SURVEY OF CURRENT BUSINESS

91-16060

UNITED STATES DEPARTMENT OF COMMERCE
ECONOMICS AND STATISTICS ADMINISTRATION / BUREAU OF ECONOMIC ANALYSIS

SURVEY OF CURRENT BUSINESS

U.S. Department of Commerce

Robert A. Mosbacher / *Secretary*

Economics and Statistics Administration

Michael R. Darby / *Under Secretary for
Economic Affairs and Administrator*

Bureau of Economic Analysis

Allan H. Young / *Director*

Carol S. Carson / *Deputy Director*

Editor-in-Chief: Douglas R. Fox

Managing Editor: Leland L. Scott

Publication Staff: W. Ronnie Foster,
M. Gretchen Gibson, Eric B. Manning,
Donald J. Parschalk

SURVEY OF CURRENT BUSINESS. Published monthly by the Bureau of Economic Analysis of the U.S. Department of Commerce. Editorial correspondence should be addressed to the Editor-in-Chief, SURVEY OF CURRENT BUSINESS, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230.

Annual subscription: *Second-class mail*—\$29.00 domestic, \$36.25 foreign; *first-class mail*—\$76.00. Single copy—\$8.00 domestic, \$10.00 foreign.

Mail subscription orders and address changes to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Make checks payable to the Superintendent of Documents.

Second-class postage paid at Washington, DC and at additional mailing offices. (USPS 337-790).

The Secretary of Commerce has determined that the publication of this periodical is necessary in the transaction of the public business required by law of this Department.

Inside back cover: BEA Information

NOTE.—This issue of the SURVEY went to the printer on November 6, 1991.

It incorporates data from the following monthly BEA news releases:

Gross National Product (Oct. 29),
Personal Income and Outlays (Oct. 30), and
Composite Indexes of Leading, Coincident, and Lagging
Indicators (Nov. 1).

the BUSINESS SITUATION

ECONOMIC conditions as reflected in the national income and product accounts (NIPA's) showed improvement in the third quarter of 1991: Real GNP increased 2.4 percent after decreasing 0.5 percent in the second quarter, and real gross domestic purchases increased 4.4 percent after increasing 1.4 percent (chart 1).¹ The (fixed-weighted) price index for gross domestic purchases increased 2.2 percent after increasing 2.4 percent.

One-third of the increase in real GNP was accounted for by motor vehicle output, which increased substantially in the third quarter but not as much as in the second. Autos accounted for most of the third-quarter increase in motor vehicle output; trucks accounted for most of the second-quarter increase. (Auto output in constant dollars is presented in table 1.18 of the "Selected NIPA Tables," and truck output, in table 1.20.)

NOTE.—This article was prepared by Daniel Larkins and Ralph W. Morris

1. The regularly featured estimate of real GNP is based on 1982 weights. An alternative estimate of real GNP growth based on more current weights can be calculated using the change in the chain price index, which is published in table 8.1 of the "Selected NIPA Tables." This alternative measure increased 2.1 percent in the third quarter after increasing 0.7 percent in the second.

Among the major components of GNP, personal consumption expenditures, nonresidential fixed investment, and residential investment increased more than in the second quarter, and inventory investment (that is, change in business inventories) increased after a second-quarter decrease. In the third quarter, the increases in these components were partly offset by drops in net exports and in government purchases.

Prices

The fixed-weighted price index for gross domestic purchases increased 2.2 percent in the third quarter, about the same as in the second quarter (table 1). Food and energy prices held down the increase in both quarters; prices of gross domestic purchases less food and energy, which may be viewed as measuring the underlying inflation rate in the U.S. economy, increased 3.3 percent in both quarters (chart 2). The fixed-weighted price index for GNP slowed to a 2.1-percent increase in the third quarter from a 3.1-percent increase in the second.

Export prices, which are included in the price index for GNP but not in the index for gross domestic purchases, decreased slightly in the third quarter

91-10-1

Looking Ahead...

• **National Income and Product Accounts Revision.** Revised estimates of the national income and product accounts for years and quarters beginning in 1959 will be released on December 4, 1991. Estimates for selected tables, along with a brief summary of the revisions, will be presented in the November SURVEY. The complete set of tables with estimates for 1987–90 and an article describing the revision will appear in the December SURVEY. A two-volume publication containing the complete set of tables for 1929–87 will be available in early 1992. See the article beginning on page 20 for a description of the new and redesigned tables that will be introduced for the revised estimates.

• **Gross State Product.** Revised estimates for 1977 through 1986 and estimates for 1987, 1988, and 1989 will be presented in the December SURVEY. These estimates will be consistent with the revised gross product originating by industry series presented in the January 1991 and the April 1991 issues of the SURVEY.

the BUSINESS SITUATION

ECONOMIC conditions as reflected in the national income and product accounts (NIPA's) showed improvement in the third quarter of 1991: Real GNP increased 2.4 percent after decreasing 0.5 percent in the second quarter, and real gross domestic purchases increased 4.4 percent after increasing 1.4 percent (chart 1).¹ The (fixed-weighted) price index for gross domestic purchases increased 2.2 percent after increasing 2.4 percent.

One-third of the increase in real GNP was accounted for by motor vehicle output, which increased substantially in the third quarter but not as much as in the second. Autos accounted for most of the third-quarter increase in motor vehicle output; trucks accounted for most of the second-quarter increase. (Auto output in constant dollars is presented in table 1.18 of the "Selected NIPA Tables," and truck output, in table 1.20.)

NOTE.—This article was prepared by Daniel Larkins and Ralph W. Morris.

1. The regularly featured estimate of real GNP is based on 1982 weights. An alternative estimate of real GNP growth based on more current weights can be calculated using the change in the chain price index, which is published in table 8.1 of the "Selected NIPA Tables." This alternative measure increased 2.1 percent in the third quarter after increasing 0.7 percent in the second.

Among the major components of GNP, personal consumption expenditures, nonresidential fixed investment, and residential investment increased more than in the second quarter, and inventory investment (that is, change in business inventories) increased after a second-quarter decrease. In the third quarter, the increases in these components were partly offset by drops in net exports and in government purchases.

Prices

The fixed-weighted price index for gross domestic purchases increased 2.2 percent in the third quarter, about the same as in the second quarter (table 1). Food and energy prices held down the increase in both quarters; prices of gross domestic purchases less food and energy, which may be viewed as measuring the underlying inflation rate in the U.S. economy, increased 3.3 percent in both quarters (chart 2). The fixed-weighted price index for GNP slowed to a 2.1-percent increase in the third quarter from a 3.1-percent increase in the second.

Export prices, which are included in the price index for GNP but not in the index for gross domestic purchases, decreased slightly in the third quarter

Looking Ahead...

• **National Income and Product Accounts Revision.** Revised estimates of the national income and product accounts for years and quarters beginning in 1959 will be released on December 4, 1991. Estimates for selected tables, along with a brief summary of the revisions, will be presented in the November SURVEY. The complete set of tables with estimates for 1987–90 and an article describing the revision will appear in the December SURVEY. A two-volume publication containing the complete set of tables for 1929–87 will be available in early 1992. See the article beginning on page 20 for a description of the new and redesigned tables that will be introduced for the revised estimates.

• **Gross State Product.** Revised estimates for 1977 through 1986 and estimates for 1987, 1988, and 1989 will be presented in the December SURVEY. These estimates will be consistent with the revised gross product originating by industry series presented in the January 1991 and the April 1991 issues of the SURVEY.

decreased \$1.9 billion after increasing \$3.8 billion; the decrease reflected lower market prices.

Wage and salary disbursements increased \$29.3 billion in the third quarter, a little less than in the second. In manufacturing, wages and salaries increased more than in the second quarter, reflecting a step-up in average weekly hours and an upswing in employment. In the service and distributive industries and in Government, wages and salaries increased less in the third quarter than in the second.

Personal interest income decreased \$4.9 billion after decreasing \$7.7 billion; the decreases reflected lower interest rates.

Disposable personal income (DPI) increased \$39.6 billion, or 4.0 percent, in the third quarter after increasing \$46.8 billion, or 4.7 percent, in the second; real DPI slowed less, to 2.0

percent from 2.3 percent, reflecting a deceleration in the deflator for personal consumption expenditures.

A larger increase in personal outlays than in current-dollar DPI led to

a \$12.5 billion decrease in personal saving in the third quarter. The personal saving rate dropped 0.4 percentage point to 3.8 percent after holding steady at 4.2 percent for four consecutive quarters.

NOTE.—Quarterly estimates in the national income and product accounts are expressed at seasonally adjusted annual rates, and quarterly changes are differences between these rates. Quarter-to-quarter percent changes are annualized. Real, or constant-dollar, estimates are expressed in 1982 dollars. The advance GNP estimate for the third quarter is based on the following major source data, some of which are subject to revision. (The number of months for which data were available is shown in parentheses.)

Personal consumption expenditures. Sales of retail stores (3), and unit auto and truck sales (3);

Nonresidential fixed investment: Unit auto and truck sales (3), construction put in place (2), manufacturers' shipments of machinery and equipment (3), and exports and imports of machinery and equipment (2);

Residential investment: Construction put in place (2), and housing starts (3);

Change in business inventories: Manufacturing and trade inventories (2), and unit auto inventories (3);

Net exports of goods and services. Merchandise exports and merchandise imports (2),

Government purchases of goods and services. Federal outlays (2), and State and local construction put in place (2);

GNP prices. Consumer Price Index (3), Producer Price Index (3), nonpetroleum merchandise export and import price indexes (3), and values and quantities of petroleum imports (2).

Non-durable goods ³	12.4	14.4	14.0	14.7	14.6	13.8	14.6	14.1
Addenda:								
Exports of agricultural products ⁴	41.5	40.4	41.3	38.9	37.4	39.3	37.8	39.2
Exports of nonagricultural products	328.5	357.6	353.7	354.5	371.7	371.3	387.1	382.3
Imports of nonpetroleum products	430.0	480.4	435.5	445.3	445.6	428.3	432.6	447.4

1. Estimates beginning with the first quarter of 1986 exclude repairs and alterations of equipment, which was reclassified to services other than factor income.

2. Beginning with 1987, reexports—that is, exports of foreign merchandise—are assigned to end-use categories in the same manner as exports of domestic merchandise. For earlier periods, all reexports are included in the "other" categories.

3. Because no data are available to distribute exports and imports of "other" merchandise between durable and non-durable goods prior to 1986, or to distribute imports of "other" merchandise for all time periods, estimates were distributed equally.

4. Includes parts of line 2 and line 5.

NOTE.—Beginning with 1985, the definitions of the end-use categories have been changed. For a description of the new definitions, see the technical notes in "U.S. International Transactions, First Quarter 1985," SURVEY OF CURRENT BUSINESS 68 (June 1985): 34-39 and 57.

Exports of agricultural products ⁴	39.6	40.1	39.9	38.6	38.3	39.5	36.8	39.3
Exports of nonagricultural products	351.2	383.8	378.5	382.4	395.5	401.9	418.9	420.7
Imports of nonpetroleum products	405.5	421.5	418.3	425.5	425.1	414.0	429.6	452.4

1. Estimates beginning with the first quarter of 1986 exclude repairs and alterations of equipment, which was reclassified to services other than factor income.

2. Beginning with 1987, reexports—that is, exports of foreign merchandise—are assigned to end-use categories in the same manner as exports of domestic merchandise. For earlier periods, all reexports are included in the "other" categories.

3. Because no data are available to distribute exports and imports of "other" merchandise between durable and non-durable goods prior to 1986, or to distribute imports of "other" merchandise for all time periods, estimates were distributed equally.

4. Includes parts of line 2 and line 5.

NOTE.—Beginning with 1985, the definitions of the end-use categories have been changed. For a description of the new definitions, see the technical notes in "U.S. International Transactions, First Quarter 1985," SURVEY OF CURRENT BUSINESS 68 (June 1985): 34-39 and 57.

1. The inventory valuation adjustment (IVA) shown in this table differs from the IVA that adjusts business incomes. The IVA in this table reflects the mix of methods (first-in, first-out; last-in, first-out; etc.) underlying book value inventories derived primarily from Census Bureau statistics. This mix differs from that underlying business income derived primarily from Internal Revenue Service statistics.

Nonfarm inventories to final sales of goods and structures	4.49	4.55	4.52	4.48	4.41	4.40		

1. Inventories are as of the end of the quarter. The quarter-to-quarter change in inventories calculated from current dollar inventories in this 90ble is not the current dollar change in business inventories (CBI) component of GNP. The former is the difference between two inventory stocks, each valued at their respective end-of-quarter prices. The latter is the change in the physical volume of inventories valued at average prices of the quarter. In addition, changes calculated from this 90ble are at quarterly rates, whereas CBI is stated at annual rates.

2. Quarterly totals at monthly rates. Business final sales equals final sales less gross product of households and institutions, government, and rest of the world, and includes a small amount of final sales by farms.

1 Percent changes for 1986 and the first quarter of 1986 reflect discontinuities in the series.

NOTE.—The fixed-weighted price index and the chain price index, both of which are weighted averages of the detailed prices used in the deflation of GNP, are measures of price change. In calculating changes in these indexes, the composition of GNP is held constant. Consequently these changes reflect only changes in prices. The fixed-weighted price index measures price change over any period, using as weights the composition of GNP in 1982. The chain price index measures price change between two consecutive periods, using as weights

the composition of GNP in the first period. The implicit price deflator is a byproduct of the deflation of GNP. It is derived as the ratio of current to constant-dollar GNP (multiplied by 100). It is the average of the detailed prices used in the deflation of GNP, but the prices are weighted by the composition of GNP in each period. Consequently, the implicit price deflator reflects not only changes in prices but also changes in the composition of GNP, and its use as a measure of price change should be avoided.

A Preview of the Comprehensive Revision of the National Income and Product Accounts: New and Redesigned Tables

IN December, the Bureau of Economic Analysis (BEA) will release the results of a comprehensive—that is, benchmark—revision of the national income and product accounts (NIPA's). This revision is the ninth of its kind; the last such revision was released in December 1985.

Comprehensive revisions differ from annual NIPA revisions because of the scope of the changes incorporated and because of the number of years subject to revision. Comprehensive revisions incorporate three kinds of changes: Definitional and classificational changes, statistical changes, and new and redesigned tables.

Definitional and classificational changes update the accounts to reflect the evolving U.S. economy; they are usually made in a comprehensive revision so that the estimates can be revised back to produce consistent time series. In the upcoming comprehensive revision, the definitional and classificational changes will mainly represent efforts to deal with the effects of the changing nature of government programs, the increasing importance of international transactions, and the nature of business incomes and expenses as they affect current production.

Statistical changes update the estimates to reflect the incorporation of newly available and revised data from regularly used sources and new methodologies—that is, new source data and new estimating procedures. In the upcoming revision, data will be incorporated from sources such as the 1982 benchmark input-output tables, the 1987 Economic Censuses, and several annual surveys for 1989 and 1990; several new methodologies will be introduced to cope with difficult measurement problems and to reflect changes in the availability and quality of source data. In addition, the base period for the calculation of constant-dollar estimates and of the associated

price indexes will be shifted from 1982 to 1987, and the industry distributions of GNP and its components for 1987 forward will be shifted from the 1972 to the 1987 Standard Industrial Classification.

New and redesigned tables update the presentation of the NIPA's to reflect the definitional, classificational, and statistical changes and to make the tables more informative. In the upcoming revision, the most important changes will entail a focus on gross domestic product (GDP), the appropriate measure of U.S. production for many types of analysis, and the presentation of alternatives to the standard constant-dollar measures and related fixed-weighted price indexes.

This article describes the new and redesigned tables that will update the presentation of the NIPA's. An article in last month's SURVEY OF CURRENT BUSINESS described the definitional and classificational changes that will be incorporated in the revision.¹ Subsequent articles will discuss statistical changes and other aspects of the revision.

Table 1 provides a complete list of the revised set of NIPA tables arranged according to the new table numbers. The table cross-references the new table numbers with the old ones, identifies the new tables, and shows, at the end of the list, the presently published

tables that will be deleted. The last column in table 1 identifies the major changes to each table. These changes result from the focus on GDP, the introduction of alternatives to the standard constant-dollar measures and related price indexes, the definitional and classificational changes, and the incorporation of the 1987 Standard Industrial Classification (SIC).

The focus on GDP

As announced in the August 1991 SURVEY, GDP will replace GNP as the featured aggregate in most NIPA tables, with the components of these tables adjusted accordingly.² The focus on GDP will affect the five summary accounts of the NIPA's, as shown in table 2.³ The effects on the first of these accounts, the national income and product—or production—account are the following.

- GDP replaces GNP as the sum of expenditures (the product side of the account) and of incomes (the income side of the account).
- On the product side, net exports of goods and services is redefined to exclude net receipts of factor income from the rest of the world. (This change also affects account 4, the foreign transactions account.)
- On the income side, net receipts of factor income is added as a negative entry to convert GNP to GDP.

Table 1 identifies the NIPA tables in which GDP will replace GNP as the production aggregate and the components affected by the replacement. Two of the most important changes relate to net exports of goods and services and to final sales. As previously noted, net ex-

1. See Robert P. Parker, "A Preview of the Comprehensive Revision of the National Income and Product Accounts: Definitional and Classificational Changes," SURVEY OF CURRENT BUSINESS 71 (September 1991): 23-31.

Availability of Redesigned Tables

The information provided in this article describes the major effects of the redesign of the NIPA tables in the upcoming benchmark revision. To obtain a complete set of the redesigned tables in hard copy or machine-readable form (magnetic tape or diskette), write to National Income and Wealth Division (BE-54), Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230, or call (202) 523-0669.

2. For a discussion of the differences between GNP and GDP, see "Gross Domestic Product as a Measure of U.S. Production," SURVEY 71 (August 1991): 8.

3. For a discussion of the present accounts, see Allan H. Young and Helen Stone Tye, "An Introduction to National Economic Accounting," SURVEY 65 (March 1985): 69-70.

NOTE.—Virginia Mannering and Heather Quick provided assistance in compiling the table changes; Getty Mumford provided secretarial assistance.

ports of goods and services is redefined to exclude net receipts of factor incomes. (Exports is redefined to exclude receipts of factor income, and imports is redefined to exclude payments of factor income.) Final sales is now defined as the final sales of national product, or GNP less change in business inventories; it will be replaced by final sales of domestic product, or GDP less change in business inventories.

Alternative measures of constant-dollar estimates and related price indexes

Another important feature of the upcoming revision will be the introduction of quantity and price indexes that represent alternatives to the standard constant-dollar measures and related fixed-weighted price indexes. BEA has selected as alternatives two types of indexes, both of which are based on the Fisher ideal index formula and were among the alternatives discussed in an April 1989 SURVEY article.⁴ One of the alternatives is a chain-type index that will use as weights the composition of output for the preceding and current years. The other alternative index will use as weights the composition of output for benchmark years. An article in the January 1992 SURVEY will describe the alternative measures in more detail and provide estimates for 1959 to the third quarter of 1991; estimates for the fourth quarter will be provided in the February SURVEY.

In the redesigned tables, the alternative quantity and price indexes will be presented using the format shown below. This format also includes, for the first time in the NIPA tables, the presentation of the current- and constant-dollar measures as indexes (on a base of 1987=100) to facilitate comparisons with the alternative measures. Alternative quantity and price indexes will be shown for GDP and its major expenditure components (table 7.1), for measures of final sales and purchases (table 7.2), and for GNP (table 7.3).

Definitional and classificational changes

Many of the NIPA tables will be revised and some new ones added as a result of the definitional and classificational changes that will be incorporated in the upcoming revision. For example, the change that redefines government sales and personal nontaxes results in the deletion of the reclassified nontaxes from the table that shows personal nontaxes (table 3.4), the addition of this detail to a new table that shows government sales (table 3.9), and changes in the presentation of certain components of personal consumption expenditures (tables 2.4-2.7). Some of the definitional and classificational changes will not affect the structure of the NIPA tables. An example is the change that recognized personal injury trusts, which will affect only the estimates for existing components.

The effects of several definitional and classificational changes are also evident in the revised summary accounts shown in table 2. On the income side of the national income and product account, recording nonresident taxes as transfers results in a new type of business transfer payment—payments to the rest of the world (line 19). In the personal income and outlay account, "interest paid by persons" replaces "interest paid by consumers to business" to reflect the recognition of interest paid by persons to government (lines 4 and 17). In the foreign transactions account, the reclassification of interest paid by the Federal Government to foreigners results in the deletion of the line "interest paid by government to foreigners" in the present accounts; this interest will be included in the new line on payments of factor income (line 4).

Incorporation of the 1987 SIC

In the upcoming revision, the industry distributions of GDP, national income, and their components will be shifted, beginning with estimates for 1987, from the 1972 SIC to the 1987 SIC because most of the NIPA source data has shifted to the 1987 SIC. Estimates for earlier years, which are now based on either the 1942 or 1972 SIC, will not be shifted because of a lack of adequate source data. Because the 1987 SIC created significant discontinuities at the level of industry detail used in the NIPA's, primarily in manufacturing and finance industries,

estimates for 1987 will be shown on the basis of both the 1972 and the 1987 SIC.⁵ In addition, the incorporation of the 1987 SIC resulted in changes in the names of several industries.

The industry distributions in most of the redesigned NIPA tables will be presented as follows: Estimates for 1929 to 1948, based on the 1942 SIC, will be shown in tables designated as part A; estimates for 1948 to 1987, based on the 1972 SIC, will be shown as part B; and estimates for 1987 forward, based on the 1987 SIC, will be shown as part C.⁶ Some series do not go back to 1929, tables presenting these series will have only a part A, based on the 1972 SIC, and a part B, based on the 1987 SIC. Footnotes to these tables have been added to clarify the A, B, and C designations for each table.

Series names

The names of several NIPA series will be changed. Because these changes affect many tables, they are not mentioned in table 1; instead, the new and old names for these series are listed below:

New series name	Old series name
Consumption of fixed capital	Capital consumption allowances with capital consumption adjustment
Government purchases	Government purchases of goods and services
Gross national income	Charges against gross national product
Government	Government and government enterprises
General government	Government

In addition, the term "foreigners" has been replaced by "rest of the world" or "nonresidents" in the names of many NIPA series. For example, "transfer payments to the rest of the world" replaces "transfer payments to foreigners (net)."

Tables 1 and 2 follow.

5. For a detailed presentation of the 1987 SIC revisions, see *Standard Industrial Classification Manual, 1987*, Executive Office of the President, Office of Management and Budget (Washington, DC: U.S. Government Printing Office, 1988).

6. Tables 5.10 to 5.13 show inventory estimates by SIC industry division beginning in 1946. Because the differences in the 1972 SIC and 1987 SIC are minor at the industry division level, the estimates for 1987 forward will be based only on the 1987 SIC.

Table 1.—Revised NIPA Tables

Table number ¹		Table title ²	Comments ³
New	Old		
1. Product and Income			
1.1	1.1	Gross Domestic Product (A, 1929; Q, 1946)	GDP replaces GNP. Net exports, exports, and imports of goods and services redefined to exclude receipts of factor income from the rest of the world and/or payments of factor income to the rest of the world.
1.2	1.2	Gross Domestic Product in Constant Dollars (A, 1929; Q, 1947)	Same as table 1.1.
1.3	1.3	Gross Domestic Product by Major Type of Product (A, 1929, Q, 1946)	GDP replaces GNP. Final sales of domestic product replaces final sales. Services redefined to exclude net receipts of factor income from the rest of world.
1.4	1.4	Gross Domestic Product by Major Type of Product in Constant Dollars (A, 1929; Q, 1947).	Same as table 1.3.
1.5	1.5	Relation of Gross Domestic Product, Gross Domestic Purchases, and Final Sales to Domestic Purchasers (A, 1929; Q, 1946).	GDP replaces GNP. Gross domestic purchases and final sales to domestic purchasers redefined to exclude net receipts of factor income from the rest of the world.
1.6	1.6	Relation of Gross Domestic Product, Gross Domestic Purchases, and Final Sales to Domestic Purchasers in Constant Dollars (A, 1929; Q, 1947).	Same as table 1.5.
1.7	1.7	Gross Domestic Product by Sector (A, 1929; Q, 1946)	GDP replaces GNP. Rest-of-the-world product (net receipts of factor income from the rest of the world) deleted.
1.8	1.8	Gross Domestic Product by Sector in Constant Dollars (A, 1929; Q, 1947).	Same as table 1.7.
1.9	1.9	Relation of Gross Domestic Product, Gross National Product, Net National Product, National Income, and Personal Income (A, 1929, Q, 1946).	GDP, receipts of factor income from the rest of the world, payments of factor income to the rest of the world, gross national income, net domestic product, and domestic income added. In GNP, business transfer payments redefined to include payments to rest-of-the-world and in personal income, business transfer payments to persons is a new title; both changes reflect recording of nonresident taxes as transfers.
1.10	1.10	Relation of Gross Domestic Product, Gross National Product, Net National Product, and National Income in Constant Dollars (A, 1929, Q, 1947).	GDP, receipts of factor income from the rest of the world, and payments of factor income to the rest of the world added.
1.11	1.11	Command-Basis Gross National Product in Constant Dollars (A, 1929; Q, 1947).	None.
1.12	1.12	Net Domestic Product and Domestic Income by Sector (A, 1929)	Net domestic product and domestic income replace net national product and national income. Rest-of-the-world net product and income (net receipts of factor income from the rest of the world) deleted.
1.13	1.13	Net Domestic Product and Domestic Income by Sector in Constant Dollars (A, 1929).	Same as table 1.12.
1.14	1.14	National Income by Type of Income (A, 1929; Q, 1946)	None.
1.15	1.15	National Income by Sector, Legal Form of Organization, and Type of Income (A, 1929).	Domestic income by type added in addenda.
1.16	1.16	Gross Domestic Product of Corporate Business in Current Dollars and Gross Domestic Product of Nonfinancial Corporate Business in Current and Constant Dollars (A, 1929; Q, 1946).	None.
2. Personal Income and Outlays			
2.1	2.1	Personal Income and Its Disposition (A, 1929; Q, 1946)	Interest paid by persons redefined to reflect recognition of interest paid by persons to government.
2.2	2.2	Personal Consumption Expenditures by Major Type of Product (A, 1946; Q, 1946).	None.
2.3	2.3	Personal Consumption Expenditures by Major Type of Product in Constant Dollars (A, 1947; Q, 1947).	None.
2.4	2.4	Personal Consumption Expenditures by Type of Expenditure (A, 1929)	Detail for hospitals by type of provider—nonprofit, proprietary, and government—added to reflect redefinition of government sales and personal nontaxes. Expenditures at nursing homes added. Expenditures for local mass transit consolidates local transit systems and railway (commutation).
2.5	—	Personal Consumption Expenditures by Type of Expenditure in Constant Dollars (A, 1929).	New table provides constant-dollar type-of-expenditures detail shown in table 2.4.
2.6	—	Personal Consumption Expenditures by Type of Product (A, 1929)	New table provides current-dollar type-of-product detail shown in table 2.7.
2.7	2.5	Personal Consumption Expenditures by Type of Product in Constant Dollars (A, 1929).	Detail for other nondurable goods, user-operated transportation, other personal business, and net foreign travel added.
2.8	2.6	Personal Income by Type of Income (A, 1959; M, 1959)	Estimates for 1946-58 available on request.
2.9	2.7	Personal Income and Its Disposition (A, 1959; M, 1959)	None.
2.10	2.8	Personal Consumption Expenditures by Major Type of Product (A, 1959; M, 1959).	None.
2.11	2.9	Personal Consumption Expenditures by Major Type of Product in Constant Dollars (A, 1959; M, 1959).	None.

Table 1.—Revised NIPA Tables—Continued

Table number ¹		Table title ²	Comments ³
New	Old		
3. Government Receipts and Expenditures			
3.1	3.1	Government Receipts and Expenditures (A, 1929)	None.
3.2	3.2	Federal Government Receipts and Expenditures (A, 1929; Q, 1946)	None.
3.3	3.3	State and Local Government Receipts and Expenditures (A, 1929; Q, 1946).	None.
3.4	3.4	Personal Tax and Nontax Receipts (A, 1929)	Nontax receipts from educational and medical charges deleted to reflect redefinition of government sales and personal nontaxes.
3.5	3.5	Indirect Business Tax and Nontax Accruals (A, 1929)	Detail for nontax receipts for royalties and for deposit insurance premiums added; the insurance premiums reflect classification of several deposit insurance agencies as general government.
3.6	3.6	Contributions for Social Insurance (A, 1929)	Contributions to the PBGC added to reflect its classification as general government.
3.7A	3.7A	Government Purchases by Type (A, 1929-71, Q, 1947-71)	Estimates for CCC inventory change added beginning in 1947.
3.7B	3.7B	Government Purchases by Type (A, 1972; Q, 1972)	None.
3.8A	3.8A	Government Purchases by Type in Constant Dollars (A, 1929-71; Q, 1947-72).	Same as table 3.7A.
3.8B	3.8B	Government Purchases by Type in Constant Dollars (A, 1972; Q, 1972).	None.
3.9A	—	Government Purchases Gross and Net of Sales by Type (A, 1929-71) ..	New table provides purchases gross and net of sales. Detail on State and local government shows educational and medical charges to reflect redefinition of government sales and personal taxes.
3.9B	—	Government Purchases Gross and Net of Sales by Type (A, 1972)	Same as table 3.9A.
3.10	3.9	National Defense Purchases (A, 1972; Q, 1972)	None.
3.11	3.10	National Defense Purchases in Constant Dollars (A, 1972; Q, 1972) ..	None.
3.12	3.11	Government Transfer Payments to Persons (A, 1929)	Payments by PBGC added to reflect its classification as general government.
3.13	3.12	Subsidies Less Current Surplus of Government Enterprises (A, 1960) ..	CCC deleted to reflect its classification as general government
3.14	3.13	Social Insurance Funds Receipts and Expenditures (A, 1929)	None.
3.15	3.14	Government Expenditures by Function (A, 1952)	None.
3.16	3.15	Federal Government Expenditures by Type and Function (A, 1952)	None.
3.17	3.16	State and Local Government Expenditures by Type and Function (A, 1952).	None.
3.18A	3.17A	Relation of Federal Government Receipts and Expenditures in the National Income and Product Accounts to the Consolidated Cash, Statement, Fiscal Years (A, 1952-67).	Adjustments and footnotes added to reflect recording of nonresident taxes as transfer payments and classification of deposit agencies as general government.
3.18B	3.17B	Relation of Federal Government Receipts and Expenditures in the National Income and Product Accounts to the Unified Budget, Fiscal Years (A, 1968).	Same as table 3.18A.
3.19	3.18	Relation of State and Local Government Receipts and Expenditures in the National Income and Product Accounts to Bureau of Census Government Finances Data, Fiscal Years (A, 1959).	Estimates for 1958 available on request. Capital gains, net of losses, of retirement systems shown separately beginning in 1985.
3.20	3.19	Relation of Commodity Credit Corporation Expenditures in the National Income and Product Accounts to Commodity Credit Corporation Outlays in the Unified Budget (A, 1960).	Enterprise surplus deleted and purchases redefined to reflect classification of CCC as general government.
4. Foreign Transactions			
4.1	4.1	Foreign Transactions in the National Income and Product Accounts (A, 1929; Q, 1946).	Exports and imports of goods and services redefined to exclude factor income receipts and payments; these receipts and payments shown separately. Business transfer payments to rest of the world added to reflect recording of nonresident taxes as transfer payments. Interest paid by government to foreigners deleted to reflect reclassification of these payments as factor income.
4.2	4.2	Exports and Imports of Goods and Services and Receipts and Payments of Factor Income in Constant Dollars (A, 1929, Q, 1947).	Exports and imports of goods and services redefined to exclude factor income receipts and payments, these receipts and payments shown separately.
4.3	4.3	Exports and Imports of Merchandise by End-Use Category (A, 1967, Q 1967).	Civilian aircraft and computers shown separately.
4.4	4.4	Exports and Imports of Merchandise by End-Use Category in Constant Dollars (A, 1967; Q, 1967).	Same as table 4.3.
4.5	4.5	Relation of Foreign Transactions in the National Income and Product Accounts (NIPA's) to the Corresponding Items in the Balance of Payments Accounts (BPA's) (A, 1946).	Adjustment for grossing factor income receipts and payments to include nonresident taxes and adjustment for grossing certain services and interest added to reflect NIPA definitional and classificational revisions. Adjustment for transfer of goods and services under military grant programs added to reflect classification change in the BPA's. Interest paid by government to foreigners deleted as separate line to reflect its NIPA reclassification as a factor income payment.

Table 1.—Revised NIPA Tables—Continued

Table number ¹		Table title ²	Comments ³
New	Old		
5. Saving and Investment			
5.1	5.1	Gross Saving and Investment (A, 1929; Q, 1946)	None.
5.2	5.2	Gross Private Domestic Investment, Consumption of Fixed Capital, and Net Private Domestic Investment by Major Type of Investment (A, 1929).	Nonfarm and farm residential structures consolidated to reflect loss of source data.
5.3	5.3	Gross Private Domestic Investment, Consumption of Fixed Capital, and Net Private Domestic Investment by Major Type of Investment in Constant Dollars (A, 1929).	Same as table 5.2.
5.4	5.12	Fixed Investment by Type (A, 1946; Q, 1946)	Nonresidential buildings redefined to include farm. Computers and peripheral equipment shown separately.
5.5	5.13	Fixed Investment by Type in Constant Dollars (A, 1947; Q, 1947)	Same as table 5.4.
5.6	5.4	Purchases of Structures by Type (A, 1929)	Nonfarm and farm residential permanent site structures and additions and alterations and major replacements consolidated to reflect loss of source data.
5.7	5.5	Purchases of Structures by Type in Constant Dollars (A, 1929)	Same as table 5.6.
5.8	5.6	Private Purchases of Producers' Durable Equipment by Type (A, 1929)	Computers and peripheral equipment shown separately.
5.9	5.7	Private Purchases of Producers' Durable Equipment by Type in Constant Dollars (A, 1929).	Same as table 5.8.
5.10	5.8	Change in Business Inventories by Industry (A, 1929, Q, 1946)	Footnotes identify redefinition of change in book value and change in SIC.
5.11	5.9	Change in Business Inventories by Industry in Constant Dollars (A, 1929; Q, 1947).	Footnote identifies change in SIC.
5.12	5.10	Inventories and Domestic Final Sales of Business by Industry (Q, 1946).	Same as table 5.11.
5.13	5.11	Inventories and Domestic Final Sales of Business by Industry in Constant Dollars (Q, 1947).	Same as table 5.11.
6. Income, Employment, and Product by Industry			
6.1	6.3	National Income Without Capital Consumption Adjustment by Industry (A, 1929; Q, 1948) ⁴ .	Quarterly estimates for 1945-47 available on request.
6.2	6.4	Compensation of Employees by Industry (A, 1929) ⁵	Receipts from and payments to rest of the world shown separately.
6.3	6.5	Wages and Salaries by Industry (A, 1929) ⁵	Same as table 6.2.
6.4	6.6	Full-Time and Part-Time Employees by Industry (A, 1929) ⁵	None.
6.5	6.7	Full-Time Equivalent Employees by Industry (A, 1929) ⁵	None.
6.6	6.8	Wages and Salaries Per Full-Time Equivalent Employee by Industry (A, 1929) ⁵ .	None.
6.7	6.9	Self-Employed Persons by Industry (A, 1929) ⁵	None.
6.8	6.10	Persons Engaged in Production by Industry (A, 1929) ⁵	None.
6.9	6.11	Hours Worked by Full-Time and Part-Time Employees by Industry (A, 1948) ⁶ .	None.
6.10	6.12	Employer Contributions for Social Insurance by Industry (A, 1948) ⁶	None.
6.11	6.13	Other Labor Income by Industry and by Type (A, 1948) ⁶	None.
6.12	6.14	Nonfarm Proprietors' Income by Industry (A, 1929) ⁵	Additional service industries shown separately beginning in 1948.
6.13	6.15	Noncorporate Capital Consumption Allowances by Industry (A, 1929) ⁷	Same as table 6.12.
6.14	6.16	Inventory Valuation Adjustment to Nonfarm Incomes by Legal Form of Organization and Industry (A, 1929) ⁷ .	None.
6.15	6.17	Net Interest by Industry (A, 1929) ⁷	None.
6.16	6.18	Corporate Profits by Industry (A, 1929; Q, 1948) ⁷	Quarterly estimates for 1946-47 available on request.
6.17	6.19	Corporate Profits Before Tax by Industry (A, 1929) ⁵	None.
6.18	6.20	Federal, State, and Local Corporate Profits Tax Liability by Industry (A, 1929) ⁷ .	None.
6.19	6.21	Corporate Profits After Tax by Industry (A, 1929) ⁷	None.
6.20	6.22	Net Corporate Dividend Payments by Industry (A, 1929) ⁷	None.
6.21	6.23	Undistributed Corporate Profits by Industry (A, 1929) ⁷	None.
6.22	6.24	Corporate Capital Consumption Allowances by Industry (A, 1929) ⁷	None.
6.23	6.1	Gross Domestic Product by Industry (A, 1948) ⁶	GDP replaces GNP. Rest-of-the-world product deleted. Estimates for 1947 will not be revised.
6.24	6.2	Gross Domestic Product by Industry in Constant Dollars (A, 1948) ⁶	Same as table 6.23.
7. Quantity and Price Indexes			
7.1	7.1, 7.4	Quantity and Price Indexes for Gross Domestic Product (A, 1929, Q, 1947).	Current- and constant-dollar indexes and alternative quantity and price indexes added. Fixed-weighted price indexes for PCE detail and final sales deleted.
7.2	7.3	Quantity and Price Indexes for Domestic Product, Final Sales, and Purchases (A, 1929; Q, 1947).	New presentation of quantity and price indexes used. GDP, final sales of domestic product, gross domestic purchases, and final sales of domestic purchasers replace corresponding national measures.
7.3	7.8	Quantity and Price Indexes for Gross National Product and Command Basis Gross National Product (A, 1929; Q, 1947).	New presentation of quantity and price indexes used for GNP.
7.4	7.9	Price Indexes for Personal Consumption Expenditures by Major Type of Product, Fixed 1987 Weights (A, 1929; Q, 1947).	Alternative price indexes for PCE added.
7.5	7.10	Price Indexes for Personal Consumption Expenditures by Major Type of Product, Fixed 1987 Weights (A, 1959; Q, 1959).	Alternative price indexes for PCE added. Same detail added as table 2.7
7.6	-	Price Indexes for Fixed Investment by Type, Fixed 1987 Weights (A, 1959; Q, 1959).	New table provides fixed-weighted price indexes for detail in table 5.4 and alternative price indexes for fixed investment.

Table 1.—Revised NIPA Tables—Continued

Table number ¹		Table title ²	Comments ³
New	Old		
7.7	7.12	Price Indexes for Purchases of Structures by Type, Fixed 1987 Weights (A, 1959).	Alternative price indexes for private nonresidential and residential structures added. Same detail deleted as table 5.6.
7.8	7.13	Price Indexes for Private Purchases of Producers' Durable Equipment by Type, Fixed 1987 Weights (A, 1959).	Alternative price indexes for private nonresidential PDE added. Same detail added as table 5.8.
7.9	7.14	Price Indexes for Exports and Imports of Goods and Services and for Receipts and Payments of Factor Income, Fixed 1987 Weights (A, 1929; Q, 1947).	Alternative price indexes for exports and imports of goods and services added.
7.10	7.15	Price Indexes for Exports and Imports of Merchandise by End-Use Category, Fixed 1987 Weights (A, 1967; Q, 1967).	Same detail added as table 4.3.
7.11	7.16	Price Indexes for Government Purchases by Type, Fixed 1987 Weights (A, 1972; Q, 1972).	Alternative price indexes for total government, Federal national defense, Federal nondefense, and State and local government purchases added.
7.12	7.17	Price Indexes for National Defense Purchases, Fixed 1987 Weights (A, 1972; Q, 1972).	Alternative price indexes for national defense purchases added.
7.13	7.7	Implicit Price Deflators for the Relation of Gross Domestic Product, Gross National Product, Net National Product, and National Income (A, 1929; Q, 1947).	None.
7.14	7.6	Implicit Price Deflators for Gross Domestic Product by Sector (A, 1929; Q, 1947).	GDP replaces GNP. Rest-of-the-world product deleted.
7.15	7.18	Current-Dollar Cost and Profit Per Unit of Constant-Dollar Gross Domestic Product of Nonfinancial Corporate Business (A, 1948; Q, 1948).	None.

8. Supplementary Tables

8.1	8.1	Percent Change From Preceding Period in Selected Series (A, 1930, Q, 1947).	Changes in alternative quantity and price indexes added. Changes in final sales of domestic purchases and in final sales to domestic purchasers replace corresponding national measures. Changes in GNP included in addenda. Changes in implicit price deflators and chain price indexes deleted. Changes in domestic business and nonfarm product business deleted.
8.2	8.2	Selected Per Capita Product and Income Series in Current and Constant Dollars and Population of the United States (A, 1929; Q, 1947).	GDP added. Quarterly data added.
8.3	1.17	Auto Output (A, 1947; Q, 1947)	None.
8.4	1.18	Auto Output in Constant Dollars (A, 1947; Q, 1947)	None.
8.5	1.19	Truck Output (A, 1967; Q, 1967)	None.
8.6	1.20	Truck Output in Constant Dollars (A, 1967; Q, 1967)	None.
8.7	1.21	Farm Sector Output, Gross Product, and National Income (A, 1929) ...	Cash receipts retitled to reflect reclassification of CCC commodity loans. Footnote to intermediate purchases deleted to reflect reclassification of bad debt losses.
8.8	1.22	Farm Sector Output, Gross Product, and National Income in Constant Dollars (A, 1929).	Same as table 8.7.
8.9	1.23	Housing Sector Output, Gross Product, and National Income (A, 1929)	Footnote to intermediate purchases deleted to reflect reclassification of bad debt losses.
8.10	1.24	Housing Sector Output, Gross Product, and National Income in Constant Dollars (A, 1929).	Same as table 8.9.
8.11	8.3	Consumption of Fixed Capital by Legal Form of Organization (A, 1929).	Detail for rental income of persons added.
8.12	8.4	Capital Consumption Adjustment by Legal Form of Organization and Type of Adjustment (A, 1929).	Detail for rental income of persons added.
8.13	—	Business Transfer Payments by Type (A, 1929)	New table provides breakdown of type of payment, taxes paid by U.S. residents to foreign governments shown separately to reflect their recording as transfers.
8.14	8.5	Supplements to Wages and Salaries by Type (A, 1948)	Employer contributions to PBGC added to pensions to reflect classification of PBGC as general government.
8.15	8.6	Rental Income of Persons by Type (A, 1946)	None.
8.16	8.7	Dividends Paid and Received by Sector (A, 1946)	Breakdown of dividends in national income reorganized by sector.
8.17	8.8	Interest Paid and Received by Sector and Legal Form of Organization (A, 1946).	Detail for monetary interest paid by other private business and for net interest paid by domestic business expanded. Derivation of personal interest revised to reflect recognition of interest paid by persons to government.
8.18	8.9	Imputations in the National Income and Product Accounts (A, 1929) ...	Employer contributions to group health and life insurance are added as specific imputations. Effect of imputation for employees' lodging correctly attributed to PCE housing services.
8.19	8.10	Relation of Consumption of Fixed Capital in the National Income and Product Accounts (NIPA's) to Depreciation and Amortization as Published by the Internal Revenue Service (IRS) (A, 1929).	Footnotes identify added adjustments for differences in definitions of investment (such as rental video cassettes and clothing), to reflect capitalization of monetary interest on own-account construction by public utilities, and to recognize capital consumption for abandoned nuclear power plants.
8.20	8.11	Relation of Nonfarm Proprietors' Income in the National Income and Product Accounts (NIPA's) to Corresponding Measures as Published by the Internal Revenue Service (IRS) (A, 1959).	Adjustment for misreporting on income tax returns shown separately.
8.21	8.12	Relation of Net Farm Income in the National Income and Product Accounts (NIPA's) to Net Farm Income as Published by the U.S. Department of Agriculture (USDA) (A, 1967).	Adjustment for bad debt expenses replaces defaulter's gain adjustment to reflect reclassification of bad debt losses.

Table 1.—Revised NIPA Tables—Continued

Table number: ¹		Table title ²	Comments ³
New	Old		
8 22	8 13	Relation of Corporate Profits, Taxes, and Dividends in the National Income and Product Accounts (NIPA's) to Corresponding Measures as Published by the Internal Revenue Service (IRS) (A, 1929).	For profits before taxes. Adjustment for misreporting on income tax returns shown separately; adjustment for bad debt expense replaces defaulter's gain and bad debt reserve adjustment to reflect reclassification of bad debt losses; footnote added to identify adjustment to reflect removal of capital gains from brokerage charges; and adjustment added for taxes paid to foreign governments to reflect recording of nonresident taxes.
8 23	—	Relation of Monetary Interest Paid and Received in the National Income and Product Accounts (NIPA's) to Corresponding Measures as Published by the Internal Revenue Service (IRS) (A, 1929).	New table provides relation of NIPA and IRS interest estimates.
8.24	8.14	Comparison of Personal Income in the National Income and Product Accounts (NIPA's) with Adjusted Gross Income as Published by the Internal Revenue Service (IRS) (A, 1947).	None.
9. Seasonally Unadjusted Estimates			
9.1	9 1	Gross Domestic Product (QUA, 1946)	GDP replaces GNP, which appears as addendum item.

Deleted Tables			
—	1.25	Gross National Product Originating in Government, Farm, and All Other Industries in Current and Constant Dollars (A, 1909-29).	Preparation of estimates suspended.
—	7 2	Fixed-Weighted Price Indexes for Gross National Product by Major Type of Product (A, 1959; Q, 1959).	Indexes for GNP and for domestic equivalent of final sales shown in tables 7.3 and 7.2. Indexes for types of products available on request.
—	7 5	Implicit Price Deflators for Gross National Product by Major Type of Product (A, 1929; Q, 1959).	Deflators for GNP and for domestic equivalent of final sales shown in tables 7.3 and 7.2. Deflators for types of products can be calculated from estimates in tables 1.3 and 1.4.
—	7 11	Implicit Price Deflators for Personal Consumption Expenditures (A, 1959; M, 1959).	Annual deflators shown in table 7.1. Monthly deflators can be calculated from estimates in tables 2.10 and 2.11.

1 Tables are listed according to the new numbers. Presently published tables to be deleted are listed at the end of the list.

2 The letters in parentheses indicate the frequency of the estimates, A, annual estimates, Q, seasonally adjusted quarterly estimates, QUA, quarterly estimates not seasonally adjusted, and M, monthly seasonally adjusted estimates. The year(s) associated with each letter indicates the beginning period for the estimates or, when expressed as a range of years, the period covered by the estimates. See footnotes 4-7 for the special presentation of tables in section 6.

3 The base period for the calculation of all constant dollar estimates and of associated price indexes will be shifted from 1982 to 1987. See text section on alternative measures for information on the new quantity and price indexes.

4 This table will appear in three parts. Part A will cover 1929-45 and will reflect the 1942 SIC, part B will cover 1946-87 and will reflect the 1972 SIC, and part C will cover 1987 forward and will reflect the 1987 SIC. See text for additional information.

5 This table will appear in three parts. Part A will cover 1929-48 and will reflect the 1942 SIC, part B will cover 1948-87 and will reflect the 1972 SIC, and part C will cover 1987 forward and will reflect the 1987 SIC. See text for additional information.

6 This table will appear in two parts. Part A will cover 1948-87 and will reflect the 1972 SIC, and part B will cover 1987 forward and will reflect the 1987 SIC. See text for additional information.

7 This table will appear in three parts. Part A will cover 1929-47 and will reflect the 1942 SIC, part B will cover 1948-87 and will reflect the 1972 SIC, and part C will cover 1987 forward and will reflect the 1987 SIC. See text for additional information.

U.S. Direct Investment Abroad: 1989 Benchmark Survey Results

THIS article presents preliminary estimates on the operations of nonbank U.S. multinational companies (MNC's) from the BEA 1989 benchmark survey of U.S. direct investment abroad (USDIA). The 1989 benchmark survey updates universe estimates based on data from BEA's annual sample surveys of USDIA for nonbenchmark years. Compared with the annual surveys, the benchmark survey gives a more complete view of U.S. MNC operations in two ways: (1) It collects data from the USDIA universe rather than from a sample of companies from which universe estimates are derived, and (2) it collects a wider range of data items.

The following are highlights from the 1989 survey.

- U.S. MNC's had worldwide assets of \$6,219 billion and sales of \$4,400 billion, and they employed 25.3 million workers in 1989.¹ U.S. parent companies accounted for about three-fourths, and their foreign affiliates for about one-fourth, of U.S.-MNC worldwide operations (table 1).

- U.S. parents' share of all U.S. business was much larger in manufacturing than in other industries. In manufacturing, U.S. parents accounted for 66 percent of the sales and for 55 percent of the employment by all U.S. businesses.² In all other industries combined, U.S. parents accounted for only one-tenth of all-U.S.-business employment.

- European affiliates accounted for the largest share of all affiliates' operations; they accounted for more than one-half of the assets and sales and for about two-fifths of the employment of all affiliates. Within Europe, affiliates' operations were largest in the United Kingdom. By industry, manufacturing affiliates accounted for the

largest share of all affiliates' operations, they accounted for more than one-half of the employment and sales and for more than one-third of the assets of all affiliates.

- Majority-owned foreign affiliates (MOFA's) accounted for about 80 percent of the operations of all nonbank foreign affiliates (table 2).³

- The most common motivation for U.S. direct investment abroad is to sell goods to unaffiliated customers in local markets. Sales of goods by MOFA's to unaffiliated customers in local markets were \$672 billion, or about two-thirds of total MOFA sales.

- MNC-associated U.S. exports were \$241.5 billion, 67 percent of all U.S. merchandise exports; MNC-associated U.S. imports were \$192.6 billion, 40 percent of all U.S. merchandise imports.⁴

- Expenditures for research and development (R&D) performed by U.S. parents were \$81.1 billion; these expenditures accounted for 85 percent of industrial R&D performed by all U.S. businesses.⁵ Expenditures for R&D performed by MOFA's were \$8.0 billion.

- In most host countries, MOFA's in manufacturing pay their production workers more per hour, on average, than do other manufacturing companies in those countries.

- MNC employment declined slightly from 26.1 million in 1977 to 25.3 million in 1989. Underlying slight declines in both parent and affiliate

* Less than 0.5 percent (±)

1. The 1989 estimates are not strictly comparable with the estimates covering 1983-88 because of a break in series resulting from improved coverage of the survey universe in 1989 (see text for further discussion).
MNC Multinational company

1 A U.S. multinational company (MNC) consists of a nonbank U.S. parent and its nonbank foreign affiliates. A U.S. parent is a U.S. person that owns or controls, directly or indirectly, 10 percent or more of the voting securities of an incorporated foreign business enterprise or an equivalent interest in an unincorporated foreign business enterprise. A foreign affiliate is a foreign business enterprise that is so owned or controlled.

2. The data on all-U.S.-business sales are from the Census Bureau's *Quarterly Financial Report for Manufacturing, Mining, and Trade Corporations*. The data on all-U.S.-business employment are from table 6 B of the "National Income and Product Accounts Tables" in the July 1990 issue of the *SURVEY OF CURRENT BUSINESS*.

3. MOFA's are foreign affiliates in which the combined direct and indirect ownership of all U.S. parents exceeds 50 percent

4 MNC-associated U.S. exports are the sum of goods shipped to foreign affiliates by all U.S. persons and goods shipped to other foreigners by U.S. parents. MNC-associated U.S. imports are the sum of goods shipped by foreign affiliates to all U.S. persons and goods shipped by other foreigners to U.S. parents.

5. This comparison is based on a preliminary estimate for 1989 of research and development expenditures for all U.S. businesses from the National Science Board, *Science and Engineering Indicators—1989* (Washington, DC: U.S. Government Printing Office, 1989).

employment were offsetting changes among industries, and, for affiliates, among areas. Declines in affiliate employment were particularly large in Europe, Canada, and Africa; increases were particularly large in Mexico and in most of the newly industrialized countries of the Pacific Rim.

The estimates presented in this article cover the financial structure and the overall operations of nonbank U.S. parents and their nonbank foreign affiliates. Data collected in the benchmark survey on banks and on transactions and positions between U.S. parents and their foreign affiliates will be available next fall, when final results of the benchmark survey are published.⁶

This article briefly reviews the changes in MNC operations in 1989, examines trends in MNC operations

in terms of employment for 1977-89, and discusses selected aspects of MNC operations in 1989. Finally, the coverage and methodology of the benchmark survey and changes in the presentation of results are discussed. In the following analysis, information from outside sources, mainly press reports, is used to supplement BEA's survey data.

Changes in MNC operations in 1989

The 1989 benchmark survey featured improvements in the coverage of the MNC universe. (For details on the improved coverage, see the section "Coverage and Methodology of the Benchmark Survey.") These improvements introduce an element of non-comparability between the 1989 estimates and the estimates for 1988 (and for 1983-87) that were based on annual surveys. The noncomparability is small for aggregate measures of MNC operations, but comparisons for individual countries or industries should be made with caution.

In 1989, three key aggregate measures of U.S. MNC operations—assets, sales, and employment—grew faster than they had on average during the previous 6 years. Excluding the effects of the improvements in coverage so as to place the 1989 estimates on a consis-

tent basis with earlier estimates, MNC assets increased 11 percent in 1989, compared with an 8-percent average annual rate of growth during 1982-88. MNC sales increased 9 percent, compared with a 3-percent average annual increase, and MNC employment increased 3 percent, compared with a very small decline. (Including the improvements in coverage, MNC assets increased 12 percent in 1989, sales increased 9 percent, and employment increased 5 percent. See tables 16-22 at the end of the article.)

Trends in MNC Employment, 1977-89

Of the three key measures of MNC operations that can be used to gauge trends in MNC operations, the change in assets and in sales differed markedly from that in employment from 1977 to 1989. Assets of U.S. MNCs grew at an average annual rate of 10 percent, worldwide sales grew 7 percent, and employment declined slightly. This section focuses on trends in employment because, unlike assets and sales, employment is not directly affected by changes in prices and exchange rates. The discussion covers employment trends from 1977

Table 2.—Employment by Majority-Owned Foreign Affiliates and Their Share of All Nonbank Foreign Affiliate Employment, by Area, 1989

	Number of employees (thousands)			Percent accounted for by majority-owned affiliates
	All affiliates	Majority-owned affiliates	Minority-owned affiliates	
All countries	6,621.4	5,111.4	1,510.0	77.2

International ¹	28.0	24.0	4.0	85.7
Addendum: European Communities (12) ²	2,539.7	2,137.5	352.2	86.1

1 "International" affiliates are those that have operations in more than one country and that are engaged in petroleum shipping, other water transportation, or operating movable oil- and gas-drilling equipment.

2 European Communities (12) comprises Belgium, Denmark, France, Germany (Federal Republic of), Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal, Spain and the United Kingdom.

Acknowledgments

BEA thanks the staffs of U.S. companies that responded to the 1989 benchmark survey for their efforts in completing and filing reports and for their cooperation with BEA during processing and review of the data.

The publication of the benchmark survey estimates in 17 months was a result of the efforts of the BEA staff listed below.

Jack J. Bame, Associate Director for International Economics, succeeded by J. Steven Landefeld, provided general guidance for the survey. Betty L. Barker, Chief, and R. David Belli, Assistant Chief, International Investment Division (IID), directed the design of the benchmark survey report forms, the conduct of the survey, and the analysis and publication of the results.

The Direct Investment Abroad Branch (DIAB) of IID, under the direction of Patricia C. Walker, was primarily responsible for conducting the survey. David H. Galler, Chief of the Annual and Benchmark Surveys Section of DIAB, supervised the editing and processing of the reports. He also designed the computer-edit checks and the forms and processing control systems.

The following former and current members of DIAB processed and edited the survey. Joan O. Adams, Margaret Buckley, Barbara S. Clark, Margo A. Collier, Emily D. Curry, Marcia S. Francis, David N. Hale, Jeanne Hicks, Lonnie Hunter, Deanna D. Ibarra, Christine J. Lee, Sherry Lee, Stephanie A. Lewis, Leila C. Morrison, Juanita L. Mortimer, John A. Munz, Pearl Rivers, Ronald L. Ross, William R. Shupe, Robert N. Smith, Dwayne Torney, and Diann L. Vann.

The Research Branch of IID, under the direction of Obie G. Whichard, assisted DIAB in reviewing the results for consistency and accuracy. The reviewers were Jeffrey H. Lowe and Raymond J. Mataloni, Jr. Arnold Gilbert of the Data Retrieval and Analysis Branch (DRAB) of IID also assisted in the review.

James T. Spalding, Chief, Programming and Analysis Branch of the Computer Systems and Services Division, coordinated the computer programming and data conversion and processing activities, which were performed by Douglas J. Klear, Elizabeth L. Shumate, Marguerite E. Ellis, Effie M. Eason, and Janice E. Townsend.

Marie Gott designed the computer programs for the integrated master file of U.S. direct investment abroad. Arnold Gilbert designed the programs for data estimation, final review of the data, suppression of the data for confidentiality reasons, and generation of the tables for publication. They were under the supervision of Smith W. Allnutt, Chief of DRAB.

Raymond J. Mataloni, Jr., prepared the tables for this article. Jeffrey H. Lowe designed the tables in the publication that presents more detailed data from the survey.

to 1989—both of which are benchmark years, when BEA surveys the entire universe of U.S. parents and foreign affiliates. In addition, considerable use is made of data from 1982, an intervening benchmark year.

MNC employment declined from 26.1 million in 1977 to 25.3 million in 1989.⁷ Worldwide economic recession in the early 1980's induced companies to bring costs in line with sluggish sales by reducing employment. After 1982, employment continued to decline through 1986 and then recovered to the 1982 level by 1989. A large decline in manufacturing, partly reflecting increases in productivity, more than accounted for the overall decline. In petroleum, a decline resulted from the shedding of labor-intensive nonpetroleum-related operations. Partly offsetting these declines were increases in all other major industries, especially in "services."⁸

U.S. parents

U.S. parent companies employed slightly fewer workers in 1989 than they did in 1977—18.7 million, compared with 18.9 million (table 3). Decreases in employment in manufacturing and petroleum were largely offset by increases in other industries, particularly in "services" (chart 4).

The small decline in employment by U.S. parents contrasts with a 33-percent increase in employment by all U.S. businesses since 1977. The different growth rates partly reflect a difference in industry mix between U.S. parents and all U.S. businesses. "Services," the fastest growing industry in terms of employment, accounted for a much larger share of all U.S.-business employment than of U.S. parent employment in 1989—30 percent, compared with 10 percent. In contrast, employment in manufacturing, one of the slowest growing in-

dustries in terms of employment, accounted for a much smaller share of all U.S.-business employment than of U.S. parent employment—21 percent, compared with 57 percent.

The decline in parent employment between 1977 and 1989 resulted largely from efforts to trim operations in response to macroeconomic and industry-specific changes. Weakness in domestic economic activity led to a decline in parent employment between 1977 and 1982. During those years, and also through 1989, many parents in petroleum and manufacturing retrenched. In petroleum, the decline in employment was related to falling crude oil prices in the early- to mid-1980's; in manufacturing, it was related to falling market share, which was lost to rising U.S. merchandise imports, and to the increasing capital-intensity of production. In addition, the large number of mergers and acquisitions involving U.S. parent companies caused employment to decline as duplicative jobs were eliminated.

Parents in integrated refining and extraction accounted for most of the overall decline in petroleum; their employment fell from 709,000 in 1977 to 478,000 in 1989. During the mid-1970's, some of the largest parents in this industry—bolstered by high profits, which provided an inexpensive source of funds—had diversified into other industries, such as retail trade and electronics manufacturing. Parent companies sought diversification partly to secure their long-term profitability, which was threatened by increased control of crude oil production and prices by oil-producing countries. A decade later, in 1984–86,

oil prices and parent-company profits fell sharply, which prompted some parent companies to sell their peripheral nonpetroleum businesses and to substantially reduce their technical and managerial personnel.

In manufacturing, parent employment fell from 11.8 million in 1977 to 10.1 million in 1989. Increased competition from foreign producers caused many parents to scale back operations and to increase efficiency by reducing technical and managerial staffs and by adopting labor-saving technologies.⁹ The decreases in employment were particularly large in primary metals (from 991,000 to 334,000), in textile products and apparel (from 668,000 to 322,000), and in motor vehicles and equipment (from 1.4 million to 1.0 million).

In contrast to the declines in petroleum and manufacturing, parent employment was higher in 1989 in "services," in finance (except banking), insurance, and real estate (FIRE), in transportation, and in wholesale trade. In "services," increases were notable in several consumer-oriented service industries; however, most of the overall increase occurred in "business services not elsewhere classified" (especially in personnel supply services). In FIRE, the most rapid growth occurred between 1977 and 1982 and was centered in insurance. For the remainder of the 1980's, employment in FIRE grew more slowly, as increases in nonbank finance were partly offset by decreases in insurance. In transportation, the increase resulted from the addition of some very large U.S. parents, mainly airlines, to the survey universe. (The addition of these parents' affiliates had a much smaller effect on affiliate employment because the affiliates accounted for only a small fraction of the parents' worldwide operations.) In wholesale trade, increases were widespread.

Foreign affiliates

Nonbank foreign affiliates employed 6.6 million workers in 1989, down from 7.2 million in 1977. Weakness in worldwide economic activity led to a decline in affiliate employment between 1977 and 1982. During those years, and also through 1986,

Percent Distribution by
Industry, 1977 and 1989

FIRE Finance except banking Insurance and Real Estate
U.S. Department of Commerce Bureau of Economic Analysis

7. The decline in MNC employment may be slightly overstated because of changes in the survey reporting requirements between 1977 and 1989. In 1977, data were collected for foreign affiliates (and their U.S. parents) whose assets, sales, or net income (positive or negative) were at least \$500,000. In 1982 and 1989, the exemption level was raised to \$3 million, therefore, a number of very small affiliates (and their parents) that were covered in the 1977 survey were not covered in the 1982 and 1989 surveys. However, because the data for these affiliates (and their parents) were very small, their exclusion from the 1982 and 1989 data does not significantly affect the comparability of the 1977 data with the 1982 and 1989 data.

8. Parents and affiliates are classified in "services" if their primary activities are characteristic of the "services" division of the Standard Industrial Classification. Examples of such activities include personal services and a wide variety of business, professional, and technical services.

9. For a detailed account of how automation and imports have affected employment in the U.S. textile, steel, and auto industries, see U.S. Department of Labor, Bureau of Labor Statistics, *The Impact of Technology on Labor in Four Industries*, Bulletin 2228 (Washington, DC: U.S. Government Printing Office, May 1985).

1. See footnote 1 to table 1.

some parent companies shed foreign affiliates in order to concentrate on their core domestic businesses, which were threatened by rising competition from foreign producers and by hostile takeovers. Some affiliates were sold in response to worsening host-country economic conditions, such as those caused by the burdensome increases in debt-service requirements of Latin American governments. In the case of South Africa, some affiliates were sold because of U.S. public sentiment against South Africa's social policies and because of U.S. legislation discouraging direct investment in that country. Also contributing to the 1977-86 decline in affiliate employment were increases in productivity due to the introduction of labor-saving technologies. After 1986, affiliate employment grew, reflecting renewed emphasis by U.S. parents on foreign operations. Manufacturers and providers of services were attracted by favorable conditions abroad, particularly prospects for greater European economic integration and for rapid economic growth in the Pacific Rim.

The decline in employment by foreign affiliates contrasts with increases in overall employment in some host countries. From 1977 to 1989, affiliate employment in OECD countries decreased 8 percent, while total employment in these countries grew 11 percent. The disparate growth rates may primarily reflect selloffs of foreign affiliates during 1977-82; after 1982, the growth rates of affiliate and OECD host country employment were similar.

By area.—The small decline in affiliate employment between 1977 and 1989 reflects offsetting changes among areas. The declines are concentrated in Europe, Canada, Africa, and South America, and the increases are concentrated in Central America and in Asia and Pacific (table 4, chart 5).

In Europe, affiliate employment fell from 3.1 million in 1977 to 2.7 million in 1989. It declined sharply during 1977-82, probably because of the recession in many countries; after 1982, affiliate employment decreased slightly. The 1977-82 decline was widespread, but the decreases were especially large in the United Kingdom and Spain, where a number of manufacturing affiliates were sold.

In Canada, affiliate employment was 945,000 in 1989, down from 1.1 million in 1977. Employment showed a pronounced drop between 1977 and 1982 and increased slightly

thereafter. The 1977-82 decrease was widespread, particularly among manufacturing industries.

In Africa, affiliate employment fell from 287,000 in 1977 to 120,000 in 1989. The sharpest declines occurred after 1982 and largely reflected selloffs of affiliates in South Africa.

In South America, affiliate employment fell from 771,000 in 1977 to 651,000 in 1989. From 1977 to 1982, the decline was concentrated in Argentina, Brazil, and Colombia and resulted from divestitures and reductions in capacity, partly in response to deteriorating economic conditions.¹⁰ Much of the decline after 1982 reflected selloffs of Venezuelan affiliates.

Affiliate employment increased in two regions—Central America and Asia and Pacific. In Central America, affiliate employment grew from 480,000 in 1977 to 604,000 in 1989. Especially rapid growth in Mexico reflected the establishment of affiliates along the U.S. border to take part

10. In 1981, a sharp rise in world interest rates led to burdensome increases in the debt-service requirements of Latin American governments. To conserve foreign exchange needed to service the debt, some host governments in the region sought to decrease imports through import restrictions, currency devaluations, and austerity measures. As a result, affiliates of U.S. MNC's found it more difficult or expensive to import intermediate goods, as well as more difficult to sell goods in local markets. In addition, the region's rapid inflation tended to encourage affiliates to invest their profits in high-yield financial instruments rather than in new capital goods. These conditions lasted until the late 1980's, when an improved business climate and a revival of pro-foreign-investment policies in some of the larger host countries began to encourage affiliates to expand operations.

Area, 1977 and 1989

OWH Other Western Hemisphere
1 "International" affiliates are those that have operations in more than one country and that are engaged in petroleum shipping, other water transportation, or operating movable oil- and gas-drilling equipment

U.S. Department of Commerce, Bureau of Economic Analysis

in the *maquiladora* program¹¹ and the expansion of affiliates in central Mexico in response to the country's economic revitalization and improved climate for foreign direct investment.

In Asia and Pacific, affiliate employment grew from 1.2 million to 1.4 million. Over one-half of the increase was in Australia and was attributable to the acquisition of minority-owned affiliates, employment by majority-owned Australian affiliates declined. The increases in employment in East Asian countries, such as Thailand and Singapore, were in response to the region's rapid economic growth and to the relatively open direct investment and foreign trade policies in some of the newly industrialized countries. Employment by Japanese affiliates declined in 1977-89, but the decline mainly resulted from the sale of a minority interest in a large company between 1977 and 1982, employment by majority-owned affiliates in Japan doubled from 1977 to 1989.

By industry.—The small decline in affiliate employment between 1977 and 1989 reflects larger offsetting changes among industries; declines in most manufacturing industries, construction, mining, and petroleum refining more than offset increases in retail trade and "services" (table 5, chart 6).

Manufacturing affiliates employed 4.2 million workers in 1989, down from 4.8 million in 1977. The decline in manufacturing employment

11. This program allows Mexican affiliates to import components for assembly, free of customs duties, from the United States if at least 50 percent of the finished goods are exported to the United States. U.S. duties are levied only on the value added in Mexico.

n.a. Not available

1. See footnote 1 to table 1.

was centered in industries in which U.S. parent companies experienced vigorous domestic competition from foreign producers—primary and fabricated metals, consumer electronics, tires, automobiles, and textiles. In some cases, the declines resulted from the shedding of foreign affiliates as part of a worldwide restructuring. In other cases, the declines reflected the adoption of labor-saving production techniques.

In primary and fabricated metal products, affiliates employed 222,000 workers in 1989, down from 396,000 in 1977. The decrease partly resulted from the sale of steel- and aluminum-producing affiliates. In steel, a large U.S. parent sold off foreign assets as part of a global restructuring intended to ward off a takeover attempt. In aluminum, several affiliates in the United Kingdom and India were sold in the early 1980's, as producers sought to cope with high energy costs and falling aluminum prices.

In household audio and video and communications equipment, affiliate employment fell from 250,000 workers in 1977 to 153,000 in 1989. Several large diversified U.S. parent companies sold their consumer electronics operations to foreign producers so that they could concentrate on more profitable business lines.

In rubber products, mainly tires, affiliate employment fell from 183,000 in 1977 to 109,000 in 1989. During the 1980's, some parents sold foreign affiliates to raise funds for capital investment to meet rising competition in the United States from Japanese and European producers.

In motor vehicle manufacturing, affiliate employment fell from 838,000 in 1977 to 701,000 in 1986 and increased thereafter to 795,000 in 1989. In the late 1970's and early 1980's, a shift in consumer preferences toward smaller, more fuel-efficient cars put U.S. auto producers at a competitive disadvantage vis-a-vis foreign producers. To increase their competitiveness, U.S. producers invested large sums to develop and produce new products. Because falling sales constrained profits, some U.S. producers sold off foreign operations to raise the necessary funds for investment. After 1986, affiliate employment in motor vehicle manufacturing rose again, as some U.S. producers focused on certain overseas markets where profits were higher and competition not so intense.

In textile products and apparel, affiliate employment fell from 142,000 in

1977 to 87,000 in 1989. The decline was widespread and probably reflected increased automation.

Outside manufacturing, affiliate employment declined in construction, mining, and petroleum refining. In construction, employment fell from 179,000 in 1977 to 54,000 in 1989 as a result of depressed activity and increased international competition. In mining, employment fell from 188,000 in 1977 to 89,000 in 1989. Much of the decline was in Africa, where some very large operations were sold, partly in response to declining commodity prices. In petroleum, employment fell from 370,000 in 1977 to 291,000 in 1989, partly because of worldwide overcapacity in the refining sector.

Affiliate employment grew in retail trade and in "services." In retail trade, employment increased from 426,000 in 1977 to 627,000 in 1989. Most of the increase reflected MNC's in the fast food industry seeking to expand beyond the saturated U.S. market. In "services," employment increased from 308,000 in 1977 to 483,000 in 1989; most of the increase occurred after 1982. Many "services" industries showed increases; however, the overall increase was largely centered in personnel supply services.

Selected Aspects of MNC Operations in 1989

This section presents an analysis of detailed data from the 1989 benchmark survey that were also collected in the previous benchmark survey but not in the annual surveys. These data—most of which were collected only for majority-owned foreign affiliates (MOFA's)—include U.S. merchandise trade by product, by intended use, and by destination or origin; compensation of and hours worked by production workers of MOFA's in manufacturing; research and development expenditures and employment by MOFA's and their U.S. parents; and sales of goods and services by MOFA's and their U.S. parents by destination and affiliation. This section also discusses the industrial specialization of MNC's in 1989.

Merchandise trade

Exports.—In 1989, U.S. merchandise exports shipped to MOFA's, at \$97.1 billion, were 95 percent of exports shipped to all foreign affiliates and 40 percent of total MNC-associated exports (table 6). Most

exports to MOFA's—\$85.6 billion, or 88 percent—were shipped by U.S. parents.

By destination, exports to MOFA's in Canada were largest, at \$37.8 billion (table 7). A significant portion of the exports to Canadian MOFA's—15 percent—were shipped by unaffiliated U.S. persons; these exports accounted for over one-half of the shipments to all MOFA's by unaffiliated U.S. persons. Factors contributing to the large trade with Canada were the 1965 U.S.-Canadian automotive trade pact, which eliminated tariffs on such trade, and the geographical proximity and economic similarities between the two countries. Exports to European MOFA's were \$29.5 billion. Within Europe, exports to MOFA's in the United Kingdom were largest, at \$7.7 billion.

By product, nearly two-thirds of total U.S. exports shipped to MOFA's consisted of machinery, both electrical and nonelectrical, and of road vehicles and parts.¹² Exports of chemicals and

12 The product categories used in the benchmark survey are based on the Standard International Trade Classification (SITC). For a description of the SITC, see *Standard International Trade Classification, Revision 2* (United Nations Statistical Papers, Series M, No.

n.a. Not available

MNC Multinational company

MOFA Majority-owned foreign affiliate

1 See footnote 1 to table 1

2 As reported on foreign affiliates' forms

3 For 1988, U.S. exports shipped to minority-owned foreign affiliates are not available by affiliation of shipper and U.S. imports shipped by minority-owned foreign affiliates are not available by affiliation of person to whom the goods were shipped

4 For U.S. parents that are, in turn, owned 10 percent or more by a foreign person, the foreign parent group consists of (1) the foreign parent of the U.S. parent, (2) any foreign person, proceeding up the foreign parent's ownership chain, that owns more than 50 percent of the person below it, and (3) any foreign person, proceeding down the ownership chain(s) of each of these members that is owned more than 50 percent by the person above it

of "other manufactures" were also sizable. By intended use, exports for further manufacture accounted for 59 percent of exports to MOFA's, and exports for resale without further manufacture accounted for 38 percent; most of the remaining exports were of capital equipment.

Imports.—U.S. merchandise imports shipped by MOFA's in 1989, at \$84.8 billion, were 91 percent of U.S. imports shipped by all foreign affiliates and 44 percent of total MNC-associated imports. Most of the U.S. imports from MOFA's—\$72.4 billion, or 85 percent—were shipped to U.S. parents.

By area of origin, Canada accounted for 46 percent, the largest share of any major area, of imports from MOFA's. Mexico had the next largest share for

a single country. Nearly all of the imports from Mexico were shipped to U.S. parents; these imports were largely of finished goods that had been exported by the parents to Mexico as components for assembly under the *maquiladora* program. Imports from Asia and Pacific, particularly Singapore, and from Europe, particularly the United Kingdom, were also sizable. Most of the imports from Singapore were of electronic components.

By product, the majority of imports shipped by MOFA's consisted of road vehicles and parts and of machinery—both electrical and non-electrical. Imports of petroleum and products and of "other manufactures" were also substantial.

Compensation of production workers of manufacturing affiliates

For MOFA's in manufacturing, detailed estimates are available on the number of their production workers

and on the number of hours worked by and the compensation paid to these workers (table 8). Employee compensation includes wages, salaries, and payments for employee benefit plans, such as pension funds, health insurance, and other fringe benefits.

In interpreting the estimates of compensation, it should be noted that the hourly rates are a measure of labor cost per unit of time worked, not a measure of labor cost per unit of output; these two measures can differ because of variations in productivity. The estimates of output required to measure labor costs per unit of output (that is, gross product originating in foreign affiliates) are not yet available, but BEA plans to prepare such estimates in the next year.

For MOFA's, the average compensation per hour of production workers was \$10.46 in 1989. For countries in which affiliates employed more than 1,000 production workers, average compensation per hour ranged from \$23.27 in Japan to \$1.29 in China. Among the five countries having the most affiliate production workers, hourly compensation averaged \$16.66 in Canada, \$11.99 in the United Kingdom, \$17.11 in Germany, \$4.53 in Brazil, and \$2.44 in Mexico. The average compensation per hour of production workers of manufacturing MOFA's in many countries is substantially less than the \$14.31 average hourly compensation of production workers in manufacturing in the United States. However, production workers of manufacturing MOFA's in most countries earn more per hour, on average, than do all production workers in manufacturing in those countries.¹³

By industry, compensation rates ranged from \$13.14 in nonelectrical machinery to \$6.56 in electric and electronic equipment. The high rate in nonelectrical machinery reflects the relatively high proportion of employment in that industry that is in high-wage countries and the high level of skill required for the work. The low rate in electric and electronic equipment is partly due to the relatively large proportion of affiliate operations,

2 See footnote 2 to table 2

13. The hourly compensation data for the United States and those for all production workers in various host countries are from U.S. Department of Labor, Bureau of Labor Statistics, *International Comparisons of Hourly Compensation Costs for Production Workers in Manufacturing, 1975-89*, Report 791 (Washington, DC: U.S. Government Printing Office, October 1990).

particularly in electronic components and accessories, that is in low-wage countries, such as Malaysia and Singapore, and the relatively low level of skill required for assembly work.

Research and development expenditures and employment

Table 9 presents estimates of research and development (R&D) ex-

penditures and associated employment by nonbank U.S. parents and their MOFA's, classified by industry. R&D expenditures are measured in two ways: (1) Those performed for a parent's or an affiliate's own benefit, either by themselves or by others on contract, and (2) those performed by the parent or affiliate, either for themselves or for others on contract.

U.S. parent spent \$58.9 billion on R&D for their own benefit and employed 623,000 scientists, engineers, and other technical staff in R&D activities. MOFA's spent \$7.1 billion on R&D for their own benefit, 11 percent of the MNC total, and had 95,200 R&D employees, 13 percent of the MNC total.

By industry, manufacturing accounted for the largest shares of total R&D expenditures for both parents' and affiliates' own benefit—86 percent and 81 percent, respectively—and of total R&D employment—87 percent and 83 percent, respectively. Within manufacturing, parents' expenditures were largest in chemicals, in nonelectrical machinery, and in transportation equipment. Affiliates' expenditures were largest in transportation equipment and in chemicals.

U.S. MNC's spent an average of \$15.00 on R&D for their own benefit for every \$1,000 of sales. U.S. parents spent more per unit of sales—\$18.79 per \$1,000 of sales—than their foreign affiliates—\$7.03 per \$1,000 of sales. For parents, R&D spending per \$1,000 of sales was highest in manufacturing, particularly in computers and office equipment and in drugs. For affiliates, R&D spending per \$1,000 of sales was highest in "services," particularly in research, development, and testing services; however, the levels of R&D expenditures were highest by far for affiliates in manufacturing, especially in "other" transportation equipment, in household audio, video, and communication equipment, and in drugs.

R&D performed by U.S. parents, either for themselves or for others on contract, was \$81.1 billion. R&D performed for others on contract was \$24.5 billion; of that amount, \$21.9 billion was for the Federal Government—mostly by parents in "other" transportation equipment. R&D performed by affiliates was \$8.0 billion, of which \$1.6 billion was performed for others on contract.

Sales of goods and services by destination and affiliation

In the benchmark survey, sales by nonbank U.S. parents and by MOFA's

R&D Research and development

* Less than \$500,000 or 50 employees

† Suppressed to avoid disclosure of data of individual companies

1 Equals the sum of R&D performed by parents for themselves and R&D performed for the parents by others on contract

2 Equals the sum of R&D performed by affiliates for themselves and R&D performed for the affiliate by others on contract

were disaggregated by destination, by affiliation of customer, and by whether the sales were of goods, services, or investment income.

U.S. parents.—Total sales by U.S. parents were \$3,134 billion in 1989 (table 10). Sales of goods accounted for \$2,213 billion or 71 percent, sales of services accounted for \$798 billion or 25 percent, and investment income accounted for \$123 billion or 3 percent.¹⁴

Of total sales of goods by U.S. parents, 88 percent were to U.S. persons and 12 percent were to foreigners. Over one-half of the sales to foreigners were to unaffiliated persons. Of total sales of services, 94 percent were to U.S. persons, and 6 percent were to foreigners. Over one-half of the sales to foreigners were to foreign affiliates.

By industry, sales of services were largest in "other industries," particularly in communications and public utilities and in transportation, and they were next largest in finance (except banking), insurance, and real estate (FIRE). They were also sizable in manufacturing—especially in motor vehicles and computer manufacturing—and in "services."

MOFA's.—Total MOFA sales were \$1,015 billion (tables 11–12). Sales of goods accounted for the largest share—87 percent, or \$887 billion. Sales of services accounted for 11 percent, or \$110 billion. Investment income accounted for 2 percent, or \$18 billion. Most of the sales of both goods and services were to unaffiliated foreign persons in the affiliate's country of location. These sales reflect the fact that U.S. parents have invested abroad mainly to sell goods and services through affiliates to unaffiliated customers in local markets.¹⁵

By industry, sales of goods were largest—at \$490 billion—in manufacturing. Within manufacturing, sales were largest in transportation equipment and in chemicals. Sales were also sizable in wholesale trade, particularly in durable goods.

By area, affiliates in Europe accounted for over one-half, or \$505

billion, of the total sales of goods. Within Europe, sales by affiliates in the United Kingdom were particularly large—at \$141 billion. Outside Europe, sales were largest in Canada—at \$151 billion—and in Japan—at \$48 billion.

By industry, sales of services were largest—at \$33 billion—in FIRE, insurance affiliates accounted for about two-thirds of the total. Sales of services were next largest—\$32 billion—in "services"; business services accounted for about one-half of the total, and most of these sales were by affiliates in computer processing and data preparation services. Sales were also sizable in computer and office equipment manufacturing, where affiliates provided services associated with the use and maintenance of equipment that they manufactured.

By area, affiliates in Europe accounted for over one-half, or \$58 billion, of total sales of services. Within Europe, sales in the United Kingdom were particularly large—at \$21 billion. Outside Europe, sales were largest in Canada—at \$17 billion—and in Japan—at \$10 billion.

By destination, 69 percent of total sales by MOFA's were to customers in the affiliates' own countries of location, 20 percent were to customers in other foreign countries, and 11 percent were to customers in the United States.

Sales to customers in other foreign countries accounted for over one-half of total sales by MOFA's in several European countries—Switzerland, Netherlands, Belgium, and Ireland—and for about one-third of total sales by MOFA's in several Asian countries—Hong Kong, Indonesia, and Singapore. In the European countries, most of the sales to other foreign countries were by manufacturing affiliates to other European countries. Most of the total sales to other foreign countries were to other foreign affiliates.

In several industries and countries, sales to the United States accounted for a relatively large share of the total. They accounted for about 25 percent of total sales in two extractive industries—crude petroleum and

¹ See footnote 1 to table 1.

² To provide more accurate data on sales of services, information on investment income of U.S. parents and MOFA's in finance and insurance was collected separately from sales of services for the first time in the 1989 benchmark survey. Finance and insurance companies include investment income in sales because it is generated by a primary activity of the company. In most other industries, investment income is considered an incidental revenue source and included in the "other income" category.

14. To provide more accurate data on sales of services, information on investment income of U.S. parents and MOFA's in finance and insurance was collected separately from sales of services for the first time in the 1989 benchmark survey. Finance and insurance companies include investment income in sales because it is generated by a primary activity of the company. In most other industries, investment income is considered an incidental revenue source and included in the income statement in a separate "other income" category.

15. An unaffiliated customer of a MOFA is a customer other than the MOFA's U.S. parent or another foreign affiliate of the parent.

Table 11.—Sales of Goods and Services by Majority-Owned Nonbank Foreign Affiliates, Industry of Affiliate by Destination, 1989

[Millions of dollars]

* Less than \$500,000

^b Suppressed to avoid disclosure of data of individual companies

1. "Industry of foreign affiliate" is the industry in which the affiliate's sales were largest

2. "Industry of sales" is the industry of the goods or services being sold.

3. In the breakdown of affiliates' sales by industry of sales, only the five largest categories had to be specified. If a given affiliate had sales in more than five industries, the distribution of its sales in the specified industries would have covered less than 100 percent of its total sales. Sales in all unspecified industries combined are shown in this column.

Text continues from p 40

metal mining—and in three manufacturing industries—computers and office equipment, electronic components and accessories, and transportation equipment. Except for metal mining, most of the sales to the United States in these industries, as well as in most other industries, were to U.S. parents.

Sales to the United States accounted for a relatively large share of total sales by MOFA's in Canada and Mexico (mostly by transportation equipment affiliates), in Singapore and Taiwan (mainly by affiliates that manufacture computer components), and in Bermuda, Nigeria, United Arab Emirates, and Egypt (mostly by petroleum affiliates). They also accounted for a sizable share of total sales by MOFA's in the Netherlands Antilles; this large share mostly reflected interest payments (investment income) received from U.S. parents.

Specialization of MNC's

In all the tables in this article that are disaggregated by industry, except for tables 13 and 14, parents and affiliates are classified by industry of enterprise—that is, by the industry that accounted for the largest portion of their sales.¹⁶ In the benchmark survey, sales data were collected by industry of sales to determine the correct industry classification of parents and affiliates. This information can also be used to examine the degree of industrial specialization of parent and affiliate operations.

Tables 13 and 14 show sales for U.S. parents and MOFA's in their industries of classification and in other industries. For U.S. parents, the proportion of sales in their industry of classification (industry specialization ratio) ranged from 94 percent in FIRE to 75 percent in wholesale trade. In manufacturing, the ratio was 84 percent; within manufacturing, the ratio was highest in transportation equipment and lowest in electric and electronic equipment.

For MOFA's, the industry specialization ratios ranged from 99 percent in petroleum to 89 percent in wholesale trade. In manufacturing, the

ratio was 92 percent; within manufacturing, the ratio was highest in food manufacturing and lowest in both transportation equipment and nonelectrical machinery. These high ratios for MOFA's show that most affiliates tend to specialize in the manufacture or sale of a specific product or to engage in the development of a specific natural resource, such as petroleum or minerals.¹⁷

Coverage and Methodology of the Benchmark Survey

Benchmark surveys are the most comprehensive surveys of U.S. direct investment abroad conducted by BEA. The preliminary results from the 1989 benchmark survey are based on reported or estimated data for 2,167 U.S. parents and 17,835 foreign affiliates. This survey covered all foreign affiliates of U.S. direct investors that had assets, sales, or net income of more than \$3 million. It collected detailed information on the financial structure and overall operations of the foreign affiliates and their U.S. parent companies, as well as on transactions and positions between the foreign affiliates and their U.S. parents. For similar data items, the 1989 estimates presented in this article extend the time series of universe estimates for 1983–88, which were derived from sample data reported in BEA's annual surveys of U.S. direct investment abroad.

The concepts and definitions underlying the 1989 benchmark survey are essentially the same as those underlying the previous benchmark survey, as described in *U.S. Direct Investment Abroad: 1982 Benchmark Survey Data*. The full methodology for the 1989 survey will accompany the revised estimates to be published next fall.

To produce these preliminary results from the 1989 benchmark survey, BEA made estimates for reports not received or processed in time for publication and for items that were not reported or were reported incorrectly. The degree of estimation varies from item to

item. In some cases, reporters had difficulty supplying the required information because the data were not easily accessible or were unavailable from their financial accounting records. In particular, data on trade and employment are subject to a higher degree of estimation than other items.

The development of procedures to estimate the missing data enabled BEA to publish these preliminary results in 17 months from the due date of the reports. (For the 1982 benchmark survey, only final estimates were prepared, and these results were published 30 months after the due date of the reports.) Final results of the 1989 benchmark survey, incorporating data from reports received and processed after the publication of these preliminary results, will be published next fall. Overall, the differences between the preliminary and final results are expected to be small, but they could be sizable for some items and for individual countries and industries.

In the 1989 benchmark survey, a long form, requesting information in considerable detail, was filed by affiliates with assets, sales, or net income greater than \$15 million. The most detail was obtained for majority-owned nonbank affiliates. To minimize the burden on survey respondents, a short form requesting less detail was introduced for filing by smaller affiliates. For these affiliates, BEA has estimated the items that appear only on the long form, so that the published results are presented in the same detail for all affiliates regardless of size.

Some of the industry and country detail that is shown in this article differs from that shown in prior annual survey articles. By industry, more detail is shown in "services" and in "other industries". By country, the detail shown has been reorganized along strictly geographic lines; economic or political groups, such as the European Communities, are no longer shown in the body of the tables, but in some cases are shown as addenda. In addition, a few countries in which U.S. investment has declined significantly were dropped, and several countries in which investment has expanded significantly were added.

The geographic allocation of sales of services by affiliates in "International"—that is, by affiliates having operations in more than one country and engaged in petroleum shipping, other water transportation, or operating movable oil- and gas-drilling equipment—has been changed. Sales to U.S. per-

16. Each U.S. parent or affiliate was classified by industry on the basis of its sales (or total income for holding companies). First, the parent or affiliate was classified in the major industry group that accounted for the largest percentage of its sales. Second, within the major industry group, the parent or affiliate was classified in the two digit industry group in which its sales were largest. Third, within its two digit industry, the parent or affiliate was classified in the three-digit subindustry in which its sales were largest.

17. Parent and MOFA specialization ratios are sensitive to levels of company consolidation and thus are not strictly comparable. In the benchmark survey, U.S. parents were defined as fully consolidated business enterprises and were required to consolidate all domestic (U.S.) subsidiaries owned more than 50 percent, regardless of industry classification. By contrast, MOFA's were not allowed to consolidate affiliates across countries and, within a given country, could consolidate affiliates only if they were classified in the same industry or were integral parts of the same business operation. Largely because of this difference in consolidation, the specialization ratios for MOFA's tend to be higher than those for parents.

sons by these affiliates are now being recorded as sales to the United States; previously, all sales by these affiliates were recorded as local sales.

The improved coverage of the MNC universe in 1989

In conducting a benchmark survey, BEA comprehensively reviews outside sources of information to improve the coverage of its universe of U.S. parent companies and foreign affiliates. The review for the 1989 benchmark survey identified 664 parent companies and 5,188 foreign affiliates that had not previously been reported to BEA (table 15). The newly identified parents were those that had failed to report in prior annual surveys or that were not required to report because all of their affiliates were below the exemption level of the annual survey. Most of the newly identified affiliates were below the annual survey exemption level and were not required to be reported.¹⁸ However, the newly identified affiliates that exceeded the exemption level, though much smaller in number, together had far larger assets, sales, and employment than the affiliates that were below the exemption level.

BEA also reviewed the status of existing parents and affiliates, including those whose data had been estimated since the last benchmark survey. This review eliminated 436 parent companies and 5,061 foreign affiliates from the universe because they had been sold, liquidated, or merged or consol-

idated with another U.S. parent or foreign affiliate since the last benchmark survey. As a result of both reviews, a net of 228 parents and 127 foreign affiliates were added to the direct investment universe.

Globally, the net addition of these parents and affiliates did not contribute significantly to the 1989 changes in the MNC estimates, except for the estimates of parent employment. For parents, the improved coverage increased assets by \$43.3 billion,

sales by \$36.0 billion, and employment by 571,000 (table 15, line 2). For affiliates, it reduced assets by \$5.0 billion, sales by \$3.5 billion, and employment by 46,000 (table 15, line 11). However, for certain countries and industries, the gross changes in the estimates due to the addition or deletion of parents and affiliates were quite large (table 15, lines 3 and 6 for parents and lines 12 and 15 for affiliates) and may have had sizable effects on the 1989 changes.

Table 15.—Sources of Change in Selected Data Items for Nonbank U.S. Parents and Their Nonbank Foreign Affiliates, 1988–89

17	Affiliates established or acquired in 1989 ...	40,680	20,923	193.4	735
18	Affiliates that were reported in both 1988 and 1989 ⁷ ...	71,959	54,134	70.8	...

1 The total change in the number of parents or affiliates (line 1 or 10) is the sum of the net change due to benchmark revisions (line 2 or 11), establishments or acquisitions of affiliates in 1989 (line 8 or 17), liquidations or selloffs of affiliates in 1989 (included in line 9 or 18), and reorganizations of existing operations in 1989 that divided single business entities or that consolidated separate business entities.

2 More U.S. parents are required to report in benchmark surveys than in annual sample surveys. In the 1989 benchmark survey, a parent had to report if it owned at least 10 percent of any foreign affiliate with assets, sales, or net income (positive or negative) greater than \$3 million. In the annual surveys covering 1983–88, a parent generally had to report if it owned at least 20 percent of an affiliate with assets, sales, or net income greater than \$10 million.

3 Parents may leave the survey universe either because they no longer have any foreign affiliates that meet BEA's reporting criteria or because they cease to exist as business entities.

4 Includes parents that existed for at least part of both 1988 and 1989, including parents that liquidated or sold their last foreign affiliate in 1989.

5 More affiliates are required to be reported in benchmark surveys than in annual sample surveys. In the 1989 benchmark survey, a report had to be filed for an affiliate that was at least 10 percent owned by a U.S. person and that had assets, sales, or net income (positive or negative) greater than \$3 million. In the annual surveys covering 1983–88, an affiliate generally had to be reported if it was owned at least 20 percent by a U.S. person and had assets, sales, or net income greater than \$10 million.

6 Affiliates may leave the survey universe either because they no longer meet BEA's reporting criteria or because they are sold to foreigners or cease to exist as a business entity.

7 Includes affiliates that existed for at least part of both 1988 and 1989, including affiliates that were liquidated or sold to foreigners in 1989.

¹⁸ More affiliates are required to be reported in benchmark surveys than in annual surveys. In the 1989 benchmark survey, a report had to be filed for an affiliate that was at least 10-percent owned by a U.S. person and that had assets, sales, or net income (positive or negative) greater than \$3 million. In the annual surveys prior to 1989, an affiliate generally had to be reported if it was owned at least 20 percent by a U.S. person and had assets, sales, or net income greater than \$10 million.

Ordering Publications and Diskettes on U.S. Direct Investment Abroad

Additional detail from the 1989 and 1982 benchmark surveys and the 1983-88 annual surveys are available in the publications listed below. The estimates for 1983-89 are also available on computer diskettes.

The 1983-85 publications, and the diskettes for all years, may be obtained from the Public Information Office, Order Desk, BE-53, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230. Make check or money order payable to "Bureau of Economic Analysis" and include your return address with the order. To place an order using Master Card or VISA, call (202) 523-0612.

The publications for 1986 forward may be obtained from the Superintendent of Documents, U.S. Government Printing Office (GPO), Washington, DC 20402; telephone (202) 783-3238.

The titles, BEA accession or GPO stock numbers, and prices of the publications, and the years, BEA accession numbers, and prices of the diskettes, which should be quoted when ordering, are as follows:

Year	Publication				Diskette ¹	
	Title	BEA Accession Number	GPO Stock Number	Price	BEA Accession Number	Price
	<i>U.S. Direct Investment Abroad: Operations of U.S. Parent Companies and Their Foreign Affiliates:</i>					
1983	<i>Revised 1983 Estimates</i>	50-86-10-103	—	\$5.00	50-86-40-403	\$20.00
1984	<i>Revised 1984 Estimates</i>	50-87-10-103	—	\$5.00	50-87-40-409	\$20.00
1985	<i>Revised 1985 Estimates</i>	50-88-10-103	—	\$5.00	50-88-40-403	\$20.00
1986	<i>Revised 1986 Estimates</i>	—	003-010-00189-5	\$4.25	50-89-40-403	\$20.00
1987	<i>Revised 1987 Estimates</i>	—	003-010-00201-8	\$4.25	50-90-40-403	\$20.00
1988	<i>Revised 1988 Estimates</i>	—	003-010-00221-2	\$4.25	50-91-40-403	\$20.00
1989	<i>U.S. Direct Investment Abroad: 1989 Benchmark Survey, Preliminary Results</i>	—	(²)	(²)	50-91-40-404	\$40.00

¹ Note to diskette users: All files are in ASCII format and are copied, using DOS, onto 5 1/4-inch diameter diskettes (9 sector, double-sided, double-density). A documentation file is included.

² This publication is scheduled to be available in early December. Call the U.S. Government Printing Office at (202) 783-3238 for order information.

For 1982, estimates in greater detail than those for 1983-88 may be obtained in *U.S. Direct Investment Abroad 1982 Benchmark Survey Data*. That publication, which contains detailed results of the 1982 benchmark survey and a methodology for U.S. direct investment abroad, may be obtained from the National Technical Information Service (NTIS), NTIS Accession No. PB 86 169117, price \$50.00, or \$9.00 for a microfiche. Call NTIS at (703) 487-4650 or fax (703) 321-8547. A computer tape of the 1982 data is also available from BEA, Accession No. BEA IID 86-001, price \$100.00; to order, call (202) 523-0652.

REGIONAL PERSPECTIVES

Personal Income by Region, Second Quarter 1991

PERSONAL income growth in the Nation picked up in the second quarter of 1991 after slowing in the four preceding quarters. It increased 1.1 percent in the second quarter after increasing 0.3 percent in the first (table 1).¹ In 1990, personal income had increased 2.6 percent in the first quarter, 1.5 percent in the second, 1.3 percent in the third, and 0.9 percent in the fourth.

The pickup in personal income growth was widespread by region and by industry: All regions except the Southeast and all major industries except government contributed. Pickups in personal income growth were largest in the Rocky Mountain, Mideast, and Great Lakes regions (chart 7).

Personal income growth picked up in 33 States (chart 8). In particular, sharp upswings were recorded in the farm States of North Dakota, Montana, Kansas, South Dakota, and Idaho. (For estimates by State, see "State Personal Income, Summary Estimates for Second Quarter 1991" on page 59.)

In the Rocky Mountain region, personal income increased 1.6 percent in the second quarter after remaining unchanged in the first. The pickup was more than accounted for by a sharp increase in farm income after a sharp decline; the upswing in farm income primarily reflected Federal subsidy payments to wheat farmers. Personal income growth picked up in all Rocky Mountain States. Excluding farm income, personal income in the region grew slower in the second quarter than

in the first; by State, nonfarm personal income growth slowed in Montana, Idaho, and Colorado.

In the Mideast, personal income increased 1.0 percent in the second quarter after declining 0.4 percent in the first. Despite the upswing, personal income growth in this region remained below the U.S. average for the third consecutive quarter. All industries except farming contributed to the upswing in personal income growth. Construction payrolls declined less in the second quarter than in the first (table 2). Payrolls in manufacturing, in the transportation-public utilities group, in trade, and in the finance-insurance-real estate group increased in the second quarter after

first-quarter declines. Payrolls in services and in government increased more in the second quarter than in the first. Personal income growth picked up in all Mideast States.

In the Great Lakes region, personal income increased 1.2 percent in the second quarter after declining 0.1 percent in the first. Payrolls in manufacturing and in the transportation-public utilities group increased in the second quarter after first-quarter declines, the upswing in manufacturing payrolls was due, in part, to an increase in motor vehicle production after large declines in the two preceding quarters. Payrolls in construction declined less in the second quarter than in the first. Payrolls in trade and in

services increased more in the second quarter than in the first. Personal income growth picked up in all Great Lakes States.

In the Plains region, personal income increased 1.3 percent in the second quarter after increasing 0.3 percent in the first. Farm income and payrolls in durables manufacturing increased in the second quarter after first-quarter declines. Construction payrolls declined less in the second quarter than in the first. Payrolls in trade and in services increased more in the second quarter than in the first. Personal income growth picked up in all Plains States except Iowa.

In the Far West, personal income increased 1.2 percent in the second quarter after increasing 0.2 percent in the first. Payrolls in construction and in durables manufacturing declined less in the second quarter than in the first. Payrolls in the transportation-public utilities group and in trade increased in the second quarter after first-quarter declines. Payrolls in services increased more in the second quarter than in the first. By State, personal income growth picked up in California and Washington; it was unchanged in Oregon, and it slowed in Nevada.

In the Southwest, personal income increased 1.4 percent in the second

quarter after increasing 1.0 percent in the first. Farm income and payrolls in the transportation-public utilities group increased in the second quarter after first-quarter declines. Payrolls in nondurables manufacturing, in retail trade, in services, and in government increased more in the second quarter than in the first. Personal income growth picked up in all Southwest States except Arizona.

In New England, personal income increased 0.2 percent in the second quarter after declining 0.1 percent in the first. Payrolls in construction, in nondurables manufacturing, in the transportation-public utilities group,

and in retail trade declined less in the second quarter than in the first. Payrolls in wholesale trade and in the finance-insurance-real estate group increased in the second quarter after first-quarter declines. Payrolls in services increased more in the second quarter than in the first. By State, personal income growth picked up in Connecticut, New Hampshire,

and Rhode Island; it was unchanged in Vermont, and it slowed in Maine and Massachusetts.

In the Southeast, personal income growth, in contrast to that in the other regions, slowed down in the second quarter; personal income increased 0.9 percent after increasing 1.2 percent

in the first quarter. Farm income and payrolls in the transportation-public utilities group, in wholesale trade, in the finance-insurance-real estate group, and in government increased less in the second quarter than in the first. Personal income growth slowed in all Southeast States except Kentucky, North Carolina, and Georgia.

BUSINESS CYCLE INDICATORS

Annual Revision of Composite Indexes

The composite indexes of leading, coincident, and lagging indicators (series 910, 920, and 930) have been revised from January 1986 through August 1991. These revisions incorporate revised data for component series but do not involve changes in the components of the indexes or in the standardization or trend factors. The ratio of the coincident to lagging composite indexes (series 940) and the diffusion indexes based on the leading, coincident, and lagging indicator components (series 950, 951, and 952) have been revised for the same period. Historical data for these indexes and their components are shown on pages C-25 through C-44.

Data tables	C-1
Footnotes for pages C-1 through C-5	C-6
Charts	C-7
Historical data for selected series	C-25
Business cycle expansions and contractions	C-45
Specific peak and trough dates for selected indicators	C-46
Titles and sources of series	C-47

Series originating in Government agencies are not copyrighted and may be reprinted freely. Series from private sources are provided through the courtesy of the compilers and are subject to their copyrights.

Current and historical data for the series shown in the C-pages are available on printouts, diskettes, and the Commerce Department's Economic Bulletin Board. For more information, write to Statistical Indicators Branch, Business Outlook Division (BE-52), Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230.

NOTE.—This section of the SURVEY is prepared by the Statistical Indicators Branch.

L.C.Lg.U Cyclical indicator series are classified as L (leading), C (coincident), Lg (lagging), or U (unclassified) at reference cycle peaks, troughs, and overall. Series classifications are shown in parentheses following the series titles.

‡ Cyclical indicator series denoted by ‡ are inverted (i.e., the sign is reversed) for cyclical analysis calculations, including classifications, contributions to composite indexes, and current high values

† Cyclical indicator series denoted by † are smoothed by an autoregressive-moving-average filter developed by Statistics Canada.

For information on composite indexes and other concepts used in this section, see "Composite Indexes of Leading, Coincident, and Lagging Indicators" in the November 1987 SURVEY OF CURRENT BUSINESS and "Business Cycle Indicators Revised Composite Indexes" in the January 1989 SURVEY.

References to series in this section use the prefix "BCI-" followed by the series number. Unless otherwise noted, series are seasonally adjusted.

Percent change data are centered within the spans: 1-month changes are placed in the ending month, 3-month changes are placed in the 3d month, 6-month changes are placed in the 4th month, 1-quarter changes are placed in the ending quarter, and 4-quarter changes are placed in the 3d quarter.

Diffusion indexes are defined as the percent of components rising plus one-half of the percent of components unchanged. Diffusion index data are centered within the spans: 1-month indexes are placed in the ending month and 6-month indexes are placed in the 4th month.

High values reached by cyclical indicators since the last reference cycle trough (November 1982) are shown in boldface type, high values reached prior to the period shown in the table are listed at the bottom of each page. For inverted series, low values are indicated as highs.

Sources for series in this section are shown on pages C-47 and C-48

Page C-1

NOTE—Major data revisions: The composite indexes (BCI-910, -920, -930, and -940), their percent changes, and the contributions of their components have been revised from 1986 forward to incorporate revised data for component series. These revisions do not involve changes in the components of the indexes or changes in the standardization or trend factors. In addition, the diffusion indexes based on the composite index components (BCI-950, -951, and -952) have been recomputed from 1986 forward. Historical data for these composite and diffusion indexes and their components are shown on pages C-25 through C-44. For further information, contact the U.S. Department of Commerce, Bureau of Economic Analysis, Business Outlook Division, Washington, DC 20230.

1. A component's contribution measures its impact, in percentage points, on the percent change in the index. Each month, the sum of the contributions plus the trend adjustment factor equals (except for rounding differences) the index's percent change from the previous month. The trend adjustment factors are 0.142 for the leading index, -0.186 for the coincident index, and 0.030 for the lagging index.

2. Excludes BCI-57, for which data are not available.

3. Excludes BCI-77 and BCI 95, for which data are not available

Page C-2

NOTE—Major data revision: Series on average weekly initial claims for unemployment insurance (BCI-5) and average weekly insured unemployment rate (BCI-45) have been revised by the source agency from 1986 forward to reflect updating of the basic data. For further information, contact the U.S. Department of Labor, Employment and Training Administration, Office of Administration Management, Washington, DC 20210.

* Preliminary October values: BCI-122 = 60.4 and BCI-123 = 79.6.

1 Data exclude Puerto Rico, which is included in figures published by the source agency.

2 Copyrighted This series may not be reproduced without written permission from the University of Michigan, Survey Research Center, P.O. Box 1248, Ann Arbor, MI 48106-1248.

Page C-4

NOTE—Major data revision CIBCR long-leading and short-leading composite indexes (BCI-990 and BCI-991) have been revised by the source agency from 1986 forward to incorporate revised data for component series. For further information, contact the source (See footnote 1 for address.)

* Preliminary October values: BCI-85 = 0.87, BCI-119 = 5.26, BCI-114 = 5.04, BCI-116 = 8.83, BCI-115 = 7.88, BCI-117 = 6.68, and BCI-109 = 8.00.

1. This index is compiled by the Center for International Business Cycle Research (CIBCR), Graduate School of Business, Columbia University, New York, NY 10027.

Page C-5

* Preliminary October values: BCI-19 = 420.2, BCI-748 = 1,721.0, BCI-745 = 317.9, BCI-746 = 862.1, BCI-742 = 1,182.6, BCI-747 = 310.5, BCI-743 = 380.9, BCI-750 = 90.72, BCI-758 = 130.68, BCI-755 = 1,690.2, BCI-756 = 5,759.4, BCI-752 = 0.5807, BCI-757 = 1,263.78, and BCI-753 = 1.1290.

1 Balance of payments basis. Excludes transfers under military grants and Department of Defense sales contracts (exports), and Department of Defense purchases (imports).

2 Organisation for Economic Co-operation and Development.

3. This index is the weighted-average exchange value of the U.S. dollar against the currencies of the other G-10 countries plus Switzerland. Each country is weighted by its 1972-76 global trade. For a description of this index, see the August 1978 *Federal Reserve Bulletin* (p. 700).

530	Composite index of 7 lagging indicators	633 (-1)	1032 (-1)	674 (-1)	373 (-1)	1256 (-1)	1257 (-1)	154 (-1)

NOTE—Specific peak and trough dates mark the cyclical turning points in individual series, reference peak and trough dates mark the cyclical turning points in overall business activity. For the composite indexes and their components, this table lists the specific peaks and troughs corresponding to the last seven business cycles. The leads (-1) or lags (+1) in the specific dates in relation to the reference dates are shown in parentheses (in months). These specific dates should not be considered absolute; individual analysts may prefer alternative turning points for some series. See *Measuring Business Cycles* by Arthur F. Burns and Wesley C. Mitchell, National Bureau of Economic Research, 1946, for details.

Information on the selection of specific peaks and troughs:

e.g. Not available. This indicates that data necessary to determine a turning point are not available.

NST No specific turn. This indicates that no specific turning point corresponding to the nearest reference date is discernible.

This series is smoothed by an asymmetric moving average filter developed by Statistics Canada.

TITLES AND SOURCES OF SERIES

Series are listed below in numerical order within each of the two major groups. Series numbers are for identification only and do not reflect relationships or order among the series. "M" following a series title indicates monthly data; "Q" indicates quarterly data. Data apply to the whole period except when indicated by "EOM" (end of month) or "EOQ" (end of quarter).

To save space, the commonly used sources listed below are referred to by number:

Source 1—U.S. Department of Commerce, Bureau of Economic Analysis; Source 2—U.S. Department of Commerce, Bureau of the Census; Source 3—U.S. Department of Labor, Bureau of Labor Statistics; Source 4—Board of Governors of the Federal Reserve System.

In parentheses following the source for each series is a reference to the *Copies* on which that series appears. References to data tables are in roman type; references to charts are in bold-style type.

1. Cyclical Indicators

1. Average weekly hours of production or nonsupervisory workers, manufacturing (M).—Source 3 (2,9)
5. Average weekly initial claims for unemployment insurance, State programs (M).—U.S. Department of Labor, Employment and Training Administration, seasonal adjustment by Bureau of Economic Analysis (2,9)
7. Manufacturers' new orders in 1982 dollars, durable goods industries (M).—Sources 1, 2, and 3 (2,15)
8. Manufacturers' new orders in 1982 dollars, consumer goods and materials industries (M).—Sources 1, 2, and 3 (2,9)
9. Construction contracts awarded for commercial and industrial buildings, floor space (M).—McGraw-Hill Information Systems Company; seasonal adjustment by Bureau of Economic Analysis (Used by permission. This series may not be reproduced without written permission from the source.) (2,16)
10. Contracts and orders for plant and equipment in current dollars (M).—Sources 1, 2, and McGraw-Hill Information Systems Company (2)
11. Newly approved capital appropriations, 1,000 manufacturing corporations (Q).—The Conference Board (2)
12. Index of net business formation (M).—Source 1 and Dun & Bradstreet, Inc. (2,16)
13. Number of new business incorporations (M).—Dun & Bradstreet, Inc.; seasonal adjustment by Bureau of Economic Analysis (2,16)
14. Current liabilities of business failures (M).—Dun & Bradstreet, Inc. (4)
16. Corporate profits after tax in current dollars (Q).—Source 1 (3,19)
18. Corporate profits after tax in 1982 dollars (Q).—Source 1 (3,19)
19. Index of stock prices, 500 common stocks (M).—Standard & Poor's Corporation (3,5,10,25)
20. Contracts and orders for plant and equipment in 1982 dollars (M).—Sources 1, 2, and McGraw-Hill Information Systems Company (2,9)
21. Average weekly overtime hours of production or nonsupervisory workers, manufacturing (M).—Source 3 (2,11)
22. Ratio, corporate domestic profits after tax to total corporate domestic income (Q).—Source 1 (3,19)
23. Index of spot market prices, raw industrial materials (M).—Sources 1, 3, and Commodity Research Bureau, Inc. (Used by permission. From June 1981 forward, this series may not be reproduced without written permission from Commodity Research Bureau, Inc.) (3,19)
26. Ratio, implicit price deflator to unit labor cost, all persons, nonfarm business sector (Q).—Sources 1 and 3 (3,19)
27. Manufacturers' new orders in 1982 dollars, nondefense capital goods industries (M).—Sources 1, 2, and 3 (2,16)
28. New private housing units started (M).—Source 2 (3,18)
29. Index of new private housing units authorized by local building permits (M).—Sources 1 and 2 (3,19)
30. Change in business inventories in 1982 dollars (Q).—Source 1 (3,15)
31. Change in manufacturing and trade inventories (M).—Sources 1 and 2 (3,15)
32. Vendor performance, slower deliveries diffusion index (M).—National Association of Purchasing Management and Purchasing Management Association of Chicago; seasonal adjustment by U.S. Department of Commerce, Office of the Chief Economist (2,9)
35. Corporate net cash flow in 1982 dollars (Q).—Source 1 (3)
37. Number of persons unemployed (M).—Source 1 (2)
39. Percent of consumer installment loans delinquent 30 days and over (EOM).—American Bankers Association (4)
40. Employees on nonagricultural payrolls, goods-producing industries (M).—Source 1 (2,11)
41. Employees on nonagricultural payrolls (M).—Source 3 (2,11)
42. Number of persons engaged in nonagricultural activities (M).—Source 3 (2)
43. Civilian unemployment rate (M).—Source 3 (2,11)
44. Unemployment rate, persons unemployed 15 weeks and over (M).—Source 2 (2)
45. Average weekly insured unemployment rate, State programs (M).—Source 1 and U.S. Department of Labor, Employment and Training Administration (2)
46. Index of help-wanted advertising in newspapers (M).—The Conference Board (2,11)
47. Index of industrial production (M).—Source 4 (2,5,11,23)
48. Employee hours in nonagricultural establishments (M).—Source 3 (2,11)
49. Value of goods output in 1982 dollars (Q).—Source 1 (2)
50. Gross national product in 1982 dollars (Q).—Source 1 (2,14)
51. Personal income less transfer payments in 1982 dollars (M).—Source 1 (2,11)
52. Personal income in 1982 dollars (M).—Source 1 (2)
53. Wages and salaries in 1982 dollars, mining, manufacturing, and construction (M).—Sources 1 and 3 (2,14)
57. Manufacturing and trade sales in 1982 dollars (M).—Sources 1 and 3 (2,11)
58. Index of consumer sentiment (Q).—University of Michigan, Survey Research Center (Used by permission. This series may not be reproduced without written permission from the source.) (2)
59. Sales of retail stores in 1982 dollars (M).—Sources 1 and 2 (2,15)
60. Ratio, help-wanted advertising in newspapers to number of persons unemployed (M).—Sources 1, 3, and The Conference Board (2)
61. New plant and equipment expenditures by business in current dollars (Q).—Source 2 (3)
62. Change in index of labor cost per unit of output, manufacturing, smoothed (M).—Sources 1 and 2 (3,12)
63. Index of unit labor cost, all persons, business sector (Q).—Source 3 (3)
64. Consumer installment credit outstanding (EOM).—Source 4 (3)
69. Manufacturers' machinery and equipment sales and business construction expenditures (M).—Sources 1 and 2 (3,17)
70. Manufacturing and trade inventories in 1982 dollars (EOM).—Sources 1 and 2 (3)
72. Commercial and industrial loans outstanding in current dollars (M).—Sources 1, 4, and The Federal Reserve Bank of New York (5)
73. Index of industrial production, durable manufactures (M).—Source 4 (2,15)
74. Index of industrial production, nondurable manufactures (M).—Source 4 (2,15)
75. Index of industrial production, consumer goods (M).—Source 4 (2,15)
76. Index of industrial production, business equipment (M).—Source 4 (3,17)
77. Ratio, manufacturing and trade inventories to sales in 1982 dollars (M).—Sources 1 and 2 (3,15)
81. Ratio, corporate domestic profits after tax with inventory valuation and capital consumption adjustments to total corporate domestic income (Q).—Source 1 (3,19)
82. Capacity utilization rate, manufacturing (M).—Source 2 (2,15)
83. Index of consumer expectations (Q).—University of Michigan, Survey Research Center (Used by permission. This series may not be reproduced without written permission from the source.) (2,10)
85. Change in money supply M1 (M).—Sources 1 and 2 (4,20)
86. Gross private nonresidential fixed investment in 1982 dollars (Q).—Source 1 (3,17)
87. Gross private nonresidential fixed investment in 1982 dollars, structures (Q).—Source 1 (3,17)
88. Gross private nonresidential fixed investment in 1982 dollars, producers' durable equipment (Q).—Source 1 (3,17)
89. Gross private residential fixed investment in 1982 dollars (Q).—Source 1 (3,18)
90. Ratio, civilian employment to population of working age (M).—Source 3 (2,11)
91. Average duration of unemployment in weeks (M).—Source 3 (2,12)
92. Change in manufacturers' unfilled orders in 1982 dollars, durable goods industries, smoothed (M).—Sources 1, 2, and 3 (2,10)
93. Free reserves (M).—Sources 1 and 2 (4)
94. Member bank borrowings from the Federal Reserve (M).—Source 4 (4)
95. Ratio, consumer installment credit outstanding to personal income (M).—Sources 1 and 2 (3,12)
97. Backlog of capital appropriations, 1,000 manufacturing corporations (EOQ).—The Conference Board (2)
98. Index of producer prices for sensitive crude and intermediate materials (M).—Sources 1 and 3 (3)
99. Change in sensitive materials prices, smoothed (M).—Sources 1, 3, and Commodity Research Bureau, Inc. (3,10)

100. New plant and equipment expenditures by business in 1982 dollars (Q).—Source 2 (3,17)
101. Commercial and industrial loans outstanding in 1982 dollars (M).—Sources 1, 3, 4, and The Federal Reserve Bank of New York (4,12)
102. Change in money supply M2 (M).—Sources 1 and 4 (4,20)
105. Money supply M1 in 1982 dollars (M).—Sources 1, 3, and 4 (4)
106. Money supply M2 in 1982 dollars (M).—Sources 1, 3, and 4 (4,10)
107. Ratio, gross national product to money supply M1 (Q).—Sources 1 and 4 (4)
108. Ratio, personal income to money supply M2 (M).—Sources 1 and 4 (4)
109. Average prime rate charged by banks (M).—Source 4 (4,12)
110. Funds raised by private nonfinancial borrowers in credit markets (Q).—Source 4 (4,20)
111. Change in business and consumer credit outstanding (M).—Sources 1, 4, Federal Home Loan Bank Board, and The Federal Reserve Bank of New York (4)
112. Net change in business loans (M).—Sources 1, 4, and The Federal Reserve Bank of New York (4,20)
113. Net change in consumer installment credit (M).—Sources 1 and 4 (4,20)
114. Discount rate on new issues of 91-day Treasury bills (M).—Source 4 (4,21)
115. Yield on long-term Treasury bonds (M).—U.S. Department of the Treasury (4,21)
116. Yield on new issues of high-grade corporate bonds (M).—Citibank and U.S. Department of the Treasury (4,21)
117. Yield on municipal bonds, 20-bond average (M).—The Bond Buyer (4)
118. Secondary market yields on FHA mortgages (M).—U.S. Department of Housing and Urban Development, Federal Housing Administration (4)
119. Federal funds rate (M).—Source 4 (4,21)
120. Change in Consumer Price Index for services, smoothed (M).—Sources 1 and 2 (3,12)

CURRENT BUSINESS STATISTICS

New features in this issue. The "Foreign Trade" section now includes the merchandise trade balance, exports and imports in constant 1987 dollars, and export and import price indexes.

Series originating in Government agencies are not copyrighted and may be reprinted freely. Series from private sources are provided through the courtesy of the compilers and are subject to their copyrights.

Current data for the series shown in the S-pages are available on diskette on a subscription basis or from the Commerce Department's Economic Bulletin Board. Historical data, data sources, and methodological notes for each series are published in BUSINESS STATISTICS, 1961-88. For more information, write to Business Statistics Branch, Current Business Analysis Division (BE-53), Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230.

NOTE.—This section of the SURVEY is prepared by the Business Statistics Branch.

Unless otherwise stated in footnotes below, data through 1988 and methodological notes are as shown in BUSINESS STATISTICS, 1961-88	Annual		1990						1991								
	1989	1990	Aug.	Sept.	Oct.	Nov.	Dec.		Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.

Page S-1

† Revised series. See Tables 2-6-2-9 in the July 1990 SURVEY for revised estimates for 1987-89.

‡ Includes inventory valuation and capital consumption adjustments

§ Monthly estimates equal the centered three-month average of personal saving as a percentage of the centered three month moving average of disposable personal income

◇ See note "◇" for p. S-2.

Page S-2

1. Based on data not seasonally adjusted.

◇ Effective April 1990 SURVEY, the industrial production index has been revised back to 1977 and has a new base year of 1987. A more detailed explanation of this revision is in the April 1990 *Federal Reserve Bulletin*. Historical data are available from the Industrial Output Section, Mail Stop 82, Division of Research and Statistics, Federal Reserve Board, Washington, DC 20551.

Includes data not shown separately.

Page S-3

Includes data for items not shown separately

† Effective with the April 1991 SURVEY, M3 data have been revised to benchmark the data to the 1987 Census of Manufactures and 1988 Annual Survey of Manufactures, and to convert the series to the 1987 SIC codes. Revisions related to benchmarking affect all categories back to 1982. Revisions resulting from the SIC conversion affect about half the categories back to 1958. The coverage for some of the series in the market category has been changed.

Page S-4

1. Based on data not seasonally adjusted

Includes data for items not shown separately.

‡ Includes textile mill products, leather and products, paper and allied products, and printing and publishing industries, unfilled orders for other nondurable goods industries are zero

◇ For these industries (food and kindred products, tobacco, apparel and other textile products, petroleum and coal, chemicals and allied products, and rubber and plastics products) sales are considered equal to new orders.

† See note "†" for p. S-3

Page S-5

@ Compiled by Dun & Bradstreet, Inc.

Includes data for items not shown separately

§ Ratio of prices received to prices paid (parity index)

† See note "†" for p. S-4

‡ In the Feb. and July issues of the SURVEY each year, data for the most recent six to eight years are subject to revise and are available upon request

†† See note "††" for p. S-3

Page S-6

§ For producer price indexes of individual commodities, see respective commodities in the Industry section beginning p. S-19. All indexes subject to revision four months after original publication.

Includes data for items not shown separately.

† Effective with the Feb. 1991 SURVEY, data have been revised back to 1986 and are available upon request

Page S-7

1. Computed from cumulative valuation total

2. Index as of Oct. 1, 1991: building, 412.3; construction, 455.4

3. Beginning Dec. 1988, series has been discontinued by the Bureau of the Census

† Effective July 1991 SURVEY, data have been revised back to 1986. Effective July 1990 SURVEY, data were revised back to 1985. Revised data are available from the Construction Statistics Division at the Bureau of the Census, Washington, DC 20233

Includes data for items not shown separately.

§ Data for Mar., May, Aug., and Nov. 1990, and Jan., May, Aug., and Oct. 1991 are for five weeks; other months four weeks.

◇ Effective Feb. 1990 SURVEY, data for seasonally adjusted housing starts have been revised back to 1987. These revisions are available upon request.

@ Effective Feb. 1990 SURVEY, data for seasonally adjusted manufacturers' shipments of mobile homes have been revised back to 1987.

† Effective May 1990 SURVEY, data for seasonally adjusted building permits have been revised back to 1988 and are available upon request.

* Series first shown in the July 1990 SURVEY. The fixed-weighted price index is a weighted average of the individual price index series used to deflate the Value of New Construction Put in Place (VIP) series. In calculating the index, the weights (the composition of current dollar VIP in 1987 by category of construction) are held constant. Consequently, the index reflects only changes in prices. The implicit price deflator is a derived ratio of total current to constant dollar VIP (multiplied by 100). It is the average of the individual price indexes used in the deflation of VIP, but the prices are weighted by the composition of VIP each period. As a result, the implicit price deflator reflects not only changes in prices, but also changes in the composition of VIP, and its use as a measure of price change is discouraged. Effective July 1991 SURVEY, data have been revised back to 1986

†† Effective May 1991 SURVEY, the Boeckh indexes have a new base year of 1987

‡ Effective Sept. 1990 SURVEY, the construction cost index for the Federal Highway Administration has been revised back to 1986 and has a new base year of 1987=100

Page S-8

1. Advance estimate.

2. Beginning with Feb. 1989 data, associations in conservatorship are excluded.

◇ Home mortgage rates (conventional first mortgages) are under money and interest rates on p. S-14.

§ Data include guaranteed direct loans sold

Includes data for items not shown separately.

@ Data are for closed mortgage loans of thrift institutions insured by the Savings Association Insurance Fund (SAIF)—FSLIC-insured institutions prior to Sept. 1989.

† Effective April 1991 SURVEY, estimates of wholesale sales have been revised back to January 1988 and wholesale inventories have been revised back to January 1989. Revised data and a summary of changes appear in the report *Revised Monthly Wholesale Trade, Sales and Inventories January 1984-December 1990, BW90-R*, available from the Bureau of the Census, Washington, DC 20233.

‡ Effective March 1991 SURVEY, retail trade data have been revised. Estimates of retail sales have been revised back to January 1988 and inventories have been revised back to January 1989. (In 1990 data were revised back to 1982.) Revised data and a summary of changes will appear in the report *Revised Monthly Retail Sales and Inventories, January 1981-December 1990, BR90-R*, available from the Bureau of the Census, Washington, DC 20233

Page S-9

1. Advance estimate.

Includes data for items not shown separately.

◇ Effective with the January 1991 SURVEY, the seasonally adjusted labor force series have been revised back to January 1986. The January 1991 issue of *Employment and Earnings* contains the new seasonal adjustment factors, a description of the current methodology, and revised data for the most recent 13 months or calendar quarters. Revised monthly data for the entire 1986-90 revision period appear in the February 1991 issue of *Employment and Earnings*.

† The participation rate is the percent of the civilian noninstitutional population in the civilian labor force. The employment-population ratio is civilian employment as a percent of the civilian noninstitutional population, 16 years and over.

@ Data include resident armed forces.

† See note "†" for p. S-8

Page S-10

◇ See note "◇" for p. S-9.

§ Effective with the Sept. 1990 and June 1991 issues of the SURVEY, data have been revised, respectively back to April 1988 and April 1989, unadjusted, and back to Jan. 1985 and Jan. 1986, seasonally adjusted, to reflect new benchmarks and seasonal adjustment factors. In addition the Sept. 1990 revision included the conversion of the industry series to 1987 SIC codes. Industry series affected by revisions in the SIC have been revised back to the inception of the series, to the extent possible. In addition, all constant-dollar and indexed series were recomputed on a 1982 base. The Sept. 1990 and June 1991 issues of *Employment and Earnings* contain detailed descriptions of the effects of these revisions. All of the revised historical series will be published in a special supplement to *Employment and Earnings*. This supplement, when combined with the historical bulletin, *Employment, Hours, and Earnings, United States, 1909-90* will comprise the full historical series on national data obtained from the establishment survey

Page S-11

§ See note "§" for p. S-10

† This series is not seasonally adjusted because the seasonal component is small relative to the trend cycle and/or irregular components and consequently cannot be separated with sufficient precision.

◇ Production and nonsupervisory workers

Page S-12

§ See note "§" for p. S-10.

◇ Production and nonsupervisory workers.

† Earnings in 1982 dollars reflect changes in purchasing power since 1982 by dividing by Consumer Price Index. Effective Feb. 1990 and 1991 issues of the SURVEY, this series has been revised, respectively, back to 1985 and 1986 to reflect new seasonal factors for the CPI-W. Revised data are available upon request.

§§ Effective with the June 1991 SURVEY, data have been revised back to 1989 and are available upon request. Wages as of Oct. 1, 1991. Common, \$19.11, Skilled, \$25.09

† Excludes farm, household, and Federal workers

@ Effective with the April 1990 SURVEY, the employment cost index is based on June 1989=100, rather than June 1981=100. Historical data for both June 1989 and June 1981 bases are available from the Bureau of Labor Statistics, Division of Employment Cost Trends, 441 G Street, N.W., Washington, DC 20212.

†† These series were affected by an error in the Sept. 1990 SURVEY. The stub for "Transportation equipment" was omitted. Hourly earnings for "Transportation equipment" were shown following the stub for "Electronic and other electrical equipment. Hourly earnings for "Electronic and other electrical equipment" were shown following the stub for "Industrial machinery and equipment". Hourly earnings for "Industrial machinery and equipment" were shown following the stub for "Machinery, except electrical", which was the former name for that industry (SIC 35).

* Series first shown in the July 1991 SURVEY. Wages and salaries are defined as the hourly straight-time wage rate or, for workers not paid on an hourly basis, straight-time earnings divided by the corresponding hours. Straight-time wage and salary rates are total earnings before payroll deductions, excluding premium or supplemental pay for overtime and for work on weekends and holidays, shift differentials, and nonproduction bonuses such as lump-sum payments provided in lieu of wage increases. Production bonuses, incentive earnings, commission payments, and cost-of-living adjustments are included in straight-time wage and salary rates.

Page S-13

1. Effective Feb. 28, 1989, there was a break in the series due to the enlargement of the panel of reporting dealers to 17 and of reporting direct issuers to 36. End of month figures on the old basis are as follows. All issuers, 481,734, financial companies, 373,717, dealer placed, 172,330, directly placed, 201,387; and nonfinancial companies, 108,017.

2. Average for Dec.

Includes data for items not shown separately.

§ Excludes loans and federal funds transactions with domestic commercial banks and includes valuation reserves (individual loan items are shown gross, i.e., before deduction of valuation reserves).

† Covers 50 States and the District of Columbia. Only regular benefits are included.

@ Average weekly insured unemployment for 12-month period divided by average monthly covered employment (lagging 4 full quarters for annual figure and 2 full quarters for monthly figure).

† Effective Oct. 1989 SURVEY, loans by loan type are provided by the Federal Farm Credit Banks Funding Corporation.

◇ Effective with the April 1990 SURVEY, the reserves of depository institutions have been revised back to 1984 and are available upon request.

Page S-14

1. Data are for fiscal years ending Sept. 30 and may include revisions not distributed to the months.

2. Weighted by number of loans.

3. Beginning Feb. 1988, data suspended by the Farm Credit Administration, which is revising the information it collects and amending the reports it distributes.

§ Effective Mar. 1990 SURVEY, data have been revised to reflect new benchmark and seasonal adjustments and are available from the Banking and Money Market Statistics Section of the Division of Monetary Affairs at the Federal Reserve Board, Washington, DC 20551.

Includes data for items not shown separately

◇ Excludes loans to commercial banks in the U.S.

† Rates on the commercial paper placed for firms whose bond rating is Aa or the equivalent

†† Courtesy of *Metals Week*.

@ Average effective rate

† Effective May 1990 SURVEY, the consumer installment credit series have been revised back to 1980 to incorporate new information and updated seasonal adjustment factors. These revisions are available upon request.

* Series first shown in the June 1990 SURVEY

†† This series, first shown in the June 1990 SURVEY, represents the outstanding balances of loans that the loan originator has sold and are no longer carried on the loan originator's books. The loans are pooled and securities are issued on the pools.

Page S-15

1. Beginning Jan. 1989, the primary public offering statistics have been discontinued by the Securities and Exchange Commission.

2. Effective April 1991 SURVEY, the Security Markets series have been discontinued.

3. Money market deposit accounts are included with savings deposits.

† Effective Feb. 1991 SURVEY, the money stock measures and components have been revised and are available from the Banking Section of the Division of Research and Statistics at the Federal Reserve Board, Washington, D.C. 20551.

†† Includes ATS and NOW balances at all depository institutions, credit union share draft balances, and demand deposits at thrift institutions.

◇ Overnight (and continuing contract) RP's are those issued by commercial banks to the nonbank public, and overnight Eurodollars are those issued by Caribbean branches of member banks to U.S. nonbank customers.

@ Small time deposits are those issued in amounts of less than \$100,000. Large time deposits are those issued in amounts of \$100,000 or more and are net of the holdings of domestic banks, thrift institutions, the U.S. Government, money market mutual funds, and foreign banks and official institutions.

Includes data for items not shown separately

Page S-16

1. The railroad average was discontinued by Moody's on July 13, 1989. Therefore, the July average reflects only eight working days.

2. Effective Oct. 3, 1990, the German Democratic Republic (GDR, East Germany) ceased to exist as a sovereign state and became a part of the Federal Republic of Germany. Accordingly, effective with the statistics for Oct. 1990, all merchandise imported from or exported to the former GDR will be included as trade with the Federal Republic of Germany.

3. Beginning Jan. 1991 data, Roadway Services, Inc. will be included in the Dow Jones Transportation Average replacing Pan Am Corp. Roadway Services is listed on the NASDAQ National Market System. Comparability with earlier averages is not affected by this change.

@ See note "4" for p. S-19 regarding the new commodity classification systems introduced Jan. 1989. Data may not equal the sum of the geographic regions, or commodity groups and principal commodities, because the revisions to the totals are not reflected in the component items.

§ Number of issues represents number currently used, the change in number does not affect the continuity of the series.

† For bonds due or callable in 10 years or more.

Includes data for items not shown separately.

◇ The March through August 1991 issues of the SURVEY showed month-end yields for 1991 rather than monthly averages.

† Effective with the Mar. 1990 SURVEY, seas. adj. exports and imports have been revised back to Jan. 1988, and are available upon request.

Page S-17

1. Beginning with Jan. 1989 data, undocumented exports to Canada are now included, resulting in a break with Dec. 1988 data.

2. Beginning Jan. 1989, buses are excluded from "Motor vehicles and parts" and included in "Other manufactured goods," resulting in a break with Dec. 1988 data.

3. See note "2" for p. S-16

@ See note "@" for p. S-16

† See note "†" for p. S-16

Includes data not shown separately.

◇ Data include undocumented exports to Canada, which are based on official Canadian import totals.

* Series first shown in the October 1991 SURVEY. The deflators for the constant dollar series are primarily based upon the monthly price indexes published by the Bureau of Labor Statistics using techniques developed for the National Income and Product Accounts by the Bureau of Economic Analysis.

Page S-18

1. Reported annual total; quarterly or monthly revisions are not available.

2. For month shown

3. Beginning Aug. 1989, the export and import indexes have been discontinued by the Census Bureau.

* Series first shown in the October 1991 SURVEY. Source: Bureau of Labor Statistics.

Includes data for items not shown separately

§ Total revenues, expenses, and income for all groups of carriers also reflect nonscheduled service.

† The threshold for Class I railroad status is adjusted annually by the Interstate Commerce Commission to compensate for inflation.

◇ Average daily rent per room occupied, not scheduled rates

Data represent entries to a national park for recreational use of the park, its services, conveniences, and/or facilities

† Before extraordinary and prior period items

@ Changes in these unit value indexes may reflect changes in quality or product mix as well as price changes.

†† Effective with the Dec. 1989 SURVEY, data for 1981-88 have been revised and are available upon request.

†† Effective with the Mar. 1990 SURVEY, data for 1985-89 have been revised and are available upon request.

Page S-19

1. Reported annual total, monthly or quarterly revisions are not available

2. Less than 500 metric tons

3. Figure suppressed because it did not meet Census publication standards

4. Beginning with 1989 data, merchandise trade data are based upon two new commodity classification systems, the International Harmonized System and Revision 3 of the Standard International Trade Classification and, as a result, data may not be directly comparable to 1988 and earlier years.

5. Data are partially estimated for this quarter and are not available

6. Beginning in 1991, data are available only on a quarterly basis

Includes data for items not shown separately

§ Data are reported on the basis of 100 percent content of the specified material unless otherwise indicated

† Effective with the Jan. 1990 SURVEY, revisions for 1987-88 are available upon request

Page S-20

1. Reported annual total; monthly or quarterly revisions are not available.
 2. Quarterly data are no longer available.
 3. See note 4 for p. S-19.
 4. Beginning in 1991, data are available only on a quarterly basis
- § Data are not wholly comparable from year to year because of changes from one classification to another.
- @ Includes less than 500 electric generation customers not shown separately
- † Effective with the Jan. 1990 SURVEY, revisions for 1987-88 are available upon request.
- ◇ Effective with the Dec. 1989 SURVEY, revisions for 1987-88 are available upon request.

Page S-21

1. Previous year's crop. New crop is not reported until Sept. (crop year: Sept. 1-Aug. 31)
 2. Crop estimate for the year.
 3. Stocks as of June 1.
 4. Stocks as of June 1 and represents previous year's crop, new crop not reported until June (beginning of new crop year).
 5. Series has been discontinued.
 6. Stock estimates are available once a year as June 1 stocks and shown here in the May column and (as previous year's crop) in the annual column.
 7. Stocks as of Dec. 1
 8. See note 4 for p. S-19.
- § Excludes pearl barley.
- @ Quarterly data represent the 3-month periods Dec.-Feb., Mar.-May, June-Aug., and Sept.-Nov. Annual data represent Dec.-Nov.
- † Coverage for 21 selected States, representing approximately 85 percent of U.S. production

Page S-22

1. See note 4 for p. S-19.
- § Cases of 30 dozen.
- * Series first shown in the Jan. 1991 SURVEY.

Page S-23

1. Crop estimate for the year.
 2. Reported annual total, revisions not distributed to the months.
 3. Data suppressed because they did not meet Census publication standards
 4. See note 4 for p. S-19
 5. Data withheld to avoid disclosing figures for individual companies.
 6. Beginning in 1991, data are available only on a quarterly basis.
- # Totals include data for items not shown separately.

Page S-24

1. Reported annual total; monthly revisions are not available.
2. See note 4 for p. S-19.
3. Less than 500 tons
4. Beginning in 1990, monthly data have been discontinued. Annual data will continue to be available.

Page S-25

1. Reported annual total; monthly revisions are not available.
 2. For month shown.
 3. Effective with Jan. 1989, import data are for consumption; earlier periods of data are general imports. See also note 4 for p. S-19 regarding the introduction of new classification systems.
 4. Beginning in 1990, monthly data have been discontinued. Annual data will continue to be available.
- @ Includes foreign ores.
- § Source: *Metals Week*.

Page S-26

1. Reported annual total; monthly revisions are not available.
 2. Less than 50 tons.
 3. See note 3 for p. S-25.
 4. Break in comparability beginning Jan. 1, 1991, because of a change in the *Metals Week* pricing series for zinc.
- ◇ Includes secondary smelters' lead stocks in refinery shapes and in copper-base scrap
- † Source for monthly data, American Bureau of Metal Statistics. Source for annual data, Bureau of Mines.
- # Includes data not shown separately.
- † Effective April 1991 SURVEY, the materials handling index has been revised back to 1982 and now includes lift trucks. The index also includes new orders for automatic guided vehicles, automated storage and retrieval systems, below hook lifters, cranes, hoists, monorails, racks, shelving, casters and floor trucks, and conveyors. Revised data are available upon request
- @@ Price represents North American Mean
- @ Effective with the Sept. 1990 SURVEY, the new orders index numbers have been converted to a new base year of 1987=100. Data back to 1988 are available upon request.

Page S-27

1. Annual total includes revisions not distributed to the months.
 2. See note 4 for p. S-19.
 3. Beginning in 1990, quarterly data have been discontinued. Annual data will continue to be available.
 4. Beginning with May 1991 data, monochrome production numbers are no longer included
- # Includes data for items not shown separately.
- § Includes nonmarketable catalyst coke.
- ◇ Includes small amounts of "other hydrocarbons and alcohol new supply (field production)," not shown separately.
- †† March, June, September and December are five-week months. All others consist of four weeks.

Page S-28

1. Reported annual total; revisions not allocated to the months.
 2. See note 4 for p. S-19.
 3. Beginning May 1991, the leaded gasoline price is not statistically valid for publication.
- # Includes data for items not shown separately.

Page S-29

1. Reported annual total; revisions not allocated to the months.
 2. See note 4 for p. S-19.
- ◇ Source: American Paper Institute. Total U.S. estimated consumption by all newspaper users. See also note "†" for this page.
- § Effective with the October 1990 SURVEY, data have been revised back to 1989 to reflect adjustments made by the Rubber Manufacturers Association's Rubber Statistical Committee
- † Effective with the October 1990 SURVEY, synthetic data consisting of Butyl, polyisoprene, polychloroprene, silicone, and other elastomers have been revised in keeping with data provided by the Census Bureau's MA30A report beginning in 1990. Also see note "§" on this page.
- # Compiled by the American Newspaper Publishers Association.
- † Effective with the March 1990 SURVEY, Canadian newspaper statistics have been revised back to Jan. 1982 to exclude supercalendered and some soft-nip calendered paper that was originally classified as newsprint and is now classified as uncoated groundwood papers. This revision also affects estimated consumption. Revised data are available upon request.

Page S-30

1. Reported annual total; revisions not allocated to the months.
 2. Data are being withheld to avoid disclosing data from individual firms
 3. Data cover five weeks; other months, four weeks.
 4. Beginning Jan. 1989, sales of industrial plasters are included with building plasters
 5. Oct. 1 estimate of the 1991 crop.
 6. Total for crop year, Aug. 1-Jul. 31.
 7. Beginning in 1991, data are available only on a quarterly basis
- # Includes data for items not shown separately.
- ◇ Cumulative ginnings to the end of month indicated.
- § Bales of 480 lbs.

Page S-31

1. Less than 500 bales.
 2. Annual total includes revisions not distributed to the months.
 3. Average for crop year, Aug. 1-Jul. 31
 4. For five weeks, other months four weeks.
 5. See note 4 for p. S-19.
 6. Beginning in 1990, data are available only on a quarterly basis.
 7. Beginning in 1991, data are available only on a quarterly basis.
- ◇ Based on 480-lb. bales, preliminary price reflects sales as of the 15th, revised price reflects total quantity purchased and dollars paid for the entire month (revised price includes discounts and premiums).
- § Bales of 480 lbs
- † The total may include some miscellaneous wool imports.
- * Series first shown in the July 1990 SURVEY.

Page S-32

1. Annual total includes revisions not distributed to the months.
 2. Production of new vehicles (thous. of units) for Sept. 1991: *passenger cars*, 481; *trucks and buses*, 309.
 3. Data are reported on an annual basis only.
 4. See note 4 for p. S-19.
 5. Beginning Jan. 1989, shipments of trailer bodies are included with trailer chassis to avoid disclosure of data from individual firms
 6. Effective with the August 1990 SURVEY, data have been revised back to 1987 and are available upon request.
 7. Data withheld to avoid disclosing figures for individual companies.
- # Total includes backlog for nonrelated products and services and basic research.
- § Domestic comprise all cars assembled in the U.S. and cars assembled in Canada and imported to the U.S. under the provisions of the Automotive Products Trade Act of 1965. Imports comprise all other cars.
- ◇ Courtesy of R.L. Polk & Co., republication prohibited. Because data for some States are not available, month-to-month comparisons are not strictly valid
- * Series first shown in the August 1990 SURVEY.
- † Includes some imported trucks over 10,000 lbs. GVW
- ‡ Excludes railroad-owned private refrigerator cars and private line cars.
- @ Effective with the Mar. 1991 SURVEY, seasonally adjusted retail inventories for trucks and buses have been revised back to 1989, and are available upon request

Index to Current Business Statistics

Sections			
General:			
Business indicators	1-5	Disposition of personal income	1
Commodity prices	5, 6	Distilled spirits	20
Construction and real estate	7, 8	Dividend payments	1, 15
Domestic trade	8, 9	Drugstores, sales	8, 9

BEA Information

BEA's economic information is available in publications, on computer tapes, on diskettes, and through a variety of other products and services. Most of these are described in *A User's Guide to BEA Information*. For a copy, send a self-addressed stamped envelope (8 1/2 by 11 inches, with 75 cents postage) to Public Information Office, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230.

Available From GPO

ORDER FROM: Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Payment may be by check (made payable to Superintendent of Documents) or charged to a GPO deposit account number, VISA, or MasterCard. Phone (202) 783-3238 or fax (202) 275-0019.

SURVEY OF CURRENT BUSINESS. Contains estimates and analyses of U.S. economic activity. Features include a review of current economic developments, articles pertaining to BEA's work on the national, regional, and international economic accounts and related topics, quarterly national income and product accounts tables, a 28-page section of business cycle indicators containing tables for over 250 series and charts for about 130 series, and a 36-page section of current business statistics presenting over 1,900 major economic series obtained from public and private sources. Monthly. Annual subscription. \$29.00 second class mail, \$76.00 first class mail. Single copy: \$8.00.

Business Statistics, 1961-88. (1989) Provides monthly or quarterly data for 1985-88 and annual data for 1961-88 for series that appear in the SURVEY OF CURRENT BUSINESS. Also contains definitions of terms, sources of data, and methods of compilation. 328 pp. \$16.00 (GPO Stock No. 003-010-00198-4).

The National Income and Product Accounts of the United States, 1929-82: Statistical Tables. (1986) Contains detailed estimates of the national income and product accounts for 1929-82 from the comprehensive revision released in 1985. Also includes definitions of the major components of the accounts and of the major sectors of the economy. 442 pp. \$23.00 (GPO Stock No. 003-010-00174-7).

NIPA Methodology Papers:

No. 1 through No. 4. Available from NTIS (see box below).

No. 5: *Government Transactions.* (1988) Presents the conceptual basis and framework of government transactions in the national income and product accounts; describes the presentations of the estimates; and delineates the sources and methods used to prepare estimates of Federal transactions and of State and local transactions. 120 pp. \$5.50 (GPO Stock No. 003-010-00187-9).

No. 6: *Personal Consumption Expenditures.* (1990) Presents the conceptual basis and framework of personal consumption expenditures in the national income and product accounts. Describes the presentation of the estimates and the sources and methods used to prepare them. 92 pp. \$4.50 (GPO Stock No. 003-010-00200-0).

BEA Regional Projections to 2040. (1990) Three volumes. Presents regional projections for selected economic and population variables for 1995, 2000, 2005, 2010, 2020, and 2040. Includes projections for employment and earnings by industry and for personal income, as well as a statement of methodology.

NIPA Methodology Papers 1 through 4 (photocopies) are available from the National Technical Information Service (NTIS)

No. 1. *Introduction to National Economic Accounting.* (1985) 19 pp. \$12.50 (NTIS Accession No. PB 85-247567).

No. 2. *Corporate Profits, Profits Before Tax, Profits Tax Liability, and Dividends.* (1985) 67 pp. \$19.00 (NTIS Accession No. PB 85-245397).

No. 3. *Foreign Transactions.* (1987) 52 pp. \$19.00 (NTIS Accession No. PB 88-100649).

No. 4. *GNP: An Overview of Source Data and Estimating Methods.* (1987) 36 pp. \$17.00 (NTIS Accession No. PB 88-134838).

ORDER FROM: U.S. Department of Commerce, National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22161. Payment may be by check (made payable to NTIS) or charged to an NTIS deposit account number, American Express, VISA, or Mastercard. Phone (703) 487-4650 or fax (703) 321-8547.

Vol. 1: *States.* 144 pp. \$7.50 (GPO Stock No. 003-010-00199-2).

Vol. 2: *Metropolitan Statistical Areas.* 352 pp. \$17.00 (GPO Stock No. 003-010-00211-5).

Vol. 3: *BEA Economic Areas.* 200 pp. \$10.00 (GPO Stock No. 003-010-00212-3).

State Personal Income: 1929-87. (1989) Contains annual estimates for 1929-87 of total personal income, annual estimates for 1948-87 of disposable personal income, and quarterly estimates for 1969-88 of total personal income. Also contains a statement of methodology. 320 pp. \$16.00 (GPO Stock No. 003-010-00197-6).

Local Area Personal Income, 1984-89. (1991) Contains estimates of personal income by major type of payment and earnings by major industry, population, and total and per capita personal income for regions, States, counties, and metropolitan areas.

Vol. 1. *Summary. Regions, States, and Metropolitan Areas.* Estimates for the United States, regions, States, and metropolitan areas. Also contains county definitions of metropolitan areas, a detailed description of sources and methods, and samples of tables available. 304 pp. \$15.00 (GPO Stock No. 003-010-00216-6).

Vol. 2. *New England, Mideast, and Great Lakes Regions.* (CT, DE, DC, IL, IN, ME, MD, MA, MI, NH, NJ, NY, OH, PA, RI, VT, WI) 324 pp. \$16.00 (GPO Stock No. 003-010-00217-4).

Vol. 3. *Plains Region.* (IA, KS, MN, MO, NE, ND, SD) 240 pp. \$12.00 (GPO Stock No. 003-010-00218-2).

Vol. 4. *Southeast Region.* (AL, AR, FL, GA, KY, LA, MS, NC, SC, TN, VA, WV) 376 pp. \$18.00 (GPO Stock No. 003-010-00219-1).

Vol. 5. *Southwest, Rocky Mountain, and Far West Regions and Alaska and Hawaii.* (AK, AZ, CA, CO, HI, ID, MT, NV, NM, OK, OR, TX, UT, WA, WY) 328 pp. \$16.00 (GPO Stock No. 003-010-00220-4).

The Balance of Payments of the United States: Concepts, Data Sources, and Estimating Procedures. (1990) Describes in detail the methodology used in constructing the balance of payments estimates for the United States. Explains underlying principles, and describes the presentation of the estimates. Includes a comprehensive list of data sources. 160 pp. \$8.50 (GPO Stock No. 003-010-00204-2).

Foreign Direct Investment in the United States: Operations of U.S. Affiliates of Foreign Companies. (1991) Contains information on the financial structure and operations of nonbank U.S. affiliates of foreign direct investors. Data are classified by industry of U.S. affiliate, by country and industry of ultimate beneficial owner, and, for selected data, by State. 92 pp. \$5.00 each. Preliminary 1989 Estimates: GPO Stock No. 003-010-00223-9; Revised 1988 Estimates: GPO Stock No. 003-010-00224-7.

Foreign Direct Investment in the United States: 1987 Benchmark Survey, Final Results. (1990) Contains information for 1987 on the financial structure and operations of U.S. affiliates of foreign direct investors, on the foreign direct investment position in the United States, and on balance of payments transactions between U.S. affiliates and their foreign parents. Data are classified by industry of affiliate, by country and industry of ultimate beneficial owner or foreign parent, and, for selected data, by State. Also contains a complete methodology and copies of survey forms and instructions. 284 pp. \$14.00 (GPO Stock No. 003-010-00210-7).

Foreign Direct Investment in the United States: Balance of Payments and Direct Investment Position Estimates, 1980-86. (1990) Contains final estimates of the foreign direct investment position in the United States and of balance of payments transactions between U.S. affiliates and their foreign parent groups for calendar years 1980-86. Includes estimates by country of foreign parent and industry of U.S. affiliate. Most of the estimates in this publication appeared earlier in various issues of the SURVEY OF CURRENT BUSINESS. 56 pp. \$3.00 (GPO Stock No. 003-010-00215-8).

U.S. Direct Investment Abroad: Operations of U.S. Parent Companies and Their Foreign Affiliates, Revised 1988 Estimates. (1991) Presents results of BEA's annual survey of the worldwide operations of U.S. multinational companies. Contains information on the financial structure and operations of both U.S. parent companies and their foreign affiliates. Data are classified by country and industry of foreign affiliate and by industry of U.S. parent. 80 pp. \$4.25. (GPO Stock No. 003-010-00221-2).

BEA Information

BEA's economic information is available in publications, on computer tapes, on diskettes, and through a variety of other products and services. Most of these are described in *A User's Guide to BEA Information*. For a copy, send a self-addressed stamped envelope (8 1/2 by 11 inches, with 75 cents postage) to Public Information Office, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230.

Available From GPO

ORDER FROM: Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Payment may be by check (made payable to Superintendent of Documents) or charged to a GPO deposit account number, VISA, or MasterCard. Phone (202) 783-3238 or fax (202) 275-0019.

SURVEY OF CURRENT BUSINESS. Contains estimates and analyses of U.S. economic activity. Features include a review of current economic developments, articles pertaining to BEA's work on the national, regional, and international economic accounts and related topics, quarterly national income and product accounts tables, a 28-page section of business cycle indicators containing tables for over 250 series and charts for about 130 series, and a 36-page section of current business statistics presenting over 1,900 major economic series obtained from public and private sources. Monthly. Annual subscription. \$29.00 second class mail, \$76.00 first class mail. Single copy: \$8.00.

Business Statistics, 1961-88. (1989) Provides monthly or quarterly data for 1985-88 and annual data for 1961-88 for series that appear in the SURVEY OF CURRENT BUSINESS. Also contains definitions of terms, sources of data, and methods of compilation. 328 pp. \$16.00 (GPO Stock No. 003-010-00198-4).

The National Income and Product Accounts of the United States, 1929-82: Statistical Tables. (1986) Contains detailed estimates of the national income and product accounts for 1929-82 from the comprehensive revision released in 1985. Also includes definitions of the major components of the accounts and of the major sectors of the economy. 442 pp. \$23.00 (GPO Stock No. 003-010-00174-7).
