FORWARD

This Annual Progress Report (APR) documents the continuing review during FY-89 of research approved by the Clinical Investigation Committee (CIC), the Animal Use Committee (AUC), and the Human Use Committee/Institutional Review Board (HUC/IRB) of Walter Reed Army Medical Center (WRAMC). The review of each research protocol is initiated by the Department of Clinical Investigation (DCI) on the anniversary month of its approval. At that time, a request is sent to the principal investigator for submission of a progress report. This report consists of a detail summary sheet (DSS), an updated consent form, if needed, and a completed questionnaire regarding the continuing review of human subject participation or animal use. Members of the HUC/IRB or AUC review the progress reports throughout the year, and one of the following recommendations is made: (1) approval, (2) request additional information, or (3) request termination of the protocol. The members' recommendations are presented monthly to the HUC/IRB or AUC for final approval.

The FY-89 APR process at WRAMC was administered by the Chief, Army Medical Specialist Corps Clinical Investigation and Research Service, Department of Clinical Investigation, in coordination with the Research Review Service. Due to the ongoing nature of the APR process, an overlap of fiscal years is inevitable in presenting the data. A total of 474 protocols are included in this document.

I. UNIT SUMMARY

A. OBJECTIVE

To implement and manage the clinical investigation program at Walter Reed Army Medical Center (WRAMC) by promoting, supporting, coordinating, planning, conducting and publishing ethical, scientific inquiry into clinical health problems of beneficiaries of the military health care system, to include studies in humans and animals.

B. TECHNICAL APPROACH

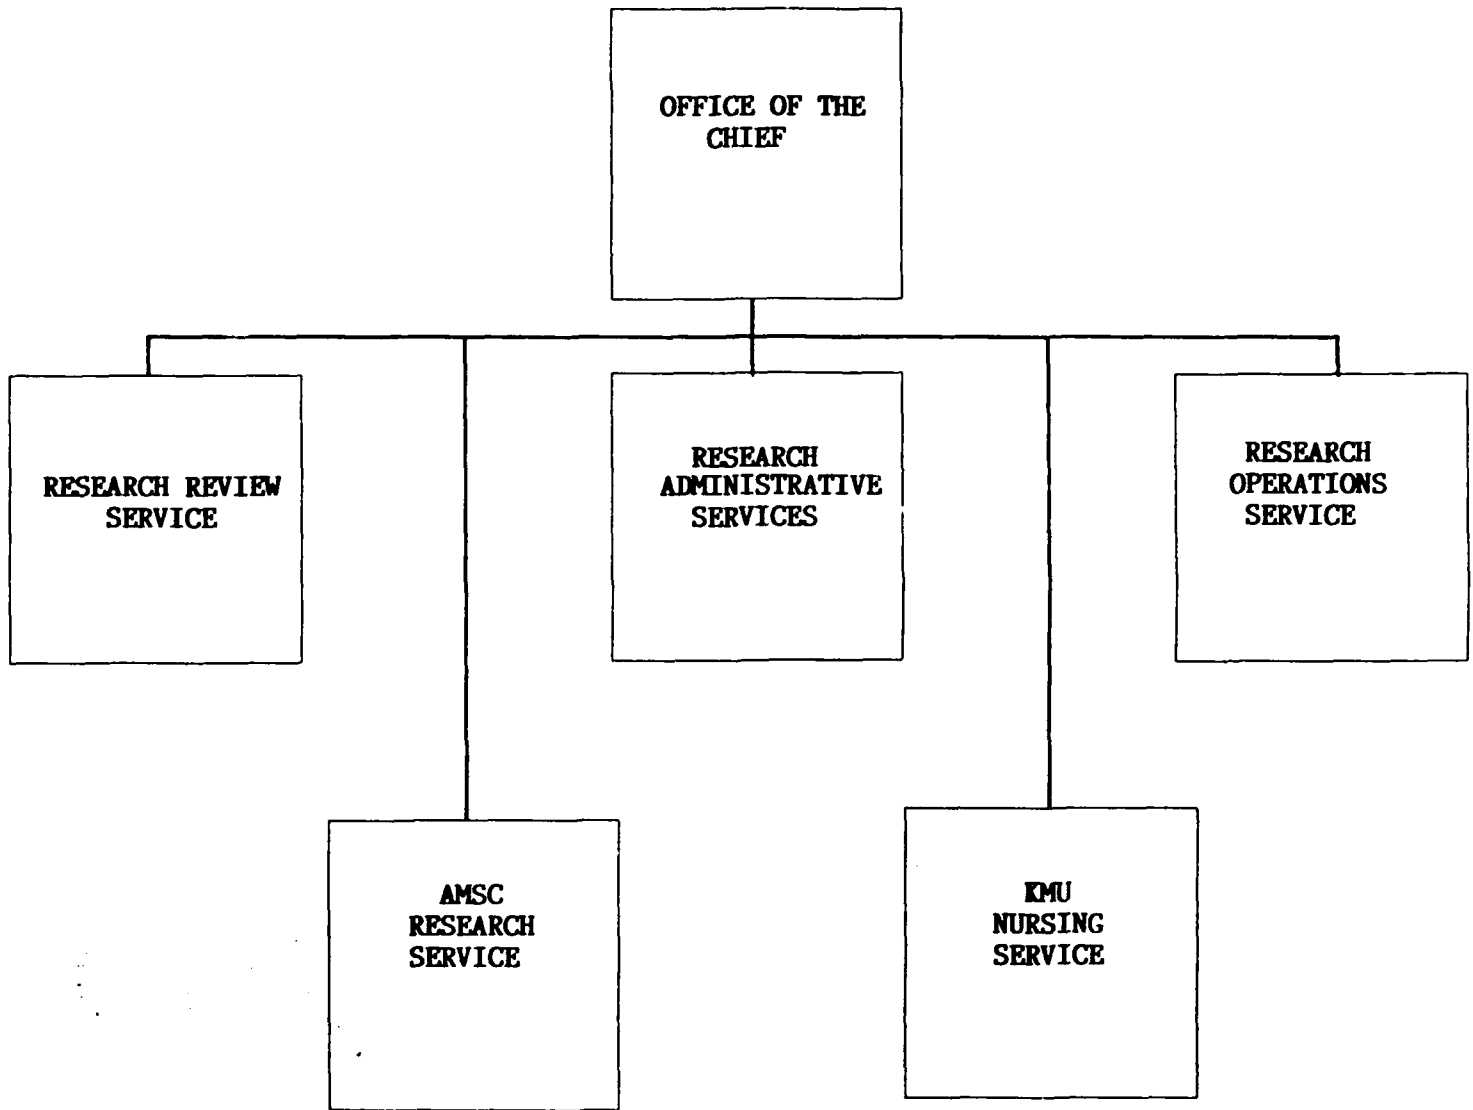

The clinical investigation program at WRAMC is conducted in accordance with the following:

AR 40-7	Use of Investigational Drugs in Humans and the Use of Schedule I Controlled Drug Substances
AR 40-38	Clinical Investigation Program
AR 70-18	The Use of Animals in DOD Programs
TB MED 525	Control of Hazards to Health from Ionizing Radiation Used by the Army Medical Department
HSC 40-23	Management of Clinical Investigation Protocols and Reports
WRAMC 70-1	Clinical Investigation Program, WRAMC Research Activities
45 CFR 46	Protection of Human Subjects
21 CFR A,D,& F	Food and Drug Administration

F. RESEARCH ACTIVITY

1. Accomplished in FY-89

With a mission to empower WRAMC researchers from planning to publication, the Department of Clinical Investigation (DCI) supported a record total of 671 active studies this year (Table I). A record 197 of these studies were newly approved. The 474 other studies were ongoing for at least one year and are summarized in this report. Ninety-six percent (96%) of the investigations were conducted by Medical Corps officers at WRAMC, and about 1% were conducted at Army Community Hospitals in the Walter Reed Health Service Region (Table II). Human studies accounted for 93% of the investigations, with 36% involving research therapies including investigational drugs or devices and cooperative oncology group studies (Table III). Animal studies accounted for 5%, and laboratory studies accounted for 2%. Clinical investigation productivity by WRAMC researchers included 73 published abstracts, 22 published articles, and 61 conference presentations (Table IV). Thirty-three (33) Clinical Investigation Recognition Seminars (now in its third year) were presented by WRAMC researchers and provided local dissemination of WRAMC research presented at regional and national conferences.

The DCI was involved in many transitions during this year, both in personnel and in its initiatives to improve by striving to help all researchers from planning to publication (DCI is SHARPP). The Chief, Transplant Immunology Laboratory, the Senior Statistician, and the Supervisor, Laboratory Animal Facility left the department, and only one of these vacancies was filled in FY-89. The Surgical Research Service was established within the Department of Surgery with COL Samuel A. Cucinell as Chief.

* The decrease in fiscal year figures is a result of a restructured method of data collection which narrowed the accounting criteria but still allowed for overlap in fiscal years resultant from the ongoing APR process.

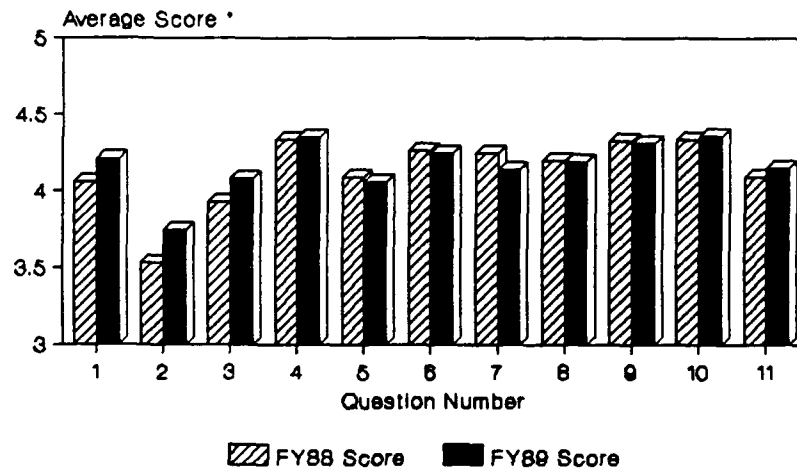

DCI Quality Improvement Questionnaire

The DCI Quality Improvement Questionnaire was completed by 252 of 474 investigators submitting annual progress reports from FY89 (compared to 310 of 456 investigators for FY88). The following eleven questions were presented:

1. DCI is doing all they can to support my research efforts.
2. DCI is providing adequate clerical support.
3. DCI is providing adequate statistical consultation.
4. DCI is making available adequate computer support.
5. DCI is providing adequate technical support.
6. DCI is providing adequate equipment and other logistical support.
7. DCI is providing adequate research space.
8. DCI is providing adequate financial support.
9. DCI conducts an adequate preliminary review of research applications.
10. DCI conducts an adequate annual review of research protocols.
11. Overall, DCI lives up to its slogan of being SHARPP
(Striving to Help All Researchers from Planning to Publication).

The answers range from 'Strongly AGREE' (score = 5) to 'Strongly DISAGREE' (score = 1), with the option of 'Not Applicable':

Evaluation of Performance, FY88 - FY89 By Type of Service

* Scale from 1 to 5
Score of '5' represents *strong*
agreement with level of service

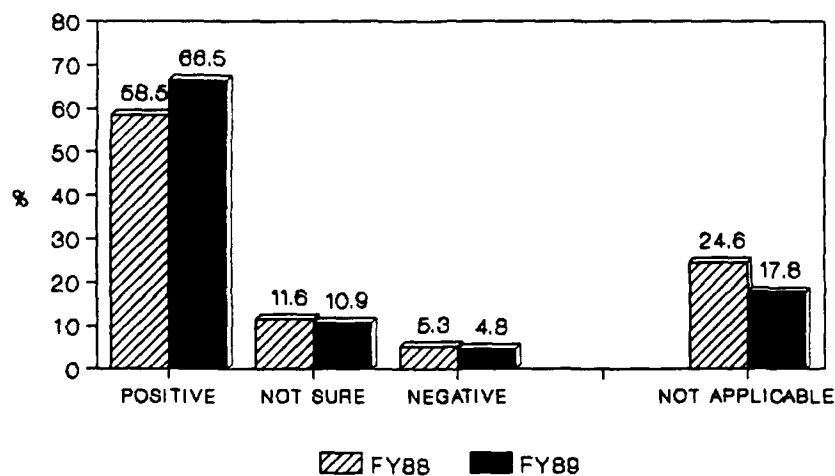

Ten of the eleven service areas had average scores greater than 4.00 in FY89. The overall average score for FY89 was 4.18, an increase from the 4.13 score for FY88 (not statistically significant, $P = .14$, by two sample t -test). The three greatest changes were all improvements: clerical support (2), DCI 'doing all they can' (1) and statistical consultation (3).

Summarizing a score of 4 or 5 as a 'Positive' response, and a score of 1 or 2 as a 'Negative' response, the 11:1 ratio of positive to negative replies in FY88 increased to a 14:1 ratio in FY89. Nine of the eleven areas queried showed an improvement in FY89.

In addition to the overall increase in positive responses and decline in negative responses between FY88 and FY89, there was a decline in the number of 'Not Sure' and 'Not Applicable' replies.

Overall Summary of Responses

FY88 - FY89

This survey of the effectiveness of services offered by the Department of Clinical Investigation directs our planning for FY90.

The Bailey K. Ashford Clinical Research Award finalists who presented their research at the third annual symposium were CPT Joseph J. Drabick, Fellow in Infectious Disease; CPT Patrick A. Cambier, Resident in Medicine; MAJ Dane K. Wukich, Resident in Orthopaedic Surgery; MAJ Garrison V. Morin, Resident in Otolaryngology/Head and Neck Surgery; and MAJ Raymond W. Phillips, Fellow in Gastroenterology. The recipient of the Bailey K. Ashford Clinical Research Medal awarded at the WRAMC Graduation Exercises was MAJ Garrison V. Morin for his research entitled "Wound Healing: Relationship of Wound Closing Tension to Tensile Strength and Scar Width."

The Research Review Service reviewed a record number of new protocols for approval. They implemented a quality improvement audit program which involved the initial auditing of twelve investigator study files for compliance with DA regulations and WRAMC Human Use Committee/Institutional Review Board guidelines. Results and recommendations of the audits were presented to the Human Use Committee. The Research Review Service, along with the Research Administrative Services, was successful in contracting to purchase a local area network linking all major clinical investigation activities to a minicomputer system with state-of-the-art graphics and enhanced statistical computing power.

The Research Administrative Services processed nearly 2900 purchase orders including over 11,000 line items for WRAMC investigators despite intense personnel turbulence during FY-89. New persons were recruited for two of the three clerical staff positions. The MEDCASE program grew to \$557,178 by the end of the fiscal year. A video imaging system was obtained for the Army Audiology

and Speech Center through the QRIP program. The Sleep Disorders Laboratory was relocated to the Pulmonary Disease Clinic.

The Research Operations Service initiated and completed a number of procedural upgrades to streamline and enhance the effectiveness of laboratory research support. Among those initiatives were to completely overhaul and expand the Laboratory Safety Manual, revise the Laboratory Animal Facility Standard Operating Procedures, develop mission statements for the General Support Laboratory and the Research Operations Service, and thoroughly document procedures for property accountability and equipment maintenance. The plans for accreditation of the animal facility were enhanced by identification of a consultant, LTC Bradford Goodwin, and by incorporating his recommendations into the animal facility design plan. LTC Lloyd E. Lippert, Chief, Research Operations, was selected as the Secretary of the Society of Armed Forces Medical Laboratory Scientists.

The Army Medical Specialist Corps (AMSC) Clinical Investigation and Research Service designed and directed the annual Mary Lipscomb Hamrick AMSC Research Course at the Xerox International Center for Training and Development in Leesburg, Virginia, from 31 July through 4 August. The course was attended by 48 officers, including 15 faculty. Fifteen of 44 submitted abstracts of AMSC research were selected for presentation. The instructional focus for the course included research methods, statistics, scientific writing, and research protocol review for clinical studies in Army hospitals.

The Kyle Metabolic Unit (KMU) Nursing Service reopened in June as a DCI service, reversing the persistent trend of diminishing patient bed capacity at WRAMC. Under the creative leadership of Ms. Ellen G. Horton, Head Nurse of the KMU Nursing Service, the patient census progressively increased despite problems with nurse staffing problems.

Two recently hired researchers in the Army Audiology and Speech Center were successful in obtaining substantial extramural research funding. Dr. Marjorie Leek, Hearing Scientist and Senior Researcher, obtained a 5 year, \$225,000 NIH grant, and Dr. David Fabry, Research Audiologist, was awarded a \$15,000 Nontenured Faculty Research Award by the 3M Corporation.

In recognition of the relevance and leadership role of the Kyle Metabolic Unit and of COL Leonard Wartofsky in basic research and clinical investigations related to the thyroid, the Office of the American Thyroid Association was moved to WRAMC with COL Wartofsky as its Secretary. The Kyle Metabolic Unit Laboratory began hosting Visiting Foreign Fellows with Dr. Wenyi Cai, M.D., Ph.D., from the Republic of China beginning a one year study period under the auspices of the Uniformed Services University of the Health Sciences. Individuals from Ethiopia and Hungary are to follow in this program.

Members of the Nursing Research Service of the Department of Nursing were deeply involved in three initiatives addressing nursing recruitment and retention. The first was development of an Army Nurse Corps survey, funded by the Office of the Surgeon General and supported by the Soldier Support Center, to determine satisfiers and dissatisfiers which may impact on active duty retention.

Second, a very similar survey of all registered nurses at WRAMC was conducted to ascertain how satisfied or dissatisfied they were with working conditions and to solicit recommended solutions. Third, LTC Jane Hudak served on the Health Professionals Special Pay Study task force and assisted in writing the "Report to Congress on Armed Forces Health Professions Special Pay--Military Nurse Corps."

The WRAMC Clinical Investigation Program encompassed all clinical departments and separate services, as well as the administrative directorates. The program supported 64 postgraduate training programs with research conducted by house staff and students, as well as assigned and affiliated staff. The medical training programs had substantial involvement in research, with 36 of the 51 programs having a total of 618 approved protocols. Fifty-nine of 408 Medical Corps interns, residents and fellows were principal investigators, with a total of 70 approved protocols. One hundred sixty-three of the assigned or affiliated Medical Corps staff were principal investigators, with a total 486 approved protocols. Assigned Medical Corps staff numbered 236. The 13 non-medical training programs with 53 trainees, including 10 Chaplain Corps trainees, were also involved in research with 6 programs having 12 approved protocols. WRAMC had a total of 265 principal investigators.

Many individuals associated with the WRAMC Clinical Investigation Program were recognized by outside organizations for their research accomplishments. The awards are listed below:

1. CPT Patrick A. Cambier, MC, Internal Medicine Resident - Best Associate's Paper at the Army Regional Meeting of the American College of Physicians in October 1988 for his study, "Objective Benefit of Diltiazem in the Treatment of Raynaud's Phenomenon: A Controlled Double Crossover Study."

2. CPT Svetislava J. Vukelja, MC, Hematology/Oncology Fellow - Best Fellow's Research Award in Hematology/Oncology at the Army Regional Meeting of the American College of Physicians in October 1988 for her study, "Mean Platelet Volume in the Evaluation of Thrombocytopenia."
3. CPT M. Frank Lyons, MC, Fellow in Gastroenterology - William Beaumont Research Award at the Army Regional Meeting of the American College of Physicians in October 1988 for his study, "Fleet^R Hypertonic Phosphate Enemas Cause Hyperphosphatemia and Acidemia in Patients with Ulcerative Colitis After Routine Colonic Cleansing."
4. LCDR Michael S. Opsahl, MC, Reproductive Endocrinology Fellow - The Chairman's Award for the best paper on Endocrinology and Infertility from a teaching hospital at the 27th Annual Meeting of the Armed Forces District, American College of Obstetricians & Gynecologists in November 1988 for his study, "Lymphocyte Subsets in Fertile and Infertile Women."
5. MAJ Paul G. Perlik, MC, Chief, Hand Surgery, Founders' Award at the 30th Annual Meeting of the Society of Military Orthopaedic Surgeons in December 1988 for his paper, "The Use of Magnetic Resonance Imaging to Assess Vascularity of Scaphoid Nonunions."
6. LTC Thomas E. Wiswell, MC, Neonatal Service, Department of Pediatrics - Election to membership in the Society of Pediatric Research in December 1988.
7. MAJ Garrison V. Morin, MC, Resident, Otolaryngology/Head and Neck Surgery Service, Department of Surgery - the Military Regional Award for the Committee on Trauma presented by the American College of Surgeons in February 1989 for his paper, "Wound Healing: Relationship of Tensile Strength to Closing Tension in Rats."
8. LTC(P) Jane K. Sweeney, SP, Chief, Army Medical Specialist Corps Clinical Investigation and Research Service - the 1989 Dissertation Award by the section on Pediatrics, American Physical Therapy Association in February 1989 for her doctoral dissertation, "Physiological and Behavioral Effects of Neurological Assessment in Preterm and Full-Term Neonates."
9. CPT R. Paul Schaudies, MS, Chief, General Support Laboratory, Department of Clinical Investigation - Outstanding Young Research Scientist Award at the meeting of the Society of Armed Forces Medical Laboratory Scientists in March 1989 for his research accomplishments.
10. LTC Thomas E. Wiswell, MC, Neonatal Service, Department of Pediatrics - the Ogden Bruton Award for Research at the 25th Annual Uniformed Services Pediatric Seminar in March 1989 for his work, "The Effect of Different High Frequency Ventilator Strategies on the Propagation of Tracheobronchial Histopathologic Changes."
11. COL Joan T. Zajtchuk, MC, Chief, Otolaryngology/Head and Neck Surgery Service, Department of Surgery - Honorable Mention in the Candidate's Thesis Competition held by the American Laryngological, Rhinological and Otological Society, Inc. in April 1989 for her thesis, "Mucosal Leishmaniasis in Brazil."

12. CPT Patrick A. Cambier, MC, Internal Medicine Resident - National Finalist for Associate's Award at the meeting of the American College of Physicians in April 1989 for his paper, "Objective Benefit of Diltiazem in the Treatment of Raynaud's Phenomenon: A Controlled Double Crossover Study."

13. MAJ Raymond W. Phillips, MC, Fellow in Gastroenterology, Department of Medicine - the Glaxo Research Award presented at the 90th Annual Research Meeting of the American Gastroenterology Association in May 1989 for his work, "Beta-Carotene Normalizes Rectal Mucosal Ornithine Decarboxylase Activity in Patients with Colon Carcinoma."

14. LTC William Hopkinson, MC, Orthopaedics Service, Department of Surgery - the O'Donoghue Award in Sports Medicine at the meeting of the American Orthopaedic Society in June 1989 for his paper, "The Efficacy of a Prophylactic Knee Brace to Reduce Knee Injuries in Football: A Prospective, Randomized Study at West Point."

15. MAJ Melissa W. Sinnott, SP, Director, Education and Research, Occupational Therapy Section, Physical Medicine and Rehabilitation Service - Abstract of the Year Award for Occupational Therapy Research at the Mary Lipscomb Hamrick AMSC Research Course in August 1989 for her abstract, "Clinical Specialization in Occupational Therapy: A Pluralistic View of Practice."

16. MAJ Garrison V. Morin, MC, Resident, Otolaryngology/Head and Neck Surgery Service, Department of Surgery - 1st Place Research Paper Award presented by the Society of Military Otolaryngologists in September 1989 for his paper, "Wound Healing: Relationship of Tensile Strength to Closing Tension in Rats."

2. Planned for FY-90

The start-up of the DCI Editorial Office with one staff position will allow the department to begin to address the most critical and chronic need identified by ongoing survey of WRAMC researchers. The installation and subsequent development of applications of the recently purchased computer network will greatly enhance the department's ability to provide statistical and data analysis support, as well as graphics and administrative support. CPT R. Paul Schaudies, Chief, General Support Laboratory, is leaving the department to attend the AMEDD Officers Advanced Course. He has been a tremendous asset to the department during his four and one half year assignment. The establishment of a WRAMC Clinical Investigation Special Fund in the Henry M. Jackson Foundation will

provide a much needed new avenue to fund expansion of the clinical investigation program.

The planned relocation of the Kyle Metabolic Unit will relieve some of the space problems of the WRAMC intensive care and operating areas on the fourth floor of Building 2. Definitive plans to renovate Building 7 to accommodate an AAALAC-approved Laboratory Animal Facility as well as a major portion of DCI should be completed to include transition space for the DCI activities currently housed in Building 7.

3. Ongoing and Future Issues

The time required to obtain approval of research studies continues to be an important area of concern at WRAMC. DCI will continue to monitor the time required for each component of the review and approval process and will implement changes to reach the present goal of a mean approval time for all WRAMC studies of less than 50 days. Ongoing efforts to obtain extramural funding through the Medical Research and Development Command and the Jackson Foundation are the best prospects to increase research funding at WRAMC. Clinical investigation education will receive more emphasis, working to develop better programs in all areas from animal research, study design, and statistics, to ethics and conflict of interest.

TABLE V: Human Use Committee/Institutional Review Board Members

Thomas A. Klein, COL, MC	Chairman, HUC/IRB Chief, Department of Obstetrics and Gynecology, Rep, Deputy Commander
H. Linton Wray, COL, MC	Co-Chairman, HUC/IRB Chief, DCI
Robert Smallridge, COL, MC*	Rep, Director, WRAIR
Wayne Johnston, COL, JA	Center Judge Advocate
Sarkis Derderian, LTC, MC	Assistant Chief, DCI
Valerie Biskey, LTC, AN	Rep, Chief, Department of Nursing
Richard Patterson, LTC, SP	Chief, Education and Research, Nutrition Care Directorate
Frank Lombardo, MAJ, SP	Rep, Chief, Pharmacy Service
Robert Hill, MAJ, CH	Rep, Chief, Department of Ministry and Pastoral Care
Eric Marks, M.D.*	Rep, Department of Medicine, Uniformed Services University of the Health Sciences
Laurel Meaney, DAC	Patients' Rights Representative

*Non-affiliated member

TABLE VI: Clinical Investigation Committee Members

H. Linton Wray, COL, MC	Chairman Chief, DCI
Samuel Cucinell, COL, MC	Rep, Chief, Department of Surgery
Charles Yeager, COL, MC	Rep, Radiation Control Committee, Radiation Therapy
Wayne Johnston, COL, JA	Center Judge Advocate
Jane Sweeney, LTC(P), SP	C, AMSC Clinical Investigation and Research, DCI
Sarkis Derderian, LTC, MC	Co-Chairman Assistant Chief, DCI
Patricia Rikli, LTC, AN	Rep, Chief, Nursing Research Svc
Jack Moore, LTC, MC	Rep, Chief, Dept of Medicine
Robin Howard, DAC	Biostatistician, DCI

TABLE VII: Rotating Senior Investigators, CIC

INVESTIGATOR

Thomas Wiswell, LTC, MC	Dept of Pediatrics
Harlan Bridenbaugh, COL, MC	Dept of Psychiatry
Bahmann Jabbari, COL, MC	Neurology Service
Brian Walden, Ph.D., DAC	Audiology & Speech Center
Edward Squire, LTC, MC	Allergy-Immunology Service
Steven Shay, COL, MC	Gastroenterology Service

TABLE VIII: Animal Use Committee/Clinical Investigation Committee Members

Charles Raflo, COL, VC	Attending Veterinarian Director, Div Vet Med, WRAIR
Hernando Mena, LTC, MC	Asst. Chairman, Dept Neuropath (AFIP)
Lloyd Lippert, LTC, MS	C, Research Operations Svc, DCI

TABLE IX: HIV Research/Clinical Investigation Committee Members

Edmond, Tramont, COL, MC	Director, HIV Research Program

skin tests, 28

* Reference is to page numbers in Volume II.

SUBJECT INDEX*

sleep, 221, 223
sleep apnea, 226, 228
small cell lung CA, 75
smoking, 399
sodium depletion, 154
soft tissue, 363
soft tissue sarcoma, 365
solid tumors, 380, 383
somatosensory-potential, 251
somatostatin, 130
SPECT, 256
spectral, 454
spectrographic, 452
speech, 437, 442, 445
speech recognition, 443
sperm, 124, 270
spinal fusion, 436
spleen, 325
splenectomy, 332
squamous cell carcinoma, 320
stage IV-S, 350
staging, 276, 283
stem cells, 203
steroid dependent asthma, 27
streptococcus, 330
stromal, 278
strontium 89, 406
suboptimal, 295
suckling rat, 330
suctioning, 260, 261, 264
sulcrafate, 160
sulfasalazine, 243
surgery, 413
synovial cell, 363
synovial cell sarcoma, 365
Syrian hamsters, 210
T helper cells, 6
T-cell, 376
T-cell receptor, 70
tailored radiation, 353
tamoxifen, 288, 311
Tanner staging, 327
teniposide, 294
Terazosin, 464
test development, 437
testicular leukemia, 351

* Reference is to page numbers in Volume II.

SUBJECT INDEX*

testing, 473
testosterone, 116
therapy, 96
thoracotomy, 412
thrombocytopenia, 188
thyroid, 43, 99, 100, 101, 102, 110, 111, 122, 131,
133, 142
thyroid disease, 115, 117
thyroid glands, 134
thyrotropin, 108, 130
thyroxine, 143, 217
tissue, 107
total hip prostheses, 431
total joint, 430, 434
toxin, 206, 209
tracheostomy children, 262
transfusions, 426
transplant, 394
transplantation, 120, 424, 428
transport, 215
treadmill, 84
treatment, 85, 397, 400
treatment complications, 349
TRH, 114
trihexyphenidyl, 245
trimetrexate, 61
trophoblastic, 287, 307
TSH, 114, 140
tumors, 189, 278, 303, 348, 357
ultrasound, 218
undifferentiated, 343
upper airways, 233
urethritis, 213
urinalysis, 1
urinary tract infection, 466
uterus, 275, 286, 297
uvulopalatopharyngoplasty, 450
valvuloplasty, 86
vascular surgery, 176, 455
ventilation, 225, 227
videovideoscopy, 170
videofluoroscopic, 452
vinblastine, 318
vincristine, 314
viral, 43
virus, 102

* Reference is to page numbers in Volume II.

SUBJECT INDEX*

virus culture, 16
vision, 401
visual biasing, 449
vitamin A, 153, 157, 366
vitamin D, 127
vitamin E, 337
voice, 441
voice disorders, 438
Von Willebrand's Disease, 194
VP-16, 293, 313, 385
vulva, 289, 290
vulvectomy, 308
Warthin starry stain, 165
weight control, 38
Wilm's tumor, 349, 367
x-ray, 473
zacopride hydrochloride, 191
zidovudine, 15
zinc, 137, 159, 164
