In October 1960, the Declassification Operations Branch (DAOB-DBR-D), physically located in the Washington National Records Center (WNRC) at Suitland, MD, commenced planning a project to review the retired Southeast Asia War Records for declassification, pursuant to the requirements of Executive Order 12065.

There were approximately 60,000 cubic feet of records in this collection created by the various elements of MAAG-V, MACTHAI, MACV, DAO-Saigon, and USARV during the years 1954-75. In 1975, the Department of the Army was made Executive Agent for maintenance and service of the joint records of this collection. The collection was stored in warehouse fashion in the WNRC as its individual shipments were received from the southeast Asian mainland. Due to intermingling of security classified and unclassified files at the time of original shipment, most of the collection has to be accorded security classified information protection.

To minimize loss and destruction of records in the combat environment, US Army field commanders were instructed in 1970 to dispose of no records in the field and to ship all records being retired to the WNRC. This, undoubtedly, saved many historically valuable records from inadvertent loss or destruction. It also resulted in a great deal of disposable and ephemeral material being held long past its scheduled disposal date. The disarrayed condition and presence of large amounts of disposable materials had long made effective service, research, and retrieval difficult. Consequently, a decision was taken to correct both conditions simultaneously with the declassification review.

Successful negotiations were conducted with the National Archives and Records Service (NARS) to provide essential support services for the project which would include the archival functions of re-establishment of original provenance, arrangement, disposal, and description, as well as declassification review. The general agreement was quite simple: NARS would provide the work space and materials, i.e., archives boxes for repacking the purified collection; and TAG would provide the work force to carry out the project. It was estimated that the project would be completed by 31 December 1985 at which time the entire collection would be permanently transferred to NARS.

Due to increasing historical interest and the special needs of the Agent Orange Task Force to answer claims and litigation, the project commenced with the combat divisions committed to the war. An individual Preliminary Inventory will be issued by The Adjutant General for approximately 20-25 of the major United States Army elements which saw action during the Vietnam War. These Inventories will be published irregularly over the life of the project as work in progress is completed to facilitate official, private and scholarly research in the collection.
