Form Approved
OMB No. 0704-0188

Public reporting burden for this collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington, VA 22202-4302, and to the Office of Management and Budget, Paperwork Reduction Project (0704-0188), Washington, DC 20503.

13. ABSTRACT (Maximum 200 words)

Two activities were pursued under this grant. The first was a visitor program to conduct research on numerical algorithms for MIMD computers. The program is summarized in the following attachments. Attachment A - List of Researchers Supported; Attachment B - List of Reports Completed; and Attachment C - Reports. The second activity was a workshop on the Control of Fluid Dynamic Systems held on March 28-29, 1989. The workshop is summarized in attachments. Attachment D - Workshop Summary; and Attachment E - List of Workshop Participants.

Two activities were pursued under this grant. The first was a visitor program to conduct research on numerical algorithms for MIMD computers. The program is summarized in the following attachments.

Attachment A - List of Researchers Supported

Attachment B - List of Reports Completed

Attachment C - Reports

The second activity was a workshop on the Control of Fluid Dynamic Systems held on March 28-29, 1989. The workshop is summarized in attachments.

Attachment D - Workshop Summary

Attachment E - List of Workshop Participants

Attachment A

List of Researchers Supported

Loyce Adams - University of Washington

Mark Jones - Duke University

David Keyes - Yale University

Charles Koelbel - Purdue University

Richard Littlefield - University of Washington

Piyush Mehrotra - Purdue University

David Nicol - College of William and Mary

Merrell Patrick - Duke University

Terrence Pratt - University of Virginia

Joel Saltz - Yale University

Paul Saylor - University of Illinois

Attachment B

**Summary of Workshop on Control/Fluid
Dynamics Systems**

WORKSHOP ON CONTROL OF FLUID DYNAMIC SYSTEMS

There is a growing belief that developments in fluid dynamics, control theory and the computational sciences make it feasible to consider opportunities in the active control of fluid phenomena such as the transition to turbulence. Many problems still lie beyond present understanding and capability, but it seems appropriate to mount a research activity geared at exposing those problems on which some progress might be made and at illuminating those areas that require further development. To this end, ICASE organized a workshop held at the Radisson Hotel in Hampton, Virginia on March 28-29, 1988.

The participants of the workshop are listed in Appendix A and the Agenda is given in Appendix B. The initial lecture, given by J. McMichael, presented some areas of fluid dynamics that would benefit from active control. Three additional lectures were given presenting overviews of the state of the art in computational fluid dynamics, control of distributed parameter systems and the mathematical theory of the Navier-Stokes equations. Presentation material from these lectures is included in Appendix C.

Following discussion, three problems were identified for closer study: controlling the boundary between two fluids to enhance mixing, flutter suppression, and tangential blowing across a delta wing to affect leading edge separation. Workshop attendees were divided into three groups. Each group was asked to consider one of the problems and to lead a discussion when the workshop reconvened as a whole. Presentation material for these discussions is contained in Appendix D.

List of Workshop Participants

LIST OF ATTENDEES
WORKSHOP ON CONTROL OF FLUID DYNAMIC SYSTEMS
March 28-29, 1988

Professor H. T. Banks
Division of Applied Mathematics
Brown University
Providence, RI 02912

Professor J. A. Burns
Department of Mathematics
Virginia Polytechnic Institute and State University
Blacksburg, VA 24061

Professor Po Chow
Department of Mathematics
Wayne State University
Detroit, MI 48202

Professor E. M. Cliff
ICAM
Aerospace and Ocean Engineering Department
VPI & SU
Blacksburg, VA 24061

Dr. James M. Crowley
AFOSR/NM
Bolling Air Force Base
Washington, DC 20332

Professor C. Foias
Department of Mathematics
University of Indiana
Bloomington, IN 47405

Professor Chihming Ho
Department of Aerospace Engineering
University of Southern California
Los Angeles, CA 90089

Dr. M. Y. Hussaini
ICASE
Mail Stop 132C
NASA Langley Research Center
Hampton, VA 23665

Professor Antony Jameson
Department of Mechanical
and Aerospace Engineering
Engineering Quadrangle
Princeton University
Princeton, NJ 08540

Professor Art Krener
Department of Mathematics
University of California - Davis
Davis, CA 95616

Dr. L. Maestrello
Mail Stop 359
NASA Langley Research Center
Hampton, VA 23665

Dr. James McMichael
AFOSR/NM
Bldg. 410
Bolling AFB, DC 20032

Professor W. C. Reynolds
Department of Mechanical Engineering
Stanford University
Stanford, CA 94305

Professor R. Temam
University de Paris-Sud
Laboratoire d'Analyse Numerique
Bâtiment 425
91405 Orsay
FRANCE

Dr. L. Valavani
Department of Aeronautics and Astronautics
Massachusetts Institute of Technology
Cambridge, MA 02139

Dr. Robert G. Voigt
