FOREWORD

Military personnel planners require information on recruit demographics and motivations to monitor current recruiting strategies and to forecast future enlistment and reenlistment trends. A requirement for this research was first given to ARI in 1982 by GEN Thurman, then Deputy Chief of Staff for Personnel. ARI's efforts in this area began with the 1982 DA Survey of Personnel Entering the Army. Tabular results of that survey are reported in Volumes 1 and 2 of The 1982 DA Survey of Personnel Entering the Army: Tabular Description of 1982 (Active) Army Accessions (Elig, Johnson, Gade, and Hertzbach, 1984a, 1984b). The current report continues ARI's efforts in support of Army recruiting. This report and the companion Volume 2 are intended to serve as updated and expanded references on Army manpower.

EDGAR M. JOHNSON
Technical Director

ACKNOWLEDGEMENTS

ARI acknowledges the support of the project officers for the 1983 ARI Survey of Army Recruits, LTC Jim Simon and MAJ(P) Steve Bauman, Programs Branch, Directorate of Military Personnel Management, ODCSPER, Department of the Army. This survey effort could not have succeeded without the cooperation of the personnel of the US Army Reception Stations; their efforts in administering this survey are greatly appreciated.

We wish to thank the many people who reviewed drafts of the survey and suggested revisions or additional topic areas. We especially thank the members of the Research Advisory Panel for Recruit Surveys whose contributions were very helpful and timely. The project officers for this effort began their contributions with service on this panel. Also serving on this panel from the Office of the Deputy Chief of Staff for Personnel were COL Zaldo, Director of Manpower and Personnel Management, and LTC Arrington, Chief of the Programs Branch. We especially appreciate the help of COL Cato for his contributions and for arranging and coordinating input from the various directorates at the US Army Recruiting Command (USAREC). COL Graf and Mr. Evans, Director and Deputy Director of Advertising and Sales Promotion at USAREC, were very helpful in providing topic areas and information on advertising and for arranging input from N. W. Ayer. ARI also wishes to thank MAJ(P) Tom Fagan and CPT Tom Daula of the Military Academy for their suggestions on economic background data.

TIMOTHY W. ELIG
ALLYN HERTZBACH
RICHARD M. JOHNSON

I. INTRODUCTION

Background

The 1982 DA Survey of Personnel Entering the Army was developed to answer questions concerning the demographics and enlistment motivations of new Army recruits. This effort has been continued in the 1983 ARI Survey of Recruits. Military personnel planners require such information on a regular basis to monitor current recruiting strategies and to forecast future enlistment and reenlistment resource needs. While there is an apparent need for such information on a regular and timely basis, we know of no other effort to collect general information on enlistment decision making since the DoD Survey of Personnel Entering the Military was last administered in 1979. (See Boesel & Richards (1982) for a review of major surveys on enlistment motivation since the end of the draft).

Military recruiting in 1980's is dramatically changed from military recruiting in the late 70's. While Army recruiting in FY79 suffered one of the poorest years in both quantity and quality* since the end of the draft, the high quality of FY82 and FY83 Army recruits with no loss in quantity is unprecedented. Army personnel policy planners need to know who these recruits are and why they decided to enlist. This knowledge should facilitate efforts to capitalize on the current surge in high quality applicants. Four specific requests were included in the general research requirement given ARI in 1982 for the collection of information useful to policy makers in the management of the success of current recruiting efforts:

- o Determine who is enlisting in the Army and why.
- o Who are the Category I-IIIa's, where do they come from?
- o Conduct attitude survey to determine why recent recruits joined and their propensity to remain in the service.
- o What recruiting practices/advertising are proving the most successful and why?

The 1982 DA Survey of Personnel Entering the Army was designed in response to this research requirement. Three surveys were administered in this effort and are collectively referred to as the 1982 DA Survey of Personnel Entering the Army or as the 1982 DA Survey. The Original Form of the 1982 DA Survey was general in nature and was administered to new service members in all Army components. Form 2 was specifically tailored for active duty service members, while Form 4 was directed to members of the Army Reserves and the Army National Guard. Technical aspects of the 1982 DA Survey effort are documented in a User's Manual and Codebook (Elig, 1983) which

* We use here the generally accepted definition of 'quality' in military service applicants (i.e., high scores on the AFQT and having completed high school and received a diploma).

summarizes the survey design, sampling procedures, provides general technical information about the questionnaires, and describes the data base in detail.

The data collected in this survey effort have proven to be very useful in a variety of contexts. The staff of the US Army Recruiting Command (USAREC) and the Office of the Deputy Chief of Staff for Personnel (ODCSPER) have used specific data for internal planning and in responses to inquiries from Congress. These offices supported the continuation of the survey effort by way of the 1983 ARI Survey of Army Recruits.

Purpose

This report is intended to further familiarize Army manpower policymakers and researchers with the content of ARI survey data bases. As reference books this report and a companion volume should serve to provide recent information on who is enlisting in the Army as well as why they state that they are enlisting. It is intended that these reports will stimulate interest in detailed analyses of specific policy concerns.

While we address ourselves in separate reports to topic areas of special concern such as advertising recall and media habits (Elig, Welton, Hertzbach, Johnson, & Gade, in preparation), we also see a need for a general reference volume covering all items in the survey. While ARI researchers are continuing to use the data to address specific research questions, e.g. prediction of first term attrition based on enlistment motivation, without a general volume of tabular results many survey items might not otherwise be made known to their intended audience.

This report and a companion Volume 2 serve as an overview of the non-prior-service (NPS) regular (Active) Army results from the 1983 ARI Survey of Army Recruits. This report presents the responses to each question in the survey by gender, education, ethnic group, AFQT, and high school graduate and senior markets. Volume 2 reports breakdowns of each question by age at contracting, geographic regions corresponding to the five recruiting brigades, rural/urban background, term of enlistment, and enlistment incentive (Army College Fund, Cash Bonus, Both, Neither). Two volumes with identical breakdowns for the 1982 DA Survey are also available (Elig, Johnson, Gade, & Hertzbach, 1984a, 1984b). Companion volumes for USAR non-prior-service respondents are in preparation for 1982 and 1983.

The second chapter of this report is intended as an overview of the 1983 ARI Survey. It summarizes the survey and describes the NPS Regular Army sample. The third chapter describes the development of the demographic variables and explains the table layouts.

Tabular results of the survey are presented in the final three chapters. The first chapter of tables presents information on enlistment. The second chapter of tables deals with advertising and promotional events. The final chapter focuses on the recruits' personal, family, educational, and employment background and demographic description.

II. THE 1983 ARI SURVEY OF ARMY RECRUITS

Technical aspects of the 1983 ARI Survey effort are documented in a User's Manual and Codebook (Hertzbach & Elig, in preparation) which summarizes the survey design and sampling procedures, and provides general technical information about the questionnaires, and describes the data base in detail. While basic information from the User's Manual is summarized below, readers of this report are referred to that manual for technical details on the survey design and data handling.

Survey Development and Content

The structure of the 1982 DA Survey was partially based on the 1979 DoD Survey of Personnel Entering Military Service (Doering, Grissmer, & Morse, 1980a, 1980b). Questions were selected from the 1979 DoD Survey, and as appropriate modified, to fit the purposes of the 1982 DA Survey. In taking this approach two major advantages were gained. First of all, by using previously tested items we avoided the necessity of a long developmental effort to insure items appropriate for the subject population. The other major advantage of this approach was that it assured the availability of a cross-sectional comparison group in the Regular Army recruits surveyed in 1979.

The 1982 Original Form questionnaire was quickly developed and implemented in order to provide as much information as possible in as short a time as possible. Refinements were made in the questionnaire after meeting immediate Army personnel policy planners' needs with the Original Form. Differences between the Original and Revised (Forms 2 and 4) questionnaires resulted from a decision to broaden the information base and refine items based on experience with the Original Form.

A Research Advisory Panel was formed in the second quarter of FY83 to review the 1982 efforts and guide the 1983 survey efforts. At the invitation of ARI the Office of the Deputy Chief of Staff for Personnel (ODCSPER) and the US Army Recruiting Command (USAREC) appointed representatives to this panel. This panel recommended continuing the survey with many items from the 1982 effort while expanding the item base to include more demographic information on recruits. Thus, the 1983 ARI Survey has continued the evolution from the 1979 DoD survey in terms of the sophistication and depth of demographic information collected on recruits.

Based on the success of the 1982 survey effort there were a very large number of requests for information to be collected in the 1983 survey. To accommodate as many of these requests as we could, we developed three forms of the 1983 survey. A total of 218 questions were asked in at least two of the three forms. If only one form had been used, only 160 questions would have been possible. Our multiple form design (see Table 1) allows all items to be correlated with all other items.

All forms of the 1982 and 1983 Surveys were designed to collect information about enlistment motivation and personal background. All forms were similarly structured and loosely followed the organization of the 1979 DoD Survey. Each item in the 1983 ARI Survey of Recruits is listed in

Table 1

SURVEY CONTENT PLAN FOR 1983 ARI SURVEY OF ACTIVE ARMY RECRUITS

ITEMS	n =	FORM		
		A	B	C
	2927	2864	2814	
Core		X	X	X
Advertising		X	X	
Demographics & Reasons for Enlistment and for Contacting Recruiter		X		X
Education and Employment & Influencers			X	X

Appendix A. Copies of the 83 surveys are included in the Survey Manual and Codebook (Hertzbach & Elig, in preparation). The variable list in Appendix A cross-references 1983 items to items which were also contained in the 1982 survey. As can be seen in this table, the amount of information collected in 1983 tripled from what was collected in 1982. Complete listings of items in the 1982 DA Survey appear in the tabular volumes for 1982 (Elig, Johnson, et al, 1984a, 1984b).

Survey Procedures and Sample

Administration and Sampling

The 1983 ARI Survey of Recruits was administered to recruits in group settings during initial entry processing in US Army Reception Stations. Surveys were administered during the weeks of 16-20 May, 6-10 June, 20-24 June, 11-15 July, and 1-5 August. Forms A, B, and C were administered to Regular Army (RA) recruits; Form D was administered to Army Reserve and Army National Guard recruits.

The population to be sampled with the 1983 ARI Survey of Recruits was 1983 non-prior-service (NPS) accessions in the Regular Army and the Army Reserve. Army National Guard recruits were not of primary interest since important recruit selection variables such as qualifying test scores are unavailable in the MEPS Reporting System (MEPRS) for over 90% of Guard recruits. To reduce administrative burden on the reception stations, the survey was given to all personnel processing through the stations for initial entry training. This directive for blanket administration was also intended to reduce the possibility of unwitting sample biasing by survey administrators

IV. ENLISTMENT

either if they remembered Joint Service advertising (in form C, 1983 ARI Survey) or if they remembered Joint Service, Air Force, Navy, and Marine Corps advertising (in Forms A and B, 1983 ARI Survey). In 1982, the recruits may have been responding to military advertising, not exclusively Army; in 1983, the survey made it plain that Army advertising is distinct from other services' advertising. Major changes in item wording or formatting may make it impossible to directly compare 1982 and 1983 results. Continuing the example from above, because of item formatting changes it is not possible even to interpret 82-83 changes as the result of making Army advertising distinct from other military advertising. In 1982 recruits were asked to mark "remember" or "not remember" separately for each advertising media; a recruit uncertain about a media would probably just skip that media item. In 1983 recruits were asked to mark all media they remembered in a single question; a recruit uncertain about a media is counted as not remembering it as long as he marks even one media as remembered or marks that he does not remember any advertising.

A final cautionary note on 82-83 comparisons is offered. Separate forms with different items were used in May-June and July-August of 1982, while in 1983 all forms were used for the entire four month sampling. Just because an item was asked in both 1982 and 1983 does not mean it was asked of a similar sample. Samples are equivalent only if taken from the same time frame because of seasonality effects. Many questions, for example, those on advertising, were included only in the July and August surveys in 1982 while in 1983 advertising questions were included in forms used in May, June, July, and August.

While many comparisons of levels of responding in 1982 and 1983 are invalid, comparisons of effects can be made if cautiously interpreted for most items which were used both years. That is, with caution we may compare effects, e.g., if males recall something better in 1983, did they recall it better in 1982 as well. For items which were changed, relationships can be compared but not response magnitudes. This caution should be kept in mind when comparing 1982 and 1983 results.

SOURCE: MEPS REPORTING SYSTEM DATA FOR NPS RA RECRUITS IN 1982 AND 1983
ARI SURVEYS OF NEW RECRUITS

Statistical Interpretation

The chi square test is printed for each table. Note that for multiple response items, this statistic is printed beside the response category to which it applies. A significant chi square indicates that the response pattern cannot be explained just by knowing how many respondents are in each category and how many of all respondents marked each response. A nonsignificant chi square indicates that the categories of respondents probably do not differ on the question. Because of the very large number of tables being looked at, statistical significance for this set of tables should probably be set at the .001 probability level. That is, chi squares with probability levels equal to or less than .001 should be taken as strongly indicating that the question responses do differ between the categories of recruits. At this probability level, there is only 1 chance in a thousand that the chi square would be significant just by chance. If a probability level of .05 were used, however, it would be likely that 50 of 1000 chi squares would be significant just by chance. While for a .01 level, it is likely that 10 of 1000 chi squares would be significant by chance. A good rule of thumb is that if the probability level is no larger than .01, preferably .001 or lower, and the responses fall into a meaningful pattern, then it is likely that there is a real difference in the way the categories of recruits responded to the item.

For 2 x 2 tables (2 rows and 2 columns) the Yates corrected chi square is also printed. The Yates corrected statistic may be used for these tables, though it is a conservative test that may miss real differences. Because of space limitations, the Yates correction is not printed for multiple response items.

Comparison of 1982 and 1983 Survey Results

Survey Demographics

Table 3 compares the 1982 and 1983 NPS RA survey respondents on several demographic variables thought to influence answers to the survey questions: AFQT, region, ethnic group, education, term of enlistment, gender, and age at which they signed a contract to enter the military. There are significant differences in the two samples. More AFQT category I-IIIA came into the service and participated in the ARI survey this year compared to last year. Fewer people from the southeast and more from the southwest, midwest, and western parts of the country participated in the survey in 1983. More of the survey respondents were whites and relatively fewer minorities were surveyed this year compared to 1982. More non-high-school-graduates, more three-year enlistees, more 17-year-olds, and more women are included in the 1983 sample compared to 1982's sample.

Comparison of 1982 and 1983 Items

Because of changes in the way survey items were asked, it is not possible to directly compare many items in the 1983 survey with similar items in the 1982 survey. The ordering of questions is important and may change the meaning of a question. For example, in the 1982 survey recruits were asked only if they remembered Army advertising, while in 1983 they are first asked

Items and Forms

The survey items have been reproduced as exactly as possible for each set of tables. However, because the items have been modified to make the tables and the survey data base more easily interpretable, readers are referred to Hertzbach and Elig (in preparation) for exact item wordings.

Survey items were modified in two major ways for this volume. Response items were all represented by letters in the actual survey, while in this volume responses for most items are represented by the numbers used to record the responses in the data base. The only survey items for which letters are used in this volume are multiple response items. The other major modification of items are for series of items which use the same response sets. Directions for a set of items which were used to introduce a set of items in the questionnaires are reproduced for each item in this volume. For example, the responses for enlistment reason items T69 through T96 were only printed once in the survey questionnaire and were not printed after each question as has been done in this volume.

It will also be obvious that additional information has been added for each item in this volume that was not printed in the questionnaires. Because multiple forms were used, we have added to each item information on the survey form(s) in which the item appeared. For each form in which an item appeared, we also list the position of the item.

Missing Data

Because items appeared in different forms of the survey questionnaires, the number of respondents for each item depends on how many respondents answered the survey forms in which the item appeared. The total surveyed with each item is printed below the item. The total surveyed will always be larger than the total respondents in the table. The missing respondents are due to several factors. First of all, MEPRS data has been matched for only 96.9% of those surveyed, and for those who have been matched, MEPRS records contain some missing data. Note also that tables for AFQT and graduate-senior markets are only for subsamples of the respondents which further decreases the n size for these tables.

Beyond the factors just discussed, the n size is decreased by respondents either not answering the item or answering the item incorrectly. Examples of incorrect answers are marking a 'G' for an item that only has responses 'A' to 'D' or marking two responses for an item calling for only a single response. The size of the missing data problem for a particular table has to be judged in relation to other tables with the same total surveyed.

There is a general problem of missing data affecting items positioned later in the survey questionnaires. As a result of the length of the surveys, not all respondents completed the survey. Recruits taking longer to respond because of reading-speed or response-speed may have run out of time before completing the survey. Other recruits may have become frustrated with the length of the survey and stopped responding before the end of the survey. Interpretation of items positioned later in the survey should be made more cautiously than of items positioned earlier in the survey.

III. HOW TO USE THIS VOLUME

Tabular results of the survey are presented in the next three chapters. The first chapter of tables presents information on enlistment including the recruits' reasons for contacting a recruiter and for enlisting, prior contact with other services, MOS selection factors, enlistment incentives, the enlistment process, and the recruits' future plans. The second chapter of tables deals with advertising and promotional events. The final chapter focuses on the recruits' personal, family, educational, and employment background and demographic description. While convenient, this organization of is not perfect. For example, some reasons for contacting a recruiter which are placed in the first section are also related to advertising, while other reasons are related to the recruits' background.

The Tables

For most items, the survey question is reproduced at the top of the left hand page; on that same page survey responses by gender and education are tabled. On the facing page for most items, responses are tabled by ethnic group, AFQT, and 1983 high school status. For items with more than seven responses, tables are presented in the same order but on more than two pages. Response categories in the tables are represented by codes that match the responses in the question.

Please note that the AFQT breakdown is not of all recruits; rather the breakdown of responses by AFQT includes only males with a high school diploma and/or postsecondary college experience. Tables of 1983 high school status contain only respondents with a high school diploma, some of whom may have college experience. The only other restriction on the sample is that the respondents in all tables are NPS Regular (Active) Army accessions according to MEPRS records.

Appendix A presents the MEPRS codes (and for one variable, survey codes) used to assign demographic values for this report. Note that General Education Diplomas (GEDs) are not distinguished from other NHSGs since there were only 311 GED holders in the sample. All respondents coded in the MEPRS as being Hispanic are included in our Hispanic sample and are not included in the White, Black, or Other categories. High school status in 1983 is intended to distinguish between the two prime recruiting markets of high school seniors and high school graduates. The category of 1983 HSDGs is intended to identify recruits who contracted as seniors and then shipped after high school graduation. Recruits in this category are compared to HSDGs (with or without postsecondary education) who reported their graduation year as 1982 or earlier. Note that this definition differs from the one used for the 1982 DA Survey. For the 1982 Survey earlier graduates were defined as HSDGs (with or without postsecondary education) who were not in school fulltime during the 1982-1983 school year and thus did not contract while in any school.

Appendix B serves as an index for both this volume and Volume 2. Appendix B lists each item in the 1983 ARI Survey and cross-references it to similar items in the 1982 DA Survey. Page numbers for both RA volumes are given in this appendix.

AUG	24	0.291	100.000

enlistment decision making involves at least a decision to sign a contract and a decision to fulfill the contract and access. Our respondents were asked to report reasons for enlistment based on memory. The reasons given by our respondents for contracting are probably confounded with their reasons for accessing.

Thus the results of our samples of accessions from the second half of FY83 are best interpreted as indicative of the relative strength of motivations for enlistment in FY83 rather than as definitive of actual percentages of FY83 accessions motivated in certain ways. The major strength of this survey is in defining the motives of specific market segments. For example, this survey can be used to study the characteristics of recruits motivated by a desire to fund a college education. The timing of this survey is particularly good for the comparison of the motives of recruits recently graduated from high school with the motives of other recruits. This comparison is of particular importance for the Army Recruiting Command's efforts to penetrate the high school market.

untrained in sampling theory and design. However, as in 1982, there is a possibility for sample biasing at the Ft. Jackson Reception Station. This station requested and received permission to sample recruit companies rather than survey everyone being processed at the station. This exception was granted because the large number of recruits processed by the Ft. Jackson Station during the summer requires extremely tight scheduling of recruit and station personnel time. Station personnel were instructed to survey by recruit processing company and to favor Regular Army or Army Reserve recruit processing companies in the selection process.

Sample and Representativeness

A total of 8,605 Regular Army NPS recruits completed usable surveys. Matching MEPRS records have been found for 96.9% of the sample. Thus, we have a very large potential data base even for analyses using MEPRS derived variables (n = 8,341).

As discussed above, three forms of the 1983 survey were developed for RA recruits. A set of 38 core items are included in all RA forms (n = 8,605). Sixty advertising items are asked in Forms A and B (n for these forms is 5,791). Sixty items of extensive demographics and reasons for contacting a recruiter and reasons for enlistment are in Forms A and C (n for these forms is 5,741). Sixty items on education and employment history are in Forms B and C (n for these forms is 5,678).

The sample sizes and our success in matching cases with MEPRS records are positive signs that the 1983 ARI Survey effort has succeeded in capturing useful data about attitudes and motives that influence enlistment decision making. However, there are several aspects of the survey procedures that must be considered when interpreting the results. The usefulness of this data base lies much more in representing segments of the market rather than in a representation of all FY83 Army enlistments.

Data Inconsistencies and Case Deletion. Survey processing and data base construction are discussed in detail in the Survey User's Manual (Hertzbach & Elig, in preparation). As discussed in this manual, cases have been removed from the database of respondents who appear to be Prior Service. Also, a few cases that do not appear to have usable information have been removed.

Seasonal Variation. The survey sampling covers only the second half of FY83. The impact of regular seasonal variation or other shifts in motivational patterns during the course of the year would seem to preclude a straightforward generalization of survey results to all of 1983. The possibility of seasonal bias is attenuated somewhat for Regular Army samples by the fact that we are dealing with accession rather than contract data. Regular Army recruits who are included in our survey signed enlistment contracts at various times of the year under the Delayed Entry Program (DEP). As can be seen in the cumulative percents in Table 2, over half of the sample contracted for enlistment by February and thus at least four months prior to accessioning.

Sample Population. The DEP has made enlistment decision making a complex process of multiple decision points. For people who enlist in the DEP,

T4 -- INFLUENCED BY A RECRUITER AIDE

Information from a Recruiter Aide. A Recruiter Aide is an Army soldier who returns to his hometown and school after training to help the Army recruiter contact people who might want to enlist.

Use the following scale to describe how important the above was in your decision to talk to an Army recruiter.

T7 -- INFLUENCED BY A PRIEST/MINISTER/RABBI

My priest/minister/rabbi suggested it.

Use the following scale to describe how important the above was in your decision to talk to an Army recruiter.

- 1 - Not applicable; event did not occur
- 2 - It occurred but was not at all important
- 3 - Somewhat important
- 4 - Very important
- 5 - I would not have talked to an Army recruiter except for this reason

T15 -- INFLUENCED BY INFORMATION IN NONSOLICITED ARMY MAILING

Information I received in the mail from the Army (which I had NOT requested).

Use the following scale to describe how important the above was in your decision to talk to an Army recruiter.

- 1 - Not applicable; event did not occur
- 2 - It occurred but was not at all important
- 3 - Somewhat important
- 4 - Very important
- 5 - I would not have talked to an Army recruiter except for this reason

T52 -- PLANS AFTER THIS ENLISTMENT

What do you think you will do after this enlistment?

- 1 - Leave the Army to find civilian employment
- 2 - Leave the Army to attend college
- 3 - Leave the Army for civilian vocational/technical education
- 4 - Reenlist, but probably not make the Army a career
- 5 - Stay in the Army until I retire
- 6 - I do not know

T53 -- PLANS FOR RESERVE/GUARD SERVICE

After you leave active duty, would you like to continue military service?

(Mark only one)

A - I do not know

B - No, I do not plan to join the Reserves, Guard, or ROTC

IF YES, MARK ALL THAT APPLY:

C - Yes, I would like to join an Army Reserve unit

D - Yes, I would like to join a National Guard unit

E - Yes, I would like to participate in ROTC in college

T68 -- EFFECT OF NO SERVICE HAVING CASH BONUSES

Suppose no military service paid a cash enlistment bonus.
What would you have done?

- 1 - DOES NOT APPLY to me, I am not getting a cash enlistment bonus
- 2 - Signed up for the same job anyway
- 3 - Signed up for a different job in the Army
- 4 - Tried to join a different service
- 5 - Not enlisted at all

T100 -- RESPONSE TO RA PROMOTIONAL EVENTS

As a result of the exposure to the events above, did you seek further information on the Army?

(Mark each response you made)

- A - Sent a card
- B - Called a toll free number
- C - Contacted a US Army recruiter at the event
- D - Contacted a US Army recruiter after the event
- E - Sought out a friend who had enlisted or was about to enlist
- F - NONE OF THE ABOVE/DOES NOT APPLY

T102 -- RESPONSE TO USAR PROMOTIONAL EVENTS

As a result of the exposure to the events above, did you seek further information on the Army?

(Mark each response you made)

- A - Sent a card
- B - Called a toll free number
- C - Contacted a US Army recruiter at the event
- D - Contacted a US Army recruiter after the event
- E - Sought out a friend who had enlisted or was about to enlist
- F - NONE OF THE ABOVE/DOES NOT APPLY

T101 -- USAR PROMOTIONAL EVENTS

Before you enlisted did you see or participate in any of these events sponsored by the US Army Reserve (not the Regular Active Army)?

(Mark each event that you remember)

- A - An Army Post Tour accompanied by a US Army Reserve recruiter
- B - A US Army Reserve sponsored or presented program at school where soldiers describe their Army experience and duties
- C - A US Army Reserve sponsored or presented high school assembly program
- D - A US Army Reserve presented or sponsored Sports Clinic
- E - A US Army Reserve sponsored award or certificate presented to a selected high school student
- F - A US Army Reserve ceremonial unit/band participating in a parade
- G - US Army Parachute Team jump sponsored by the Reserves
- H - An Army Reserve information booth at a jobs fair
- I - An Army Reserve information booth at a shopping mall or in a business district
- J - NONE OF THE ABOVE

T116 -- RESPONSE TO REACT CARD

What did you receive when you sent a card in response to an Army ad?

(Mark all that apply)

A - I never sent a card in response to an Army ad

B - I never received a response in the mail from the card I sent in

C - Letter telling me location of Army recruiting station

D - A premium item like tube socks or wrist bands

E - A poster

F - Booklet about Army service

G - Booklet about Army College Fund

H - A bumper sticker

I - Army bookcovers

T135 -- SUPER PEOPLE REVIEW

List of people who went to college using Army benefits.

Please use the following scale to tell us if you have seen this commercial and how it impressed you?

- 1 - I do NOT remember seeing it
- 2 - I disliked it or it gave me a bad impression of the Army
- 3 - I remember seeing it but it didn't impress me much
- 4 - It was important in my decision to contact a recruiter or enlist
- 5 - I WOULD NOT HAVE CONTACTED AN ARMY RECRUITER OR ENLISTED HAD I NOT SEEN THIS COMMERCIAL

C167 -- FATHER'S OCCUPATION / FORM C

What type of work does your father (or male guardian) do?
(If deceased, indicate his last job)

- 12 - SALESWORKER (Examples: retail salesclerk, real estate agent,
door-to-door salesperson, newspaper carrier)
- 13 - OFFICE AND CLERICAL WORKER (Examples: shipping clerk, mail
carrier, secretary, typist, keypunch
operator, cashier, bookkeeper)
- 14 - SERVICE OR RESTAURANT WORKER (Examples: cleaning person, dishwasher,
cook, waitress)
- 15 - TRADES OR CRAFTS WORKER (Examples: mechanic or repairman, baker,
plumber, carpenter, painter, electrician)
- 16 - TRANSPORTATION OPERATOR (Examples: cab, bus, or truck driver)
- 17 - MANUFACTURING OR PRODUCING (Examples: assembly line worker, mill
worker, packager, meat-cutter, fork-lift
operator)
- 18 - PROTECTION SERVICE (Examples: police, security guard, firefighter,
park ranger)
- 19 - ART, ENTERTAINMENT, RECREATION (Examples: dancer, actor, athlete,
musician, artist)
- 20 - LABORER, EXCEPT ON FARM (Examples: construction, laborer, gardener,
truck loader, warehouse person)
- 23 - FARM LABORER
- 24 - PARAPROFESSIONAL (Examples: dental assistant, nurse's or teacher's
aide, paramedic, paralegal)
- 25 - PROFESSIONAL (Examples: doctor, lawyer, teacher, minister,
accountant)
- 26 - TECHNICAL (Examples: draftsman, medical or lab technician,
computer programmer, pilot)
- 27 - MANAGER OR ADMINISTRATOR, EXCEPT ON FARM (Examples: sales or
office manager, school
administrator, buyer)
- 28 - OWNER OR PROPRIETOR (Examples: contractor, restaurant owner,
small business owner)
- 34 - MILITARY OFFICER
- 35 - MILITARY ENLISTED
- 45 - Does not work for pay or HOMEMAKER
- 46 - Works for pay but I am not sure which category
- 47 - Not applicable

T180 -- HOUSEHOLD RENT OR MORTGAGE PAYMENT

In items T172 thru T182 "this household" is the parents' household or the household that the recruit grew up in. Note, this definition of household differs for items asked of the Reserve and National Guard in Form D.

What is the monthly rent or mortgage payment including utilities?

- 12 - Housing is provided by employer
- 13 - Does not apply
- 14 - I don't know the rent/mortgage payment
- 23 - Less than \$100 per month
- 24 - \$100-199 per month
- 25 - \$200-299 per month
- 26 - \$300-399 per month
- 27 - \$400-499 per month
- 28 - \$500-599 per month
- 29 - \$600-699 per month
- 30 - \$700-799 per month
- 34 - \$800-899 per month
- 35 - \$900-1000 per month
- 36 - More than \$1000 per month

T182 -- RECRUIT INDEPENDENCE ESTABLISHED

When did you first establish your own household by moving out of this household and living on your own income? College students who depend on relatives for support and return home for vacations are NOT considered to have established a separate household.

- 1 - Joining the Army is the first time I have been away from home to live on my own income
- 2 - In the last 6 months
- 3 - 7-12 months ago
- 4 - 13-18 months (1 to 1 1/2 years ago)
- 5 - 18-24 months (1 1/2 to 2 years ago)
- 6 - 25-36 months (2 to 3 years ago)
- 7 - more than 3 years ago

T195 -- REASON FOR NOT BEING AN HSDG

Are you a regular high school diploma graduate (NOT A GED) with a diploma from a state recognized (accredited) high school?

A - Yes

IF NO, PLEASE INDICATE WHY YOU DID NOT GET A DIPLOMA OR WHY YOU LEFT SCHOOL EARLY. (Mark all that apply)

B - I completed 12 years but flunked the state test to get a diploma

C - I completed high school in a school not recognized (accredited) by the state

D - My family needed money or needed me at home

E - I was expelled or suspended

F - I found a job I liked or I wanted to work full time

G - I was bored, wasn't learning anything useful

H - I got married or had a child

I - I didn't get along with the other students

J - The rules were too strict or I didn't get along with the teachers, counselors, or principal

T198 -- HIGH SCHOOL MATH AND TECHNICAL COURSES

Which of the following mathematics and technical courses, if any, did you take and pass in high school?

(Mark all that apply)

- A - Elementary Algebra
- B - Plane Geometry
- C - Business math
- D - Computer science
- E - Intermediate Algebra
- F - Trigonometry
- G - Calculus
- H - Physics
- I - Science course that covered electricity or electronics
- J - I took none of these

C210 -- 1982 GROSS EARNINGS (WITH TYPO)

In 1982 how much did you earn (before taxes) from all the different kinds of work you did? (Include wages, salaries, tips, and commissions).

- 1 - I had no 1982 earnings
- 2 - Less than \$2,599 a year (less than \$50 a week)
- 3 - \$2,600-\$5,199 a year (about \$50-\$99 a week)
- 4 - \$5,200-\$7,799 a year (about \$100-\$149 a week)
(Response for middle range was left out)
- 6 - \$10,400-\$12,999 a year (about \$200-\$249 a week)
- 7 - \$13,000-\$15,599 a year (about \$250-\$299 a week)
- 8 - \$15,600-\$20,799 a year (about \$300-\$399 a week)
- 9 - \$20,800-\$25,999 a year (about \$400-\$499 a week)
- 10 - \$26,600 or more a year (more than \$500 a week)
