**DEPARTMENT OF DEFENSE
DEFENSE NUCLEAR AGENCY
FY 1995 BUDGET ESTIMATES
REPORT ON INFORMATION TECHNOLOGY SYSTEMS**

EXECUTIVE SUMMARY

Information Technology Initiatives in FY 1995. Defense Nuclear Agency (DNA) will begin implementation of securing writer to reader privacy, secured wide area network login and other DOD security initiatives. The Agency will continue implementation of GOSIP, building upon X400 and X500 to enable virtual terminal access through telnet type services. Continued implementation of the virtual office will continue, to provide users with an office away from the office, while on travel or telecommuting / working from home. Increased emphasis on the Defense Research and Education Network (DREN) will allow initiation of remote collaborative computing for visualization intensive applications, models, and simulations. The major automated systems in support of nuclear stockpile management will complete the prototype phase and begin early production deployment for limited key functions. Numerous databases and systems in support of cooperative threat reduction treaties, verification and safety will be maintained and augmented.

DNA does not meet the reporting requirements for Exhibit 43A Report on Information Systems, due to not having any major systems or CIM financial systems.

Management Process Used to Validate Data: DNA senior management approves all requests for resources through program management reviews before these resources are reflected in the Agency budget.

Cost Changes Between FY1993, FY1994 and FY1995 of Thirty Percent or More.

Item 1A, "Capital Investments - Purchase of Hardware": 1) In FY94, there was a 84% decrease. Decrease is due to the purchase of supercomputing resources (\$15.5 million) in FY93 for support of Agency's Scientific Computing Program having been completed. Also, additional funding planned in FY 94 (\$1.0 million) for follow-on requirements associated with supercomputer resources acquired in FY93 for the Agency's Scientific Computing Program, was deferred to finance higher priority requirements.

Item 3A, "Equipment rental, space, and other operating costs - Lease of Hardware": 1) In FY94, there is a 76% decrease. Decrease is due to the end of a federal lease to ownership between Field Command, DNA and Digital Equipment Corporation (DEC). This hardware represents a dual VAX 3800 with 5 VAX 3100 workstations for support of the Nuclear Inventory Material and Cataloging System (NIMACS).

Item 3A, "Equipment rental, space, and other operating costs - Lease of Hardware": 1) In FY95, there is a 100% decrease due to a one time lease in FY94 of a prototype system for the Nuclear Management Information System (NUMIS), prior to making a procurement.

**DEPARTMENT OF DEFENSE
DEFENSE NUCLEAR AGENCY
FY 1995 BUDGET ESTIMATES
REPORT ON INFORMATION TECHNOLOGY SYSTEMS**

EXECUTIVE SUMMARY

Item 4A, "Commercial Services - ADPE Time": 1) In FY94, there is a 240% increase. Increase is for expanded contractor support to run simulations on ADPE for the Agency's Radiation Sciences Directorate.

Item 4B, "Commercial Services - Voice Communications": 1) In FY94, there is a 100% decrease due to a one time purchase to replace hand held land mobile radios at Johnston Atoll for the agency's Nuclear Operations Program.

Item 4C, "Commercial Services - Data Communications": 1) In FY94, there is a 436% increase. In FY 93, funds were originally established under a planning line for Communications. Due to transition of this service from numerous Commercial Carriers to an integrated network managed by the Supercomputing Center, funds were placed on an IACRO to Los Alamos National Lab (LANL), which performed Communications support under an MOA between DNA / Scientific Computing program and DOE / LANL.

In FY 94 and FY 95 funds are identified within the DNA Scientific Computing program budget as 43 coding 4C "Commercial Services - Data Communications." Coding will be changed to 43 coding 5A "Interagency Services - payments" when budget planning line is executed.

Item 4G, "Commercial Services - Significant Use of Information Technology": 1) In FY94, there is a 100% decrease. This decrease is due to completion of pilot program for system response modeling efforts related to nuclear affects on minuteman 3/W78 missile for the Air Force.

FY94 and FY95 funding was identified in previous budget submissions for the start of build-up efforts related to system response modeling. This modeling which is associated with assessments of nuclear capable aircraft has since been deferred to finance higher priority requirements.

The above decreases for Item 4G are the result of work currently being performed by DNA's Nuclear Operations/Safety Assessment Program.

Point of contact within DNA if additional information is required. Information Management Systems Division.

**DEPARTMENT OF DEFENSE
DEFENSE NUCLEAR AGENCY**

Narrative Statement

1. AIS Title, Number, and CIM Functional Area: GFE/Scientific Computing
2. Responsible Organization: Information Management Systems Division (IMSD)
Scientific Computing Systems Branch (SDSC)
Eugene Stokes, Chief
Date Manager Assigned to System: March 8, 1993

2. Scope:

a. Mission Supported: The Defense Nuclear Agency's primary mission is to support the Office of the Secretary of Defense (OSD), the Joint Chiefs of Staff (JCS), the Military Departments, the Unified and Specified Commands, the Defense Agencies, and other Federal organizations, in analyzing the effects of nuclear and conventional weapons systems, and other aspects of the DoD nuclear program to include non-proliferation, cooperative threat reduction, safe and secure dismantlement, and treaty verification technologies.

GFE Scientific Computing is classified as a separate category of AIS because it provides centralized supercomputing support for all Defense Nuclear Agency (DNA) Research, Development, Test and Evaluation (RDT&E) projects. To ensure its ability to accomplish key elements of its mission, DNA conducts a rigorous RDT&E program that encompasses every aspect of nuclear and conventional weapons effects. This program relies heavily on scientific computing to support the activities conducted by the three principal technical directorates: Shock Physics, Radiation, and Test.

These three directorates share a somewhat common approach to calculations -- as an aid to the basic understanding of the complex and interrelated physical phenomena that occur as the result of nuclear and high energy explosions. In order to understand the uncertainties in the phenomenological models, as well as the parameters associated with these models, numerous sensitivity or parameter studies must be performed. These calculations are very often used to aid in the design of the experiments, models, and simulations, by predicting the type and levels of required measurements. After validation, the calculations are used to provide system-specific predictions of nuclear and conventional weapons effects to DoD.

b. **Functions Performed:** Provide computational support for DoD researchers and their contractors performing RDT&E for DNA projects.

c. **Current Resources Used:** CRAY YMP/M98 and other supercomputer resources provided by Los Alamos National Laboratory (LANL) on a reimbursable basis.

4. **Benefits:** DNA's participation in the LANL environment has proved to be extremely beneficial from both a technical and economic perspective. Verification of the continued cost effectiveness of the LANL/DNA arrangement was performed by comparing LANL to other commercial and government facilities that could provide the computer support required by DNA. Through participation in the LANL resource pooling, DNA avoids approximately \$2 million each fiscal year in contractor add-on costs.

The replacement supercomputer is a significant factor in maintaining DNA's scientific research capability, and containing the long term cost of providing computing support. The recent DoD High Performance Computing Plan, in which DNA was an integral participant, clearly demonstrated that the overall DoD supercomputing infrastructure is saturated and obsolete. It is critical DNA participate in the DoD supercomputer technology renewal process, not only to meet DNA needs, but as a part of the overall DoD modernization. With the unavailability of future underground testing, DNA will increasingly rely on computer modeling and simulation. The supercomputer is our key to the future. The acquisition will also be cost-effective, with an economic pay-back within three years verses the cost of maintaining an obsolete system, while buying high-end computing time on the open market.

A separate formal economic analysis / cost-benefit analysis was not performed for the GFE / Scientific Computing initiative. The economic analysis was included in the development of the Future Year Plan and numerous POM and budget documents.

5. **Milestones:**

<u>Milestone Description</u>	<u>Approved Schedule</u>	<u>Current Estimate</u>	<u>Approval Level</u>
I. Procurement Approved (Internal Agency Approval)	FY1990	FY1990	Director, DNA
II. Competitive Procurement for Supercomputer Resources	FY1993	FY1993	Director, DNA
III. Procure Supercomputer Resources	FY1993	completed	Director, DNA
IV. Install Supercomputer at LANL	FY1993	completed	Director, DNA

6. Major Items of Interest:

a. Status: Procurement of supercomputer resources completed in FY1993.
No outstanding problem areas.

b. Contracts: DNA 001-93-C-0222

c. Changes to Resources:

The DNA/Scientific Computing program plan to purchase and install HPC resources in FY 1997 (\$25.0 Million) has been eliminated due to planned participation by DNA in the expanded DoD RDT&E HPC resources to be supplied by the DoD HPC Modernization Plan.

d. Resources:

(1) Life-Cycle Cost.

Approved Estimate - \$N/A

Current Estimate - \$15.5 million

(2) Program Cost:

Approved Estimate - \$N/A

Current Estimate - \$15.5 million

(3) Sunk Cost - \$15.5 million

(4) Cost to Complete - \$ 0

ADP Requirements/Indefinite Delivery-Quantity Contract**

1. Identification -- All participants:

- a. **Contract Name:** National Photographic Interpretation Contract
- b. **Description of equipment:** Sun Equipment and Workstations

2. Contract Data (for contracts already awarded) -- All participants:

- a. **Contract Number:** 93-K 362300-000
- b. **Estimated Contract Obligations by appropriation (show estimated contract requirements).**

	<u>FY 1994</u>	<u>FY1995</u>	<u>FY1996</u>	<u>FY 1997</u>	<u>FY1998</u>	<u>FY1999</u>
• Procurement						
• O&M						
• Other (RDT&E)	500	500	500	500	500	500

- c. **Units acquired/to be acquired by FY:** 10-15 workstations / per year

3. Contract Data (for contracts already awarded) - Lead Component only:

- a. **Contract awarded to:**
- b. **Brand name(s) and model number(s) of primary hardware and software:**
- c. **Contract Award Date:**
- d. **Contract type:** (requirements or IDIQ)
- e. **Basic contract duration in years:**
- f. **Contract renewal options:**
- g. **Scope of the contract (including purpose):**

<u>FY 1994</u>	<u>FY1995</u>	<u>FY1996</u>	<u>FY 1997</u>	<u>FY1998</u>	<u>FY1999</u>
----------------	---------------	---------------	----------------	---------------	---------------

- h. **Estimated value of contract:**
- i. **Minimum obligation by FY:**

4. Contract Data (for contracts not yet awarded) - All participants:

- a. **Contract Number:**
- b. **Estimated Contract Obligations by appropriation**

<u>FY 1994</u>	<u>FY1995</u>	<u>FY1996</u>	<u>FY 1997</u>	<u>FY1998</u>	<u>FY1999</u>
• Procurement					
• O&M					
• Other (specify)					

- c. **Units acquired/to be acquired by FY:**

5. Solicitation data (for contracts not yet awarded) - Lead Component only

- a. **Is acquisition exempt from the Brooks Bill under the Warner Amendment?**
- b. **If applicable, date and GSA case number of Delegation Procurement?**
- c. **Estimated date of contract award:**
- d. **Scope of the proposed contract:**
- e. **Estimated quantities of hardware, software, or services to be acquired:**
- f. **If the acquisition strategy for this contract involves or involved less than full and open competition, list the acquisition strategy:**
- g. **Justification for this contract. (A copy of the Lead Component's approval documentation may be used as justification.**
