LASER HAZARDS BIBLIOGRAPHY - OCTOBER 1989

1. The following bibliography was prepared in the interest of providing a source of references for those interested in the biological effects and the evaluation of hazards associated with laser equipment. It was compiled from the open literature reviewed on a continuing basis by personnel of the Laser-Microwave Division of this Agency.

2. This is the fourteenth edition of "Laser Hazards Bibliography." The last revision was dated October 1986. The new references are divided into groups as shown in the Table of Contents.
