Directorate for Information
Operations and Reports

January 1982

FOREWORD

Prime Contract Awards by Region and State is published annually by the Office of the Secretary of Defense, Washington Headquarters Services, Directorate for Information Operations and Reports (WHS/DIOR). This issue provides information on the geographical distribution of Department of Defense prime contract awards over $10,000 for Fiscal Years (FY) 1979, 1980, and 1981 by United States census region and state.

This information is detailed in seven tables and three figures showing:

1. The net value and percent distribution of awards, by region and state, for FY 1979, 1980, and 1981;
2. The net value and percent distribution of awards within the seven major hard goods programs, by region, for FY 1979, 1980, and 1981;
3. The net value and percent distribution of awards in the 25 major procurement programs for each state for FY 1979, 1980, and 1981; and
4. Data on research, development, test, and evaluation (RDT&E) awards by region and state according to the type of contractor for FY 1979, 1980, and 1981.

Requests for additional information or copies should be addressed to the Director, Washington Headquarters Services, Room 3E843, The Pentagon, Washington, D.C. 20301. The contents of this publication may be reprinted without permission.

INTRODUCTION

This report contains a variety of data on the distribution of prime contract awards over $10,000 within the United States, by census region and state, for Fiscal Years (FY) 1979, 1980, and 1981.

The data are presented in seven tables. Table 1 shows the net value and percent distribution of awards, by region and state, for FY 1979, 1980, and 1981. Table 2 shows the net value and percent distribution of awards within the seven program areas comprising major hard goods, by region, for FY 1979, 1980, and 1981. The net value and percent distribution of awards, by state, in the 25 major procurement programs for FY 1979, 1980, and 1981 are provided in Table 3. Table 3A shows the rank and percentage distribution for the five states with the largest dollar volume of awards in each of the 25 major procurement programs in FY 1981.

Data on research, development, test, and evaluation (RDT&E) awards, by region and state, according to type of contractor, are presented in Tables 4A, 4B, and 4C, for FY 1979, 1980, and 1981, respectively.

Prime contract data are not a means of measuring the total volume of defense work performed within a state, as a substantial amount of the work may be subcontracted. About one-half of the prime contract dollars for major hard goods and unknown proportions of other types of procurement are subcontracted by prime contractors.

NOTES ON COVERAGE

When tabulating data for this report, contract awards were attributed to the location of the plant where the work will be finally processed or assembled. In many instances, a prime contractor will have work done at more than one plant. In these cases, the value of the contract has been attributed to the state where the plant is located that will produce the largest dollar amount of work. When this amount cannot be determined, contracts are assigned to a "not-distributed-by-state" category and are excluded from this report. Amounts not distributed by state also include contract actions of $10,000 or less, contract actions performed in classified locations, Foreign Military Sales (FMS) contract actions entered into overseas, and other contracts for work performed outside the United States.

Some special characteristics of the data on prime contract awards by procurement program category should be noted:

1. The Electronics and Communication Equipment category includes all electronics procured separately under prime contract. However, in the case of Missiles and Space Systems and Aircraft Engines and Related Spares, electronics work is often a basic part of the assembly prime contract; therefore, awards for electronics are included in the statistics for these categories.

2. Contracts for all other types of equipment and parts for repair, maintenance, overhaul, modification, and other services, which can be identified with a specific category, are assigned to that category. As an example, the installation or inspection of equipment at ballistic missile sites is recorded as missile work in the state where the site is located. However, the contract for manufacturing such equip-

ment is reported according to the location of the manufacturer's plant. Therefore, aircraft, missile, or other program contracts may be reported in states where there are no weapon assembly plants but where bases, laboratories, or suppliers of instruments, parts, or support equipment may be located.

3. The dollar value shown for each category includes the RDT&E work associated with it. RDT&E coverage includes research, exploratory development, advanced development, engineering development, operational systems development, and management and support. Full definitions for each of these categories are provided in Defense Acquisition Regulation 4-101.

4. Beginning in FY 1980, data include contract awards for civil functions. Civil functions encompass planning, programming, designing, constructing, and operating Federal water resource projects for navigation, flood control, hydroelectric power production, water supply, and other related activities. Data prior to this time were limited to military prime contract awards.

5. Figures in these tables may not add up due to rounding.

HIGHLIGHTS OF FY 1981 DATA

Total prime contract awards in FY 1981 totaled $105,223 million, an increase of $21,537 or 25.7 percent over FY 1980.

Awards over $10,000 for work performed within the United States, by census region and state, are shown in this report. These awards totaled $87,761 million in FY 1981. (See Table A, page 5.) This total was $19,691 million or 28.9 percent more than the FY 1980 figure and represents 83 percent of all prime contracts awarded in FY 1981. (This percentage has remained at approximately 82 percent for the past four fiscal years.)

Distribution of Prime Contract Awards Over $10,000 by Region and State

The U.S. census regions are shown in Figure 1 (page 8). The three regions that received the largest share of the awards in FY 1981 were the Pacific (23.5 percent), the South Atlantic (14.6 percent), and the West South Central (13.0 percent). (See Figure 2, page 9.) Those regions that make up the eastern part of the United States received a total of 51.8 percent of the awards. The western regions received the remaining 48.2 percent of the awards.

The three regions with the largest increases in the net value of total awards over FY 1980 were the West South Central (up $4,677 million or 69 percent); the Pacific (up $3,603 million or 21 percent); and the South Atlantic (up $2,672 million or 26 percent). The remaining regions had award increases in FY 1981 ranging from 18 to 60 percent. No region had a decrease in awards between FY 1980 and 1981.

In individual states, South Dakota and Louisiana more than doubled their awards. (See Table 1, page 13.) South Dakota recovered from a 1.1 percent decrease in FY 1980, while Louisiana continued the upward trend established in FY 1980. Five states did have award decreases, including Delaware and West Virginia, who had experienced 184.3 and 101.2 percent increases respectively in FY 1980. Table B (page 5) shows those states with the largest percentage change in awards from FY 1980 to FY 1981.

Distribution of Awards for Major Hard Goods

Table 2 (page 15) shows the net value and percent distribution of awards within the seven major hard goods programs, by region, for FY 1979, 1980, and 1981. Table C (page 6) shows that awards within these hard goods programs accounted for 68 percent of all prime contract awards in FY 1981, a 2 percent decrease over the FY 1980 figure. However, the net value of awards in all hard goods programs experienced a 26 percent increase in FY 1981. The percentage distribution of awards within the seven major hard goods programs, both as a percentage of all awards and as a percentage of all hard goods awards, remained relatively steady during the 3-year period.

Figure 3 (page 10) shows the top three regions for FY 1981 in each of the seven major hard goods programs as well as the net value and percent distribution of awards in each region for FY 1980 and 1981. The Pacific region ranked as one of the top three regions most frequently, placing in the top three for six of the seven programs.

Distribution of Awards by State in the 25 Major Procurement Programs

The net value and percent distribution of awards in each of the 25 major procurement programs for the fiscal years 1979 through 1981 for individual states are provided in Table 3, beginning on page 17. Table 3A (page 69) shows the five leading states in each of these 25 procurement programs for FY 1981. While California ranked first in ten of the programs, there was a broad representation of other states in the top five rankings. A total of 31 states appear in the table, down by four from FY 1980. In FY 1981, 11 states ranked first in one or more of the programs, 17 ranked second, 17 ranked third, 16 ranked fourth, and 15 ranked fifth.

Distribution of Research, Development, Test, and Evaluation (RDT&E) Awards

As shown in Table D (page 6), RDT&E awards totaled $10,331 million in FY 1981, an increase of $977 million or 10.4 percent over the FY 1980 figure. The ratio of RDT&E awards to total awards was 12 percent in FY 1981, as compared to 14 percent in FY 1980, and 15 percent in FY 1979. Table E (page 7) shows that the distribution of RDT&E awards among the three types of contractors did not change from FY 1980 to FY 1981.

Table F (page 7) shows the net value and percent distribution for both total awards and RDT&E awards, by region, and the percent distribution of RDT&E awards within each region for FY 1981. Seven of the nine regions received more RDT&E awards in FY 1981 than in FY 1980. The three regions that had the largest dollar increases were the Pacific region ($764 million or 22 percent), South Atlantic region ($335 million or 25 percent), and Mountain region ($319 million or 65 percent).

In terms of the distribution of RDT&E awards, the West North Central region showed the most significant change. In FY 1980, 11.0 percent of all RDT&E awards were in this region; this percentage decreased to 2.2 percent in FY 1981. Other regions which experienced significant changes were the Pacific, Mountain, and South Atlantic regions, which had increases of 4.0, 2.6, and 1.8 percent, respectively. The percent distribution of RDT&E awards to the remaining regions remained relatively constant.

The ratio of RDT&E awards to total awards showed a steep decrease from FY 1980 to FY 1981. Seven of the nine regions reported a decrease, led by the West North Central, which had a drop of 15.2 percent. The only regions having gains were the Mountain and Pacific regions, with increases of 0.9 and 0.2 percent, respectively.

Tables 4A, 4B, and 4C (pages 71, 75, and 79, respectively) show the net value and percent distribution of prime contract awards over $10,000 for RDT&E work, by region and state, according to type of contractor (educational and nonprofit institutions, other nonprofit institutions, and business firms), for FY 1979, 1980, and 1981, respectively. As shown in Table 4C, the four states receiving the largest share of RDT&E awards in FY 1981 were California (33.3 percent), Massachusetts (9.7 percent), Washington (7.0 percent), and Florida (6.6 percent). Maryland ranked first in awards to educational institutions (31.7 percent), while California ranked first in awards to both other nonprofit institutions (44.5 percent) and to business firms (34.5 percent).
