## SECTION 1 - TOTAL DEPARTMENT OF DEFENSE PERSONNEL

### General

Within the Department of Defense (DoD), personnel strength is considered to be the sum of active duty military and direct hire civilian personnel. (See the Glossary of Terms.) This section provides an overview of DoD manpower levels as of September 30, 1982, and presents personnel data by organizational component (Army, Navy, Air Force, etc.), location of personnel, and/or function (military or civilian). Complete data on the total number and percent distribution of active duty military and direct hire civilian DoD personnel, by state, are provided. Historical data on trends in DoD personnel strength are also provided.

### Highlights

The total number of DoD civilian personnel increased by 8,700 during FY 1982, 5,400 of whom were direct hires. Among the direct hires, the Army, Air Force, and Other Defense Agencies showed increases, while the Navy total decreased slightly. Active duty military personnel increased by 26,000. The largest increase was in Navy personnel (12,800). The Air Force and Marine Corps reported increases of 12,500 and 1,800 respectively, while the Army reported a decrease of 1,100. While the number of personnel in the Pentagon increased slightly, the average since 1974 has remained fairly constant. The total DoD manpower level increased to almost 3.1 million persons, the highest since June 1975.

**SECTION 2**

**ACTIVE DUTY MILITARY PERSONNEL**

## SECTION 2 - ACTIVE DUTY MILITARY PERSONNEL

### General

This section contains a variety of data on active duty military personnel. Data are provided for FY 1982 by service, type of personnel (officers, enlisted, or officer candidates), location, and/or pay grade. Extensive historical data are provided in several areas, including trends in military personnel strength, enlistment and reenlistment trends, the age distribution of male personnel, and the estimated educational levels of active duty military personnel. Other tables provide data on the number of active duty female personnel and the number of military dependents. Statistics on the number of personnel serving in, and the number of casualties resulting from, major armed conflicts in which the United States has been engaged are also provided.

The particular conditions and/or limitations affecting the data in each table are explained in historical notes, as applicable.

### Highlights

As of September 30, 1982, there were 2,108,612 active duty military personnel. This is an increase of 26,000 (6,200 officers and 19,800 enlisted personnel) over the FY 1981 figure. The greatest increases for officers were in pay grades O1 to O3, while the greatest increases among enlisted personnel were in the pay grades E4 to E6. The percentage of officers and enlisted personnel estimated to have completed various levels of education increased in all categories except enlisted high school graduates. The number of officer candidates (15,110) continued an upward trend and is at the highest level since 1954.

The number of female personnel also showed an increase (2,000 officers and 2,000 enlisted personnel). The FY 1982 total of 189,048 female personnel is exceeded only by the 1945 figure of 266,256. The number of military dependents increased by 133,000, a significant increase of 75,000 for the Army, 32,000 for the Navy, and 13,000 for both the Air Force and the Marine Corps.

TABLE 2-28

DEPARTMENT OF DEFENSE  
HISTORICAL BACKGROUND AND NOTES

1. Officers include warrant officers, field clerks and nurses. Enlisted personnel include cadets, midshipmen from the U.S. military academies at West Point and Annapolis as well as other officer candidates. Both officer and enlisted personnel data exclude figures on the Coast Guard.
2. Data for the year shown is as of June 30 beginning with 1878 for Army, 1900 for Navy, and 1798 for Marine Corps. For prior years the as of date is the month for which records most completely reveal the total strengths of each service. In some instances, incremental reports of different dates had to be used to compile a service total, with the result that the strength shown is not for any particular point in time during that year.
3. Army data begin with 1789, the year in which the Department of War (now Department of the Army) was established by the new U.S. Congress. Although a "regular" Army has existed continuously since that time, the total strengths cannot be documented from available records, nor can reliable estimates be made for years 1790-1793 and 1796-1800. Beginning with 1861, the data include all military personnel on extended active duty with the Army (regulars, volunteers, militia, inductees, reserves and National Guardsmen) and U.S. Military Academy cadets. Data prior to 1861 are for Regular Army and cadets only, except for 1836-1840 (Seminole Indian War) and 1846-1848 (War with Mexico). Source documents for other years do not contain adequate strength statistics on non-regular personnel called up during the War of 1812 or for short periods of service during the numerous Indian disturbances. Army data also include strengths of the Army Air Corps and predecessor agencies.
4. Navy strengths for the period 1794-1798 are estimates of the number of "on board" personnel authorized by the U.S. Congress to reestablish a Navy which had existed from 1775 to 1785 under the Continental Congress. A separate Navy Department was authorized and organized in 1798. During the early years of the Navy, usually crews were contracted for a specific sailing or mission rather than a continuous tour of duty. The strengths shown are more in the nature of an average and are therefore marked "estimated." Data excluded an unknown number of Naval militia, supplied by the states, who served during the War of 1812, the Mexican War, and the Spanish-American War.
5. Marine Corps strengths as shown begin in 1798, the year in which the Navy Department and Marine Corps were authorized by an Act of Congress. The Marine Corps was founded in 1775 by the Continental Congress and served during the Revolutionary War, but ceased to exist in 1783. The Marines were reestablished in 1794 when Congress authorized the rebuilding of the Navy. A small number of Marines were used as guards on Navy ships. However, records do not reveal reliable strength data before 1798.

DEPARTMENT OF DEFENSE  
HISTORICAL BACKGROUND AND NOTES (P28.2)

- A/ Data prior to World War I are based on incomplete records in many cases. Casualty data are confined to dead and wounded and therefore exclude personnel captured or missing in action who were subsequently returned to military control. U.S. Coast Guard data are excluded.
- B/ Marine Corps data for World War II, the Spanish-American War and prior wars represent the number of individuals wounded, whereas all other data in this column represent the total number (incidence) of wounds.
- C/ Not known, but estimates range from 184,000 to 250,000.
- D/ As reported by the Commissioner of Pensions in his Annual Report for Fiscal Year 1903.
- E/ Authoritative statistics for the Confederate Forces are not available. Estimates of the number who served range from 600,000 to 1,500,000. The Final Report of the Provost Marshal General, 1863-1866, indicated 133,821 Confederate deaths (74,524 battle and 59,297 other) based upon incomplete returns. In addition, an estimated 26,000 - 31,000 Confederate personnel died in Union prisons.
- F/ Number serving covers the period April 21 to August 13, 1898, while dead and wounded data are for the period May 1 to August 31, 1898. Active hostilities ceased on August 13, 1898, but ratifications of the treaty of peace were not exchanged between the United States and Spain until April 11, 1899.
- G/ Includes Air Service. Battle deaths and wounds not mortal include casualties suffered by American forces in Northern Russia to August 25, 1919, and in Siberia to April 1, 1920. Other deaths cover the period April 1, 1917, to December 31, 1918.
- H/ Includes Army Air Forces.

- I/ Data are for the period December 1, 1941, through December 31, 1946, when hostilities were officially terminated by Presidential Proclamation, but few battle deaths or wounds not mortal were incurred after the Japanese acceptance of Allied peace terms on August 14, 1945. Number serving from December 1, 1941 - August 31, 1945, were: Total - 14,903,213; Army - 10,420,000; Navy - 3,883,520; and Marine Corps - 599,693.
- J/ Battle deaths and wounds not mortal include casualties incurred in October 1941 due to hostile action.
- K/ Tentative final data based upon information available as of September 30, 1954, at which time 24 persons were still carried as missing in action.
- L/ Number serving covers the period August 4, 1964 - January 27, 1973 (date of ceasefire). Wounds not mortal exclude 150,332 persons not requiring hospital care. Known status of casualties is as of September 30, 1982.

**SECTION 3**

**CIVILIAN PERSONNEL**

### SECTION 3 - CIVILIAN PERSONNEL

#### General

This section provides a variety of data on civilian personnel employed by the Department of Defense (DoD). Civilian personnel are categorized as either "direct" or "indirect" hires. In certain tables, personnel are further categorized as performing either military or civilian functions. (See the Glossary of Terms.) Data are provided which show the worldwide distribution of both direct and indirect hires. Additional tables display the data by location of personnel (region, area, and/or country) and by organizational component (Army, Navy, Air Force, or Other Defense Agency). Data on trends in annual accession and separation rates are also provided.

#### Highlights

The total DoD civilian workforce increased by 10,000 in FY 1982. The number of direct hire civilian personnel increased by 7,000, all of whom were U.S. citizens, while the number of indirect hires increased by 3,000, all of whom were foreign nationals. Among the Military Departments, the Army reported the largest increase in civilian personnel (7,200), followed by the Air Force (2,300), while the Navy decreased by 1,300.

The ratio of DoD civilian personnel to the total number of civilians employed in the Executive branch remained relatively constant (35.7 percent). The number of accessions (20,372) was the highest since 1969. The number of separations (18,666) was the highest since 1974, and the rate increased from the previous fiscal year. (Accession and separation "rates" express the number of annual gains or losses in civilian personnel as a percentage of total DoD employment.)

**SECTION 4**

**RESERVE STRENGTH**

#### SECTION 4 - RESERVE STRENGTH

##### General

Within the Department of Defense (DoD), reserve strength comprises the total number of personnel classified as ready reserves, standby reserves, or retired reserves. (See the Glossary of Terms.) This section provides a variety of information on DoD reserve strength by reserve category, military component, duty status, and pay status. Current and historical data are provided on enrollment in both the junior and senior level components of the Reserve Officer Training Corps (ROTC) and in the National Defense Cadet Corps.

##### Highlights

During FY 1982, the number of ready reserve personnel increased by 42,000, the number of standby reserve personnel decreased by 12,000, and the number of retired reserve personnel decreased by 47,000, for a net decrease of 17,000. The increase in ready reserve personnel was composed almost entirely of personnel not on active duty. The Army reserves and Army National Guard reported increases of 38,000 and 19,000, respectively, while the number of Navy reserve personnel declined by 15,000. The number of reserves in drill pay status increased by 65,000, with the Army reserves and the Army National Guard gaining 32,000 and 19,000 respectively.

The number of reserve personnel on active duty (170,539) continued a 5-year upward trend and was the highest since 1973. However, the number of standby reservists (those not on active duty) was 52,095, the lowest level since 1954. The number of retired reserve personnel (838,549) was the highest ever.

The total number of students enrolled in senior ROTC increased by 3,000 to 102,594. Enrollment in the junior ROTC increased by 3,300 to 191,316.

**SECTION 5**

**OTHER PERSONNEL**

SECTION 5 - OTHER PERSONNEL

General

This section contains data pertaining to retired military annuitants and to dependents of both active duty military and civilian Department of Defense (DoD) personnel. Data are provided on the geographic distribution of dependents by region and country and on trends in military retirements. (Data on the geographic distribution of dependents living in Alaska, Hawaii, and the U.S. territories exclude dependents of U.S. citizen civilian employees who are permanent residents of these areas and who are employed in the state or territory of their residence.)

Highlights

The total number of dependents of military and civilian DoD employees increased by 133,900. This reflects an increase of 76,500 for the Army, 31,900 for the Navy, 12,900 for the Air Force, 12,800 for the Marine Corps, and a decrease of 100 for OSD and the Defense Agencies. The majority of this increase is located within the Continental United States. The number of dependents accompanying military and civilian employees at overseas locations in foreign countries increased by 1,800.

The actual number of military annuitants (1,390,779) increased by 27,600, the highest level ever recorded. The total number of non-disability annuitants and the number of families receiving survivor benefits reached their highest levels ever.
