 Special Hazards of Combustion Products: Not pertinent. 6.6 Behavior in Fire: Not pertinent. 6.7 Ignition Temperature: 961°F 6.8 Electrical Hazard: Class I, Group D 6.9 Burning Rate: 4.1 mm/min	8. WATER POLLUTION 8.1 Aquatic Toxicity: 5640 mg/l (48 hr. bioassay) 11 mg/fresh water 8.2 Waterfowl Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): 2143 5 days 8.4 Food Chain Concentration Potential: None

MEP

METHYLETHYLPYRIDINE

Common Synonyms 5-Ethyl-2-methylpyridine 5-Ethyl-2-picoline MEP	Liquid Colorless Sharp odor Floats on water
Avoid contact with liquid. Keep people away. Wear goggles, self-contained breathing apparatus, and rubber over-boots. Stop discharges immediately. Call fire department. Isolate and remove discharge to national. Notify local health and pollution control agencies.	
Fire	Combustible Wear goggles, self-contained breathing apparatus, and rubber over-boots. Extinguish with water, dry chemical, alcohol foam, carbon dioxide. Control exposed containers with water.
Exposure	CALL FOR MEDICAL AID LIQUID Will burn skin and eyes Harmful if swallowed Remove contaminated clothing and shoes. Flush affected areas with plenty of water. If swallowed, do not induce vomiting. If conscious, have victim drink water. Notify local health and pollution control agencies.
Water Pollution	Effect of low concentrations on aquatic life is unknown. Fouling to shoreline. May be dangerous if it enters water intakes. Notify local health and pollution control agencies. Notify port and nearby water intakes.
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 448-4) Mechanical containment should be removed. Chemical and physical treatment.	2. LABEL 
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Aldehyde-ethylidene, Aldehyde, 5-Ethyl-2-methylpyridine, 5-Ethyl-2-picoline, MEP. 3.2 Coast Guard Compatibility Classification: Aromatic amine. 3.3 Chemical Formula: C ₇ H ₉ N. 3.4 IMCO/United Nations Numerical Designation: Not listed.	4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Colorless. 4.3 Odor: Sharp penetrating.
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Air supplied mask for high vapor concentrations, plastic gloves, goggles or face shield. 5.2 Symptoms Following Exposure: Breathing of vapors will cause vomiting and chest discomfort. Contact with liquid causes skin and eye burns. 5.3 Treatment for Exposure: INHALATION: remove victim to fresh air, give oxygen if breathing is difficult, call a physician. SKIN OR EYES: immediately flush with plenty of water for at least 15 min., get medical care for eyes. 5.4 Toxicity by Inhalation (Threshold Limit Value): 1700 ppm, 3.7 hr lethality (a). 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: (Grade 2) LD ₅₀ 0.5 to 0.6 g/kg (rat). 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause moderate irritation such that personnel will find high concentrations unpleasant. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Causes smarting of the skin and first degree burns on short exposure, may cause secondary burns on long exposure. 5.10 Odor Threshold: Data not available.	

6 FIRE HAZARDS 6.1 Flash Point: 155°F O.C. 6.2 Flammable Limits in Air: 1.1% - 6.6% 6.3 Fire Extinguishing Agents: Foam, carbon dioxide, dry chemical. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Irritating vapors are generated when heated. 6.6 Behavior in Fire: Not pertinent. 6.7 Ignition Temperature: 939°F. 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: Data not available.	8. WATER POLLUTION 8.1 Aquatic Toxicity: Data not available. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): (hour) 4.4%, 5 days 56.6%, 20 days 0.12-2.14 lb/lb 5 days. 8.4 Food Chain Concentration Potential: None.																																				
7. REVISED 1978

MTF

METHYL FORMAL

Common Synonyms		Liquid	Colorless	Mild sweet odor
Methylal Methylol dimethyl ether Dimethoxymethane Diethyl formal Formaldehyde dimethylacetal		Mixes with water. Flammable, irritating vapor is produced.		
Shut off to those sources. Call fire department. Stop discharge if possible. Keep people away. Isolate and remove discharged material. Notify local health and pollution control agencies.				
Fire		FLAMMABLE Irritating gases may be produced when heated Containers may explode in fire Flashback along vapor trail may occur Vapor may explode if ignited in an enclosed area Extinguish with dry chemicals, foam, or carbon dioxide Water may be ineffective on fire Cool exposed containers with water		
Exposure		Call for medical aid VAPOR Irritating to eyes, nose and throat. Harmful if inhaled Move victim to fresh air If breathing, have victim use artificial respiration If breathing is difficult, give oxygen LIQUID Irritating to skin and eyes Harmful if swallowed Remove contaminated clothing and shoes Flush affected areas with plenty of water If EYES: hold eyelids open and flush with plenty of water If SWALLOWED and victim is CONSCIOUS: having victim drink water or milk and have victim induce vomiting If SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS: do nothing except keep victim warm		
Water Pollution		Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes Notify local health and wildlife agencies Notify operators of nearby water intakes		
1. RESPONSE TO DISCHARGE (See Response Manual Handbook, CG 444-4) Issue warning: high flammability, water contaminant Restrict access Disperse and flush		2. LABEL 		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Dimethoxymethane, Dimethylformal, Formaldehyde, dimethylacetal, Methylal, Methylene dimethyl ether 3.2 Coast Guard Competibility Classification: F+her 3.3 Chemical Formula: CH ₂ (OCH ₃) ₂ 3.4 IMCO/United Nations Numerical Designation: 1.1/12.14		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Mild ethereal, chloroform like		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Self-contained breathing apparatus or all purpose canister mask, rubber gloves, chemical safety goggles, impervious apron and boots 5.2 Symptoms Following Exposure: Inhalation causes irritation of respiratory system and depression of central nervous system. Liquid causes irritation of eyes and will irritate skin if allowed to remain. Ingestion causes depression of central nervous system 5.3 Treatment for Exposure: INHALATION: remove victim from contaminated area and administer artificial respiration and oxygen if necessary. EYES: flush with plenty of water, get medical attention. SKIN: flush with plenty of water. INGESTION: induce vomiting, administer gastric lavage and saline cathartics; subsequent treatment is symptomatic and supportive 5.4 Toxicity by Inhalation (Threshold Limit Value): 1.000 ppm 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade I LD ₅₀ 5 to 15 g/kg 5.7 Late Toxicity: Liver and kidney injury may follow high exposures 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause a slight smarting of the eyes or respiratory if present in high concentrations. The effect is temporary 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain, may cause smarting and reddening of the skin 5.10 Odor Threshold: Data not available				

6. FIRE HAZARDS

6.1 **Flash Point:** 0°F O.C.
6.2 **Flammable Limits in Air:** 1.6% - 17.6%
6.3 **Fire Extinguishing Agents:** Dry chemical, foam, carbon dioxide
6.4 **Fire Extinguishing Agents Not to be Used:** Water may be ineffective
6.5 **Special Hazards of Combustion Products:** Irritating formaldehyde gas may be present in smoke
6.6 **Behavior in Fire:** Not pertinent
6.7 **Ignition Temperature:** 459°F
6.8 **Electrical Hazard:** Data not available
6.9 **Burning Rate:** 5.5 mm/min

7. CHEMICAL REACTIVITY

7.1 **Reactivity with Water:** No reaction
7.2 **Reactivity with Common Materials:** No reaction
7.3 **Stability During Transport:** Stable
7.4 **Neutralizing Agents for Acids and Caustics:** Not pertinent
7.5 **Polymerization:** Not pertinent
7.6 **Inhibitor of Polymerization:** Not pertinent

8. WATER POLLUTION

8.1 **Aquatic Toxicity:** Data not available
8.2 **Waterfowl Toxicity:** Data not available
8.3 **Biological Oxygen Demand (BOD):** Data not available
8.4 **Food Chain Concentration Potential:** None

9. SELECTED MANUFACTURERS

1. Celanese Chemical Company
245 Park Avenue
New York, N.Y. 10017
2. Aldrich Chemical Co.
940 West Saint Paul Ave.
Milwaukee, Wis. 53233
3. Eastman Kodak Co.
Eastman Organic Chemicals
Rochester, N.Y. 14650

10. SHIPPING INFORMATION

10.1 **Grades or Purity:** 97+%
10.2 **Storage Temperature:** Ambient
10.3 **Inert Atmosphere:** No requirement
10.4 **Venting:** Pressure vacuum

11. HAZARD ASSESSMENT CODE

NOTES

MFM

METHYL FORMATE

Common Synonyms		Liquid	Colorless	Pleasant odor
Formic acid, methyl ester		Mixes with water. Flammable, irritating vapor is produced. Boiling point is 88° F.		
See the caution sources. Call fire department if spill is large. If possible, keep people away from the spill. Do not use contaminated material. Do not use contaminated material in food or drink.				
Fire	FLAMMABLE. Containers may explode in fire. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Extinguish with dry chemical or carbon dioxide. Do not use water. Do not use water on burning containers with water.			
Exposure	VAPOR Irritating to eyes, nose and throat. Harmful if inhaled. May irritate skin. Prolonged exposure may cause irritation of skin. Do not breathe vapors. LIQUID Irritating to skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. If IN EYES, flush eyes with plenty of water. If SWALLOWED, do not induce vomiting.

NOTES																															

MHZ

METHYLHYDRAZINE

Common Synonyms Monomethylhydrazine MMH	Liquid Colorless Ammonia-like odor Mixes with water. Poisonous. Flammable vapor is produced.
AVOID CONTACT WITH EYES OR SKIN. IF CONTACT OCCURS, WASH IMMEDIATELY WITH WATER. IF EYES ARE CONTACTED, FLUSH EYES FOR AT LEAST 15 MINUTES. IF SKIN IS CONTACTED, WASH SKIN IMMEDIATELY WITH WATER. IF INGESTED, DO NOT INDUCE VOMITING. IF SWALLOWED, DRINK WATER OR MILK. IF INGESTED, DRINK WATER OR MILK. IF INGESTED, DRINK WATER OR MILK.	
Fire	FLAMMABLE Containers may explode in fire. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. May explode if exposed to heat or flames.
 Exposure	VAPOR POISONOUS IF INHALED OR IF SKIN IS EXPOSED Irritating to eyes, nose and throat. May cause respiratory distress. If inhaled, stop activity and get fresh air. If on skin, wash immediately with water. LIQUID POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED Will burn skin and eyes. If swallowed, do not induce vomiting. If on skin, wash immediately with water. If in eyes, flush immediately with water. If in eyes, flush immediately with water. If in eyes, flush immediately with water.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-1) Issue warning: poison high. Flammability, water contaminant. Restrict access. Evacuate area. Disperse and flush.	2. LABELS  
3. CHEMICAL DESIGNATIONS 31 Synonyms: Monomethylhydrazine, MMH. 32 Coast Guard Compatibility Classification: Not applicable. 33 Chemical Formula: CH ₃ NHNH. 34 IMCO/United Nations Numerical Designation: 1.2/1.4.	4. OBSERVABLE CHARACTERISTICS 41 Physical State (as shipped): Liquid. 42 Color: Colorless. 43 Odor: Like ammonia.
5. HEALTH HAZARDS 51 Personal Protective Equipment: Organic canister mask or self-contained breathing apparatus, goggles or face shield, rubber gloves, protective clothing. 52 Symptoms Following Exposure: Tremors and convulsions follow absorption by any route. Inhalation causes local irritation of respiratory tract, respiratory distress, and systemic effect. Contact of liquid with eyes or skin causes irritation and burns. Ingestion causes irritation of mouth and stomach. 53 Treatment for Exposure: Get medical attention at once following all exposures to this compound. INHALATION: move victim to fresh air and keep him quiet; give artificial respiration if breathing stops. EYES: flush for at least 15 min. with large quantities of water. SKIN: immediately wash with large quantities of water and treat as for alkali burn. INGESTION: give egg whites or other emollient, followed by a 5% salt solution; if other mild emetic keep patient as quiet as possible. To control convulsions, short acting barbiturates may be administered parenterally by a physician with due regard for depression of respiration. 54 Toxicity by Inhalation (Threshold Limit Value): 0.2 ppm. 55 Short-Term Inhalation Limits: 90 ppm for 10 min.; 40 ppm for 30 min.; 15 ppm for 60 min. 56 Toxicity by Ingestion: (Grade 4 oral LD ₅₀) = 33 mg/kg (rat). 57 Late Toxicity: Hemolytic anemia may result from large doses by any route. 58 Vapor (Gas) Irritant Characteristics: Vapors are moderately irritating such that personnel will not usually tolerate moderate or high concentrations.

(Continued on pages 5 and 6)

MIC

METHYL ISOBUTYL CARBINOL

Common Synonyms: Methyl isobutyl alcohol 4-Methyl-2-pentanol Isobutyl methyl carbinol		Only liquid Colorless Mild alcohol odor
Floats on water. Irritating vapor is produced.		
No special safety precautions. Keep people away. Avoid contact with eyes and skin. In case of fire, use dry chemical or foam. In case of spill, absorb with inert material. Do not breathe vapors.		
Fire	Combustible Extinguish with dry chemical, foam, or carbon dioxide. Do not use water.	
Exposure	CALL FOR MEDICAL AID VAPOR Irritating to eyes, nose and throat. Harmful if skin is exposed. If inhaled, will cause dizziness or difficult breathing. Move to fresh air. If in eyes, flush with water for at least 15 minutes. If on skin, flush with plenty of water. LIQUID Irritating to skin and eyes. Harmful if swallowed. Remove contaminated clothing as soon as possible. Flush with plenty of water. If IN EYES, hold eyelids open, flush with plenty of water. If SWALLOWED, do not induce vomiting. Flush with plenty of water. If on skin, flush with plenty of water.	
Water Pollution	Effect of low concentrations on aquatic life is unknown. Floating to shoreline. May be dangerous if it enters water intakes. Not a health and safety hazard. Not a serious health and safety hazard.	
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Mechanical containment Chemical and physical treatment		2. LABELS No hazard label required by Code of Federal Regulations.
3. CHEMICAL DESIGNATIONS 2.1 Synonyms: Isobutyl methyl carbinol, Methyl isobutyl Alcohol, MIAOH, 4-Methyl-2-pentanol, MIBC, MIC. 3.2 Coast Guard Compatibility Classification: Alcohol. 3.3 Chemical Formula: $(CH_3)_2CHCH_2CH_2OH$. 3.4 IMCO, UN, & Nations Numerical Designation: 111, 2051.		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Colorless. 4.3 Odor: Mild, sharp, non-residual.
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Air pack or organic canister mask, rubber gloves, goggles, or face shield. 5.2 Symptoms Following Exposure: Vapor irritates eyes and nose, may cause anesthesia. Prolonged contact with liquid causes irritation and cracking of skin, also irritates eyes. 5.3 Treatment for Exposure: INHALATION: remove to fresh air, give artificial respiration if needed, call doctor. SKIN: flush with water. EYES: flush with water for at least 15 min, consult a doctor. 5.4 Toxicity by Inhalation (Threshold Limit Value): 25 ppm. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 2, LD ₅₀ 5 to 5 g/kg (rat). 5.7 Late Toxicity: None. 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause moderate irritation such that personnel will find high concentrations unpleasant. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain, may cause staining and reddening of the skin. 5.10 Odor Threshold: Data not available.		

6. FIRE HAZARDS

6.1 **Flash Point:** 120-130°F O.C.
106°F C.C.

6.2 **Flammable Limits in Air:** 1.0% - 5.5%

6.3 **Fire Extinguishing Agents:** Alcohol foam, dry chemical or carbon dioxide

6.4 **Fire Extinguishing Agents Not to be Used:** Not pertinent

6.5 **Special Hazards of Combustion Products:** Not pertinent

6.6 **Behavior in Fire:** Not pertinent

6.7 **Ignition Temperature:** Data not available

6.8 **Electrical Hazard:** Not pertinent

6.9 **Burning Rate:** Data not available

7. CHEMICAL REACTIVITY

7.1 **Reactivity with Water:** No reaction

7.2 **Reactivity with Common Materials:** No reaction

7.3 **Stability During Transport:** Stable

7.4 **Neutralizing Agents for Acids and Caustics:** Not pertinent

7.5 **Polymerization:** Not pertinent

7.6 **Inhibitor of Polymerization:** Not pertinent

8. WATER POLLUTION

8.1 **Aquatic Toxicity:** 370 ppm/24 hr/brine shrimp/TL₅₀

8.2 **Waterfowl Toxicity:** Data not available

8.3 **Biological Oxygen Demand (BOD):** 50% of theoretical in 5 days, freshwater

8.4 **Food Chain Concentration Potential:** None

MIK

METHYL ISOBUTYL KETONE

Common Synonyms 4-Methyl-2-pentanone Isobutyl methyl ketone MIBK	Watery liquid Colorless Mild pleasant odor Floats and mixes slowly with water. Flammable irritating vapor is produced.
Fire	FLAMMABLE: Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Will burn on water surface.
Exposure	CAUTION OF HAZARD VAPOR: Irritating to eyes, nose and throat. If inhaled, will cause dizziness or loss of consciousness. LIQUID: Irritating to skin and eyes. Harmful if swallowed. Remove contaminated clothing. Flush affected area with plenty of water. IF IN EYES: hold eyelids open and flush with stream of water. IF SWALLOWED: do not induce vomiting. Give 1-2 glasses of water.
Water Pollution	Effect of low concentrations on aquatic life is unknown. Floating to surface. May be dangerous if it enters water intakes. Notify local health and fire authorities. Notify operators of nearby water intakes.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook CG 448-1) Issue warning - high flammability Evacuate area Disperse and flush	2. LABEL 
3. CHEMICAL DESIGNATIONS 31 Synonyms: Hexone; Isobutyl methyl ketone; Isopropylacetone; 4-Methyl-2-pentanone; MIBK; MIK. 32 Coast Guard Compatibility Classification: Ketone 33 Chemical Formula: $(CH_3)_2CHCH_2COCH_3$ 34 IMCO/United Nations Numerical Designation: 3271245	4. OBSERVABLE CHARACTERISTICS 41 Physical State (as shipped): Liquid 42 Color: Colorless 43 Odor: Pleasant mild characteristic, sharp non residual, ketonic
5. HEALTH HAZARDS 51 Personal Protective Equipment: Organic canister or air pack, rubber gloves, goggles or face shield. 52 Symptoms Following Exposure: Vapor causes irritation of eyes and nose, high concentrations cause numbness and depression. Liquid dries out skin and may cause dermatitis, irritates eyes but does not injure them. 53 Treatment for Exposure: INHALATION: remove to fresh air, give artificial respiration if needed, call a doctor. SKIN OR EYES: wash eyes thoroughly with water, wash skin with water until irritation stops. 54 Toxicity by Inhalation (Threshold Limit Value): 100 ppm 55 Short-Term Inhalation Limit: 100 ppm for 60 min. 56 Toxicity by Ingestion: Grade 2, LD ₅₀ 0.5 to 5 g/kg (rat) 57 Late Toxicity: None 58 Vapor (Gas) Irritant Characteristics: Vapors cause a slight smarting of the eyes or respiratory system if present in high concentrations. The effect is temporary. 59 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain, may cause smarting and reddening of the skin. 510 Odor Threshold: 0.47 ppm	

6. FIRE HAZARDS

- 61 **Flash Point:** 73°F C.C., 75°F O.C.
 62 **Flammable Limits in Air:** 1.4% - 7.5%
 63 **Fire Extinguishing Agents:** Alcohol foam, dry chemical, or carbon dioxide.
 64 **Fire Extinguishing Agents Not to be Used:** Water may be ineffective.
 65 **Special Hazards of Combustion Products:** Irritating vapors are generated when heated.
 66 **Behavior in Fire:** Vapors may travel a considerable distance and ignite.
 67 **Ignition Temperature:** 854°F
 68 **Electrical Hazard:** Class I, Group D
 69 **Burning Rate:** Data not available

8. WATER POLLUTION

- 81 **Aquatic Toxicity:** Data not available
 82 **Waterway Toxicity:** Data not available
 83 **Block Total Oxygen Demand (BOD):** (theor.) 1.8%, 0.5 day, (theor.) 12%, 5 days

NOTES

REVISED 1978

MPK

METHYL ISOPROPENYL KETONE, INHIBITED

Common Synonyms 2 Methyl-1-butene-3-one	Liquid Colorless Sweet pleasant odor Floats on water. Flammable irritating vapor is produced.
Shut off ignition sources. Call fire department. Stop discharge if possible. Keep people away. Isolate and remove discharged material. Notify local health and pollution control agencies.	
Fire	FLAMMABLE Containers may explode in fire. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Control at fires from safe distance in protected location. Extinguish with dry chemicals, foam or carbon dioxide. Water may be ineffective on fire. Cool exposed containers with water.
Exposure	Call for medical aid. VAPOR Irritating to eyes, nose and throat. Move victim to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. LIQUID Irritating to skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eye closed and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water. If milk and have victim induce vomiting. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CON- VULSIONS, do not induce vomiting. Keep victim warm.
Water Pollution	Effect of low concentrations on aquatic life is unknown. Fouling to shoreline. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: high flammability, water contaminant. Restrict access. Mechanical containment should be removed. Chemical and physical treatment.	2. LABEL 
3. CHEMICAL DESIGNATIONS 31 Synonyms: Isopropenyl methyl ketone 2 Methyl-1-butene-3-one 32 Coast Guard Compatibility Classification: Not applicable. 33 Chemical Formula: $\text{CH}_3\text{COC}(\text{CH}_3)=\text{CH}_2$ 34 IMCO/United Nations Numerical Designation: 32/1246	4. OBSERVABLE CHARACTERISTICS 41 Physical State (as shipped): Liquid 42 Color: Colorless 43 Odor: Very pungent, pleasant sweet
5. HEALTH HAZARDS 51 Personal Protective Equipment: Goggles or face shield, rubber gloves. 52 Symptoms Following Exposure: Inhalation causes irritation of nose and throat. Liquid may cause severe damage to eyes, resulting possibly in some permanent impairment of vision; vapor produces tears. If not removed promptly from skin, liquid may cause delayed pain and blistering. Ingestion causes irritation of mouth and stomach. 53 Treatment for Exposure: INHALATION: remove victim from exposure, give artificial respiration if needed, call physician. EYES: immediately irrigate with copious amounts of water for 15 min; call physician. SKIN: wash off skin with large volumes of water for 15 min; call physician if burn has occurred. INGESTION: induce vomiting, call physician. 54 Toxicity by Inhalation (Threshold Limit Value): Data not available. 55 Short-Term Inhalation Limits: Data not available. 56 Toxicity by Ingestion: (acute) oral LD_{50} = 180 mg/kg (rat). 57 Late Toxicity: Data not available. 58 Vapor (Gas) Irritant Characteristics: Vapors are moderately irritating such that personnel will not usually tolerate moderate or high concentrations. 59 Liquid or Solid Irritant Characteristics: Causes smarting and first degree burns on short exposure; may cause second degree burns on long exposure. 610 Odor Threshold: Data not available.	

6. FIRE HAZARDS 61 Flash Point: <73°F (C) 62 Flammable Limits in Air: 1.8% - 9.0% 63 Fire Extinguishing Agents: Dry chemical, foam, carbon dioxide. 64 Fire Extinguishing Agents Not to be Used: Water may be ineffective. 65 Special Hazards of Combustion Products: Not pertinent. 66 Behavior in Fire: May polymerize and explode. 67 Ignition Temperature: Data not available. 68 Electrical Hazard: Data not available. 69 Burning Rate: 4 in/min.	8. WATER POLLUTION 81 Aquatic Toxicity: Data not available. 82 Waterfowl Toxicity: Data not available. 83 Biological Oxygen Demand (BOD): Data not available. 84 Food Chain Concentration Potential: None.																																				
7. CHEMICAL REACTIVITY 71 Reactivity with Water: No reaction. 72 Reactivity with Common Materials: No reaction. 73 Stability During Transport: Stable. 74 Neutralizing Agents for Acids and Caustics: Not pertinent. 75 Polymerization: Will polymerize in the absence of inhibitor, especially when heated. 76 Inhibitor of Polymerization: Up to 1% hydroquinone.	9. MMC

METHYL MERCAPTAN

Common Synonyms Methanethiol Mercaptomethane Thiomethyl alcohol Methyl sulfide	Liquefied compressed gas Colorless Strong garlic odor Floats and boils on water Poisonous flammable vapor is produced
AVOID CONTACT WITH LIQUID AND VAPOR. KEEP PEOPLE AWAY. Wear goggles, self-contained breathing apparatus and rubber overclothing (including gloves). Shut off ignition sources. Call fire department. Stop discharge if possible. Evacuate area upwind. If area discharge, notify local health and industrial safety agencies.	
Fire	FLAMMABLE. POISONOUS GASES ARE PRODUCED IN FIRE. Containers may explode in fire. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Wear goggles and self-contained breathing apparatus. Let fire burn. Stop flow of gas if possible. Cool exposed containers and protect me. effect use of water with water.
 Exposure	CALL FOR MEDICAL AID. VAPOR POISONOUS IF INHALED. Irritating to eyes, nose and throat. Move victim to fresh air. If in eyes, hold eyes closed, pour and flush with plenty of water. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. LIQUID POISONOUS IF SWALLOWED. Irritating to skin and eyes. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyes closed and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water. IF SWALLOWED and victim is UNCONSCIOUS, do not give anything by mouth. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS. May be dangerous if it enters water intakes. Notify local health and safety officials. Notify proper authorities in water zone.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4.) Issue warning: high flammability, water contaminant, air contaminant. Restrict access. Evacuate area. Disperse and flush.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Mercaptomethane, Methanethiol, Methyl sulfide, Thiomethyl alcohol. 3.2 Coast Guard Compatibility Classification: Not applicable. 3.3 Chemical Formula: CH ₃ SH. 3.4 IMCO/United Nations Numerical Designation: 271064.	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquefied compressed gas. 4.2 Color: Colorless. 4.3 Odor: Garlic, foul, strong, offensive.
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Rubber gloves, goggles or face shield, air line or self-contained breathing apparatus. 5.2 Symptoms Following Exposure: Inhalation causes irritation of respiratory system, cough, paralysis, unconsciousness, death may follow respiratory paralysis. Contact with liquid causes eyes and skin. Ingestion causes irritation of mouth and stomach, plus symptoms described for inhalation. 5.3 Treatment for Exposure: INHALATION: remove patient immediately from the contaminated area, keep him warm and at complete rest; if necessary give artificial respiration until medical assistance can be obtained; oxygen or oxygen CO ₂ inhalation is recommended; continuing after spontaneous breathing has returned. EYES: for exposure to vapor, apply hot and cold compresses to reduce pain of conjunctivitis; for exposure to liquid, wash with water and obtain medical assistance. SKIN: wash with water. INGESTION: induce vomiting and follow with gastric lavage. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0 ppm. 5.5 Short-Term Inhalation Limit: 20 ppm for 5 min. 5.6 Toxicity by Ingestion: Data not available. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: 0.0021 ppm.	

6. FIRE HAZARDS 6.1 Flash Point: Not pertinent (flammable, liquefied compressed gas). 6.2 Flammable Limits in Air: 3.9% - 21.8%. 6.3 Fire Extinguishing Agents: Preferably let fire burn, stop gas flow. Fires may be extinguished with dry chemical, foam or carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective. 6.5 Special Hazards of Combustion Products: Irritating sulfur dioxide is produced. 6.6 Behavior in Fire: Containers may explode. 6.7 Ignition Temperature: Data not available. 6.8 Electrical Hazard: Data not available. 6.9 Burning Rate: 3.8 mm/min.	8. WATER POLLUTION 8.1 Aquatic Toxicity: 1.0 ppm/105 min/white bass, death/fresh water. 8.2 Waterlevel Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: None.								
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: No reaction. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent. 7.5 Polymerizations: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9. SELECTED MANUFACTURERS 1. Amoco Chemicals Corporation 130 East Randolph Drive Chicago, Ill. 60601 2. Pennwalt Corporation Chemical Division Three Parkway Philadelphia, Pa. 19102 3. Matheson Gas Products Co. East Rutherford, N. J. 07073.

NOTES (Continued on pages 2 and 3)									

MMH

METHYL METHACRYLATE

Common Synonyms: Methacrylic acid methyl ester Liquid Colorless Pleasant sharp odor Floats on water. Flammable, irritating vapor is produced.	
Fire FLAMMABLE: Flashback along vapor trail may occur. Containers may explode when heated. Vapor may explode if ignited in an enclosed area. May polymerize under heat, pressure, and other conditions. Can burn from flameless combustion (e.g., in a hot surface or in a hot liquid). May burn in the presence of oxygen. May burn in the presence of air. May burn in the presence of water. May burn in the presence of other liquids.	
Exposure FORMER MEDICAL: VAPOR Irritating to eyes, nose and throat. If inhaled, will cause dizziness, headache, difficult breathing, or loss of consciousness. Nausea, vomiting. If absorbed through skin, may cause irritation, redness, or blisters. If swallowed, may cause irritation, redness, or blisters. If swallowed, may cause irritation, redness, or blisters. If swallowed, may cause irritation, redness, or blisters.	
Water Pollution Dangerous to aquatic life in high concentrations. Tending to bioaccumulate. May be dangerous if it enters water intakes. Not a hazardous material under the law. Not a hazardous material under the law.	
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 444-1.) Issue warning: High flammability. Evacuate area. Disperse and flush.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Methacrylate monomer; Methacrylic acid, methyl ester; Methyl α-methylacrylate; Methyl 2-methyl 2-propenoate. 3.2 Coast Guard Compatibility Classification: Acrylate. 3.3 Chemical Formula: CH₂=C(CH₃)COOCH₃. 3.4 IMCO/United Nations Numerical Designation: 3.2/1247.	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Colorless. 4.3 Odor: Sharp, fragrant, pleasant smelling pungent ester.
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Air mask, plastic gloves, goggles. 5.2 Symptoms Following Exposure: Irritation of eyes, nose, and throat. Nausea and vomiting. Liquid may cause skin irritation. 5.3 Treatment for Exposure: INHALATION: remove to fresh air, apply artificial respiration and oxygen if needed, refer to physician. SKIN OR EYES: flush with plenty of water for 15 min., refer to physician for eye exposure. 5.4 Toxicity by Inhalation (Threshold Limit Value): 100 ppm. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade I, LD50 to 15 g/kg (rat). 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Vapor is moderately irritating such that personnel will not usually tolerate moderate or high vapor concentrations. 5.9 Liquid or Solid Irritant Characteristics: Causes smarting of the skin and first-degree burns on short exposure, may cause secondary burns on long exposure. 5.10 Odor Threshold: 0.05 ppm.	

6. FIRE HAZARDS 6.1 Flash Point: 50°F O.C. 6.2 Flammable Limits in Air: 2.1% - 12.5%. 6.3 Fire Extinguishing Agents: Foam, carbon dioxide, dry chemical. 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective. 6.5 Special Hazards of Combustion Products: Not pertinent. 6.6 Behavior in Fire: Vapor is heavier than air and may travel a considerable distance to a source of ignition and flash back. Containers may explode in fire or when heated because of polymerization. 6.7 Ignition Temperature: 790°F. 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: 2.5 mm/min.																																					
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: No reaction. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Corrosives: Not pertinent. 7.5 Polymerization: Heat, oxidizing agents, and ultraviolet light may cause polymerization. 7.6 Inhibitor of Polymerization: Hydroquinone, 22-65 ppm; hydroquinone methyl ether, 22-120 ppm; dimethyl tert-butylperoxide, 45-65 ppm.																																					
8. WATER POLLUTION 8.1 Aquatic Toxicity: 250 ppm (96 hr) bluegill/TLM in fresh water. 8.2 Waterfront Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): (theoretical) 4%, 10 days. 8.4 Food Chain Concentration Potential: None.

NOTES																																					

MPT

METHYL PARATHION

Common Synonyms Metron MPT Fardol Althos Naron Maltaron	Solid crystals or liquid or solution White solid or brown liquid Rotten eggs or garlic odor Solid and liquid mixt in water, solution floats on water Melting (freezing) point is 65° F
Fire	Combustible POISONOUS GASES ARE PRODUCED IN FIRE AND WHEN HEATED Containers may explode in fire
 Exposure	LIQUID OR SOLID POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED Irritating to eyes
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS Solution is feeding to shoreline May be dangerous if it enters water intakes
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 448-4) Issue warning - poison, water contaminant Restrict access Should be removed Chemical and physical treatment	2. LABEL  3. CHEMICAL DESIGNATIONS 3.1 Synonyms: MPT, O O Dimethyl O (p-Nitrophenyl) Phosphorothioate, O O-Dimethyl O-p-Nitrophenylthiophosphate, Parathion dimethyl 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: $(CH_3O)_2PSOCH_2NO_2$ 3.4 IMCO/United Nations Numerical Designation: 6.1, 1668
4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid or liquid 4.2 Color: Colorless solid or brownish liquid 4.3 Odor: Characteristic, like rotten eggs or garlic 5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Approved mask or respirator, natural rubber gloves, over shoes, protective clothing, goggles 5.2 Symptoms Following Exposure: Exposure to fumes from a fire, or to the liquid, causes headache, blurred vision, constricted pupils of the eyes, weak neck, nausea, cramps, diarrhea, and tightness in the chest. Muscle twitch and convulsions may follow. Symptoms may develop over a period of 8 hrs. 5.3 Treatment for Exposure: <i>Speed to external INGESTION</i> call a doctor. If victim is not breathing, immediately initiate artificial respiration by mouth-to-mouth, mouth-to-nose, or mouth-to-oropharyngeal method, when victim is conscious, give milk, water, or salt water and induce vomiting repeatedly. <i>SKIN OR EYES</i> flood and wash exposed areas thoroughly with water. Remove contaminated clothing and go to a shower. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.2 mg/m ³ (solid); 100 ppm (solution) 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 4 LD ₅₀ below 50 mg/kg (rat) 5.7 Lethal Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Not pertinent 5.9 Liquid or Solid Irritant Characteristics: Penetrates when absorbed through skin 5.10 Odor Threshold: Data not available	

6. FIRE HAZARDS

NOTES

REVISED 1978

MPD

**METHYL PHOSPHONOTHIOIC DICHLORIDE
(ANHYD)**

Common Synonym MPID		Liquid	Colorless	Sharp Unpleasant Odor
		Sinks and mixes violently with water		
1. Physical State (as shipped): Liquid 2. Color: Clear 3. Odor: Acid				
4. Fire Combustible Irritating gases may be produced when heated. If swallowed will cause coughing or difficulty breathing. If inhaled will cause coughing or difficulty breathing. If breathed in, remove person to fresh air.				
5. Exposure VAPOR Irritating to eyes, nose and throat. If inhaled will cause coughing or difficulty breathing. If swallowed will cause coughing or difficulty breathing. If breathed in, remove person to fresh air. LIQUID Will burn skin and eyes. If swallowed will cause nausea and vomiting. If on skin, wash with plenty of water. If in eyes, flush with plenty of water for at least 15 minutes. If on skin, wash with plenty of water for at least 15 minutes. If on clothing, remove clothing and wash skin with plenty of water for at least 15 minutes.				
6. Water Pollution Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes.				
1. RESPONSE TO DISCHARGE See Response Methods Handbook CG 646-4 Issue warning: continue water contamination. Restrict access. Dispense and flush.		2. LABEL 		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: MPID 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: CH ₃ NO 3.4 IMCO/United Nations Material Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Clear 4.3 Odor: Acid		
5. HEALTH HAZARDS Use extreme care when handling this compound. Avoid skin contact with liquid or vapor.				
5.1 Personal Protective Equipment: Rubber or neoprene gloves, respiratory protection, goggles. 5.2 Symptoms Following Exposure: Inhalation causes irritation of nose and throat; effects are quite similar to those of phosgene. Ingestion causes irritation of mouth and stomach. Delayed, painful eye irritation may occur from exposure to vapor. Liquid causes severe irritation. Contact with skin causes irritation and burns. 5.3 Treatment for Exposure: Get medical attention after all exposures to this compound. INHALATION: remove victim to fresh air; alert physician to delayed effects similar to those of phosgene. INGESTION: give large amount of water and induce vomiting. EYES: flush with water for at least 15 min. SKIN: flush with water. 5.4 Toxic (L) by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation - Lethal: Data not available. 5.6 Toxicity by Ingestion: Data not available. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.				

6. FIRE HAZARDS 61 Flash Point: >122°F (3°C) 62 Flammable Limits in Air: Data not available 63 Fire Extinguishing Agents: Dry chemical or carbon dioxide 64 Fire Extinguishing Agents Not to be Used: Water or foam 65 Special Hazards of Combustion Products: Irritating hydrogen chloride vapor and dioxide and other fumes may be formed in fire 66 Behavior in Fire: 67 Ignition Temperature: Data not available 68 Electrical Hazard: Data not available 69 Burning Rate: Data not available	8. WATER POLLUTION 81 Aqueous Toxicity: Data not available 82 Waterway Toxicity: Data not available 83 Biological Oxygen Demand (BOD): Data not available 84 Food Chain Concentration Potential: None
7. CHEMICAL REACTIVITY 71 Reactivity with Water: Reacts with water to form hydrogen bloom, acid and/or hydrogen chloride vapor. The reaction may be violent 72 Reactivity with Common Materials: Corrosive to metals because of its high acidity 73 Stability During Transport: Stable 74 Neutralizing Agents for Acids and Bases: Flush with water or mix with dilute sodium bicarbonate or soda ash solution 75 Polymerization: Not pertinent 76 Inhibitor of Polymerization: Not pertinent	9. SELECTED MANUFACTURERS East Corporation Industrial Chemicals Div. 451 Florida Riverside, La. 70500
11. HAZARD ASSESSMENT CODE Use Hazard Assessment Worksheet (E-606) in A-11	10. SHIPPING INFORMATION 101 Grade or Purity: Technical 102 Storage Temperature: Ambient 103 Inert Atmosphere: No requirement 104 Venting: Open

NOTES

MPY

1-METHYLPYRROLIDONE

Common Synonyms N-Methylpyrrolidone 1-Methyl-2-pyrrolidone N-Methylpyrrolidone N-Methylalpha-pyrrolidone	Liquid White Mild Fishy odor May float or sink in water	
Avoid contact with liquid. Keep people away. Stop discharge if possible. Call fire department. Isolate and remove discharged material. Notify local health and safety authorities.		
Fire	Combustible POISONOUS GASES MAY BE PRODUCED WHEN HEATED. Wear goggles and self-contained breathing apparatus. Extinguish with dry chemical, foam, or carbon dioxide. Water may be ineffective on fire. Cool exposed containers with water.	
Exposure	CALL FOR MEDICAL AID LIQUID Irritating to skin and eyes. If swallowed will cause nausea and vomiting. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, victim drink water, or milk and have victim relax until help arrives. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.	
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. No toxic health or wildlife effects. No other indicators of early water intakes.	
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning, water contaminant. Disperse and flush.		2. LABELS No hazard label required by Code of Federal Regulations.
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: 1-Methyl-2-pyrrolidone, N-Methylpyrrolidone, N-Methylpyrrolidone, N-Methyl alpha-pyrrolidone. 3.2 Coast Guard Compatibility Classification: Not listed. 3.3 Chemical Formula: C ₄ H ₇ NO. 3.4 IMCO/United Nations Numerical Designation: Not listed.		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Colorless. 4.3 Odor: Mild amine like.
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Goggles or face shield, rubber gloves. 5.2 Symptoms Following Exposure: Inhalation of hot vapors can irritate nose and throat. Ingestion causes irritation of mouth and stomach. Contact with eyes causes irritation. Repeated and prolonged skin contact produces a mild, transient irritation. 5.3 Treatment for Exposure: INHALATION: move to fresh air. INGESTION: give large amount of water and induce vomiting. EYES: flush with water for at least 15 min. SKIN: remove from skin and eyes by flooding the affected tissues with water, wash with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 2, oral LD ₅₀ = 3.5 mg/kg (rabbit). 5.7 Late Toxicity: Causes blood abnormalities in rats. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.

MSR

alpha-METHYLSTYRENE

Common Synonyms Isopropenylbenzene Phenylpropylene 1-Methyl-1-phenylethylene	Liquid Colorless Floats on water.
Avoid contact with liquid. Keep away from eyes. Stop discharge if possible. Call department. Isolate and remove discharged material. Notify local health and pollution control agencies.	
Fire	Combustible Flammable with dry chemicals, foam or carbon dioxide. Water may be ineffective on fire. Cool exposed containers with water.
Exposure	CALL FOR MEDICAL AID LIQUID Will burn skin and eyes. If swallowed will cause nausea and vomiting. A. Remove contaminated clothing and shoes. B. If swallowed, flush with plenty of water. C. If IN EYES, flush with water open and hold with front of water. D. If SWALLOWED and victim is CONSCIOUS, have victim drink water or milk. E. If SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do not induce vomiting. Call for medical aid. DO NOT INDUCE VOMITING.
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS Fouling to shoreline. May be dangerous if it enters water intakes. Notify local health and pollution control agencies. Notify operators of nearby water intakes.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Mechanical containment Should be removed Chemical and physical treatment	2. LABELS No hazard label required by Code of Federal Regulations
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Isopropenylbenzene 1-Methyl-1-phenylethylene Phenylpropylene 3.2 Coast Guard Compatibility Classification: Oil-film 3.3 Chemical Formula: $C_9H_8(CH_3)=CH_2$ 3.4 IMCO/United Nations Numerical Designation: Not listed	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Characteristic
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Neoprene gloves, splashproof goggles or face shield 5.2 Symptoms Following Exposure: Inhalation causes irritation of respiratory tract, headache, dizziness, light-headedness, and breathlessness. Ingestion causes irritation of mouth and stomach. Contact with liquid irritates eyes. Prolonged skin contact can cause severe rashes, swelling, and blistering. 5.3 Treatment for Exposure: INHALATION: remove victim to fresh air, if he is not breathing, give artificial respiration; contact a physician; keep victim quiet and warm. INGESTION: do NOT induce vomiting; call physician. EYES: flush with water for at least 15 min; get medical attention. SKIN: wash area with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): 100 ppm 5.5 Short-Term Inhalation Limits: 100 ppm, 30 min 5.6 Toxicity by Ingestion: Grade 2 LD ₅₀ 5 g/kg 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: <10 ppm	

6. FIRE HAZARDS

- 6.1 Flash Point: 137°F C.C.
 6.2 Flammable Limits in Air: 1.9% - 6.1%
 6.3 Fire Extinguishing Agents: Dry chemical, foam, carbon dioxide
 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective
 6.5 Special Hazards of Combustion Products:
 6.6 Behavior in Fire:
 6.7 Ignition Temperature: 1065°F
 6.8 Electrical Hazard: Data not available
 6.9 Burning Rate: Data not available

8. WATER POLLUTION

- 8.1 Aquatic Toxicity: 10 ppm, 96 hr/fathead minnow/LC₅₀
 8.2 Waterway Toxicity: Data not available
 8.3 Biological Oxygen Demand (BOD): Data not available
 8.4 Food Chain Concentration Potential: None

9. SELECTED MANUFACTURERS

- 1 Allied Chemical Corp.
 Plastics Division
 P.O. Box 265R
 Morristown, N.J. 07960
 2 United States Steel Co.
 Chemicals Division
 600 Grant St.
 Pittsburgh, Pa. 15230
 3 Dow Chemical Co.
 2030 Dow Center
 Midland, Mich. 48640

7. CHEMICAL REACTIVITY

- 7.1 Reactivity with Water: No reaction
 7.2 Reactivity with Common Materials: May attack some forms of plastics
 7.3 Stability During Transport: Stable
 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent
 7.5 Polymerization: Hazardous polymerization unlikely to occur except when in contact with alkali metals or metallo-organic compounds
 7.6 Inhibitor of Polymerization: 10-20 ppm tert-butylcatechol

10. SHIPPING INFORMATION

- 10.1 Grades or Purity: Commercial
 10.2 Storage Temperature: Ambient
 10.3 Inert Atmosphere: No requirement
 10.4 Venting: Open (flame arrester)

11. HAZARD ASSESSMENT CODE

(See Hazard Assessment Handbook, CG 446-3)
 T-U

12. HAZARD CLASSIFICATIONS

- 12.1 Code of Federal Regulations: Not listed
 12.2 NAS Hazard Rating for Bulk Water Transportation: Not listed
 12.3 NFPA Hazard Classifications.
- | Category | Classification |
|----------------------|----------------|
| Health Hazard (Blue) | 1 |
| Flammability (Red) | 2 |
| Reactivity (Yellow) | 1 |

13. PHYSICAL AND CHEMICAL PROPERTIES

- 13.1 Physical State at 15°C and 1 atm: Liquid
 13.2 Molecular Weight: 118.17
 13.3 Boiling Point at 1 atm: 329°F = 165°C = 438°K
 13.4 Freezing Point: -9.8°F = -23.2°C = 250.0°K
 13.5 Critical Temperature: 719.1°F = 381.7°C = 654.9°K
 13.6 Critical Pressure: 494 psia = 33.6 atm = 3.41 MN/m²
 13.7 Specific Gravity: 0.91 at 20°C (liquid)
 13.8 Liquid Surface Tension: 31.88 dynes/cm = 0.03346 N/m at 20°C
 13.9 Liquid-Water Interfacial Tension: Data not available
 13.10 Vapor (Gas) Specific Gravity: 4.0X
 13.11 Ratio of Specific Heats of Vapor (Gas): 1.060 at 27°C
 13.12 Latent Heat of Vaporization: 140.4 Btu/lb = 78.0 cal/g = 3.26 X 10⁵ J/kg
 13.13 Heat of Combustion: -17,690 Btu/lb = -9,830 cal/g = -411 X 10³ J/kg
 13.14 Heat of Decomposition: Not pertinent
 13.15 Heat of Solution: Not pertinent
 13.16 Heat of Polymerization: Data not available

(Continued on pages 5 and 6)

NOTES

MTS

METHYLTRICHLOROSILANE

Common Synonyms Liquid Colorless Sharp irritating odor Reacts violently with water. Irritating gas is produced on contact with water.	
ASCAUTION: FUEL WITH FROID AND VAPOR KEEPT OFF AN OPEN FLAME. If it enters breathing apparatus, immediately remove it and use self-contained breathing apparatus. Wear goggles and self-contained breathing apparatus. Flush affected areas with plenty of water. If in EYES, hold eyelids open and flush with plenty of water. If SWALLOWED and victim is CONSCIOUS, have victim drink water or milk. DO NOT INDUCE VOMITING.	
Fire	FLAMMABLE POISONOUS GASES MAY BE PRODUCED IN FIRE. Containers may explode in fire. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Wear goggles and self-contained breathing apparatus. Flush affected areas with plenty of water. If in EYES, hold eyelids open and flush with plenty of water. If SWALLOWED and victim is CONSCIOUS, have victim drink water or milk. DO NOT INDUCE VOMITING.
Exposure	Call for medical aid. VAPOR Irritating to eyes, nose and throat. If inhaled will cause difficult breathing. Move victim to fresh air. If breathing has stopped, have artificial respiration. If breathing is difficult, give oxygen. LIQUID Will burn skin and eyes. Harmful if swallowed. Remove victim from hot liquid and steam. Flush affected areas with plenty of water. If in EYES, hold eyelids open and flush with plenty of water. If SWALLOWED and victim is CONSCIOUS, have victim drink water or milk. DO NOT INDUCE VOMITING.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify water authority if two liter spill occurs. Notify appropriate authority if water intakes.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-3) Issue warning - high flammability, air contaminant. Restrict access. Evacuate area. Disperse and flush with care.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Trichloromethylsilane 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: CH₃SiCl₃ 3.4 IMCO/United Nations Numerical Designation: 3.2/1250	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Acid, sharp, hydrochloric acid
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Full protective clothing, acid vapor type respiratory protection, rubber gloves, chemical worker's goggles, other protective equipment as necessary to protect skin and eyes. 5.2 Symptoms Following Exposure: Inhalation causes irritation of mucous membrane. Contact with liquid causes severe burns of eyes and skin. Ingestion causes severe burns of mouth and stomach. 5.3 Treatment for Exposure: Get medical attention at once following all exposures to this compound. INHALATION: remove victim from exposure, give artificial respiration if breathing has ceased. EYES: flush with water for 15 min. SKIN: flush with water. INGESTION: do NOT induce vomiting, give large amounts of water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 3 LD₅₀ 50 to 60 mg/kg 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause severe irritation of eyes and throat and can cause eye and lung injury. They cannot be tolerated even at low concentrations. 5.9 Liquid or Solid Irritant Characteristics: Severe skin irritant. Causes second- and third degree burns on short contact and is very injurious to the eyes. 5.10 Odor Threshold: Decomposes in moist air, creating HCl with odor threshold of 1 ppm.	

6 FIRE HAZARDS 6.1 Flash Point: 45°F O.C., 15°F C.C. 6.2 Flammable Limits in Air: 5.1% - 20% 6.3 Fire Extinguishing Agents: Dry chemical, carbon dioxide 6.4 Fire Extinguishing Agents Not to be Used: Water, foam 6.5 Special Hazards of Combustion Products: Toxic hydrogen chloride and phosgene gases may form in fire. 6.6 Behavior in Fire: Difficult to extinguish. Re-ignition may occur. Contact with water applied to adjacent fires produces irritating hydrogen chloride. 6.7 Ignition Temperature: >760°F 6.8 Electrical Hazard: Data not available 6.9 Burning Rate: 1.9 mm/min	8 WATER POLLUTION 8.1 Aquatic Toxicity: Data not available 8.2 Waterfowl Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): Data not available 8.4 Food Chain Concentration Potential: None																																				
7 CHEMICAL REACTIVITY 7.1 Reactivity with Water: Reacts violently to form hydrogen chloride (hydrochloric acid). 7.2 Reactivity with Common Materials: Reacts with surface moisture to evolve hydrogen chloride, which is corrosive to metals. 7.3 Stability During Transport: Stable 7.4 Neutralizing Agents for Acids and Caustics: Flood with water, rinse with sodium bicarbonate or lime solution. 7.5 Polymerization: Not pertinent 7.6 Inhibitor of Polymerization: Not pertinent	9. SELECTED MANUFACTURERS 1. Union Carbide Corporation Chemicals and Plastics Division 270 Park Avenue New York, N.Y. 10017 2. Dow Corning Corporation P.O. Box 592 Midland, Mich. 48640 3. NOTES (Continued on pages 5 and 6)																																					

METHYL VINYL KETONE

Common Synonyms	Liquid	Colorless to light yellow	Strong irritant
3 Buten 2-one	Mixes with water. Irritating vapor is produced.		
AVOID CONTACT WITH FLammable PEOPLE AWAY Wear other over-protective clothing, gloves. Notify fire department in case of fire. Notify local health and pollution control agencies.			
Fire	FLAMMABLE Containers may explode in fire. Flashback along vapor trail may occur. Vapor may ignite if ignited in an enclosed area. Extinguish with dry chemical, alcohol foam, or carbon dioxide. Water may be ineffective in fire. Do not use containers with water.		
	CALL FOR MEDICAL AID VAPOR Irritating to eyes, nose and throat. If inhaled will cause coughing or difficult breathing. Move victim to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. LIQUID POISONOUS IF SWALLOWED Will burn skin and eyes. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. If IN EYES, flush eyes separately with copious quantities of water. If SWALLOWED and victim is CONSCIOUS, give 1 cup of milk or water. DO NOT INDUCE VOMITING.		
Exposure			
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Not biodegradable in fresh water. Not biodegradable in salt water.		
1. RESPONSE TO DISCHARGE	2. LABEL		
(See Response Methods Handbook CG 446-4) Issue warning: high flammability. water contaminant. Restrict access. Evacuate area. Dispose and flush.			
3. CHEMICAL DESIGNATIONS	4. OBSERVABLE CHARACTERISTICS		
31 Synonyms: 3 Buten 2-one 32 Coast Guard Compatibility Classification: Not applicable 33 Chemical Formula: CH₃COCH=CH₂ 34 IMCO/United Nations Numerical Designation: 32, 1251	41 Physical State (as shipped): Liquid 42 Color: Colorless to light yellow 43 Odor: Powerfully irritating		
5. HEALTH HAZARDS			
51 Personal Protective Equipment: Self contained breathing apparatus with full face piece, rubber gloves, chemical goggles or face piece of breathing apparatus. 52 Symptoms Following Exposure: Inhalation causes irritation of nose and throat. Vapor causes tears, contact with liquid can burn eyes. Liquid irritates skin and will cause burn if not removed at once. Ingestion causes irritation of mouth and stomach. 53 Treatment for Exposure: Get medical attention for all exposures to this compound. INHALATION: move victim to fresh air, administer artificial respiration if necessary. EYES OR SKIN: flush with copious quantity of water for 15 min. INGESTION: do NOT induce vomiting. 54 Toxicity by Inhalation (Threshold Limit Value): Data not available 55 Short-Term Inhalation Limits: Data not available 56 Toxicity by Ingestion: Grade 4 LD₅₀ <50 mg/kg 57 Late Toxicity: Data not available 58 Vapor (Gas) Irritant Characteristics: Vapors cause severe irritation of eyes and throat and can cause eye and lung injury. They cannot be tolerated even at low concentrations. 59 Liquid or Solid Irritant Characteristics: Severe skin irritant. Causes second and third-degree burns on short contact and is very injurious to the eyes. 510 Odor Threshold: 0.5 mg/m³			

6 FIRE HAZARDS 6.1 Flash Point: 30-1 O.C. 20-1 C.C. 6.2 Flammable Limits in Air: 2.1 - 15.6% 6.3 Fire Extinguishing Agents: Dry chemical, alcohol foam, carbon dioxide 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective 6.5 Special Hazards of Combustion Products: Not pertinent 6.6 Behavior in Fire: Vapor is heavier than air and may travel a considerable distance to a source of ignition and flash back. At elevated temperatures (fire conditions) polymerization may take place in containers, causing violent rupture. Unburned vapors are very irritating. 6.7 Ignition Temperature: 915-1 6.8 Electrical Hazard: Data not available 6.9 Burning Rate: 4.5 mm/min	8 WATER POLLUTION 8.1 Aquatic Toxicity: Data not available 8.2 Waterfowl Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): Data not available 8.4 Food Chain Concentration Potential: None

MCA

MONOCHLOROACETIC ACID

Common Synonyms Chloroacetic acid Chloroacetic acid	Solid or heated liquid Cloudy white solid, liquid is colorless to light yellow Strong vinegar-like odor Mixes with water
Avoid contact with liquid. Keep people away. No inhalation. If solid, wash with water. If liquid, flush with water. If swallowed, give large amount of water.	
Fire	Combustible POISONOUS GASES MAY BE PRODUCED IN FIRE. If discharged into water
Exposure	Call for medical aid. LIQUID OR SOLID Will burn skin and eyes. Harmful if swallowed. Run water into and flush face. Flush skin or area with plenty of water. IF IN EYES, hold eye open and flush with plenty of water. IF SWALLOWED, give large amount of water. DO NOT INDUCE VOMITING.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local authority of any spills. Notify local authority of water intakes.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: corrosive Restrict access Disperse and flush	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Chloroacetic acid Chloroacetic acid 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: <chem>ClCH2COOH</chem> 3.4 IMCO/United Nations Numerical Designation: Liquid 8/1750 Solid 8/1751	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid or solid 4.2 Color: Solid: translucent white Liquid: clear to light amber 4.3 Odor: Characteristic penetrating odor similar to vinegar
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Self-contained breathing apparatus, vinyl or neoprene rubber gloves, goggles and protective face shield, rubberized or acid resistant clothing. 5.2 Symptoms Following Exposure: Inhalation causes mucous membrane irritation. Contact with liquid causes severe irritation and burns of the eyes and irritation and burns of skin. Ingestion causes burns of mouth and stomach. 5.3 Treatment for Exposure: Get medical attention for all exposures to this compound. INHALATION: remove victim to fresh air and encourage rest until medical attention is obtained. EYES: flush with running water for 15 min. SKIN: flush with water. Get treatment for burns. INGESTION: give large amount of water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 4 oral LD_{50} = 762 mg/kg (rat). 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause severe irritation of eyes and throat and can cause eye and lung injury. They cannot be tolerated even at low concentrations. 5.9 Liquid or Solid Irritant Characteristics: Severe skin irritant. Causes second- and third-degree burns on short contact and is very injurious to the eyes. 5.10 Odor Threshold: 0.15 mg/m ³	

6. FIRE HAZARDS 6.1 Flash Point: (almost nonflammable) 250°F (121°C) 6.2 Flammable Limits in Air: 8% (LFL) 6.3 Fire Extinguishing Agents: Dry chemical, carbon dioxide, water. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Hydrogen chloride and phosgene may be generated. 6.6 Behavior in Fire: Not pertinent. 6.7 Ignition Temperature: Data not available. difficult to ignite. 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: Not pertinent.	8. WATER POLLUTION 8.1 Aquatic Toxicity: Data not available. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: None.																																				
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: Causes mild corrosion of common metals. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Flush with water; rinse with sodium bicarbonate or lime solution. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9. MEA

MONOETHANOLAMINE

Common Synonyms beta-Aminoethyl alcohol 2-Hydroxyethylamine Ethanolamine 2-Aminoethanol	Only liquid Colorless Slight ammonia odor Sinks and mixes with water. Freezing point is 51°F.
	
Fire	Combustible Flammable liquid and vapor.
Exposure	LIQUID OR SOLID Irritating to skin and eyes. Harmful if swallowed. May cause drowsiness or dizziness. May cause respiratory irritation. May cause skin irritation.
Water Pollution	Dangerous to aquatic life in high concentrations. May be dangerous if it enters water intakes. Not recommended for use in water.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Disperse and flush.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: 2-Aminoethanol beta-Aminoethyl alcohol Ethanolamine 2-Hydroxyethylamine 3.2 Coast Guard Competibility Classification: Alkanolamines 3.3 Chemical Formula: HOCH ₂ CH ₂ NH ₂ 3.4 IMCO/United Nations Numerical Designation: Not listed	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Mildly ammoniacal
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Full face shield, goggles, eye wash facility. 5.2 Symptoms Following Exposure: Vapor irritates eyes and nose. Liquid causes local injury to mouth, throat, digestive tract, skin, and eyes. 5.3 Treatment for Exposure: INGESTION: induce vomiting by giving large volumes of warm salt water (2 tablespoons per glass); call a doctor. EYES: flush with water for at least 15 min.; call a doctor. SKIN: flush with water. 5.4 Toxicity by Inhalation (Threshold Limit Value): 3 ppm 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: (Grade 2) LD ₅₀ 5 to 5 g/kg (rat) 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause moderate irritation such that personnel will find high concentrations unpleasant. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Causes smarting of the skin and first-degree burns on short exposure; may cause secondary burns on long exposure. 5.10 Odor Threshold: Data not available	

6. NOTES (Continued on pages 4 and 5)																																					

Common Synonyms - Isopropanolamine 1-Amino-2-propanol 2-Hydroxypropylamine	Thick liquid Floats and mixes with water. Freezing point is 35° F.	Colorless Slight ammonia odor
Fire	Combustible Mixtures with air are flammable over a wide range of concentrations. Extinguish with carbon dioxide or dry chemical agents.	
Exposure	CALL FOR MEDICAL AID LIQUID OR SOLID Irritating to skin and eyes Harmful if swallowed Respiratory irritation may occur from vapors. Repeated exposure may cause dermatitis. Ingestion may cause severe burns to mouth and throat. Eye contact may cause severe burns. Swallowing may cause severe burns to digestive tract. Severe irritation of respiratory tract may result from prolonged exposure to vapors. Death has resulted from inhalation of large quantities of vapor. Death has resulted from ingestion of large quantities of liquid. Death has resulted from eye contact with large quantities of liquid.	
Water Pollution	Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes Not known to be toxic to fish	
1. RESPONSE TO DISCHARGE (See Response Methods Handbook CG 648-4) Disperse and flush	2. LABELS No hazard label required by Code of Federal Regulations	
3. CHEMICAL DESIGNATIONS 31 Synonyms: 1-Amino-2-propanol 2-Hydroxypropylamine Isopropanolamine 32 Coast Guard Competibility Classification: Alkanolamines 33 Chemical Formula: CH₃CHOHCH₂NH₂ 34 IMCO/United Nations Numerical Designation: Not listed	4 OBSERVABLE CHARACTERISTICS 41 Physical State (as shipped): Liquid 42 Color: Colorless 43 Odor: Mildly ammoniacal	
5 HEALTH HAZARDS 51 Personal Protective Equipment: Full face shield, goggles, eye wash facility 52 Symptoms Following Exposure: Vapor irritates eyes and nose. Liquid causes local injury to mouth, throat, digestive tract, skin, and eyes. 53 Treatment for Exposure: "INGESTION" Induce vomiting by giving large volumes of warm salt water. (2 tablespoons per glass) call a doctor. EYES: Flush with water for at least 15 min. and call a doctor. SKIN: Flush with water. 54 Toxicity by Inhalation (Threshold Limit Value): 5 ppm 55 Short-Term Inhalation Limits: Data not available 56 Toxicity by Ingestion: Grade 2 LD₅₀'s to 5 g/kg rats 57 Late Toxicity: Data not available 58 Vapor (Gas) Irritant Characteristics: Vapors cause a slight stinging of the eyes or respiratory system if present in high concentrations. The effect is temporary. 59 Liquid or Solid Irritant Characteristics: Causes stinging of the skin and first-degree burns on short exposure and may cause secondary burns on long exposure. 510 Odor Threshold: Data not available

MORPHOLINE

Common Synonyms Tetrahydro-2H-1,4-oxazine 1,4-Tetrahydropyridine	Odor: liquid Colorless Fishy, ammonia odor Floats and mixes with water. Irritating vapor is produced.
Fire	FLAMMABLE Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Ext. with water. Do not use water on fire.
Exposure	CALL FOR MEDICAL AID VAPOR Irritating to eyes, nose and throat. If inhaled, will cause nausea, headache, or difficult breathing. LIQUID Irritating to skin and eyes. If swallowed, may cause nausea, headache, or difficult breathing. If swallowed, may cause nausea, headache, or difficult breathing.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes.
1. RESPONSE TO D'SCHARGE (See Response Methods Handbook, CG 446-4) Disperse and flush.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Diethyleneimide oxide Diethylene imidoxide Diethylene oximide Tetrahydro-2H-1,4-oxazine Tetrahydro-pyridine 3.2 Coast Guard Compatibility Classification: Aliphatic amine 3.3 Chemical Formula: <chem>C4H8N2O</chem> 3.4 IMCO/United Nations Numerical Designation: 3.3/2054	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Fishy, ammoniacal
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Organs, vapor canister or self-contained breathing apparatus, rubber boots and gloves, goggles or face shield. 5.2 Symptoms Following Exposure: Liquid causes skin and eye burns. Breathing vapors or absorption through skin may cause nausea and headache. 5.3 Treatment for Exposure: INHALATION: If all effects occur, move patient to fresh air, keep him quiet and warm, and call a physician. If breathing stops, start artificial respiration. INGESTION: Force milk or water, then immediately induce vomiting. Treat symptomatically. NO KNOWN ANTIDOTE. SKIN OR EYES: Immediately flush with plenty of water for at least 15 min for eyes; get medical attention promptly. 5.4 Toxicity by Inhalation (Threshold Limit Value): 20 ppm 5.5 Short Term Inhalation Limits: 20 ppm for 15 min 5.6 Toxicity by Ingestion: Grade 2.1 D ₅₀ 0.5 to 5 g/kg (guinea pig, rat) 5.7 Lethal Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause a slight smarting of the eyes or respiratory system if present in high concentrations. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain, may cause smarting and reddening of the skin. 5.10 Odor Threshold: 0.01 ppm.	

6. FIRE HAZARDS

- 6.1 Flash Point: 100°F O.C.
 6.2 Flammable Limits in Air: 1.8% - 10.8%
 6.3 Fire Extinguishing Agents: Water, fog, alcohol foam, dry chemical, or carbon dioxide.
 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent.
 6.5 Special Hazards of Combustion Products: Irritating vapors are generated when heated.
 6.6 Behavior in Fire: Vapor is heavier than air and may travel some distance to source of ignition and flash back.
 6.7 Ignition Temperature: 590°F
 6.8 Electrical Hazard: Not pertinent.
 6.9 Burning Rate: 1.9 mm/min.

7. CHEMICAL REACTIVITY

- 7.1 Reactivity with Water: No reaction.
 7.2 Reactivity with Common Materials: No reaction.
 7.3 Stability During Transport: Stable.
 7.4 Neutralizing Agents for Acids and Caustics: Flush with water.
 7.5 Polymerization: Not pertinent.
 7.6 Inhibitor of Polymerization: Not pertinent.

8. WATER POLLUTION

- 8.1 Aquatic Toxicity: Data not available.
 8.2 Waterfowl Toxicity: Data not available.
 8.3 Biological Oxygen Demand (BOD): (theor) 0.9%, 5 days 5.1%, 20 days.
 8.4 Food Chain Concentration Potential: None.

MFA

MOTOR FUEL ANTI-KNOCK COMPOUNDS CONTAINING LEAD ALKYL

Common Synonyms	Only liquid Dyed red, orange or blue Sweet fruity odor
	Sinks in water
AVOID CONTACT WITH EYES AND SKIN Avoid contact with eyes. If contact occurs, flush eyes with water for at least 15 minutes. Seek medical attention. Avoid contact with skin. If contact occurs, wash skin with soap and water. If irritation occurs, seek medical attention.	
Fire	Combustible POISONOUS GASES ARE PRODUCED IN FIRE Container may explode when heated. Welding, brazing, or cutting should not be performed on this container. If fire occurs, use dry chemical, carbon dioxide, or foam extinguishers. Do not use water. If fire occurs in a confined space, evacuate the area and call the fire department.
Exposure	CALL FOR MEDICAL AID LIQUID POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED Will burn eyes. Rinse thoroughly with water. If in eyes, flush with water for at least 15 minutes. If swallowed, do not induce vomiting. Drink water. If swallowed, do not induce vomiting. Drink water.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Not recommended for use in waterways.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4)	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: No common synonyms 3.2 Coast Guard Compatibility Classification: Motor fuel antiknock compound 3.3 Chemical Formula: Not applicable 3.4 IMCO/United Nations Numerical Designation: 6.1/1649	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Red, orange, or blue 4.3 Odor: Sweet, musty, fruity odor
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Organic vapor cartridge type face mask for emergency or short duration, fresh air mask for longer duration, impervious protective gloves, goggles as required, boots and light-colored clothing. 5.2 Symptoms Following Exposure: Increased urinary output of lead. Large degree of absorption from inhalation or skin contact may cause insomnia, excitability, delirium, coma and death. 5.3 Treatment for Exposure: Call a physician for any exposure. INHALATION: remove from exposure. INGESTION: no specific antidote. EYES: flush with plenty of water for about 15 min. SKIN: flush with kerosene, wash with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.1-0.15 mg/m³ (as lead) 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Data not available 5.7 Lethal Toxicity: Lead poisoning 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause a slight smarting of the eyes or respiratory system if present in high concentrations. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain, may cause smarting and reddening of the skin. Toxic absorption through skin may occur. 5.10 Odor Th.: Data not available	

6. FIRE HAZARDS 6.1 Flash Point: 89°F - 265°F O.C. 6.2 Flammable Limits in Air: None established 6.3 Fire Extinguishing Agents: Water, foam, dry chemical, carbon dioxide 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent 6.5 Special Hazards of Combustion Products: Toxic, lead-containing gases are generated in fires. 6.6 Behavior in Fire: Containers may explode. 6.7 Ignition Temperature: Begins to decompose above 212°F. 6.8 Electrical Hazard: Not pertinent 6.9 Burning Rate: Data not available	8. WATER POLLUTION 8.1 Aquatic Toxicity: See Tetraethyl Lead 8.2 Waterborne Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): Data not available 8.4 Food Chain Concentration Potential: Data not available
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction 7.2 Reactivity with Common Materials: Reacts with oxidizing materials, active metals and rust, but not considered hazardous. 7.3 Stability During Transport: A self-sustaining decomposition occurs if the temperature of the bulk liquid is above 212°F and a flame or hot metal surface serves to ignite the mass. The presence of ethylene dichloride may in the compound stable at 300°F for 15 hrs. 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent 7.5 Polymerization: Not pertinent 7.6 Inhibitor of Polymerization: Not pertinent	9. SELECTED MANUFACTURERS 1. E. I. duPont de Nemours & Co., Inc. Petroleum Chemicals Division Wilmington, Del. 19898 2. Ethyl Corp. Industrial Chemical Division 651 Florida St. Baton Rouge, La. 70801 3. PPG Industries, Inc. Houston Chemical Co. Division One Gateway Center Pittsburgh, Pa. 15222
11. HAZARD ASSESSMENT CODE (See Hazard Assessment Handbook, CG 446-3) A X-Y	10. SHIPPING INFORMATION 10.1 Grades or Purities: 50-60% mixed lead alkyl 18-36% ethylene dichloride 0-19% ethylene dibromide 7-12% toluene, other solvents dyes 10.2 Storage Temperature: Ambient 10.3 Inert Atmosphere: No requirement 10.4 Venting: Pressure-vacuum
12. HAZARD CLASSIFICATIONS 12.1 Code of Federal Regulations: Poisonous liquid or solid, Class B 12.2 HAS Hazard Rating for Bulk Water Transportation: Not listed 12.3 NFPA Hazard Classifications: Not listed	13. PHYSICAL AND CHEMICAL PROPERTIES 13.1 Physical State at 15°C and 1 atm: Liquid 13.2 Molecular Weight: Not pertinent 13.3 Boiling Point at 1 atm: >200°F = >93°C = >367°K 13.4 Freezing Point: Not pertinent 13.5 Critical Temperature: Not pertinent 13.6 Critical Pressure: Not pertinent 13.7 Specific Gravity: 1.5-1.7 at 15°C (liquid) 13.8 Liquid Surface Tension: (est.) 20 dynes/cm = 0.020 N/m at 20°C 13.9 Liquid-Water Interfacial Tension: (est.) 45 dynes/cm = 0.045 N/m at 20°C 13.10 Vapor (Gas) Specific Gravity: Not pertinent 13.11 Ratio of Specific Heats of Vapor (Gas): (est.) 1.040 13.12 Latent Heat of Vaporization: (est.) 101 Btu/lb = 46.2 cal/g = 3.35 x 10 ⁵ J/kg 13.13 Heat of Combustion: (est.) -18,200 Btu/lb = -10,130 cal/g = -424 x 10 ³ J/kg 13.14 Heat of Decomposition: Not pertinent 13.15 Heat of Solution: Not pertinent 13.16 Heat of Polymerization: Not pertinent
NO123	

REVISED 1978

NAB

NABAM

Common Synonyms EBDK sodium salt Ethylenebis(dithiocarbamate) or [[, 6 sodium salt Disodium ethylenebis (dithiocarbamate) Chem. Res. Inchem		Solid or solution	Colorless to light amber	Slight odor
NOTE: CONTAINING SOLUTION AND SOLID KEEP PEOPLE AWAY Aqueous solution without odor or light No odor when dry No odor when wet No odor when dry or wet				
Fire		Not flammable Poisonous and flammable gases are produced if the solution boils (See paragraph 6.1 for details)		
 Exposure		CALL FOR MEDICAL AID DUST POISONOUS IF INHALED Irritating to eyes, nose and throat Move to fresh air If in eyes, flush with water for 15 minutes If in mouth, spit out and swallow water If inhaled, get fresh air LIQUID OR SOLID POISONOUS IF SWALLOWED Irritating to skin and eyes Remove contaminated clothing Flush skin with water for 15 minutes If in eyes, flush with water for 15 minutes If swallowed, get medical attention If swallowed, get medical attention If swallowed, get medical attention If swallowed, get medical attention		
Water Pollution		HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes No odor when dry or wet No odor when dry or wet		
1. RESPONSE TO DISCHARGE (See Response Methods Manual, CG 446-4) Issue warning: poison water Contaminant Restrict access Should be removed Chemical and physical treatment		2. LABEL 		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Chem. Res. Disodium ethylenebis(dithiocarbamate), Disodium EBDK sodium salt, Ethylenebis (dithiocarbamate) acid, disodium salt 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: $C_2H_4N_4S_4$ 3.4 IMCO/United Nations Numerical Designation: 6.1 (XN)		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid or 22 solution in water 4.2 Color: Colorless to light amber 4.3 Odor: Slight sulfide		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Dust mask, goggles, and hand breathing apparatus, and impervious rubber gloves, rubber gloves 5.2 Symptoms Following Exposure: Contact with liquid irritates eyes and may cause mild burning evidence of such as well as severe irritation 5.3 Treatment for Exposure: INHALATION: remove person to fresh air, give artificial respiration and oxygen. If in eyes, flush with water for 15 minutes. If in mouth, spit out and swallow water. INGESTION: induce vomiting and follow with gastric lavage per medical direction 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Irritant to oral tissues, irritating agent 5.7 Late Toxicity: Derradation by ingestion and skin contact is highly irritant and toxic 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available				

6 FIRE HAZARDS 6.1 Flash Point: Not flammable. 6.2 Flammable Limits in Air: Not flammable. 6.3 Fire Extinguishing Agents: Not pertinent. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Not pertinent. 6.6 Behavior in Fire: If water solution boils, poisonous hydrogen sulfide and methyl flammable carbon disulfide vapors form. 6.7 Ignition Temperature: Not pertinent. 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: Not pertinent.	8 WATER POLLUTION 8.1 Aquatic Toxicity: 10 ppm 14 hr. (infectious stages) 10 ppm 14 hr. (infectious stages) 10 ppm 14 hr. (infectious stages) 10 ppm 14 hr. (infectious stages) 10 ppm 14 hr. (infectious stages) 8.2 Waterflow Toxicity: 10 ppm (acute exposure) 8.3 Biological Oxygen Demand (BOD) Data not available. 8.4 Food Chain Concentration Potential: None.
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction unless water is boiling hot, when poisonous hydrogen sulfide and flammable carbon disulfide vapors form. 7.2 Reactivity with Common Materials: No reaction. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9. SELECTED MANUFACTURERS Penn & Teller Company Independence Mall West Philadelphia, PA 19106 10 SHIPPING INFORMATION 10.1 Grades or Purity: Technical 22% solution in water. 10.2 Storage Temperature: Ambient. 10.3 Inert Atmosphere: Not required. 10.4 Venting: None.
11. HAZARD ASSESSMENT CODE See Hazard Assessment Manual, CG 446-3 XX 12. HAZARD CLASSIFICATIONS 12.1 Code of Federal Regulations: Poisonous, Class B. 12.2 NAS Hazard Rating for BuC Water Transportation: Not listed. 12.3 NFPA Hazard Classifications: Not listed.	13 PHYSICAL AND CHEMICAL PROPERTIES* 13.1 Physical State at 15°C and 1 atm: Solid. 13.2 Molecular Weight: 164. 13.3 Boiling Point at 1 atm: Not pertinent (decomposes). 13.4 Freezing Point: Not pertinent. 13.5 Critical Temperature: Not pertinent. 13.6 Critical Pressure: Not pertinent. 13.7 Specific Gravity: 1.4 at 20°C (solid). 13.8 Liquid Surface Tension: Not pertinent. 13.9 Liquid-Water Interfacial Tension: Not pertinent. 13.10 Vapor (Gas) Specific Gravity: Not pertinent. 13.11 Ratio of Specific Heats of Vapor (Gas): Not pertinent. 13.12 Latent Heat of Vaporization: Not pertinent. 13.13 Heat of Combustion: Not pertinent. 13.14 Heat of Decomposition: Not pertinent. 13.15 Heat of Solution: Not pertinent. 13.16 Heat of Polymerization: Not pertinent. *Data are in the unit indicated.
NOTES	

NCT

NAPHTHA: COAL TAR

Common Synonyms Mixture of coal tar solvent systems	Watery liquid Colorless to pale yellow Capable of odor Flammable liquid Irritating vapor is produced
No data available for this material No data available for this material No data available for this material No data available for this material No data available for this material	
Fire	Combustible Flammable liquid (NTP) Flammable solid (NTP)
Exposure	VAPOR Irritating to eyes, nose and throat If inhaled, will cause dizziness, headache, difficult breathing or loss of consciousness LIQUID Irritating to skin and eyes If swallowed, will cause nausea or vomiting If absorbed, will cause irritation of the skin If absorbed, will cause irritation of the skin If absorbed, will cause irritation of the skin If absorbed, will cause irritation of the skin
Water Pollution	Effect of low concentrations on aquatic life is unknown Toxic to fish May be dangerous if it enters water intakes
1. RESPONSE TO DISCHARGE (See Appendix B for details) CG 404.41 Mechanical containment Should be contained Chemical and physical treatment	2. LABELS No hazard label required by Federal Hazard Regulations
3. CHEMICAL DESIGNATIONS 3.1 Synonym: Mixture of benzene, toluene, and xylene 3.2 Coast Guard Compatibility Classification: Miscellaneous hydrocarbon mixtures 3.3 Chemical Formula: Not applicable 3.4 IMCO United Nations Numerical Designation: 42 0000	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless to pale yellow 4.3 Odor: Like benzene, toluene, and xylene
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Heavy rubber vapor protection suit, gloves, goggles, and shoe coverings 5.2 Symptoms Following Exposure: Primarily a narcotic, causing drowsiness, in high concentrations. The symptoms of acute benzene poisoning are not observed in this material. 5.3 Treatment for Exposure: Remove from exposure. Support respiration. For physician. 5.4 Toxicity by Inhalation (Threshold Limit Value): 10 ppm 5.5 Short-Term Inhalation Limits: 10 ppm for 15 min 5.6 Toxicity by Ingestion: 1 g/kg (1 lb/1000 kg) 5.7 Late Toxicity: 1 g/kg 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause a slight stinging in the eyes in persons with low lacrimal flow rate. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain, may cause a skin tingling and reddening of the skin. 5.10 Odor Threshold: 10 ppm	

6. FIRE HAZARDS 6.1 Flash Point: 117°F 6.2 Flammable Limits in Air: Data not available 6.3 Fire Extinguishing Agents: Foam, carbon dioxide, or dry chemical 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent 6.5 Special Hazards of Combustion Products: Not pertinent 6.6 Behavior in Fire: Not pertinent 6.7 Ignition Temperature: Maximum 1 6.8 Electrical Hazard: Class I, Group D 6.9 Burning Rate: 4 in./min	8. REVISED 1978

NTM

NAPHTHALENE, MOLTEN

Common Synonyms Naphthalene Tar camphor	Molten solid Colorless Mothballs odor Soluble and floats or sinks in water
See description of product. Keep in place as available for department. Avoid contact with food and water. Remove and store in airtight container. See also health and safety information.	
Fire	Combustible Molten naphthalene is highly flammable. Extinguish with water from dry chemical surface and from above. Extinguish with water.
Exposure	CALL FOR MEDICAL AID SOLID OR LIQUID Irritating to skin and eyes. Remove contaminated clothing and shoes. Flush contaminated areas with plenty of water. If IN EYES, hold solid open and flush with plenty of water.
Water Pollution	HAZARDOUS TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS Fouling to shoreline May be dangerous if it enters water intakes. Notify local health and water officials. Notify proper authorities with intake.
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Should be removed Chemical and physical treatment	2. LABELS No hazard label required by Code of Federal Regulations
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Naphthalene Tar Camphor 3.2 Coast Guard Compatibility Classification: Aromatic hydrocarbon 3.3 Chemical Formula: C ₁₀ H ₈ 3.4 IMCO/United Nations Numerical Designation: 4.1.1334	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Coal tar, moth balls
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: U.S. Bureau of Mines approved organic vapor canister unit (U.S.M. Type "B") rubber gloves, chemical safety goggles, face shield, overalls and/or rubber apron, rubber shoes or boots. 5.2 Symptoms Following Exposure: Vapors or fumes are irritating to eyes, nose, and throat and may cause headaches, dizziness, nausea, etc. Solid may be irritating to skin. 5.3 Treatment for Exposure: INHALATION: remove to fresh air. SKIN DRYES: flush with plenty of water for at least 15 min; remove contaminated clothing immediately; call a physician. 5.4 Toxicity by Inhalation (Threshold Limit Value): 16 ppm 5.5 Short-Term Inhalation Limits: 15 ppm for 5 min 5.6 Toxicity by Ingestion: Grade 2, oral rat LD ₅₀ = 1780 mg/kg 5.7 Site Toxicity: Data not available 5.8 Vapors (Gas) Irritant Characteristics: Vapors cause moderate irritation such that personnel will find high concentrations unpleasant. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Hot liquids can cause severe burn. The solid may irritate the skin. 5.10 Odor Threshold: Data not available	

6. FIRE HAZARDS 6.1 Flash Point: 174°F C.C., 190°F O.C. 6.2 Flammable Limits in Air: 0.9% - 5.9% 6.3 Fire Extinguishing Agents: Water fog, carbon dioxide dry chemical or foam. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Toxic vapors given off in a fire. 6.6 Behavior in Fire: Not pertinent. 6.7 Ignition Temperature: 979°F 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: 4.3 mm/min	8. REVISED 1978

NSV

NAPHTHA: SOLVENT

Common Synonyms Petroleum solvent		Watery liquid	Colorless	Gasoline-like odor
Floats on water. Vapor is produced				
May be toxic if swallowed. Keep away from children. Avoid contact with liquid and vapor. For more information, see the following: NIOSH Publication #100-110 (4-1-78)				
Fire		Combustible Extinction: with water, foam, carbon dioxide, or dry chemical. Do not spray directly on person.		
Exposure		ALL FOR MEDICAL USE VAPOR Not irritating to eyes, nose or throat If inhaled, will cause dizziness or loss of consciousness May be fatal if inhaled in high concentrations If inhaled, remove person to fresh air. If symptoms persist, call a doctor. LIQUID Irritating to skin and eyes Harmful if swallowed If swallowed, do not induce vomiting. If eyes are affected, flush with plenty of water. If in eyes, flush with water for 15 minutes. If on skin, wash with soap and water. If swallowed, do not induce vomiting. Call a doctor. Do not have person drink water. Do NOT INDUCE VOMITING.		
Water Pollution		Effect of low concentrations on aquatic life is unknown Fouling to shoreline May be dangerous if it enters water intakes Do not discharge into water bodies.		
1. RESPONSE TO LEAKAGE (See Response Manual Handbook, CG 446-4) Mechanical containment Should be removed Chemical and physical treatment		2. LABELS No hazard label required by Code of Federal Regulations		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Light naphtha, Petroleum solvent 3.2 Coast Guard Compatibility Classification: Miscellaneous hydrocarbon mixtures 3.3 Chemical Formula: Not applicable 3.4 IMCO/United Nations Numerical Designation: 12.1250		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Like kerosene and gasoline		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Goggles or face shield, as for gasoline 5.2 Symptoms Following Exposure: Higher concentrations of vapors may cause intoxication. If liquid is swallowed, it may get into lungs by aspiration, not very irritating to skin or eyes. 5.3 Treatment for Exposure: INHALATION: remove to fresh air, treat symptoms. INGESTION: do NOT induce vomiting, call a doctor. EYES: flush with water for 15 min. SKIN: wipe off, wash with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): 200 ppm 5.5 Short-Term Inhalation Limits: 500 ppm for 30 min 5.6 Toxicity by Ingestion: Grade 2 LD ₅₀ 0.5 to 5 g/kg 5.7 Late Toxicity: None 5.8 Vapor (Gas) Irritant Characteristics: Vapors are nonirritating to eyes and throat 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain, may cause staining and reddening of skin. 5.10 Odor Threshold: Data not available				

6 FIRE HAZARDS 6.1 Flash Point: >100°F (44°C) 6.2 Flammable Limits in Air: 0.8% - 8.0% 6.3 Fire Extinguishing Agents: Foam, carbon dioxide, or dry chemical 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent 6.5 Special Hazards of Combustion Products: Not pertinent 6.6 Behavior in Fire: Not pertinent 6.7 Ignition Temperature: 444°F 6.8 Electrical Hazard: Class I, Group D 6.9 Burning Rate: 4 mm/min	8. NSS

NAPHTHA:STODDARD SOLVENT

Common Synonyms Petroleum solvent Drycleaner naphtha Spotting naphtha	Watery liquid Colorless Gasoline-like odor Floats on water
See Section 5 for health hazard information. Contains no halogens. Not a flammable liquid. Not a flammable solid. Not a highly flammable liquid. Not a highly flammable solid.	
Fire	Combustible Flammable with heat of combustion 40,000 Btu/lb (187 kJ/kg). Combustible.
Exposure	CAUTION: MIDDLE ALKYL LIQUID Irritating to skin and eyes. Harmful if swallowed. Runny nose, irritation of throat. Pain, burning, redness, swelling of water. IF IN EYES: Flush with water for 15 min. IF SWALLOWED: Do not induce vomiting. Give oral drink water. Do NOT induce vomiting.
Water Pollution	Effect of low concentrations on aquatic life is unknown. Fouling to shoreline. May be dangerous if it enters water intakes. Not a health hazard. Not a pollutant.
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4.) Mechanical containment. Should be removed. Chemical and physical treatment.	2. LABELS No hazard label is required by Code of Federal Regulations.
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Drycleaner naphtha, Petroleum solvent, Spotting naphtha. 3.2 Coast Guard Compatibility Classification: Miscellaneous hydrocarbon mixtures. 3.3 Chemical Formula: Not applicable. 3.4 IMCO/United Nations Numerical Designation: 33.1265.	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Colorless. 4.3 Odor: Like gasoline.
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Goggles or face shield (as for gasoline). 5.2 Symptoms Following Exposure: High concentration of vapors may cause intoxication. If liquid is swallowed, it may get into lungs by aspiration, not very irritating to skin or eyes. 5.3 Treatment for Exposure: INHALATION: remove patient from exposure, treat symptoms. INGESTION: do NOT induce vomiting. Call a doctor. EYES: flush with water for 15 min. SKIN: wipe off and wash with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): 200 ppm. 5.5 Short-Term Inhalation Limits: 500 ppm for 30 min. 5.6 Toxicity by Ingestion: Grade 2 LD ₅₀ 5 to 8 g/kg. 5.7 Late Toxicity: None. 5.8 Vapor (Gas) Irritant Characteristics: Vapors are nonirritating to the eyes and throat. 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain, may cause smarting and reddening of the skin. 5.10 Odor Threshold: Data not available.	

6 FIRE HAZARDS 6.1 Flash Point: 110°F (43°C). 6.2 Flammable Limits in Air: 0.8% - 8.0%. 6.3 Fire Extinguishing Agents: Foam, dry chemical, or carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Not pertinent. 6.6 Behavior in Fire: Not pertinent. 6.7 Ignition Temperature: 540°F (est.). 6.8 Electrical Hazard: Class I Group D. 6.9 Burning Rate: 4 mm/min.	8 WATER POLLUTION 8.1 Aquatic Toxicity: Data not available. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: None.								
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: No reaction. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9. SELECTED MANUFACTURERS 1. Pennsylvania Refining Co., Butler, Pa. 16001. 2. Sun Oil Co., St. Davids, Pa. 19087. 3. Union Oil Co., Amoco Division, 3100 S. Meacham Rd., Palatine, Ill. 60067.								
11. HAZARD ASSESSMENT CODE (See Hazard Assessment Handbook, CG 446-3). A-T-U.	10 SHIPPING INFORMATION 10.1 Grades or Purity: Data not available. 10.2 Storage Temperature: Ambient. 10.3 Inert Atmosphere: No requirement. 10.4 Venting: Open (flame arrester).								
12 HAZARD CLASSIFICATIONS 12.1 Code of Federal Regulations: Combustible Liquid. 12.2 NAS Hazard Rating for Bulk Water Transportation: Not listed. 12.3 NFPA Hazard Classifications: <table> <tr> <th>Category</th><th>Classification</th></tr> <tr> <td>Health Hazard (Blue)</td><td>0</td></tr> <tr> <td>Flammability (Red)</td><td>2</td></tr> <tr> <td>Reactivity (Yellow)</td><td>0</td></tr> </table>	Category	Classification	Health Hazard (Blue)	0	Flammability (Red)	2	Reactivity (Yellow)	0	13 PHYSICAL AND CHEMICAL PROPERTIES 13.1 Physical State at 15°C and 1 atm: Liquid. 13.2 Molecular Weight: Not pertinent. 13.3 Boiling Point at 1 atm: 120.380°F = 100.199°C = 433.472°K. 13.4 Freezing Point: Not pertinent. 13.5 Critical Temperature: Not pertinent. 13.6 Critical Pressure: Not pertinent. 13.7 Specific Gravity: 0.75 at 20°C (liquid). 13.8 Liquid Surface Tension: 19.23 dynes/cm = 0.019 023 N/m at 20°C. 13.9 Liquid-Water Interfacial Tension: 39.51 dynes/cm = 0.039 0051 N/m at 20°C. 13.10 Vapor (Gas) Specific Gravity: Data not available. 13.11 Ratio of Specific Heats of Vapor (Gas): (est.) 1.030. 13.12 Latent Heat of Vaporization: 130 150 Btu/lb = 71 813 cal/g = 3.034 X 10 ⁵ J/kg. 13.13 Heat of Combustion: (est.) 15 200 Btu/lb = 10 100 cal/g = 424 X 10 ³ J/kg. 13.14 Heat of Decomposition: Not pertinent. 13.15 Heat of Solution: Not pertinent. 13.16 Heat of Polymerization: Not pertinent.

NOTES

NVM

NAPHTHA: VM & P

(75% NAPHTHA)

Common Synonyms: Petroleum solvent Light naphtha	Watery liquid Colorless Gasoline-like odor
Floats on water. Flammable, irritating vapor is produced.	
Stop discharge if possible. Keep people away. Shut off ignition sources and call fire department. Stay upwind and use water spray to knock down vapor. Avoid contact with liquid and vapor. Isolate and remove discharged material. Notify local health and pollution control agencies.	
Fire	FLAMMABLE Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Extinguish with foam, dry chemical or carbon dioxide. Cool exposed containers with water.
Exposure	CALL FOR MEDICAL AID VAPOR Irritating to eyes, nose and throat. If inhaled, will cause dizziness or loss of consciousness. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. LIQUID Irritating to skin and eyes. If swallowed, will cause nausea or vomiting. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES: Hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS: Have victim drink water. IF UNCONSCIOUS: Do not induce vomiting.
Water Pollution	Effect of low concentrations on aquatic life is unknown. Fouling to shoreline. May be dangerous if it enters water intakes. Notify local health and welfare officials. Notify personnel of nearby water intakes.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: high flammability. Evacuate area. Disperse and flush.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Light naphtha Painter's naphtha Petroleum solvent 3.2 Coast Guard Compatibility Classification: Miscellaneous hydrocarbon mixtures 3.3 Chemical Formula: Not applicable 3.4 IMCO/United Nations Numerical Designation: 3.2, 1255	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Like gasoline
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Goggles or face shield (as for gasoline). 5.2 Symptoms Following Exposure: Vapor irritates respiratory tract, causes coughing and mild depression. Aspiration causes severe lung irritation with coughing, gagging and rapidly developing pulmonary edema. Ingestion irritates mouth and stomach, causes nausea, vomiting, swelling of abdomen, cardiac arrhythmias. 5.3 Treatment for Exposure: INHALATION: maintain respiration if required. INGESTION: do NOT induce vomiting; observe for pneumonia; support if central nervous system depression occurs. ASPIRATION: enforce rest; administer oxygen; call a doctor. EYES: flush with water for at least 15 min. SKIN: wipe off; wash with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: 500 ppm for 30 min. 5.6 Toxicity by Ingestion: Grade I, 1.5 to 15 g/kg. 5.7 Late Toxicity: None. 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause a slight smarting of the eyes or respiratory system if present in high concentrations. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain, may cause smarting and red tanning of the skin. 5.10 Odor Threshold: Data not available.	

6. FIRE HAZARDS 6.1 Flash Point: 20.55°C (69°F) 6.2 Flammable Limits in Air: 0.9% - 6.7% 6.3 Fire Extinguishing Agents: Foam, carbon dioxide or dry chemical. 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective. 6.5 Special Hazards of Combustion Products: Not pertinent. 6.6 Behavior in Fire: Vapor is heavier than air and may travel long distances to a source of ignition and flash back. 6.7 Ignition Temperature: 450°F 6.8 Electrical Hazard: Class I, Group D. 6.9 Burning Rate: 4 mm/min.	8. WATER POLLUTION 8.1 Aquatic Toxicity: Data not available. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: None.
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: No reaction. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9. SELECTED MANUFACTURERS 1. Pennsylvania Refining Co. Butler, Pa. 16001 2. Sun Oil Co. St. Davids, Pa. 19087 3. Union Oil Co. Amoco Division 3100 S. Meacham Rd. Palatine, Ill. 60067
11. HAZARD ASSESSMENT CODE (See Hazard Assessment Handbook, CG 446-3) A T U A W	10. SHIPPING INFORMATION 10.1 Grades or Purity: Petroleum hydrocarbons (90%) plus aromatic hydrocarbons such as benzene and toluene (10%). 10.2 Storage Temperature: Ambient. 10.3 Inert Atmosphere: No requirement. 10.4 Venting: Open (flame arrester) or pressure vacuum.
12. HAZARD CLASSIFICATIONS 12.1 Code of Federal Regulations: Flammable liquid. 12.2 NAS Hazard Rating for Bulk Water Transportation: Not listed. 12.3 NFPA Hazard Classifications: Not listed.	13. REVISED 1978

(continued on pages 1 and A1)

NAO

1-NAPHTHYLAMINE

Common Synonyms 1-Aminonaphthalene alpha-Naphthylamine		Solid	Light to dark brown	Weak ammonia-like odor
Sinks in water				
AVOID CONTACT WITH SOLID AND DUST. KEEP PEOPLE AWAY. Wear face shield and gloves when handling solid. Wash face and gloves after use. Isolate and remove discharged material. Notify health authorities if spill occurs.				
Fire		Combustible POISONOUS GASES ARE PRODUCED IN FIRE. Irritating gases are produced when heated. Extinguish with water.		
 Exposure		CALL FOR MEDICAL AID. DUST POISONOUS IF INHALED OR IF SKIN IS EXPOSED Irritating to eyes. Wash face and gloves after use. If IN EYES: Flush with plenty of water. If SWALLOWED: Do not induce vomiting. Get medical attention. If SWALLOWED and skin is in contact: Get medical attention. If SWALLOWED and skin is in contact: Get medical attention.		
Water Pollution		Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify health authorities if spill occurs. Notify water treatment plant.		
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: poison water contaminant. Restrict access. Should be removed. Chemical and physical treatment.		2. LABELS None required by Code of Federal Regulations.		
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: 1-Aminonaphthalene alpha-Naphthylamine 3.2 Coast Guard Compatibility Classification Not applicable 3.3 Chemical Formula: C ₁₀ H ₉ NH 3.4 IMCO/United Nations Numerical Designation: 6.1 1650		4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: Tan to brown; darkens on storage. 4.3 Odor: Characteristic amine.		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Complete protection for respiratory system, eyes, and skin 5.2 Symptoms Following Exposure: Inhalation may cause cyanosis (blue color in lips and under finger nails). Contact with liquid causes local irritation of eyes. Neither ingestion nor contact with skin produces any recognized immediate effects. 5.3 Treatment for Exposure: Persons undergoing severe exposure to this compound should have continuing medical attention for possible development of cancer. INHALATION: obtain medical attention for cyanosis. EYES: flush with water for at least 15 min. SKIN: wash carefully with soap and water. INGESTION: get medical attention. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 2 oral LD ₅₀ = 770 mg/kg (rat); 4,060 mg/kg (mammals) 5.7 Late Toxicity: Considered cancer-producing, particularly since it may contain up to 0.5% of 2-naphthylamine 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available				

6. FIRE HAZARDS

- 6.1 **Flash Point:** (combustible solid) 115°F (40°C) (molten solid).
 6.2 **Flammable Limits in Air:** Not pertinent.
 6.3 **Fire Extinguishing Agents:** Water, dry chemical, carbon dioxide, foam.
 6.4 **Fire Extinguishing Agents Not to be Used:** Water or foam may cause frothing.
 6.5 **Special Hazards of Combustion Products:** Toxic nitrogen oxides are produced in a fire.
 6.6 **Behavior in Fire:** Not pertinent.
 6.7 **Ignition Temperature:** Data not available.
 6.8 **Electrical Hazard:** Not pertinent.
 6.9 **Burning Rate:** Not pertinent.

8. WATER POLLUTION

- 8.1 **Aquatic Toxicity:** Data not available.
 8.2 **Waterfowl Toxicity:** Data not available.
 8.3 **Biological Oxygen Demand (BOD):** Data not available.
 8.4 **Food Chain Concentration Potential:** None.

9. SELECTED MANUFACTURERS

1. Aldrich Chemical Co.
 940 West Saint Paul Ave.
 Milwaukee, Wis. 53233.
 2. Eastman Kodak Co.
 Eastman Organic Chemicals
 Rochester, N. Y. 14650.
 3. E. I. duPont de Nemours & Co.
 Organic Chemicals Dept.
 Dyes and Chemicals Division
 Wilmington, Del. 19895.

10. SHIPPING INFORMATION

- 10.1 **Grade or Purity:** Pure Technical.
 10.2 **Storage Temperature:** Cool ambient.
 10.3 **Inert Atmosphere:** No requirement.
 10.4 **Venting:** Open. Store containers in well ventilated area.

11. HAZARD ASSESSMENT CODE

(See Hazard Assessment Handbook, CG 446-3).
 II

12. HAZARD CLASSIFICATIONS

- 12.1 **Code of Federal Regulations:** Not listed.
 12.2 **NAS Hazard Rating for Bulk Water Transportation:** Not listed.
 12.3 **NFPA Hazard Classifications:**

 13.11 **Ratio of Specific Heats of Vapor (Gas):** Not pertinent.
 13.12 **Latent Heat of Vaporization:** Not pertinent.
 13.13 **Heat of Combustion:** -45,290 Btu/lb = -8,495 cal/g = -355.4 × 10³ J/kg.
 13.14 **Heat of Decomposition:** Not pertinent.
 13.15 **Heat of Solution:** Not pertinent.
 13.16 **Heat of Polymerization:** Not pertinent.

(continued on pages 3 and 4)

NOTES

NHX

NEOHEXANE

Common Synonyms 2,2-Dimethylbutane		Liquid	Colorless	Gasoline like odor
		Floats on water. Flammable. Irritating vapor is produced.		
Note: The following information is for the liquid phase only. The gas phase is not covered by this section. Note: The following information is for the liquid phase only. The gas phase is not covered by this section.				
Fire	FLAMMABLE Containers may explode in fire. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Do not use open flame or other sources of ignition. Do not breathe vapors.			
Exposure	VAPOR Irritating to eyes, nose and throat. If inhaled will cause dizziness, coughing, or difficult breathing. May cause drowsiness. Do not breathe vapors. LIQUID Irritating to skin and eyes. If swallowed will cause nausea or vomiting. Runny nose, irritated throat, and coughing. Irritation of eyes may occur. If in eyes, flush with water for 15 min. If on skin, wash with soap and water. If swallowed, do not induce vomiting. Call a doctor. Do not induce vomiting.			
Water Pollution	Effect of low concentrations on aquatic life is unknown. Floating to shoreline. May be dangerous if it enters water intakes. Do not discharge into water.			
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446.4) Issue warning: high flammability. Restrict access. Evacuate area. Disperse and flush.		2. LABEL 		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: 2,2-Dimethylbutane 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: CH3C(CH3)2CH2CH3 3.4 IMCO/United Nations Numerical Designation: 3.1, 1255		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Like gasoline		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Air supplied apparatus or organic vapor cartridge, goggles or face shield, rubber gloves. 5.2 Symptoms Following Exposure: Inhalation causes dizziness, nausea, and vomiting. Concentrated vapor may cause unconsciousness and collapse. Contact with liquid causes irritation of eyes. Repeated contact may produce irritation of skin. Ingestion causes irritation of stomach. Aspiration causes severe lung irritation, rapidly developing pulmonary edema, and central nervous system excitement followed by depression. 5.3 Treatment for Exposure: INHALATION: remove from exposure. If breathing has stopped, begin artificial respiration, call a physician. EYES: flush with water for 15 min., call physician if needed. SKIN: flush well with water, then wash with soap and water. INGESTION: do NOT induce vomiting, give adequate aspiration into lungs, call a doctor. ASPIRATION: entice bed rest, give oxygen, get medical attention. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Data not available. 5.7 Late Toxicity: None. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.

NKA

NICKEL ACETATE

Common Synonyms: Nickel acetate tetrahydrate Acetic acid Nickel (II) salt Nickelous acetate		Solid: Dull green Odorless Sinks and mixes slowly with water
Avoid contact with skin and eyes. Keep people away. No prolonged exposure. Isolate and remove discharged material. Notify local health and pollution control agencies.		
Fire	Not flammable	
Exposure	CALL FOR MEDICAL AID DUST Irritating to eyes, nose and throat. If inhaled will cause coughing or difficult breathing. If eyes, nose or skin are irritated with particles of water. If breathing apparatus and gloves are not available, use mouthpiece and breathing device over nose. SOLID Irritating to skin and eyes. If swallowed will cause nausea and vomiting. Remove from mouth with gloved fingers. Flush affected area with plenty of water. IF IN EYES: Flush with copious amounts of water. IF SWALLOWED: Do not induce vomiting. Give person 1 quart of water. IF SWALLOWED: Do not induce vomiting. Give person 1 quart of water. IF SWALLOWED: Do not induce vomiting. Give person 1 quart of water. IF SWALLOWED: Do not induce vomiting. Give person 1 quart of water.	
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and pollution control agencies.	
1. RESPONSE TO DISCHARGE See Response Methods Handbook, CG 446-1. Disperse and flush.		2. LABELS No hazard label required by Codes of Federal Regulations.
3. CHEMICAL DESIGNATIONS 31 Synonyms: Acetic acid Nickel(II) salt Nickel acetate tetrahydrate Nickelous acetate 32 Coast Guard Compatibility Classification: Not listed. 33 Chemical Formula: Ni(CH ₃ COO) ₂ ·4H ₂ O 34 IMCO/United Nations Numerical Designation: Not used.		4. OBSERVABLE CHARACTERISTICS 41 Physical State (as shipped): Solid 42 Color: Dull green 43 Odor: None
5. HEALTH HAZARDS 51 Personal Protective Equipment: Bu. Mines approved respirator, rubber gloves, safety goggles, protective clothing. 52 Symptoms Following Exposure: Inhalation causes irritation of nose and throat. Throat irritation causes vomiting. Contact with eyes causes irritation. May cause dermatitis on contact with skin. 53 Treatment for Exposure: INHALATION: remove to fresh air, get medical attention if exposure has been severe. INGESTION: give large amount of water. EYES: flush with water 15 min. consult physician if irritation persists. SKIN: wash with soap and water. 54 Toxicity by Inhalation (Threshold Limit Value): 1 mg/m ³ as nickel. 55 Short-Term Inhalation Limits: Data not available. 56 Toxicity by Ingestion: Grade 2 LD ₅₀ 0.5 g/kg. 57 Late Toxicity: Possible lung cancer. 58 Vapor (Gas) Irritant Characteristics: Data not available. 59 Liquid or Solid Irritant Characteristics: Data not available. 510 Odor Threshold: Data not available.

NOTES		

NAS

NICKEL AMMONIUM SULFATE

Common Synonyms: Ammonium nickel sulfate Ammonium nickel hexahydrate (II) Nickel ammonium sulfate hexahydrate	Solid Dark green blue Odorless Sinks and moves slowly with water
Fire	Not flammable POISONOUS GASES MAY BE PRODUCED WHEN HEATED
Exposure	CAUTION: Vapors Harmful DUST Irritating to eyes, nose and throat. If inhaled will cause coughing or difficulty breathing. If swallowed will cause nausea and vomiting. If swallowed will cause diarrhea. SOLID Irritating to skin and eyes. If swallowed will cause nausea and vomiting. If swallowed will cause diarrhea. IF SWALLOWED: Give large amount of water. IF IN EYES: Flush with water for at least 15 minutes. IF ON SKIN: Wash with soap and water.
Water Pollution	Effect of low concentrations on aquatic life unknown. May be dangerous if it enters water intakes.
1. RESPONSE TO DISCHARGE See Response Methods Handbook, CG 446-4. Disperse and flush.	2. LABELS See Hazard Label required by Code of Federal Regulations.
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Ammonium nickel sulfate hexahydrate (II); Ammonium nickel sulfate hexahydrate; Nickel ammonium sulfate hexahydrate 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: $\text{NiSO}_4 \cdot 6\text{H}_2\text{O}$ 3.4 I/MCO/United Nations Chemical Designation: Not listed	4. NBR

NICKEL BROMIDE

Common Synonyms Nickel bromide trihydrate		Solid Yellowish-green Odorless Sinks and mixes with water
Fire		Not flammable Irritating gases may be produced when heated
Exposure		DUST Irritating to eyes, nose and throat If inhaled will cause coughing and difficult breathing SOLID Irritating to skin and eyes If swallowed will cause nausea and vomiting
Water Pollution		Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Toxic warning - water contaminant Disperse and flush		2. LABELS No hazard label required by Code of Federal Regulations
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Nickel bromide trihydrate 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: $\text{NiBr} \cdot 3\text{H}_2\text{O}$ 3.4 IMCO/United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: Yellowish green 4.3 Odor: None
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Full Mines approved respirator, rubber gloves, face shield or safety goggles, protective clothing 5.2 Symptoms Following Exposure: Inhalation of dust causes irritation of nose and throat. Ingestion causes vomiting. Large amounts swallowed and not thrown up, it can cause drowsiness and other symptoms of bromide poisoning. Dust irritates eyes and may cause dermatitis in contact with skin. 5.3 Treatment for Exposure: INHALATION: move to fresh air, get medical attention. Exposure has been severe: INGESTION: give large amounts of water. EYES: flush with water for at least 15 min. SKIN: wash with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): 1 mg/m (as nickel) 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 2 LD ₅₀ 950 mg/kg 5.7 Late Toxicity: Possible lung cancer 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available

NKC

NICKEL CARBONYL

Common Synonyms: Nickel tetracarbonyl	Liquid Colorless to yellow Musty, stale odor Sinks in water. Poisonous, flammable vapor is produced.
Fire	FLAMMABLE POISONOUS GASES MAY BE PRODUCED IN FIRE Containers may explode in fire Flashback along vapor trail may occur Vapor may explode if ignited in an enclosed area
Exposure	VAPOR POISONOUS IF INHALED Irritating to eyes, nose and throat LIQUID POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED Will burn skin and eyes
Water Pollution	Effect of low concentrations on aquatic life is unknown May be dangerous if it covers water intakes
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 444-4) Issue warning: poison, high flammability a. Contaminant: water contaminant Restrict access Evacuate area Should be removed Chemical and physical treatment	2. LABELS 
2. CHEMICAL DESIGNATIONS 3.1 Synonyms: Nickel tetracarbonyl 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: Ni(CO)₄ 3.4 IMCO/United Nations Numerical Designation: 1.1, 1.2, 4	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless to yellow 4.3 Odor: Musty characteristic
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Self-contained breathing apparatus, complete protective clothing 5.2 Symptoms Following Exposure: Inhalation causes piddiness, headache, shortness of breath, vomiting, if victim is removed from exposure, symptoms may disappear, but recur 12-36 hours later, along with blue pallor of skin, fever, and cough; death may occur. Ingestion or contact with skin may also produce these symptoms. Abnormal nickel content of urine and blood is a measure of the severity of exposure. Contact of liquid with eyes causes severe irritation. 5.3 Treatment for Exposure: Medical help must be obtained following any exposure to vapor or liquid. INHALATION: oral administration of sodium diethyldithiocarbamate trihydrate (Dithiocarbamate) complete bed rest and positive pressure oxygen are indicated for pulmonary edema; treatment otherwise is symptomatic. EYES: flush with water for at least 15 min. SKIN: wipe off, wash with soap and water. INGESTION: do NOT induce vomiting. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.001 ppm 5.5 Short-Term Inhalation Limits: 0.04 ppm for 5 min 5.6 Toxicity by Ingestion: Data not available 5.7 Late Toxicity: May produce cancer 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause severe irritation of eyes and throat and can cause eye and lung injury. They cannot be tolerated even at low concentrations. 5.9 Liquid or Solid Irritant Characteristics: Severe skin irritant. Causes second- and third-degree burns on short contact and is very injurious to the eyes. 5.10 Odor Threshold: 1-1 ppm	

6. NICKEL CHLORIDE

Common Synonyms Nickel chloride hexahydrate		Solid	Green	Odorous
		Sinks and mixes with water		
Avoid contact with skin and eyes. If contact occurs, wash thoroughly with water. If swallowed, do not induce vomiting. Seek medical attention if symptoms persist.				
Fire	Not flammable			
Exposure	ACUTE TOXICITY DUST Irritating to eyes, nose and throat If inhaled will cause coughing or difficult breathing If swallowed will cause nausea and vomiting If swallowed will cause diarrhea and vomiting SOLID Irritating to skin and eyes If swallowed will cause nausea and vomiting If swallowed will cause diarrhea and vomiting EYES Irritating to eyes If swallowed will cause nausea and vomiting If swallowed will cause diarrhea and vomiting SKIN Irritating to skin and eyes If swallowed will cause nausea and vomiting If swallowed will cause diarrhea and vomiting			
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes Do not discharge into water bodies			
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Disperse and flush		2. LABELS No hazard label required by Code of Federal Regulations

NCN

NICKEL CYANIDE

Common Synonyms	Solid Light green or yellow-brown Weak almond odor Sinks in water
AVOID CONTACT WITH SKIN. IF CONTACT OCCURS, WASH IMMEDIATELY WITH WATER. IF CONTACT OCCURS WITH EYES, WASH IMMEDIATELY WITH WATER. IF CONTACT OCCURS WITH CLOTHING, REMOVE CLOTHING IMMEDIATELY.	
Fire	Not flammable
 Exposure	POISONOUS IF INHALED Irritating to eyes, nose and throat. May cause respiratory irritation. May cause dizziness and headache. May cause nausea and vomiting. POISONOUS IF SWALLOWED Irritating to skin and eyes. May cause nausea and vomiting. May cause dizziness and headache. May cause respiratory irritation.
Water Pollution	Dangerous to aquatic life in high concentrations. May be dangerous if it enters water intakes.
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 666-4) Issue warning: poison water Contain spillage. Remove excess. Should be removed. Chemical and physical treatment.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: No common synonyms. 3.2 Coast Guard Competibility Classification: Not applicable. 3.3 Chemical Formula: $\text{Ni(CN)}_2 \cdot 2\text{H}_2\text{O}$ 3.4 IMCO/United Nations Numerical Designation: 1503	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid. 4.2 Color: Anhydrous yellow-brown, hydrates pale green. 4.3 Odor: Weak characteristic cyanide.
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Dust mask, rubber gloves, goggles. 5.2 Symptoms Following Exposure: Inhalation of dust or ingestion can produce irritation, salivation, numbness of throat, anxiety, irregular respiration, rapid pulse, convulsions, loss of consciousness, paralysis, death. 5.3 Treatment for Exposure: Get medical help; first aid and treatment must be prompt. The compound is very soluble in water. If swallowed, induce vomiting. If inhaled, get fresh air. If on skin, flush with water. Avoid getting solution in mouth. IF INGESTION, start artificial respiration if breathing has stopped. Inhalation of amyl nitrite and intravenous doses of sodium nitrite and sodium thiosulfate should be administered by physician. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limit: 5 mg/m ³ for 30 min (as cyanide). 5.6 Toxicity by Ingestion: Data not available. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Not pertinent.	

6. NICKEL FLUOROBORATE

Common Synonyms: Nickel (II) Fluoroborate Nickel fluoroborate solution		Liquid Green Sink and mixes with water
VAPOR Irritating to eyes, nose and throat Harmful if inhaled		
Fire	Not flammable	
Exposure	LIQUID Irritating to skin and eyes If swallowed will cause nausea and vomiting	
Water Pollution	Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes	
1. RESPONSE TO DISCHARGE See Response Summary Handbook, CG 446-4 Issue warning - water contaminant Disperse and flush		2. LABELS No hazard label required by Code of Federal Regulations
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Nickel (II) Fluoroborate Nickel fluoroborate solution 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: $\text{NiF}_2 \cdot 6\text{H}_2\text{O}$ 3.4 IMCO/United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: light green 4.3 Odor: Data not available
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Safety glasses and face shield; rubber gloves; rubber apron 5.2 Symptoms Following Exposure: Irritation causes irritation of nose, throat, eyes, and skin and may cause dermatitis 5.3 Treatment for Exposure: INGESTION: give large amount of water; induce vomiting; get medical attention. IF ON SKIN: flush with water for at least 15 min. SKIN: flush with water 5.4 Toxicity by Inhalation (Threshold Limit Value): 1 mg/m ³ as dust 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 2 (LD ₅₀ 1.4 g/kg) 5.7 Late Toxicity: Possible lung cancer 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available		

6. FIRE HAZARDS

- 6.1 Flash Point: Not flammable

NICKEL FORMATE

Common Synonyms Nickel formate dihydrate		Solid	Green	Odorless
		Sinks and mixes with water		
ACUTE TOXICITY: LD₅₀ (Oral Rat) = 1.1 g/kg SKIN IRRITATION: Positive EYE IRRITATION: Positive Not irritating to fish or other aquatic life.				
Fire		Not flammable		
Exposure		CALL FOR MEDICAL AID DUST Irritating to eyes, nose and throat If inhaled will cause coughing or difficult breathing Dust causes eye irritation with watery discharge Rubbing may hasten passage of dust from eye Breathing is difficult if in vapor SOLID Irritating to skin and eyes If swallowed will cause nausea and vomiting Rubbing may hasten removal of solid If IN EYES, add copious amounts of water flush immediately If SWALLOWED, do not induce vomiting. Give victim drink water or milk If SWALLOWED, DO NOT INDUCE VOMITING UNLESS ADVISED BY PHYSICIAN		
Water Pollution		Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes Not classified as pollutant Not subject to regulation		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook CG 446-4) Disperse and flush		2. LABELS No hazard label required by Code of Federal Regulations		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Nickel formate dihydrate 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: Ni(HCOO) ₂ · 2H ₂ O 3.4 IMCO/United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: Greenish 4.3 Odor: None		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Bu Mines approved respirator; rubber gloves; face shield or safety goggles; protective clothing 5.2 Symptoms Following Exposure: Inhalation of dust causes irritation of nose and throat. Ingestion causes vomiting. Dust irritates eyes and may cause dermatitis in contact with skin 5.3 Treatment for Exposure: INHALATION: move to fresh air; get medical attention if exposure has been severe. INGESTION: give large amounts of water. EYE: Flush with water for at least 15 min. SKIN: flush with water 5.4 Toxicity by Inhalation (Threshold Limit Value): 1 mg/m ³ (as nickel) 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 2 LD ₅₀ > 5 g/kg 5.7 Late Toxicity: Possible lung cancer 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available				
6. FIRE HAZARDS 6.1 Flash Point: Not flammable 6.2 Flammable Limits in Air: Not flammable 6.3 Fire Extinguishing Agents: Not pertinent 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent 6.5 Special Hazards of Combustion Products: Irritating formic acid vapors may form in fire 6.6 Behavior in Fire: 6.7 Ignition Temperature: Not pertinent 6.8 Electrical Hazard: Not pertinent 6.9 Burning Rate: Not pertinent

NICKEL NITRATE

Common Synonyms Nickel nitrate hexahydrate		Solid	Green	Odorless										
		Sinks and mixes with water												
Avoid contact with solid and dust. Keep people away. Stop dust and fumes. Isolate area if dust is released. Notify local health and pollution control agencies.														
Fire	Not flammable Will increase the intensity of a fire POISONOUS GASES MAY BE PRODUCED WHEN HEATED Toxic fumes are given off when heated or in contact with water													
Exposure	CALL FOR MEDICAL AID DUST Irritating to eyes, nose and throat If inhaled will cause coughing or difficult breathing If on face, hold eyes closed and flush with plenty of water If on skin, has stopped, use artificial respiration if breathing is difficult, give oxygen SOLID Irritating to eyes If swallowed, use nausea and vomiting Repeat contact with plenty of water Flush throat with plenty of water If on skin, hold hands open and flush with plenty of water If SWALLOWED and victim is CONSCIOUS, have victim drink water or milk If SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS Do not induce vomiting except on doctor's order													
Water Pollution	Effect of low concentrations on aquatic life is unknown May be dangerous if it enters water intakes Notify local water and wildlife agencies Notify petries of water intakes													
1. RESPONSE TO DISCHARGE (See Response Methods Handbook CG 446-1) Disperse and flush		2. LABELS No hazard label required by Code of Federal Regulations												
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Nickel nitrate hexahydrate 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: Ni(NO ₃) ₂ ·6H ₂ O 3.4 IMCO/United Nations Numerical Designation: Not listed		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: Green 4.3 Odor: None												
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Buy Mines approved respirator, rubber gloves, face shield or safety goggles, protective clothing 5.2 Symptoms Following Exposure: Inhalation of dust causes irritation of nose and throat. Ingestion causes vomiting. Dust irritates eyes and may cause dermatitis in contact with skin 5.3 Treatment for Exposure: INHALATION: move to fresh air, get medical attention if exposure has been severe. INGESTION: give large amount of water. EYES: flush with water for at least 15 min. SKIN: wash with soap and water 5.4 Toxicity by Inhalation (Threshold Limit Value): 1 mg/m ³ (as nickel) 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 2, LD ₅₀ 0.5 g/kg 5.7 Late Toxicity: Possible lung cancer 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available

NIC

NICOTINE

Common Synonyms 1 Methyl 2 (3 pyridyl) pyridine 3 (1-acetyl 2 pyridyl) pyridine	Liquid Colorless to brown Fishy odor Mixes with water
Fire Combustible POISONOUS GASES ARE PRODUCED WHEN BURNED Irritating to eyes Irritating to skin Irritating to respiratory tract Water of foam may cause frothing	
 Exposure	LIQUID POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED Irritating to eyes Irritating to skin Irritating to respiratory tract If swallowed, drink plenty of water If swallowed, induce vomiting If swallowed, do not induce vomiting if unconscious
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water makes
1 RESPONSE TO DISCHARGE (See Response Manual Handbook CG 446-3) Issue warning: Poisonous water contaminant Restrict access Disperse and flush	2 LABEL 
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: 1 Methyl 2 (3 pyridyl) pyridine; 3 (1-acetyl 2 pyridyl) pyridine 3.2 Corrosion Compatibility Classification: Not applicable 3.3 Chemical Formula: C ₁₁ H ₈ N ₂ 3.4 IMC/United Nations Numerical Designation: 6.1 1654	4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless to brown 4.3 Odor: Fishy; develops apridine or tobacco like odor on exposure to air
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Goggles or face shield; rubber gloves; protective clothing 5.2 Symptoms Following Exposure: Inhalation: Cough, burning sensation in mouth and throat, nausea, headache, conjunctivitis, vomiting, dizziness. Contact with liquid irritates eyes and causes local irritation of skin. Can be absorbed through skin in small amounts. Ingestion causes burning of mouth and stomach, vomiting, excitement, faintness, paralysis of lungs. 5.3 Treatment for Exposure: Speed of treatment is important following exposure to this compound. Ingestion of as little as 40 mg can be fatal. EYES: Flush with water for at least 15 min. SKIN: Wash thoroughly and immediately with cold water. INGESTION: Call for physician at once. Give 6-8 tablepoons of activated charcoal slurry in water. Give artificial respiration if breathing has stopped. 5.4 Toxicity by Inhalation (Threshold Limit Value): 0.5 mg/m ³ 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 4 - oral LD ₅₀ = 52 mg/kg (rat); 1 mg/kg (human) 5.7 Late Toxicity: Birth defects (skeletal) in rats 5.8 Vapor (Gas) Irritant Characteristics: Vapors are nonirritating to eyes and throat 5.9 Liquid or Solid Irritant Characteristics: No appreciable hazard. Practically nonirritant to the skin 5.10 Odor Threshold: Data not available	

6 FIRE HAZARDS 6.1 Flash Point: Data not available 6.2 Flammable Limits in Air: 0.7% - 4.0% 6.3 Fire Extinguishing Agents: Dry chemical, alcohol foam, carbon dioxide 6.4 Fire Extinguishing Agents Not to be Used: Water or foam may cause frothing 6.5 Special Hazards of Combustion Products: Smoke may contain toxic vapors of unburned compound 6.6 Behavior in Fire: Not pertinent 6.7 Ignition Temperature: 471°F 6.8 Electrical Hazard: Data not available 6.9 Burning Rate: Data not available	8 WATER POLLUTION 8.1 Aquatic Toxicity: 3.29 ppm/* fish/toxic/fresh water *Time period not specified 8.2 Waterfowl Toxicity: 1 D ₅₀ = 58 mg/kg 8.3 Biological Oxygen Demand (BOD): Data not available 8.4 Food Chain Concentration Potential: None

NCS

NICOTINE SULFATE

Common Synonyms Neutral nicotine sulfate Black Leaf 40 (40% water solution)		Solid or solution	White to light brown solid or colorless solution	Odorless solid or tobacco odored solution
Mixes with water				
AVOID CONTACT WITH CHILDREN. KEEP FLOTT AWAY FROM CHILDREN. DO NOT INGEST. DO NOT SMOK. DO NOT USE IN FOODS.				
Fire		Not flammable. POISONOUS GASES MAY BE PRODUCED WHEN HEATED		
		ALL FORMS OF VAPOR OR DUST POISONOUS IF INHALED. May cause irritation of nose and throat. Liquid irritates eyes. LIQUID OR SOLID POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED. Irritating to eyes. If in eyes, flush with water. If on skin, wash with water. If swallowed, drink water. If inhaled, move to fresh air. IF SWALLOWED, DO NOT INDUCE VOMITING. IF INHALED, MOVE TO FRESH AIR.		
Exposure				
Water Pollution		HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS. May be dangerous if it enters water intakes. DO NOT DISPOSE OF IN WATER.		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook CG 444-4) Issue warning, poison, water contaminant. Restrict access. Disperse and flush.		2. LABEL 		
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Black Leaf 40 (40% water solution); Neutral nicotine sulfate. 3.2 Coast Guard Compatibility Classification: Not applicable. 3.3 Chemical Formula: $(C_{10}H_{14}N)_2 \cdot H_2SO_4$. 3.4 IMCO/United Nations Numerical Designation: 6.1/1658.		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid or water solution. 4.2 Color: Solid is off white to yellow tan; darkens on exposure to light. Water solution may be colorless. 4.3 Odor: Solid is odorless; water solution has odor of tobacco.		
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Dust mask, rubber gloves. 5.2 Symptoms Following Exposure: Inhalation causes irritation of nose and throat. Liquid irritates eyes and (on prolonged contact) skin. Ingestion causes burning of mouth and stomach, vomiting, excitement, faintness, paralysis of lungs. 5.3 Treatment for Exposure: EYES: flush with water. SKIN: wash thoroughly and immediately with water. INGESTION: call for medical aid; induce immediate and repeated vomiting; perform gastric lavage with dilute (1:10,000) solution of potassium permanganate or activated charcoal in water. If milk, apply artificial respiration if breathing has stopped. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 3 oral LD ₅₀ = 55 mg/kg rats. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Not pertinent.				

6 FIRE HAZARDS 6.1 Flash Point: Nonflammable as solid or water solution 6.2 Flammable Limits in Air: Not pertinent 6.3 Fire Extinguishing Agents: Not pertinent 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent 6.5 Special Hazards of Combustion Products: Toxic decomposition products are released in a fire 6.6 Behavior in Fire: Not pertinent 6.7 Ignition Temperature: Not pertinent 6.8 Electrical Hazard: Not pertinent 6.9 Burning Rate: Not pertinent	8. WATER POLLUTION 8.1 Aquatic Toxicity: 1.29 ppm/* fish toxic, fresh water (for nicotine) *Time period not specified 8.2 Waterlow Toxicity: LD₅₀ = 587 mg/kg (for nicotine) 8.3 Biological Oxygen Demand (BOD): Data not available 8.4 Food Chain Concentration Potential: None
7 CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction 7.2 Reactivity with Common Materials: No reaction 7.3 Stability During Transport: Stable 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent 7.5 Polymerization: Not pertinent 7.6 Inhibitor of Polymerization: Not pertinent	9. NOTES

NTL

NITRALIN

Common Synonyms 4-(Methylsulfonyl)-2,6-dinitro-N,N-dipropylamine Planavim		Solid Sinks in water	Light yellow to orange Mild odor
AVOID CONTACT WITH SOLID AND DUST. KEEP PEOPLE AWAY. Wear clothes self-contained breathing apparatus and gloves. Wash thoroughly after use. No discharge to water. Do not eat, drink, or smoke. Life and limb are threatened if swallowed. No oral LD ₅₀ and no other data.			
Fire	Combustible Irritating gases are produced when heated Containers may explode in fire Gases may be toxic if inhaled Gases may be irritating if inhaled		
	CAUTION FOR MEDICAL AID DUST POISONOUS IF INHALED May irritate eyes, nose, and throat. SOLID POISONOUS IF SWALLOWED Irritating to skin and eyes Wash thoroughly with soap and water. Do not eat, drink, or smoke. Life and limb are threatened if swallowed. No oral LD ₅₀ and no other data.		
Exposure	POISONOUS IF SWALLOWED Irritating to skin and eyes Wash thoroughly with soap and water. Do not eat, drink, or smoke. Life and limb are threatened if swallowed. No oral LD ₅₀ and no other data.		
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. No data available.		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Issue warning: poison water contaminant Restrict access Should be removed Chemical and physical treatment		2. LABELS No label required by Code of Federal Regulations	
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: 4-(methylsulfonyl)-2,6-dinitro-N,N-dipropylamine; Planavim 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: C ₁₁ H ₁₄ N ₂ O ₄ S 3.4 IMCO/United Nations Numerical Designation: 6.1 1699		4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: Light yellow to orange 4.3 Odor: Mild chemical	
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Dust mask, rubber gloves 5.2 Symptoms Following Exposure: Dust irritates eyes. Other forms of exposure produce no observable symptoms. 5.3 Treatment for Exposure: No cases of clinical toxicity on record. Supportive and symptomatic medical treatment recommended if massive overexposure occurs. EYES: flush with water if irritation occurs. SKIN: wash with soap and water. INGESTION: induce vomiting. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Not pertinent 5.6 Toxicity by Ingestion: Grade 2, oral LD ₅₀ > 2,000 mg/kg (rat) 5.7 Late Toxicity: None observed 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available

NOTES (Continued on pages 5 and 6)	

NAC

NITRIC ACID

Common Synonyms	Watery liquid Colorless to light brown Choking odor
	Sinks and mixes with water. Harmful vapor is produced.
AVOID CONTACT WITH FLAMMABLE AND TOXIC SUBSTANCES	
Fire	Not flammable May cause fire on contact with combustibles. Flammable gas may be formed on contact with metals. Poisonous gases are produced when heated.
Exposure	GAS VAPOR Will burn eyes, nose and throat. If inhaled, will cause difficult breathing or loss of consciousness. May cause pulmonary edema. LIQUID Will burn skin and eyes. Harmful if swallowed. Reacts with organic materials. HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS. If swallowed, drink large volume of water. Do NOT induce vomiting.
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS. May be dangerous if it enters water makes
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Toxic, watery, not corrosive. Restrict access. Evacuate area. Disperse and flush.	2. LABELS  
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: No common synonyms. 3.2 Coast Guard Compatibility Classification: Nitric acid. 3.3 Chemical Formula: HNO_3 (4.0) 3.4 IMCO United Nations Numerical Designation: N.O. 2031	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Acid, sweet to acid
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Air mask, rubber acid suit, hood, boots and gloves, chemical goggles, safety shower and eye bath. 5.2 Symptoms Following Exposure: Vapors irritate eyes and respiratory tract. Lung injury may not become apparent for several hours following exposure. Liquid may cause severe burns to eyes and skin. 5.3 Treatment for Exposure: INHALATION: remove to fresh air, administer artificial respiration if required. INGESTION: drink large volume of water, do NOT induce vomiting. EYES: flush with water for at least 15 min. 5.4 Toxicity by Inhalation (Threshold Limit Value): 2 ppm 5.5 Short-Term Inhalation Limits: 15 ppm for 5 min 5.6 Toxicity by Ingestion: Grade 3.1 Dose 500 mg/kg 5.7 Late Toxicity: None 5.8 Vapor (Gas) Irritant Characteristics: 5.8% Vapor is moderately irritating such that personnel will not usually tolerate moderate or high vapor concentrations. 95% Vapors cause severe irritation of eye and throat and can cause eye and lung injury. They cannot be tolerated even at low concentrations. 5.9 Liquid or Solid Irritant Characteristics: Severe skin irritant. Causes second- and third-degree burns on short contact and is very injurious to the eyes. 5.10 Odor Threshold: Data not available.	

6. FIRE HAZARDS 6.1 Flash Point: Not flammable 6.2 Flammable Limits in Air: Not flammable 6.3 Fire Extinguishing Agents: Use water on adjacent fires. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent 6.5 Special Hazards of Combustion Products: May give off poisonous oxides of nitrogen and acid fumes when heated in fires. 6.6 Behavior in Fire: Decomposes and gives off poisonous oxides of nitrogen. 6.7 Ignition Temperature: Not flammable 6.8 Electrical Hazard: Not pertinent 6.9 Burning Rate: Not flammable	8. WATER POLLUTION 8.1 Aquatic Toxicity: 22 ppm 96 hr LC50 to fish. 11 mg/l fresh water. 500 (100) ppm 48 hr LC50 to EC50 salt water. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): None 8.4 Food Chain Concentration Potential: None																												
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: May heat up on mixing, but explosion or formation of steam unlikely. 7.2 Reactivity with Common Materials: Very corrosive to wood, paper, cloth and most metals. Toxic red oxides of nitrogen are formed. 7.3 Stability During Transport: When heated may give off toxic red oxides of nitrogen. 7.4 Neutralizing Agents for Acids and Caustics: Flush with water. 7.5 Polymerization: Not pertinent 7.6 Inhibitor of Polymerization: Not pertinent	9. SELECTED MANUFACTURERS 1. Allied Chemical Corp. Agricultural Division Morristown, N.J. 07960 2. E. I. duPont de Nemours & Co., Inc. Explosives Dept. Wilmington, Del. 19898 3. Hercules Inc. REVISED 1978

NTX

NITRIC OXIDE

Common Synonyms Mononitrogen monoxide Nitrogen monoxide		Compressed gas Colorless Sharp unpleasant odor Reacts with water. Poisonous red brown vapor cloud is produced.
SAFETY DATA SHEET SECTION 1 - IDENTIFICATION SECTION 2 - HAZARDS SECTION 3 - COMPOSITION SECTION 4 - FIRST AID SECTION 5 - PREVENTION SECTION 6 - CONTROL SECTION 7 - PROTECTION SECTION 8 - STORAGE SECTION 9 - DISPOSAL SECTION 10 - INFORMATION		
Fire	Not flammable	
	VAPOR POISONOUS IF INHALED Irritating to eyes, nose and throat	
Exposure		
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes.	
1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 448-4) Issue warning: poison, air contaminant Restrict access Evacuate area		2 LABEL 
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Mononitrogen monoxide Nitrogen monoxide 3.2 Corrosion/Compatibility Classification: Not applicable 3.3 Chemical Formula: NO 3.4 IMCO/United Nations Numerical Designation: 2.1NF0		4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Compressed gas 4.2 Color: Colorless, but becomes red brown on contact with air because of formation of nitrogen tetroxide 4.3 Odor: (nitrogen tetroxide) Pungent, acid, mildly irritating
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Self-contained breathing apparatus or gas mask with universal canister 5.2 Symptoms Following Exposure: Continued inhalation of low concentrations causes chronic irritation, cough, headache, corrosion of teeth, loss of strength. Symptoms from overexposure to higher concentrations (which may be delayed for 6-24 hours) include irritation of nose and throat, tightness in chest, difficult breathing, pallor, loss of consciousness, and death. Pulmonary edema occurs. If patient recovers, pneumonia may develop. 5.3 Treatment for Exposure: Get medical attention at once following inhalation of this gas. INHALATION: If breathing has stopped, give artificial respiration with 100% oxygen, keep victim quiet and warm, keep head and chest lower than hips, to aid in drainage from lungs; alert physician to possibility of delayed pulmonary edema during 6-24 hours. 5.4 Toxicity by Inhalation (Threshold Limit Value): 25 ppm 5.5 Short-Term Inhalation Limits: <100 ppm 60 min.; <150 ppm 30 min.; <200 ppm 15 min. 5.6 Toxicity by Ingestion: Not pertinent (gas at normal temperatures) 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available		

6 FIRE HAZARDS 6.1 Flash Point: Not pertinent (nonflammable compressed gas) 6.2 Flammable Limits in Air: Not pertinent 6.3 Fire Extinguishing Agents: Not pertinent 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent 6.5 Special Hazards of Combustion Products: Not pertinent 6.6 Behavior in Fire: Supports combustion; small fires burn more vigorously 6.7 Ignition Temperature: Not pertinent 6.8 Electrical Hazard: Not pertinent 6.9 Burning Rate: Not pertinent	8 WATER POLLUTION 8.1 Aquatic Toxicity: Data not available 8.2 Waterflow Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): Not pertinent 8.4 Food Chain Concentration Potential: None
7 CHEMICAL REACTIVITY 7.1 Reactivity with Water: Reacts with water to form nitric acid. The reaction is not violent. 7.2 Reactivity with Common Materials: Reacts rapidly with air to form nitrogen tetroxide (see this compound) 7.3 Stability During Transport: Stable 7.4 Neutralizing Agents for Acids and Caustics: Flood with water; mix with sodium bicarbonate or lime solution 7.5 Polymerization: Not pertinent 7.6 Inhibitor of Polymerization: Not pertinent	9 SELECTED MANUFACTURERS 1 Matheson Gas Product P.O. NOTES

NAL

4-NITROANILINE

Common Synonyms p-Nitroaniline 1-Amino-4-nitrobenzene Arac Datas Component 37 Fast Red G base Fast Red G base PNA	Solid Yellow Mild Odor Insoluble in water
Fire	Combustible POISONOUS GASES MAY BE PRODUCED IN FIRE. Waxes, resins, and other materials may be produced in fire.
Exposure	ALL FOR MEDICAL USE DUST POISONOUS IF INHALED If inhaled will cause headache, coughing, difficult breathing, or loss of consciousness. SOLID Irritating to skin and eyes. If swallowed will cause headache, coughing, or loss of consciousness.
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intakes.
1. RESPONSE TO DISCHARGE (See "Emergency Response Procedures" CG 446-4) Issue warning: poison, water contaminant. Restrict access. Should be removed. Chemical and physical treatment.	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: 1-Amino-4-nitrobenzene, Arac Datas Component 37, Fast Red G base, Fast Red G base, p-Nitroaniline, PNA. 3.2 Coast Guard Competibility Classification: Not listed. 3.3 Chemical Formula: $C_6H_5NO_2$. 3.4 IM/O/United Nations Numerical Designation: 6.1 (601).	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid. 4.2 Color: Yellow. 4.3 Odor: Faint ammonia, slightly pungent.
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Re: Mines duty, canister, rubber gloves, chemical safety goggles, face shield, rubber safety shoes. 5.2 Symptoms Following Exposure: Inhalation or ingestion causes headache, drowsiness, shortness of breath, nausea, methemoglobinemia, and unconsciousness. Fingernails, lips, and ears become bluish; prolonged and excessive exposures may also cause liver damage. Contact with eyes causes irritation and possible corneal damage. Contact with skin causes irritation; continued exposure may cause same symptoms as inhalation or ingestion. 5.3 Time to Act for Exposure: INHALATION: remove victim to fresh air, administer oxygen if received, get medical attention. INGESTION: induce vomiting, get medical attention. EYES: flush with water for at least 15 min. SKIN: flush with water, wash with soap and water, be sure that no compound remains in the hair or under the fingernails. 5.4 Toxicity by Inhalation (Threshold Limit Value): 1 ppm. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 2, LD ₅₀ 0.5 g/kg. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Data not available. 5.9 Liquid or Solid Irritant Characteristics: Data not available. 5.10 Odor Threshold: Data not available.

NOTES

NTB

NITROBENZENE

Common Synonyms: Nitrobenzol	Oils liquid. Light yellow to brown. Almond or shoe polish odor. Sinks in water. Freezing point is 41°F.
Fire	Combustible. POISONOUS VAPOR IS PRODUCED WHEN HEATED.
 Exposure	LIQUID POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED. Will burn eyes.
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS. May be dangerous if it enters water intakes.
1 RESPONSE TO DISCHARGE See Response Methods Handbook, CG 446-1. Issue warning: poison. Restrict access. Should be removed. Chemical and physical treatment.	2. LABEL 
3 CHEMICAL DESIGNATIONS 31 Synonyms: Essence of Mirbane. Nitrobenzol. Oil of Mirbane. 32 Coast Guard Compatibility Classification: Nitrocompounds. 33 Chemical Formula: C ₆ H ₅ NO. 34 IMCO United Nations Numerical Designation: 6.1-1662.	4. OBSERVABLE CHARACTERISTICS 41 Physical State (as shipped): Liquid. 42 Color: Light greenish yellow. 43 Odor: Sweet, shoe polish.
5. HEALTH HAZARDS 51 Personal Protective Equipment: Respirator approved by U.S. Bureau of Mines for organic vapors; rubber gloves; splashproof goggles; eye wash fountain; safety shower; and medical oxygen supply. 52 Symptoms Following Exposure: If phosgene when absorbed through the skin, inhalation vapor swallowed. First symptoms are a blue discoloration of the face and skin. Swelling of the face produces headache, giddiness, weakness, nausea, vomiting and diarrhea. 53 Treatment for Exposure: Remove to fresh air and call physician at once. In case of small amount, flush with copious amounts of water for at least 15 min. If vomiting (blue foam) is present, follow with copious and warm water, with special attention to stomach and large intestine. Administer oxygen until physician arrives. 54 Toxicity by Inhalation (Threshold Limit Value): 1 ppm. 55 Short-Term Inhalation Limits: 10 ppm for 15 min. 56 Toxicity by Ingestion: Grade 3. Moderate toxicity. 57 Late Toxicity: Data not available. 58 Vapor (Gas) Irritant Characteristics: Vapor is moderately irritating to the skin but perfume will not usually irritate mucous membranes at concentrations. 59 Liquid or Solid Irritant Characteristics: Causes smarting on the skin and first degree burns on short exposure; may cause secondary burns on long exposure. 510 Odor Threshold: 1.94 ppm.	

6 FIRE HAZARDS 61 Flash Point: 171°F (77°C) (190°F (88°C)) 62 Flammable Limits in Air: 1.4-11.1 (LFL not available) 63 Fire Extinguishing Agents: Water, foam, carbon dioxide or dry chemical. 64 Fire Extinguishing Agents Not to be Used: Not pertinent. 65 Special Hazards of Combustion Products: Not pertinent. 66 Behavior in Fire: Not pertinent. 67 Ignition Temperature: 924°F. 68 Electrical Hazard: Not pertinent. 69 Burning Rate: 2.9 mm/min.	8 WATER POLLUTION 81 Aquatic Toxicity: 20 ppm 6-hr. minimum lethal, fresh water. 82 Waterfowl Toxicity: Data not available. 83 Biological Oxygen Demand (BOD): 0% in 5 days. 84 Food Chain Concentration Potential: None.

NTE

NITROETHANE

Common Synonyms		Liquid	Colorless	Fruity Odor
		May float or sink in water		
Fire		Combustible POISONOUS GASES MAY BE PRODUCED IN FIRE. Containers may explode in fire. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area.		
Exposure		VAPOR Irritating to eyes, nose and throat. If inhaled will cause coughing or difficult breathing. LIQUID Irritating to skin and eyes. If swallowed will cause nausea and vomiting.		
Water Pollution		Effect of low concentrations on aquatic life is unknown. Toxic to shoreline. May be dangerous if it enters water intakes.		
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-1) Issue warning: high flammability. Restrict access. Disperse and flush.		2. LABEL 		
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: No common synonyms. 3.2 Coast Guard Compatibility Classification: Not listed. 3.3 Chemical Formula: CH_3CHNO 3.4 IMCO/United Nations Numerical Designation: Not listed.		4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Colorless. 4.3 Odor: Mild, fruity, somewhat disagreeable, acetone-like.		
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Supplied air or self-contained respiratory, goggles or face shield, rubber gloves. 5.2 Symptoms Following Exposure: Inhalation causes moderate irritation of respiratory tract. Ingestion causes irritation of mouth and stomach. Contact with liquid causes irritation of eyes and mild irritation of skin. 5.3 Treatment for Exposure: INHALATION: in case of pulmonary symptoms, give bed rest and oxygen; obtain medical attention at once. INGESTION: give large amount of water. EYES: wash with water. 5.4 Toxicity by Inhalation (Threshold Limit Value): 100 ppm. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 2 oral LD_{50} (mice) 1.5 g/kg. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause moderate irrit. even such that personnel with first high concentration unpleasant. The effect is respiratory. 5.9 Liquid or Solid Irritant Characteristics: Minimum hazard. If spilled on clothing and allowed to remain, may cause irritating and reddening of skin. 5.10 Odor Threshold: 100 ppm.				

6 FIRE HAZARDS

- 6.1 Flash Point: 105°F (40.5°C) (CC)
- 6.2 Flammable Limits in Air: 1.4 - 11.1%
- 6.3 Fire Extinguishing Agents: foam, carbon dioxide, or dry chemical
- 6.4 Fire Extinguishing Agents Not to be Used: Water may be ineffective; foam may be ineffective.
- 6.5 Special Hazards of Combustion Products: Toxic oxides; nitrogen may form nitric
- 6.6 Behavior in Fire:
- 6.7 Ignition Temperature: 775°F
- 6.8 Electrical Hazard: Data not available
- 6.9 Burning Rate: Data not available

8 WATER POLLUTION

- 8.1 Aquatic Toxicity: Data not available
- 8.2 Invertebrate Toxicity: Data not available
- 8.3 Biological Oxygen Demand (BOD): Data not available
- 8.4 Food Chain Concentration Potential: None

Continued on pages 7 and 8 NOTES	

NOX	NITROGEN TETROXIDE
------------	-----------------------------

Common Synonyms Nitrogen peroxide Nitrogen dioxide Red oxide of nitrogen Oxides of nitrogen Dinitrogen tetroxide	Liquefied compressed gas Red-brown Sharp unpleasant chemical odor Sinks and reacts with water. Poisonous brown vapor is produced.
AVOID CONTACT WITH LIQUID AND VAPOR. Keep people away from gaseous or liquid material breathing apparatus and full body protective clothing (including a SCBA). Notify fire department if large fire occurs. Notify local health and pollution control authorities.	
Fire	Not flammable. May cause fire and explode on contact with combustible. POISONOUS GASES ARE PRODUCED IN FIRE AND WHEN HEATED. Wear goggles, self-contained breathing apparatus and full body protective clothing in fire. Do not direct water stream with water. Stop flow of gas if liquid. Do not use water on fires with water.
 Exposure	CALL FOR MEDICAL AID. VAPOR POISONOUS IF INHALED. Irritating to eyes. May cause blindness. If in eyes, flush with plenty of water. If in mouth, do not swallow. Rinse with water. LIQUID Will burn skin and eyes. POISONOUS IF SWALLOWED. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. If IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED, give first aid as recommended for acids and alkalis. DO NOT INDUCE VOMITING.
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS. May be dangerous if it enters water intakes. Notify local health and pollution authorities. Notify port and coastal authorities.
1. RESPONSE TO DISCHARGE (See Response Methods Manual, U.S. 446-41) Toxic warning, poison or contaminant, water contamination, corrosive. Restrict access. Evacuate area.	2. LABELS  
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Dinitrogen tetroxide, Nitrogen peroxide, Nitrogen dioxide, Oxide of nitrogen, Red oxide of nitrogen. 3.2 Coast Guard Compatibility Classification: Not applicable. 3.3 Chemical Formula: N₂O₄. 3.4 IMCO/United Nations Numerical Designation: 2.1067.	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid. 4.2 Color: Red-brown at ambient temperatures, colorless below about 14°F. 4.3 Odor: Pungent, acid, mildly irritating.
5. HEALTH HAZARDS 5.1 Personal Protective Equipment: Rubber gloves, safety goggles and face shield, protective clothing, acid gas, mist respirator or self-contained breathing apparatus. 5.2 Symptoms Following Exposure: Very concentrated fumes produce coughing, choking, headache, nausea, pain in chest and abdomen; otherwise, few symptoms appear at time of exposure. After symptoms free period of 5-72 hours, pulmonary edema gradually develops, causing fatigue, restlessness, coughing, difficulty in breathing, frothy expectoration, mental confusion, labored, bluish skin and weak, rapid pulse. Since NOX interferes with gas exchange in lungs, unconsciousness and death by asphyxiation can result, usually within a few hours after onset of pulmonary edema. 5.3 Treatment for Exposure: INHALATION: remove patient to fresh air and have him breathe as deeply as possible until a doctor enforces complete rest for 24-48 hours. Keep warm, give oxygen, coughing of mucus may administer morphine (10 mg.). EYES AND SKIN: flush with water for at least 15 min. 5.4 Toxicity by Inhalation (Threshold Limit Value): 5 ppm. 5.5 Short-Term Inhalation Limits: 25 ppm for 5 min. 5.6 Toxicity by Ingestion: Data not available. 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Vapors cause severe irritation of eyes and throat and can cause eye and lung injury. They cannot be tolerated even at low concentrations. 5.9 Liquid or Solid Irritant Characteristics: Severe skin irritant. Causes second- and third degree burns on skin contact and is very injurious to the eyes. 5.10 Odor Threshold: 5 ppm.	

6. FIRE HAZARDS 6.1 Flash Point: Not flammable. 6.2 Flammable Limits in Air: Not flammable. 6.3 Fire Extinguishing Agents: Stop flow of gas. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Produces toxic gas when heated. 6.6 Behavior in Fire: Does not burn, but supports combustion of combustible materials, such as wood. May cause fire or explosion on contact with other materials. 6.7 Ignition Temperature: Not flammable. 6.8 Electrical Hazard: Data not available. 6.9 Burning Rate: Not flammable.	8. WATER POLLUTION 8.1 Aquatic Toxicity: 72 ppm/96 hr. toxic to fish. 11 mg. fresh water. 130-1,000 ppm. 48 hr. toxic to LC₅₀ salt water. 8.2 Waterfowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): None. 8.4 Food Chain Concentration Potential: None.																																				
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: Dissolves to form nitric acid and nitrous oxide. Nitric oxide reacts with air to form more nitrogen tetroxide. 7.2 Reactivity with Common Materials: Very corrosive to metals when wet. Reacts vigorously with combustible materials, such as wood. 7.3 Stability During Transport: Stable. 7.4 Neutralizing Agents for Acids and Caustics: Flush with water, then use soda ash or lime. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.																																					
9. SELECTED MANUFACTURERS Hercules Inc. Explosives and Chemical Propulsion Dept. Hercules Co. 194547																																					
10. SHIPPING INFORMATION 10.1 Grades or Purity: 10.2 Storage Temperature, Ambient: Storage and transfer structures shall be equipped with mechanical ventilation systems. 10.3 Inert Atmosphere: No requirement. 10.4 Venting: Pressure relief valves on containers.																																					
11. HAZARD ASSESSMENT CODE (See Hazard Assessment Handbook, CG-46-3) A110	13. PHYSICAL AND CHEMICAL PROPERTIES 13.1 Physical State at 15°C and 1 atm: Liquid or gas. 13.2 Molecular Weight: 92.02. 13.3 Boiling Point at 1 atm: 79.7°F = 21.2°C = 294 K. 13.4 Freezing Point: 11.4°F = -11.2°C = 262°K. 13.5 Critical Temperature: 317.0°F = 158.2°C = 431.4°K. 13.6 Critical Pressure: 1470 psia = 107 atm = 10.7 MN/m². 13.7 Specific Gravity: 1.45 at 20°C (liquids). 13.8 Liquid Surface Tension: Not pertinent. 13.9 Liquid-Water Interfacial Tension: Not pertinent. 13.10 Vapor (Gas) Specific Gravity: 3.2. 13.11 Ratio of Specific Heats of Vapor (Gas): (test value). 13.12 Latent Heat of Vaporization: 178 Btu/lb = 99.1 cal/g = 4.15 x 10³ J/kg. 13.13 Heat of Combustion: Not applicable. 13.14 Heat of Decomposition: Not pertinent. 13.15 Heat of Solution: Data not available. 13.16 Heat of Polymerization: Not pertinent.

NMT

NITROMETHANE

Common Synonyms Nitrocarbol	Waters Insol. Colorless Strong odor Sinks and mixes slowly with water. Irritating vapor is produced.
Fire	FLAMMABLE Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Exposure VAPOR Irritating to eyes, nose and throat. Harmful if inhaled. LIQUID No appreciable harm to skin or eyes. Harmful if swallowed.
Water Pollution	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. 1 RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Dispose and flush.
3 CHEMICAL DESIGNATIONS 3.1 Synonyms: Nitrocarbol 3.2 Coast Guard Compatibility Classification: Not applicable 3.3 Chemical Formula: CH_3NO_2 3.4 IMCO/United Nations Numerical Designation: 1.1 (26)	2. LABEL 
5 HEALTH HAZARDS 5.1 Personal Protective Equipment: Air mask (do NOT use organic canisters); goggles. 5.2 Symptoms Following Exposure: Liquid may dry out skin and cause irritation. 5.3 Treatment for Exposure: EYES: flush with water for at least 15 min. SKIN: flush with water. 5.4 Toxicity by Inhalation (Threshold Limit Value): 100 ppm. 5.5 Short-Term Inhalation Limits: Data not available. 5.6 Toxicity by Ingestion: Grade 2 (Do NOT swallow; kg trait). 5.7 Late Toxicity: Data not available. 5.8 Vapor (Gas) Irritant Characteristics: Vapor causes slight stinging of the eyes or respiratory system if present in high concentrations. The effect is temporary. 5.9 Liquid or Solid Irritant Characteristics: No appreciable hazard. Practically harmless to the skin. 5.10 Odor Threshold: Less than 200 ppm.	4 OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Fairly strong characteristic.

6 FIRE HAZARDS 6.1 Flash Point: 110°F (40.95°C) 6.2 Flammable Limits in Air: 7.3% (LFL) 6.3 Fire Extinguishing Agents: Water, foam, dry chemical, carbon dioxide. 6.4 Fire Extinguishing Agents Not to be Used: Not pertinent. 6.5 Special Hazards of Combustion Products: Not pertinent. 6.6 Behavior in Fire: Containers may explode. 6.7 Ignition Temperature: 785°F 6.8 Electrical Hazard: Not pertinent. 6.9 Burning Rate: 1.1 mm/min.	8 WATER POLLUTION 8.1 Aquatic Toxicity: Data not available. 8.2 Water-bowl Toxicity: Data not available. 8.3 Biological Oxygen Demand (BOD): Data not available. 8.4 Food Chain Concentration Potential: None.								
7. CHEMICAL REACTIVITY 7.1 Reactivity with Water: No reaction. 7.2 Reactivity with Common Materials: Wet material corrodes steel and copper, but the reaction is slow. 7.3 Stability During Transport: Considered stable, but may become sensitized by organic bases (amines) and some metal oxides, such as lead pigments. 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent. 7.5 Polymerization: Not pertinent. 7.6 Inhibitor of Polymerization: Not pertinent.	9 SELECTED MANUFACTURERS Commercial Solvents Corp. 245 Park Ave. New York, N.Y. 10017.

NTP

2-NITROPHENOL

Common Synonyms o-Nitrophenol 2-Hydroxynitrobenzene ONP	
Solid	Yellow
Sinks and mixes slowly with water	
1. HAZARD IDENTIFICATION 2. HAZARD STATEMENT 3. HAZARD PICTURE	
Fire	Combustible POISONOUS GASES MAY BE PRODUCED IN FIRE
Exposure	4. HAZARD IDENTIFICATION 5. HAZARD STATEMENT 6. HAZARD PICTURE
Water Pollution	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS May be dangerous if it enters water intake
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Toxic warning - water contaminant Should be removed Chemical and physical treatment	2. LABELS No hazard label required by Code of Federal Regulations
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: 2-Hydroxynitrobenzene o-Nitrophenol ONP 3.2 Coast Guard Compatibility Classification: Not listed 3.3 Chemical Formula: $C_6H_5NO_2$ 3.4 IMCO/United Nations Numerical Designation: 6.1 1663	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Solid 4.2 Color: Yellow 4.3 Odor: Peculiar aromatic
5. HEALTH HAZARDS	
5.1 Personal Protective Equipment: Self-contained breathing apparatus, gloves, rubber gloves, goggles 5.2 Symptoms Following Exposure: Inhalation or ingestion causes headache, drowsiness, nausea and blue color in lips, ears, and fingernails (cyanosis). Contact with eyes causes irritation. Can be absorbed through the intact skin to give same symptoms as for inhalation. 5.3 Treatment for Exposure, INHALATION or INGESTION: remove victim to fresh air, give artificial respiration if needed or if symptoms persist. EYES: flush with water for at least 15 min., get medical attention. SKIN: cleanse thoroughly with soap and water. 5.4 Toxicity by Inhalation (Threshold Limit Value): Data not available 5.5 Short-Term Inhalation Limits: Data not available 5.6 Toxicity by Ingestion: Grade 2 oral LD₅₀ = 1,297 mg/kg rats 5.7 Late Toxicity: Data not available 5.8 Vapor (Gas) Irritant Characteristics: Data not available 5.9 Liquid or Solid Irritant Characteristics: Data not available 5.10 Odor Threshold: Data not available	

6. FIRE HAZARDS	
6.1 Flash Point: Not pertinent (combustible solid) 6.2 Flammable Limits in Air: Not pertinent 6.3 Fire Extinguishing Agents: Water, foam, dry chemical, carbon dioxide 6.4 Fire Extinguishing Agents Not to be Used: 6.5 Special Hazards of Combustion Products: Toxic and irritating fumes of unburned material and oxides of nitrogen can form in fire. 6.6 Behavior in Fire: 6.7 Ignition Temperature: Data not available 6.8 Electrical Hazard: Not pertinent 6.9 Burning Rate: Not pertinent	
7. CHEMICAL REACTIVITY	
7.1 Reactivity with Water: No reaction 7.2 Reactivity with Common Materials: 7.3 Stability During Transport: Stable 7.4 Neutralizing Agents for Acids and Caustics: Not pertinent 7.5 Polymerization: Not pertinent 7.6 Inhibitor of Polymerization: Not pertinent	
8. WATER POLLUTION	
8.1 Aquatic Toxicity: 46.3 NT6 ppm, 48 hr, bluegill, 11 m, fresh water 8.2 Waterway Toxicity: Data not available 8.3 Biological Oxygen Demand (BOD): 4.2 m 0.94 days, acclimated culture 8.4 Food Chain Concentration Potential: None	
9. SELECTED MANUFACTURERS

10. SHIPPING INFORMATION	
10.1 Grades or Purities: Commercial Pure 10.2 Storage Temperature: Ambient 10.3 Inert Atmosphere: No requirement 10.4 Venting: Open	
11. HAZARD ASSESSMENT CODE	
(See Hazard Assessment Handbook, CG 446-3) II	
12. HAZARD CLASSIFICATIONS	
12.1 Code of Federal Regulations: Not listed 12.2 NAS Hazard Rating for Bulk Water Transportation: Not listed 12.3 NFPA Hazard Classifications: Not listed	
13. PHYSICAL AND CHEMICAL PROPERTIES	
13.1 Physical State at 15°C and 1 atm: Solid 13.2 Molecular Weight: 139.1 13.3 Boiling Point at 1 atm: 417°F = 215°C = 457°K 13.4 Freezing Point: 111°F = 44°C = 313°K 13.5 Critical Temperature: Not pertinent 13.6 Critical Pressure: Not pertinent 13.7 Specific Gravity: 1.49 at 20°C (solid) 13.8 Liquid Surface Tension: Not pertinent 13.9 Liquid-Water Interfacial Tension: Not pertinent 13.10 Vapor (Gas) Specific Gravity: Not pertinent 13.11 Ratio of Specific Heats of Vapor (Gas): Not pertinent 13.12 Latent Heat of Vaporization: Not pertinent 13.13 Heat of Combustion: -8,910 Btu/lb = -4,950 cal/g = -207 x 10³ J/kg 13.14 Heat of Decomposition: Not pertinent 13.15 Heat of Solution: Not pertinent 13.16 Heat of Polymerization: Not pertinent	
NOTES	

NPP

2-NITROPROPANE

Common Synonyms Isopropyl nitrate 2-NP sec-Nitropropane	Liquid Colorless Mild, fruity odor May float or sink in water
Fire	Combustible Containers may explode in fire Flashback along vapor trail may occur Vapor may explode if ignited in an enclosed area Extinguish with dry chemical or foam Water may cause more fire if the liquid is released in a pool with water
Exposure	CALL FOR MEDICAL AID VAPOR Irritating to eyes, nose and throat If inhaled will cause headache, dizziness, coughing, or difficult breathing If swallowed, do not induce vomiting. Flush with plenty of water. If swallowed, do not induce vomiting. If unconscious or having convulsions, do not induce vomiting. LIQUID Irritating to skin and eyes If swallowed will cause nausea and vomiting If swallowed, do not induce vomiting. Flush with plenty of water. If swallowed, do not induce vomiting. If unconscious or having convulsions, do not induce vomiting. If swallowed, do not induce vomiting. If unconscious or having convulsions, do not induce vomiting.
Water Pollution	Effect of low concentrations on aquatic life is unknown Fouling to shoreline May be dangerous if it enters water intakes Do not discharge into water
1. RESPONSE TO DISCHARGE (See Response Methods Handbook, CG 446-4) Use warning of high flammability Restrict access Disperse and flush	2. LABEL 
3. CHEMICAL DESIGNATIONS 3.1 Synonyms: Isopropyl nitrate sec-Nitropropane 2-NP 3.2 Coast Guard Compatibility Classification: Nitrocompound 3.3 Chemical Formula: <chem>CH3CH(NO2)CH3</chem> 3.4 IMCO/United Nations Numerical Designation: Not listed	4. OBSERVABLE CHARACTERISTICS 4.1 Physical State (as shipped): Liquid 4.2 Color: Colorless 4.3 Odor: Mild, fruity
