Overview of Conference Activities

While the Principal Investigator is biased, in his opinion the 1981 Gordon Research Conference on Molecular Energy Transfer was one of the best scientific meetings which he has ever attended. The international mix of experimentalists and theorists working in a wide variety of topics in the gaseous, liquid and solid phases created an exciting environment for the exchange of ideas at the forefront of research in energy transfer. State-of-the-art techniques were presented and analyzed with regard to both basic and applied research. This Conference represents a wise investment of DoD funds.
