SUMMARY TABLES

Table 1. Summary of aircraft departures, enplaned revenued passengers, and enplaned revenue tons of cargo and mail by type of operation, by type of service, by carrier group, and by air carrier 1-1

Table 2. Summary of aircraft departures, enplaned passengers, and enplaned revenue tons of cargo and mail by type of operation, by type of service, by state and country 2-1

Table 3. Aircraft departures, enplaned revenue passengers,and enplaned revenue tons of cargo and mail in total operations, all services at large air traffic hubs 3-1

Table 4. Aircraft departures, enplaned revenue passengers,and enplaned revenue tons of cargo and mail in total operations, all services at medium air traffic hubs 4-1

Table 5. Aircraft departures, enplaned revenue passengers, and enplaned revenue tons of cargo and mail in total operations, all services at small air traffic hubs 5-1

DETAILED TABLES

Table 6. Enplaned revenue passengers, enplaned tons of cargo and mail, and air traffic hub classifications, by type of service, by community,and by carrier 6-1

Table 7. Aircraft departures scheduled and aircraft departures performed, by type of operation by aircraft type, by community, and by carrier 7-1

Air Traffic Hubs

December 31, 1989

FAA8-10.AirTrafficLoc

INTRODUCTION

This edition presents the volume of revenue passenger, freight, express, and mail traffic handled by the Nation's large certificated route air carriers at each airport served by these airlines during the 12 months ending December 31,1989 In addition, a presentation of aircraft departures is shown including detail by aircraft type for total departures performed in scheduled, nonscheduled, and all services.

Large certificated route air carriers hold Certificates of Public Convenience and Necessity issued by the Department of Transportation (DOT) authorizing the performance of scheduled air transportation. Large certificated air carriers operate aircraft with seating capacity of more than 60 seats or a maximum payload capacity of more than 18,000 pounds. Data for charter only, commuter, intra-state, and foreign-flag air carriers are not included in this publication.

SOURCE OF DATA

The data in this publication are compiled from information reported quarterly to the DOT by the certificated route air carriers on Schedule T-3 (a)(b)(c), RSPA Form 41, Uniform Systems of Accounts and Reports for Large Certificated Air Carriers.

PRESENTATION OF DATA

The data in this publication are presented in seven tables. The first two tables contain summary data by type of operation and type of service for carrier groups and individual air carriers and summary figures by area, state, and country. Tables 3,4, and 5 show activity in air carrier system operations at large, medium, and small air traffic hubs. The last two tables in the publication present detailed statistics by community and airport. In addition, the last table has a presentation of total aircraft departures performed by specific aircraft type. In this table, an asterisk printed to the left of the aircraft designation denotes that the statistics shown relate to all cargo service.

In Tables 6 and 7, each community is listed under the state in which it is located without regard to the location of the airport. Cincinnati, Ohio, for example, is shown under Ohio although the Greater Cincinnati Airport is located in Covington, Kentucky. An exception to this policy occurs in those cases where hyphenated point shown in a current Certificate of Public Convenience and Necessity or, in the case of domestic points, shown in such a certificate at the time of the passage of Airline Deregulation Act (October 24, 1978), is serviced by a single airport and a state line separates the communities named. In those cases the data are listed under the state in which the airport serving the communities is located For example, Quincy, Illinois/Hannibal, Missouri, is a hyphenated point. Since the airport is located in Quincy, Illinois, the data for both communities are shown under that city and state. In this publication, some community groupings have been made in accordance with the Federal Aviation Administrations's concept of the air traffic hub structure. In this regard, single certificated points or hyphenated points that are in a Standard Metropolitan Statistical Area (SMSA) are listed under the SMSA regardless of the way the DOT certificate is written, or, for most domestic points, the way the Civil Aeronautics Board certificate listed the point on October 24, 1978. (See AIR TRAFFIC HUBS.)

To facilitate the location of hyphenated and combined points, there is a list at the end of this section (page vii) which cross references the cities so certificated or, in the case of domestic points, as they were listed in a civil Aeronautics Board certificate on October 24, 1978.

CRITERIA FOR INCLUSION OF DATA

Data are included for only those on-line airports reported on Schedule T-3 at which aircraft departures were performed in scheduled service. Data for airports that are off-line for the reporting carrier are excluded. These criteria of inclusion or exclusion are applied individually to each of the four quarterly reports comprising the source of these data.

REPORTING CARRIERS

Aerial Transit	American	Conner	Hawaiian	Pacific Interstate	Trans World
Air America	American Trans	Continental	Horizon Air	Pan American	Trump
Air Transport	Amerijet	Delta	MGM Grand	Piedmont	US Air
Air Wisconsin	Arrow	Eastern	Markair	Presidential	United
Alaska	Aspen	Emerald	Midway	Reeve	Westair
Aloha	Braniff	Federal Express	Midwest Express	Rosenbalm	Zantop
American West	Challenge	Flying Tiger	Northern Air	Southwest	
			Northwest	Tower	

AIR TRAFFIC HUBS

DEFINITION

The air traffic structure was developed by the Federal Aviation Administration and is used to measure the concentration of all civil air traffic The hub structure is Federal Aviation Administration's (FAA) principal operations control and the fundamental control for most of the FAA's economic and operations research procedure. Within this one medium are consolidated the social and economic factors that influence a community's ability to generate air carrier or general aviation traffic.

Air traffic hubs are geographical areas, and are based on the percentage of total passengers enplaned in the area. A hub may have more than one airport in it. This definition of hub should not be confused with the definition being used by the airlines in describing their 'hub and spoke' route structures.

These geographical areas are the cities and Standard Metropolitan Statistical areas (SMSA) requiring aviation services. An SMSA is a county that contains at least one city of 50,000 population, or twin cities with a combined population of at least 50,000, plus any contiguous counties that are metropolitan in character and have similar economic and social relationships These metropolitan areas constitute a primary focal point for the transportation research program of the FAA, and the analyses of individual cities within an area are treated in relationship to the entire area. In those instances where two or more individually certificated communities are located in a SMSA, those communities are grouped under the SMSA definition throughout this publication.

CLASSIFICATION

Individual communities fall into four hub classifications as determined by each community's percentage of the total enplaned revenue passengers all services and all operations of U.S.certificated route air carrier within the 50 States, the District of Columbia, and other U.S. areas designated by the Federal Aviation Administration. Table 6 contains the type of hub for each community; 'L' (large), 'M' (medium), 'S' (small), and 'N'(nonhub). Classifications in this issue are based on 429,654,602 total enplaned revenue passengers.

The percentage and number of enplaned passengers in the hub classifications for 12 months ending December 31, 1989 are:

Hub Classification	Percent of total enplaned passengers	Number of enplaned passengers
Large (L)	1.00 or more	4,296,546 or more
Medium (M)	0.25 to 0.9999	1,074,137 to 4,296,546
Small (S)	0.05 to 0.249	214,827 to 1,074,137
Nonhub (N)	Less than 0.05	Less than 214,827

HUB RESULTS

During 1989 there were 125 air traffic hubs representing 25% of the 498 air traffic hubs and nonhubs in the 50 States, the District of Columbia, and other U.S. areas receiving air carrier service during the year. The dominance of the hubs in air traffic patterns is brought out by the fact that 98% of passenger enplanements were recorded at these 125 hubs The table below shows the number of hubs/nonhubs and the number of airports in those hubs. It also shows the number and percentage of passenger enplanements at the hubs/nonhubs.

Hub Classification	Number of Hubs/ nonhubs	Number of Airport	Enplaned Number	Passengers Percent
Large	28	53	313,779,281	73.03
Medium	34	39	76,097,543	17.71
Small	63	63	30,032,059	6.99
Nonhub	373	381	9,745,719	2.27
TOTALS	498	544	429,654,602	100.00

GENERAL NOTES

CARRIER DATA MISSING

The publication does not include complete yearly data for the following list of carriers. The period of data missing and the reason for the missing data are indicated.

Carrier	Entity	Number of Missing Quarters	Reason
Braniff	Domestic, Latin America	1	suspended service
Federal Express	Latin America	2	began reporting
Flying Tiger	DOM.,ATL.,LAT.,PAC.	1	sold
Piedmont	DOM.,ATL.,LAT.	1	sold
Presidential	Domestic	1	suspended service
Trump Shuttle	Domestic	2	began reporting
USAir	Alantic, Latin	3	began reporting

CHANGES IN REPORTING

Effective 1/1/75, the carriers began to report off-line activity in addition to on-line activity. On-line is defined as the point(s) a carrier is authorized to serve, while offline is everything else. This additional reporting requirement, which basically affects the nonscheduled reporting, will have no material effect on the statistics reported in this publication, since it only includes statistics for the on-line points.

In certain cases it has been a practice of carriers to reflect certain technical stops and diversions associated with scheduled service as an on-line operations. In such cases operations to these points will be reflected in the publication, whereas when such service is reported as off-line, it is excluded.

CITY CROSS REFERENCE LIST

Cities not listed in alphabetic order or not specifically noted	Included in:
Anaheim, CA	Los Angeles/Burbank/Long Beach/Orange County
Ann Arbor, MI	Detroit & Ann Arbor
Arcata, CA	Eureka/Arcata
Ashland, KY	Ashland/Hungtington (Under West Virginia)
Ashland, WI	Ironwood/Ashland (Under Michigan)
Auburn, ME	Lewiston/Aubum
Barre, VT	Montpelier/Barre
Battle Creek, MI	Kalamazoo/Battle Creek
Bay City, MI	Saginaw/Bay City/Midland
Beaufort, NC	New Bern/Morehead City/Beaufort
Bethlehem, PA	Allentown/Bethlehem/Easton
Biloxi, MS	Gulfport/Biloxi
Bluefield, WV	Princeton/Bluefield
Bonn, Germany	Cologne/Dusseldorf/Bonn

GLOSSARY

aircraft departure. An aircraft takeoff made at an airport.

aircraft departures ruled. The total number of departures scheduled to be made at an airport as set forth in the air carriers' published schedules.

aircraft type. A distinctive model of an aircraft as designated by the manufacturer.

airport. A landing area regularly used by aircraft for receiving or discharging passengers or cargo.

air traffic hub. Air traffic hubs are not airports; they are the cities and Standard Metropolitan Statistical Areas requiring aviation services. Communities fall into four classes as determined by each community's percentage of the total enplaned passengers in scheduled and nonscheduled service of the domestic certificated route air carriers in the 50 States, the District of Columbia, and other U.S. areas designed by the Federal Aviation Administration. Tables 3,4, and 5 contain the type of hub for each community; 'L' (large), 'M' (medium), 'S' (small), and 'N' (non-hub).

all services. The total of scheduled and nonscheduled transport services.

carrier group. A grouping of large certificated air carriers determined by annual operating revenues as shown below:

Carrier Group	Annunal Operating Revenues
Majors	over one billion dollars
Nationals	100 million to one billion dollars
Large regionals	10 to 100 million dollars
Medium regionals	up to 10 million dollars

Certificate of Public Convenience and Necessity. A certificate issued to an air carrier under Section 401 of the Federal Aviation Act by Department of Transportation (DOT) authorizing the carrier to engage in air transportation.

certificated. Holding a currently valid Certificate of Public Convenience of Necessity.

certificated route air carrier. An air carrier holding a Certificate of Public Convenience and Necessity issued by DOT to conduct scheduled services. Nonscheduled or charter operations may also be conducted by these carriers.

community. A city, group of cities, or a Standard Metropolitan Statistical Area receiving scheduled air service by a certificated route air carrier.

departure. See 'aircraft departure'.

domestic operations. In general, operations within and between the 50 States of the United States, the District of Columbia, American Samoa, Caroline Islands, Guam Island, Johnston Island, Marianna Islands, Midway Island, Puerto Rico, U.S. Virgin Islands and Wake Island. In addition, any Canadian operations conducted on the domestic route segments of the U.S. air carriers are shown as domestic operations.

enplaned passengers. The total number of revenue passengers boarding aircraft.

enplaned revenue tons of freight, express, U.S. mail, and foreign mail. The number of revenue tons of freight, express, U.S. and foreign mail loaded on an aircraft including originating and transfer tons. The tons of cargo and mail on aircraft entering a carrier's system on interchange flights are considered as enplanements at the interchange point and cargo and mail tons moving from one operation to another operation of the same carrier for which separate reports are required (reporting entity) are considered as enplaning at the junction point.

GLOSSARY—Continued

express. Originally, express referred, to the priority movement, of parcel shipments moving on aircraft in conjunction with an agreement between the various air carriers and REA Express, Inc. Following the cessation of operations by REA Express, Inc., in 1976, this term refers to the replacement services offered by the various air carriers.

flight, extra section. A flight, conducted as an integral part of scheduled service, that has not been provided for in published schedules and is required for transportation of traffic that cannot be accommodated on a regularly scheduled flight.

foreign mail. Mail transported from a point outside of the United States by U.S.-flag carriers for a foreign government.

freight. Property transport by air.(Excludes mail, express,and passenger baggage.)

hub type. See 'air traffic hub'.

hyphenated point. Basically two or more neighboring communities which, in terms of authorization shown in a carrier's Certificate of Public Convenience and Necessity, are treated as a single community.

international operations. In general, operations outside territory of the United States, including operations between the United States and foreign countries.

large air traffic hub. A community enplaning 1.00 percent or more of the total enplaned passengers in all services and all operations for all communities within the 50 States, the District of Columbia, and other U.S. areas designated by the Federal Aviation Administration. Also see 'air traffic hub'.

large regionals. See 'carrier group'.

majors. See 'carrier group'.

medium air traffic hub. A community enplaning from 0.25 to 0.99 percent of the total enplaned passengers in all services and all operations for all communities within the 50 States, the District of Columbia, and other U.S. areas designated by the Federal Aviation Administration. Also see 'air traffic hub'.

medium regionals. See 'carrier group'.

national. See 'carrier group'.

nonhub. A community enplaning less than 0.05 percent of the total enplaned passengers in all services and all operations all communities within the 50 States, and District of Columbia, and other U.S. areas designated by the Federal Aviation Administration. Also see 'air traffic hub'.

nonpriorty U.S. mail. Mail transported by air on a space available basis.

nonscheduled service. Revenue flights that are not operated in regularly scheduled service such as charter flights.

off-line airport. Installations maintained, or facilities used, by a certificated route air carrier for other than scheduled certificated air services.

on-line airport. Installations maintained, or facilities used, by a certificated route air carrier in conducting scheduled service

other U.S. areas. Areas under U.S. jurisdiction, other than the 50 States and the District of Columbia, that are designated the Federal Aviation Admmistration to be included in the base for air traffic hub classification computations.

percent of departures scheduled. The percent of the aircraft departures scheduled that were actually completed (performed) by the air carriers.

percent of enplanements. The percent that a community's enplaned passengers is of the total enplaned passengers in all services and all operations for all communities within the 50 States, the District Columbia, and other U.S. areas designated by the Federal Aviation Administration. Also see 'air traffic hub'.

piston aircraft. An aircraft fitted with engines in which pistons, moving back and forth, work upon a crankshaft or other device to create rotational movement.

priority U.S. mail. Mail transported by air on a priority basis, includes air mail, and may include first class mail.

reporting entity. An operating division or segment of the air carrier, for which separate traffic reports are required to be filed

revenue. Pertaining to transport activities for which remuneration is received by the carrier.

revenue passenger. Person receiving air transportation from an air carrier for which remuneration is received by the carrier. Air carrier employees or other receiving air transportation against whom token service charges are levied are considered nonrevenue passengers. Infants for whom a token fare is charged are not counted as passengers.

scheduled aircraft departures completed. The total number of aircraft departures actually performed pursuant to published schedules at each airport. Scheduled departures performed do not include departures of flights operated as extra sections to scheduled flights.

scheduled service. Transport service operated over an air carrier's certificated routes, based on published flight schedules, including extra sections.

small air traffic hub. A community enplaning from 0.05 to 0.24 percent of the total enplaned passengers in all services and all operations for all communities within the 50 States, the District of Columbia, and other U.S. areas designated by the Federal Aviation Administration. Also see 'air traffic hub'.

standard metropolitan statistical area. A county that contains at least one city of 50,000 population, or twin cities with a combined population of at least 50,000, plus any contiguous counties that are metropolitan in character and have similar economic and social relationships.

total cargo and mail. The total number of enplaned revenue tons of freight, express, U.S. mail, and foreign mail.

total departures performed in all services. The total number of aircraft takeoffs made in scheduled and nonscheduled service.

total departures performed in nonscheduled service. The total number of aircraft takeoffs made in nonscheduled service.

total departures performed in scheduled service. The total number of aircraft takeoffs made in scheduled service including extra sections.

total U.S. mail. The total number of enplaned revenue tons of priority and nonpriority U.S. mail.

turbofan aircraft. Aircraft propelled by a turbojet engine whose thrust has been increased by the addition of a low-pressure compressor (fan). The turbofan engine can have an oversized low-pressure compressor at the front with part of the flow by-passing the rest of the engine (front-fan or forward-fan) or it can have a separate fan driven by a turbine stage (air-fan).

turbojet aircraft. Aircraft propelled by jet engines incorporating a turbine-driven air compressor to take in and compress the air for the combustion of fuel, the gases of combustion (or the heated air) being used both to rotate the turbine and to create a thrust-producing Jet.

turboprop aircraft. Aircraft in which the main propulsive force is supplied by a conventional propeller driven by a gas turbine. Additional propulsive force may be supplied from the discharged turbine exhaust gas.

turboshaft helicopter. A helicopter powered by one or more gas turbine engines. type of operation. Airport activity in domestic, international or total (system) operations. type of service. Airport activity in scheduled, nonscheduled, or all services.

Note: The terms in this Glossary are defined as they pertain to this publication.

TABLE 1

Summary of Aircraft Departures, Enplaned Revenue Passengers, and Enplaned Revenue Tons of Cargo and Mail By Type of Operation, By Type of Service, By Carrier Group, and By air Carrier

12 Months Ended December 31, 1989
