INTRODUCTION TO VOLUME II

This volume compiles the complete set of Soviet National Economic Balance tables as reconstructed in the DSA computerized data base. The first part of this volume contains the set of 55 working tables and the second part contains the set of 14 unified economic balance tables. The minor source table references are given on the opposite page of the individual working tables; each unified economic balance table is printed in two parts on separate pages. The unified economic balance template on page 121 is accompanied by a legend indicating the arithmetic functions contained in the unified economic balance tables. A description of the procedures used to construct the tables contained in this volume as well as an assessment of the reconstruction methodology are provided in Volume I, *Technical*. A List of Major Source Tables is also included in the front of this volume to identify the published Soviet statistical tables used to construct the Soviet National Economic Balance tables.
