BIBLIOGRAPHY OF SOVIET LASER DEVELOPMENTS

No. 89

MAY - JUNE 1987

Date of Report

April 20, 1988

Vice Director for Foreign Intelligence
Defense Intelligence Agency

This document was prepared for the Defense Intelligence Agency under an intragovernment agreement. It is intended to facilitate access of government researchers to Soviet laser literature.

Comments should be addressed to the Defense Intelligence Agency, Directorate for Scientific and Technical Intelligence, ATTN: DT-5A

Approved for public release; distribution unlimited

19. KEY WORDS Solid State Lasers, Liquid Lasers, Gas Lasers, Chemical Lasers, Laser Components, Nonlinear Optics, Spectroscopy of Laser Materials, Ultrashort Pulse Generation, Free Electron Lasers, Laser Theory, Laser Biological Effects, Laser Communications, Laser Beam Propagation, Adaptive Optics, Laser Computer Technology, Holography, Laser Chemical Effects, Laser Parameters, Laser Measurement Applications, Laser-Excited Optical Effects, Laser Spectroscopy, Laser Beam-Target Interaction, Laser Plasma		
20. ABSTRACT This is the Soviet Laser Bibliography for May-June 1987, and is No. 89 in a continuing series on Soviet Laser developments. The coverage includes basic research on solid state, liquid, gas, and chemical lasers; components; nonlinear optics; spectroscopy of laser materials; ultrashort pulse generation; theoretical aspects of advanced lasers; and general laser theory. Laser applications are listed under biological effects; communications systems; beam propagation; adaptive optics; computer technology; holography; laser- induced chemical reactions; measurement of laser parameters; laser measurement applications; laser-excited optical effects; laser spectroscopy; beam-target interaction; and plasma generation and diagnostics.

INTRODUCTION

This bibliography has been compiled under an interagency agreement as a continuing effort to document current Soviet-bloc developments in the quantum electronics field. The period covered is May-June 1987, and includes all significant laser-related articles received by us in that interval. The bulk of the entries come from the approximately 30 periodicals which are known to publish the most significant findings in Soviet laser technology. Citations from the Soviet Reference Journals (journals of abstracts) are also included. Laser items from the popular or semipopular press are generally omitted. All sources cited with no parenthetical notation are available at the Library of Congress. A parenthetical entry indicates the secondary source in which the citation was found as a bibliographic entry or abstract, but for which the original source is not currently available at the Library.

Since our computer is not now able to print between lines, superscripts and subscripts are indicated by (sup) and (sub).

We are producing the entire bibliography on computer. To make our bibliography compatible with other data bases, for source abbreviations, we use the letter codens generally used in our own government rather than transliterations of abbreviations used in the Soviet Union. Likewise, we use letter codens to designate affiliations. The authors' affiliations are indicated in parentheses after the authors' names in the text. Empty parentheses indicate that the affiliation was not given. A source abbreviations list, authors' affiliations list, and author index are included in the back of the bibliography.

SOVIET LASER BIBLIOGRAPHY, MAY-JUNE 1987

TABLE OF CONTENTS

I. BASIC RESEARCH

A. Solid State Lasers

1. Crystal

a. Miscellaneous	1
b. Ruby	---
c. LiF	2

2. Rare Earth

a. Miscellaneous	2
b. Nd ³⁺	3
c. Er ³⁺	3
d. Ho ³⁺	3
e. Tm ³⁺	---

3. Semiconductor

a. Theory	4
b. Miscellaneous Homojunction	4
c. Miscellaneous Heterojunction	5
d. GaAs	6
e. CdS	6
f. ZnSe	6
g. Pb(1-x)Sn(x)Te	---
h. InGaAsP	7

4. Glass	
a. Miscellaneous	---
b. Nd	7
c. Er	---
B. Liquid Lasers	
1. Organic Dyes	
a. Miscellaneous	8
b. Rhodamine	9
c. Polymethine	---
d. Coumarin	---
e. Phthalimide	---
f. Cyanine	---
g. Xanthene	---
h. POPOP	---
2. Inorganic Liquids	---
C. Gas Lasers	
1. Theory	9
2. Simple Mixtures	
a. Miscellaneous	10
b. He-Ne	10
c. He-Xe	---
d. He-Kr	---
e. Ar-Xe	---

3.	Molecular Beam and Ion	
a.	Miscellaneous	---
b.	Carbon Dioxide	11
c.	Carbon Monoxide	12
d.	Noble Gas	12
e.	Nitrogen	12
f.	Iodine	---
g.	Hydrogen	---
h.	Ammonia	---
i.	Carbon Tetrafluoride	---
j.	Nitrous Oxide	---
k.	Water Vapor.....	---
l.	Heavy-Water Vapor	---
m.	Submillimeter	13
n.	Metal Vapor	13
o.	Gasdynamic	14
4.	Excimer	14
5.	Dye Vapor	---
D.	Chemical Lasers	
1.	Miscellaneous	16
2.	Fluorine + Hydrogen (Deuterium)	16
3.	Photodissociation	16
4.	Transfer	---
5.	Oxygen + Iodine	17
6.	Carbon Disulfide + Oxygen	---
7.	Sulfur Hexafluoride + Hydrogen	---

E. Components

1. Miscellaneous	---
2. Resonators	
a. Design and Performance	17
b. Mode Kinetics	18
3. Pump Sources	19
4. Cooling Systems	---
5. Deflectors	20
6. Attenuators	---
7. Collimators	21
8. Diffraction Gratings	21
9. Focusers	23
10. Windows	---
11. Polarizers	23
12. Beam Shapers	23
13. Lenses	23
14. Filters	24
15. Beam Splitters	24
16. Mirrors	25
17. Detectors	27
18. Modulators	28

F. Nonlinear Optics	
1. General Theory	29
2. Frequency Conversion	36
3. Parametric Processes	37
4. Stimulated Scattering	
a. Miscellaneous Scattering	39
b. Raman	39
c. Brillouin	40
d. Rayleigh	---
5. Self-focusing	40
6. Acoustic Interaction	41
G. Spectroscopy of Laser Materials	42
H. Ultrashort Pulse Generation	43
