500 CONTRACTORS LISTED ACCORDING TO NET VALUE OF
MILITARY PRIME CONTRACT AWARDS FOR RESEARCH,
DEVELOPMENT, TEST AND EVALUATION WORK

FISCAL YEAR 1976

This report lists the leading 500 military prime contractors according to the net value of awards of \$10,000 or more for research, development, test and evaluation (RDT&E) work during Fiscal Year 1976. This list is arranged in four sections. The first section includes 386 U.S. business firms, the second includes 100 educational and other nonprofit institutions, the third includes eight foreign contractors, and the fourth includes six U.S. Government agencies. There are 103 contractors on the Fiscal Year 1976 list who did not appear on the Fiscal Year 1975 list. Of the 386 U.S. business firms listed, 185 were small business firms.

Contractors in all sections are ranked in a single sequence so that only one contractor in the report is No. 1. The alphabetical index shows the section in which each contractor is located and his rank. The locations shown are those where the work was expected to be performed. Generally, the location is a contractor's plant, laboratory, or other facility. However, if the work was scheduled to be performed at a Defense activity, such as an Air Force Base, the location is the Defense activity rather than the contractor's plant.

In addition to the 500 listed contractors, there were 1,316 other contractors who were awarded prime contracts of \$10,000 or more for RDT&E work during Fiscal Year 1976, making a total of 1,816 contractors in all compared with 1,914 contractors during Fiscal Year 1975. Included in the Fiscal Year 1976 total were 290 educational and other nonprofit institutions, 43 foreign contractors, 11 U.S. Government agencies, and 1,472 U.S. business firms (998 small and 474 large business firms).

The dollar value of \$6,768 million for the 500 largest contractors represents 98.5% of the \$6,871 million total prime contract awards of \$10,000 or more for RDT&E work. The contractors with the largest value of awards were engaged in research, development, test or evaluation of missile and space systems, electronic and communications equipment, aircraft, and other highly complex military equipment. In Fiscal Year 1976, 79.1% of all RDT&E awards of \$10,000 or more to U.S. business firms was for work connected with missile and space systems, electronic and communications equipment, and aircraft programs.
