This publication is one of a series containing statistics on the waterborne commerce of the United States during the calendar year 1985. Four of these publications present detailed data on the movements of commodities and vessels at the ports and harbors and on the waterways and canals of the United States, the Commonwealth of Puerto Rico, and the Virgin Islands, and the fifth contains summary data of the country as a whole. The numbers of the publications and the areas covered are:

Area

- Part 1. Atlantic Coast
- Part 2. Gulf Coast, Mississippi River System, and Antilles
- Part 3. Great Lakes
- Part 4. Pacific Coast, Alaska, and Hawaii
- Part 5. Waterborne Commerce of the United States (National Summaries)

Both the foreign and domestic commerce moved on the United States waters are included. Data on the foreign commerce were supplied to the Corps of Engineers by the Bureau of the Census; data for the compilation of the domestic statistics were collected by the several offices of the Corps of Engineers, Department of the Army, in compliance with various acts of Congress. The principal provision governing the collection of these data is included in the Rivers and Harbors Act of September 22, 1922:

Section 11. That owners, agents, masters, and clerks of vessels and other craft plying upon the navigable waters of the United States, and all individuals and corporations engaged in transporting their own goods upon the navigable waters of the United States, shall furnish such statements relative to vessels, passengers, freight and tonnage as may be required by the Secretary of War: Provided, that this provision shall not apply to those rafting logs, except upon a direct request upon the owner to furnish specific information.

That every person or persons offending against the provisions of this section shall, for each and every offense, be liable to a fine of \$100 or imprisonment not exceeding two months, to be enforced in any district court in the United States within whose territorial jurisdiction such offense may have been committed.

While the information as now collected and compiled is designed to meet the administrative requirements of the Department of the Army in connection with the duties assigned by Congress, it also provides useful data for other governmental departments, commercial and shipping concerns, and others interested in transportation.

Waterborne traffic movements were reported to the Corps of Engineers by all vessel operators of record on prescribed forms approved by the Office of Management and Budget under the Federal Reports Act of 1942 for those movements of their vessels which were classified as domestic traffic; namely, between United States ports, continental and noncontiguous, and on the inland rivers, canals, and connecting channels of the United States, Puerto Rico, and the Virgin Islands, excluding the Panama Canal. The reports were generally submitted on the basis of a vessel movement completed in one direction and, for movements with cargo, the origin and destination of the water transportation of each individual commodity. In compiling the data, the entire movement was included in the year in which the movement was completed even though the shipment may have originated in the preceding year, except that, beginning with calendar year 1961 statistics, a cutoff date of 28 February was established for the processing of reports from vessel operators covering the prior year's completed movements. Hence, reports of movements completed in 1985 but not reported to the Corps of Engineers until after 28 February 1986 will be included in the next year's, 1986, statistics rather than in this publication, while reports of movements completed in 1984 but reported to the Corps after 28 February 1985 are included in this publication.

Sponsored by the Office of Statistical Policy, Office of Management and Budget, a uniform system of classification for freight was developed with cooperation of all Federal agencies engaged in collecting and compiling data on shipping. This classification, the Commodity Classification for Domestic Waterborne Commerce, is used for data on the foreign and domestic commerce presented in these publications, although some minor modifications exist in the foreign data which were necessitated by Bureau of the Census policies and procedures.

The domestic traffic includes all commercial movements between points in the United States, Puerto Rico, and the Virgin Islands. Traffic with the Panama Canal Zone is treated as foreign commerce. Cargo moved for the military agencies in commercial vessels is reported as ordinary commercial cargo; military cargo moved in Department of Defense vessels is omitted from these statistics.

All movements between the United States and foreign countries and between Puerto Rico and Virgin Islands, U.S.A., and foreign countries are classified as foreign traffic. Trade between United States territories and possessions, i.e. Guam, Wake, American Samoa, etc., and foreign countries is excluded.

These data are furnished to the Corps of Engineers by the Bureau of the Census under a working arrangement sponsored by the Office of Statistical Policy, Office of Management and Budget. The data are confined to movements by water, and are reconcilable with published reports of the Bureau of the Census. Shipments of domestic merchandise and re-exports of foreign merchandise are termed exports. The imports include inbound merchandise for direct consumption and entries into custom bonded storage and manufacturing warehouses. Intransit merchandise, defined by the Bureau of the Census as merchandise coming into the United States from a foreign country and shipped to a foreign country without having been entered as an import, is treated as an import when unloaded from a vessel and as an export when loaded on a vessel. Export shipments for use of the United States Armed Forces abroad are excluded from the statistics as are import shipments on Department of Defense owned and operated vessels. Foreign trade data of territories and possessions other than Puerto Rico and the Virgin Islands, which are under the jurisdiction of the Department of the Interior, were not furnished to the Corps of Engineers by the Bureau of the Census and are excluded from the statistics of both agencies.

Export shipments under the various foreign aid programs on Department of Defense operated vessels, either American Flag commercial vessels under time, voyage, or space charter or vessels owned and operated by the Department of Defense, and various items (listed by the Census) which affect national security are not published in terms of the individual commodities shipped. Instead, a lump-sum tonnage figure is compiled and appears in these tables as commodity code 9999, "Department of Defense Controlled Cargo and Special Category Items."

The 1985 statistics on waterborne exports of domestic and foreign merchandise and non-Department of Defense shipments of Special Category commodities reflect fully compiled data for shipments to Canada individually valued at \$2,000 and over combined with estimated data for shipments valued \$251-\$1,999, based on a 10-percent sample of such shipments. For countries other than Canada, the export statistics reflect fully compiled data for shipments valued \$1,000 and over combined with estimated data for shipments valued \$251-\$999, based on a 50-percent sample of such shipments. Data on export shipments valued under \$251 are excluded from this report.

Import statistics for 1985 exclude data on shipments valued \$250 and under reported on both formal and informal entries. Informal entries generally contain items valued not more than \$250.

Foreign trade data furnished by Census are based on reports processed for Census' monthly data January through December and represent statistical year rather than calendar year data.

Combination of the net domestic traffic (originating commodity movements) with the foreign traffic (imports and exports) provides the net total tons of the waterborne commerce of the United States. In summarizing the domestic commerce to obtain the net loading of rail cars moved on car-ferries; cargo on general ferries; Government materials moved by water in connection with waterway improvements and maintenance; and coal and petroleum products loaded from shore facilities directly into bunkers of vessels for fuel were excluded. (There are certain, so-called car-ferry operations which are not considered in the ferry category; rail-car carriers on the Great Lakes which operate under Part III of the Interstate Commerce Act; and rail-car carriers between points in the contiguous 48 States or in Canada on the one hand and Alaska on the other.)

For Parts 1 through 4, and Section 1 of Part 5, ton-mileage data are computed by the Corps of Engineers to reflect movements on rivers, inland waterways, and waters of the Great Lakes System only. Cargoes of deep-sea vessels - both in the foreign and domestic trades - are included only for that portion of the voyage that occurred on inland rivers, canals, or connecting channels. Thus, for a movement of commodities from Boston, Massachusetts, to New Orleans, Louisiana, ton-miles are computed for the haul on the Cape Cod Canal - if this canal was transited during the trip - and for the haul on the Mississippi River, the carriage on the ocean and Gulf of Mexico is not taken into account. In Section 3 of Part 5, ton-mileage data are based on the entire haul for the domestic traffic.

TERMS FOR KIND OF TRAFFIC

Imports and exports. These terms apply to traffic between the United States and Foreign ports, including the Canal Zone. Traffic of U.S. Great Lakes ports with Canada is supplemented by the term "Canadian" to differentiate it from overseas traffic.

Coastwise receipts and shipments. These terms apply to domestic traffic receiving a carriage over the ocean, or the Gulf of Mexico, e.g. New Orleans to Baltimore, New York to Puerto Rico, San Francisco to Hawaii, Puerto Rico to Hawaii. Traffic between Great Lakes ports and seacoast ports, when having a carriage over the ocean, is also termed "coastwise." The Chesapeake Bay and Puget Sound are considered internal bodies of water rather than arms of the ocean and therefore, traffic confined to these areas is "internal" rather than "coastwise."

Lakewise receipts and shipments. These terms apply to traffic between United States ports on the Great Lakes System. The Great Lakes System is treated as a separate system rather than as a part of the inland system.

Internal receipts and shipments. These terms apply to traffic between ports or landings wherein the entire movement takes place on inland waterways. Also termed internal are movements involving carriage on both inland waterways and waters of the Great Lakes; inland movements that cross short stretches of open waters which link inland systems; marine products, sand and gravel taken directly from beds of the oceans, the Gulf of Mexico and important arms thereof; and movements between offshore installations and inland waterways.

Local. Movements of freight within the confines of a port whether the port has only one or several arms or channels, except car-ferry and general ferry, are termed "local." The term is also applied to marine products, sand, and gravel taken directly from the Great Lakes.

Intraterritorial receipts and shipments. These terms apply to traffic between ports in Puerto Rico and the Virgin Islands, U.S.A. which are considered as a single unit.

SECTION 2 of this publication presents on an area-to-area basis the tonnages of principal commodities transported by vessels in the domestic inland waterway trade of the United States. For each commodity, the total for the United States (total of all shipping areas), the total shipped from each shipping area, and the total from each shipping area to each receiving area (destination) are shown in the tables. The origin and destination areas are defined in terms of waterways, incorporating minor tributaries, and in some instances, major ports, which are not susceptible to inclusion in a single waterway. The area designations are designed to avoid disclosure of individual company operations.

These data cover those movements confined to the inland waterways and between the inland waterways and United States ports on the Great Lakes, they combine the totals of internal and local types of traffic as defined above. Collectively, the selected commodities included account for 75.7 percent of the total domestic inland traffic.

SECTION 3 presents the performance of the water carrier industry in terms of ton-miles on a type of service basis and provides detailed data on types of traffic and commodities transported in the domestic trades, also in terms of ton-miles during 1985. Water carriage ton-miles were first compiled and published for 1962. However, somewhat comparable data were released for 1961. The 1961 compilations were made on a carrier (ICC regulated and exempt) basis rather than by type of service; regulated carriers may engage in more than one type of service.

Preparation and publication of these data were sponsored by the Office of Statistical Policy, Office of Management and Budget, in response to numerous requests received from congressional, federal and private agencies.

Ton-miles were computed by the Corps of Engineers based on origin/destination of commodity tonnages reported by vessel operators on Office of Management and Budget approved BNG Form 3925 and related forms; these forms were submitted to the Corps for the compilation of port and waterway statistics published in Parts 1 to 5 of "Waterborne Commerce of the United States." Distance factors used are in statute miles and, for the Coastwise trade, represent mileage on the shortest route that safe navigation permits between ports of origin and destination. The factors for this trade were developed from United States Coast and Geodetic Surveys, "Distance Between United States Ports," and United States Navy Hydrographic Offices, "Table of Distances Between Ports." For rivers and inland waterways, distance factors were developed from waterway survey maps and records of the Corps of Engineers and are based on the actual routes reported by vessel operators on the reporting forms.

Type of service (carriage) is based on information supplied by vessel operators on the reporting forms, which were modified for the 1962 statistics to obtain this information. Categories of service are: (1) Regulated, which is common and contract carriage subject to economic regulation by the Interstate Commerce Commission. (2) Exempt, for hire, carriage which is exempt from regulation by the Commission because of specific provisions in Part III, Interstate Commerce Act. (3) Private, which represents the movement of the property of the water carrier in the vessels it operates; this category is also exempt from regulation by the Commission.

The commodities are listed in terms of the Commodity Classification for Domestic Waterborne Commerce used in all 5 parts of the Corps of Engineers' annual publication, "Waterborne Commerce of the United States." Types of traffic are also the same as those reported and defined above. Both traffic and commodity ton-miles in this section bear a direct relationship to the corresponding tonnages reported in Table 2 of Section 1, consequently, the ton-mile data herein are based on the same February 28 cutoff date used in the compilation of the tonnage data.

Total ton-miles for all types of traffic shown in Table 1 of this section are considerably higher than the total shown in Table 6 of Section 1. The difference is entirely in Coastwise traffic, since the total distance, both inland and ocean, was used in developing data presented in this section, whereas only the inland portion is included in tables comprising Section 1. Both of these tables include ton-miles for the foreign trade of the U.S. in U.S. flag as well as foreign flag vessels; however, the computation is limited to the distance transported on the Great Lakes between the head of the Lakes at Duluth/Superior and the international boundary at St. Regis, Quebec, Canada, and on the inland waterways of the U.S. and the entrance channels to U.S. coastal ports; this foreign traffic is not subject to economic regulation by the Interstate Commerce Commission.

All totals of both columns and rows, all averages, and all percentages are based on figures before rounding to thousands. Hence, slight differences appear between the totals shown in the sum of the rounded figures in columns and rows, in the percentages, and in the average hauls when compared with the quotients derived by dividing the ton-miles by the rounded or unrounded tons shown in either this section or in Section 1.

COMMODITY CLASSIFICATION FOR DOMESTIC WATERBORNE COMMERCE

NOTE: The commodity descriptions used in the statistical tables in this publication are abbreviated to conserve printing space of the following commodities:

Code No.	Item Name	Code No.	Item Name
Group 01-Farm Products		Group 19-Ordnance and Accessories	
0101	Cotton, raw	1911	Ordnance and accessories
0102	Barley and rye	Group 20-Food and Kindred Products	
0103	Corn		
0104	Oats	2011	Meat, fresh, chilled, or frozen
0105	Rice	2012	Meat and meat products prepared or preserved, including canned meat products
0106	Sorghum Grains	2014	Tallow, animal fats and oils
0107	Wheat	2015	Animal by-products, not elsewhere classified
0111	Soybeans	2021	Dairy products, except dried milk and cream
0112	Flaxseed	2022	Dried milk and cream
0119	Oilseeds, not elsewhere classified	2031	Fish and fish products, including shellfish, prepared or preserved
0121	Tobacco, leaf	Group 20-Food and Kindred Products	
0122	Hay and fodder		
0129	Field crops, not elsewhere classified	2034	Vegetables and preparations, canned and otherwise prepared and preserved
0131	Fresh fruits	2039	Fruits, and fruit and vegetable juices, canned and otherwise prepared or preserved
0132	Bananas and plantains	2041	Wheat flour and semolina
0133	Coffee, green and roasted (including instant)	2042	Animal feeds
0134	Lucua beans	2049	Grain mill products, not elsewhere classified
0141	Fresh and frozen vegetables	2061	Sugar
0151	Live animals (livestock) except zoo animals, cats, dogs, etc.	2062	Molasses
0161	Animals and animal products, not elsewhere classified	2081	Alcoholic beverages
0191	Miscellaneous farm products	2091	Vegetable oils, all grades; margarine and shortening
Group 08-Forest Products		2092	Animal oils and fats, not elsewhere classified, including marine
0841	Crude rubber and allied gums	2094	Groceries
0861	Forest products, not elsewhere classified	2095	Ice
Group 09-Fresh fish and Other Marine Products		2099	Miscellaneous food products
0911	Fresh fish, except shellfish	Group 21-Tobacco Products	
0912	Shellfish, except prepared or preserved		
0913	Menhaden	2111	Tobacco manufactures
0931	Marine shells, unmanufactured	Group 22-Basic Textiles	
Group 10-Metallic Ores			
1011	Iron ore and concentrates	2211	Basic textile products, except textile fibers
1021	Copper ore and concentrates	2212	Textile fibers not elsewhere classified
1051	Bauxite and other aluminum ores and concentrates	Group 23-Apparel and Other Finished Textile Products Including Knit	
1061	Manganese ores and concentrates		
1091	Nonferrous metal ores and concentrates, not elsewhere classified	2311	Apparel and other finished textile products, including knit
Group 11-Coal		Group 24-Lumber and Wood Products Except Furniture	
1121	Coal and lignite		
Group 13-Crude Petroleum		2411	Logs
1311	Crude petroleum	2412	Rafted logs
Group 14-Nonmetallic Minerals, Except Fuels		2413	Fuel wood, charcoal, and wastes
1411	Limestone flux and calcareous stone	2414	Timber, posts, poles, piling, and other wood in the rough
1412	Building stone, unworked	2415	Pulpwood, log
1442	Sand, gravel and crushed rock	2416	Wood chips, staves, moldings, and excelsior
1451	Clay, ceramic and refractory materials	2421	Lumber
1471	Phosphate rock	2431	Veneer, plywood, and other worked wood
1479	Natural fertilizer materials, not elsewhere classified	2491	Wood manufactures, not elsewhere classified
1491	Salt	Group 25-Furniture and Fixtures	
1492	Sulphur, dry		
1493	Sulphur, liquid	2511	Furniture and fixtures
1494	Gypsum, crude and plasters	Group 26-Pulp, Paper and Allied Products	
1499	Nonmetallic minerals, except fuels, not elsewhere classified		
		2611	Pulp
		2621	Standard newsprint paper

Code No.	Item Name	Code No.	Item Name
Group 26-Pulp, Paper and Allied Products (continued)		Group 32-Stone, Clay, Glass and Concrete Products	
2631	Paper and paperboard	3211	Glass and glass products
2691	Pulp, paper and paperboard products, not elsewhere classified	3241	Building cement
Group 27-Printed Matter		3251	Structural clay products, including refractories
2711	Printed matter	3271	Lime
		3281	Cut stone and stone products
Group 28-Chemicals and Allied Products		3291	Miscellaneous nonmetallic mineral products
Group 29-Petroleum and Coal Products		Group 33-Primary Metal Products	
2810	Sodium hydroxide (caustic soda)	3311	Pig iron
2811	Crude products from coal tar, petroleum, and natural gas, except benzene and toluene	3312	Slag
2812	Dyes, organic pigment, dyeing and tanning materials	3313	Coke (coal and petroleum), petroleum pitches and asphalts, and naphtha and solvents
2813	Alcohols	3314	Iron and steel ingots, and other primary forms, including blanks for tube and pipe, and sponge
2816	Radioactive and associated materials, including waste	3315	Iron and steel bars, rods, angles, shapes and sections, including sheet piling
2817	Benzene and toluene, crude and commercially pure	3316	Iron and steel plates and sheets
2818	Sulphuric acid	3317	Iron and steel pipe and tube
2819	Basic chemicals and basic chemical products, not elsewhere classified	3318	Ferroalloys
2821	Plastic materials, regenerated cellulose and synthetic resins, including film, sheeting and laminates	3319	Primary iron and steel products, not elsewhere classified including castings in the rough
2822	Synthetic rubber	3321	Nonferrous metals primary smelter products, basic shapes, wire castings and forgings, except copper, lead, zinc and aluminum
2823	Synthetic (man-made) fiber	3322	Copper and copper alloys, whether or not refined, unworked
2831	Drugs (biological products, medicinal chemicals, botanical products and pharmaceutical preparations)	3323	Lead and zinc including alloys, unworked
2841	Soap, detergents, and cleaning preparations; perfumes, cosmetics, and other toilet preparations	3324	Aluminum and aluminum alloys, unworked
2851	Paints, varnishes, lacquers, enamels, and allied products	Group 34-Fabricated Metal Products, Except Ordnance, Machinery and Transportation Equipment	
2861	Gum and wood chemicals	3411	Fabricated metal products, except ordnance, machinery, and transportation equipment.
2871	Nitrogenous chemical fertilizers, except mixtures	Group 35-Machinery, Except Electrical	
2872	Potassic chemical fertilizers, except mixtures	3511	Machinery, except electrical
2873	Phosphatic chemical fertilizers, except mixtures

INTRODUCTION

XI

Code No.	Item Name
	Group 41-Special Items
4111	Water
4112	Miscellaneous shipments not identifiable by commodity
4113	LCL freight
4118	Materials used in waterway improvement, Government materials
4119	Empty containers
9999*	Department of Defense controlled cargo and special category items

* Cargoes exported on Department of Defense controlled vessels (other than goods for the use of U.S. Armed Forces abroad) and non-Department of Defense shipments of military component items (abbreviated SCi) for which commodity detail is not furnished to the Corps of Engineers.

Section 1
NATIONAL SUMMARIES

Total Waterborne Commerce of the United States experienced a moderate decrease in 1985. Commerce in 1985 amounted to 1,788.4 million tons, a decrease of 47.6 million tons representing a 2.6 percent loss from the 1984 total of 1,836.0 million tons. Ton-miles recorded a decrease from 966.5 billion ton-miles in 1984 to 964.9 billion ton-miles in 1985, a decrease of 1.6 billion ton-miles (0.17 percent).

Domestic commerce amounted to 1,014.1 million tons in 1985 or an 1.8 percent decrease from the 1984 total of 1,032.7 million tons. Lakewise domestic traffic experienced a 6.1 percent decrease (6.0 million tons) from 98.0 million tons in 1984 to 92.0 million tons in 1985, most of which resulted from decreases in coal and lignite (3.0 million tons), and Iron Ore (2.7 million tons) carried. Coastwise trade (i.e. domestic ocean movements) increased from 307.7 million tons in 1984 to 309.8 million tons in 1985, an increase of 0.7 percent.

Internal and local traffic combined (i.e. predominantly barge movements between localities or inland waterways and within ports) decreased from 623.6 million tons in 1984 to 606.9 million tons in 1985, a decrease of 14.7 million tons or 2.4 percent. Intra-territory traffic had no change from 1984 to 1985 (3.4 million tons).

Foreign traffic experienced a decrease of 29.0 million tons or 3.6 percent, decreasing from a total of 803.3 million tons in 1984 to 774.3 million tons in 1985. Imports in 1985 totaled 412.7 million tons reflecting a decrease of 14.4 million tons or 3.4 percent as compared with the 1984 total of 427.1 million tons. Export Traffic recorded a decrease in 1984. Exports decreased by 14.6 million tons or 3.9 percent for a total of 361.6 million tons as compared with a total of 376.2 tons in 1984. The decrease in exports was primarily due to wheat exports decreasing 19.2 million tons. Imports through coastal ports decreased 13.7 million tons (down 3.32) for a 1985 total of 395.6 million tons. Exports through coastal ports decreased 7.9 million tons for a total of 327.4 million tons for 1985,

down 2.42. Imports from Canadian Great Lakes ports decreased 1.0 million tons, or 7.8 percent in 1985. Exports to Canadian Great Lakes ports decreased 4.6 million tons or 14.2 percent. Imports from overseas via the St. Lawrence Seaway to Great Lakes ports increased 272,000 tons, and overseas exports via the St. Lawrence Seaway decreased 2.2 million tons.

The total of 381.7 billion tons-miles recorded for the inland waterways in 1985 was comprised of 24.8 billion ton-miles (up .82) for the Atlantic Coastal Waterways, 36.5 billion ton-miles (down .82) for the Gulf Coast Waterways, 19.9 billion ton-miles (down 2.92) for the Pacific Coast Waterways, 275.7 billion ton-miles (down 4.22) for the Mississippi River System and 75.8 billion ton-miles (down .82) for the Great Lakes System. In general, the inland waterways experienced a 4.77 decrease in ton-miles in 1985.

The table below shows that the only major commodity group that had a significant percentage point change from 1984 to 1985 is "Grains" which lost 1.7 percentage points.

In 1985 the proportion of the total domestic waterborne cargo moved in barges (non-self propelled vessels) was 65.7 percent, down from 66.3 percent in 1984. Since 1971 barges have consistently carried in excess of 60 percent of domestic waterborne traffic. Total barge traffic decreased 2.6 percent and amounted to 666.7 million tons of the total 1,014 million tons of all domestic commerce. In 1985 barges carried 90.5 million tons of coastwise tonnage (29.2 percent of the total coastwise commerce), an increase of less than one percent above 1984. Lakewise barge traffic totaled 3.7 million tons (4.0 percent of total lakewise commerce) which represents an increase of 0.92 over 1984. Barged internal commerce was 502.7 million tons (a 2.42 decrease from 1984) which represents 94.0 percent of the total internal traffic. Barged local commerce was 66.6 million tons which represents 89.7 percent of total traffic (1.7 percent decrease from 1984). Intra-territory barge traffic decreased 1.0 percent and consisted of 93.82 of total intra-territory traffic.
