19 ABSTRACT (Continue on reverse if necessary and identify by block number)

Army, Navy, Air Force, Marine Corps, and Coast Guard personnel assigned in Hawaii and living in military family housing were surveyed for their opinions and attitudes about the housing and support facilities and services. Responses to items were compared to those from a similar survey conducted in Hawaii in 1985. Topics covered included: General satisfaction; Perceived effects of living conditions; Housing referral, features and facilities; Loaner furniture and appliances; Operations; Housing office services; Policies and procedures; Maintenance and repair; Security and safety; Communication; Self-help; and Temporary Lodging Allowance (TLA). Results showed that over 70% were satisfied with their housing in the 1987 survey compared with approximately 68% in 1985. Major gains in satisfaction from 1985 to 1987 were found in maintenance response time, adequacy of security patrols, satisfaction with self-help, and perceived effect on job performance and career intention.

19 (cont'd). Major losses were observed in adequacy of TLA hotel list, accuracy and adequacy of housing referral services, quality of maintenance, and adequacy of facilities. Expanded demographics in the 1987 survey also allowed for comparisons with a survey conducted in 1986 of civilian housing residents. Military family housing residents were more likely to have spouses who were unemployed by choice and to have three or more dependents in the household. Slightly more residents of civilian housing report being satisfied with their housing units and report a positive-effect of living conditions on job performance and career intentions. The effect of spouse influence on service member responses was also measured.

# INTRODUCTION

This supplement to the Report of Military Family Housing Residents Survey contains statistical tables that summarize the survey data. Response frequencies of the total survey sample for all items on the quesitonnaire are presented first. Cross-tabulations of all questions with Service, pay grade group, and area housing office follow the frequency tables.

1473

# FREQUENCY TABLES

A frequency table shows for a particular question the actual number of respondents (labelled "FREQUENCY") that picked each of the ansers listed under "VALUE LABEL." Next come three percentages based on that response frequency. "PERCENT" shows the percentage computed by dividing the frequency by the total number of respondents, including those who didn't answer the question or who gave an answer outside the range of valid answers. "VALID PERCENT" shows the percentage computed by dividing the frequency by the total number of valid answers ("VALID CASES") to the question. Finally, "CUM PERCENT" shows the cumulative percentage of the valid answers represented by that response frequency plus those above it.

For example, see the frequency table for Question 2, Service. Navy respondents numbered 2673, which represents 38.6 percent of the 6917 (6734 valid + 183 missing) total respondents and 39.7 percent of the 6734 valid responses. The CUM PERCENT column shows that the Navy responses when combined with the Army non-cohort and cohort responses listed above them represent 68.8 percent of the total valid response to the question.

BLANK

# CROSS-TABULATION TABLES

A cross-tabulation table makes it easy to compare the answers of different types of respondents (e.g., different Services or pay grade groups.) Each table shows response frequencies together with several kinds of percentages. The Q6: MARITAL STATUS by Area Housing Office table shown below will be used to explain the table format and contents.

Q6: MARITAL STATUS

| COUNT / ROW PCT / COL PCT / TOT PCT | 1 WIDOWED | 2 DIVORCED SEPARATED | 3 NEVER MARRIED SINGLE | ROW TOTAL |
|---|---|---|---|---|
| 1 FT. SHAFTER | 1108<br>95.3<br>16.7<br>16.2 | 43<br>3.7<br>21.9<br>.6 | 12<br>1.0<br>33.3<br>.2 | 1163<br>17.0 |
| 2 SCHOFIELD | 1137<br>98.4<br>17.2<br>16.6 | 19<br>1.6<br>9.7<br>.3 | 0<br>.0<br>.0<br>.0 | 1156<br>16.9 |
| 3 BARBERS POINT | 849<br>97.1<br>12.8<br>12.4 | 23<br>2.6<br>11.7<br>.3 | 2<br>.2<br>5.6<br>.0 | 874<br>12.7 |
| 4 PEARL HARBOR | 1651<br>95.4<br>24.9<br>24.1 | 62<br>3.6<br>31.6<br>.9 | 17<br>1.0<br>47.2<br>.2 | 1730<br>25.2 |
| 5 HICKAM | 1191<br>96.6<br>18.0<br>17.4 | 38<br>3.1<br>19.4<br>.6 | 4<br>.3<br>11.1<br>.1 | 1233<br>18.0 |
| 6 KANEOHE | 687<br>98.3<br>10.4<br>10.0 | 11<br>1.6<br>5.6<br>.2 | 1<br>.1<br>2.8<br>.0 | 699<br>10.2 |
| COLUMN TOTAL | 6623<br>96.6 | 196<br>2.9 | 36<br>.5 | 6855<br>100.0 |

**SAMPLE**

Row labels are printed down the left side of the table ("FT SHAFTER," "SCHOFIELD", etc.), column labels across the top ("MARRIED", "SEPARATED", "SINGLE"). The last column on the right contains the row totals, which are the sums of the frequencies for each row, together with the percentages of the total responses those sums represent. In our example, 1163 people answered "FT. SHAFTER"; this represents 17.0 percent of the 6855 grand total responses shown in the bottom right corner. Similarly, the column totals printed at the bottom show the sums of the frequencies for each column and their corresponding percentages. Note than any respondent who is missing an answer for either of the two cross-tabulation questions is excluded from the table and would be counted as missing.

Within each cell in the table, the first number is the cell frequency. In the example, 1108 Ft. Shafter people answered "Married." The next number is the row percentage: the 1108 responses account for 95.3% of the Ft. Shafter answers to that question. Then comes the column percentage, here showing that the 1108 are 16.7% of the "Married" answers. The last number is the total percentage, which indicates that the 1108 is 16.2% of the table total of 6855 answers. Note that the short titles printed in the upper left corner of the table serve as a quick reminder of the cell contents.
