Equipment	Description	Reference manual	Remarks
TSEC/KY-8 Speech Security Equipment	Used with FM radio equipment. (Not used with AN/PRC-77.)	TM 11-5820-224-10	
TSEC/KY-28 Speech Security Equipment	Used with FM radio equipment mounted in aircraft.	TM 11-5820-245-10	
TSEC/KY-38 Speech Security Equipment	Used with FM radio equipment in certain configurations.	TM 11-5820-247-10	
HVL-3/TSEC (Digital Data Regenerative Repeater)	A portable, tactical, regenerative repeater used in place of radio set control C-2299/VRC on or with radio set AN/VRC-49 to provide automatic retransmission of speech secured messages.		
TSEC/KM-7 (Electronic Tactical Teletypewriter Security Equipment)	An on-line, electronic, portable, synchronous, half-duplex, teletypewriter security equipment used for securing tactical point-to-point or netted communications.		Requires 21-31 volts DC or 115/230 volts AC for operation.

Table I-6. Remote Control Devices

Equipment	Purpose and Description	Distance limitation	Power requirement	Reference manual
Radio Set Control AN/GRA-6	Can be used to perform the following functions: 1. Controlling and operating old FM sets from a distance. 2. Controlling SSB radio sets and voice portion of SSB radio teletypewriter equipment. 3. Two-way telephone communication between remote and local operators. 4. Local control of radio sets.	Approximately 3 km with WD-1/TT wire	4 BA-30 1 BA-414/U	TM 11-5038
Radio Set Control AN/GRA-39	A transistorized battery operated, remote control system providing duplex telephone operation and two-way signaling for the operation of the AN/VRC-12 and AN/PRC-77 series of FM radio sets from a remote location. Built-in loudspeaker and audio power amplifier.	Approximately 3 km with WD-1/TT wire	6 BA-30 for each unit	TM 11-5820-477-12
Radio Set Control OA-1754/GRC	Radio set control group OA-1754/GRC is designed to permit remote CW operation of the Radio Set AN/GRC-19 and remote CW and FSK (teletype) operation of the radio teletypewriter sets AN/GRC-46 and AN/VRC-29. This device is used in conjunction with control group AN/GRA-6. The OA-1754/GRC consists of a local unit and a remote unit.	1.6 km	Furnished by set to which this equipment is connected.	TM 11-5820-389-12P, C-1

Table I-7. Switchboards

Equipment	Number of lines accommodated	Types of operation	Power requirements	Major components	Reference manual	Remarks
SB-993/GT	6	Manual local battery.	None	1 MT-2156/GT 7 U-184/GCT	TM 11-5805 -2 4-15	Emergency switching center, uses visual signaling.
SB-22/PT and SB-22A/PT	12	A portable, local battery, monocoord switchboard capable of connecting 12 local battery telephone circuits, remote controlled radio circuits or voice frequency teletypewriter circuits. Uses magneto signaling.	4 BA-30	1 SB-22/PT 1 MX-230/PT (3 spare line packs) (MX-2915/PT for SB-22A)	TM 11-5805 -262-12	SB-22A differs from SB-22 in contents of accessory kit. The kit for SB-22A (MX-2915/PT) contains 2 line packs and 1 trunk pack. By stacking 2 or 3 SB-22 switchboards, the number of circuits can be increased to 29 or 46 respectively.
SB-86/P	30, including 2 civilian trunks	A complete, transportable, single position, nonmultiple, local battery tactical switching control capable of terminating 30 magneto or common battery signaling lines or trunks, two of which may be automatic one-way ring-down trunks to civilian exchanges. Can be used for voice frequency teletypewriter circuits. Includes a switchboard section, Jack Field Switchboard Signal Assembly TA-207/P, and power supply PP-990/G.	4 BA-30 10 BA-200/U	1 SB-248/P 1 TA-207/P 1 PP-990/G	TM 11-2134 TM 11-4134	Expansible to 60 lines with the addition of switchboard signal assembly TA-207/P. Cannot be used directly for radio/wire integration. For this purpose a switchboard, SB-22 is used in conjunction with the SB-86.

Table I-7. Switchboards (cont)

Equipment	Number of lines accommodated	Types of operation	Power requirements	Major components	Reference manual	Remarks
SB-223/GR (Switchboard Signal Assembly)	12 microphone lines, 6 recorder channels, 4 telephone lines	Manual, no ringing on switchboard.	BB-53 or other source of 12VDC	SB-223/GR	TM 11-2149	Used by sound ranging platoon of target acquisition battery. Connects 2 soundbases to sound ranging set GR-8.
MK-155/GT Telephone Connecting and Switching Group	Total of 10 (1 circuit of 2 1 circuit of 8)	Manual	None	1 jack panel SB-16/GT 7 Reel brackets 7 jacks U-17/GT 15 cords CX-231/GT	TM 11-2546	Provides conference telephone circuits among battery XO, assistant XO and 6 howitzer or gun sections.

Table I-8. Teletypewriter Equipment

Equipment	Purpose and description	Reference manual	Remarks
TT-4()/TG Teletypewriter	This teletypewriter is used to transmit teletypewriter messages in the form of direct current teletypewriter signals and to convert received direct current signals into messages, printed on a roll of recording paper (one-, two-, or three-ply).	TM 11-5815-206-12	Used in tactical military communication systems.
AN/PGC-1	The AN/PGC-1 is a lightweight, transportable unit. It consists of teletypewriter TT-4()/TG, connecting cables, and a bag of spare parts.	TM 11-5815-206-12	Same as TT-4()/TG. In a typical voice frequency system, telegraph terminal TH-5/TG or TH-22/TG must be used at both ends.
TT-335/TG	This teletypewriter is the same as the TT-4()/TG, except that in the TT-4()/TG, 105 to 125 volts DC or AC (50-60 Hertz) single-phase power is required whereas the TT-335/TG is powered for 108 to 132 volts, 396 to 404 Hertz, single-phase synchronous power.	TM 11-5815-206-12	Used in the Pershing battalion in each AN/TRC-80 terminal set.
TT-537/G	In a typical FADAC system, low-voltage signals from the computer are applied to the receiver circuits of the teletypewriter TT-537/G where they are amplified to the level required to operate the selector magnet in the teletypewriter receiver mechanism. The motor of this teletypewriter is designed for operation with 108- to 132-volt, 396- to 404-Hertz alternating current.	TM 11-5815-206-12 (Change 8)	Used as a printout in conjunction with FADAC. Replacement for teletypewriter TGC-14 now shown on some TOE's.
TT-76/GGC Reperforator-Transmitter	The TT-76/GGC is a lightweight, transportable teletypewriter that may be used to send and receive over direct current wire lines, carrier or radio systems in association with telegraph terminal TH-5/TG or TH-22/TG. Messages are printed and perforated on a paper tape. The TT-76/GGC provides facilities for manual transmission direct from the keyboard and for tape transmission from the transmitter-distributor and operates on 115 or 230 VAC.	TM 11-5815-238-12	Used in fixed or tactical military teletypewriter stations.
AN/GGC-3	The AN/GGC-3 consists of a reperforator-transmitter TT-76()/GGC, a table FN-52/GGC, and a case CY-1110/GGC.	TM 11-5815-238-12	Used in fixed or tactical military teletypewriter stations.

Table I-9. Reeling Equipment

Equipment	Purpose and description	Reference manual	Remarks
RL-27 D Axle, cable reel	An 8-pound machined steel-bar, 2 1/2-ft long with 2 knurled handles. Is used to recover and lay short wire circuits by hand.	TM 11-3895-201-13P	
RL-31() reeling machine, cable, hand	A rugged, lightweight portable unit for laying and recovering telephone cable, with cable reel RL-159 (1-mile capacity).	TM 11-362	Can be mounted in a vehicle or handcarried.
RL-39 reeling machine, cable, hand	Reeling machine, cable, hand, RL-39, is used with cable reel DR-8 (1/4-mile capacity).		
RL-172/G reeling machine, cable, motor driven	RL-172/G is a transportable wire-laying and recovering machine that can be mounted on a motor vehicle. The reeling machine is normally mounted vertically on the tailgate of a truck. May also be operated horizontally from the bed of a truck.	TM 11-3895-207-10	Vehicle battery provides the power to operate the 24-volt, direct current motor of the machine. Also has handle for manual operation.
RL-207/G reeling machine, cable, engine driven	RL-207/G is a two cylinder gasoline engine driven reel unit mounted in a 3/4-ton truck or larger vehicle to pay out or recover telephone cable or spiral-4 cable.	TM 11-3895-209-12	The machine has 2 axles, each axle will accommodate 2 RL-159, 1 DR-5 or 1 DR-15 reel.

Notes:

- These are the latest model fuzes. Other authorized fuzes are listed in TM 9-1300-203, TM 9-1300-203-4, and the appropriate firing tables.
- Weights of the fuzed projectile and complete round is approximate with maximum standard charge.
- MA/MT is the abbreviation for Muzzle Action, Mechanical Time.
- With shipping and firing container.
- Pending type classification for the M109A1 Howitzer and XM 201 charge.

MARCH FORMULAS

- IX-1. March Column Nomograph
- IX-2. Time-Distance Measurements
- IX-3. Speed Conversions

Table IX-1. March Column Nomograph.

Note. This nomograph shows an average length of column (passing time) under ideal conditions. It does not include an allowance for time gaps between march units. Actual data will vary with conditions. Normal densities (veh per km) are: Close column 48 (16 kmph)

Open column 16 (24 kmph)

Table IX-1. March Column Nomograph (cont)

TO DETERMINE TIME LENGTH OF COLUMN

- STEP 1. Determine the number of vehicles in the column (exclude tlr/towed wps).
- STEP 2. Locate figure on the vertical scale at the left of the nomo marked "NUMBER OF VEHICLES".
- STEP 3. Locate figure showing average density on the vertical scale marked "DENSITY".
- STEP 4. Connect the two points by using a straightedge.
- STEP 5. Read answer at the point at which the straightedge intersects the vertical scale marked "LGTHCOLM".

TO DETERMINE PASSING TIME

- STEP 1. Determine the LGTHCOLM as shown above.
- STEP 2. Locate the figure for speed (kmph) on the vertical scale marked "SPEED".
- STEP 3. Using a straightedge, connect the points located on the LGTHCOLM and SPEED verticals.
- STEP 4. Read the answer at the point at which the straightedge intersects the vertical scale marked "PST".

Note. Measurements of time in minutes shown above are based on close column speeds. For an open column, use two-thirds of the time read above.

Sample Problem. Determine the time-distance (in minutes) required for vehicle to travel between two points (a distance of 125-km) at close column speed.

- STEP 1. From the left column, select the line corresponding to 120 km.
- STEP 2. Move right to the column headed 5 (120 plus 5).
- STEP 3. Read the answer (469 minutes) directly from the table.

TABLE X

GLOSSARY

X-1. PURPOSE

The purpose of this glossary is to define terms (abbreviations) that are not now included in a military dictionary or list of official brevity codes (abbreviations) but are in use in USAFAS instructions.

X-2. GLOSSARY

-A-

AIRSPACE COORDINATION AREA (ACA). In fire support operations, a safety measure which establishes a three-dimensional area (corridor/lane) that is reasonably safe from friendly surface delivered non-nuclear fires.

AIRSPACE MANAGEMENT ELEMENT (AME). A functional component of Army elements within corps and division TOC's involved with coordination, integration, and regulated use of Army airspace users and with other users.

AFSCoord. Assistant fire support coordinator.

-B-

BATTERY OPERATIONS CENTER (BOC). In field artillery operations, a facility established to serve as an alternate fire direction center and as the battery command post.

-C-

COLLATERAL DAMAGE (CD). In nuclear operations, undesirable civilian personnel injuries or materiel damage produced by the effects of firing nuclear weapons.

CLGP. Cannon launched guided projectile (now known as COPPERHEAD).

COORDINATED FIRE LINE (CFL). A line beyond which conventional surface fire support means (mortars, FA, and naval gunfire ships) may fire at any time within the zone of the establishing headquarters without additional coordination.

CORPS ARTILLERY (CORPSARTY). This organization consists of the corps field artillery section (FAS), field artillery brigade headquarters and headquarters batteries and field artillery units assigned or attached to the corps and not further attached or assigned to a subordinate maneuver unit.

COUNTERFIRE (CF). Fire intended to destroy or neutralize enemy weapons. Includes counter-bombardment (counterbattery) and countermortar fires.

CSR. Controlled supply rate (ammunition) - formerly ASR.

-D-

DIVISION ARTILLERY (DIVARTY). Field artillery that is permanently an integral part of a division. For tactical purposes, all FA placed under the command of a division commander is considered division artillery.

DEDICATED BATTERY (DB). In field artillery operations, a cannon battery whose total fire power is immediately available to suppress enemy direct fire weapons which threaten a designated maneuver company/team.

-F-

FIRING BATTERY (FB). An element of a field artillery cannon battery.

FIELD ARTILLERY OBSERVER (FAO). A person who watches the effects of fires, adjusts the mean point of impact of those fires onto a target, reporting results to the firing agency.

FIRE SUPPORT COORDINATION (FSC). The planning and executing of fire support so that targets are adequately covered by a suitable weapon or group of weapons.

FIRE SUPPORT TEAM (FIST). In fire support operations, a team comprised of a team chief (FA officer) and the necessary additional personnel and equipment required to request, coordinate, and direct fire support efforts for company sized units.

FS. Fire support.

FIRE SUPPORT COORDINATION LINE (FSCL). A line beyond which all targets may be attacked by any weapon system (including aircraft and special weapons) without endangering troops or requiring additional coordination with the establishing headquarters.

FIRE SUPPORT OFFICER (FSO). In fire support operations, this officer is a full-time coordinator of all fire support.

FAS. Field artillery section (corps).

FAAO. Field artillery air observer.

-G-

GMET. Graphical munitions effects table.

-H-

H&I. Harassing and interdiction (fires).

-I-

IMMEDIATE SUPPRESSIVE FIRE (ISF). In combined arms operations, field artillery fires required when the enemy has fired from or has been seen and can fire from a given location when direct fire weapons and supporting indirect fire weapons must respond immediately.

-J-

JMEM. Joint munitions effects manuals.

-M-

MORTREP. Mortaring report.

MFSE. Main fire support element.

-N-

NO FIRE AREA (NFA). In fire support operations, a designated area into which neither fires nor effects from fires will occur. Two exceptions include:

1. When the establishing headquarters approves (temporarily) within the NFA on a mission basis.
2. When an enemy force within the NFA engages a friendly force, the commander may engage the enemy to defend his force.

-0-

OFFSET REGISTRATION (OR). In field artillery operations, registering from a supplementary position.

-P-

PFO. Platoon forward observer.

-R-

R. Reinforcing.

RPV. Remotely piloted vehicle.

-S-

SUPPRESSIVE FIRES (SF). In fire support operations, fires, direct and indirect, brought to bear on known or likely locations to degrade the enemy's ability to place effective fires on friendly maneuver elements.

SUPPRESSION OF ENEMY AIR DEFENSES (SEAD). In fire support operations, fires used to suppress enemy air defenses while friendly aircraft operate in an area.

-T-

TACTICAL OPERATIONS CENTER (TOC) - FA. A facility within which are merged targeting, operations, and fire control for field artillery support operations.

TFSE. Tactical fire support element.

TAS. Tactical air support.
