INTRODUCTION

GENERAL

This Manual supplements DoD 1400.20-1-M, subject: DoD Program for Stability of Civilian Employment Policies, Procedures and Programs Manual, which implements the automated system for registering Department of Defense personnel scheduled for involuntary separation or demotion by reduction-in-force, or who decline functional transfer outside the commuting area, or who are satisfactorily completing duty in a foreign area, territory, possession, the Canal Zone or in the states of Alaska and Hawaii and the referral of such personnel for placement consideration at other DoD activities worldwide. This Manual is to be used to assist the civilian personnel officials when counseling employees for registration in the Priority Placement Program (PPP) and when identifying releasing offices reflected on Referral Resumes. This Manual describes DoD activities by their mission, location and skills structure, providing a logical basis for selection of locations throughout the country.

ORGANIZATION OF THE MANUAL

This Manual consists of the following: Introduction, an Alphabetical Index of Activities and Codes, a Numeric Index of Activities and Codes, Overseas Activities with capability of registering overseas employees, both displaced and nondisplaced; Activities with Special Registration Authority in the Overseas Employment Program; Activities with Requisitioning Authority in the Overseas Employment Program; DoD Activities by Labor Market Areas; and seven volumes by Zone and Overseas Theatre, which consists of a Table of Contents, Zone or Theatre Factual Information, Skills Index and Activity Descriptions. It is organized in seven volumes to coincide with the four geographical zones and three Overseas Theatres established in DoD 1400.20-1-M.

USE OF THE MANUAL BY RELEASING ACTIVITIES

This Manual can be used most effectively by registering activities through use of the skills index for each zone and the activity descriptions set forth by state and region, within each zone. Skills data contained in the Manual will, in many cases, serve to assist in arriving at a decision on the boundaries within which to register an employee.

When an individual is to be registered in the PPP, the determination of the skills and grade levels for which he/she is qualified must first be made. Once these skills are established, the next step is to determine the logical activities for which to register. Obviously, this logic must be based upon the existence of jobs at those activities. The personnel counselor would turn to the skills index of the releasing zone for the series which match those of the employee. Series titles are listed with each individual series. For example, if an employee is a Telephone Operator, GS-382, the counselor would turn to Series 382 in the Skills Index for the appropriate zone to find activities which have such positions.

An additional judgment can be made in registering the employee for any of these listed activities by recognizing his/her chances of a job opportunity based on the number of such positions existing at any one activity, as indicated in the Skills Index in groups of 1 to 5, 6 to 50, and 51 or more. If the numbers of skills at activities within a particular state or region are obviously abundant in matching employee skills, then individual activities, state, or region-wide registration may be appropriate. If the skills are not represented in sufficient numbers within the region, then a determination can be made on zone-wide or wider registration.

After initial selection of an activity is made, a further judgment can be made on the part of the personnel counselor and employee in terms of the geographical location of the activity, its mission and basic information about the activity and metropolitan area, which can be determined from the activity descriptions. Complete descriptions of the activities reflected for the series may be found within the list of descriptions by state and region, at the beginning of each Zone. Personnel counselors should become familiar with the skills and job structure within the state, region, and zone when registering employees for the Program and make use of this Manual in each instance, preferably showing the Manual to the employees as evidence of the logic of activity selections.

There is also a special listing of "DoD Activities by Labor Market Area," which is a listing by state, showing where there are two or more DoD activities in the same commuting or labor market area. This will serve to assist registrations for specific labor market areas. Further, when an employee is registered at one of the activities within such labor market area, consideration should be given to registering him/her for all activities within that area which have his/her skills.

The final selection of activities for which the CPO desires to register the employee will be reflected by state, region, zone, or individual activity code selection, as appropriate, on the employee registration form, DD Form 1817. All selections within the perimeter deemed appropriate by the registering CPO must be acceptable to the employee.

Since an employee may be registered for state, region, or zone-wide consideration, all DoD activities are listed within each Zone by the appropriate Region and the State in which they are physically located. The total listing of all DoD activities in these broad areas should be reviewed with the employee at the time of registration. It will be noted that remote sites with 50 or more full-time, continuing positions have been assigned the same numeric code as the servicing activity but with a different alpha suffix to differentiate them from the servicing activities. For example, Activity Code 511A is the servicing Civilian Personnel Office, while 511B is a remote site. Descriptions for these remote sites are listed according to physical location within the states and regions in order that users of this Manual will know which activities are located in a specific state, since the servicing CPO might be located in another state.

Selection of activities in Hawaii, Alaska, or Puerto Rico may be indicated by selection of the State or the Commonwealth of Puerto Rico and which will result in referral of the registrant to all activities in those states or commonwealth (or component activities in those areas if indicated) or may be indicated by individual selection of the desired activities located in those areas. Selection of the Atlanta Region or Zone 2 will not provide referral to activities in Puerto Rico. Selection of the Seattle Region or Zone 4 and the San Francisco Region or Zone 4 will not provide referral to activities in Alaska or Hawaii respectively.

USE OF THE MANUAL BY GAINING ACTIVITIES

This Manual may also be used effectively by Civilian Personnel Offices in receipt of Priority Placement Program Referral Resumes and Overseas Recruiting Offices (ORO's) in receipt of Overseas Employment Program Resumes after submitting DD Form 1818, Vacancy Requisition, to the Defense Data Support Center (DDSC).

Referral Resumes of DoD employees registered in the PPP do not contain the addresses of the referred registrants, requiring gaining CPO's to contact and make offers of employment direct to the releasing CPO. The releasing CPO's activity is identified by an assigned four-digit DoD Activity Code reflected at the top of the Referral Resume. The gaining office may make contact with the releasing CPO by referring to the four-digit code in the Numerical Index of Activities and Codes and further referring to the page number reflected therein for the releasing Activity Description and pertinent contact information.

UPDATING ACTIVITY DESCRIPTIONS AND ADDRESSES

Interim changes to this Manual will be issued by DDSC as necessary. Changes such as addition or deletion of an activity or change in activity address will be made immediately in the computer system when received by DDSC and will be entered in the next interim change to the Manual.

Major changes such as addition or deletion of an activity, changes in servicing of remote location, and major changes to mission statements are to be forwarded through the appropriate Component Coordinator for approval and submission to DDSC. All other changes, including changes in address, telephone numbers, number of civilian positions serviced, population within commuting area, housing availability, public transportation to the activity, nearest city and population, major city of Labor Market area, skills distribution, and minor changes to mission statements may be forwarded by the servicing Civilian Personnel Officer direct to the Defense Data Support Center, 1507 Wilmington Pike, Dayton, Ohio 45444-5310. For ease in submitting these changes to DDSC, activities may use Notification of Change, (page vi), which is authorized for local reproduction as needed.

OVERSEAS ACTIVITIES

It is essential that Priority Placement Program information be communicated quickly and accurately. The primary means of communication are through electrical message (TWX), the mail system, and by sending Faxes. As more personnel offices obtain connectivity to the Defense Data Network (DDN) this will also become a major means of telecommunication. This manual attempts to provide current message, fax, and mailing addresses but all personnel offices should provide current telephone, message, and DDN (if available) addresses when communicating with each other or with the Defense Data Support Center. The electrical message (TWX) is probably the fastest and most accurate method of communication between the overseas activity and a CONUS activity. The folloiwng DoD overseas activities are those which are responsible for the management of the Priority Placement Program in their serviced area:

OVERSEAS ACTIVITIES

It is essential that Priority Placement Program information be communicated quickly and accurately. The primary means of communication are through electrical message (TWX), the mail system, and by sending Faxes. As more personnel offices obtain connectivity to the Defense Data Network (DDN) this will also become a major means of telecommunication. This manual attempts to provide current message, fax, and mailing addresses but all personnel offices should provide current telephone, message, and DDN (if available) addresses when communicating with each other or with the Defense Data Support Center. The electrical message (TWX) is probably the fastest and most accurate method of communication between the overseas activity and a CONUS activity. The folloiwng DoD overseas activities are those which are responsible for the management of the Priority Placement Program in their serviced area:

OVERSEAS ACTIVITIES

It is essential that Priority Placement Program information be communicated quickly and accurately. The primary means of communication are through electrical message (TWX), the mail system, and by sending Faxes. As more personnel offices obtain connectivity to the Defense Data Network (DDN) this will also become a major means of telecommunication. This manual attempts to provide current message, fax, and mailing addresses but all personnel offices should provide current telephone, message, and DDN (if available) addresses when communicating with each other or with the Defense Data Support Center. The electrical message (TWX) is probably the fastest and most accurate method of communication between the overseas activity and a CONUS activity. The following DoD overseas activities are those which are responsible for the management of the Priority Placement Program in their serviced area:

SUBJECT: 1400.20-2-M Skills Index

TO: Civilian Personnel Officer
All DoD Activities

1. Enclosed is a change to the Skills Index for DoD 1400.20-2-M.

2. The Skills Index has been changed to a listing of skills by state as opposed to the current zone listing. This should make it easier during the couseling session to identify what skills are available.

3. Please remove the Skills Indexes dated April 90 which are located behind each zone. As the new Skills Index is by state and not by zone you should file the entire Skills Index at the back of the manual. Please continue to use the Atlantic, European and Pacific Theater Skills Indexes dated April 90. A replacement Skills Index for overseas will be published in the future.

4. If additional copies are necessary, the Skills Index can be locally printed. Questions concerning the Counseling Manual should be addressed to Ms. Kathleen Childers, DSN 986-5090 or Commercial 513, 296-5090.
