MAGNETIC TAPE DATA FORMAT

The information for the Fiber Optics Systems Database is contained in three files: SYSTEMS.DAT, PARTS.DAT, and SPECS.DAT. The fields within each record of these files are delimited by TABS. Fields which contain "free text" may contain punctuation, including commas. The layout of each file is given below.

In addition, a full-text listing of major vendors and their products is included. This information is split into two files: VENDORS.PT1, and VENDORS.PT2 (the second file is simply a continuation of the listing which is begun in the first file). The format of these two files will be readily apparent by examining their textual contents.
