500 CONTRACTORS LISTED ACCORDING TO NET VALUE OF
MILITARY PRIME CONTRACT AWARDS FOR RESEARCH,
DEVELOPMENT, TEST AND EVALUATION WORK

FISCAL YEAR 1975

This report lists the leading 500 military prime contractors according to the net value of awards of \$10,000 or more for research, development, test and evaluation (RDT&E) work during Fiscal Year 1975. This list is arranged in four sections. The first section includes 387 U. S. business firms, the second includes 105 educational institutions and other nonprofit institutions, the third includes four foreign contractors and the fourth includes four U. S. Government agencies. There are 100 contractors on the Fiscal Year 1975 list who did not appear on the Fiscal Year 1974 list. Of the 387 U. S. Business firms listed, 190 were small business firms.

Contractors in all sections are ranked in a single sequence so that only one contractor in the report is No. 1. The alphabetical index shows the section in which each contractor is located and his rank. The locations shown are those where the work was expected to be performed. Generally, the location is a contractor's plant, laboratory, or other contractor facility. However, if the work was scheduled to be performed at a Defense activity, such as a missile site, the location is the Defense activity rather than the contractor's plant.

In addition to the 500 listed contractors, there were 1,414 other contractors who were awarded prime contracts of \$10,000 or more for RDT&E work during Fiscal Year 1975, making a total of 1,914 contractors in all compared with 1,976 RDT&E contractors during Fiscal Year 1974. Included in the Fiscal Year 1975 total were 292 educational institutions and other nonprofit institutions, 51 foreign contractors, 14 U. S. Government agencies and 1,557 U. S. business firms (495 large and 1,062 small business firms).

The dollar value of \$6,191 million for the 500 largest contractors represents 98.2% of the \$6,303 million total prime contract awards of \$10,000 or more for RDT&E work. The contractors with the largest value of awards were engaged in research, development, test or production of aircraft, missiles, electronic and communications equipment, and other highly complex military equipment. In Fiscal Year 1975, 79.2% of all RDT&E awards of \$10,000 or more to U. S. business firms was for work connected with missiles and space, electronics, and aircraft programs.
