OPERATION AND MAINTENANCE, AIR FORCE RESERVE

PURPOSE AND SCOPE

The funds requested for the Operation and Maintenance, Air Force Reserve appropriation are required by the Air Force Reserve to maintain and train units in reserve status to assure their readiness for immediate mobilization, and to provide administrative support for the Air Reserve Personnel Center.

This estimate provides for the operation and training of all Air Force Reserve units, consisting in FY 1991 of 56 flying units, 177 mission support units, 11 Air Force Reserve flying installations, and the flying and mission training strength of 85,200 personnel in the Selected Reserve. Activities supported include aircraft operations, base and depot level aircraft maintenance, maintenance of other equipment, supply activities, and security for Air Force Reserve resources.

PROGRAM BUDGET DECISION

Program Budget Decision - Air Force Reserve Operations

I. Description of Operations Financed: This estimate provides for the operation and training of all Air Force Reserve units, the FY 1991 request consists of 56 flying units, 177 mission support units, 11 Air Force Reserve flying installations, and the flying and mission training strength of 85,200 Reserve Component personnel in the Selected Reserve. Activities supported include aircraft operations, base and depot level aircraft maintenance, maintenance of other equipment, supply activities, and security for Air Force Reserve resources. Note: Base Operations is transferred from Other Support (Budget Activity 3) to Mission Forces (Budget Activity 1) beginning in FY 1990 to make the Reserve budget activity structure comparable to the active components.

Program Budget Decision - Air Force Reserve Operations

Activity Group - Mission Forces

I. Narrative Description: This Activity Group encompasses all Air Force Reserve flying and mission support units as well as the costs in support of base operations and real property maintenance of Reserve facilities. Note: Base Operations requirements are transferred from Budget Activity III, Other Support, to Budget Activity I, Mission Forces, effective in FY 1990.

II. Description of Operations Financed: The funds requested provide for expenses, other than Depot Maintenance, incident to the mission training of the Air Force Reserve flying and mission support units and the base operation and maintenance at eleven Air Force Reserve bases. This Activity Group includes funds for civilian personnel; travel and transportation of personnel and material; communications; maintenance of equipment including vehicles; utilities and other base services; and purchases of supplies, equipment, and services from stock funds and commercial sources. Also included are funds for expenses of field training, exercises and maneuvers, and training equipment and supplies.

DETAIL BY ACTIVITY GROUP

Program Budget Decision - Air Force Reserve Operations

Activity Group - Depot Maintenance

I. Narrative Description: Provides funds to reimburse the Air Force Depot Maintenance Industrial Fund for depot level maintenance performed on aircraft, engines, exchangeables, vehicles and other major items of equipment. It includes all work associated with repair, overhaul, corrosion control, modification, reclamation, manufacture, assembly and disassembly, inspection testing, sustaining engineering, contractor furnished supplies and equipment and Government Furnished Materials (GFM) procured from Air Force stock funds by the Air Logistics Centers in support of the Air Force Reserve.

II. Description of Operations Financed: This budget activity provides depot level maintenance for Air Force Reserve aircraft and equipment. Beginning in FY 1990, modification installation is being financed with funding from the Aircraft Procurement, Air Force appropriation pursuant to Congressional direction.

C. Reconciliation of Increases and Decreases:

8. Program Decreases

a. Exchangeable item repair requirements decreased due to the retirement of older more mature weapons systems with significant exchangeable item components and worsening meantime between failure rates. The repair assets that remained in the repair cycle pipelines sustained combat capability and then were retired as their supported weapons systems passed from the inventory. General improvement of exchangeables due to the modernization of weapons systems, is beginning to be offset by increasing requirements as the newer repair cycle assets age and enter the repair cycle system.

-1,765

b. Net decreased aircraft/engine costs related to the retirement of 10 C-130Bs, 42 F-4Es, 4 H-3Es and 5 HH-1H aircraft, plus the transfer of 4 C-130Bs, 1 HC-130 and 1 H-3E aircraft to backup inventory. These are partially offset by the Congressional addition of 6 C-130H aircraft, the gain of 3 C-141s at our second unit, the add of 36 F-16A/Bs, an initial gain of 8 MH-60G helicopters, and the transfer of the entire WC-130 Weather Reconnaissance mission to the Air Force Reserve in FY 1991.

Activity Group - Other Support

I. Narrative Description: This area encompasses the Office of the Chief, Air Force Reserve (Air Staff), Headquarters Air Force Reserve (Operational Headquarters) and the Reserve Numbered Air Forces (Mission Controllers), and the Air Reserve Personnel Center (ARPC). The ARPC administers and participates in the development of policies, plans and programs applicable to Reserve personnel management, mobilization and administration. The Center performs personnel records maintenance for all Air Force Reserve and Air National Guard personnel not on extended active duty and those assigned or attached to ARPC. It also maintains records of enlistment in Air Force ROTC and, at graduation, issues commissions and orders officers to active duty.

II. Description of Operations Financed: Funds are provided for pay of civilian personnel, travel, transportation, rents (including ADP equipment), communications, repair of equipment by contract, printing, other purchased services, supplies, and equipment.

Appropriation: Operation and Maintenance, Air Force Reserve

Date: January 1990

Narrative Requirement:

Contract Engineering and Technical Services

1. Technical service representative required to provide engineering and technical assistance to Air Force Reserve personnel for several months following conversion to a new weapon system.
2. Increase in FY 1990 is attributed to inflation on the FY 1989 program and the addition of twenty four (24) F-16s to the Air Force Reserve inventory.
3. After inflation, the FY 1991 change reflects the loss of six tactical fighter aircraft during conversion of F-4Es to F-16s, and the implementation of stricter management controls over contracted advisory assistance services as directed.
4. Alternative to contract technical representatives would be to have active Air Force personnel provide assistance and training for Air Force Reserve Technicians. This is not feasible because the active Air Force does not have sufficient manpower available for daily scheduling during regular work periods to train Air Force Reserve Technicians, plus other Reserve personnel during weekend Unit Training Assemblies. The contract Technical Representatives are also much more economical.

 (Costing more than \$500,000.00)

<u>State</u>	<u>Location/Installation</u>	<u>Project Title</u>	<u>(\$000) Cost</u>
California	Travis AFB	Maintain/Repair Bldg 237	\$1,339

Project will install new coverings to interior and exterior walls and floors, patch roof and replace windows, doors, restroom fixtures, total electrical systems, including lighting, install new air conditioning and heating system throughout building 237. Project is required for facility due to its age and deteriorated condition.

Massachusetts	Westover AFB	Repair/Replace Roof, Bldg 5375	\$ 976
---------------	--------------	--------------------------------	--------

Project provides for replacement of roofing that is 35 years old and beyond any hope of continued economical repair. The new roof will protect Base Supply expensive equipment and aircraft parts.

Massachusetts	Westover AFB	Repair Electrical Service to Hangars	\$ 819
---------------	--------------	--------------------------------------	--------

Project provides for repairing the electrical service in five hangars by installing new transformers, service conductors, secondary switchgear, secondary panels and feeders, and the disposal of old PCB transformers. Existing electrical service, switches, and panels were installed in 1942, are obsolete and in poor condition, violate the National Electrical Code, and are unsafe.

<u>State</u>	<u>Location/Installation</u>	<u>Project Title</u>	<u>(\$000) Cost</u>
Massachusetts	Westover AFB	Repair/Replace Roofs - Various Buildings	\$ 673
	Project provides for replacement of roofing due to extensive leaking caused by blistering and severe ponding. New roofing is needed to protect expensive equipment, parts, and processes in three base buildings and two hangars.		
Wisconsin	General Mitchell IAP	Repair Base Streets and Parking Lots	\$ 790
	Project will completely remove existing pavements from streets and parking lots on base and lay new asphaltic concrete surface on new gravel base course. Work is required due to the age and increasing frequency of maintenance work required to keep existing roads operable.
