INTRODUCTION

The Joint DOD/Industry/NBS Conference on the Computer-aided Acquisition and Logistic Support (CALS) Phase I.1 Core Requirements was held at Gaithersburg, Maryland on 26 April 1988. The latest set of core requirements documents were introduced into the formal coordination process; in addition, presentations at the conference provided information about the status and plans of various government and industry CALS activities. The CALS draft core requirements documents introduced at the conference were:

MIL-R-RASTER	Raster Graphics Representation in Binary Format, Requirements for
MIL-D-CGM	Digital Representation for Communication of Illustration Data: CGM Application Profile
MIL-HDBK-CALS	Department of Defense Computer-aided Acquisition and Logistic Support (CALS) Program Implementation Guide
MIL-STD-1840A	Notice 1; Automated Interchange of Technical Information
MIL-D-28000	Ammendment 1; Digital Representation for Communication of Product Data: IGES Application Subsets

A sixth draft document, TRIF 2.0, "Tiled Raster Graphics Content Architecture," was also distributed to the attendees to assist them in evaluating the draft MIL-R-RASTER which references TRIF 2.0.

The speakers at the conference described in some detail the changes and amendments to the CALS Phase I.0 documents, MIL-STD-1840A and MIL-D-28000, and the three Phase I.1 documents released for coordination. In addition to covering the status of the current DOD and Industry Task Force activities, presenters at the conference also introduced two new CALS programs, PDES Inc. and the DOD/Industry CALS Test Network. PDES Inc. is an industry cooperative recently formed to accelerate the implementation of the Product Data Exchange Standard (PDES) technology, a computer interpretable form of product data. The Cals Test Network is an Air Force managed project to test the CALS core requirements in a controlled environment, and to provide feedback to the standards process and vendor implementations. The final session of the conference was a panel discussion by the Services and the Defense Logistics Agency of their plans and strategies for the evolution of CALS.

This document provides a record of the conference agenda, biographical sketches of the conference speakers, and copies of the speakers' presentation materials.

CALS PHASE II STRATEGY

- INDUSTRY HAS AS MUCH AT STAKE AS DoD
- PRIME-PRIME, PRIME-VENDOR LINKS ARE ESSENTIAL TO STAY COMPETITIVE
- INDUSTRY INVESTMENT WILL BE ORDERS OF MAGNITUDE GREATER THAN IN-HOUSE DoD INVESTMENT
- DATA BASE SHARING PRESENTS A NEW PLATEAU OF TECHNICAL AND MANAGEMENT PROBLEMS, BUT PAYOFFS ARE HIGH
- PREFERRED MODE IS FOR DoD TO ADOPT A COMMON INDUSTRY-DEVELOPED APPROACH, RATHER THAN VICE VERSA

PDES DEVELOPMENT

- **INDUSTRY PDES COOPERATIVE**
 - **DEVELOP AND DEMONSTRATE PRAGMATIC, IMPLEMENTABLE SPECIFICATIONS**
 - **INDUSTRY FUNDED**
- **GOVERNMENT PDES USERS GROUP**
 - **COORDINATE DoD AND OTHER AGENCY IMPLEMENTATION**
 - **COMMON INTERFACE WITH INDUSTRY**

Table 1
Raster Scan Data

[illegible]

The image in Figure 1 may be encoded into $30 \times 42 = 1260$ bits. 1's correspond to black pixels, 0's correspond to white pixels. Although normally these 1260 "raster scan" bits would be stored or transmitted purely sequentially, they are arranged here in groups of 42 to emphasize their correspondence with the original image.

WHAT IS CGM?

- DATA INTERFACE STANDARD
 - SPECIFIES FILE FORMAT
 - PICTURE INFORMATION
 - DEVICE-INDEPENDENT
- PURPOSE - FACILITATE PICTURE TRANSFER BETWEEN
 - DIFFERENT GRAPHICAL SOFTWARE SYSTEMS
 - DIFFERENT GRAPHICAL DEVICES
 - DIFFERENT COMPUTER GRAPHICS INSTALLATIONS
- WHICH STANDARD:
 - ISO 8632/1-4 1987 (INTERNATIONAL)
 - ANSI X3.122-1986 (NATIONAL)
 - FIPS 128 (FEDERAL GOVERNMENT)

CGM FEATURES

- FUNCTIONAL SPECIFICATION - SEMANTICS
 - SNAPSHOT OF FINAL IMAGE
 - FILE FORMAT OF ORDERED SET OF ELEMENTS
 - ONE OR MORE PICTURES
 - RANDOM ACCESS -- PICTURE INDEPENDENCE
- 3 ENCODINGS OF METAFILE SEMANTICS - SYNTAX
 - CHARACTER
 - BINARY
 - CLEAR TEXT
- DOES NOT INCLUDE
 - METAFILE GENERATOR SPECIFICATIONS
 - METAFILE INTERPRETER SPECIFICATIONS

WHY HAVE A CGM APPLICATION PROFILE FOR CGM?

- CGM SYNTAX IS COMPLETE AND UNAMBIGUOUS, BUT
CGM SEMANTICS ARE INCOMPLETE --

"IMPLEMENTATION DEPENDENT"

- BEHAVIOR OF CGM GENERATORS AND INTERPRETERS
IS NOT STANDARDIZED

RESULT -- THERE CAN BE NO SINGLE CORRECT
INTERPRETATION OF A METAFILE
WITHOUT AN APPLICATION PROFILE

WHAT IS AN APPLICATION PROFILE (AP)?

IT HAS BEEN DEFINED IN CALS AS:

**"A DEFINED SET OF SPECIFIC
ENTITY TYPES WHICH ARE USED
TO COMPLETELY AND UNAMBIGUOUSLY
REPRESENT THE INFORMATION
REQUIREMENTS FOR A PARTICULAR
APPLICATION OF DIGITAL GRAPHICS
DATA."**

MIL-D-CGM

- **CGM APPLICATION PROFILE FOR COMMUNICATION OF ILLUSTRATION DATA**
- **RESOLUTION OF AMBIGUOUS SEMANTICS**
- **SPECIFICATION OF BEHAVIOR OF CGM GENERATORS AND INTERPRETERS**
- **ADDITION OF REGISTERED PARAMETER AND ATTRIBUTE VALUES**

MIL-D-CGM FEATURES

- IDENTICAL TO MAP/TOP V3.0 APPLICATION PROFILE WITH:
 - A FEW EXCEPTIONS/DEVIATIONS
 - A FEW ADDITIONS
 - SOME CLARIFICATION/EMPHASIS OF INTENT
- COMPATIBILITY WITH MAP/TOP CGM APPLICATION PROFILE
 - COLLABORATIVE WORK WITH TOP EXPERTS TO MAINTAIN COMPATIBILITY
- OBJECTIVES
 - IMMEDIATELY USABLE
 - SUPERSET OF THE TOP PROFILE
 - IMPLEMENTABLE NOW

RELATION OF MIL-D-CGM TO MIL-STD-1840A

- **WILL OPERATE AS DO MIL-D-28000
AND MIL-D-28001**
- **UPDATE MIL-STD-1840A TO CALL

MIL-D-28000 Amendment 1 Project

14 April 1988

The CALS Digital Product Data project at the National Bureau of Standards has recently completed an Amendment 1 to MIL-D-28000. The Amendment was prepared as a March 88 deliverable to the DOD CALS Project.

The amendment introduces five changes to the MILSPEC:

- 1. Corrections to Class I data from technical review by the IGES/PDES Technical Publications Committee.**
- 2. Corrections to Class II data from technical review by the IGES/PDES Drafting Committee.**
- 3. Updating of the MILSPEC to use IGES Version 4.0 entity extensions for intercharacter spacing and dotted line font.**
- 4. Addition of a new Class IV section for NC manufacturing data exchange.**
- 5. Wording in Section 6 to introduce the intent to migrate towards Application Protocols with future revisions of the MILSPEC.**

The Amendment was duplicated and mailed for preliminary review the week of April 4 to IGES/PDES Organization committee chairmen and to members of the CALS Industry Committee. This will start a review and comment effort leading to publication in October 1988.

Key Conclusions

The Issue

CAE Functional Support for Design Decisions That Substantially Determine a Product's R&M

The Approach

- R&M CAE Tools are Important But Not Central
- Integration, Validation of Design Decision Support are Key
- Processes and Organizations to Support R&M CAE are Also Key
- R&M CAE Must Fit in Each Contractors Design Processes; Flexibility is Needed in DOD Approach
- DOD and Contractors Must Address Whole Design Process — Both Conceptual Design and Detailed Design
- Emphasis Must Be Put on Improving Design Processes, Not Just the Product
