INTRODUCTION AND SUMMARY

Introduction

The National Security Act of 1947 requires the Secretary of Defense to report annually to the President and to the Congress on the property records on ". . . the fixed property, installations, and major equipment items, and stored supplies of the Military Departments maintained on both a quantitative and monetary basis . . ." (Section 410 of the National Security Act of 1947, as amended, as codified in Section 2701 of Title 10, United States Code).

This report showing the status of Department of Defense real and personal property as of September 30, 1978, has been designed to meet the statutory requirement.

The values reflected in the report for land and buildings and for long-life equipment, such as ships, represent original acquisition cost. Acquisition costs of ships as well as land and buildings are often substantially below current replacement value. Construction in progress is valued on the basis of cost of material and labor incorporated in the projects under construction. The value of items other than major equipment in supply system inventories is generally based upon standard prices, representing replacement or estimated purchase price. The value of major equipment is derived from the unit cost based on the most recently executed contract for large quantity production.

The total value as reported is exclusive of:
(1) properties and equipment of the Defense Industrial Plant and Equipment Reserve, which is under the custody of the Defense Logistics Agency (DLA) and (2) properties and supplies under the jurisdiction of the Civil Works Division, Office of the Chief of Engineers, Department of the Army. The Defense Industrial Plant and Equipment Reserve is discussed in Section C of Part II of this report. The value of Civil Works properties is shown in a footnote to Table 2.

Although reports on some of the inventories of the Departments of Defense (DoD) contain details which, for reasons of military security, cannot be publicly released, detailed classified data will be made available to appropriate committees of the Congress as required.

Department of Defense Summary (Tables 1 and 2)

The total value of DoD property at September 30, 1978 was \$278.1 billion, an increase of \$12.4 billion over that reported at the end of the preceding fiscal year. Real property inventories increased \$1.1 billion and personal property inventories including equipment, supplies, weapons and other military equipment, increased \$11.1 billion. Construction in progress increased \$254 million.

Table 1 shows the total value of property held by each DoD Component, i.e., Military Service or Defense agency. Weapons and supporting equipment assigned operational units, amounting in value to \$146.9 billion, make up the largest segment (52.8 percent) of the DoD total of \$278.1 billion; last year it was \$139.5 billion (52.5 percent).

The value of supply system inventories, including stocks afloat and at shore-based installations, amounts to \$58.8 billion, 21.2 percent of the DoD total (last year, 21.6 percent) and is the second largest segment, followed by real property, valued at about \$47.2 billion, 17.0 percent of the total.

Navy and Marine Corps, continue to report the largest value of property of all kinds, \$113.2 billion, an increase of \$5.0 billion for the year. Air Force reported \$92.3 billion as of September 30, 1978, an increase of \$3.6 billion, while Army reported \$64.6 billion, also an increase of \$3.6 billion. Defense Logistics Agency (DLA) and other elements of DoD account for \$8.0 billion, an increase of \$0.2 billion during the year.

Table 2 shows the geographic distribution of properties by principal type located (1) in the United States (U.S.), (2) in outlying areas of the U.S. including the Commonwealth of Puerto Rico, and (3) in foreign countries and afloat. Of the \$278.1 billion total, \$216.0 billion (77.7 percent) was located in the U.S.; \$59.5 billion was in foreign countries and afloat; and U.S. possessions accounted for \$2.6 billion.

PART I - MILITARY REAL PROPERTY

Section A - Inventory of Military Real Property

1. General

This section of the report presents a summary and a brief analysis of the inventory of military real property as of September 30, 1978. Detailed statistics on Civil Works property (river, harbor and flood control property under the jurisdiction of the Secretary of the Army) are not included in this report. However, summary totals for informational purposes are shown as memorandum items (Table 2).

The inventory data covering military real property includes land and improvements on such property, including installed equipment such as fixed overhead crane runways, elevators, lavatories, plumbing and electrical systems. Machine tools and production equipment at such installations, however, are excluded, but are shown under personal property, Table 38.

2. Department of Defense Summary of Real Property

Cost of Property Controlled - The total original cost of real property controlled by the Military Departments as of September 30, 1978, was \$47.2 billion (Table 3).

Of the overall increase of \$1.1 billion for FY 1978, Army accounted for \$622 million, and Navy and Marine Corps for \$150 million, and Air Force for \$344 million.

The distribution of the \$47.2 billion in real property by Military Department and by location is shown in Table 3, indicating \$40.9 billion (86.7%) was in the U.S., \$1.7 billion (3.7%) in U.S. Possessions, and \$4.5 billion (9.6%) in foreign countries. Properties at installations in an active status were valued at \$45.3 billion, 96.1 percent of the total.

This \$47.2 billion of military real property does not indicate present market value, but is based on original cost, if any. There is no cost for public domain lands and in most instances no costs for donated lands.

The data on cost to the Government do not include the amount of rentals paid nor the value of the property under lease. These data, however, do include costs of complete facilities and any improvements made thereto and owned by the Government on the leased properties.

The controlled acreage, number of installations and estimated value of public domain lands are shown in Table 4, by Military Department for military and civil functions, by location.

The same information for the lands donated to DoD are shown in Table 5.

Types of Properties - Table 6 shows the military real property costs for the entire DoD by broad geographical locations and by major facility groupings.

Table 7 shows the 10 categories of real property, listed in order of cost, in which DoD has the largest dollar investment. The 10 categories on a world-wide basis represent a total cost of \$28.3 billion, or 60.0 percent of the cost of all Defense-controlled military real property. Family housing is the largest single category followed by troop housing and maintenance facilities.

Comparable data on the 10 largest categories within the U.S. are presented for each of the Military Departments in Tables 16 (Army), 20 (Navy), and 24 (Air Force).

Cost of Buildings - The cost of land controlled by DoD represents only 1.5 percent of the total cost of real property controlled by DoD. Cost of buildings, on the other hand, represents 62.0 percent of the total costs of military real property controlled. Other improvements not classified as buildings such as airfield pavements, communication towers, utility systems, operational and test structures and road and streets account for 36.5 percent.

The overall inventory cost of buildings, world-wide, was \$29.3 billion (Table 8) as compared with \$28.3 billion for FY 1977. Of the total cost for buildings, 38 percent is for buildings in Air Force inventory, 34 percent for buildings in Army inventory, and 28 percent for buildings in Navy inventory.

Lease Rentals - The total world-wide annual rental bill paid for properties used by DoD on the basis of leases in effect on September 30, 1978, was \$80.6 million as compared with \$77.8 million on September 30, 1977 (Table 9). Of all rentals paid, 52.1 percent are for properties in the U.S. and 47.9 percent in foreign countries.

Receipts of \$13.0 million were recorded for properties leased to others on the basis of leases in effect at the end of the year (Table 9). Most (90.9 percent) of rental receipts were for properties in the U.S. About 52 percent of the total receipts were from Army, 31 percent from Navy, and 17 percent from Air Force properties leased to others.

Acreage Controlled - Through the three Military Departments, DoD controlled a total of 26.7 million acres of land throughout the world on September 30, 1978 (Table 10). The total was 1,064 thousand acres less than reported on September 30, 1977.

The distribution of world-wide acreage controlled by DoD by type of tenure is shown in Table 10. Public domain land represents 58 percent of the DoD total.

About 91 percent of Defense-controlled acreage is within the U.S., 1 percent in the U.S. possessions, and 8 percent in foreign countries. The Army has 46 percent, Air Force 40 percent, and the Navy 14 percent of the total world-wide acreage of DoD. Acreage controlled by the Military Departments in the U.S. represents 1.1 percent of the total land area in the 50 states and the District of Columbia (Table 11).

In each of four states, DoD controls more than 2 million acres (Table 12). The four states are, in order of magnitude of acreage controlled: California, Arizona, Nevada and New Mexico. Total acreage in these four states under DoD control is 14.1 million representing 58 percent of total Defense-controlled acreage in the U.S. Of all DoD-controlled acreage within the U.S., over 16 percent is in California.

The eleven states in which DoD has more than a \$1 billion investment in real property, in order of magnitude of investment, are: California, Texas, Virginia, Florida, Alaska, Maryland, Hawaii, Georgia, New York, North Dakota and North Carolina. Total costs of the military real property controlled in these states (\$21.7 billion) represent 53 percent of the total cost of land controlled in the 50 states and the District of Columbia. Property in California totals \$5.8 billion or 14 percent of the total controlled by the DoD within the U.S.

3. Department of the Army

Real property owned and controlled on a world-wide basis by the Department of the Army on September 30, 1978, cost \$14.7 billion (Table 3), an increase of \$622 million from the \$14.1 billion on September 30, 1977. Decreases in foreign countries of \$17.8 million and possessions of \$24.5 million offset somewhat increases in the U.S. of \$664.1 million. The foreign decrease is primarily due to a property reduction in Japan of \$64.6 million. There was an increase in Germany \$34.0 million, in Italy of \$5.7 million and Korea of \$8.0 million. The increases in the U.S. were primarily in Alaska, District of Columbia, Nevada, Oklahoma and Virginia. In general, the increases were connected with improvements rather than acquisition of additional land. In the possessions, there was a sizeable decrease in the Marshall Islands. Of the Army world-wide total on a cost basis, 92 percent were located within the U.S., 3 percent in U.S. possessions, and 5 percent in foreign countries.

Annual rental (\$50.3 million) paid by Army for property it was leasing world-wide on September 30, 1978, was increased \$3.5 million over the September 30, 1977 report. Of the total Army rental bill, 44 percent are for properties in foreign countries, \$22.2 million, a decrease of 8.3 percent over the FY 1977 \$24.2 million figure.

On the basis of leases in effect on September 30, 1978, (Table 9), the Army was receiving \$6.8 million for rental properties. Part of this is for grazing and agricultural use.

Total world-wide acreage under Army control as of September 30, 1978, was 12.3 million acres (403 thousand acres less than September 30, 1977). Of these, 95 percent were within the U.S., 1.5 percent in U.S. possessions, and 3.5 percent in foreign countries (Table 10).

Military real property under Army control within the U.S. as of September 30, 1978, had a total cost of \$13.6 billion (Table 13).

The Army installations in an active status, on a dollar cost basis, within the U.S. was \$693 million more than it had been in FY 1977.

Army's nonindustrial installations within the U.S. constituted 81 percent of the cost of all Army installations there.

Annual rentals paid by Army for property it leases in the U.S. amounted to \$28.1 million, an increase of about \$5.5 million; rentals received amounted to \$6.5 million.

The total acreage controlled by Army within the U.S. is reported in Table 14 by status and by type of tenure and installation. Of the 11.7 million acres controlled by Army within the U.S., 4.0 million (34 percent) were owned and 6.6 million (56 percent) were public domain lands. The acres of land held under all types of tenure were about the same this year. Table 15 shows the total cost and the acreage controlled, by type of tenure for each of the 50 states and the District of Columbia.

The total cost represented by the ten largest Army categories in the U.S. is \$8.8 billion, 60 percent of the total Army cost (Table 16). Troop housing with \$1.8 billion and family housing with \$1.3 billion are the two largest categories of real property.

Department of the Army real properties in foreign countries represent a cost of \$679 million on September 30, 1978, about \$436 million was controlled in possessions (Table 3). The Army had control of 430 thousand acres in foreign countries at the end of fiscal year 1978, while in possessions about 162 thousands acres were under Army control (Table 10).

4. Department of the Navy (including the Marine Corps)

The value of real property (Table 3) under Navy control on a world-wide basis totaled \$14.1 billion, an increase of \$150 million from FY 1977. This resulted from an increase of \$185 million in the U.S. and \$5 million in possessions, and a decrease of \$40 million in foreign countries.

Navy acreage controlled (Table 10), on a world-wide basis was 3.7 million acres. On a cost basis, 84 percent of Navy-controlled property were located within the U.S., (Table 3), 6 percent in U.S. possessions, and 10 percent in foreign countries. Of Navy properties controlled on

September 30, 1978, within the U.S., 99.9 percent were at active installations, measured on cost basis (Table 17). The value of properties classified as industrial facilities comprised 19.6 percent of Navy realty in the U.S.

Of the total acreage Navy had under its control within the U.S. on September 30, 1978, 31 percent, or 1.02 million acres, were owned outright (Table 18). An additional 2.0 million acres (59 percent of the total) were public domain lands. Of total acreage controlled by the Navy in the U.S., virtually all were located at installations which were in an active status on September 30, 1978.

The cost and acreage of Navy real property controlled, by type of tenure, in each state of the U.S. is shown on Table 19.

The ten real property categories representing the greatest cost to Navy of properties in the U.S., are shown in Table 20. In total, they constitute 62.2 percent (\$7.3 billion) of the overall Navy real property costs in the U.S.

5. Department of the Air Force

Real property under Air Force control throughout the world on September 30, 1978, cost the Government \$18.4 billion (Table 3) as compared with \$18.0 billion on September 30, 1977. This represented about 39 percent of DoD total investment in military real property. The Air Force total cost increased 1.9 percent during the period between reports. Of the total net increase of \$344 million, U.S. holdings increased \$188 million, those in U.S. possessions decreased \$29 million, and property controlled in foreign countries increased by \$185 million. Investment in real properties of the Air Force overseas on September 30, 1978, comprised 13 percent of all Air Force properties.

Air Force annual rentals paid for property used throughout the world (Table 9) on the basis of leases in effect on September 30, 1978, amounted to \$19 million, compared to \$17 million in the previous report. During the period, rentals for properties in foreign countries increased by \$1.6 million, a 21 percent increase.

Returns to the Air Force on the basis of leases in effect on September 30, 1978, for Air Force properties used by others amounted to \$2.3 million, an 8 percent increase from FY 1977.

Land controlled by the Air Force throughout the world totaled 10.8 million acres on September 30, 1978 (Table 10). The total was 53 thousand acres less than that reported for September 30, 1977. The most significant contribution to this reduction resulted from disposal of Craig AFB and two off base sites in Alabama (2,857 acres); disposal of 1,080 acres at Luke AFB Range in Arizona; disposal of two missile sites at Vandenberg AFB and of Oxnard AFB in California (1,762 acres); disposal of 333 acres at two missile sites off base to Lowry AFB, Colorado; disposal of Spence Air Force Auxiliary Field in Georgia (1,250 acres); disposal of a major portion of Otis AFB in Massachusetts (17,248 acres); closure of Kincheloe AFB in Michigan (2,515 acres); disposal of Tachikawa ABS and three off-base sites in Japan (1,828 acres); disposal of one installation in Spain (2,254 acres) and disposal of Isley, North and West Tinian Auxiliary Airfields in the Trust Territories of the Pacific (12,387 acres).

Of the total world-wide Air Force investment, 84 percent represented installations within the U.S., 13 percent in foreign countries and less than 3 percent in U.S. possessions.

Military real property controlled by the Air Force within the U.S. represented a cost to the Government of \$15.5 billion (Table 21).

Of the Air Force total investment in the U.S., 97.3 percent were at active installations. Industrial activities under the Air Force control constitute 4 percent of the total Air Force property in the U.S.

Of the 15.5 million acres (Table 10) held as withdrawals from public domain by the DoD within the U.S., the Air Force controlled about 45 percent. Much of this land is used for missile ranges and advanced fighter bomber training. Of the 9.2 million acres held by the Air Force in the U.S. on September 30, 1978, 1.4 million (15 percent) were owned and 6.9 million (75 percent) were public domain land (Table 22).

The total cost of the ten major categories (\$10.8 billion) of real properties within the U.S. (Table 24) represented 70 percent of the Air Force total cost within the U.S. Land operational facilities with \$1.7 billion accounted for the largest segment of total Air Force investment within the U.S. Three other categories costing more than one billion dollars each - family housing, airfield pavements and maintenance facilities.

Air Force-controlled properties in foreign countries on the basis of cost, amounted to \$2.4 billion (Table 3) on September 30, 1978. The Air Force investment in possessions totalled \$473 million. Values in possessions decreased \$29 million. In foreign countries, they increased \$185 million from values reported for September 30, 1977. Land rights were exercised by Air Force on 1.5 million acres (Table 10) in foreign countries as of September 30, 1978.

Section B - Military Construction in Progress

The cost of work in place, as reported by the Military Departments on construction projects, which have been started but not completed and transferred to the inventory, is shown by major geographical areas in Table 25. The cost reported represents the cost of labor and materials incorporated on the construction projects. The Federal Government has a property interest in these projects. Most of them are being built on Government-owned land.

Upon satisfactory completion of the project and acceptance by the Military Department, total cost of the completed project is added to the real property inventory account of the respective Department. On inclusion in inventory, the amount is no longer shown as construction work in progress; thus, the amounts in Table 25 may vary considerably from year to year.

As of the year ending September 30, 1978, the amount of military construction in place for active projects was \$4.4 billion as compared with \$4.1 billion at September 30, 1977. An additional \$7,980 million was in place on Civil Works projects of the Corps of Engineers.

MILITARY REAL PROPERTY

TABLES

TABLE 1 - SUMMARY OF PROPERTY HOLDINGS - BY DOD COMPONENT AND TYPE
as of 30 September 1978

DEPARTMENT OF DEFENSE

Type and Class of Property	(Millions of Dollars)					Department of Defense
	Army 1/	Navy (Including Marine Corps)	Air Force	Defense Logistics Agency	Office, Secretary of Defense and Other Defense Agencies 3/	
Real Property Inventory - Total	14,727	14,081	18,367	-	-	47,175
Construction In Progress (Cost of Work In Place) - Total	2,117	1,821	415	-	-	4,353

1 Includes construction work for DoD agencies.

2 Excludes \$7,980 million cost of work in place of civil works projects.

PART II - MILITARY PERSONAL PROPERTY

Section A - Inventory of Military Equipment and Supplies
in the Consolidated Supply Systems and in
Stock Funds

1. General

This section of the report deals with the inventories of the supply systems in DoD. For each of the four Military Services, and for DLA, dollar data are presented in terms of the major purposes for which the supplies and equipment are held.

Secretary of Defense logistics guidance establishes an objective for acquisition of materiel related to the Approved Forces specified in the Five Year Defense Program. This objective is the quantity of an item authorized for peacetime and in wartime, from D-Day through the period and at the levels prescribed by such guidance. Assets in excess of this level may also be retained, within prescribed limits, to support these forces and for other retention objectives.

The inventories in the following tables are, therefore, stratified into those held for the Approved Force of the component, as well as economic retention stock, contingency retention stock, and potential DoD excess stock for which disposal action has not yet been initiated. The inventories are also subclassified into broad commodity categories representing families of similar kinds of items.

Inventories are accounted for in the supply systems of the Military Services and DLA from time of acceptance until they have been issued to a using unit. The supply system inventories are those being held in the storage or warehousing facilities of these services for issue to the user. They constitute that segment of the overall materiel supply system which is defined in the Joint Chiefs of Staff dictionary as the "phase of military supply which extends from receipt of finished supplies by the Military Services through issue for use or consumption."

The stocks are physically located at depots, posts, camps, stations and bases in the U.S. and possessions, and in foreign countries and supply ships afloat. They are stored in warehouses, open storage space, ammunition depots, fuel tanks, etc.

Supply items which have been issued to the consuming military units, such as divisions, air-wings, and most ships, are not considered as assets of the supply system. These items are in the hands of the ultimate user and as such are carried in unit records until consumed, destroyed, captured, lost or otherwise disposed of.

In this category, throughout DoD for the purpose of this report, are ships, complete aircraft, complete ballistic missiles, and space vehicles which are generally considered to be operational weapons systems and not supply system items. The Navy and Air Force do not accept aircraft and these types of missiles into the supply system nor are they returned to the supply system for overhaul or modification, control being retained in operational commands. The Army follows a different practice for aircraft and maintains supply system inventories which are issued upon requisition the same as supply items. To be consistent in this report, however, Army inventories of aircraft have been excluded from the supply system tables and are carried as "in-use".

Part II, Section B, of this report includes data on major items which have been issued from the supply system to the ultimate users and are still in the hands of the user. If such an item in a military unit becomes unserviceable, it is normally replaced by a serviceable item from the supply system. The unserviceable item (if of a repairable type) is returned to the supply system where it may be repaired and put back in supply channels or declared excess and disposed of.

Also not included in the supply inventory totals is the value of excess stocks for which disposal action has been initiated. Table 41 consists of the value of such stocks as well as excess and surplus stocks from other sources such as using units.

Stock Funds

Stock funds do not constitute a separate supply system. They are operational and financial systems employed by the Military Services and DLA principally to facilitate financial control over consumption-type supply items for which there is recurring demand. The stock fund mechanism permits the Services to handle inventories of such continuous demand items on a replacement basis much as private business firms

do when they replace stocks depleted by sales with new stocks purchased with the proceeds from such sales. Stock fund inventories for each Military Service and DLA are shown separately in this section; however, they are also included in the overall totals for the entire supply system of each Military Service.

Reporting of Inventory Categories and Strata

Data representing the dollar value of inventories in the aggregate supply system, both the items which are financed by stock funds and those financed by appropriated funds, are shown for each of the Military Services and DLA (stock fund only) in the numbered tables in this section.

Each of these tables shows the dollar amount of inventories in each major DoD commodity category and in each stratum (groupings according to the purposes for which the supplies are retained). In past reports, tables showed commodity categories for each Service based on groupings reported by the Services when this report was first established. Since these categories are no longer employed by the Services, which periodically change their systems, the inventories are now uniformly reported in the standard DoD categories.

The stratification accounts in use by the Services and DLA are uniformly prescribed by DoD Instruction 4140.18, and are: (1) Approved Force Acquisition, (2) Approved Force Retention, (3) Economic Retention, (4) Contingency Retention, and (5) Potential Excess Stocks. These inventory accounts are defined as follows:

a. Approved Force Acquisition Stock is the value of assets allocated to the Approved Force Acquisition Objective (AFAO), which is the quantity of an item authorized for peacetime acquisition to equip and sustain the U. S. Approved Force in peacetime and in wartime, for the period and at the level of support prescribed by the latest logistics guidance issued by the Secretary of Defense. Stocks in this stratum held by one Service are not required to be transferred to another Service without reimbursement, but all other strata are subject to transfer without reimbursement.

b. Approved Force Retention Level Stock (AFRLS) is the value of the assets allocated to the Approved Force Retention Level (AFRL), which is the quantity, in addition

to the Approved Force Acquisition Objective (AFAO), that is required to equip and sustain the Approved Forces from D-Day until production equals the rate at which the item is required.

c. Economic Retention Stock is the value of assets excess to the AFRLS which will be more economical to retain for future issue than to replenish by procurement.

d. Contingency Retention Stocks is the value of assets excess to the AFRLS which normally would be allocated to Potential DoD Excess but which will be retained for possible contingencies for U.S. Forces.

e. Potential DoD Excess Stock is the value of assets above all authorized retention levels of the reporting DoD Component which are in process of screening for utilization, but for which final determination as DoD excess has not been made.

In addition to the stratified stocks shown above, the tables that follow show unstratified stocks consisting of in-transit stocks, stocks in hands of contractors, and other stocks that are, for the time being, unstratified for some reason.

In-transit stock is that owned by a DoD Component, which is enroute (1) from manufacturers or suppliers; (2) from U. S. depots to overseas commands or vice versa; (3) from U. S. depots to U. S. commands or vice versa; and (4) between U. S. depots; and which has not been received by the consignee. Accounting systems of reporting components may not always reveal these in-transit or other stocks separately; instead these stocks may be stratified as appropriate by the DoD Component.

2. Summary of DoD Supply System Inventories (Tables 26 and 27)

The total dollar value of equipment and supplies in inventory in the DoD as of September 30, 1978, was \$58.8 billion, an increase of \$1.3 billion* from that reported as of September 30, 1977. Table 26 shows the \$58,830 million of inventories of funds through which they were acquired. Appropriation-financed inventories amounted to \$46,241 million, an increase of \$1,133* million since FY 1977,

* An error in the Fiscal Year 1977 report is explained under Air Force, p. 50.

whereas stock-funded inventories increased in dollar value by \$211 million during the same period. Included in this table are a total of \$1,579 million of Navy-owned ship-board supplies and aviation consolidated allowance list material.

The stratified supply system inventories are provided by each of the DoD Components by the commodity categories that each component uses in accounting for its stocks. However, since there are some 165 of these categories or classes of items covering the appropriation-financed and stock-funded inventories of the several components, differing in nomenclature as well as in content, it is not practical to prepare combined DoD tables using each of them. In an effort, however, to reduce the consolidation to manageable proportions, there has been established a set of 23 standard categories of broad application into which the 165 Services categories have been aggregated. The assignment of Service categories to the standard grouping has been done with the advice of Service personnel, but it is not perfect since some of the Service categories contain both principal items and some of the secondary items that support them, while others for Service reasons, join items of more than one standard category.

The aggregation is intended to provide a brief summary overview of Defense stocks, by broadly comparable groupings, for management purposes.

Table 27 shows by these standard categories the stratified stocks of DoD as of September 30, 1978. Approved Force stocks are not transferable on a nonreimbursable basis, but all other stocks are, and they are aggregated in a subtotal in the last column.

3. Army Supply System Inventories (Table 28)

The total reported value of Army stocks as of September 30, 1978, amounted to \$17.2 billion, a decrease of \$152 million since FY 1977. Appropriation-financed inventories made up 83 percent of this; they decreased \$5 million. Stock-funded inventories decreased \$147 million (Table 26).

Approved Force Acquisition stocks of the Army account for 69 percent of the stratified total, leaving 31 percent in the transferable/disposal strata. Table 28 shows total stocks by materiel category. Table 29 shows the stock-funded items stratified by materiel category. They belong

to the Army Materiel Development and Readiness Command, the Army Forces Command, the Army Training and Doctrine Command, the Commissary Resale Division, and the Defense Supply Service as well as the U. S. Army overseas commands.

4. Navy Supply System Inventories (Table 30)

As of September 30, 1978, Navy reported supply system inventories valued at \$15.1 billion. As explained in the general text, supply system stocks, as covered by the Navy financial inventory, do not include supplies carried in the storerooms of combatant ships as shipboard supplies or Aviation Consolidated Allowance List (AVCAL) stocks. The value of these stocks is appended to the inventories of Table 30 as line B.2. Comparison of this year's total value of Navy supply system inventories with that at September 30, 1977, shows an increase of \$140 million.

Navy Approved Force Acquisition Stocks account for 69.4 percent of all stratified stocks, including stock-funded inventories. The latter are shown in detail in Table 31.

5. Marine Corps Supply System Inventories (Table 32)

Supply stocks of the Marine Corps totaled \$2.6 billion as of September 30, 1978, a decrease of \$100 million over the \$2.7 billion showing in FY 1977. Table 32 shows the DoD categories of inventories. Stock-funded inventories decreased \$1.5 million; they are shown in detail in Table 33.

6. Air Force Supply System Inventories (Table 34)

Air Force inventories totaled \$19.4 billion as of September 30, 1978, an increase of \$1.2 billion over FY 1977. Omission of base operating stocks from the FY 1977 report caused the total for that year to be \$1,724 billion low. The actual total for FY 1977 was \$18,201,657 thousand. Stock fund inventories increased \$105 million; they represent 14.4 percent of the Air Force total, as opposed to 14.8 percent for FY 1977. Details are shown in Table 35. Approved Force Acquisition stocks were 73.5 percent of all stratified stocks.

7. Defense Logistics Agency Supply System Inventories (Table 36)

DLA stocks, financed by the Defense Stock Fund, totaled \$4.5 billion as of September 30, 1978, an increase of \$253 million over FY 1977. Approved Force Acquisition stocks represent 80.2 percent of the stratified stocks. Table 37 displays details by Defense Stock Fund category.

Section P - Personal Property Other than Supply System Inventories

This section of the report covers personal property owned by DoD other than materiel in the supply system inventories. It includes various types of personal property, as follows:

1. Weapons and Other Military Equipment in Use

This category of equipment generally comprises items of materiel assigned to using units and includes all major weapons and supporting equipment. The equipment may have been issued from the supply system inventories, at which time accountability is picked up by using unit or (as in the case of aircraft, ships, etc.) it may have been purchased from a manufacturer, military or private, for direct shipment to a using unit.

Quantitative property records are maintained on major items in use until the item is destroyed, lost or otherwise disposed of. Minor and consumable type items are not maintained on property records since they are assumed to be consumed at time of issue. In addition to quantitative records, the Navy and Air Force maintain monetary accounting records of the principal equipment in use. Army derives statistical values of such property by periodically pricing-out quantities of items.

The total value of this type of equipment which had been issued or assigned to using units at the end of fiscal year 1978 was \$146.9 billion, an increase of \$7.4 billion over the value at the end of fiscal year 1977. This compares with an increase of \$13.2 billion in fiscal year 1977. Because this category includes the more costly types of military items, it constitutes by far the largest element of the total property of DoD, and one which has been steadily rising in value, as the more expensive modern weapons are added.

a. Army

The value of Army weapons and other military equipment in use as of September 30, 1978, was determined to be \$23.5 billion. Included in the list are: aircraft, valued at \$1.9 billion (includes \$.5 billion of aircraft in Army supply system); a decrease of \$.2 billion; guided

missiles, valued at \$3.8 billion, an increase of \$0.3 billion; tanks and combat vehicles, \$6.5 billion, an increase of \$.7 billion; tactical and support vehicles, \$4.0 billion, an increase of \$0.1 billion; and other major items, such as communications and electronics, and heavy support equipment, valued at \$4.3 billion, an increase of \$0.3 billion.

b. Navy

Weapons and equipment of all kinds in use by the Navy and Marine Corps as of September 30, 1978, were valued at \$73.1 billion, a net increase of \$4.5 billion since FY 1977. Ships of the active and inactive fleets totaled \$45.6 billion, an increase of \$3.7 billion since FY 1977. Service crafts, such as utility craft, open lighters, floating derricks, and harbor tugs, were valued at \$1.0 billion, about the same as previous years.

Navy and Marine Corps aircraft were reported at \$19.7 billion, a decrease of \$1.7 billion since the FY 1977 report. The cost of the installed engine is included, but there were uninstalled engines in use currently valued at \$304 million, a decrease of \$349 million from FY 1977. Aircraft ground support equipment is reported at \$3.0 billion, an increase of \$1.9 billion.

Complete missiles, valued at \$1.2 billion as of September 30, 1978, were reported by the Navy. This does not include the missile components or nonstrategic missiles reported in the supply system. Ammunition and other expendable ordnance is reported at \$1.3 billion, an increase of \$574 million since FY 1977.

Fleet Marine Force organic equipment totaled \$793 million, an increase of \$25 million, while Marine Corps organic property totaled \$185 million, \$46 million above the FY 1977 figure.

c. Air Force

Weapons and other military equipment reported by the Air Force total \$50.3 billion as of September 30, 1978, an increase of \$1.7 billion since FY 1977. This includes aircraft valued at \$35.1 billion, an increase of \$.8 billion; missiles, valued at \$5.2 billion, a decrease of \$0.3 billion; ground communications and electronics equipment, \$1.5 billion, an increase of \$0.1 billion; vehicles, valued at \$1.2 billion, an increase of \$0.1 billion; and other mission equipment, valued at \$7.3 billion, an increase of \$0.9 billion.

2. Plant Equipment (Tables 38 and 39)

This is personal property of a capital nature in custody of Military Departments and contractors. Included are machinery, equipment, furniture, vehicles, machine tools, and accessory and auxiliary items for manufacturing or administrative use. The Defense Industrial Plant Equipment Center (DIPEC), an element of the DLA, has management responsibility for idle industrial plant equipment within its scope, and it controls the allocation and reutilization of such equipment. The Military Departments and DLA retain control over IPE in active use and in mobilization packages for equipment used in its manufacturing processes. DIPEC, however, maintains the records of much of the equipment and has contributed much of the statistical information appearing in Tables 38 and 39.

Included in these tables are the plant equipment and property owned by the DLA, reported separately as well as that of the Advanced Research Projects Agency, which is included with the equipment of the Military Department that is managing and using it.

Table 38 also shows the value of the other capital plant equipment, some of it furniture and specialized equipment not usually associated with production or plant use, that is owned by the Office of the Secretary of Defense and the several Defense agencies (other than DLA).

The total value (acquisition cost) of the plant equipment reported by DIPEC and the Military Departments and Defense Agencies as of September 30, 1978, was \$15.0 billion, an increase of \$1.7 billion since FY 1977.

A detailed inventory of metalworking machinery, by Production Equipment Code, is shown in Table 39.

3. Inventories Held in Industrial Funds (Table 40)

Reported as personal property of DoD are inventories, consisting of raw materials, supplies, and work-in-process, held in all industrial funds. Use of industrial funds, authorized by Section 405 of Title IV of the National Security Act, permits the financing of industrial or commercial-type activities and the development of production costs to be used as a basis for charging the appropriations of customers for the products or services furnished to them by the activity financed by the fund. For financial details

of DoD Industrial Funds, see the annual report, "Working Capital Funds of the Department of Defense," issued by Washington Headquarters Services (OSD).

As of September 30, 1978, 82 DoD activities were operated under industrial fund charters. The Army operated 25; the Navy, 50 (one of which is a printing activity located in 32 separate plants); the Air Force, 3 (one is a laundry and dry cleaning activity operated at 17 installations); Marine Corps, 2; DLA, 1; and DCA, 1.

The net inventories, consisting of raw materials, supplies and work-in-process, held in all DoD industrial funds amounted to \$915 million as of September 30, 1978, an increase of \$149 million in the FY 1977-78 period. The largest increases were in Army industrial funded activities, especially depot manufacturing and maintenance activities.

4. Excess, Surplus, and Foreign Personal Property (Table 41)

This is personal property on which disposal action has been initiated by the DoD Component. It may have emanated either from supply system inventories or from equipment in use; in either case accountability is dropped at the time of transfer by the owning agency to disposal channels and is picked up in the property disposal account shown in Table 41. Here it is considered an element of DoD personal property until actually disposed of through sale, donation, or transfer to some non-DoD agency. In the case of industrial plant equipment (IPE), although accountability may be picked up by the disposal offices, and the value included in Table 41, the control inventory maintained by the Defense Industrial Plant Equipment Center (DIPEC) will continue to maintain a record so that a piece of IPE for which a requirement develops may be recovered from disposal channels right up to the time of final disposition. As noted in the footnote to Table 38, however, this is not included in the IPE inventory.

The value of property in disposal as of September 30, 1978, totaled \$4.9 billion, an increase of \$472 million since September 30, 1977. Property reflected under Military Service accountability includes ammunition and explosive materials, and complete aircraft awaiting reclamation action.

Section C - Defense Industrial Reserve

1. General

a. Section 809 of Public Law 93-155 changed the title and scope of the National Industrial Reserve Act of 1948. The new Act is cited as the "Defense Industrial Reserve Act." The National Industrial Reserve was a small segment of plants and equipment that were administered by the General Services Administration. The Defense Industrial Reserve now includes that GSA segment and plant and equipment items that were previously under DoD management.

b. The term "Defense Industrial Reserve" means (a) a general reserve of industrial manufacturing equipment, including machine tools, selected by the Secretary of Defense for retention for national defense or for other emergency use; (b) those industrial plants and installations held by and under the control of the Department of Defense in active or inactive status, including Government-owned/contractor-operated plants and installations which are retained for use in their entirety, or in part, for production of military weapons systems, munitions, components, or supplies; (c) those industrial plants and installations under control of the Secretary which are not required for the immediate need of any department or agency of the Government and which should be sold, leased, or otherwise disposed of.

c. The "Defense Industrial Reserve Act of 1973" requires that minimum reliance be placed on government-ownership of plants and equipment and maximum reliance on private enterprise. The Act also requires the Secretary of Defense to maintain an essential nucleus of government-owned facilities.

2. Congressional Declaration of Policy and Purpose

In enacting this Act, it is the intent of Congress (a) to provide a comprehensive and continuous program for the future safety and for the defense of the United States by providing adequate measures whereby an essential nucleus of Government-owned industrial plants and an industrial reserve of machine tools and other industrial manufacturing equipment may be assured for immediate use to supply the needs of the Armed Forces in time of national emergency

or in anticipation thereof; (b) that such Government-owned plants and such reserve shall not exceed in number or kind the minimum requirements for immediate use in time of national emergency, and that any such items which shall become excess to such requirements shall be disposed of as expeditiously as possible; (c) that to the maximum extent practicable, reliance will be placed upon private industry for support of defense production, and (d) that machine tools and other industrial manufacturing equipment may be held in plant equipment packages or in a general reserve to maintain a high state of readiness for production of critical items of defense materiel, to provide production capacity not available in private industry for defense materiel, or to assist private industry in time of national disaster.

3. Reports to Congress

The Secretary of Defense must submit to the Congress on or before April 1 of each year a report detailing the action taken under the Act and containing such other pertinent information regarding the status of the defense industrial reserve as will enable the Congress to evaluate the administration of such reserve and the necessity or desirability for any legislative action regarding such reserve.

4. Relationship to this Report

The plants and equipment set forth in Tables 38, 39 and 42 are part of the Defense Industrial Reserve.

MILITARY PERSONAL PROPERTY

TABLES

TABLE 26 - SUPPLY SYSTEM INVENTORIES - BY SOURCE OF FUNDS
AND DOD COMPONENT

as of 30 September 1978

* - Less than \$500.

a/ These standard categories have been developed to facilitate the aggregation of the many service commodity categories into approximately comparable groupings at the Department of Defense level. Categories that are labeled "principal" items may, in addition to the systems or weapons of which they are primarily composed, contain some secondary items in support of them.

b/ Included in Category 4.

NOTE: Figures may not add to totals due to rounding off.

1/ Exclusive of combatant ships.

2/ Includes the United States, Puerto Rico and the Virgin Islands, American Samoa, Guam, and Trust Territory of the Pacific Islands.

PART III - PROPERTY IN THE CUSTODY OF CONTRACTORS

In order to comply with a congressional request, the value of all DoD-controlled real and personal property in the custody of contractors has been brought together in one table (Table 42) showing individual totals by State.

The values shown in Table 42 should not be added to those shown in Parts I and II of this report since they are included, but not separately identified, in the totals of the various tables.

The amounts shown in Table 42 were obtained from reports furnished by the contractors to the property administrators in accordance with the Defense Acquisition Regulation, Appendices B-311 and C-311.

1/ The values shown in the respective columns for each State consist of the property under the control of prime contractors. In those cases where subcontractors are involved, the property located at subcontractor sites is included in the State location of the prime contractor rather than in the State of actual location.

2/ Consists of total value of each item of Government-owned plant equipment having a unit cost of \$1,000 or more.

3/ Consists of total value of each item of Government-owned plant equipment having a unit cost of between \$200 and \$1,000.
