INTRODUCTION

This bibliography replaces its predecessor, "Management and the Executive," prepared in March 1979. It lists books and periodical articles covering such topics as personnel management, corporate planning, decision-making, executive training, leadership, management information systems, and organizational behavior. In addition it highlights some special interest areas: women executives, chief executive officers, job stress, and ethics. An index of management topics is appended to assist readers in finding related items.

The Pentagon Library serves Department of Defense personnel stationed in the Pentagon and DOD employees assigned to the National Capital Region who do not have library service at their duty station. Librarians are available to assist researchers from 0900-1600 hours Monday through Friday, except federal holidays. The library contains an extensive and current collection of books, periodicals, legal and congressional materials, military publications, and technical reports of Army and DOD studies.

Handwritten note: This is a copy of a document in the 1979 bibliography on executive management and administration.
