16. Abstract

During the summer of 1987 heliport environmental data were collected at Indianapolis Downtown Heliport and at New York's Wall Street Heliport. The purpose of this data collection activity was to obtain measures of rotorwash in the heliport environment due to maneuvering helicopters, and to obtain pilot perceptions and observations concerning maneuvering and parking separation critieria. Ten wind vector transmitters were situated at various locations around the heliport in order to gather information to describe the rotorwash induced wind speed and direction changes. Pilot interviews were also conducted at these heliports.

Volume I of this report provides a summary of the results of this activity. Volume III provides the plots generated from the wind sensor data collected at the Indianapolis Downtown Heliport.

This volume (Volume II) provides the plots generated from the wind sensor data collected at New York's Wall Street Heliport.

The results of this study will be considered in future modifications of the Federal Aviation Administration (FAA) Heliport Design Advisory Circular, AC 150/5390-2.

TABLE OF CONTENTS

Appendix

A New York Approaches for 3000 to 7000 Pound Aircraft, Line Numbering Indicates Order of Collection

B New York Approaches for Aircraft Greater than 7000 Pounds, Line Numbering Indicates Order of Collection

C New York Departures for 3000 to 7000 Pound Aircraft, Line Numbering Indicates Order of Collection

D New York Departures for Aircraft Greater than 7000 Pounds, Line Numbering Indicates Order of Collection

E New York Taxiing Maneuvers for 3000 to 7000 Pound Aircraft, Line Numbering Indicates Order of Collection

F New York Taxiing Maneuvers Aircraft Greater than 7000 Pounds, Line Numbering Indicates Order of Collection

G New York Approaches for 3000 to 7000 Pound Aircraft, Line Numbering Indicates Wind Speed

H New York Approaches for Aircraft Greater than 7000 Pounds, Line Numbering Indicates Wind Speed

I New York Departures for 3000 to 7000 Pound Aircraft, Line Numbering Indicates Wind Speed

J New York Departures for Aircraft Greater than 7000 Pounds, Line Numbering Indicates Wind Speed

K New York Taxiing Maneuvers for 3000 to 7000 Pound Aircraft, Line Numbering Indicates Wind Speed

L New York Taxiing Maneuvers Aircraft Greater than 7000 Pounds, Line Numbering Indicates Wind Speed

APPENDIX A

NEW YORK APPROACHES FOR 3000 TO 7000 POUND AIRCRAFT
LINE NUMBERING INDICATES ORDER OF COLLECTION

The figures found on pages A-1 to A-44, Flight Code A, describe approaches in which the aircraft landed at the helipad and hover/ground taxied to the drop off/pick up area.

The figures found on pages A-45 to A-58, Flight Code C, describe approaches in which the aircraft approached the helipad and hover/ground taxied to parking spot 1.

The figures found on pages A-59 to A-63, Flight Code D, describe approaches in which the aircraft approached the helipad and hover/ground taxied to the parking barge between sensors 9 and 10.

The figures found on pages A-64 to A-76, Flight Code E, describe approaches in which the aircraft approached the helipad and hover/ground taxied to the parking barge.

APPENDIX B

NEW YORK APPROACHES FOR AIRCRAFT GREATER THAN 7000 POUNDS
LINE NUMBERING INDICATES ORDER OF COLLECTION

The figures found on pages B-1 to B-33, Flight Code A, describe approaches in which the aircraft landed at the helipad and hover/ground taxied to the drop off/pick up area.

The figures found on pages B-34 to B-39, Flight Code C, describe approaches in which the aircraft approached the helipad and hover/ground taxied to parking spot 1.

The figures found on pages B-40 to B-42, Flight Code D, describe approaches in which the aircraft approached the helipad and hover/ground taxied to the parking barge between sensors 9 and 10.

The figures found on pages B-43 to B-46, Flight Code E, describe approaches in which the aircraft approached the helipad and hover/ground taxied to the parking barge.

The figure on page B-47, Flight Code T, describes an approach in which the aircraft landed and sat at the helipad.

APPENDIX C

NEW YORK DEPARTURES FOR 3000 TO 7000 POUND AIRCRAFT
LINE NUMBERING INDICATES ORDER OF COLLECTION

The figures found on pages C-1 to C-43, Flight Code B, describe departures in which the aircraft hover/ground taxied from the drop off/pick up area to the helipad and then departed.

The figure found on page C-44, Flight Code G, describes a departure in which the aircraft hover/ground taxied from the parking barge near sensors 9 and 10 to the drop off/pick up area, and then departed from midtaxiway.

The figure found on page C-45, Flight Code H, describes a departure in which the aircraft hover/ground taxied from the parking barge near sensors 9 and 10 to the drop off/pick up area and then departed.

The figure found on page C46, Flight Code I, describes a departure in which the aircraft hover/ground taxied from parking spot 1 to the drop off/pick up area.

The figure found on page C-47 to C-49, Flight Code J, describe a departure in which the aircraft hover/ground taxied from parking spot 1 to the drop off/pick up area and then departed.

The figures found on pages C-50 to C-60, Flight Code L, describe a departure in which the aircraft hover/ground taxied from the parking barge to the drop off/pick up area and then departed.

The figures found on pages C-61 to C-68, Flight Code M, describe a departure in which the aircraft hover/ground taxied to midtaxiway and departed.

The figures found on pages C-69 to C-76, Flight Code N, describe a departure in which the aircraft departed from the drop off/pick up area.

The figure found on page C-77, Flight Code P, describes a departure in which the aircraft hover/ground taxied from the parking barge to the helipad and then departed.

The figure found on page C-78, Flight Code S, describes a departure in which the aircraft hover/ground taxied from the parking barge to the edge of the drop off/pick up area and then departed from midtaxiway.

APPENDIX D

NEW YORK DEPARTURES FOR AIRCRAFT GREATER THAN 7000 POUNDS
LINE NUMBERING INDICATES ORDER OF COLLECTION

The figures found on pages D-1 to D-32, Flight Code B, describe departures in which the aircraft hover/ground taxied from the drop off/pick up area to the helipad and then departed.

The figures found on pages D-33 to D-36, Flight Code H, describe a departure in which the aircraft hover/ground taxied from the parking barge near sensors 9 and 10 to the drop off/pick up area and then departed.

The figures found on pages D-37 to D-39, Flight Code J, describe a departure in which the aircraft hover/ground taxied from parking spot 1 to the drop off/pick up area and then departed.

The figures found on pages D-40 to D-43, Flight Code L, describe a departure in which the aircraft hover/ground taxied from the parking barge to the drop off/pick up area and then departed.

The figures found on pages D-44 and D-45, Flight Code M, describe a departure in which the aircraft hover/ground taxied to midtaxiway and departed.

The figure found on page D-46, Flight Code N, describes a departure in which the aircraft departed from the drop off/pick up area.

The figure found on page D-47, Flight Code O, describes a departure in which the aircraft ground taxied from the parking barge to the helipad and then departed.

The figure found on page D-48, Flight Code V, describes a departure in which there were two aircraft present, one aircraft hover/ground taxied from the parking barge near sensors 9 and 10 to the drop off/pick up area and then departed, while the other hover/ground taxied from the drop off/pick up area to the helipad and departed.

The figure found on page D-49, Flight Code X, describes a departure in which the aircraft hovered from the parking spot 1 to midtaxiway and then departed.

APPENDIX E

NEW YORK TAXIING MANEUVERS FOR 3000 TO 7000 POUND AIRCRAFT
LINE NUMBERING INDICATES ORDER OF COLLECTION

The figures found on pages E-1 to E-4, Flight Code F, describe taxiing maneuvers in which the aircraft hover/ground taxied from the drop off/pick up area to the parking barge.

The figures found on pages E-5 to E-7, Flight Code G, describe taxiing maneuvers in which the aircraft hover/ground taxied from the parking barge near sensors 9 and 10 to the drop off/pick up area.

The figures found on pages E-8 to E-14, Flight Code I, describe taxiing maneuvers in which the aircraft hover/ground taxied from parking spot 1 to the drop off/pick up area.

The figures found on pages E-15 to E-17, Flight Code K, describe taxiing maneuvers in which the aircraft hover/ground taxied from the parking barge to the drop off/pick up area.

The figure found on page E-18, Flight Code Q, describes a taxiing maneuver in which the aicraft hover taxied from the drop off/pick up area over water to the parking barge.

The figure found on page E-19, Flight Code R, describes a taxiing maneuver in which the aircraft hover taxied from parking spot 1 to the helipad and then hover taxied back to parking spot 1.

NEW YORK TAXIING MANEUVERS AIRCRAFT GREATER THAN 7000 POUNDS
LINE NUMBERING INDICATES ORDER OF COLLECTION

The figures found on pages F-1 to F-4, Flight Code F, describe taxiing maneuvers in which the aircraft hover/ground taxied from the drop off/pick up area to the parking barge.

The figure found on page F-5, Flight Code I, describes a taxiing maneuver in which the aircraft hover/ground taxied from parking spot 1 to the drop off/pick up area.

The figure found on page F-6, Flight Code K, describes a taxiing maneuver in which the aircraft hover/ground taxied from the parking barge to the drop off/pick up area.

The figure found on page F-7, Flight Code V, describes a taxiing maneuver in which the aircraft ground taxied from the the helipad to the drop off/pick up area.

The figure found on page F-8, Flight Code W, describes a taxiing maneuver in which one aircraft ground taxied from the parking barge to the drop off/pick up area, while another landed at the helipad and hover/ground taxied to the parking barge.

APPENDIX H

NEW YORK APPROACHES FOR AIRCRAFT GREATER THAN 7000 POUNDS
LINE NUMBERING INDICATES WIND SPEED

The figures found on pages H-1 to H-33, Flight Code A, describe approaches in which the aircraft landed at the helipad and hover or ground taxied to the drop off/pick up area.

The figures found on pages H-34 to H-39, Flight Code C, describe approaches in which the aircraft approached the helipad and hover/ground taxied to parking spot 1.

The figures found on pages H-40 to H-42, Flight Code D, describe approaches in which the aircraft approached the helipad and hover/ground taxied to the parking barge between sensors 9 and 10.

The figures found on pages H-43 to H-46, Flight Code E, describe approaches in which the aircraft approached the helipad and hover/ground taxiied to the parking barge.

The figure on page H-47, Flight Code T, describes an approach in which the aircraft landed and sat at the helipad.

APPENDIX I

NEW YORK DEPARTURES FOR 3000 TO 7000 POUND AIRCRAFT
LINE NUMBERING INDICATES WIND SPEED

The figures found on pages I-1 to I-43, Flight Code B, describe departures in which the aircraft hover/ground taxied from the drop off/pick up area to the helipad and then departed.

The figure found on page I-44, Flight Code G, describes a departure in which the aircraft hover/ground taxied from the parking barge near sensors 9 and 10 to the drop off/pick up area and departed from midtaxiway.

The figure found on page I-45, Flight Code H, describes a departure in which the aircraft hover/ground taxied from the parking barge near sensors 9 and 10 to the drop off/pick up area and then departed.

The figure found on page I-46, Flight Code I, describes a departure in which the aircraft hover/ground taxied to and from parking spot 1 to the drop off/pick up area.

The figures found on pages I-47 to I-49, Flight Code J, describe a departure in which the aircraft hover/ground taxied from parking spot 1 to the drop off/pick up area and then departed.

The figures found on pages I-50 to I-60, Flight Code L, describe a departure in which the aircraft hover/ground taxied from the parking barge to the drop off/pick up area and then departed.

The figures found on pages I-61 to I-68, Flight Code M, describe a departure in which the aircraft hover/ground taxied to midtaxiway and departed.

The figures found on pages I-69 to I-76, Flight Code N, describe a departure in which the aircraft departed from the drop off/pick up area.

The figure found on page I-77, Flight Code P, describes a departure in which the aircraft hover/ground taxied from the parking barge to the helipad and then departed.

The figure found on page I-78, Flight Code S, describes a departure in which the aircraft hover/ground taxied from the parking barge to the edge of the drop off/pick up area and then departed from midtaxiway.

APPENDIX J

NEW YORK DEPARTURES FOR AIRCRAFT GREATER THAN 7000 POUNDS
LINE NUMBERING INDICATES WIND SPEED

The figures found on pages J-1 to J-32, Flight Code B, describe departures in which the aircraft hover/ground taxied from the drop off/pick up area to the helipad and then departed.

The figures found on pages J-33 to J-36, Flight Code H, describes a departure in which the aircraft hover/ground taxied from the parking barge near sensors 9 and 10 to the drop off/pick up area and then departed.

The figures found on pages J-37 to J-39, Flight Code J, describe a departure in which the aircraft hover/ground taxied from parking spot 1 to the drop off/pick up area and then departed.

The figures found on pages J-40 to J-43, Flight Code L, describe a departure in which the aircraft hover/ground taxied from the parking barge to the drop off/pick up area and then departed.

The figures found on pages J-44 and J-45, Flight Code M, describe a departure in which the aircraft hover/ground taxied to midtaxiway and departed.

The figure found on page J-46, Flight Code N, describes a departure in which the aircraft departed from the drop off/pick up area.

The figure found on page J-47, Flight Code O, describes a departure in which the aircraft ground taxied from the parking barge to the helipad and then departed.

The figure found on page J-48, Flight Code V, describes a departure in which there were two aircraft present. One aircraft hover/ground taxied from the parking barge near sensors 9 and 10 to the drop off/pick up area and then departed, while the other hover/ground taxied from the drop off/pick up area to the helipad and departed.

The figure found on page J-49, Flight Code X, describes a departure in which the aircraft hovered from parking spot 1 to midtaxiway and then departed.

NEW YORK TAXIING MANEUVERS FOR 3000 TO 7000 POUND AIRCRAFT LINE NUMBERING INDICATES WIND SPEED

The figures found on pages K-1 to K-4, Flight Code F, describe taxiing maneuvers in which the aircraft hover/ground taxied from the drop off/pick up area to the parking barge.

The figures found on pages K-5 to K-7, Flight Code G, describe taxiing maneuvers in which the aircraft hover/ground taxied from the parking barge near sensors 9 and 10 to the drop off/pick up area.

The figures found on pages K-8 to K-14, Flight Code I, describe taxiing maneuvers in which the aircraft hover/ground taxied from parking spot 1 to the drop off/pick up area.

The figures found on pages K-15 to K-17, Flight Code K, describe taxiing maneuvers in which the aircraft hover/ground taxied from the parking barge to the drop off/pick up area.

The figure found on page K-18, Flight Code Q, describes a taxiing maneuver in which the aircraft hover taxied from the drop off/pick up area over water to the parking barge.

The figure found on page K-19, Flight Code R, describes a taxiing maneuver in which the aircraft hover taxied from parking spot 1 to the helipad and then hover taxied back to parking spot 1.
