NOTICE

When Government drawings, specifications, or other data are used for any purpose other than in connection with a definitely Government-related procurement, the United States Government incurs no responsibility or any obligation whatsoever. The fact that the Government may have formulated or in any way supplied the said drawings, specifications, or other data, is not to be regarded by implication, or otherwise in any manner construed, as licensing the holder, or any other person or corporation; or as conveying any rights or permission to manufacture, use, or sell as patented invention that may in any way be related thereto.

This report is releasable to the National Technical Information Service (NTIS). At NTIS, it will be available to the general public, including foreign nations.

This technical report has been reviewed and is approved for publication.

JEFFREY L. MOLER, 1Lt, USAF
Project Engineer

FOREWORD

This work was prepared by Air Products and Chemicals, Inc. and describes the work performed under Contract No. F33615-87-C-2740 during the period August 1987 through October 1988. The work was administered under the direction of the Aeronautical Systems Division, Aero Propulsion and Power Laboratory, Wright Research and Development Center (WRDC), Wright-Patterson Air Force Base (WPAFB), Ohio. Jeffrey Moler, 1Lt (WRDC/POSF) was the Air Force Project Engineer.

Mr. David Nahmias served as Air Products' Program Manager.

Two interim oral progress reports were presented to the Air Force on the Task 1 and Task 2 efforts on January 21, 1988 and July 21, 1988, respectively. In this written final report of the contract, the results from Task 3 as well as those from Tasks 1 and 2 are reported.

ACKNOWLEDGMENT

Appreciation is extended to:

- Mr. James M. Nonnemaker for performing essentially all of the catalyst testing and much of the catalyst preparation.
- Mr. J. Douglas Moyer, Mr. Gerard Kuebler, and Dr. Eugene Karwacki for obtaining the catalyst characterization data.
- 1Lt Jeffrey Moler for assistance and advice when needed.
- Mr. Donald C. Amoss for writing the computer program which enabled quick and easy calculation of test results.
- Mr. Glenn Kinard and Dr. John L. Lewnard for helpful technical discussions and assistance with some of the calculations.
- Dr. Robert N. Miller for encouragement during the research program and assistance in publishing this report.
- Mr. Daniel W. Tyndall for timely reporting of contract spending and also for helping to publish this report.
- Ms. Marianne T. Phillips and Ms. Ann C. Gardner for helping to publish this report.
- Ms. Scarlet D. Erdosy and Ms. Susan J. Spadt for providing typing/word processing services.

The mechanism and temperature coefficient of the para-hydrogen conversion, Rideal, E. K. and Trapnell, B. M. W., Discussions Faraday Soc. (1950) No. 8, 114-18 C.A. 45, 9986 g.

The catalysis of the ortho-para conversion in liquid hydrogen, Swenson, J. Chem. Phys. 18, 520-2 (1950) C.A. 44, 9223e.

1951

Para-hydrogen conversion on tungsten, Halsey, G. D. Jr., Trans. Faraday Soc. 47, 649-56 (1951) C.A. 45, 9993e.

R. H. Savage, Ann. N.Y. Acad. Sci., 53, 862 (1951).

Viscosity difference between ortho and para hydrogen at low temperatures. E. W. Becker and O. Stehl. Z. Physik 133, 615-28 C.A. 47, 9699 i. (1952) cf. C.A. 46, 9366 d.

Electronic basis of catalyst activity. III. The reversible dissociation of hydrogen molecules and the para-hydrogen conversion, A. Couper and D. D. Eley, Proc. Roy. Soc. (London) A211, 536-43 (1952), C.A. 46, 10819 i. cf. C.A. 45, 9988 a.

A highly effective catalyst for the ortho-to-para hydrogen conversion. E. R. Grilly, U.S. Atomic Energy Comm. Natl. Sci. Foundation, Washington, D. C., AECU-2245, 4 pp. (1952); C.A. 48, 31e. cf. LADC-1136.

Ortho-para conversion of deuterium in molecular electric fields, Y. L. Sandler (Hebrew Univ., Jerusalem, Israel), J. Chem. Phys. 20, 1050 (1952); C.A. 46, 10709 i. cf. C.A. 33, 2795³.

Wilmarth, W. F. and Baes, C. F., Jr., J. Chem. Phys. 20, 116 (1952).

Liquefaction and storage of partially converted liquid hydrogen, E. R. Grilly, Rev. Sci. Instr. 24, 1-4 (1953), C.A. 47, 10906 g.

The catalysis of the para-hydrogen conversion by the solid free radical 2, 2-diphenyl-1-picrylhydrazyl, L. G. Harrison and C. A. McDowell, Proc. Roy. Soc. (London) A220, 77-90 (1953), C.A. 48, 4299a.

The effect of external magnetic field on the activity of ferromagnetic catalysts, E. Justi and G. Vieth, Z. Naturforsch. 8a, 538-46 (1953) C.A. 48, 4298 h.

Kinetics of surface reactions in the case of interactions between adsorbed molecules, Keith J. Laidler, J. Phys. Chem. 57, 318-19 (1953) C.A. 47, 6234 f.

Mechanisms of surface-catalyzed reactions. I. The para-hydrogen conversion on tungsten. Keith J. Laidler, J. Phys. Chem. 57, 320-7 (1953) C.A. 47, 6234 h.

Kinetic analysis of flow catalysis of ortho- to para-hydrogen. J. D. Rogers, Ind. Eng. Chem. 45, 1574-6 (1953), C.A. 47, 10325 f.

Kinetic analysis of flow catalysis of ortho- to para-hydrogen. A correction, J. D. Rogers, Ind. Eng. Chem. 45, 2576 (1953) C.A. 48, 4948 f. cf. C.A. 47, 10325 f.

The kinetics of the heterogeneous para-hydrogen conversion, Y. L. Sandler, J. Phys. Chem. 21, 2243-4 (1953) C.A. 48, 4296 a.

Veith, G., Z. Naturforschung., 8A, 538 (1953).

Conversion of ortho-para hydrogen by cuprous acetate in quinoline. W. K. Wilmarth and Max K. Barsh (Univ. of S. California, Los Angeles). J. Am. Chem. Soc. 75, 2237-42 (1953). C.A. 47, 9124 h.

The catalytic conversion of parahydrogen by paramagnetic complex ions in aqueous solution, W. K. Wilmarth and C. F. Baes, Jr., J. Chem. Phys. 20, 116-21 (1952) C.A. 46, 6475 c. cf. Cayleys, et. al., C.A. 42, 4429 g.

Barrick, P. L., Weitzel, D. W., Connolly, T. W., Proc. Cryog. Eng. Conf., 1, 285 (1954).

Fractionating converter for producing parahydrogen. W. F. Giaque, Rev. Sci. Instr. 25, 886-7 (1954) C.A. 49, 8633 e.

W. B. Innes, in Catalysis, Vol. 1, P. H. Emmett (ed.), Reinhold, New York (1954), p. 272.

Thermal conductivities of condensed gases. I. The thermal conductivity of liquid nitrogen between 65 and 90°K. Robert W. Powers, Robert W. Mattox, and Herrick L. Johnston. J. Am. Chem. Soc. 76, 5968-73 (1954) C.A. 49, 3597 e.

The ortho-para conversion of hydrogen and deuterium on inhomogeneous paramagnetic surfaces. Y. L. Sandler, Can. J. Chem. 32, 249-60 (1954), C.A. 48, 11858 b. cf. C.A. 48, 4296a.

Parahydrogen conversion by metal compounds of cyclopentadiene and indene. G. M. Schwab, E. O. Fischer, and J. Voitlander. Naturwissenschaften 41, 228 (1954), C.A. 49, 3590 a.

Condensed-gas calorimetry. VI. The heat capacity of liquid parahydrogen from the boiling point to the critical point. A. Lee Smith, Nathan C. Hallett, and Herrick L. Johnston, J. Am. Chem. Soc. 76, 1486-8 (1954) C.A. 48, 6804 d. cf. C.A. 48, 1792 b.

Conversion of ortho- to para-hydrogen in the liquid phase. G. L. Squires and A. T. Stewart, J. Chem. Phys. 22, 754 (1954) C.A. 48, 9135 g. cf. C.A. 47, 9894 d.

Barrick, P. L., Weitzel, D. W., Connolly, T. W., Proc. Cryog. Eng. Conf., 1, 285 (1954).

A thermal separation of ortho- and para-hydrogen at low temperatures. E. W. Becker, H. Henkes, and U. Seifert. Z. physik. Chem. (Frankfurt) [N. F.] 5, 90-9 (1955), C.A. 49, 14403 f.

The transport properties and the equation of state of gaseous para and ortho-hydrogen and their mixtures below 40°K. E. G. D. Cohen, M. J. Offerhaus, J. M. J. van Leeuwen, B. W. Roos, and J. de Boer. Physica 21, 737-9 (1955) (in English), C.A. 50, 9808 a.

Corrigan, T. E., Chem. Eng., 65, 200 (1955).

Hydrogen-activating enzymes of bacteria. A. Couper, D. D. Eley, and A. Hayward. Discussions Faraday Soc. No. 20, 174-84 (1955) (Pub. 1956) C.A. 50, 14866 h.

The catalysis of the para-hydrogen conversion by zinc oxide. L. G. Harrison and C. A. McDowell. Proc. Roy. Soc. (London) A228, 66-82 (1955) C.A. 49, 7947 b.

Parahydrogen conversion in solution. I. parahydrogen conversion by metallorganic compounds. G. M. Schwab and J. Voitlander. Z. physik. Chem. [N.F.] (Frankfurt) 3, 341-54 (1955), C.A. 49, 7435 e.

Nuclear spin-lattice relaxation in solid hydrogen. Tadashi Sugawara, Phys. Rev. 100, 759 (1955). C. A. 50, 3078 d. cf. C.A. 49, 12955 h.

Application of theoretical diffusion models in the presence of a catalytic reaction. Sterret, J. S.; Brown, L. F. Univ. of Colorado, Boulder. A.I.Ch.E. (Amer. Inst. Chem. Eng.)J.; (68) p 696-702; Vol. 14; No. 5; in Eng.

Semiconductivity and catalytic activity. VI. Relations between conductivity and activity in the catalysis of the conversion of para- into orthohydrogen by chromium oxide. Valverde Diez, N.; Gamero Briones, Antonio; Garcia de la Banda, Juan F.; Inst. Quim. Fis. "Rocasolano" Madrid. An. Quim.; (68) p 245-53; Vol. 64; No. 3; in Span.

Semiconductivity and catalytic activity. V. Catalysis of the conversion of para- into orthohydrogen by chromium oxide at low temperatures. Valverde Diez, N.; Gamero Briones, Antonio; Garcia de la Banda, Juan F. Inst. Quim. Fis. "Rocasolano" Madrid. An. Quim.; (68) p 233-44; Vol. 64; No. 3; in Span.

A rate model for the low temperature catalytic ortho-parahydrogen reaction (low temperature ortho parahydrogen reaction rate). Singleton, A. H. Date: 1968, Coll: 146 P, Avail: Univ. Microfilms. Order No. 69-7360.

Mechanism of low-temperature conversion of ortho-hydrogen to para-hydrogen on a catalyst surface. Golovin, A. V.; Buyanov, R. A. Inst. Katal.; Novosibirsk. Kinet. Katal.; (68) p 464; Vol. 9; No. 2; in Russ.

Rate model for ortho-parahydrogen reaction on a highly active catalyst.
Singleton, A. H.; Lapin, A.; Wenzel, L.A. Air Products and Chemicals, Inc., Allentown, Advan. Cryog. Eng.; (68) p 409-27; Vol. 13; in Eng.

Preparation of a catalyst for the low-temperature conversion of ortho-hydrogen into para-hydrogen. Buyanov, R. A.; Krivoruchko, O.P.; Institute of Catalysis, Academy of Sciences, USSR, USSR. Pat. No. 253773, Date: 15/07/68.

Comparison of surface states of quartz, cristobalite, and silicic acid.
Harris, J. R.; Rossington, D. R.; Coll. of Ceram., State Univ. of New York, Alfred. J. Amer. Ceram. Soc.; (68) p 511-18; Vol. 51; No. 9; in Eng.

Catalytic behavior of organic semiconductors. Relation between reactivity and valency of aromatic anion in aromatic-alkali metal complexes. Wakayama, Nobuyuki; Mori, Yoshihito; Inokuchi, Hiroo. Univ. Tokyo, Tokyo. J. Catal.; (68) p 15-18; Vol. 12; in Eng.

Activity of glass and the method for its deactivation in para-ortho-conversion reactions and the isotopic exchange of hydrogen. Peretyaka, A. R.; Danchevskaya, M. N.; USSR; Vestn. Mosk. Univ., Khim.; (68) p 94-6; Vol. 23; No. 3; in Russ.

Singleton, A. H., Lapin, A. and Wenzel, L. A. Rate model for ortho-/para-hydrogen reaction on a highly active catalyst. Advan Cryog Eng, 13 409 (1968).

Singleton, A. H., A. Lapin, and L. A. Wenzel, "Rate Model for Ortho-Parahydrogen Reaction of a Highly Active Catalyst," Adv. in Cryo. Eng., Vol. 13 (F-7), Plenum Press, 409-427, 1968.

Journal of the American Chemical Society, 90:11, May 22, 1968.

Iron oxide and hydroxide as catalysts for low-temperature conversion of ortho-hydrogen to para-hydrogen. Buyanov, R. A.; Krivoruchko, O. P.; Kefeli, L. M.; Ostan'kovich, A. Inst. Katal., Novosibirsk. Kinet. Katal.; (68) p 379-85; Vol. 9; No. 2; in Russ.

Catalysis on single crystals. V. Parahydrogen conversion on nickel and copper single crystals. Voelter, J.; Jungnickel, H.; Rienecker, G. Deut. Akad. Wiss. Berlin, Berlin. Z. Anorg. Allg. Chem.; (68) p 300-6; Vol. 360; No. 5-6; in Ger.

Iron oxide and hydroxide as catalysts for low-temperature conversion of ortho-hydrogen to para-hydrogen. Buyanov, R. A.; Krivoruchko, O. P.; Kefeli, L. M.; Ostan'kovich, A. A. Kinet. Katal. 9(2), 379-85, (1968).

Activity and magnetic properties of transition metal hydroxides catalyzing the low-temperature conversion of ortho hydrogen to parahydrogen.
Buyanov, R. A.; Krivoruchko, O. P.; Golovin, A. V. Kinet. Katal., 9(4), 804-9 (1968).

1968 Cont'd:

Catalysis by palladium-gold and related alloys.

Eley, Daniel D.

J. Res. Inst. Catal., Hokkaido Univ., 16(1), 101-14, (1968).

Hydrogen conversion and restorage work cycle.

Goldstein, Allen E.; Rouse, Robert W.; Schroeter, Thomas T.

Marquardt Corp., U.S. US 3389555, 25 June 1968, 6 pp.

Mechanism of low-temperature conversion of ortho-hydrogen to para-hydrogen on a catalyst surface.

Golovin, A. V.; Buyanov, R. A.

Kinet. Katal., 9(2), 464, (1968).

Catalytic Activity of a Nickel-thoria Material.

Goue, Bernard; Charbonnier, Jean C.

C. R. Acad. Sci., Paris, Ser. C, 267(18), 1097-8 (1968).

Catalytic activity of a nickel-beryllium alloy.

Goue, Bernard; Guitard, Louis; Edon, Claude

C. R. Acad. Sci., Paris, Ser. C 266(19), 1413-15 (1968).

Study of verdazyl radicals in benzene solution by the para-hydrogen method.

Hartmann, Hermann; Brauer, Hans D.; Schaefer, Hugo

Z. Phys. Chem. (Frankfurt am Main) 62(1-4), 103-11 (1968).

Comparison of surface states of quartz, cristobalite, and silicic acid.

Harris, J. R.; Rossington, D. R.

J. Amer. Ceram. Soc., 51(9), 511-18, (1968).

Extrinsic field acceleration of the magnetic para hydrogen conversion.

Misono, Makoto; Selwood, P. W.

J. Amer. Chem. Soc., 90(11), 2977-8 (1968).

Conversion and exchange reactions of hydrogen over zinc oxide.

Otsuka, Kiyoshi; Keii, Tōinaga

Nippon Kagaku Zasshi, 89(11), 1032-6 (1968).

Kinetic studies of the catalytic ortho-para hydrogen conversion and hydrogen-deuterium equilibration on gamma-alumina.

Ohno, Seigo; Yasumori, Iwao

Bull. Chem. Soc. Jap., 41(10), 2227-33 (1968).

Activity of glass and the method for its deactivation in para-ortho-conversion reactions and the isotopic exchange of hydrogen.

Peretyaka, A. R.; Danchevskaya, M. N.

Vestn. Mosk. Univ., Khim., 23(3), 94-6 (1968).

Para-ortho transitions in solid hydrogen.

Schott, W.; Rietschel, H.; Glaeser, W.

Phys. Lett., A, 27(8), 566-7.

1968 Cont'd:

Hydrogen adsorption and parahydrogen conversion over chromia supported on .alpha.-alumina.

Selwood, Pierce W.

J. Catal., 12(3), 263-71 (1968).

Application of theoretical diffusion models in the presence of a catalytic reaction.

Sterrett, J. S.; Brown, L. F.

A.I.Ch.E. (Amer. Inst. Chem. Eng.)J., 14(5), 696-702 (1968).

Production of para-hydrogen.

Vander Arend, Peter C.

Air Products and Chemicals, Inc.

U.S. US 3375076, 26 Mar 1968, 4 pp.

Semiconductivity and catalytic activity. V. Catalysis of .n. conversion of para- into orthohydrogen by chromium oxide at low temperatures.

Valverde Diez, N.; Gamero Briones, Antonio; Garcia de la Banda, Juan F.

An. Quim., 64(3), 233-44 (1968).

Semiconductivity and catalytic activity. VI. Relations between conductivity and activity in the catalysis of the conversion of para- into orthohydrogen by chromium oxide.

Valverde Diez, N.; Gamero Briones, Antonio; Garcia de la Banda, Juan F.

An. Quim., 64(3), 245-53, (1968).

Catalysis on single crystals. V. Parahydrogen conversion on nickel and copper single crystals.

Voelter, J.; Jungnickel, H.; Rienaecker, G.

Z. Anorg. Allg. Chem., 360(5-6), 300-6 (1968).

Catalytic behavior of organic semiconductors. Relation between reactivity and valency of aromatic anion in aromatic-alkali metal complexes.

Wakayama, Nobuyuki; Mori, Yoshihiro; Inokuchi, Hiroo.

J. Catal., 12, 15-18 (1968).

Rate model for the low temperature catalytic orthoparahydrogen reaction.

Singleton, Alan H.

Lehigh Univ., Bethlehem.

From: Diss. Abstr. B. 1969, 29(11), 4154.

Dissertation; (68) p 146 pp; in Eng.

Low-temperature conversion of ortho-hydrogen into para-hydrogen.

Buyanov, R. A.; Krivoruchko, O. P.
Institute of Catalysis, Academy of Sciences, USSR.
USSR.
Pat. No. 259835 Date: 19/02/68

Paramagnetic conversion of parahydrogen on neodymium and dysprosium oxides.

Errett, Ellis B.
Univ. California, Santa Barbara.
From: Diss. Abstr. Int. B 1971, 31(8), 4610.
Dissertation; (69) p 103 pp; in Eng.

Heterogeneous ortho-para hydrogen conversion.

Kawazura, Hiroshi; Ohmori, Toshio; Yamamoto, Yoshiro; Kobayashi, Tsutomu;
Koriya, Yoshinobu.
Japan Synthetic Rubber Co., Ltd.
Pat. No. 74 81293 Date: 12/12/72.

Alkali metal insertion compound.

Kawazura, Hiroshi; Umori, Toshio; Yamamoto, Yoshiro; Kobayashi, Tsutomu;
Kariya, Yoshinobu.
Japan Synthetic Rubber Co., Ltd.
Japan, Kokai.
Pat. No. 74 82799 Date: 12/12/72

1972 Cont'd:

Reactions in the rare earth metal-hydrogen system at increased temperatures and atmospheric pressure.

Konenko, I. R.; Gaifutdinova, R. K.; Gorshkova, L. S.; Tolstopyatova, A. A.; Berg, L. G.

Conference; Fiz. Khim. Gidridov; (72) p 112-22; in Russ.

Reactions in the rare earth metal-hydrogen system at increased temperatures and atmospheric pressure.

Konenko, I. R.; Gaifutdinova, R. K.; Gorshkova, L. S.; Tolstopyatova, A. A.; Berg, L. G.

Fiz. Khim. Gidridov, 112-22. Akad. Nauk Ukr. SSR, Inst. Probl. Materialoved: Kiev, USSR (1972).

Catalytical activity of rare earth metals and their hydrates in the para-ortho-hydrogen conversion reaction.

Konenko, I. R.; Gaifutdinova, R. K.; Gorshkova, L. S.; Tolstopyatova, A. A.; Moreva, N. I.

Zh. Fiz. Khim., 46(8), 2167 (1972).

Moeller, T., "Comprehensive Inorganic Chemistry" (Bailar, Emeleus, Nyholm, and Trotman-Dickenson, Eds.), Vol. 4, p. 3. Pergamon, Oxford, 1972.

Novel radical salts polymer catalyst carrying enhanced para-ortho-hydrogen conversion.

Murano, Kentaro; Kawazura, Hiroshi; Inokuchi, Hiroo; Ohmori, Toshio.

Bull. Chem. Soc. Jap., (72) p 3230; Vol. 45; No. 10; in Eng.

Para-hydrogen conversion on ion-exchanged polystyrene sulfonate.

Tezuka, Yoshisato; Kanesaka, Isao; Toyooka, Keiko; Takeuchi, Toyosaburo.

Z. Phys. Chem. (Frankfurt am Main), 80(3-4), 210-219 (1972).

Catalytic activity and selectivity of low-temperature adsorption in the series of ortho-para modifications of hydrogen on synthetic zeolites.

Zhun, G. G.; Blagoi, Yu. P.

Tr. Fiz.-Tekh. Inst. Nizk. Temp., Akad. Nauk Ukr. SSR, No. 15, 109-13.

From: Ref. Zh., Khim. 1972, Abstr. No. 188975.

Parahydrogen conversion over chromia gel near the Neel point.

Arias, J. A.; Selwood, P. W.
J. Catal., 30(2), 255-9 (1973).

Parahydrogen conversion and magnetocatalytic effects over yttria and lutetia.

Baron, Kenneth; Selwood, P. W.
J. Catal., 28(3), 422-7 (1973).

Use of diffusion models in porous catalysts.

Balfanz, F.; Gelbin, D.
Inzh.-Fiz. Zh., 25(4), 708-19 (1973).

Parahydrogen conversion of X1 zeolites.

Brown, D. E.; Eley, D. D.; Rudham, R.
J. Catal., 29(2), 246-52 (1973).

Comparison of some models of porous media for catalytic para-hydrogen-ortho-hydrogen conversion.

Dvorak, L.; Schneider, P.
Conference; Pore Struct. Prop. Mater., Proc. Int. Symp. RILEM/IUPAC; (73) p A107-A122; Vol. Part 1; in Eng.

Catalytic function of hydrogen bound to the surfaces of oxides.

Hall, W. Keith.
Acc. Chem. Res.; (75) p 257-63; Vol. 8; No. 8; in Eng.

Catalytic activity of organic semiconductors. Hydrogen conversion on triphenylene-alkali metal ion radical salts.

Kimura, Keisaku; Inokuchi, Hiroo.
J. Catal.; (73) p 49-59; Vol. 29; No. 1; in Eng.

Characterization of adsorbed intermediates on zinc oxide by infrared.

Kokes, R. J.
Accounts. Chem. Res., 6(7), 226-33 (1973).

Rare earth metals as catalysts in the para-ortho conversion of hydrogen.

Konenko, I. R.; Gaifutdinova, R. K.; Gorshkova, L. S.; Tolstopyatova, A. A.; Berg, L. G.; Moreva, N. I.
Kinet. Katal.; (73) p 203-9; Vol. 14; No. 1; in Russ.

Use of rare earth metals and their hydrides as catalysts of the para-ortho conversion of hydrogen.

Konenko, I. R.; Gaifutdinova, R. K.; Gorshkova, L. S.; Tolstopyatova, A. A.; Moreva, N. I.
Redkozemel. Metal., Splavy Soedin., Mater. Soveshch., 7th, Meeting Date 1972, 319-20. Edited by: Savitskii, E. M. "Nauka": Moscow, USSR (1973).

Regularities in a change in the catalytic activity of rare earth metal hydrides in the high-temperature para-ortho conversion of hydrogen.

Konenko, I.R.; Gaifutdinova, R.K.; Gorshkova, L.S.; Tolstopyatova, A.A.; Berg, L.G.; Moreva, N.I.
Kinet. Katal. 14(2), 426-31 (1973).

1973 Cont'd:

Rare earth metals as catalysts in the para-ortho conversion of hydrogen.

Konenko, I. R.; Gaifutdinova, R. K.; Gorshkova, L. S.; Tolstopyatova, A. A.; Berg, L. G.; Moreva, N. I.
Kinet. Katal., 14(1), 203-9 (1973).

Use of rare earth metals and their hydrides as catalysts of the para-ortho conversion of hydrogen.

Konenko, I. R.; Gaifutdinova, R. K.; Gorshkova, L. S.; Tolstopyatova, A. A.; Moreva, N. I.
Document type: conference; Redkozemel. Metal., Spalvy Soedin., Mater. Soveshch., 7th; (73) p 319-320; in Russ.

Spin waves in magnetocatalytic phenomena.

Levy, J. C.; Gallais, E.
Tr. Mezhdunar. Konf. Magn., Meeting Date 1973, Volume 3, 132-4, "Nauka": Moscow, USSR (1973).

Catalyst for ortho- and para-hydrogen conversion.

Nishimura, Yusaku; Nakajima, Fumito
Hitachi, Ltd.
Japan. Kokai JP 48/59090 [73/59090], 18 Aug 1973, 3 pp.

Para to ortho-hydrogen conversion on magnetic surfaces.

Petzinger, K. G.; Scalapino, D. J.
Phys. Rev. B; (73) p 266-79; Vol. 8; No. 1; in Eng.

Selwood, P. W., J. Catal., 28, 422 (1973).

Ortho-para conversion and isotopic exchange of hydrogen on uranium and various uranium compounds.

Tanabe, Tetsuo; Adachi, Hirohiko; Imoto, Shosuke.
Technol. Rep. Osaka Univ., 23(1121-1154), 721-6 (1973).

Kinetic studies on hydrogenase. Parahydrogen-orthohydrogen conversion and hydrogen-deuterium exchange reactions.

Yagi, Tatsuhiko; Tsuda, Motoyuki; Inokuchi, Hiroo.
J. Biochem. (Tokyo), 73(5), 1069-81 (1973).

Homomolecular hydrogen exchange on rare earth metal films.

Zhavoronkova, K. N.; Korabel'nikova, L. M.
Kinet. Katal., 14(4), 966-9 (1973).

Catalytic activity of a NaX-type zeolite in an ortho-para conversion reaction.

Zhun, G. G.; Blagoi, Yu. P.
Zh. Fiz. Khim., 47(1), 154-7 (1973).

Catalyzed [ortho-parahydrogen] conversion and magnetocatalytic effects on europium monoxide and chromium dioxide.

Arias, J. A.; Selwood, P. W.
J. Catal., 35(2), 273-7 (1974).

Activation of yttria, lutetia, and ytterbia for the ortho-parahydrogen conversion.

Arias, J. A.; Selwood, P. W.
J. Catal.; (74) p 284-8; Vol. 33; No. 2; in Eng.

Ortho-para hydrogen conversion in paramagnetic solutions.

Atkins, P. W.; Clugston, M. J.
Mol. Phys., 27(6), 1619-31 (1974).

Parahydrogen conversion by organic monoradicals.

Brauer, H. D.; Schmidt, R.; Sartorius, R.
Z. Phys. Chem. (Frankfurt am Main), 89(5-6), 225-9 (1974).

Catalytic activity and annealing behavior of two austenitic alloys of different stacking fault energy.

Carrion, J.; Criado, J. M.; Gonzalez, F.; Herrera, E. J.; Trillo, J. M.
Electron. Fis. Apl., 17(1-2), 221-5 (1974).

Conversion of parahydrogen to orthohydrogen in a gamma-ray and neutron radiation field.

Conant, J. W.; Edeskuty, F. J.; Huston, J. E.; Thome, F. V.
Report, LA-5436-MS, 8 pp. Avail. Dept. NTIS
From: Nucl. Sci. Abstr. 1974, 29(6), 12561.

Conversion of o-hydrogen to p-hydrogen by neutron scattering in solid o-hydrogen.

Diehl, H. W.; Biem, W.
Report, AED-CONF-74-089-008, 6 pp. Avail. INIS
From: Nucl. Sci. Abstr. 1974, 30(10), 27538.

Para-hydrogen molecules in solid ortho-hydrogen.

Diehl, H. W.
Z. Phys., 271(3), 235-43 (1974).

Parahydrogen conversion on neodymium and dysprosium oxides.

Eley, D. D.; Forrest, H.; Rudham, R.
J. Catal., 34(1), 35-40 (1974).

Ortho hydrogen-para hydrogen interconversion catalysts.

Inoguchi, Hiroo; Murano, Kentaro; Kawazura, Hiroshi; Kobayashi, Tsutomu.
Japan Synthetic Rubber Co., Ltd., Japan, Kokai.
Pat. No. 75 115690 Date: 26/02/74.

Kay N., Fluid mechanics and heat transfer. Cambridge University Press, 3rd Ed. (1974).

1974 Cont'd:

Conversion process for orthohydrogen and parahydrogen.

Kawazura, Hiroshi; Ohmori, Toshio; Yamamoto, Yoshiro; Kobayashi, Tsutomu; Koriya, Yoshinobu;
Japan Synthetic Rubber Co., Ltd., Japan, Kokai.
JP 49/81293 [74/81293], 6 Aug 1974, 5 pp.

Natural ortho-para conversion in hydrogen and deuterium in liquid and solid states.

Milenko, Yu. Ya.; Sibileva, R. M.
Ukr. Fiz. Zh. (Russ. Ed.), 19(12), 2008-14 (1974).

Nickel oxide silica catalyst for conversion of orthohydrogen to parahydrogen at low temperature.

Nishimura, Yusaku; Nakajima, Fumito.
Hitachi, Ltd.
Japan, Kokai JP 49/41290 [74/41290], 18 Apr 1974, 5 pp.

Comparison of the catalytic activities of metal oxides for hydrogen-deuterium equilibration and ortho-parahydrogen conversion.

Otsuka, Kiyoshi; Keii, Tominaga.
Bull Chem. Soc. Jap.; (74) p 234-5; Vol. 47; No. 1; in Eng.

Ortho-para conversion of hydrogen on zeolite and metal-zeolite catalysts.

Paranosenkov, V.P.; Gryaznova, Z.V.; Tsitsishvili, G.V.; Krupennikova, A. Yu.; Ponomareva, N.N.
Dokl. Akad. Nauk SSSR; (74) 0 1125-6 (Phys. Chem.); Vol. 217; No. 5; in Russ.

Theory of catalytic conversion of parahydrogen by organic radicals.

Reinsch, Ernst A.
Mol. Phys., 28(3), 683-94 (1974).

Para to ortho hydrogen conversion on gadolinium, yttrium, gadolinium trioxide and yttrium trioxide.

Rossington, D. R.; Capozzi, V. F.
J. Am. Ceram. Soc., 57(11), 474-7 (1974).

Para- to ortho-hydrogen conversion on nonmetallic magnetic surfaces.

Scalapino, D. J.; Petzinger, K. G.
AIP (Amer. Inst. Phys.) Conf. Proc.; (74) p 8-18; Vol. 18, Pt. 1; in Eng.

Diffusion and ortho-para conversion in solid hydrogen.

Schmidt, F.
Phys. Rev. B, 10(10), 4480-4 (1974).

Ferric hydroxide as a catalyst for ortho-para conversion of hydrogen.

Seifert, Peter; Deutschmann, Ludmila; Sur, Lothar.
Exp. Tech. Phys.; (74) p 355-60; Vol. 22; No. 4; in Ger.

Ross, P. N., Jr., and Delgass, W. N.; J. Catal. 33, 219 (1974).

Journal of Catalysis 33, 284-288 (1974).

1974 Cont'd:

Relations between adsorption and catalysis in the carbon monoxide oxidation and the para-hydrogen conversion on platinum.

Voelter, Joachim.

Z. Chem.; (74) p 180-6; Vol. 14; No. 5; in Ger.

Catalytic efficiency of pure and carbon monoxide-poisoned platinum in the parahydrogen conversion.

Voelter, J.; Herman, M.

Z. Anorg. Allg. Chem., 405(3), 315-28 (1974).

Theory of ortho-para conversion in solid hydrogen at high densities.

Berlinsky, A. John.

Phys. Rev. B, 12(4), 1482-6 (1975).

Conversion of para to orthohydrogen in a gamma-ray and neutron radiation field.

Conant, J. W.; Edeskuty, F. J.; Huston, J. E.; Thome, F. W.

Cryogenics, 15(1), 12-16 (1975).

Hydrogen activation on zinc oxide.

Conner, W. C., Jr.; Kokes, R. J.

J. Catal., 36(2), 199-210 (1975).

Phonon- and libron-excitation with ortho-para conversions by neutron scattering on solid hydrogen.

Diehl, H. W.; Biem, W.

Z. Phys. B, 20(2), 137-46 (1975).

Parahydrogen in solid orthohydrogen. General theory and applications to the ortho-para conversion by neutron scattering.

Diehl, H. W.; Biem, W.

Fiz. Nizk. Temp. (Kiev). 1(6), 789-95 (1975).

Surface reactivity of nickel and nickel hydride films as catalysts in parahydrogen conversion.

Frackiewicz, A.; Poleski, M.; Palczewska, W.

J. Catal., 40(2), 184-9 (1975).

Catalytic function of hydrogen bound to the surfaces of oxides.

Hall, W. Keith

Acc. Chem. Res., 8(8), 257-63 (1975).

Effect of an external magnetic field on the rate of the catalytic ortho-para conversion of hydrogen.

Gołovin, A. V.; Buyanov, R. A.

Kinet. Katal., 16(1), 121-5 (1975).

Ortho hydrogen-para hydrogen interconversion catalysts.

Inoguchi, Hiroo; Murano, Kentaro; Kawazura, Hiroshi; Kobayashi, Tsutomu.

Japan Synthetic Rubber Co., Ltd., Japan, Kokai.

JP 50/115690 [75/115690], 10 Sept 1975, 6 pp.

Ortho-/parahydrogen conversion and hydrogen-deuterium equilibration over carbon surfaces.

Ishikawa, Yuichi; Austin, L. G.; Brown, D. E.; Walker, Philip L., Jr.

Chem. Phys. Carbon, 12, 39-108 (1975).

Conversion catalyst for ortho- and para-hydrogen.

Kawabata, Akira; Goto, Masatoshi; Ito, Takeshi.

Sakai Chemical Industry Co. Ltd.

Japan, Kokai.

Pat No. 76 83891 Date: 20/01/75.

1975 Cont'd:

Catalyst for ortho-para hydrogen conversion.

Kawabata, Akira; Goto, Masatoshi; Ito, Takeshi.
Sakai Chemical Industry Co. Ltd.; Osaka Oxygen Industries Ltd.
Japan, Kokai.
Pat. No. 77 17383 Date: 31/07/75.

Catalysts for ortho-para hydrogen conversion.

Kawabata, Akira; Goto, Masatoshi; Ito, Takeshi.
Sakai Chemical Industry Co. Ltd.; Osaka Oxygen Industries Ltd.
Japan, Kokai.
Pat. No. 77 17382 Date: 31/07/75.

Natural ortho-para conversion in solid hydrogen and deuterium.

Milenko, Ya. Yu; Sibileva, R. M.
Fiz. Nizk. Temp. (Kiev), 1(6), 796-8 (1975).

Low temperature parahydrogen enrichment catalyzed by paramagnetic ions supported on rutile.

Rudham, Robert; Tullett, Arthur D.
J. Chem. Soc., Faraday Trans. 1, 71(12), 2361-5 (1975).

Low-temperature parahydrogen conversion on X-zeolite containing paramagnetic cations.

Rudham, R.; Tullett, A. D.; Wagstaff, K. P.
J. Catal., 38(1-3), 488-90 (1975).

Measurement of the rate of ortho-para conversion in liquid hydrogen in contact with nickel-alumina catalyst by nuclear magnetic resonance. Effect of molecular diffusion.

Tourneur, Jacky; Legrand, Andre-Pierre; Marchand, Daniel.
C. R. Hebd. Seances Acad. Sci., Ser. C, 281(21), 841-4 (1975).

Effect of iron (III) oxide on the selectivity of zeolite caA during the low-temperature adsorption of a mixture of molecular hydrogen-molecular deuterium with hydrogen-molecular deuterium isotopes.

Yakovlev, V. A.; Parbuzin, V. S.
Khim. Fak. Mosk. Gos. Univ. im. Lomonosova, Moscow.
Technical report; Deposited Doc.; (75) p 4 pp.; No. VINITI 809-75; in Russ.

Dvorak, L. and Schneider, P.; Comparison of some models of porous media in the catalytic para-/ortho-hydrogen conversion. J. Cat. 42 408 (1976).

Changes in the catalytic activity of a nickel powder caused by milling.

Carrion, J.; Criado, J. M.; Gonzalez, F.; Herrera, E. J.

Rev. Port. Quim., 18(1-4), 93-6 (1976).

Zinc oxide and chromia as catalysts for the isomerization of butene, the hydrogenation of ethylene, and the isotopic exchange and allotropic conversion of hydrogen.

Conner, William, C., Jr.

Diss. Abstr. Inst. B 1976, 36(11), 5603-4.

Ortho-parahydrogen conversion by oxygen adsorbed on graphite.

Dericbourg, Jacques

C. R. Hebd. Seances Acad. Sci. Ser. C, 282(11), 491-3 (1976).

Study of the adsorbed-phase conversion of ortho- to para-hydrogen. Case of nitric oxide, comparison with oxygen.

Dericbourg, Jacques

C. R. Hebd. Seances Acad. Sci. Ser. C, 283(12), 519-20 (1976).

Fukushima, T., and Ozaki, A., J. Catal. 41, 82 (1976).

Conversion catalyst for ortho- and para-hydrogen.

Kawabata, Akira; Goto, Masatoshi; Ito, Takeshi.

Sakai Chemical Industry Co., Ltd., Japan.

Japan, Kokai JP 51/83891 [76/83891], 22 Jul 1976, 6 pp.

Study of the para-ortho-conversion kinetics of hydrogen on carbides of Group IV and VB metals.

Kharlamov, A. I.; Rafal, A. N.

Dopov. Akad. Nauk Ukr, RSR, Ser. B; Geol., Khim. Biol. Nauki, (11), 1009-12 (1976).

Collinear reactive scattering atomic hydrogen on molecular hydrogen in the Magnus approximation.

Knapp, E. W.; Krueger, H.

Kaiserslautern, Ger.

Chem. Phys., 18(3-4), 375-83 (1976).

Extrinsic field effect and absolute para-hydrogen conversion rate on lutetia.

Madhusudhan, C. P.; Selwood, P. W.

J. Catal., 45(1), 106-9 (1976).

Magnetic effects on the ortho-parahydrogen conversion over alpha-chromium (III) oxide, cobalt (II) oxide, and manganese (II) oxide.

Ng, C. F.; Selwood, P. W.

J. Catal.; (76) p 252-9; Vol. 43; No. 1-3; in Eng.

1976 Cont'd:

Catalytic activity of tantalum hydride in parahydrogen conversion.

Poleski, M.; Frackiewicz, A.; Palczewska, W.

React. Kinet. Catal. Lett., 4(2), 199-205 (1976).

Interpretation of ortho-para hydrogen conversion.

Truhlar, Donald G.

J. Chem. Phys., 65(3), 1008-10 (1976).

Thermometric fixed points of hydrogen.

Ancsin, J.

Metrologia; (77) p 79-86; Vol. 13; No. 2; in Eng.

Neutron scattering in solid hydrogen.

Bickerman, A.; Spitzer, H.; Stiller, H.; Lechner, R. E.; Scherm, R.; Volino, F.; Meyer, H.

Proc. Int. Conf. Lattice Dyn., Meeting Date 1977, 482-4. Edited by: Balkanski, M. Flammarion Med.-Sci.: Paris, Fr.

Magnetic excitations on atomically rough surfaces.

Bohnen, K. P.; Pink, D. A.

Physica B + C (Amsterdam), 86-88B+C, Pt. 3, 1391-2 (1977).

Catalysts for ortho-para hydrogen conversion.

Kawabata, Akira; Goto, Masatoshi; Ito, Takeshi

Sakai Chemical Industry Co., Ltd.; Osaka Oxygen Industries, Ltd., Japan
Japan, Kokai JP 52/17382 [77/17382], 9 Feb 1977, 4 pp.

Catalytic activity of hafnium, tantalum, and tungsten carbides in the high-temperature para-ortho conversion of hydrogen.

Kharlamov, A. I.; Rafal, A. N.; Samsonov, G. V.; Belov, A. S.

Teor. Eksp. Khim.; (77) p 119-22; Vol. 13; No. 1; in Russ.

Catalytic activity of hafnium, tantalum, and tungsten carbides in the high-temperature para-ortho conversion of hydrogen.

Kharlamov, A. I.; Rafal, A. N.; Samsonov, G. V.; Belov, A. S.

Teor. Eksp. Khim., 13(1), 119-22 (1977).

Hydrogenation of propylene in the presence of rare earth metal hydrides.

Konenko, I. R.; Gorshkova, L. S.; Klabunovskii, E. I.; Moreva, N. I.

Kinet. Katal., 18(5), 1301-4 (1977).

The ortho-para forms of hydrogen, deuterium, and tritium: radiation and self-induced conversion kinetics and equilibriums.

Pyper, J. W.; Briggs, C. K.

Garrett, Bruce C.; Truhlar, Donald G.
Proc. Natl. Acad. Sci. U. S. A., 76(10), 4755-9 (1979).

Decrease in the rate of a heterogeneous catalytic process of hydrogen ortho-para conversion in a weak magnetic field.

Golovin, A. V.

Kinet. Katal.; (79) p 1061-4; Vol. 20; No. 4; in Russ.

Magnetically-catalyzed ortho-para hydrogen conversion on cobalt (II) exchanged A-type zeolites.

Jablonski, Janusz Mieczyslaw.

Pol. J. Chem.; (79) p 1103-10; Vol. 53; No. 5; in Eng.

Decrease in the rate of a heterogeneous catalytic process of hydrogen ortho-para conversion in a weak magnetic field.

Golovin, A. V.

Kinet. Katal.; 20(4), 1061-4 (1979).

Iodide synthesis and certain properties of titanium phosphides.

Muchnik, S. V.; Lynchak, K. A.; Chernogorenko, V. B.; Rafal, A.N.

Izv. Akad. Nauk SSSR, Neorg. Mater.; (79) p 605-7; Vol. 15; No. 4; in Russ.

Ortho para-hydrogen conversion on cobalt (II) oxide, manganese (II) oxide and some rare-earth oxides. A note on a recent theory of ortho para-hydrogen conversion on magnetic surfaces.

Ng, C. F.

Chem. Phys. Lett.; (79) p 187-91; Vol. 62; No. 1; in Eng.

Theory of ortho = parahydrogen conversion on paramagnetic and antiferromagnetic surfaces.

Ng, C. F.

Surf. Sci., 79(2), 740-88 (1979).

Ortho para-hydrogen conversion on cobalt (II) oxide, manganese (II) oxide and some rare-earth oxides. A note on a recent theory of ortho para-hydrogen conversion on magnetic surfaces.

Ng, C. F.

Chem. Phys. Lett., 62(1), 187-91 (1979).

Study of chromium carbides and complex carbides based on chromium, tungsten, and iron in the para-ortho conversion of hydrogen.

Rafal, A. N.; Kharlamov, A. I.; Lyudvinskaya, T. A.; Domasevich, L. T.

Katal. Konversiya Uglevodorodov, 4, 53-6 (1979).

Ortho-para hydrogen conversion on X and Y zeolites exchanged with cobalt (II), nickel (II) and copper (II) ions.

Wroclaw 50950, Pol.

Pol. J. Chem., 53(4), 871-9 (1979).

The ortho-para conversion of hydrogen on rare earth metal films.

Zhavoronkova, K. N.; Peshkov, A. V.

Geterog. Katal., 4th, Pt. 1, 397-402 (1979).

Ortho-para conversion of hydrogen on rare earth metal films.

Zhavoronkova, K. N.; Peshkov, A. V.

Dokl. Akad. Nauk SSSR, 246(6), 1395-9 [Phys. Chem.] (1979).

Hydrogen isotope equilibration on sodium films.

Chappell, M. J.; Eley, D. D.; Shooter, D.
J. Res. Inst. Catal., Hokkaido Univ., 28(3), 109-17 (1980).

Denn, M., Process Fluid Mechanics. Prentice Hall (1980).

Pressure transitions in solid molecular hydrogen below 0.5 K.

Haase, D. G.; Sears, J. O.; Orban, R. A.
Solid State Commun., 35(11), 891-4 (1980).

Quantum formulation of a magnetocatalytic reaction.

Ilisca, E.; Debauche, M.; Motchane, J. L.
Phys. Rev. B: Condens. Matter; (80) p 687-701; Vol. 22; No. 2, in Eng.

Nature of the catalytic action of metal-like compounds of d-metals.

Kharlamov, A. I.
Kinet. Katal.; (80) p 245-51; Vol. 21; No. 1; in Russ.

p-Hydrogen conversion on sulfide catalysts as a function of bond ionicity.

Kharlamov, A. I.
React. Kinet. Catal. Lett.; (80) p 339-44; Vol. 15; No. 3; in Eng.

p-Hydrogen conversion on sulfide catalysts as a function of bond ionicity.

Kharlamov, A. I.
React. Kinet. Catal. Lett.; 15(3), 339-44; (1980).

Behavior of nickel-copper alloy in hydrogenation, orthohydrogen-parahydrogen conversion and H₂-D₂ exchange reaction.

Khulbe, K. C.; Mann, R. S.; Manoogian, A.
Chem. Rev.; (80) p 417-28; Vol. 80; No. 5; in Eng.

Nast, T. C., Study of a Solid Hydrogen Cooler for Spacecraft Instruments and Sensors - Final Report, LMSC-D766177 (Aug. 1980).

Interpretation of a series of catalytic activities of metalloid compounds.

Il'chenko, N. I.

React. Kinet. Catal. Lett.; (82) p 327-32; Vol. 19; No. 3-4; in Russ.

The relationship of reaction rate to amounts adsorbed for the low-temperature ortho-para hydrogen shift.

Kauffman, David; Brown, Lee F.; Manogue, William H.

J. Catal., 71(2), 244-56 (1981).

Changes in the catalytic activity of metallic compounds in the para-ortho-conversion of hydrogen.

Kharlamov, A. I.; Rafal, A. N.

Katal. Katal.; (81) p 85-90; Vol. 19; in Russ.

Relation between the activity of d-metal borides in the reaction of hydrogen and the charge state of catalyst elements.

Kharlamov, A. I.

Kinet. Katal., 22(3), 684-9 (1981).

Catalytic activity of Group IV-VI d-metal sulfides in a hydrogen conversion reaction.

Kharlamov, A. I.; Rafal, A. N.; Drozdova, S. V.; Primachenko, V. F.

Ukr. Khim. Zh. (Russ. Ed.), 47(5), 542-3 (1981).

Activity of metal-like borides in the reaction of hydrogen para-ortho conversion.

Kharlamov, A. I.; Rafal, A. N.; Serebryakova, T. I.

Ukr. Khim. Zh. (Russ. Ed.); (81) p 1301-2; Vol. 47; No. 12; in Russ.

LMSC-DB11574. Upper Atmospheric Research Satellite Cryogenic Limb Array Etalon Spectrometer (CLAES) (July 1981).

Incoherent $J = 1 \rightarrow 0$ neutron scattering from solid hydrogen.

Myles, Charles W.; Ebner, C.

Phys. Rev. B: Condens. Matter, 23(9), 4741-8 (1981).

Cooling by conversion of para to ortho-hydrogen.

Sherman, Allen.

The USA as represented by the Administrator of the National Aeronautics and Space Administration.

US Pat. No. 4,392,039 Date: 10/09/81.

The self conversion of liquid ortho-hydrogen.

Stevenson, Richard

Indian J. Cryog., 6(4), 196-8 (1981).

Catalytic activity of films of samarium, copper and their compounds in homomolecular isotopic exchange and ortho-para hydrogen conversion reactions.

Boeva, D. A.; Zhavoronkova, K. N.; Byzova, E. V.

Ref. Zh., Khim. 1982, Abstr. No. 2181258.

Catalytic properties of samarium, copper, and samarium-copper films in homomolecular isotope exchange and ortho-para conversion of hydrogen.

Boeva, L. A.; Zhavoronkova, K. N.; Byzova, E. V.

USSR

Mekh. Katal. Reakts., Mater. Vses. Konf., 3rd, Vol. 1, 20-2.

Edited by: Borekov, G. K. (1982).

Molecular hydrogen in hydrogenated α -silicon.

Carlos, W. E.; Taylor, P. C.

Phys. Rev. B: Condens. Matter, 25(2), 1435-8 (1982).

Heat transfer Data Book, 1982 edition. General Electric Company.

Interpretation of a series of catalytic activities of metalloid compounds.

Il'chenko, N. I.

React. Kinet. Catal. Lett., 19(3-4), 327-32 (1982).

Catalytic activity of carbides of fourth period metals.

Kharlamov, A. I.; Rafal, A. N.; Domasevich, L. T.

Ref. Zh., Metall. 1982, Abstr. No. 3E93; in Russ.

Catalytic activity of d-metal carbides in the para-ortho conversion of hydrogen.

Kharlamov, A. I.; Rafal, A. N.; Domasevich, L. T.; Fedorus, V. V.

Tugoplav. Soedin., Kiev 105-12

From: Ref. Zh., Khim. (1982) Abstr. No. 281650.

Behavior of nickel-copper alloy in hydrogenation, orthohydrogen-parahydrogen conversion and H₂-D₂ exchange reaction.

Khulbe, K. C.; Mann, R. S.; Manoogian, A.

Chem. Rev., 80(5), 417-28 (1982).

Conversion of para and ortho hydrogen in the Jovian planets.

Massie, S. T.; Hunten, D. M.

Icarus, 49(2), 213-26 (1982).

Cooling by conversion of para- to ortho-hydrogen.

Sherman, Allan

United States National Aeronautics and Space Administration,

USA

U.S. Pat. Appl. US 301075 A0, 12 Mar 1982, 14 pp. Avail. NTIS Order No.

PAT-APPL-6-301 075.

Para-hydrogen conversion and hydrogen-deuterium equilibration catalyzed by diamagnetic iridium, platinum, and ruthenium complexes in nonaqueous solution.

Tadros, Maher E.; Vaska, Lauri

J. Colloid Interface Sci., 85(2), 389-40 (1982).

1982 Cont'd:

Numerical analysis of power conversion in an infrared para-hydrogen Raman laser
Uemura, Shohei; Tashiro, Hideo; Toyoda, Koichi; Namba, Susumu.
Reza Kagaku Kenkyu, 4, 111-16 (1982).

Role of the electronic factor in catalysis by titanium carbide and nitrides
in the conversion of hydrogen and oxidation of carbon monoxide.
Kharlamov, A. I.; Krivitskii, V. P.; Kindrat, M. M.
Kinet. Katal., 23(3), 654-61 (1982).

Low-temperature hydrogen-deuterium exchange and ortho-para conversion of
hydrogen on praseodymium, neodymium, samarium, lutetium, and hafnium films.
Zhavoronkova, K. N.; Boeva, O. A; Peshkov, A. V.; Fraifer, A. Yu; Byzova, E. V.
Kinet. Katal.; (82) p 881-8; Vol. 23; No. 4; in Russ.

Trapping of molecular hydrogen at surfaces via translational-rotational energy conversion.

Andersson, S.; Harris, J.

Phys. Rev. B: Condens. Matter, 27(1), 9-14 (1983).

Isotopic exchange and ortho-para conversion of hydrogen on films of samarium and its compounds with copper.

Boeva, O. A.; Zhavoronkova, K. N.; Byzova, E. V.

Kinet. Katal., 24(3), 629-32 (1983).

Hydrogen adsorption by alkali metal complexes of polycyclic aromatic hydrocarbon and graphite, and their solid state properties.

Enoki, Toshiaki; Sano, Mizuka; Inokuchi, Hiroo.

Mol. Cryst. Liq. Cryst. 96(1-4), 401-11 (1983).

Ortho-para conversion of hydrogen molecules on magnetic surfaces.

Ishi, Yasushi; Sugano, Satoru.

Surf. Sci., 127(1), 21-34 (1983).

Magnetocatalytic effect on rare earth oxides.

Jugel, J.; Schwab, G. M.; Voitlaender, J.

J. Chem. Phys., 78(7), 4755-62 (1983).

Catalytic activity of transition metal silicides in the para-ortho conversion of hydrogen.

Kharlamov, A. I.; Rafal, A. N.; Dvorina, L. A.

From: Ref. Zh. Khim. (1983) Abstr. No. 16B1260.

Para-ortho conversion of hydrogen on Group IV-VI transition metal nitrides.

Kharlamov, A. I.; Rafal, A. N.; Shvedova, L. K.; Kulik, O. P.

Tugoplavkie Nitridy, 62-5. Edited by: Kosolapova, Naukova Dumka: Kiev, USSR (1983).

Catalytic activity of transition metal silicides in the para-ortho conversion of oxygen.

Kharlamov, A. I.; Rafal, A. N.; Dvorina, L. A.

Zh., Khim. 1983, Abstr. No. 16B1260.

Investigation of a para-ortho hydrogen reactor for application to spacecraft sensor cooling, final report.

NAST, T. C. (1983).

Ortho-para conversion of hydrogen in copper as origin of time-dependent heat leaks.

Schwark, H.; Pobell, F.; Halperin, W. P.; Buchal, C.; Hanssen, J.; Kubota, M.; Mueller, R. M.

J. Low Temp. Phys., 53(5-6), 685-94 (1983).

1983 Cont'd:

A mechanism for the para-ortho conversion of hydrogen by diamagnetic substances.

Stevenson, Richard.

J. Catal.; (83) p 218-21; Vol. 79; No. 1; in Eng.

Stock, H. R. and Lowe A. Measurement and differential kinetic analysis of wall temperatures in monolith converters. Chem. Eng. Sci. 38 1039 (1983).

Isotope exchange and ortho-para conversion in molecular hydrogen on films of dysprosium-copper alloys.

Boeva, O. A.; Zhavoronkova, K. N.; Popova, N. N.; Gachinskaya, L. M.
Tr. Inst. - Mosk. Khim.-Tekhnol. Inst. im. D. I. Mendeleeva, 130, 109-19 (1984)

Coupled channel distorted wave method of atom-molecule reactive scattering: application to para to ortho hydrogen molecule conversion.

Choi, B. H.; Poe, R. T.; Tang, K. T.
J. Chem. Phys., 81(11), 4979-90 (1984).

Catalytical conversion from ortho-hydrogen to para-hydrogen.

Corat, E. J.
Report, CTA-IEAV-NT-002/84, 30 pp. Avail. INIS
From: INIS Atomindex 1985, 16(20), Abstr. No. 16:069242 (1984).

Ortho-para conversion of solid hydrogen as a function of density.

Driessen, A.; Van der Poll, E.; Silvera, Isaac F.
Phys. Rev. B: Condens. Matter, 30(5), 2517-26 (1984).

Dynamical aspects of ortho-para conversion on magnetic surfaces.

Ishii, Yasushi; Sugano, Satoru
J. Phys. Chem., 77(11), 2049-62 (1984).

Dependence of conversion rate in liquid hydrogen on ortho-para composition.

Milenko, Yu. Ya.; Sibilev, R. M.
Fiz. Nizk. Temp. (Kiev), 10(12), 1292-3 (1984).

Development of a para-orthohydrogen catalytic converter for a solid hydrogen cooler.

Nast, T. C.; Hsu, I. C.
