13. ABSTRACT (Maximum 200 words) The purpose of the Navy Personnel Survey was to gather timely information on issues of importance to policy makers. In October 1990, the questionnaire was mailed to 23,906 officers and enlisted personnel; 11,809 were completed and returned for an adjusted return rate of 52 percent. Respondents were asked to provide demographic data and to indicate their attitudes or opinions on rotation/permanent change of station (PCS) moves, recruiting duty, pay and benefits, training and education programs, quality of life, organizational climate, and Acquired Immune Deficiency Syndrome (AIDS) education. Analyses were based on data which were weighted to correct for under- or oversampling of subpopulations; thus, inferences may be made to the Navy population.

FOREWORD

The Navy Personnel Survey System (NPSS) was established to obtain, in a systematic and timely manner, the attitudes and opinions of Navy life from Navy civilians and military personnel. The information is used by managers and policy makers to evaluate programs in the areas of recruiting, training, retention, quality of life, etc. Another function of NPSS is to manage Navy personnel surveys which will reduce intrusion on Navy commands and reduce data collection costs.

The mainstay of NPSS is the annual Navy Personnel Survey. This survey annually collects attitude and opinion data on issues having an important impact on the military experience of Navy personnel.

This work was conducted under the sponsorship of the Chief of Naval Personnel (OP-01/PERS-00), reimbursable work unit 981WRB1007.

Any questions regarding these graphs should be directed to E. P. Somer, Director, Evaluation and Survey Research Division, (619) 553-9248 or AUTOVON 553-9248.

INTRODUCTION

Problem

The attitudes and opinions of Navy personnel are a vital input to the development and continuous improvement of Navy policies and programs. It is therefore essential that such information be gathered in a systematic fashion, which accurately reflects the views of its diverse and widespread membership.

Purpose

The annual Navy Personnel Survey (NPS) will collect timely information on issues of importance to policy makers. The annual sampling, representative of the entire Navy population, will allow the identification and analysis of trends in opinions and attitudes towards plans, programs and policies which materially affect the performance and morale of Navy members. The survey is also designed to accommodate the study of topics of compelling interest on a one-time only basis.

This volume provides graphical representations of the responses of enlisted personnel to the 1990 NPS.

Approach

NPS questionnaires were mailed to 23,906 officers and enlisted in October 1990; 11,809 were completed and returned for an adjusted return rate of 52 percent.

The survey requested demographic information and measured military members attitudes and opinions in various areas, including rotation/permanent change of station moves, recruiting duty, pay and benefits, training and education programs, quality of life, organizational climate, and Acquired Immune Deficiency Syndrome (AIDS) education.

The results of the survey are described in five volumes: Volumes 1 and 2 contain the cross-tabulation tables for enlisted personnel and officers, respectively; and Volumes 3 and 4 contain the graphical representations of the data for enlisted and officer members, respectively. Volume 5 details the survey methodology, results and conclusions. The tables and graphs are based on weighted data, where the weighting of responses represents an adjustment for undersampling or oversampling of subpopulations. Separate weighting schemes were employed for officers and enlisted personnel. For the purposes of the analyses, officers were assigned to one of three groups: (1) Warrant Officers, W-2 to W-4; (2) Officers, O-1E to O-3E and O-1 to O-3; and (3) Officers, O-4 to O-6.

Enlisted personnel were grouped according to paygrade: (1) E-2 to E-3; (2) E-4 to E-6; and (3) E-7 to E-9. Individuals in paygrade E-1 at the time of the survey were not included.

Organization

The graphs in this report are arranged in order of the appearance of the corresponding items on the 1990 NPS enlisted personnel survey questionnaire. A copy of the questionnaire appears in the Appendix.

Note that the report contains additional graphs, broken out by gender, for the items concerning sexual harassment. For items 142 and 143, it should be noted that the percentages are based on the group that includes only those persons who indicated that they had been sexually harassed, and explicitly excludes persons who stated they were not harassed. Item 141 provides data for the total sample.

Also note that, for items allowing the respondent to select a "Does not apply" option, the graphs illustrate the percentages for only those persons who selected one of the other options.

Margin of Error

These graphs are intended to describe the percentages of (weighted) subgroups selecting each option. Since small sample sizes yield unstable results, possibly leading to erroneous conclusions, caution must be used in any interpretations based upon small sample sizes. Tabulated results are approximately accurate to within the margins of error displayed in Table 1. For example, percentages displayed in the graphs for paygrades E-2 through E-3 are likely to be within ± 03 percent of the corresponding value for all Navy E-2 through E-3 personnel. For additional information, see Volume 5 in the series.

Table 1
Margin of Error for Paygrade Group

Paygrade	Percentage Error ^a	Paygrade	Percentage Error
E-2 through E-3	± 03	W-2 through W-4	± 06
E-4 through E-6	± 01	O-1 through O-3	± 02
E-7 through E-9	± 03	O-4 through O-6	± 02
