A "Sea Bear" 200 multi-beam echosounding system was purchased and installed on R/V "Pelican" (GO-1). The grant for ONR provides partial funding for the purchase of the hardware unit, but other sources will be required to meet the remainder of the purchase price and costs of installation and testing. The system is installed and is currently providing colour cast and tide-gate readings over a swath up to 120 (depending on water depth).

Final Technical Report

A "Sea Beam 2000" multibeam echosounding system was purchased and installed in *R/V Melville* (AGOR 15). This grant from ONR provided partial funding for the purchase of the hardware; funds from other sources paid the remainder of the purchase price and all costs of installation and testing. The system is installed and operating well, providing contour maps and side-scan imaging over a swath up to 120° (depending on water depth).
