LASER SENSOR DATABASE: TAPE DISTRIBUTIONS

D.C. CARMER
J.L. GROOMS

Environmental Research Institute of Michigan
P.O. Box 134001
Ann Arbor, MI 48113-4001

NOVEMBER 1991

For Period October 1990 - September 1991

Prepared for:
Air Force Avionics Laboratory
Wright Laboratory
Air Force Systems Command
Wright-Patterson Air Force Base, OH 45433-6543

Prepared Through:
Defense Electronics Supply Center
Dayton, OH 45444-5208

Contract No. DLA900-88D-0392
Delivery Order 0017

This document has been approved
for public release and sale; its
distribution is unlimited.

P.O. Box 134001
Ann Arbor, MI 48113-4001

Annual Report

Background

The Laser Sensor Data Base consists of an archive of 493 data tapes and associated data descriptors residing in computer files. These data were collected under the Air Force's Cruise Missile Advanced Guidance Program, 1984-1989 and include laser range, laser intensity, passive thermal IR and visible TV imagery.

The current data base maintenance contract will extend over five years and provides for maintenance of the records, answering inquiries and providing overviews of the imagery. Distribution of requested tapes is accomplished at cost to users approved by WL/AARI, Mr. Robert Zumrick, telephone (513) 255-5922.

Activities

Inquiries about the data base are listed in Table 1. Information was provided to six people concerning data they already had received or potential acquisition of new data. No tapes were distributed during the year.

Plans

A new tape catalog listing will be made to better describe the data available. This listing will be mailed when requested to enable users to select desired tapes by specific tape numbers.
