THE MISSION OF AGARD

The mission of AGARD is to bring together the leading personalities of the NATO nations in the fields of science and technology relating to aerospace for the following purposes:

- Exchanging of scientific and technical information;
- Continuously stimulating advances in the aerospace sciences relevant to strengthening the common defence posture;
- Improving the co-operation among member nations in aerospace research and development;
- Providing scientific and technical advice and assistance to the Military Committee in the field of aerospace research and development (with particular regard to its military application);
- Rendering scientific and technical assistance, as requested, to other NATO bodies and to member nations in connection with research and development problems in the aerospace field;
- Providing assistance to member nations for the purpose of increasing their scientific and technical potential;
- Recommending effective ways for the member nations to use their research and development capabilities for the common benefit of the NATO community.

The highest authority within AGARD is the National Delegates Board consisting of officially appointed senior representatives from each member nation. The mission of AGARD is carried out through the Panels which are composed of experts appointed by the National Delegates, the Consultant and Exchange Programme and the Aerospace Applications Studies Programme. The results of AGARD work are reported to the member nations and the NATO Authorities through the AGARD series of publications of which this is one.

Participation in AGARD activities is by invitation only and is normally limited to citizens of the NATO nations.

The content of this publication has been reproduced directly from material supplied by AGARD or the authors.

INTRODUCTION

Technical reports have long been a prominent means of communication of scientific and technical information. Technical reports are often called progress reports, technical notes, scientific reports, and research reports, and they generally present the results of scientific research, often before it might appear in technical journals. Unlike much other scientific literature, however, technical reports are often produced specifically to satisfy accountability requirements from a contracting or granting agency, and they are not always freely available to the public. As a result, bibliographic control of technical reports is often complex, resulting in an inability to retrieve relevant reports.

Report literature from the aerospace and defence communities is found in many bibliographic sources, though no one source is comprehensive and many sources overlap in their coverage. In addition, much aerospace and defence literature is classified for reasons of security or privacy and therefore appears only in bibliographic literature of classified materials. This Guide represents an effort to make available a single tool for retrieving report literature from the aerospace and defence communities of NATO countries.

The AGARD Technical Information Panel (AGARD/TIP) for several years has recognized the need for a guide to aerospace and defence technical series to assist information seekers in member nations in the identification and acquisition of report literature. This Guide includes technical report series codes representing aerospace and defence technical reports of government agencies and contractors.

This Guide is limited to technical reports series issued by NATO member countries and their contractors. All AGARD countries were invited to participate. The following countries are included: Belgium, Canada, Federal Republic of Germany, France, the Netherlands, Norway, United Kingdom, and United States. A separate section is devoted to International Organizations.

The technical report series included in the Guide meet the following criteria: (1) report series currently published; (2) report series published by governments, contractors, research laboratories, or universities of NATO member countries; and (3) report series concerned with research and development in the fields of aerospace and defence.

In the main body of the Guide, the technical report series codes are arranged by country. Each citation includes a technical report series code, a title (if available), name and address of producing organization, availability of report (if provided), type of organization, and any other helpful information that was provided by the respondent.

Two indexes are included in the Guide. They are an alphabetical index of all the technical report series codes included in the Guide; and an alphabetical index by country. Names of producing organizations are included in both indexes.

Every effort has been made to make this Guide as comprehensive and accurate as possible; however, it was limited by the number of respondents and the quality and accuracy of their submissions. Additions or revisions to the Guide will be appreciated and should be sent to:

AGARD/OTAN

How to Use the Guide

The Guide is divided into two sections that are described below:

- o A main body--in which the countries are arranged alphabetically. Within each country the entries are arranged in alphabetical order by organization.
- o Indexes--One index includes a complete alphabetical listing of all of the technical report series codes (with their producing organizations) in the Guide, and an alphabetical listing of the technical report series codes (with their producing organizations) by country.

Each entry is presented in a standard form illustrated below:

Selected Bibliography

The following secondary sources may be used to identify additional technical report literature:

Aerospace Research Index. Edited by A.P. Willmore and S.R. Willmore. London, Francis Hodgson/Longman, 1981.

AGARD Index of Publications. Paris, Advisory Group for Aerospace Research and Development, Technical Information Panel. Published every 3 years.

Bibliography of SACLANTCEN Technical Reports, Technical Memoranda, and Special Reports, 1959-1973. LaSpezia, Italy, SACLANT ASW Research Centre, Viale Ian Bartolomeo, 400, I-19026.

Defence Research Abstracts (DRA). Orpington (UK), Defence Research Information Centre (DRIC): Monthly with annual indexes.

Dictionary of Report Series Codes. Edited by L.E. Godfrey and H.F. Redman. New York, Special Libraries Association, 2nd ed., 1973 (Out of print).

Government Reports, Announcements, and Index. Subscriptions available through National Technical Information Service, 5285 Port Royal Rd., Springfield, VA 22161. Bi-weekly.

Index to AGARD Publications, 1952-1963 and Supplements 1964, 1965, 1966, 1967. Compiled by A.G. Vannucci and J.C. Dunne. Paris, Advisory Group for Aerospace Research and Development, Technical Information Panel.

International Aerospace Abstracts. New York, American Institute of Aeronautics and Astronautics, Technical Information Service. Bi-weekly.

Report Series Codes Dictionary. Edited by E.J. Aronson. New York, Gale Research Co. In press, expected June 1986.

Report, Technical Note and Technical Memoranda Series. Issued by the RAE and its Antecedents between 1912 and 1978. Compiled by S.A. Thornton. Farnborough, Hants, UK; Royal Aircraft Establishment, 1979. Library Bibliography, No. 370. (Annual)

Scientific and Technical Aerospace Reports (STAR). Washington, DC, US National Aeronautics and Space Administration. Bi-weekly. Subscriptions available through U.S. Government Printing office, Superintendent of Documents, Springfield, VA.

SHAPE Technical Centre: Titles and Abstracts of Publications. Belgium, Supreme Allied Commander of Europe, B7010 SHAPE, Attention: SHAPE Staff Officer for STC (ODCPO). (Annual)

Technical Abstract Bulletin (TAB). Cameron Station, VA., Defense Technical Information Center. Bi-monthly (classified). Distribution limited to qualified institutions.

14. Abstract			
A guide to technical reports series relating to aerospace and defence research and development currently published by governments, contractors, research laboratories or universities in NATO member countries. The Guide lists reports series from Belgium, France, the Federal Republic of Germany, the Netherlands, Norway, the United Kingdom, the United States and international organisations. Information given includes a technical report series code, a title (where available), name and address of the organisation producing the series, availability (where known), type of organisation and other helpful information provided by the producers. Two indexes are provided: an overall one by number; and one by number within country.
