Environment and the Military

A Selected Bibliography

May 1993

93-14763

PREFACE

Environment and the Military: A Selected Bibliography was compiled in anticipation of the emphasis the study of environmental issues will continue to receive as one of the U.S. Army War College's AY94 curriculum's "special themes".

This listing of books, documents, videorecordings, and periodical articles covers references to resources which deal specifically with the military's commitment to preserving the earth's environment, as well as materials which address a broad range of other contemporary environmental topics.

It has been tailored to include only those materials published within the last five years that are readily available in the U.S. Army War College Library collection. For your convenience, we have added our library's call numbers at the end of each book entry (keep in mind that call numbers vary from library to library).

For additional information, please contact the compiler, Virginia Shope, Research and Information Services Branch, U.S. Army War College Library, DSN 242-3660 or Commercial (717) 245-3660.

Vision Statement: The Army will be a national leader in environmental and natural resources stewardship for present and future generations as an integral part of our mission.

US Department of the Army, U.S. Army Environmental Strategy into the 21st Century, 1992
