FOREWORD

This report presents summary data on total Department of Defense military prime contract awards by type of contractor and data on awards of over \$10,000 by Service Category and Federal Supply Classification, for fiscal years 1975, 1976, 1977, and 1978.

Data by Service Category and Federal Supply Classification are presented in three sections:

SECTION A covers awards for research, development, test, and evaluation work (RDT&E). The RDT&E categories used are the standard Department of Defense Claimant Programs. These procurement program definitions are identical with those prescribed for use in the Defense Materials System. Each category of RDT&E work has been divided into four kinds of RDT&E work, as described in the Defense Acquisition Regulation 4-101.

SECTION B covers other services and construction. The 15 major divisions and approximately 160 individual classes were developed specifically for prime contract reporting and are considered to be self-explanatory.

SECTION C covers the federal supply classification structure composed of 74 groups and approximately 585 individual classes. This system was developed primarily for supply management of items known to be in the supply system of the Federal government. Definitions of the classes appear in the Cataloging Handbook, Federal Supply Classification, Part 1, "Groups and Classes," H2-1, which may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

While there is comparability between the Federal Supply Classes used in this publication and the Standard Industrial Product Codes used by the Census Bureau of the Department of Commerce, the exact points of agreement and disagreement have not been ascertained. Moreover, it should be observed that in many of the Census reports, the SIC data are based on the principal product of an establishment rather than on the individual products produced by that establishment. In addition to differences in code content, data from this pamphlet and certain Bureau of the Census reports do not coincide as to period covered or as to point in time when reported. The former are fiscal year figures measuring contract awards before delivery has taken place, while the latter are calendar-year figures measuring shipments or production which may take place several years after the contract award.

The following characteristics of the material presented in this pamphlet should be noted:

1. Data cover only prime contracts (those placed directly by the Department of Defense) and do not reflect the large amounts of subcontracts for basic and intermediate materials and components. Thus, for example, most of the steel plates for ships is purchased by Defense prime contractors, and only a small portion is obtained by direct DoD purchase (see Code 9515). Similarly, a large dollar amount of electronics is purchased by Defense contractors who have received prime contracts for missiles and other weapons systems.

2. Product and service information on procurement actions of \$10,000 or less are not collected and, therefore, not provided in this report. In each of the fiscal years 1975 through 1978 these small transactions totaled from \$4 to more than \$5 billion. This limitation tends to understate procurement of commercial type items and services more than military hard good items which usually are bought in large dollar amounts. It is known, for example, that Subsistence (FSC Group 89) is severely understated for this reason. However, information concerning the composition of the small purchases is not sufficient to identify all the categories of commodities and services which are affected to an important degree.

3. For security reasons, various contracts have been reported with a classification other than the one describing the item purchased. Therefore, data for a number of the Federal Supply Classes shown are incomplete.

4. The data which categorize contract awards by Service Category and Federal Supply Classification include awards to all types of contractors. In this respect, the coverage differs from other reports published by this office which provide such information only with respect to awards to business firms for work in the United States.

NOTE: Beginning with fiscal year 1977 the fiscal year period changed from July-June to October-September; therefore, fiscal year 1976 covered the period of July 1975-June 1976, and fiscal year 1977 covered October 1976-September 1977. Data by Service Category and Federal Supply Class were not compiled for the transition period of July-September 1976.

SUMMARY

Military prime contract awards in fiscal year 1978 totaled \$65,185 million. This is \$9,613 million, or 17.3 percent, more than in fiscal year 1977. As shown in the following table, awards for work outside the United States showed an increase of \$1,191 million, or 42.2 percent. Intragovernmental awards increased by \$1,259 million, or 20.3 percent; awards to educational and non-profit institutions increased by \$144 million, or 15.2 percent. Although awards to business firms showed the largest dollar increases, \$7,020 million, the percentage of change was 15.4 percent. However, the percentage of distribution by type of contractor remained virtually unchanged from 1977 with a one percentage point shift between awards to business firms in the U.S. and awards for work outside of the U.S.

As shown in the following table, actions of over \$10,000 in fiscal year 1978 totaled \$59,582 million, an increase of \$9,197 million, or 18.3 percent, over fiscal year 1977.

Of the awards over \$10,000, the following table provides data by type of effort and shows that awards for RDT&E work increased by \$790 million, or 10.0 percent, for other services and construction by \$2,302 million, or 19.4 percent, and for supplies and equipment by \$6,104 million, or 19.9 percent. However, the percentage distribution among these principal types of effort changed but little.

NOTE: Figures may not add to total due to rounding.

Within the RDT&E category (see Section A, page 2), awards for research increased by \$5 million, or 1.4 percent, for exploratory development by \$107 million, or 15.8 percent, for other development by \$647 million, or 10.4 percent, and for management and support by \$31 million, or 4.8 percent. Here again, the percentage of distribution among these types of RDT&E work remained virtually unchanged. In fiscal year 1978 research accounted for 4 percent; exploratory development, 9 percent; other development, 79 percent; and management and support, 8 percent.

The following series of tables show comparisons between fiscal year 1977 and 1978 by selected subcategories within the major types of efforts.

RDT&E CLAIMANT PROGRAM

<u>PROGRAM</u>	<u>FISCAL YEAR</u>		<u>CHANGE</u>	
	<u>1977</u>	<u>1978</u>	<u>AMOUNT</u>	<u>PERCENT</u>
	(Millions of Dollars)			
Aircraft	\$1,649	\$1,640	\$ -9	-0.6
Missile	2,302	2,721	419	18.2
Ships	303	249	-54	-17.8
Tanks-Automotive	225	510	285	126.7
Weapons	188	203	15	8.0
Ammunition	98	101	3	3.1
Electronic & Communication				
Equipment	1,789	1,765	-24	-1.3
Services	1,229	1,408	179	14.6
All Other	109	85	-24	-22.1

When comparing the above data to changes between fiscal years 1976 and 1977, we find that tank-automotive again shows the largest percentage of increase as it did in 1977 when the increase was 153 percent, while aircraft and electronic and communication equipment showed small decreases in 1978 compared to 20 percent increases for both categories in 1977. This is also true for ships and all other RDT&E which experienced increases of 25 and 28 percent, respectively, in 1977. On the other hand, missiles and ammunition recovered from their decreases shown in 1977.

OTHER SERVICES AND CONSTRUCTION
ELEMENTS WITH CHANGES OF \$100 MILLION OR MORE

TYPE OF EFFORT	FISCAL YEAR		CHANGE	
	1977	1978	AMOUNT	PERCENT
	(Millions of Dollars)			
Modification, Alteration and/or Rebuilding of Equipment	\$ 842	\$1,282	\$440	52

Construction	2,090	1,879	-211	-10
Maintenance, Repair, and Alteration of Real Property	920	1,097	177	19

Of the two services which showed the largest percentage increase in 1978, we find that transportation services had shown a decrease of \$308 million, or 47 percent in 1977, while the 1977 dollar increase in training services was only \$26 million. Construction reversed its trend from 1977 when it showed an increase of \$341 million, or 19 percent. The remaining items, except salvage services, maintained their upward trend. (See Section B, page 3.)

FEDERAL SUPPLY GROUPS WITH
CHANGES OF \$100 MILLION OR MORE

84	431	549	118	27
91	3,475	4,595	1,120	32

Federal Supply Group 10 (Weapons) showed the largest percentage gain in 1978, \$250 million or 76 percent, while in 1977 its dollar increase was only \$53 million. The group with the next highest percentage increase, FS Group 19 (Ships and Small Craft) had shown a decrease of 19 percent in 1977. Group 44 (Furnace Steamplants, Drying Equipment, and Nuclear Reactors) and Group 66 (Instruments and Laboratory Equipment), which showed percentage decreases in 1978, had gains of 221 and 57 percent, respectively, in 1977. (See Section C, page 7.)
