DATA TAPE DOCUMENTATION

January, 1983

Prepared for:

Office of Assistant Secretary of Defense
(Manpower, Reserve Affairs and Logistics)
The Pentagon
Washington, D.C.

Contract Number:

MDA903-81-C-0617

DATA TAPE DOCUMENTATION

The data set, in the form of an SPSS system file, is described as follows:

Code	=	EBCDIC
External label	=	E571ME
Internal label	=	E571ME
Bytes Per Inch	=	1600

Data Control block specifications:

Record format	=	VBS
Logical record length	=	20008
Block size	=	06400

Description of subfiles:

<u>File Name</u>	<u>Number of Variables</u>	<u>Number of Cases</u>	<u>Description of Membership</u>
NPS6.Y1982	188	2246	Non-Prior Service Males and Females
VET6.Y1982	198	2355	Prior Service Males and Females

The data for each subfile was initially taken from 3 cards for NPS and 4 cards for PS respondents. Upon the creation of an SPSS system file tape, column structure is converted to the relative position of each variable within the file.

All variables are in F-format with no decimals. The print format for all variables is equal to zero. Special missing value codes have been declared for all variables as follows:

- 0 - Not applicable
- 9 - Don't know or undetermined
- 8 - Refused

The variable FORMAT was used for quality control purposes and no longer represent useful information. The associated *question number* on the questionnaire, relative position on the Data Set, name, description, and response choice codes for each variable are listed on the following pages. The descriptions relevant for the Non-Prior Service Data Sets precede those for the Prior Service Data Sets.
