This publication has been prepared at the request of the Technical Information Panel of AGARD.

91 5 08 013

The Mission of AGARD

According to its Charter, the mission of AGARD is to bring together the leading personalities of the NATO nations in the fields of science and technology relating to aerospace for the following purposes:

- Recommending effective ways for the member nations to use their research and development capabilities for the common benefit of the NATO community;
- Providing scientific and technical advice and assistance to the Military Committee in the field of aerospace research and development (with particular regard to its military application);
- Continuously stimulating advances in the aerospace sciences relevant to strengthening the common defence posture;
- Improving the co-operation among member nations in aerospace research and development;
- Exchange of scientific and technical information,
- Providing assistance to member nations for the purpose of increasing their scientific and technical potential;
- Rendering scientific and technical assistance, as requested, to other NATO bodies and to member nations in connection with research and development problems in the aerospace field.

The highest authority within AGARD is the National Delegates Board consisting of officially appointed senior representatives from each member nation. The mission of AGARD is carried out through the Panels which are composed of experts appointed by the National Delegates, the Consultant and Exchange Programme and the Aerospace Applications Studies Programme. The results of AGARD work are reported to the member nations and the NATO Authorities through the AGARD series of publications of which this is one.

Participation in AGARD activities is by invitation only and is normally limited to citizens of the NATO nations.

The content of this publication has been reproduced
directly from material supplied by AGARD or the authors.

Preface

The first edition of this Guide was issued in 1987. This revised edition contains additional entries and corrections to previous entries. The first edition should now be destroyed and replaced by the present volume.

The introduction to the first edition, which indicates the purpose of this Guide and its limitations, follows.

Technical reports have long been a prominent means of communication of scientific and technical information. Technical reports are often called progress reports, technical notes, scientific reports, and research reports, and they generally present the results of scientific research, often before it might appear in technical journals. Unlike much other scientific literature, however, technical reports are often produced specifically to satisfy accountability requirements from a contracting or granting agency, and they are not always freely available to the public. As a result, bibliographic control of technical reports is often complex, resulting in an inability to retrieve relevant reports.

Report literature from the aerospace and defence communities is found in many bibliographic sources, though no one source is comprehensive and many sources overlap in their coverage. In addition, much aerospace and defence literature is classified for reasons of security or privacy and therefore appears only in bibliographic literature of classified materials. This Guide represents an effort to make available a single tool for retrieving report literature from the aerospace and defence communities of NATO countries.

The AGARD Technical Information Panel (AGARD/TIP) has for several years recognized the need for a guide to aerospace and defence technical report series to assist information seekers in member nations in the identification and acquisition of report literature. This Guide includes technical report series codes representing aerospace and defence technical reports of government agencies and contractors.

This Guide is limited to technical reports series issued by NATO member countries and their contractors. All AGARD countries were invited to participate. The following countries are included: Belgium, Canada, Denmark, Germany, France, Greece, The Netherlands, Norway, Portugal, Spain, United Kingdom and United States. A separate section is devoted to International Organizations.

The technical report series included in the Guide meet all the following criteria: (1) report series currently published; (2) report series published by governments, contractors, research laboratories, or universities of NATO member countries; and (3) report series concerned with research and development in the fields of aerospace and defence.

In the main body of the Guide, the technical report series codes are arranged by country. Each citation includes a technical report series code, a title (if available), name and address of producing organization, availability of report (if provided), type of organization, and any other helpful information that was provided by the respondent.

Two indexes are included in the Guide: They are an alphabetical index of all the technical report series codes included in the Guide; and an alphabetical index by country. Names of producing organizations are included in both indexes.

Every effort has been made to make this Guide as comprehensive and accurate as possible; however, it was limited by the number of respondents and the quality and accuracy of their submissions Additions or revisions to the Guide will be appreciated and should be sent to:

Préface

La première édition de ce guide a été publiée en 1987. La présente édition révisée contient de nouvelles entrées et des corrections à certaines entrées précédentes. La première édition doit maintenant être détruite, pour etre remplacée par le présent volume. L'introduction à la première édition, qui traite de l'objet du guide et de ses limitations, est reproduite ci-dessous.

Depuis fort longtemps, les rapports techniques ont été le premier moyen de communication des informations scientifiques et techniques. Les rapports techniques sont parfois appelés rapport d'avancement, note technique, rapport scientifique, ou bien rapport de recherche, et, en général, ils présentent les résultats de la recherche scientifique, bien souvent avant qu'ils ne paraissent dans les revues scientifiques. Cependant, à la différence de la majorité de la littérature scientifique, les rapports techniques sont souvent établis pour répondre à des besoins de suivi exprimés par des organismes commanditaires et ils ne sont pas toujours accessibles au public. Par conséquent, le contrôle bibliographique des rapports techniques s'avère souvent complexe; il se peut même que certains rapports soient introvables.

Les rapports publiés dans le secteur défense et aérospatial sont cités dans plusieurs sources bibliographiques, mais aucune de ces sources n'est exhaustive et il y a beaucoup de redondance dans les informations présentées. En outre, une bonne partie de la littérature défense et aérospatiale est classifiée pour des raisons de sécurité ou de confidentialité et ne paraît donc que dans la littérature bibliographique classifiée. Ce guide est le résultat d'un effort visant à regrouper en un seul document les sources de rapports établis par les communautés défense et aérospatiale des pays membres de l'OTAN

Le Panel de l'Information technique de l'AGARD (AGARD/TIP) a reconnu, depuis un certain nombre d'années, la nécessité d'un guide des collections de rapports techniques aérospatial et défense pour assister les demandeurs d'information dans les pays membres de l'OTAN en ce qui concerne l'identification et l'acquisition des rapports. Ce guide comprend des codes de collections de rapports techniques représentant les rapports techniques secteur défense et aérospatial émis par les organismes et les services officiels et leurs contractants.

Le guide se limite aux rapports techniques émis par les pays membres de l'OTAN et par leurs contractants. Tous les pays représentés à l'AGARD ont été invités à participer a la rédaction du guide Ont effectivement participé: la Belgique, le Canada, le Danemark, l'Allemagne, la France, la Grèce, les Pays-Bas, la Norvège, le Portugal, l'Espagne, le Royaume-Uni et les Etats-Unis: une section distincte est consacrée aux organisations internationales.

Les collections de rapports techniques qui figurent dans le guide répondent aux tous les critères suivants: (1) actuellement disponibles; (2) éditées par des gouvernements, des contractants, des laboratoires de recherche ou des universités des pays membres de l'OTAN; (3) portant sur la recherche et les réalisations dans les secteurs de l'aérospatial et défense.

Les codes des séries de rapports techniques sont classés par pays dans la partie principale du guide. Chaque entrée comprend le code de la collection de rapports, le titre (le cas échéant) le nom et l'adresse de l'organisme émetteur, des éventuelles indications sur la disponibilité du rapport, le type d'organisme, et tout autre renseignement fourni par la personne interrogée.

Le guide comporte deux index; un index alphabétique de tous les codes des collections de rapports techniques qui figurent dans le guide et un index alphabétique par pays. Les noms des organismes émetteurs sont indiqués dans les deux index

Tous les efforts ont été faits pour que le guide soit aussi complet et exact que possible. Cependant, ceci a été nécessairement fonction du nombre de personnes qui ont répondu, ainsi que de la qualité et de la précision de leurs réponses. Toute proposition de révision ou d'adjonction au guide sera appréciée et devrait être adressée a:

How to Use the Guide

The Guide is divided into two sections that are described below:

- A main body — in which the countries are arranged alphabetically. Within each country the entries are arranged in alphabetical order by organization.
- Indexes — One index includes a complete alphabetical listing of all of the technical report series codes (with their producing organizations) in the Guide, and a second index includes an alphabetical listing of the technical report series codes (with their producing organizations) by country.

Each entry is represented in a standard form illustrated below:

* * *

Mode d'Emploi du Guide

Le guide comprend deux sections, à savoir:

- La partie principale — où les pays sont classées par ordre alphabétique. Les entrées pour chaque pays sont classées par ordre alphabétique d'organisme.
- Les index — L'un des index comprend un listing alphabetique complet de tous les codes des collections de rapports techniques dans le guide (avec indication de l'organisme émetteur), ainsi qu'un listage alphabétique des codes des collections de rapports techniques classés par pays (avec indication de l'organisme émetteur).

Chaque entrée est presentée comme suit:

AC/243-TR	Technical Report	1 2 5

AC/243-TN	Technical Notice	1 3 5
AC/243-TP	Technical Proceedings	1 4 5

Notes:
1 All 3 document types are also issued under more specific group references, for example "AC/243(Panel 3)TR". Currently the following groups exist: Panel 1, Panel 3, Panel 4, Panel 7, Panel 8, Panel 9, Panel 10, Panel 11, CCD, HYDRO, LTSS (the LTSS is a special series for the reports from the Long-Term Scientific Studies conducted by Panel 1 of the DRG)
2 Major technical reports from the DRG, its Panels and its RSG's
3 Other technical information from the DRG
4 Conference Proceedings from DRG Seminars, Symposia and Workshops
5 Available from the national DRG Document Centre

14. Abstract

A guide to technical reports series relating to aerospace and defence research and development currently published by governments, contractors, research laboratories or universities in NATO member countries. The Guide lists reports series from Belgium, Canada, Denmark, Germany, France, Greece, The Netherlands, Norway, Portugal, Spain, United Kingdom and United States and international organisations. Information given includes a technical report series code, a title (where available), name and address of the organisation producing the series, availability (where known), type of organisation and other helpful information provided by the producers. Two indexes are provided. an overall one by number, and one by number within country.

This Guide, a revised edition of one published in 1987, was sponsored by the Technical Information Panel of AGARD.

SUBJECT: Evaluation of the Guide

I am pleased to send you a copy of the revised AGARD Technical Report Series Guide. The Technical Information Panel of AGARD, the sponsors of this Guide, intends to carry out a survey to determine how it is used (and how frequently), its functions, its value to you, and the improvements that are desirable. The Panel plans to conduct this survey approximately six months from now. To help them get the best results from the survey, will you please note how you use this Guide during the next six months as well as any improvement you would wish to see in a future edition.

Thank you for your assistance.

DIFFUSION DES PUBLICATIONS AGARD NON CLASSIFIEES

L'AGARD ne détient pas de stocks de ses publications, dans un but de distribution générale à l'adresse ci-dessus. La diffusion initiale des publications de l'AGARD est effectuée auprès des pays membres de cette organisation par l'intermédiaire des Centres Nationaux de Distribution suivants. A l'exception des Etats-Unis, ces centres disposent parfois d'exemplaires additionnels, dans les cas contraire, on peut se procurer ces exemplaires sous forme de microfiches ou de microcopies auprès des Agences de Vente dont la liste suit.

Les demandes de microfiches ou de photocopies de documents AGARD (y compris les demandes faites auprès du NTIS) doivent comporter la dénomination AGARD, ainsi que le numéro de série de l'AGARD (par exemple AGARD-AG-315). Des informations analogues, telles que le titre et la date de publication sont souhaitables. Veuillez noter qu'il y a lieu de spécifier AGARD-R-nnn et AGARD-AR-nnn lors de la commande de rapports AGARD et des rapports consultatifs AGARD respectivement. Des références bibliographiques complètes ainsi que des résumés des publications AGARD figurent dans les journaux suivants:

Scientifique and Technical Aerospace Reports (STAR)
publié par la NASA Scientific and Technical
Information Division
NASA Headquarters (NTT)
Washington D.C. 20546
Etats-Unis

Government Reports Announcements and Index (GRA&I)
publié par le National Technical Information Service
Springfield
Virginia 22161
Etats-Unis

(accessible également en mode interactif dans la base de données bibliographiques en ligne du NTIS, et sur CD-ROM)
