PREFACE

BIBLIOGRAPHY OF SOVIET BOOKS AND PAMPHLETS ON MILITARY AFFAIRS

Since the mid-70s Western scholars have shown increased interest in all aspects of the Soviet Armed Forces. This interest ranges from understanding Soviet military doctrines and strategy to reasons for the apparent trend of militarization of Soviet society. As long as the Soviet Union maintains its military superpower status, this interest can be expected to continue.

Information about the Soviet Armed Forces and the military concepts of the Soviet leadership requires a variety of sources. Much of the necessary data can best be obtained through a careful reading of Soviet open publications; often these publications will be the only source. Despite its obsession with secrecy, the Soviet leadership must openly communicate with its millions of men in uniform and in reserve forces, as well as with the Soviet populace as a whole, about military matters.

Annually, Soviet bibliographies list approximately 40,000 book and pamphlet titles. Between 250-400 of these are specifically identified under the general heading, "Military Science. Military Affairs." Scattered elsewhere in bibliographic publications are the titles of other books and pamphlets that also deal with military and military-related subjects. These may be under headings such as "international relations," "science," "cybernetics," "physical-mathematical sciences," "chemical sciences," "technology," "construction," "transport," and the like. However, the single group most useful to Western researchers interested on Soviet military power and armed forces is that given under the general heading of "Military Science, Military Affairs."

A-1

The purpose of this bibliography is to identify those 3,200 books and pamphlets identified in Soviet bibliographies in the category of "Military Science. Military Affairs," published from 1960 to 1969 inclusive. Books will be grouped by year published and by the subcategories in which they are listed in Soviet bibliographic publications.

SOVIET BIBLIOGRAPHICAL PUBLICATIONS

Two basic Soviet publications were used in the preparation of this bibliography, as follows:

Knizhnaya Letopis' (Book Chronicle)

This was a semimonthly publication (until 1977, when it became weekly) giving book and pamphlet titles appearing during that particular time. It is divided into 31 general subject headings, beginning with "Marxism-Leninism." "Military Sciences Military Affairs," is one of the general headings. Between 1000 and 3,500 titles were carried in each issue, of which between 40 to 120 were in the military section.

Yezhegodnik Knigi SSSR (Annual of Books USSR)

Book and pamphlet titles for each year, after initially appearing in the weekly Knizhnaya Letopis',are consolidated into the Yezhegodnik Knigi SSSR. This is published annually in two volumes, each containing approximately 20,000 titles. For example, book and pamphlet titles published in the 52 issues of the Knizhnaya Letopis' for 1980 were consolidated in the Yezhegodnik Knigi SSSR, 1980, volumes 1 and 2. There is a two to four-year delay between the time the weekly Knizhnaya Letopis' appears and publication of the annual Yezhegodnik Knigi USSSR. As of 1 October 1985, only the first volume of the Yezhegodnik Knigi SSSR for 1982 was available.

SUBCATEGORIES OF "MILITARY SCIENCE. MILITARY AFFAIRS"

The general category, "Military Science. Military Affairs," is divided in the annual Yezhegodnik Knigi SSSR as follows:

1. GENERAL QUESTIONS. Some of the most significant Soviet writings on military doctrine and strategy are found in publications listed in this section, such as Kozlov, Baz, Smirnov and Sidorov's On Soviet Military Science, Milstein and Slobodenko's Bourgeois Military Strategy, and Problems of the Revolution in Military Affairs.

2. ARMED FORCES USSR.

a. General Questions. Organization. Many books of considerable value are found in this category, such as Ministry of Defense regulations (disciplinary, drill, garrison and guard duty and internal service). There are also pamphlets published in the Red Star Library series, the Library of the Soldier and Sailor series and others of that sort.

- 50th Anniversary. This is one of the subcategories of Armed Forces USSR. In 1968, on the fiftieth anniversary of the Soviet Armed Forces, approximately a dozen books were in this group, including the prizewinning 50 Years of the Armed Forces USSR.

b. History of the Armed Forces USSR. This is another subcategory of Armed Forces USSR. This group included histories of military districts, military museum guidebooks, and biographies of top military leaders killed in the purges. It should be noted, however, that none of these officers were actually identified as having been killed during Stalin's terror. The date of their deaths are sufficient to indicate the occasion.

(1) In the Great Patriotic War. A number of books in this group appear to have been written simply to keep the memory of the Great Patriotic War alive in the minds of the Soviet people, especially the youth. Some of the books, however, are to teach members of the Soviet Armed Forces about contemporary warfare, using lessons from the Great Patriotic War as examples. The researcher interested in contemporary Soviet military affairs cannot afford to overlook books and pamphlets in this section.

(2) History of the Russian Army. This section contains eighteen books on various aspects of the Czarist Russian Army.

c. Party-Political Work. Soviet military affairs today cannot be understood unless attention is given to this subcategory of Soviet military publications. Books such as Yu. P. Petrov's Party Structure in the Soviet Army and Navy or the Officer's Library edition of Party-Political Work in the Soviet Armed Forces

should be studied carefully. The impact of the political indoctrination of North Vietnamese soldiers during the Southeast Asian war of the 1960s and early 1970s was a surprise to Washington's political and military leadership. Soviet political officers were the teachers of the Vietnamese.

d. Daily Life. Only one book was ever put in this subcategory.

3. MILITARY ART. MILITARY EQUIPMENT (GENERAL QUESTIONS)
Although this category contained over 200 books in the 1960s, it was dropped in 1972. It contains all three editions of Marshal V.D. Sokolovskiy's Military Strategy as well as books on cybernetics and operations research. There are many books on individual battles such as Stalingrad and Kursk.

4. SERVICES OF THE ARMED FORCES. There are various subcategories in this group, each dealing with a specific service, arm, or branch. In spite of the fact that the Strategic Rocket Troops were created in 1959 as the number one service, until the 1965 edition of the Yezhegodnik Knigi SSSR (published in 1966) they were listed after the air forces and the navy. The Ground Forces did not appear as a unit until 1965 either. National Air Defense, which became a service in 1954, was not listed at all. Civil Defense was buried under the category "Air Defense. Defense from Weapons of Mass Destruction," although it was created in 1961.

To lessen confusion, the post-1964 order is followedin the bibliography with explanatory notes in the Table of Contents. The section originally was listed in the following order:

Through 1964:

(4. INDIVIDUAL SERVICES OF THE ARMED FORCES)

a. Infantry. Artillery. Armor.

b. Engineer and Signal Troops. Military Topography.

c. Air Forces. Naval Forces.

d. Rocket Troops.

5. AIR DEFENSE. PROTECTION FROM WEAPONS OF MASS DESTRUCTION.

(Civil Defense. Nuclear, chemical, and biological weapons)

6. REAR SERVICES (support service of the armed forces)

7. BORDER GUARDS (part of the KGB)

8. MASS DEFENSE WORK (mostly training marksmen)

After 1964:

(4. INDIVIDUAL SERVICES OF THE ARMED FORCES)

a. Rocket Troops.

b. Engineer and Signal Troops. Military Topography.

c. Air Forces

d. Naval Forces

e. Troops of Air Defense.

f. Rear Services and Supply of the Armed Forces

g. Border Guards

h. Civil Defense

5. ARMED FORCES OF FOREIGN SOCIALIST COUNTRIES. These include the nations of Eastern Europe and other socialist states such as China, Cuba, and Yugoslavia.

6. ARMED FORCES OF OTHER FOREIGN COUNTRIES. The majority of books in this subcategory deal with the NATO nations. Some, such as Tompkins' Weapons of World War Three, are translations.

ORGANIZATION OF THE BIBLIOGRAPHY

Transliteration System. Names, book titles and other data transliterated from the Russian alphabet are according to the U.S. Board on Geographic Names Transliteration System. This system is shown on page x, following the preface.

Abbreviations. In order to provide the maximum information about each book or pamphlet, abbreviations are used for those words or expressions that are repeated throughout the bibliography. All abbreviations are found on pages xi - xii.

Table of Contents. This lists the categories and subcategories of Soviet books and pamphlets as are given under the section in Soviet bibliographies entitled "Military Science. Military Affairs." Each is preceded by a numerical designation, used in Soviet bibliographies. The

various categories of books under the general heading "Military Science. Military Affairs," are explained above.

Basic Bibliographical Data. Books and pamphlets identified are divided according to year published, with subject categories and subcategories for each year, given in the order explained under the previous heading, SUBCATEGORIES OF "MILITARY SCIENCE. MILITARY AFFAIRS." An explanation of the information given in each entry is found in the example on page xx.

Appendices

-- Name Index. This section gives the names of authors listed in alphabetical order, followed by an assigned index number which corresponds to the index number preceding each of the book and pamphlet entries.

-- Russian Title Index. Transliterated titles of books and pamphlets are listed alphabetically, with each followed by its assigned index number.

-- English Title Index. Exact wording of the translation of a title from the Russian language into English will differ among translators. Since transliterations are standard, the section listing the transliterated titles is given first, followed by a section giving the English translation. The common index number given to each entry follows the English translation of the title.

-- Non-Russian Book Index. Many of the books listed in the "Military Science. Military Affairs" sections of Soviet bibliographies are not written in the Russian language. Some are in the languages of the various minority groups in the Soviet Union, such as Armenian, Estonian, Georgian, Ukrainian and Uzbek.

Others are in non-Soviet languages, such as French, Spanish and English. These books generally are for propaganda purposes, to show the strength of the Soviet Armed Forces and the just nature of Soviet policies. It should be noted that only the Russian language is used in the Soviet Armed Forces and in the pre-military training of Soviet youth.

-- Subject Index. This shows general categories only, and does not specify the individual topics that might be found in a particular book. Unit histories, series such as Military Memoirs, and textbooks of military academies and schools are some of the subjects indexed.

-- Keywords. This index lists broader categories than the subject index. Examples are books dealing with artillery, aviation, military strategy, tactics, tanks, naval landings, naval infantry (marines), and the various operations and battles of the Great Patriotic War.

"BESPLATNO" BOOKS AND PAMPHLETS

Some of the titles in the bibliography are followed by the notation "NC," which in the Russian language is besplatno--no charge. With very few exception, books and pamphlets in this category are unavailable. Most are textbooks or summaries of lectures used in Soviet military schools.

The practice of including the besplatno titles in Soviet bibliographies did not begin until the late 1960s. Their inclusion may have simply been due to the desire of the Soviet authorities to increase the number of titles published annually in the Soviet Union.

Even though the besplatno books and pamphlets listed are published in the closed press, the titles and other data provided may be of some

interest to Western researchers, since they indicate certain subjects that are taught in Soviet military schools, for example, and reflect changes in instructional priorities.

SOVIET BOOK PUBLISHERS

The publisher of the book or pamphlet is noted in each entry. Researchers will quickly recognize, at least in part, something of the significance and purpose of the work if the publisher is known. Some of the publishing houses for books in the "Military Science. Military Affairs" section of the bibliography are as follows:

Voyenizdat. This is the publishing house of the Soviet Ministry of Defense. The most important books on military affairs that are available to Western readers are Voyenizdat publications.

DOSAAF. (Voluntary Society for Cooperation with the Army, Aviation, and Fleet). According to Soviet statistics, DOSAAF annually issues 25 million copies of books, brochures, and pamphlets. Most of its publications listed in the "Military Science. Military Affairs" section are for military-patriotic education, and for use as textbooks for pre-military training.

Military Schools and Academies. Publication by these institutions generally are besplatno or "NC," and are unavailable to the general public. Many are less than fifty pages in length.

"Znaniye" Society. This is an "all-union society," whose purposes is to spread scientific and political knowledge among the Soviet population. The majority of those Soviets who hold advanced degrees are members of this society. A "Znaniye" society is found in each of the republics. The study of military affairs and the military-patriotic indoctrinatin of the populace are major tasks of this organization. Many of the titles of its publications reflect these missions.

Progress Publishers. This publishing house specializes in the publication of non-Soviet language titles, such as French, Spanish, English, and Arabic. Works published in these languages and sent abroad are carefully selected to enhance the image of the Soviet state.

Politizdat. (Political Literature Publishing House). Politizdat publishers are found in the various republics as well as in Moscow. Its publications, when listed in the "Military Science. Military Affairs" sections of bibliographies, are primarily for military-patriotic indoctrination.

Regional Book Publishers. Publishing houses in the various Soviet republics issue many books on military and military-patriotic themes. Often these are idealized accounts of the Great Patriotic War, giving the story of a local war hero. Regional publishers frequently issue books in the language of the local nationality, such as Armenian, Bashkir, Chechen, Uzbek and others. A number of their publications are on civil defense, published in the local language.

A commonly held view in the West is that all writings in the Soviet Union about military affairs are accomplished by and for the military themselves, and that the view of the civilian populace and the military differ. An examination of military books issued by Soviet publishers, from Voyenizdat down to a local publishing house in a remote region, demonstrates the fact that only one view on military matters is permitted in the Soviet press.

AVAILABILITY OF SOVIET BOOKS AND ENGLISH TRANSLATIONS

Except for those books identified in the bibliography as being "NC," meaning besplatno or no charge, most of the books listed should be in the Library of Congress, Washington, D.C. Many probably also are available in institutes and centers specializing in Soviet studies. Copies of key Soviet military writings also are likely to be held by those researchers who work with original Soviet sources.

Some of the Soviet military books listed probably can be obtained from outlets for Soviet publications, such as Victor Kamkin, Inc., in Rockville, Maryland.

English translations of current Soviet military books and pamphlets are few. In May, 1973, the Soviet government signed the International Copyright Agreement. Prior to that time important Soviet military writings, such as Marshal V.D. Sokolovskiy's Military Strategy, could be translated and published commercially. Since 1973, however, approval of the Soviet government must be obtained before any Soviet book, pamphlet, or journal

can be translated and published outside of the Soviet Union.

Even when Soviet permission is given to translate and publish a Soviet work, the Soviet government may stipulate as part of the agreement the right to edit the translation and to remove any portion of the translation it wishes. This poses problems for those scholars concerned with Soviet military affairs who do not read Russian.

As previously noted, a number of books in the bibliography are in non-Soviet languages, such as English, Spanish, Arabic, and French. While some of these works might be useful to researchers, it should be recognized that Soviet officials directed the translations for purposes of their own. Books published in the Soviet Union in non-Soviet languages should be used with care.
