EXECUTIVE SUMMARY

This document contains The Army Study Program (TASP) for Fiscal Year 1986. It describes the annual study program in terms of functional area and potential impact upon the Army as well as other characteristics of studies as contained in the CSAMSS data base, and a comparison of the FY86 study program with the FY85 study program.

The FY86 Army Study Program data were collected from agencies and commands. The data were tabulated by computer and analyzed. This document contains the summarized data and interpretation of the results.

The Study Program data are presented in several dimensions which should be of interest to Army commanders, managers, and sponsors of the study program. These include functional area, potential impact to the Army, resources, study sponsor, performance method and Army Goal to which the study applies. Salient results of the data assessment showed:

- o The functional area with the highest representation within study program is Sustaining. One hundred planned and ongoing studies apply to this area. The functional area of Equipping accounts for the largest portion of planned resources with 25 percent.

- o About 81 percent of the program will be accomplished using the Army's in-house analysis agencies and elements.

- o About one-fifth of the studies in the FY86 study program have a potential for directly impacting how major commands and staff agencies function. A little more than one-half have a potential for contributing to the evaluation or management of programs and projects.

- o Nineteen Army organizations will sponsor study efforts during the fiscal year. HQDA and TRADOC will sponsor nearly the same number of studies and together constitute almost 80 percent of the study program.

- o AMC and TRADOC both indicate a reduction in the number of planned and ongoing studies from FY85 while the resource consumption for these two MACOMs remains roughly the same.

o The proportion of new studies in the FY86 study program has increased from FY85 by about 15 percent while the resources consumed by these new efforts is expected to increase 34 percent, with a corresponding decrease in continuing efforts.

Aug 27
o Total planned resources for the FY86 program (using contract-equivalent staff years) shows an increase of about 6 percent over FY85.

o The FY86 Study Program addresses all Army Goals with 134 studies addressing the goal of Readiness. The Future Development goal accounts for more resources than any other goal with 27 percent of the resource consumption. ←

This document presents a variety of data and statistics concerning the FY86 Army Study Program. These should provide assistance to Army commanders and managers for the effective management of their specific programs. These data are also useful as tools for decisionmakers so that the major issues of the Army are addressed by the Army Study Program.

The Army Study Program comprises a wide range of analytical pursuits which address the major issues of the Army. These issues are enumerated annually in the Defense Guidance and The Army Plan. This document contains listings of analytical endeavors which have been identified by Headquarters, Department of the Army, subordinate staff agencies, field operating agencies, and major commands as falling within the purview of Army Regulation 5-5, Army Studies and Analyses.

These studies specifically exclude major investigative efforts such as research; exploratory developments; advanced and engineering development in support of specific research, development, test and engineering (RDTE) programs for materiel systems; human factors engineering programs; and transportability analyses.

Chapter 2 provides an overview of the FY86 Army Study Program in terms of functional area, resources, potential impact upon the Army and other characteristics to allow the reader to gain some insight into the overall scope of the annual study program. Also included in this chapter are comparisons of the FY85 and FY86 Army Study Programs. The comparison serves to illuminate the changes in direction and emphasis of the annual study program.

The comparison is based on selected characteristics of studies and compares the figures of both planned and ongoing studies at the beginning of each fiscal year. This is an important point to emphasize since the annual study program is a dynamic system which changes during the year based on changes in study priorities, policy decisions and resource constraints. As a result, the final FY85 program is not identical to the planned FY85 program.

By reviewing the tables and data in this chapter, the reader can draw inferences about the balance, priorities and resource implications of the annual Army Study Program.

Several characteristics of studies were selected for comparison. These characteristics include study sponsor, method of study performance, study standing and resource allocation.

Chapters 3 through 5 provide listings of the studies contained in the FY86 program sorted by sponsor, functional area and by identification code. Appendix A provides a glossary of terms used in the management of the study program. Appendix B contains a list of the Army Functional Areas and definitions; a list of Army study coordinators with office symbol, telephone numbers, and location is at appendix C. Appendix D provides a list of points of contact for DOD studies and analyses.

CHAPTER 2

FY86 ARMY STUDY PROGRAM OVERVIEW

OVERALL DESCRIPTION

This chapter presents an overall description of the FY86 Army Study Program. Data are presented in frequency tables, followed by an interpretation of salient results.

The FY86 Army Study Program is described using several characteristics: functional area, resources, impact, method of performance, Total Army Goal and sponsor.

FUNCTIONAL AREA

To capitalize on the functional expertise of the Army Staff, and to facilitate the development of the Army's program in terms useful to the senior decisionmakers, nine functional areas have been established into which Army programs are classified. It is the responsibility of the proponent for each functional area to prioritize identified deficiencies for presentation to the PBC and SELCOM. The table below describes the FY86 Army Study Program in terms of the functional area to which each study best applies.

In this and the following tables, N is the number of studies, %N is the percent of studies, and %R is the percent of total resources available to the study program. In order to combine in-house (staff year) and contract (dollar) resources, monetary resources were converted to contract-equivalent staff years (\$125,000 equivalent to one staff-year).

FUNCTIONAL AREA	N	%N	%R
Structuring	31	7	11
Manning	74	16	8
Training	43	10	10
Mobilizing & Deploying	53	12	8
Providing Facilities	11	2	1
Managing Information	40	9	12
Equipping	73	16	25
Sustaining	100	22	21
Managing	33	6	4
TOTAL	458	100	100

o Although the distribution of numbers of studies by functional area is relatively even for FY86, the emphasis is upon the area of Sustaining which constitutes 22 percent of the total number of studies. Two areas indicating the next highest frequency are Manning and Equipping.

o The area in which the greatest resources are expended is Equipping. TRADOC is the study sponsor showing primary support in this area with 75 percent of the resources projected. The functional area having the lowest representation in the FY86 Study Program, both in terms of number of studies and resources used, is Providing Facilities.

o The FY85 study program was not classified by functional area. Consequently, annual comparisons by this variable are not available.

RESOURCES

In order to put all studies on a comparative basis, contract resources are presented by equivalent professional staff years. Terms used in the comparison are in-house professional staff years (PSY), contract-equivalent professional staff years (CPSY), and total professional staff years (TPSY) which are PSY and CPSY combined.

FUNCTIONAL AREA	PSY	CPSY	TPSY
Structuring	162	17	179
Manning	87	47	134
Training	136	14	150
Mobilizing & Deploying	77	55	132
Providing Facilities	13	3	16
Managing Information	141	47	188
Equipping	353	34	387
Sustaining	282	47	329
Managing	26	35	61
TOTAL	1278	298	1576

o About 81 percent of this year's program will be accomplished with in-house resources. The functional areas requiring the most resources are Equipping and Sustaining which constitute about 46 percent of the total planned resources.

o Overall, about 19 percent of the study resources required will be contract resources. Functional areas indicating a lower than average percent of contract resources are Structuring, Training and Equipping. The functional area of Managing will use relatively more contract than in-house resources.

o The total planned resources for the FY86 program has increased by about 6 percent. Planned resources for in-house studies decreased slightly (5 percent) while resources anticipated for contract studies more than doubled.

FISCAL YEAR	PSY	CPSY	TPSY
FY85	1344	142	1486
FY86	1278	298	1576

STANDING

o The comparison of the number of new and continuing studies between FY85 and FY86 continues a trend from last year of an increase in the number of planned studies. In addition, the number of continuing studies has decreased.

o The resource comparison shows a marked change from FY85 to FY86. Resources planned on new studies has increased 13 percent over the previous year.

STANDING	N		%R	
	FY85	FY86	FY85	FY86
New	222	255	38	51
Continuing	263	203	62	49
TOTAL	485	458	100	100

IMPACT

Each study in the FY86 study program was reviewed to assess the potential impact of the study upon the Army. Study impact was rated on three levels according to the immediacy of the study results upon how the Army functions or operates.

o Studies classified as having a primary impact have an immediate or direct impact upon how a command or agency operates. For example, one study in this group will determine appropriate actions for minimizing the impact of force structure limitations. Studies with a secondary impact contribute to the evaluation or management of a program or project. Typical of these studies is an effort to evaluate and recommend changes to the selected reserve incentive program. Efforts having a tertiary impact affect other studies or analyses or are conducted to provide insight. One such study will develop a methodology for modelling host nation support requirements.

The table below depicts the potential impact the 458 studies in the FY86 program by the functional area to which they apply.

FUNCTIONAL AREA	POTENTIAL IMPACT			
	PRIMARY	SECONDARY	TERTIARY	TOTAL
Structuring	10	16	5	31
Manning	13	46	15	74
Training	17	23	3	43
Mobilizing & Deploying	7	28	18	53
Providing Facilities	--	10	1	11
Managing Information	4	18	18	40
Equipping	12	43	18	73
Sustaining	17	54	29	100
Managing	4	22	7	33
TOTAL	84	260	114	458

o More than half of the studies were classified as having a secondary impact. Resources are similarly distributed, although there is a suggestion that studies with a primary impact are more resource intensive than studies in the other categories.

o Although 18 percent of all FY86 TASP studies were classified as having a primary impact, almost half of the studies identified with the functional area of Training have a potential for directly affecting how the Army conducts this function. Among studies associated with the function of Structuring, about one-third should have a primary impact.

o Almost all of the studies relating to Providing Facilities (90%) have a potential for impacting the management or evaluation of this function.

o About half of studies dealing with Managing Information (45%) have a potential for affecting other information studies or methodologies.

The FY85 study program was not examined by potential impact; however, the impact of studies completed in FY84 was examined in FY85. The table below presents study impact figures for these two distributions.

IMPACT	%N	
	Completed FY84 studies	Proposed FY86 studies
Primary	14	18
Secondary	52	57
Tertiary	34	25
TOTAL	100	100

o The distributions for both of these years indicate that most of the studies have or will have an impact upon the management or evaluation of projects or programs and that studies directly affecting the Army are in the minority.

SPONSOR

Nineteen Army organizations will sponsor study efforts in the FY86 study program. The organization sponsoring the largest number of studies (41%) is Training and Doctrine Command (TRADOC). Together with Headquarters, Department of the Army (HQDA) and the Army Materiel Command (AMC), these organizations account for approximately 86 percent of the 458 studies.

FUNCTIONAL AREA	SPONSOR				TOTAL
	HQDA	TRADOC	AMC	OTHER	
Structuring	1	7	18	5	31
Manning	--	10	39	25	74
Training	--	41	2	--	43
Mobilizing & Deploying	--	9	35	9	53
Providing Facilities	2	--	2	7	11
Managing Information	--	35	3	2	40
Equipping	4	48	18	3	73
Sustaining	20	29	43	8	100
Managing	14	4	13	2	33
TOTAL	41	183	173	61	458

o The decrease in the number of studies can be attributed to the decrease in studies performed by the major commands AMC and TRADOC. HQDA sponsored studies increased appreciably (+32%) while there was a notable reduction in FY86 planned and ongoing studies by TRADOC (-14%) and AMC (-36%).

o HQDA and TRADOC will sponsor nearly the same number of studies in FY86. When the distribution of resources is considered, it becomes apparent that TRADOC efforts consume a proportionately higher amount. This can be partially accounted for by field study of weapons systems conducted by TRADOC. These efforts often require large resource expenditures compared to other studies.

SPONSOR	N		%R	
	FY85	FY86	FY85	FY86
HQDA	131	173	23	26
TRADOC	212	183	64	62
AMC	64	41	5	6
Other	78	61	8	6
TOTAL	485	458	100	100

o Although the distribution of the number of studies has shifted noticeably from FY85 to FY86, the distribution of resources by sponsor has remained virtually constant.

TOTAL ARMY GOAL

The mission of the Total Army is to deter any attack upon U.S. national interests and, if deterrence fails, to engage and defeat any enemy in any environment. Each of the goals supports the mission of the Total Army and contributes to the success of the stated Army mission.

o Because Training was recently added as an Army Goal, it was not applied to FY85 studies. Nevertheless, a comparison of the distributions of Army Goal by percent of total program for each year (table below) shows only minor differences in how these goals are represented. Readiness is the major focus of each program. This is consistent with the Study Program Guidance for these years. Although a decrease in the number of studies focusing upon the Future Development goal is indicated, it remains a significant part of the Army Study Program, along with Materiel and Management.

ARMY GOAL	N		%N	
	FY85	FY86	FY85	FY86
Readiness	147	134	30	29

Management	94	73	19	16
TOTAL	485	458	100	100

The table below shows the FY86 Study Program in percent of total number of studies, cross-tabulated by Army Goal and Functional Area.

* less than one percent

o The Functional Areas most heavily represented within the Readiness goal, in number of studies, are Manning and Sustaining.

o The goal with the fewest number of studies and the least resources planned is Leadership. Less than one percent of the study program resources are dedicated to this goal.

o As would be expected, strong relationships are indicated between the Goal of Human and the Area of Manning, and the Goal of Materiel and the Area of Equipping. Also, of no surprise are the correspondences of Strategic Deployment to Mobilizing/Deploying and the Goal and Area of Management and Managing.

The next table is the FY86 program again displayed by Army Goal and Functional Area; however, distributions are presented as percent of total resources (total professional staff years).

o The Army Goal - Functional Area intersection with the strongest representation in the FY86 program, in both number of studies and proposed resources, is Materiel - Equipping. This category of studies constitutes 8 percent of the planned studies and 12 percent of the proposed resources.

o Although the goal of Readiness is highly represented in terms of number of studies, the goal of Future Development has the largest share of resources allocated for it. Within this goal, the Functional Areas of Managing Information and Sustaining are the most highly represented by use of resources.

o The emphasis on Future Development is again responsive to HQDA guidance. The Issue Assessment Process is a recent Study Program Management initiative designed to surface the significant, long-range issues confronting the Army. In the FY86 Study Program Guidance, information developed from this process was included for the first time.
