REVIEW AND APPROVAL STATEMENT

USAFETAC/DS-88/031, Station Climatic Summaries, North America, August 1988, is approved for public release. There is no objection to unlimited distribution of this document to the public at large, or by the Defense Technical Information Center (DTIC) to the National Technical Information Service (NTIS).

This document has been reviewed and is approved for publication.

Kenneth R. Walters, Jr. for

WILLIAM F. SJOBERG, Major, USAF
Chief, Readiness Support Section

FOR THE COMMANDER

Wayne E. McCollom for

WALTER F. BURGMANN
Scientific and Technical Information
Program Manager

Regional collections of climatic summaries are published as USAFETAC "data summaries"—numbered as shown below—for each of eight major geographical areas listed below and as shown by the map. Each collection is revised when and as required. When a revision is issued, the "DS" end number remains the same (i.e., North America is 031, Latin America is 032, Europe is 033, and so on); only the year of issue changes. The map shows regional boundaries corresponding to each numbered volume.

USAFETAC/DS-XX/031	North America	USAFETAC/DS-XX/035	Asia
USAFETAC/DS-XX/032	Latin America	USAFETAC/DS-XX/036	Peoples Republic of China*
USAFETAC/DS-XX/033	Europe	USAFETAC/DS-XX/037	USSR and Mongolian Peoples Republic
USAFETAC/DS-XX/034	Africa	USAFETAC/DS-XX/038	Antarctica, Australia, and Oceania

*Initial publication deferred—to be announced

Address questions or comments to USAFETAC/ECR, Scott AFB, IL 62225-5438, Autovon 576-3465.

SUPPLEMENTAL SUMMARY OF DAY DATA SECTION. The data in this section was developed by supplementing the hourly observations from this station with data from the following sources: Wernstedt, Frederick, World Climatic Data, Climatic Data Press, 1972; World Survey of Climatology, Vol 11, Ed. by H.E. Landsberg, 1976; USAFETAC, Worldwide Airfield Climatic Data, Vol IV, 1967; Canadian Atmospheric Environment Service, Principal Station Data, Cold Lake, 1984. This section does not provide true means and extremes as for a 24-hour, 7-day, station; the data should therefore be considered "informational" and used with extreme caution.

OPERATIONAL CLIMATIC DATA SUMMARY

STATION: SHINGLE POINT, YT, CANADA
LOCATION: 68°56'N, 137°14'N
PREPARED BY: USAFETAC/ECR, NOV 1986

STATION #: 719680
ELEVATION (FEET): 123'
PERIOD: 7707-8512

ICAO ID: CYUA
LST - GMT: -8
6 HRLY

REMARKS

[1] Means and Extremes Included from the 1970 NOAA/EDS Local Climatological Data Summary.
Annual Extremes Exceeded at other Sites in the Locality:
Extreme Min Temp: -47°F in Jan 1919; Max 24-hour Snowfall: 14 In. in Feb 1920.

RUSSWO POR: Hrly & Daily Obs: 4501-4902, 4904-7007.

NOTE; --DATA NOT AVAILABLE. #LESS THAN 0.5 DAY, 0.5 OR 0.05 INCH, OR 0.5 PERCENT (%) AS APPLICABLE.

REMARKS: "APPROVED FOR PUBLIC RELEASE; DISTRIBUTION IS UNLIMITED"
1. THE MEAN ANNUAL PRECIPITATION OF 15. WAS ROUNDED FROM 14.8.
2. THE EXTREME WINDS IN THE SUPPLEMENTAL SECTION ARE IDENTICAL IN VALUES TO THOSE IN THE HOURLY SECTION BECAUSE NO SPEEDS EXCEEDING THE HOURLY VALUES WERE IDENTIFIED FROM AN EARLIER PERIOD OR OTHER SOURCES DURING TIMES STATION WASN'T OPERATIONAL.
3. THE MINIMUM TEMPERATURES ARE CONSIDERABLY LOWER THAN THE HOURLY VALUES BASED ON AN EARLIER PERIOD AND OTHER SOURCES.

REMARKS [1] Means and Extremes from the 1969 NOAA/EDS Local Climatological Data Annual Summary were included.
[a] Annual Extremes Exceeded at other Sites in Locality: Ext Max Temp: 112° in Jun 1902; Ext Min Temp: 6° in Jan 1913
[3] Fastest Mile Converted to Knots.

OBSERVATIONS: Hrly and Daily Obs: Jun-Nov 46, Jan 48-Jul 70.

NOTE; -DATA NOT AVAILABLE. #LESS THAN 0.5 DAY, 0.5 OR 0.05 INCH, OR 0.5 PERCENT (%) AS APPLICABLE.

SUPPLEMENTAL SUMMARY OF DAY DATA SECTION. The data in this section has been supplemented by data from other sources and combined by a climatologist to result in an artificial representation of means and extremes. Since the data does not represent true means and extremes (as for a 24-hour, 7-day station), it should be considered "informational" and used with caution.

Legend: ANN = Annual; YOR = Years of record; POR = Period of record
D/W = Mean number of days with...; WCPA = "Worst case" (maximum) pressure altitude
@ = Based on less than full months; # = Less than 0.5 day, 0.05 inch, or 0.5%, as applicable.
** = Instantaneous peak winds
* = Data not available; $ = Percentage of calm winds ≥ mean direction

REMARKS: This climatic brief is "limited" because it is for a part-time (0400-2100 LST) station.

Hurricanes/tropical storms observed (1900-1986):

	AUG	ANNUAL
Within 60NM	0/0	0/0
Within 120NM	0/0	0/0
Within 240NM	1/2	1/2

REMARKS:
1. EXCEPT FOR THE MONTHS OF SEPTEMBER AND OCTOBER, DAILY MAXIMUM TEMPERATURES RARELY EXCEED MID TO HIGH EIGHTIES. THIS IS EVIDENCED BY THE FACT THAT JUNE (EXCLUDING SEP & OCT) IS THE ONLY MONTH WHERE THE SECOND HIGHEST DAILY MAXIMUM IS GREATER THAN 90 F.
2. MEAN ANNUAL PRECIPITATION IS 13.9 INCHES.
3. DAILY MEAN HIGH AND LOW TEMPERATURES WERE COMPUTED USING 28 YEARS OF DATA AND THEREFORE ARE NOT COMPATIBLE WITH THE DAILY AVERAGE TEMPERATURE.

SYMBOLS: * DATA NOT AVAILABLE % PERCENT CALM > PREVAILING DIRECTION # AMOUNTS < UNITS SHOWN IN HEADING & SEE REMARKS

SUPPLEMENTAL SUMMARY OF DAY DATA SECTION. The data in this section has been supplemented by data from other sources and combined by a climatologist to result in an artificial representation of means and extremes. Since the data does not represent true means and extremes (as for a 24-hour, 7-day station), it should be considered "informational" and used with caution. Note: Values with no zeroes following their decimal points have been rounded.

SUPPLEMENTAL SUMMARY OF DAY DATA SECTION. The data in this section was developed by supplementing the "part-time" observing records of this station with observations from the nearby full-time National Weather Service station at Colorado Springs. This section does not provide true means and extremes as for a 24-hour, 7-day, station; the data should therefore be considered "informational" and applied with extreme caution. Note: Values with no figure following the decimal point have been rounded.

SUPPLEMENTAL SUMMARY OF DAY DATA SECTION. The data in this section was developed from those periods during which this station took observations both full- and part-time, and by comparing its data to nearby stations such as Langley AFB, Norfolk, and Cape Hatteras. As a result, this section does not provide the true means and extremes as for a 24-hour, 7-day, station; the data should be considered "informational" and applied with extreme caution. Values with no figure following the decimal point have been rounded.

Legend: ANN = Annual; YOR = Years of record; POR = Period of record
D/W = Mean number of days with...; WCPA = "Worst case" (maximum) pressure altitude
@ = Based on less than full months; # = Less than 0.5 day, 0.05 inch, or 0.5%, as applicable.
** = Instantaneous peak winds
* = Data not available; $ = Percentage of calm winds ≥ mean direction

REMARKS: Hurricanes/tropical storms observed (1900-1985):

Legend: ANN = Annual; YOR = Years of record; POR = Period of record
D/W = Mean number of days with...; WCPA = "Worst case" (maximum) pressure altitude
@ = Based on less than full months; # = Less than 0.5 day, 0.05 inch, or 0.5%, as applicable.
** = Instantaneous peak winds
* = Data not available; $ = Percentage of calm winds ≥ mean direction

This brief is a merger of data from two earlier briefs (Oct 79 and Oct 33) for Boeing Field. Data sources were:

1. RUSSWO, POR Jan 48 to Sep 65.
2. TDF 14 data, POR 1955 to 1964.
3. Climatography of the U.S. No. 40-45, Climatic Guide for Seattle, Washington, and adjacent Puget Sound area, POR 1950-1960.
4. Worlwide Airfield Summary, POR unknown.
5. USAFETAC DATSAV, POR Jul ?? to Dec 75.
6. Data from Seattle-Tacoma Airport Summary, POR 1921-1950.

Note that for lack of summary of day data, temperature information was extracted from hourly observations.

REPORT DOCUMENTATION PAGE

1a. Report Security Classification: UNCLASSIFIED

3. Distribution/Availability of Report: Approved for public release; distribution unlimited.

4. Performing Organization Report Number: **USAFETAC/DS-88/031**

6a. Name of Performing Organization: USAFETAC

6b. Office Symbol: USAFETAC/ECR

6c. Address: Scott AFB, IL 62225-5438

11. Title: **Station Climatic Summaries, North America**

13a. Type of Report: Data Summary

14. Date of Report: August 1988

15. Page Count: 552

16. Supplementary Notation: Supersedes USAFETAC/DS-87/031, January 1987, (AD-A176735).

17. COSATI Codes: Field—04, Group—02

18. Subject Terms: *NORTH AMERICA, *METEOROLOGY, *CLIMATOLOGY, *CLIMATE, *WEATHER, *METEOROLOGICAL PHENOMENA, ceiling, visibility, precipitation, surface wind, temperature, relative humidity, dew point, cloud cover, vapor pressure, pressure altitude, thunderstorm, snowfall.

19. Abstract: A collection of summarized monthly and annual climatic data for specific locations in North America; last entry in this collection is July 1988. Summarized climatological elements are: percent frequency of occurrence of ceiling and visibility; means, extremes and number of days with specified values of temperature, precipitation, and snowfall; means of relative humidity, vapor pressure, dew point, pressure altitude, and cloud cover; prevailing wind direction, with mean and extreme speeds; and number of days with thunderstorms and fog.

20. Distribution/Availability of Abstract: Same as report

21. Abstract Security Classification: UNCLASSIFIED

22a. Name of Responsible Individual: Maj William F. Sjoberg

22b. Telephone: 618 256-3465

22c. Office Symbol: USAFETAC/ECR

DD FORM 1473

The "Station Climatic Summary" series (formerly known as "AWS Climatic Briefs"), is assembled and published by the USAF Environmental Technical Applications Center (USAFETAC). This series comprises regional collections of short climatological data summaries for specific stations worldwide.

The data for a given station may appear in any of several formats; one might consist of an "AWS Climatic Brief" (a one-page form, sometimes with a one-page addendum) or an "AWS Climatic Brief for Limited Duty Stations," another one-page form. Both these forms are gradually being replaced by a standard two-page typed format in anticipation of eventually automating the production of all these products—see note below.

The "Operational Climatic Data Summary," normally four typewritten pages, might constitute still another data set for certain stations. A two-page "Operational Climatic Data Summary Supplement" may supplement an "AWS Climatic Brief" or an "AWS Climatic Brief for Limited Duty Stations." The data types are explained below. See AWSR 105-10 and USAFETAC Pamphlet 105-3 for more detailed descriptions.

***AWS Climatic Brief (CB):** An OL-A computer-prepared summary of monthly and annual climatic data for stations with a 24-hour, 7-day observing function. OL-A creates a new "brief" whenever it prepares a new RUSSWO (Revised Uniform Summary of Surface Observations) or updates an existing one. New RUSSWOs are prepared whenever an initial 5-year period of record becomes available. Existing RUSSWOs are updated whenever 5 additional years of data are added to the original database.

***AWS Climatic Brief (CB), "Limited":** Also computer-prepared by OL-A, but for stations with climatological data limitations; e.g., abbreviated hours of operation, no "summary of day" database. "Limited" CBs are prepared along with (and using data from) a LISOCS (Limited Surface Observation Climatic Summary), rather than from a RUSSWO. Like RUSSWOs and their "briefs," new LISOCs (and accompanying "briefs") are prepared whenever there is a 5-year period of record; both are updated when a new 10-year period of record becomes available.

*Note: Both these products are being automated; during the changeover, they will be typed in a two-page vertical format. Cold Lake, on page 3, is an example of the interim format for a "limited" climatic brief. Eielson, on page 183, is an example of interim format for a "normal" climatic brief.

Operational Climatic Data Summary: A four-page typewritten summary of monthly and annual climatic data prepared by USAFETAC/ECR when the creation of a standard "climatic brief" is impractical because of lack of data (period of record too short for RUSSWO creation, no "summary of day" data available) or to answer a short-notice request. ECR normally uses the latest 10-year period of record (hourly data), more if available. These data are supplemented from other sources such as earlier periods of record, data from contemporary and/or earlier stations, and published data from other sources. All sources are given in the legend. A two-page "Operational Climatic Data Summary Supplement" may follow either of the two preceding data types.

Normally, only one of the three main products described here is prepared for a given station; however, when a station has both an "AWS Climatic Brief" and an "Operational Climatic Data Summary," users should decide (from data source and POR) which is the better product for a particular application.

All the data sets described here normally include monthly and annual climatic data for at least the following elements: Temperature (means and extremes, daily and monthly); relative humidity, vapor pressure, and dew point; pressure altitude, surface winds, precipitation, and mean cloud cover; thunderstorm and fog occurrence (mean number of days); and flying weather by ceiling and visibility category. Data limitations are normally described in individual remarks sections.
