NOTICES

When US Government drawings, specifications, or other data are used for any purpose other than a definitely related Government procurement operation, the Government thereby incurs no responsibility nor any obligation whatsoever, and the fact that the Government may have formulated, furnished, or in any way supplied the said drawings, specifications, or other data, is not to be regarded by implication or otherwise, as in any manner licensing the holder or any other person or corporation, or conveying any rights or permission to manufacture, use, or sell any patented invention that may in any way be related thereto.

Please do not request copies of this report from Air Force Aerospace Medical Research Laboratory. Additional copies may be purchased from:

National Technical Information Service
5285 Port Royal Road
Springfield, Virginia 22161

Federal Government agencies and their contractors registered with Defense Technical Information Center should direct requests for copies of this report to:

Defense Technical Information Center
Cameron Station
Alexandria, Virginia 22314

TECHNICAL REVIEW AND APPROVAL

AMRL-TR-75-50, Vol. 2

This report has been reviewed by the Office of Public Affairs (PA) and is releasable to the National Technical Information Service (NTIS). At NTIS, it will be available to the general public, including foreign nations.

This technical report has been reviewed and is approved for publication.

FOR THE COMMANDER

HENNING E. VON GIERKE, Dr Ing
Director
Biodynamics and Bioengineering Division
Air Force Aerospace Medical Research Laboratory

20. ABSTRACT (Continue on reverse side if necessary and identify by block number) This report is an index which identifies the individual volumes published during the 1975-1982 period by the Air Force Aerospace Medical Research Laboratory (AFAMRL) as a multi-volume report, "USAF Bioenvironmental Noise Data Handbook," AMRL-TR-75-50 and lists those aircraft, ground equipment and other systems reported therein. Refer to Volume 1 of this handbook, "USAF Bioenvironmental Noise Data Handbook, Vol. 1: Organization, Content and Application," AMRL-TR-75-50(1) 1975, for discussion of the objective and design of		

SECURITY CLASSIFICATION OF THIS PAGE(When Data Entered)

the handbook, the types of data presented, measurement procedures, instrumentation, data processing, definitions of quantities, symbols, equations, applications, limitations, etc.

SECURITY CLASSIFICATION OF THIS PAGE(When Data Entered)

PREFACE

This report was prepared by the Biodynamic Environment Branch, Air Force Aerospace Medical Research Laboratory, under Project/Task 723107, Technology to Define and Assess Environmental Quality of Noise From Air Force Operations.

The authors gratefully acknowledge the efforts of Mr. Henry Mohlman, University of Dayton Research Institute for his assistance in preparing this report.

LIST OF TABLES

PART A	6
PART B	12
PART C	15

INDEX

INTRODUCTION

This index identifies the individual volumes published during the 1975-1982 period by the Air Force Aerospace Medical Research Laboratory (AFAMRL) as a multi-volume report, "USAF Bioenvironmental Noise Data Handbook," AMRL-TR-75-50 and lists those aircraft, ground equipment and other systems evaluated therein.

As of this date AFAMRL will no longer publish nor be responsible for any additional handbook volumes.

ORGANIZATION AND CONTENT

Part A of this index is a numeric listing of volume numbers giving title, author(s), the Defense Technical Information Center (DTIC) AD number and publication date.

Part B provides an alpha-numeric listing of all systems (i.e., noise sources) included in the Handbook with corresponding volume numbers and identification of the type(s) of environmental noise data available on each system (e.g., in-flight, near-field, or far-field data). See the next section for descriptions of these items.

Part C is a similar alpha-numeric listing of systems but which are grouped within classes (e.g., Military Aircraft - Fighter, or Ground Support Equipment - Generator).

HANDBOOK

TYPES OF DATA INCLUDED

The Handbook includes data on several types of environmental noise:

In-Flight Noise

Noise environments at flight crew and passenger locations on-board aircraft during some or all operations including engine start, taxi, takeoff, climb, cruise, approach and landing.

Near-Field Noise

Noise environments produced close to the source at ground crew locations during ground operations of aircraft, and ground-based equipment/facilities. Such locations are in the acoustic near-field of the source where the source is spatially distributed and cannot be regarded as a point source.

Far-Field Noise

Noise environments produced at moderate-to-large distances from the source, typically at locations adjacent to the flight line and in the surrounding community, during ground operations of aircraft and ground-based equipment/facilities. Such locations are in the acoustic far-field where the source may be regarded as a point source.

The Handbook provides measured and extrapolated data defining the bioacoustic environments in a wide variety of physical-acoustic and psychoacoustic measures:

Overall and band sound pressure levels

Overall and band acoustic power levels

Directivity indices

C-weighted and A-weighted overall sound levels

Preferred speech interference level

Perceived noise level

Limiting times for total daily exposure of personnel with and without standard Air Force headgear/ear protectors

Refer to Volume 1 which discusses in detail the types of data available in the Handbook, definitions of quantities, symbols, methods for acquiring and analyzing data, equations, applications, limitations, etc. This information is not repeated in the other Handbook volumes.

TYPES OF DATA NOT INCLUDED

The Handbook does not include data on the noise produced on the ground by aircraft during flight (e.g., takeoff, flyover, landing). For such information see references 1-6.

The Handbook also does not include data on noise environs produced by shop/industrial equipment, office equipment, computer facilities, building air conditioning/ventilating equipment, ground transportation, construction equipment, nor materials handling equipment.

Neither does the scope of the Handbook include impulse noise (e.g., blasts or sonic booms) nor does it provide architectural acoustics data.

AVAILABILITY OF COPIES

Copies of all Handbook volumes may be purchased from the National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, Virginia 22151. Federal government agencies and their contractors registered with Defense Technical Information Center (DTIC) should direct requests for copies to: DTIC, Cameron Station, Alexandria, Virginia 22314. The AD number in Part A is the accession document number assigned by DTIC. Please do not request copies from AFAMRL.

TECHNICAL QUESTIONS

Direct any questions concerning the technical data in this handbook to: AFAMRL/BBE, Wright-Patterson AFB OH 45433. Telephone: AUTOVON 785-3675 or 785-3664, Commercial (513) 255-3675 or (513) 255-3664.
